But there is an even greater surprise waiting for the American taxpayer of year 2000, because in year 2000 the Panama Canal Commission folds up and is out of business, much as the Panama Canal Company is now slated for collapse. And once again, Mr. President, the Department of State would have us promise to Panama under these treaties in article XIII of the Panama Canal Treaty that the Panama Canal Commission would leave Panama in year 2000 and turn over management of the operating assets of the canal to Panama clear of any liens or encumbrances. In other words, American taxpayers in year 2000 are going to be forced to swallow one more defunct government corporation with massive liabilities and no assets—that is, unless the Senate refuses to give its consent to this unconscionable arrangement. And it is unconscionable because although we have no way of predicting what it will cost us in year 2000 when the business of the Panama Canal Commission is wound up, nevertheless if the experience of the last few years is any guide, that second debt to the Treasury will be well above the $319 million the taxpayers are being asked to write off today.

Then there is the small matter of $345 million in various so-called soft loans which the State Department has seen fit to promise to Dictator Torrijos. I use the term "small matter" not because I consider it a small matter but because the big thinkers and planners down there at the Department of State figure $345 million is a mere drop in the bucket against the backdrop of $6 billion annually in foreign aid porkbarrel.

Bear in mind, in assessing the magnitude of this figure, that we are talking about a country of only some 1.5 million people. I daresay there are few congressional districts in the United States which would not return to office many times over a Member who could produce that kind of money in development loans. So Panama has got some pretty powerful friends here in Washington when 1.5 million people can get their hand in the till for a side deal involving $345 million in development aid. What they have got is representation without taxation.

But, Mr. President, the really annoying part about this $345 million is not so much the fact that it is an exorbitant sum but that, in blandly promising this $345 million, the Department of State has ignored entirely the Congress and, with the exception of certain appropriated moneys in the military portion of the $345 million, the Department of State plans to get this money for Panama out of existing authority, never intended for that purpose, without any action by the Congress and even without any action by the Senate in consenting to these loans as part of the proposed treaties. Again, the prerogatives of the Congress are being ignored by appointed bureaucrats answerable, they seem to feel, to no one.

But, Mr. President, it is the membership of the Congress which will ultimately answer to the people for this incredible ripoff.

DEFENSE OF THE CANAL

I suppose, Mr. President, that the United States could absorb this financial ripoff. Certainly, we have paid needlessly vast sums in the past down a variety of foreign-aid ratholes and yet continued as a great and strong nation. But other aspects of these proposed treaties are far more dangerous in the long term to our national well-being than are the massive proposed cash payments to Panama. Chief among these considerations is the dangerous and obviously adverse strategic effect of abandoning—after a decent interval—the canal and the Canal Zone to a pro-Marxist dictator who jumps on cue from the Soviet Union and Cuba. What incredible folly.

But this is a deliberative body, and beyond the obvious stupidity of these new strategic proposals, we must study the details. In order to do that—in order to understand completely the immediate dangers of the defense provisions of the proposed treaties, to appreciate fully the sophistry of media arguments on defense rights, and to understand the true extent of our proposed surrender, care must be taken to examine in detail the executive agreement in implementation of article IV of the Panama Canal Treaty, the article which deals with defense. Moreover, further study must be given to the annexes to this executive agreement, to the annexes to the annexes, and to the various notes, minutes, and protocols—all of which form the fabric of the so-called joint military defense we would undertake with Panama.

I am particularly concerned, Mr. President, that the drafters of the canal treaty saw fit to set forth the major substantive defense provisions not in the canal treaty in its article IV, which is entitled "Protection and Defense," but instead in this executive agreement in implementation of article IV—an agreement which is several times as large as the canal treaty itself. Is this an attempt to keep the Senate from considering these matters? Obviously, the answer is yes. Article IV of the canal treaty does not cover a complete printed page, yet the agreement in implementation of article IV is some 53 pages long, excluding annexes and excluding an additional 22 pages of agreed minutes, the minutes themselves having their own annexes. Yet the Vice President has ruled that this agreement is not even before the Senate. So, Mr. President, we have critical defense provisions not in the text of the treaty but rather in this lengthy executive agreement and in other extrinsic documents which could be modified from time to time by the executive branch—but not by the Senate during this debate—with no future requirement whatsoever to obtain the assent of the Senate for future changes.

Moreover, Mr. President, the defense provisions already set forth in this first executive agreement are, on their face, already unworkable and portend a complete withdrawal of U.S. forces from the Canal Zone well in advance of the projected date of A.D. 2000 the administration proposes in this first executive agreement to surrender 10 out of 14 bases. Thus, we are asked at the outset to permit the surrender of 10 out of 14 military bases and to permit our forces defending the canal to be hemmed in from day 1 in 4 relatively small enclaves. These bases would indeed be enclaves because our freedom of action outside of the four bases would be severely limited by the treaty requirement for approval of operations by a joint military board in which the United States and Panama will have equal authority. Apparently, the doctrine of unity of command is imperfectly understood at the Department of State, but the Panamanians no doubt recognize fully that this provision of the executive agreement would give a de facto veto of U.S. operations outside of the four retained bases. An independent chain of command for U.S. forces would be unimpeded only within the four enclaves by the requirement to get Panamanian approval of external operations.

So our forces would be restricted in practice to four relatively small enclaves, and only the naive would doubt that we would very soon see pressure on our forces to withdraw from the four sites retained. That process of withdrawal would be facilitated by the fact that the executive department could close down any one or all of the remaining bases by amendment of the executive agreement with the stroke of a pen without the consent of the Senate or the consent of the Congress. But once closed a base could be reopened only with the consent of Panama.

Now, Mr. President, Senators may not think that this process of accelerated withdrawal is contemplated, but I would call attention to the provision of the executive agreement implementing article IV which provides explicitly that the agreement will be renegotiated every 2 years or upon the request of either government and thus on its face tacitly acknowledges what is coming.

This treaty is for a proposed term of 22 years. Yes, we are going to need tough-minded negotiators if we plan to hang on to these four defense sites for a term of 22 years with the Panamanians hounding us daily for complete withdrawal and with our own Government already proposing to negotiate the matter on a biennial basis or upon request. Frankly, Mr. President, these four defense sites would rest on a foundation of sand if, by Senate consent to ratification of the canal treaty, the Department of State were to be given the right to agree—and they seem pretty agreeable with this dictator down there in Panama—if the Department of State were to be given the right to agree with Panama more or less at any time that the time was propitious to shut down another base.

Finally, Mr. President, I would ask the Senate to consider carefully the feasibility of successful joint military operations with Panamanian forces. Over the long term, we can expect problems. How can we expect full cooperation from an army whose recruits are taught to chant in unison at their recruit training base at Fort Cimmaron, "Down with the gringos, death to the gringos, to the wall with the gringos." No, Mr. President, over the long term we would be naive in the extreme to expect full cooperation from Panama in any joint defense of the canal.

CANAL NEUTRALITY

Closely related to the issue of defense is the failure of the executive branch to negotiate for the United States the true ability to defend the canal after 2000 A.D. Much has been said in the media to the effect that the United States could unilaterally preserve canal neutrality after a full withdrawal of U.S. forces from the Isthmus of Panama, but, Mr. President, a careful reading of the Neutrality Treaty makes it evident that, in fact, the United States would have no such right whatsoever. All the United States has obtained is the obligation to defend the canal when, in the words of Dictator Torrijos, "I push the button."

The Neutrality Treaty simply declares that the Canal Zone is neutral and sets forth an agreement by the United States and Panama that both parties recognize the canal's neutrality. Nowhere is the United States granted permission to determine that the neutrality of the canal is endangered or has been violated, and nowhere is the United States granted the right to intervene in Panama to insure that the canal is not made available to an enemy nation while being denied to our Navy and merchant ships. The leadership amendments have done nothing to improve the situation nor have any of these meaningless and useless reservations.

The so-called right of expeditious transit given to U.S. warships is totally meaningless even with the leadership amendment.

The failure of our negotiators to insist on clear rights of privileged passage for U.S. war vessels in all circumstances could permit Panama to delay the movement of U.S. warships at any time by simply requiring those vessels to transit the isthmus on the same "expeditious" basis as merchant ships of all nations. Since Panama will decide what constitutes an emergency the right to go to the head of the line means nothing.

As Dr. Romulo Escobar Bethancourt, chief negotiator for Panama, put the matter:

> If the gringos with their warships say, "I want to go through first," then that is their problem with the other ships there.

Regrettably, Mr. President, Dr. Escobar's analysis of the practical meaning of our right to expeditious passage, although stated undiplomatically, is nevertheless precisely correct. His idea of an emergency is going to be different from ours. His complete rejection of any claim that the United States is given the right to send troops to preserve canal neutrality is also going to accord accurately with the language in the text. In fact, the truth is, Mr. President, that Dr. Escorbar's construction of the neutrality treaty, unlike the construction placed on it by our own executive department, is a construction based on the language of the treaty itself rather than on wishful thinking or on the misleading

assertions of the mass media. Again, the leadership amendments are not enough and have done nothing of value.

Although much has been said in the media about correcting by these leadership amendments the problems of priority transit and the right of intervention and even though I myself was a cosponsor of these amendments, let us be honest with the people—no amount of band-aid amendments are going to correct the basic faults embodied in any plan which gives control of the canal to Panama at any time. No amount of words in no amount of amendments, no matter how carefully drafted, could ever provide to us the same needed guaranties as are provided by actual possession. Regardless of what these treaties might eventually say on keeping the canal open or on maintaining a regime of neutrality—whatever that might mean—if we give up physical control, this country will still, sooner or later, find itself at the mercy of some petty dictator who decides, probably with the backing of the Soviet Union, to cause difficulties for the United States in using this vital strategic waterway.

Our actions in Panama are sadly reminiscent of the mistaken British policies in surrendering the Suez Canal. Ironically, only 4 months ago, a British nuclear submarine was diverted from the Suez Canal on some pretense or other regarding safety regulations and was diverted around Africa on a journey of months which would otherwise have been only of days. How long will it be before the Panama Canal is closed to our ships in a time of emergency, if these treaties are ratified? When that occurs—and it surely will under these treaties—we will have no option but to attack Panama and recover possession, or to eat crow and begin the long voyage around South America. This is not a choice I would want an American President and Congress to face.

No; these band-aid leadership amendments based on an unsigned communique will not do either. Attempts at clarification are not enough. These treaties must be amended to retain physical control of the canal or they must be rejected entirely.

A NEW CANAL

From the language of the canal treaty, rather than from press reports describing peripheral issues, we have also learned a final fatal defect. According to the terms of the canal treaty—and unlike other provisions, the treaty is quite unambiguous on this point—the United States agrees not to negotiate without express Panamanian consent with any country except Panama for the right to construct an interoceanic canal, either at sea level or using locks, on any other route in the Western Hemisphere.

Mr. President, I feel certain that the Senate must share my astonishment that negotiators for the United States saw fit to preclude—to preclude completely for 22 years—any possibility of construction of a new interoceanic canal without our country first obtaining the express consent of a pro-Marxist and highly unstable military dictatorship. Why was this concession necessary? What did the United States gain from the concession?

I notice with some amusement, Mr. President, that the Republic of Panama purports to grant to the United States of America the right to add a third lane of locks to the existing canal. Inasmuch as the United States already has the right to add a third lane of locks to the existing canal, surely our negotiators did not think that a meaningless concession of that variety was sufficient consideration for giving the Panamanians a veto over any other project we may wish to undertake to connect the two oceans. Certainly, the negotiators for the United States could not have felt that the Panamanian agreement to commit Panama "to study jointly the feasibility of a sea level canal" warranted a countervailing commitment from the United States not to do anything whatsoever without Panamanian permission—but perhaps so. The bizarre behavior of our negotiators has produced other results equally as startling.

In any event, Mr. President, one thing is sure and that is that the Panamanians know they got the best of this bargain. Discussing the sea-level canal issue, chief Panamanian negotiator, Romulo Escobar Bethancourt, on August 19, 1977, with pride explained to the Panamanian National Assembly the unilateral benefits of the so-called sea-level canal options. Dr. Escobar's remarks on the subject, like his remarks on neutrality, are illuminating and are worth studying in full. As Dr. Escobar explains, instead of the United States obtaining an option to build a sea-level canal, the U.S. negotiators gave the Panamanians the option to veto construction of any type of interoceanic canal, sea level or locks, proposed to be built by the United States anywhere in the Western Hemisphere.

Now, Mr. President, committing the United States to deal only with Panama about building another canal is a serious mistake. The best route for a new canal is in Nicaragua, that being the route that Senator Morgan of Alabama favored during consideration of Isthmian routes in the early part of this century. Senator Morgan of Alabama, who was chairman of the Senate Committee on Interoceanic Canals, felt strongly that Nicaragua provided a more favorable political and geographical solution to the immense problems involved in constructing a canal between the two oceans. Retrospectively, he may well have been correct, yet our present treaty negotiators propose to foreclose entirely the option Senator Morgan and many others favored, an option which should at least be kept open. Certainly, with the great volume of Alaskan oil which is only now beginning to come on stream and which must move to gulf and east coast refineries, any relinquishment of the right to negotiate for a route in Nicaragua is a very grave mistake indeed.

RESERVATION, AMENDMENT, AND FILIBUSTER

In summary, Mr. President, I believe that the Senate and equally the House of Representatives should play a significant role in the formulation and revision of these proposed treaties—and I might say in the rejection of these proposed treaties—so that the terms of any new arrangement with Panama can be made fully acceptable to the American people and so that the commercial and national security interests of the United States can be fully protected.

Mr. President, I am sure you know of the early practice of including Senators in delegations sent to foreign countries for the purpose of negotiating treaties. That practice has unhappily in large measure ceased, and the Senate has been more and more asked for consent rather than advice. These treaties provide an excellent opportunity for the Senate to reaffirm its constitutional prerogative and, indeed, duty to advise the executive—to advise the President—in matters of foreign policy, particularly with respect to treaty negotiation. The Senate could have given its advice on the Neutrality Treaty through the amending process. But all substantive amendments were stonewalled. The Canal Treaty should be amended to cure its obvious defects, and since any substantive amendment—as opposed to these band-aid amendments we have seen—and since any substantive amendment will require a renegotiation of the amended treaty, the administration will be advised by these Senate amendments of what is acceptable to the Senate and to the people of the United States and what might later receive Senate consent and the authorization of Congress. And, if necessary, let us amend the Canal Treaty in light of what is best for the people of the United States. Let us renounce the "clear it with Omar" approach in our consideration of these matters of grave importance to the well-being of our country.

Reservations to these treaties alone are worthless. Any reservations must be coupled with substantive amendments explaining to the President what is acceptable to the Senate and to the people of the United States. Reservations can, in practice, affect only the obligations of the United States and, even with Panamanian assent, they can do nothing to bind Panama to a course of action consistent with the best interests of the country. Reservations can be used, as I pointed out earlier, to forbid the President to take any action to exchange instruments of ratification until certain preconditions are met. I believe very strongly that a reservation should be adopted forbidding ratification except if the Congress should see fit to authorize these transfers of U.S. territory and property. I hope that even proponents of these treaties would vote for that reservation since, above all, the Senate has an obligation to prevent a usurpation of the prerogatives and power of the whole Congress.

Reservations, however, cannot be offered, under Senate procedure, until the canal treaty has been considered in detail, first in the Senate sitting as the Committee of the Whole, and second in the Senate itself. In other words, the rules of the Senate provide for a double-barreled approach in consideration of

treaties. These rules are designed to insure that the canal treaty will receive the utmost scrutiny and will be considered with all appropriate deliberation. There will be, therefore, if necessary, ample opportunity for amendment of the canal treaty in the Committee of the Whole and later on the floor of the Senate. Substantive amendments must be adopted to guide the President in renewed negotiation with Panama. Then, in my judgment, this particular canal treaty, being incredibly defective, should be defeated outright, thereby also defeating the neutrality treaty if it is not defeated today, so that there will then be no question but that the Senate and the Congress intend to insist on the will of the people being put into effect by the executive branch regard less of efforts to the contrary.

Finally, Mr. President, I would comment again that I do not now foresee a filibuster of the canal treaty. I do foresee a full discussion, legitimate debate, and consideration of many substantive and serious amendments. Real deliberations will thus occur over amendments of substance which are not cosmetic and which would provide some true safeguards to our vital interests.

But a filibuster would probably be pointless, both because a filibuster could be stopped by 60 Senators whereas the canal treaty and the neutrality treaty could be stopped now or later by only 34 Senators, and because both treaties present questions which should be disposed of without due delay so that the country can turn its attention to other dangerous developments which threaten our security—I refer chiefly to the strategic arms limitation talks which portend disaster for our country and which have in large measure been unfortunately eclipsed by the Panama debate.

But inasmuch as the concerns of the citizens of the United States regarding Panama are now abundantly evident, now that it is abundantly evident that the people will not change the sound judgments they have reached, the Senate should with deliberation, but nevertheless promptly, discharge its duty in considering consent to ratification. No good purpose can be served by having these proposed treaties more or less hang around for years. They should both be put to the test of ratification without delay and without further media posturing in Panama, in Washington, or elsewhere. My own sincere hope is that the wisdom and very clear desires of the people of the United States will be respected for a change and that, accordingly, these treaties will be resoundingly defeated.●

● Mr. MATHIAS. Mr. President, last September President Carter submitted two treaties relating to the future of the Panama Canal to the Senate for ratification. Today, the Senate votes on one of these treaties, the so-called Neutrality Treaty, which sets the guidelines under which this waterway will operate after the year 2000. I will vote in favor of ratification of this treaty.

If it is ratified, we will then take up consideration of the Panama Canal Treaty. The Neutrality Treaty covers the period between the present and the year 2000 when the joint operation of the canal will terminate. It is not necessary to commit my vote on the canal treaty at this time, since it is not before us for voting today.

The Neutrality Treaty commits Panama and the United States to the maintenance of the canal's neutrality after the year 2000. We have amended it in the Senate to clarify both our right to defend the canal should its neutrality be compromised and the right of our ships to go to the head of the line in times of emergency. These amendments strengthen a treaty which already prohibits Panama from granting base rights to any foreign power after the year 2000. Panama is not precluded from doing so under the 1903 treaty. In an action taken yesterday the Senate specified that the United States and Panama are not precluded from agreeing to the presence of U.S. military forces after the year 2000.

I can vote in favor of this treaty, as amended, because I share the belief of our senior military leaders that what is critical to our national interest is not the title deed to the canal but the right to use it. This use, I am persuaded, can best be guaranteed after the year 2000 by ratification of the Neutrality Treaty as amended.

One can support the Neutrality Treaty, as I do, and still have serious reservations about the cumbersome and intricate transfer process incorporated into the Panama Canal Treaty which we will consider next. I will not attempt to itemize all my concerns, but let me touch on two areas of potential difficulty that I see:

First, article XII prohibits the United States from negotiating with another country for the right to construct a seagoing canal without the permission of Panama. This prohibition will last until the year 2000. I find this constraint on our freedom of action very troubling and will want to examine it carefully.

Second, this treaty specifies that substantial payments be made to Panama. The administration claims that these payments will all come out of canal revenues. The distinguished chairman of the Armed Services Committee, JOHN STENNIS, heard testimony before his committee which at least casts doubt on this assertion. The administration acknowledges that if the canal runs deficits in the next 22 years the U.S. Treasury and ultimately the American taxpayer may well have to foot the bill. We do, after all, have to turn over the canal "free of liens and debts." I think we have a right to know what the upper limit of our financial exposure is to this enterprise. This has not yet been made clear.

I should note that this area of concern has particular relevance for Maryland. Twenty percent of the traffic through the Port of Baltimore transits the Panama Canal. If tolls climb too steeply there could be a direct negative impact on Baltimore.

I believe that the American people have the right to know the facts on these treaties. They must ultimately rely on their elected representatives to ask the right questions. I have made a deliberate effort to share my findings on this issue with the people of Maryland. I will continue to do so should we move on to an examination of the Panama Canal Treaty after today's vote.●

● Mr. SASSER. Mr. President, I will vote this afternoon to ratify the Neutrality Treaty. I have made this decision on the basis of the testimony presented to Congress, including that of the Joint Chiefs of Staff who favor ratification, on the basis of my personal inspection of the Canal Zone, on the basis of my conversations with Panamanian leaders, and on the basis of the long-detailed Senate debate.

With the addition of the guaranteed right to expeditious passage for American ships in time of emergency and with the addition of the guaranteed right for the United States to intervene militarily to protect the neutrality of the canal, I am convinced that the military and security rights of the United States are fully protected. I cosponsored these amendments, and I am convinced that they are sufficient to protect American security interests.

Further, I have voted for a reservation which will allow, if agreeable with both the United States and Panama, for American troops to be stationed in Panama after the year 2000. This will insure our ability to protect the canal for our use.

I have always supported a strong American defense, and I will continue to support an American defense posture which is second to none. I am of the opinion that the treaty ratification is consistent with the strongest possible defense.●

● Mr. McCLURE. Mr. President, in order to avoid any misunderstanding about the binding nature of a reservation to a treaty, I want the record to show the definition given in the authoritative Digest of International Law by Marjorie Whiteman, legal adviser to the State Department.

The term "reservation" in treatymaking, according to general international usage, means a formal declaration by a state, when signing, ratifying, or adhering to a treaty, which modifies or limits the substantive effect of one or more of the treaty provisions as between the reserving state and other states party to the treaty. The term reservation is applicable to a statement made at the time of signature and confirmed thereafter by an instrument of ratification or a statement embodied originally in an instrument of ratification, adherence, acceptance, or accession, asserting specific conditions of a character which (if the reserving state becomes a party to the treaty) effectively qualify or modify the application of the treaty in the relations between the reserving state and other states party to the treaty. The condition, in effect, adds something of substance to the treaty or takes something of substance from it, and gives notice to other states concerned that the reserving state will not, in that respect, give effect to the treaty except on such condition.

I understand that this is the position of the administration and of the managers of the bill.●

Mr. HELMS. Mr. President, the Treaty Concerning the Permanent Neutrality

and Operation of the Panama Canal introduces a fundamental change into the military power balance of the Caribbean and the Eastern Pacific. The past 5 weeks have revealed the intentions of the administration, as the negotiators of this treaty, far more clearly than mere perusal of the document of the treaty itself. What is not in the treaty is as important as what is in the treaty. And what is not in the treaty is clearly defined by the amendments, substantive amendments, that have been rejected day after day.

The argument has been put forward on the floor of the Senate that no amendments could be accepted because it would require a second plebiscite in Panama. This argument has no validity whatsoever. It may be true that Panamanian law would require a second plebiscite; nobody in this body can be a judge of Panama's constitutional procedures. The Senator from North Carolina, however, can be forgiven if he refuses to place much credence in the constitutional processes of Panama when Panama's Constitution itself is an emanation of a dictator.

However, the rejection of amendment after amendment on this floor does not so much signify respect for the sensitivities of Dictator Torrijos and his constitution; it indicates subservience to a concept of international relations which deliberately subordinates the interests of the United States to the interests of an international world order. The opponents of the treaties have been wrong in assigning the deficiencies of the treaties to problems in dealing with the Panamanian dictator; the real problem is in the U.S. Department of State and the multinational interests which this administration serves. The trouble is not in the stars, it is within ourselves.

THE AMENDING PROCESS

Let us look at the process of amendment as envisioned in the advise-and-consent process. The proponents of the treaties seem to assume that the only alternatives for the Senate is to approve or to reject any treaty that is sent to this body. The implication is that the executive branch is not only omniscient but infallible as well. It has been said by some that approval of these treaties is a test of the confidence which foreign nations can place in the executive's ability to negotiate and conclude such agreements.

Any nation that deals with the United States has to be aware that it is dealing with republican institutions in which the Executive is not supreme. It may be difficult for totalitarian countries, or one-man dictatorships, to understand that any negotiated draft treaty is not by any means a commitment of the nation; it is only a commitment of the Executive. The Senate has full authority to reject a treaty, and has done so on many occasions.

Indeed, the history of negotiations for isthmian canal projects is cluttered with the wrecks of treaties that never made it through the ratification process. If one counts U.S. treaties that were defeated out-right in the Senate, as well as treaties that were signed, but never presented to the Senate because of overwhelming opposition, the number is startling. Canal treaties were knocked down in 1849, 1850, 1869, 1870, and 1884. In almost every case, the disputes were over the issues of the extent of U.S. sovereign powers over such canals, or the extent of U.S. defense commitments.

Even two canal treaties with Great Britain were substantially altered. The Clayton-Bulwer Treaty of 1850 was approved by the Senate, but it was not promulgated until a major understanding had been dadded. The Hay-Pauncefote Treaty, as I have pointed out in detail on this floor at an earlier time, was amended in three places by the Senate, and as a result, rejected by Great Britain. A second, much improved version of the Hay-Pauncefote Treaty was ratified after a second round of negotiations.

It is also worth noting that the Hay-Herran Treaty with Colombia was approved by the U.S. Senate only after a prolonged filibuster had been mounted against it. President Roosevelt had to convene a special session of the Senate to break the filibuster. It was, of course, then defeated by the Colombian Senate.

It was this history of uncertainty that hung over the whole question of canal treaties when the Hay-Bunau-Varilla Treaty was negotiated. Those who now assert that the 1903 treaty was massively one sided should put themselves in the context of the times. Nearly every such treaty had been defeated. It was by no means a foregone conclusion that the new treaty would be approved. The Hay-Bunau-Varilla Treaty therefore took as its base the Hay-Herran Treaty, plus the amendments which treaty opponents had sought to put into Hay-Herran. In other words, to avoid a disastrous, prolonged Senate battle, the amendments were written into the treaty before it was signed with Panama.

Thus, in effect, the Hay-Bunau-Varilla Treaty represents a two-step process in negotiation and ratification. The Hay-Pauncefote Treaty was achieved in exactly the same way.

Only those who are uninformed about history, or who are determined to avoid the consequences of the lessons of the past can confidently assert that the treaty process requires the Senate to rubberstamp an administration treaty. If my distinguished colleagues approve this treaty as it stands—and it stands without substantive amendments—they will have to live with the fruit of a bad treaty, one which will bring about a profound change in our relations with the rest of the world.

THE CONCEPT OF NEUTRALITY

The concept of neutrality which is expressed in the Neutrality Treaty is fundamentally different from the neutrality which we exercise at the present time. As I pointed out in my discussion of the Hay-Pauncefote Treaty, the Canal Zone is administered as part of the territory of the United States. Without getting into the argument of whether or not we have sovereignty over the zone, it is certainly conceded that we exercise sovereignty over the zone. For practical defense purposes, we defend the Canal Zone as though it were part of U.S. territory. Under the terms of the Hay-Pauncefote Treaty, as incorporated into the Hay-Bunau-Varilla Treaty, we are permitted to fortify and defend the canal, to exclude the vessels of war and auxiliary vessels of nations which are in a state of belligerency with the United States. Our historical practice in World War I and World War II was to do exactly that; our Presidents issued rules of neutrality while we were still neutral in those wars, and then modified those rules to exclude enemy vessels. The notion expounded by some on this floor that we kept enemy vessels from approaching the canal by force of arms, based only upon the law of the sea, is nothing but nonsense. We used our military forces to enforce our treaty rights under Hay-Pauncefote. We had the right to do so, and we protected that right.

Under this proposed Neutrality Treaty, the canal would have to be open to all nations, in time of war as in time of peace. We would keep our military bases for 22 years in Panama, but those bases would have to be used to defend the neutrality of the canal. Thus we could not even forbid the presence of enemy aliens in the canal. Only if thy actually attacked the canal, could we use force against them.

The canal therefore would no longer be defended as part of the United States, nor could our bases there legitimately be used to pursue U.S. defense interests in the hemisphere. The canal would be a totally neutral area, with a crippled U.S. presence there for 22 years. Our presence there would not be the same kind of presence that we have, say, in Guantanamo. We would not be able to use those bases to project U.S. power into the sea-lanes of the world, or to use our air power to keep the peace in the Caribbean. Our Navy and our Air Force would be operating on long-lead lines, with all the attendant problems of communications, protection, and supply. The neutralization of the canal would amount to a neutralization of U.S. presence in that area of the world. While the Soviets are able to use their bases in Cuba as forward bases for air power and sea power, the United States would be withdrawing both symbolically and in actuality.

The Senator from North Carolina proposed that the small intelligence and communications base of Galeta Island be exempted from this withdrawal, as even a symbolic presence of our will to survive. But not even that tiny token of strength was permitted to be retained.

THE FAILURE OF THE LEADERSHIP AMENDMENT

The leadership amendment fails to meet the problem posed by the transfer of the exercise of sovereignty back to Panama. Once the transfer takes place, then the United States has no right to assert its interpretation of treaty rights over another sovereign state. The Senator from North Carolina pointed out that our obligations under the United Nations Charter, the Rio Treaty, and the OAS Charter preclude us from using force or the threat of force for any purpose except individual or collective self-defense.

Since the canal will no longer be defended as part of U.S. territory, it is manifestly absurd to hold that we could defend the canal as part of our own self-defense; we could only defend the canal as part of collective self-defense with the Republic of Panama.

Once the canal falls under Panamanian sovereignty, then Panama is the sole judge of any treaty right or of any interpretation of the regime of neutrality. The treaty proponents are in the position of claiming that the United States has the unilateral right to invade the territory of another nation in order to assert our own interpretation of a treaty right.

Neither the text of the original treaty nor the so-called leadership amendment No. 21 resolves the problem. Both of them outline parallel responsibilities to defend the regime of neutrality. Both avoid resolving the problem of what happens if the two parties to the treaty do not exercise these rights in parallel fashion, but exercise them in contradiction of each other. If one examines the treaties closely, one finds that only the responsibilities are parallel; the ultimate authority for those responsibilities rests only in the sovereignty of Panama. If Panama refuses to accept our interpretation of these treaty rights, then the only recourse, other then surrender, is to use superior force to overwhelm a smaller nation's protests.

The matter would be upon a different footing, however, if Panama agreed in advance to the unilateral exercise of force upon her territory for certain limited purposes. Such an extraordinary power must be specifically reserved when we hand back the exercise of sovereignty; it cannot be merely implied as the administration attempts to infer from the treaty text and from the leadership amendment. The right of unilateral action must be carved out of the bloc of sovereign powers that we are returning.

The Senator from North Carolina attempted to do that by proposing as a substitute for the leadership amendment the text of the security clause which had been negotiated with General Torrijos by former Assistant Secretary of Defense William Clements, Jr. This language specifically spelled out the right of the United States to take such measures, including military measures, as the United States felt necessary. Although this would indeed be an extraordinary right, there was no reason to believe that it would be objectionable to General Torrijos, since he had already, at one point, agreed to it. Whether it would have required another plebiscite is irrelevant. The Senator from North Carolina does not feel that it is excessive for Panama to have two elections in 10 years.

DEFENSE RIGHTS AFTER 2000

Article V of the Neutrality Treaty provides that after the termination of the treaty, "only the Republic of Panama shall operate the canal and maintain military forces, defense sites, and military installations within its national territory." This article is deficient to begin with, for it does nothing to prevent Panama from inviting other national forces into her territory before the year 2000. In this regard, notice should be taken of a question put to the Department of State by the Panama Canal Subcommittee. The question and the Department of State's official reply are as follows:

Question 6. (a) Does Article V of the Neutrality Treaty after the year 2000 prohibit training of foreign troops in Panama? (b) Temporary military exercise by the United States in Panama? (c) Temporary military exercises by Cuba or other non-U.S. or non-Panama military units?

Answer. Article V of the Neutrality Treaty would not prohibit Panama from inviting foreign troops, including those of the United States, to Panama for temporary exercises or training. The Treaty does provide that only Panama shall maintain military forces, defense sites and military installations within its territory. Any exercise or training by foreign troops that we judge constitutes a threat to the Canal would be a violation of the Treaty, and as such it would allow the United States to take appropriate countermeasures.

Mr. President, this answer is remarkable for its admission that article V does not prevent the introduction of Cuban troops—or Soviet troops, for that matter—into Panama. It is further remarkable that the Department of State asserts the right for the United States to take appropriate measures against military forces which the United States—I repeat, the United States—judges to be a violation of the treaty. This is in direct violation of the UN Charter.

In any case, the introduction of U.S. troops into the territory of Panama, without Panama's permission, in order to assert our interpretation of the treaty would be a blatant violation of Panama's territorial integrity and Panama's political processes. Whatever political process Panama would use to come to her interpretation of the impact of the treaty on events or situations on her sovereign territory obviously would be violated.

Thus, if Panama permitted foreign troops to come in for "training" or for any other purpose, an explosive situation would be created, one hardly calculated to maintain the neutrality of the canal. If foreign troops arrived before the year 2000—and it is important to realize that nothing in the Neutrality Treaty forbids this—then the increase of tension, the possibility of dangerous "incidents," the impact of hysteria and emotion among the Panamanian people could effectively close the canal. The planned reduction in force of U.S. citizen employees, combined with the expected exodus of key management and technical employees would make it impossible for the Panama Canal Commission, even though it would be a U.S. agency, to operate the canal without Panamanian cooperation.

If the introduction of foreign troops comes after the year 2000—and one must remember that the State Department has admitted that the treaty permits the "training" of Cuban troops in Panama—then the United States is faced with an impossible situation. Admiral James L. Holloway III testified that the United States would have the ability, even without a presence in the canal area after the year 2000, "to militarily introduce armed forces into the area if required, principally through amphibious operations." And then he added, "without bases, the introduction of U.S. forces would take longer and be more costly."

Costly, in this context, means not only costs in dollars, but costs in terms of casualties, diversion of military assets that could possibly be required somewhere else, and loss of international prestige and support of our allies. An opposed landing would result in the death of Panamanians, as well as the death of Soviets or Cubans or other alien members of an expeditionary force. Thus our choice would not be whether or not to maintain the neutrality of the canal, but whether or not maintenance of the neutrality of the canal would involve us in unacceptable risks in the world balance of power.

The phrase in article V that says that only the Republic of Panama "shall * * * maintain military forces, defense sites and military installations," does not rule out the assistance of alien expeditionary forces under the nominal command of Panamanian officers.

Moreover, even if we were successful in seizing the canal to enforce neutrality, it would be a practical impossibility to operate it after the year 2000. For by that time the practical control of the canal would be totally Panamanian. The United States would have to start from scratch to organize the administration of the canal operation. By that time, the U.S. citizens who had the expertise to run the canal would long since be dispersed or retired; the tasks of introducing sufficient manpower to operate and maintain the canal, even on a temporary basis, would be formidable, and it would require the semipermanent presence of military forces to protect the installations. The problems of running the canal after the year 2000 make most of the talk about our rights after that date an academic exercise.

Ironically, this set of circumstances would develop exactly at the time which the canal would be of greater significance to our naval defenses than it is today. The retirement of our carriers would be almost complete after the year 2000. There is little indication that any more large carriers would be built. Our Navy will be dependent upon smaller ships with an air defense capability—smaller so that they would be more efficient to operate, smaller so that they could go through the canal, and fewer in number so that they are more dependent upon the canal for mobility and logistics.

A study prepared at my request by the Library of Congress pointed out that:

By the end of the century, the inventory of large carriers will decline. Planners anticipate that by then fleet capability will be dispersed among numerous smaller ships that could transit the Panama Canal. The utility of the Canal in permitting strategic mobility would thus be greater for the year 2000 than at present.

The ability of the United States to assert its treaty rights to use military force in Panama after the year 2000 is not simply a function of military capability. It is even questionable whether the re-

introduction of military force could achieve the practical goals which obviously would be important to our needs after the year 2000. The mere right to "negotiate" for bases after the year 2000 is of questionable value, for it imposes no obligation upon Panama, as a sovereign nation, to agree to such bases. Nor is a "reservation" about the United States right to introduce military forces sufficient to impose an obligation upon Panama to permit such introduction of troops. If Panama refuses to permit U.S. troops on her sovereign territory, the only recourse of the United States would be superior force in violation of our other international commitments.

THE REJECTION OF THE 1947 DEFENSE TREATY

The right and ability of a sovereign nation to interpret treaty right with regard to foreign troops on her soil was clearly demonstrated in Panama's rejection of the 1947 Defense Treaty with the United States. The case provides a perfect example of what, in the judgment of the Senator from North Carolina, would be the most likely outcome of any defense arrangement with Panama. Indeed, it even calls into question the viability of the so-called permanent neutrality of the canal itself when it falls into Panamanian hands. The treaty itself may aspire to permanent neutrality, but there is no guarantee that the treaty itself is permanent.

In 1942, the United States had negotiated a defense agreement with Panama under which the United States constructed 131 defense sites in Panama, including 540 buildings. By 1946, 65 of these had been returned to Panama, a total of 10,000 acres. But the most important site, the massive Rio Hato air base, built for the World War II "superfortress" bombers, had not yet been given up.

The 1942 agreement contained a clause that the United States could keep its bases until 1 year after the signing of the definitive treaty of peace. The Panamanians interpreted that clause to mean the signing of the Japanese surrender upon the U.S.S. *Missouri* in 1945. The U.S. State Department reported:

This was not an interpretation to which the United States could subscribe, and it was one which had been rejected by Under Secretary Welles during the negotiations in 1941 and 1942. On June 4, 1941, Welles had informed the Foreign Minister that the sites were requested "for the period which the United States considers them indispensable for the protection of the Canal and . . . they will revert to Panama when the present emergency is past." At no time did the United States regard the military surrender as a "definitive" peace treaty.

Nevertheless, the United States had no choice but to acquiesce. Negotiations were begun for a new defense agreement, an agreement which was finally signed by both countries on December 10, 1947. This agreement was not ratified by the Legislative Assembly. The official U.S. State Department account tells why:

The continued occupation of any defense sites by U.S. forces was vigorously opposed in Panama many months before the signing of the agreement on December 10, 1947. Powerful newspaper criticism developed, and hostility toward the settlement even within the President's official family. Foreign minister Alfaro, responsible for much of the negotiation, turned against the agreement the day before it was signed. The Acting Minister of Foreign Relations, who was favorably inclined toward the agreement, marched with police support upon the University in an unsuccessful attempt to arrest an offending radio broadcaster. Student agitation against the agreement increased to the point of violence, and idlers and Communist agitators assisted in further attempts at intimidation.

The Chargé in Panama cabled to the Secretary of State on December 18:

Amazing development is actual physical fear which has seized most Deputies. President of Assembly spoke of "10,000 boys with knives" which might await them, and several Colon deputies have stated privately that, while they promised Jimenez their votes, they did not promise to allow themselves to be shot at. This sentiment may be favorably affected by speech radioed by President last night, the first word yet spoken in defense of the agreement, and by admission to committee of Alfaro and Harmodio Arias that threat of aggression definitely exists.

When the assembly session opened, the students and agitators filled the galleries. The Chargé cabled a report to the Secretary of State that:

There were constant interruptions from the galleries demanding an immediate vote for rejection.

Parliamentary procedure was set aside for a minority report and an independent motion for rejection. The cable continued:

Due to the galleries' insistence this was voted upon at once by roll call resulting in 51 "yes" . . . In addition to the galleries, a large crowd outside the Assembly, armed with sticks and stones, kept up a continuous uproar. Merchants along the line of march to the Assembly were threatened and forced to close their shops.

In such an atmosphere of emotion and unreason, the base agreement was rejected, despite the support of the Panamanian Government. It is instructive to our purposes to review public comment in the United States at this time.

The New York Times, in a news account on December 24, 1947, by James Reston, reported:

It is understood that General Marshall offered to submit this difference of interpretation to arbitration, but the Panamanian Government would not agree to this procedure.

To avoid the appearance that we were trying to hide behind a disputed interpretation, therefore, the United States Government sought to negotiate a new agreement on the basis of Article Two of the Treaty of Friendship and Cooperation, wnich was signed on March 2, 1936.

Nevertheless, when the Panamanian Assembly refused to ratify the agreement for the use of the bases yesterday, the Administration did not hesitate to announce that it was getting out, and for a specific reason.

This was that, regardless of what we consider to be our legal rights under the Treaties of 1936 and 1942, and regardless of Senor Alfaro's refusal to submit the dispute to arbitration, the United States was not prepared to go before the United Nations and argue against a unanimous vote of the Parliament of a sovereign nation.

Mr. President, the point is exactly the same point that I have been trying to make on the Senate floor these past few weeks. No matter what our treaty rights, and no matter what our interpretation of our treaty rights, we cannot keep our troops in a sovereign nation without that nation's consent.

Indeed, within 24 hours, U.S. troops were withdrawn from the Panama bases. An editorial in the New York Times on December 25, underscored the point:

Within twenty-four hours after the National Assembly of Panama had repudiated a signed agreement leasing to the United States fourteen bases for the defense of the Panama Canal, all American troops stationed at these bases had received orders to evacuate them immediately and to withdraw to the Panama Canal zone, which remains in United States hands. The agreement, signed by the Panamanian Government Dec. 10, was in keeping with both the recent Inter-American Defense Treaty and the specific United States-Panamanian Treaty of Friendship of 1936. These agreements provided for the joint protection of the Panama Canal, the life-line of all inter-American defense arrangements, in particular. But Panama is a sovereign state. And since its National Assembly found it fit to repudiate the signature of its Government, which is its constitutional privilege, there was nothing for the United States to do but bow to Panama's sovereign will.

In doing so, the United States acted in accordance with one of the first principles of both international law and its own foreign policy. That principle is that, irrespective of any differences of opinion regarding interpretation of agreements, no country has the right to keep troops on the territory of another without the express will and consent of that country's legitimate Government. That principle has been steadfastly proclaimed by the United States in cases affecting other countries, and now the United States has demonstrated that it lives up to what it preaches.

Mr. President, the proponents of this present Neutrality Treaty have been arguing just the opposite of this principle. They have been arguing that the United States can dispute Panama's interpretation of the Neutrality Treaty and invade another sovereign state by force to enforce our interpretation.

Such an argument flies in the face of history and justice. In 1948, a report on the loss of the Panamanian bases was made, after an inspection trip, by then U.S. Representative Mike Mansfield, of Montana. I am referring, of course, to the former distinguished majority leader of this Senate. In 1948, Mr. Mansfield reported thus to the House of Representatives:

The United States thus might have taken a sound stand on the facts in refusing to withdraw from the bases in question . . .

The United States instead, however, accepted the verdict of the Panamanian Assembly. The order was given immediately to United States Army forces to yield occupancy of the 14 bases. The United States demonstrated in fact, as well as in spirit, acquiescence in the action taken and thereby refused to become a football in the forthcoming political campaign in Panama.

The smallest of the Latin-American states had rejected a request by the United States in a matter which the United States considered vital to national defense. The United States has kept its moral position clear by

thus meticulously bowing to the sovereignty of this small nation.

The basis of the security of states is territorial integrity. No nation has the right to place its forces in the territory of another without the free consent of the legitimate government of that nation. The United States has kept clear its title to maintain in international relations the position it took in the issue of the occupation by troops of the Soviet Union of Azerbaijan Province of Iran in 1946.

Mr. President, those are the words of one of the most distinguished and most able Members who have ever sat in this body, Mike Mansfield. The statement is perfectly applicable to the circumstances we are discussing today. They are applicable to our defense rights under the Panama Canal Treaty, to our defense rights under the Neutrality Treaty, and to any other defense arrangement with Panama. International law and consistency would force us to take exactly the same position in the future as we did in 1947.

UNITED STATES WITHDRAWAL

Mr. President, if these treaties are ratified, it will constitute an abject withdrawal of the United States from a position it has occupied with honor and integrity and from responsibilities it has executed with the utmost efficiency and service to the world.

These treaties contain no comity, no recognition of the unique role we have played as canal builders and operators. They contain no true equality of partnership. In testing the spirit of the treaties, the Senator from North Carolina proposed a symbolic amendment, a minor provision on the surface, but of considerable significance in revealing the mind-set and attitude of the proponents of the treaties. I proposed that Panama grant to the United States toll free passage for its vessels of war and auxiliary vessels. Such a measure could not possibly have harmed Panama, breached the neutrality of the canal, or wrecked the treaties. One would think that Panama would have been glad to agree to such a proposal. One would think that Panama would have said:

Of course—why did we not think of that ourselves?

But no, not even that token of mutual friendship and respect was admissible by the proponents of the treaties.

These treaties constitute a psychological withdrawal by the leaders of the United States from the proper sphere of world affairs.

FUTURE CONDUCT OF U.S. POLICY

Would the rejection of this treaty handicap the United States in the conduct of its future foreign policy? I think not. Having talked to many of the leaders of Latin America, I understand their doubts of the ability of the United States to protect our interests and theirs. I understand why they are furious that the United States has backed them into a position where they must publicly agree with the United States in a matter about which they were never even consulted. Indeed, the ratification of these treaties as a bilateral arrangement with Panama may permanently alienate most of Latin America in future years. If the canal operation disintegrates as a result of our action, we will almost certainly face permanent alientation.

One of the most eloquent analyses of the consequences of these negotiations was made by a distinguished citizen who himself has been a negotiator—Mr. John M. Cabot, former Assistant Secretary of State, and the negotiator of the 1955 treaty which these treaties would replace. Mr. Cabot wrote:

I have not heard much from the pro-new-treaty advocates about the many concessions the Panamanians have won from us by throwing tantrums, or how, when we sought the implementation of the barely ratified 1936 treaty provisions to secure sites outside the Zone for its defense, they blackmailed us before granting them, or how, after the war, they simply rejected a new treaty granting us their continued use despite the 1936 treaty, or how every concession on our part only led to accelerating demands on theirs . . .

Twenty three years ago, when I was chief U.S. negotiator of what became the treaty of 1955, the question of giving up the canal was not even raised. Who knows what further demands will be made on us 23 years hence? Nobody from the Third World seems to be raising questions about the vast territories the Soviets have seized and hold by force, because they know Communists don't recede territory, and fear them. . . . I dread to think of what will immediately follow if the Senate votes down a new treaty, but I must say I dread equally to think of the probable consequences in the light of the historical record if the Senate agrees to a new treaty and we lose the sovereign rights that are now legally ours.

Mr. President, Ambassador Cabot points out that the choices are difficult. But he also points out that the treaties before us are a false alternative that, in the light of the historical evidence, will gradually lead to a crippling of the United States in foreign policy. The euphoria that will follow if ratification takes place will not last long; and then we will be faced with the cold hard facts of our eroding position.

The approval of these treaties would be a blow at our national will to survive. Such approval would be the beginning of a long, painful descent into ineffectiveness and dependency. Much worse, it would create a vacuum into which the Soviet Union would inevitably be drawn. At the very moment when the Soviets are seeking to gain a commanding position in the Horn of Africa, at the entrance to Suez, the United States is beginning its withdrawal from its most important forward position in the Western Hemisphere. If we lose our control of the waters of this hemisphere, then we will have retreated to a point where we cannot conduct foreign affairs in any independent sense whatsoever.

Mr. President, it is my intention to vote against the Neutrality Treaty and the Panama Canal Treaty both. The debate in this Chamber has been most instructive. I expect that the debate on the Panama Canal Treaty will be equally instructive, and I hope that Senators who are as yet uncertain about the transfer of our sovereign rights in that treaty and the dismantling of the canal organization that it entails will consider that treaty carefully, even if this treaty should be approved. The Senate is fortunate to have a second chance, a chance to reconsider all the ramifications of this proposal. It is not too late to turn back.

RONALD REAGAN'S RETREAT FROM THE FUTURE

● Mr. GRAVEL. Mr. President, opponents of ratification of the new Panama Canal treaties have long hailed Ronald Reagan as their standard-bearer. On the evening of February 8 he addressed the Nation in response to President Carter's "Fireside Chat," and he once again demonstrated his virtuosity as leader and spokesman for the status quo.

Even those of us who are convinced Mr. Reagan is wrong could not fail to be impressed by his smooth presentation. But if we look beneath its glossy surface, we see that his appeal to the American people was once again an attempt to call forth fear and prejudice, not the sense of fair dealing and greatness of spirit which have made this Nation proud.

It is not surprising that Mr. Reagan should cast about in these murky waters for his support. He is, after all, asking us to live in the past. And that is something we will not willingly do unless we are made to fear the future. Let us see if there is reason why we should fear it.

Mr. Reagan assures us there is one point on which "virtually everyone seems to agree:" that "operation of the Panama Canal is vital to our national security interests." He cites as evidence the U.S. dependency on the canal for the "smooth flow of Alaskan oil" and its critical importance in providing our Navy needed mobility.

Mr. Reagan is not only wrong; his very examples show how truly dated his perceptions with respect to the Panama Canal really are.

Of course, the canal contributes to our naval mobility. And that is important. But it is by no means critical or vital to our national defense. The availability of the canal gives us an elasticity for rapid expansion of our maritime capability.

Without it, we would have to turn to other alternatives. The capital investment to build this versatility into existing ports and other elements of our transportation network would run into the billions of dollars. And its use, except in times of emergency, would be uneconomic. The canal is certainly the preferable alternative. But it is not the only possibility; and, it is not vital.

Military planners point out, in fact, that any fixed facility such as the canal must be considered quite vulnerable to attack, and its availability therefore discounted. U.S. strategy has for years proceeded on the assumption of the canal's nonavailability, and has maintained two virtually separate navies in the Atlantic and the Pacific.

The changed nature of naval vessels over the years has also significantly reduced the strategic value of the canal. Our aircraft carriers are too large to pass through, and submarines must surface to transit it, which makes it totally impractical for them to use in the event of hostilities in this hemisphere.

As an example of the strategic shortcomings and military inefficiency of the present canal, let us assume there is an emergency in the Mediterranean which calls for reinforcement from an aircraft carrier task group stationed on the West coast.

Under present conditions, the task group's cruiser and 15 of its destroyers would sail through the canal, reaching Gibraltar in 15 days. Meanwhile, the carrier and an additional 10-destroyer escort would steam the additional 5,000 miles around Cape Horn, not reaching Gibraltar for 25 days. In short, half the task group would lie idle for 10 days while the other half caught up. That is not exactly a case of the Panama Canal providing vital naval mobility.

Mr. Reagan's other example—that the canal meets vital security needs by assuring the smooth flow of Alaskan oil—is equally absurd. It does no such thing. In fact, the oil companies which must move Alaskan oil to Gulf and East coast ports are desperately trying to work out alternatives to the inefficient and costly transshipment of oil through the canal.

Alaskan oil is now delivered in tankers ranging in size from 70,000 to 190,000 deadweight tons (dwt). But since the present canal cannot handle ships larger than 65,000 deadweight tons, the oil must be lightered to smaller vessels for passage through the canal and up to the gulf coast. This operation costs $2.46 per barrel of oil. By contrast, if the proposed Sohio pipeline project is approved, these costs will be reduced to $2.06 per barrel. That translates into billions of dollars of savings.

The real answer to both the problem of naval mobility and the transport of Alaskan oil is construction of a new sea-level canal. The extra mobility this would give our Navy would be equivalent to the acquisition of an entire carrier task force, which costs some $20 billion. And the savings in oil transport costs, over and above those of the cheapest pipeline alternative, would be an additional 25 or 30 cents per barrel of oil. That again means billions in saved costs to American consumers.

The new Panama Canal treaties, which Mr. Reagan tries to tell us are not in America's interest, make provision for a new sea-level canal. With his persistent shortsightedness, Mr. Reagan dismisses this provision as requiring that we "give up the right to build another canal elsewere without Panama's permission." His statement is a perfect example of how his use of half-truths completely distorts what the new treaties really do.

The treaty provision he refers to is paragraph 2(B) of article XII. It reads as follows:

> During the duration of the treaty, the United States of America shall not negotiate with third States for the right to construct an interoceanic canal on any other route in the Western Hemisphere, except as the two parties may otherwise agree.

Mr. Reagan raises the hue and cry that in this provision the United States has given away its right to consider other countries than Panama for a sea-level canal, and he implies that it has done so without getting anything in return.

First, I would point out that the United States did get something in return. Mr. Reagan seems to have overlooked or not understood the meaning of paragraph 2(a) of this same article, which reads as follows:

> No new interoceanic canal shall be constructed in the territory of the Republic of Panama during the duration of this Treaty, except in accordance with the provision of this Treaty, or as the two Parties may otherwise agree.

The effect of this language is to provide the United States a right of first refusal to be involved if a sea-level canal is built in Panama. In other words, Panama has agreed that it will not build a new canal in cooperation with Japan, OPEC, the Soviet Union, or any other third party unless we concur.

Second—and this is equally as important—the concession we made to Panama not to build a canal in any other Central American country is of no practical consequence, because Panama is the only place it makes any sense to build a canal in any case.

The Atlantic-Pacific Interoceanic Canal Study Commission, which spent $22 million to answer this question, initially examined 30 possible routes, one or more of which would have traversed Mexico, Nicaragua, Costa Rica, Panama, and Colombia. This field was then narrowed to eight routes—the only ones the Commission judged sufficiently feasible to warrant indepth investigation. Of these eight routes, four were entirely within Panama, and a fifth was partially within Panama. One of the four routes outside Panama involved construction of a lock (not a sea-level) canal, and was studied only for comparative purposes.

The remaining three non-Panamanian routes were:

Route 8 in Nicaragua and Costa Rica.
Route 23 in Panama and Colombia.
Route 25 in Colombia.

Of these three, Routes 8 and 23 were eliminated by the Commission, because they required excessive excavation. They were also longer, considerably more costly, and located in areas where no harbors to accommodate deep draft vessels were available.

The third non-Panamanian route, No. 25 through Colombia, was selected by the Commission as feasible only if nuclear excavation were employed. Otherwise it would be prohibitively expensive. But the Commission also rejected nuclear excavation as both technically and politically unacceptable. Consequently, they also rejected Route 25 as not viable.

Of the remaining four Panamanian routes, the Commission narrowed its choice to Routes 10 and 14, giving first nod to Route 10. This preferred route involves relatively small excavation quantities; retains the full Panama Canal capability at minimum risk during construction and for as long as desired after construction; and has good supporting facilities available. It lies approximately 10 miles west of the existing canal, just outside the present Canal Zone.

Mr. Reagan's recitation of the history of the 1903 treaty is as faulty as his interpretation of the new one. After correctly noting that the United States first tried to negotiate a canal treaty with Colombia—of which Panama was then a part—he then asserts that the Colombian Government rejected our proposals as a stalling tactic in the hope of eventually getting an additional $40 million, which was the purchase price of the French-owned canal concession.

The Colombians were not, however, the moneygrubbers Mr. Reagan tries to portray them. They rejected the proposed canal treaty—by a unanimous vote of their senate—not in an effort to pocket an extra $40 million, but to preserve their own integrity as a sovereign nation. The U.S.-proposed treaty provided for a 100-year lease, renewable at the sole option of the United States, of a zone of land 10 kilometers wide. Colombian lawyers regarded this as an alienation of part of the national territory, and thus a violation of their constitution. A similar provision was later to be foisted upon a newly independent Panama, but only under a state of duress. No sovereign nation would ever accept such terms willingly.

As President Carter pointed out in his fireside chat, the 1903 treaty was not even signed by a Panamanian, but by a Frenchman named "Phillippe Bunau-Varilla." Mr. Reagan blithely assures us this was simply because the Panamanians themselves named him as Minister Plenipotentiary. Again, Mr. Reagan has handed us a half-truth.

It is true that Philippe Buneau-Varilla came to Washington carrying an honorary Panamanian citizenship and the title Minister Plenipotentiary to the United States. But it is also true that he had major financial interests in the construction of a Panamanian canal dating from the earlier French effort to join the oceans. He was a French citizen and had not set foot in Panama for years, and he acquired his post as envoy only through shrewd maneuvering. The provisional junta of the new Government of Panama had been reluctant to accord him the powers of such high position, and it had originally named him only "confidential agent" before the United States. But Bunau-Varilla was not one to be outmaneuvered and he simply withheld funds the junta desperately needed and refused to take any formal actions on the new government's behalf until he had been granted the powers he felt proper to his station. Once they were in hand, he unilaterally set about negotiating a treaty that served his own personal interests.

Meanwhile, back in Panama the members of the junta were taking what they regarded as necessary steps to assure their interests were properly represented by their French Minister. They appointed Manuel Amador Guerrero and Federico Boyd delegates of the Republic of Panama and provided them written instructions to carry to Bunau-Varilla. He was to negotiate a treaty, "all clauses" of which were to be "previously consulted" with Amador and Boyd. "You will proceed in everything," the junta

directed, "strictly in agreement with them." And the treaty's provisions "must not be any less favorable for Panama than were those of the Hay-Herran Treaty for Colombia."

With these documents in hand, the Panamanian delegates sailed for New York immediately. But when they arrived in Washington 8 days later, events had already passed them by. Four hours before their arrival, Bunau-Varilla had signed a treaty, even though not a single Panamanian was present or had even laid eyes on the document.

It may, of course, be said that Panama did ratify the treaty, even if it was negotiated under questionable circumstances by a Frenchman. And that is indeed what Mr. Reagan tells us. He informs us that—

The Panamanian legislature immediately and unanimously ratified the treaty.

Well, not quite. The provisional junta ratified it; not the legislature. And while it is true that they did so quickly enough, the circumstances of their haste are worth recording. Bunau-Varilla dispatched the treaty to Panama by boat, and then by wire pressured the junta to ratify it immediately upon arrival, suggesting darkly that if they did not act with dispatch, the Colombians might make a better treaty offer, leading the United States to withdraw its support from the new nation. Although the Roosevelt administration had no such intention, rumors were abroad in Panama that Colombia might yet try to regain its lost territory, and the junta feared for the worst. Therefore, they cabled their willingness to ratify the treaty as soon as it arrived. Six days later they did so after having had the 31-page document only 20 hours, and only an English version besides.

So much for the history of the 1903 treaty. Let me now address what Mr. Reagan has to say about the present treaties.

The tone he strikes is an ominous one. He would have us believe that the recently negotiated treaties constitute some radical new aberration in which the United States is suddenly abandoning its historic right to use the Panama Canal. He does allow that the treaties are the outcome of a process of negotiation initiated 14 years ago by then President Lyndon Johnson. But he contends that—

in very recent years the nature of the talks shifted toward a treaty that would take us from our steady, evolutionary course to the uncertainty of radical change in our relationship.

Such a contention is preposterous. Nothing could be more gradual than the process envisioned by the present treaties. Day-to-day operational control of the canal will be methodically turned over to the Panamanians during the next several years, as they develop the necessary expertise. Not until the year 2000—a full 22 years from now—will management of the canal pass entirely from American to Panamanian hands.

These facts simply will not square with Mr. Reagan's statement that the treaties would—

in a single stroke, eliminate the foundation on which our right . . . to permanently use the Canal has been based for more than six decades.

The "foundation" for use of the canal of which Mr. Reagan speaks is what he calls our "rights of sovereignty." He quite correctly points out that there has been much confusion about this issue of sovereignty. But I would not give him very high marks on his efforts to eliminate this confusion.

Mr. Reagan has taken a step in the right direction by distinguishing "rights of sovereignty" from sovereignty itself, and thus admitting that the United States is not, under the terms of the 1903 treaty, sovereign over the Panama Canal Zone. But no sooner has Mr. Reagan brought this bit of lucidity to the discussion than he begins to take it away by making thoroughly confusing assertions about the zone being U.S. territory.

It is not that Mr. Reagan anywhere makes legally false statements about U.S. rights or powers in the Canal Zone. He does not. But he does thoroughly muddy the water by gliding back and forth between the terms "sovereignty," "rights of sovereignty," and "territory." By so doing he contributes to public confusion rather than understanding of this important subject. I would like to go through this matter systematically in an effort to bring some light out of the darkness.

First of all, let me say there is no real importance in what we call a thing so long as we all understand what is meant. There is no magic in the word itself. So it is with "sovereignty." We could just as well use another word if we all agreed on the significance of that word. But then again, nothing is gained by being purely arbitrary. We just as well conform our usage to what is customarily meant by certain words.

Certain crucial tests of what it universally means for a nation to have sovereignty over a given territory are not passed by the United States with respect to the Canal Zone:

First. A person born in the Canal Zone of Panamanian parents is not a U.S. citizen (as he or she would be if born in Louisiana or Alaska).

Second. The exercise of power and authority by the United States in the Canal Zone is dependent upon the use to which the territory is put. If it ceased to be used for the operation of a canal, jurisdiction would revert to Panama.

Third. The United States has no authority to cede the Canal Zone to a third sovereign power, as it obviously would if the territory were its own.

Fourth. U.S. citizens, as well as persons of other nationalities, can live in the zone only if they are employed.

Yet, it is true that the United States has exercised virtually complete jurisdiction over that part of Panamanian territory which comprises the Canal Zone. And it is clear that under the terms of the 1903 treaty, the United States was accorded the right to exercise this jurisdiction to the exclusion of the Republic of Panama. Therefore, Mr. Reagan's term "rights of sovereignty"—while somewhat disingenuous because so confusing—is not strictly wrong so long as we are not led to believe that exercising "rights of sovereignty" gives us the same prerogatives as sovereignty itself. But rather than invite confusion on this point, I believe it far preferable to say simply that the 1903 treaty accords the U.S. jurisdiction in the zone.

There is one other layer of confusion introduced by Mr. Reagan which I would like to strip away. That concerns the territory or real estate encompassed by the Panama Canal Zone. Mr. Reagan is right in saying that we own it, at least in part. But we also own land in other foreign countries. Confusion is brought in when Mr. Reagan implies that ownership of territory is somehow synonymous with sovereignty. I shall quote from his television address at some length to show how he mixes apples and oranges in this way:

The President told us that our Supreme Court has "repeatedly acknowledged" that Panama has sovereignty over the Canal Zone. Not so. The United States Supreme Court in 1907 (in the *Wilson versus Shaw* case) said, "It is hypocritical to contend that the title of the United States is imperfect and that the territory described does not belong to this nation."

Mr. Reagan has quoted the Supreme Court correctly, but he completely misconstrues its intent. The Wilson against Shaw case was brought by a disgruntled taxpayer challenging the power of the U.S. Government to authorize expenditures in Panama. The Court ruled that for the purpose of U.S. expenditure of funds for the construction of the canal, the zone was U.S. territory. But the Court did not equate the possession of territory with the possession of sovereignty, as Mr. Reagan attempts to do. And in 1948 the Supreme Court, in Vermilya-Brown Co., Inc. against Connel, described the Canal Zone as "admittedly territory over which we do not have sovereignty."

It is time Mr. Reagan and other opponents of these treaties quit playing sleight of hand tricks with the sovereignty issue. The United States does not have sovereignty in the Canal Zone and it never has. We do have, under the 1903 Treaty, jurisdiction there. And that jurisdiction is relinquished under the new treaties. If opponents of the treaties think it important to maintain that jurisdiction, then let them say so and defend their position the best they can. But I hope they will stop making misleading statements which imply that we have sovereignty.

Why, in fact, does Mr. Reagan think it important to maintain U.S. jurisdiction in the Canal Zone? He gives us four reasons. First, it makes it "impossible for a government of Panama to expropriate the canal." Beyond that, it gives us "the unquestioned right to operate, maintain, and defend it." Those are the four reasons.

The first reason—to avoid expropriation—is really not a separate reason at all. Under the terms of the new treaties the canal is fully turned over to the Panamanians. Therefore, expropriation

makes no sense. One does not expropriate his own property.

But what about operating, maintaining, and defending the canal? The new treaties do turn operation and maintenance over to Panama. But why should we want to continue to assume these responsibilities? These are the workaday chores of piloting the ships, dredging the canal, oiling the machinery, and collecting the garbage. There are only two reasons why we might want to go on doing these things: Either because the Panamanians cannot or will not.

I hope Mr. Reagan, or no one else for that matter, would be so arrogant as to say that the Panamanians cannot do these mundane tasks, that only Americans have the know-how. This is not, after all, some sophisticated, space-age technology. Certain highly skilled workers are, of course, required. But already 73 percent of the canal's work force is Panamanian, and jobs now filled by Americans can certainly be learned by Panamanians. Moreover, any time lag in acquiring necessary skills can be filled by employing foreign workers, just as the United States does when it lacks necessary expertise.

So the question becomes, Will the Panamanians keep the canal operating and well maintained? Despite Mr. Reagan's dark hints that they may not, there is every reason to believe that they will.

First, smooth operation of the canal is more in Panama's than anyone else's best interest. It is their greatest economic resource. If ships are not passing through smoothly and efficiently, they are not collecting tolls. In any way to impede the flow of traffic would be cutting off their nose to spite their face.

Second, they will have a treaty obligation to keep the canal operating efficiently. Mr. Reagan tries to suggest that they may not live up to this obligation by telling us that "treaties down through history have been broken more often than not." I would remind him that that purported fact applies equally well to the 1903 treaty as to the present treaties. In fact, it applies more so to the old treaty. The very essence of treaties is that they are documents of mutual advantage. So long as they remain of mutual advantage, there is no incentive to break them. That is precisely why it is important to ratify the new Panama Canal treaties. The old treaty is out of step with present-day realities and no longer serves as a document of mutual advantage. The Panamanians regard it as unfair; and so long as they feel this way, our access to a canal through their country is endangered. The mutual accommodation reached in the new treaties will solve this problem, and will assure us that the treaties will no be breached. We have no such assurance with the 1903 treaty.

Mr. Reagan's final concern about relinquishing our jurisdiction of the Canal Zone was over the canal's defense. In the first place he complains that the new treaties would give enemy ships the same right of access to the canal that we have. This is a purely imaginary problem, however, and shows how desperately Mr. Reagan is trying to create a mood of doubt by raising false specters.

It is, of course, true that all nations are assured equal rights to transit the canal. But in time of hostilities no enemy would ever attempt to use the canal. For while it is true that neutrality is guaranteed in the canal itself, the United States is entirely free to destroy enemy vessels on the high seas. It would be a military tactician's delight to have an enemy so stupid as to make himself a sitting duck by approaching such an easily guarded choke point as the entrance to the Panama Canal.

Mr. Reagan's other defense objection boils down to the contention that the Panamanians cannot be trusted to maintain the neutrality of the canal and might resort to obstructionism vis-a-vis the United States. There are two things to ask ourselves about this scenario: First, is it likely to occur? And second, if it does occur, can we deal with it?

The answer to the first question is clearly no, it is not likely to occur. As mentioned before, the Panamanians' economic well-being is closely tied to the smooth operation of the canal. To impede traffic—especially that of the United States, which will be one of her biggest customers—is simply nonsensical. It means lost dollars.

Second, the Panamanian people convey an unmistakably genuine affection for the United States, in spite of their resentment of the present treaty arrangements. An amicable accommodation of them with the new treaties could only serve to reinforce this close bond they already feel.

According to the Chairman of the Joint Chiefs of Staff, Gen. George S. Brown:

> The principal threat to the security of the canal and the Canal Zone continues to be mob action, terrorism, sabotage, and incursion from the Republic of Panama.

For this reason, the good will of Panama is crucial to our ability to defend the canal. As General Brown goes on to say, the degree to which an internal threat might materialize "is a function of Panama's perception of the equity of the resolution of its demands in conjunction with the treaty negotiations. In this context, the security of the canal is most effectively safeguarded in a friendly environment through a cooperative relationship between the United States and Panama." In other words, it is much more probable that Panama will take obstructionist actions under present circumstances than under the arrangements which will prevail if the new treaties are ratified. The treaties therefore reduce the danger Mr. Reagan is worried about, not increase it.

Let us go all the way with Mr. Reagan, however, and assume that the improbable does occur—that at some time after the year 2000 when our troops are withdrawn Panama becomes obstreperous and takes actions which compromise the neutrality guaranteed in the treaty. What can we do?

It is unmistakable that as coguarantors with Panama of the canal's neutrality, we would have the right to take whatever action we deemed necessary, including sending in troops, to restore the regime of neutrality. This assurance is contained within the Neutrality Treaty as drafted, and is spelled out even more precisely in the understanding issued jointly by President Carter and General Torrijos. Moreover, this understanding will be made part of the treaty itself by Senate amendment.

There is one last defense-related objection which should be laid to rest. In the unlikely event that Panama proved uncooperative, an American President might have to order military action in Panama. But would we not, Mr. Reagan suggests darkly, be constrained by the U.N. Charter, which prohibits member nations from using force except in self-defense? The answer is "No," we would not. Article II, section 4 of the Charter, to which Mr. Reagan refers, prohibits such actions only when they are directed at the territorial integrity or political independence of another nation. The Carter-Torrijos understanding which will be made part of the treaty specifically says that protecting the neutrality of the canal would not constitute such action. Again, Mr. Reagan has tried to sell us a red herring.

But as if this were not enough, Mr. Reagan becomes even more demagogic when he discusses the economic aspects of the new treaties. He begins with the rhetorical hyperbole that the treaties entail not only giving the canal away, but also paying the Panamanians to take it. Needless to say, he offers no support for this claim, since there is none. In fact, he immediately begins to dissemble. He acknowledges that under the terms of the treaties, payments to Panama would come from tolls, not from taxes. But he then tries to obscure this truth by telling us that Industry Week magazine reports tolls would have to increase between 25 and 46 percent to support the treaty payments. Then, without producing one shred of evidence, Mr. Reagan suggests that to increase tolls to the required levels would drive business away, and that this would leave the American taxpayer holding the bag.

Absolutely nothing Mr. Reagan has said on this point is correct. First, of the approximately $60 to $70 million in annual revenue which the new treaty arrangement is expected to produce for Panama, only the $10 million annuity payment is a fixed obligation of the United States. All other payments are pegged to revenues from canal operations; and if there are no revenues, then no payments will be due. Thus, Mr. Reagan's original premise that reduced traffic through the canal could result in the American taxpayer footing the bill is simply false. There is no chance that traffic would decline so far that this minimal $10 million could not be paid from canal earnings.

Next, Mr. Reagan has not picked a credible source for his projection that tolls would have to increase by 25 to 46 percent. An analysis of this issue prepared by Arthur Andersen & Co., a long time consultant to the Panama Canal Company completely familiar with

its operation, projects that the required increase would be only 19 to 27 percent.

Finally, there is no truth in Mr. Reagan's implication that the canal operation would suffer a severe loss of traffic and revenues if tolls were increased by his own figure of 25 to 46 percent. Projections prepared by International Research Associates (IRA), another firm intimately familiar with the canal enterprise, show that a toll increase as high as 150 percent would produce 29 percent more revenue than at present, which according to the Arthur Andersen analysis is more than enough to cover all treaty payments. Moreover, IRA's sensitivity analysis shows that the optimal toll increase would be in the neighborhood of 75 to 106 percent. At these rates, the canal would produce 40 percent more income than at present.

This is not to say there will be no costs to the taxpayer associated with the treaties. There will be. But none of the costs will be in the form of payments to Panama. For instance, relocation of defense installations in Panama are estimated at $43 million over 3 years, and an optimal early retirement program for American employees of the canal can be expected to cost $150 million. But costs of this sort are part and parcel of any U.S. treaty arrangement involving facilities abroad. America has defense and commercial interests throughout the world, and there will always be costs associated with promoting and protecting those interests. But the return we get is always much greater than the expense we incur.

There are two other marginal economic issues associated with the treaties made by Mr. Reagan. He mentions the so-called "interest payments" on the canal made each year to the U.S. Treasury, and asserts that "we've never recovered the original costs of building the canal." Mr. Reagan's remark reveals either a misunderstanding or an intentional misrepresentation. It is true that the current U.S. investment in the canal is calculated at $319 million, and there is an annual "interest payment" made to the Treasury on the basis of that figure. But the Treasury has identified total net outlays over the duration of the canal operation from 1903 to 1977 of $322 million and receipts of $328.6 million. In other words, we have taken in $6.6 million more than we have laid out. And this takes no account of the enormous commercial and defense values of the canal over this 70-year period. It is, therefore, totally incorrect to consider our investment in the canal as an indebtedness. The so-called "interest payments" would be better described as a dividend built into the toll structure.

As his parting comment on the economics of the treaties, Mr. Reagan states:

> Panama is having trouble meeting its loan obligations to banks in New York and elsewhere. Perhaps this explains why our negotiators felt they had to pay Panama to take the canal.

This is demagoguery at its worst. As already explained, we are not paying Panama to take the canal. We are entering into a new, mutually advantageous treaty arrangement which does in fact bring economic benefit to both parties.

As serious as this fabrication is, however, it pales beside the maliciousness of Mr. Reagan's further pretension that there exists some sort of causal relationship between two totally independent facts. Yes, it is true that Panama has outstanding debts with a number of international banks. And yes, it is also true that Panama will better be able to meet those obligations once she begins to earn the income from the canal provided in the treaties. But it in no way follows that our negotiators were, as Mr. Reagan implies, intending to bail out the bankers when they negotiated the treaties. That is like saying that, if you have gambling debts and I hire you to mow my lawn, then I must be in the back pocket of the gambling interests, or else I would not have given you a source of income with which you could pay your debts. Such linking of events without any supporting evidence whatsoever is nothing but the crassest defamation of character. Such tactics certainly discredit the objectivity of those who stoop to them.

Mr. President, I undoubtedly have not rebutted every insinuation, every innuendo, every half-truth used by Mr. Reagan in an effort to discredit the Panama Canal treaties. But I hope that I have succeeded in answering enough of them to have shown at least that this is the nature of his argument. It is disheartening to have to take the time to address such sheer demagoguery at such length, but, as this is the nature of so much of what opponents of these treaties have to offer, I felt I could not let it pass in silence.

I ask unanimous consent that the script of the CBS News special report entitled "The Panama Canal—An Opposition View" broadcast on Wednesday, February 8, 1978, be printed in the RECORD.

There being no objection, the script was ordered to be printed in the RECORD, as follows:

THE PANAMA CANAL—AN OPPOSITION VIEW

ANNOUNCER. A CBS Special Report: "The Panama Canal—An Opposition View".

From Washington, here is CBS News Correspondent Roger Mudd.

ROGER MUDD. Good evening. Last week President Carter, in a fireside chat, appealed for passage of the Panama Canal treaties. Today the United States Senate opened debate on those treaties. Last week the President said the treaties were in the highest national interest, would strengthen our world position and our security, and would improve trade. The President also said the issue was not a partisan one.

But the issue has generated considerable controversy and heated debate, and therefore CBS has offered the former Republican Governor of California, Ronald Reagan, as a responsible spokesman for the opposing view, an opportunity to discuss the Canal treaties. Mr. Reagan's remarks were recorded earlier this week in Los Angeles.

RONALD REAGAN. I appreciate this opportunity to discuss President Carter's recent television talk on the Panama Canal, and the treaties that he has proposed, which are now before the United States Senate for debate.

A great deal has been said and written about the Panama Canal in recent months. Despite many different points of view about many different aspects of the issue, on one point virtually everyone seems to agree. The continued smooth and secure operation of the Panama Canal is vital to our national security interests and those of the entire Western Hemisphere. Some of our Latin American neighbor states depend on the Canal to such an extent that more than two-thirds of their commerce goes through it every year. We ourselves will depend on the Canal for the smooth flow of Alaskan oil by tanker to our Gulf Coast ports for refining. Our Naval experts agree that, with our Navy shrunken in size to its smallest point since before World War II, mobility is critically important, and the Canal is a vital factor in maintaining that mobility.

In his talk, President Carter said, "What we want is the permanent right to use the Canal." I agree with that, as I'm sure you do.

We have that permanent right right now. But will be effectively have it if the Carter-Torrijos treaties are ratified? I have very serious doubts that we will. The President in his fireside chat discussed the background of this issue so briefly—perhaps because of the press of time—that he left the mistaken impression that we acquired the Canal Zone by some underhanded means; that the Canal was somehow forced on Panama. Nothing could be further from the truth. Panama, a province of Colombia prior to 1903, had attempted repeatedly to become an independent nation—without success. Separated by mountains and jungle from the capital of Colombia, the people on the Isthmus of Panama felt neglected and forgotten. And maybe they were, in their disease-infested swamps and jungles. Colombia had given a French company permission to build a canal through the province of Panama. When the French failed and gave up, our Congress authorized the President to negotiate a treaty with Colombia, and to buy out the French interest for $40-million. Seeing a chance to get the $40-million for itself by stalling, the Colombian government rejected our proposals. The Panamanians saw their chance and rebelled, notifying the United States at the same time that the new Republic of Panama would sign a Canal treaty. The revolution was bloodless and successful.

President Carter made the point that our 1903 treaty was not even signed by a Panamanian, as if this somehow indicated that we had forced Panama to accept it. Well, the treaty was signed by a Frenchman named Philippe Bunau-Varilla, but only because the Panamanians themselves named him minister plenipotentiary for the purpose of negotiating a Canal treaty with us—which he did. The people of Panama were so pleased with what he had done, they erected a statute in his honor.

We were also told the other night that the people of Panama have never been satisfied with the treaty. Yet the first President of Panama, at his inauguration, said he was about to preside over a great economic boom and the end of centuries of plague. The Panamanian legislature immediately and unanimously ratified the treaty. It took our own Senate three months, and the vote was not unanimous. To top it off, every town council in the new Republic of Panama voted its endorsement of the treaty. You might say the Republic of Panama and the Canal are Siamese twins: one couldn't have been born without the other. The Canal is so vital to Panama's economy that the Panamanians have the highest per capita income in Central America, and the fourth highest in all of Latin America.

Our relationship with Panama has been an evolutionary one. Accommodations have been made to fit changing times. We entered into additional treaties in 1936 and again in 1955, and each time the accommodations benefited Panama. Negotiations for another

treaty began under the late President Johnson. But in very recent years the nature of the talks shifted toward a treaty that would take us from our steady, evolutionary course to the uncertainty of radical change in our relationship. The treaties that the Carter Administration announced last August are the result of that sharp change of direction in our negotiating approach. The new treaties would, in a single stroke, eliminate the foundation on which our right—and our ability—to permanently use the Canal has been based for more than six decades. Until recently the United States government had always taken the position that we could discuss and negotiate virtually any matter that would enhance our relationship with Panama—except the rights of sovereignty we hold in the Canal Zone. Those were not negotiable. The negotiations leading to the treaties now under discussion were carried out by two Democratic and two Republican Administrations. This is an American, not a partisan, issue.

Let's take a look at what those treaties would do. As you know, there are two of them. The first one is called the Panama Canal Treaty. The second is titled: Treaty Concerning the Permanent Neutrality and Operation of the Panama Canal. If the first treaty is ratified, the existing 1903 treaty will be cancelled entirely. Unlike the 1936 and 1955 treaties, these new ones do not simply adjust or amplify the basic treaty. They eliminate it. And it is the one that gives us the right we now have to permanently operate and use the Panama Canal. Once ratified, the first new treaty goes into effect six months later, at which time the Canal Zone ceases to exist. While we would be granted the right to manage, operate and maintain the Canal till the end of 1999, the rights of sovereignty we presently have would be eliminated. There's been a lot of confusion over this matter of rights of sovereignty, and the fireside chat the other night didn't reduce that confusion. In trying to answer the question, "Why are we giving away the Canal Zone?" President Carter said: "We do not own the Panama Canal Zone. We have never had sovereignty over it. We have only had the right to use it." Well, that is not quite accurate. What we have—and this is very important to us—are the rights of sovereignty. And that 1903 treaty is very explicit, as the new treaties are not. Listen to this quote: "The Republic of Panama grants to the United States all the rights, power and authority within the Zone which the United States would possess and exercise if it were the sovereign of the territory, to the entire exclusion of the exercise by the Republic of Panama of any such sovereign rights, power and authority." Unquote. Now, that isn't hard to understand, is it?

There can be no doubt our government intended to acquire a firm, unshakable legal basis for building, operating and defending the Canal.

The Canal Zone is not a last vestige of colonialism. It has never been a colony. We didn't acquire it for the purpose of exploiting mineral wealth or harvesting crops or engaging in trade. It has been a single-purpose enterprise. Only one nation can exercise sovereignty over a given piece of territory at a given time. The 1903 treaty makes it clear that the United States, and not the Republic of Panama, exercises sovereignty in the Canal Zone. The President, however, said on television that we are only paying rent for the Canal Zone. Read the 1903 treaty a thousand times and you'll never once see the words "rent" or "lease". We paid Panama $10 million outright and annual payments beginning nine years later, and according to the treaty, that was, quote: "The price for the rights, powers and privileges granted in this convention." Unquote. We did more. We went into the Zone and bought, in fee simple, every privately owned piece of property, including homesteads and squatter's rights. We not only have the rights of sovereignty; we are the owners of the real estate.

The President told us that our Supreme Court has repeatedly acknowledged that Panama has sovereignty over the Canal Zone. Not so. The United States Supreme Court, in 1907 in the Wilson versus Shaw case, said: "It is hypocritical to contend that the title of the United States is imperfect, and that the territory described does not belong to this nation." In 1971 the U.S. Court of Appeals ruled: "The Canal Zone is an unincorporated territory of the United States." Unquote.

Why are the rights of sovereignty so important? Well, for one thing, they make it impossible for a government of Panama to expropriate the Canal, and they give us the unquestioned right to operate, maintain and defend it. We can be proud of the way we've used that right. For 64 years we've run the Canal at no profit, and kept it open to all peaceful shipping of the world. Through four wars it has been an important link in our Hemispheric defense. We've established bases in the Zone where our own forces receive training, and where we've given training to the soldiers of our allies in this Hemisphere. As a matter of fact, that's where General Torrijos received his training. Through four wars there's been no sabotage, and we've successfully kept the ships of our enemies away from the Canal. Yet the new treaties would give enemy ships the same right of access to the Canal that we have. We've been warned there will be trouble if we don't ratify these treaties; indeed, these treaties were negotiated under threats of bloodshed and rioting. Well, before we get frightened into ratifying these treaties, let us remember there are no guerrilla bands roaming the jungles of Panama. It is General Torrijos' national guard which has the guns in Panama and, as the President himself pointed out, the Canal's continued operation is vital to the economy of Panama. They aren't about to blow it up. Nor can a lone terrorist with a stick of dynamite under his coat sabotage the Canal. Experts on Canal operations say it would take a trained demolition squad with access—which is not now possible—and an extended period of time to do any real damage.

George F. Kennan, the eminent scholar and former diplomat, has said: "One can only quail at the prospect of attempting to operate and protect the Canal in some sort of partnership with the Panamanians. An arrangement of this nature would weaken the American position without giving permanent and complete satisfaction to the Panamanians." We are not talking about a partnership in a mountain cabin. We're talking about our national security, and where that is concerned, we must always be skeptical and on guard against the worst that might happen. In his book, The Treaty Trap, Lawrence Bellenson documents that treaties down through history have been broken more often than not. The so-called partnership of which President Carter speaks, and of which Ambassador Kennan is worried, is almost certain to build up pressures in Panama. We had a portent of these just a few days after the new treaties were announced last August. The government-sponsored Panamanian Student Federation said it would support the treaties, but its Secretary-General declared, "This struggle will be continuous and prolonged until the last invading soldier leaves." Well, those invading soldiers are, of course, American GI's.

Panama, a nation with a history of unpredictable politics, could find the pressures building to the point where its ruling regime might one day respond by declaring the new treaties obsolete, declare the Canal a national asset, and tell us: "Yankees, go home!" Short of that, there could be disruptions of support services, such as police, fire protection, traffic management and garbage collection; all of which we provide now, but which we will be getting from Panama if the treaties are ratified, and for which we will pay $10-million a year. Or there might be a quiet request for us to withdraw most of our troops, so that they're not a provocative symbol to potential rioters. Of course, we don't know whether these or similar scenarios will come to pass if the new treaties are ratified—but we do know they can't come to pass under the 1903 treaty. If the Senate ratifies the new Panama Canal treaty, we'll be exchanging a sure thing for a mere hope that all will go well.

If one day we were told to get out, we would, of course, consider that a breaking of the treaty; but with recent events in mind, would we risk a confrontation or would we comply? Or suppose at some point we declared that the Canal's neutrality had been violated, but Panama said it hadn't; if we sent our armed forces in, would we be violating that part of the treaty which says we can't intervene in Panama's internal affairs? If the Canal Zone becomes part of Panama, whatever happens there is an internal affair of Panama.

The President told us, quote: "We can take whatever military action is necessary to make sure that the Canal always remains open and safe." Unquote. Doesn't this bring up the possibility that one day after the Canal Zone has been eliminated an American President might be faced with having to order airborne and amphibious action there? And what of the UN charter which prohibits member nations from using force except in self-defense? We sternly reminded Britain, France and Israel of that in 1956, when Egypt's Nasser seized the Suez Canal. The so-called "neutrality treaty" is so ambiguous that while the Administration in Washington was telling us that it gave our Naval ships the right to go to the head of the line in case of an emergency, Panamanian officials repeatedly denied this to their own people. Romulo Escobar Bethancourt, Panama's chief treaty negotiator and Torrijos' chief advisor, said: "If the gringos with their warships say, 'I want to go through first,' then that is their problem with the other ships waiting there." President Carter pointed to the treaty phrase "expeditious passage"; Escobar, on the other hand, has said he gave us that word "expeditious" after refusing the term "privileged." He said "expeditious" was meaningless and intended only to help the U.S. negotiators sell the treaties to the Pentagon. This caused quite a flap, as you'll recall. The President and General Torrijos met in Washington and gave out a statement supposedly confirming our right of priority passage and our unilateral right to defend the Canal after the turn of the century.

The other night in his talk, President Carter tried to give the impression that this statement somehow has the same force as a treaty. It does not. It is not legally binding. It is simply the announced opinion of two heads of state, and it was signed by no one. General Torrijos, when he got home to Panama, even boasted that he had signed nothing—as if to say it was all a public relations exercise to help the White House sell the treaties to the American people.

Many Senators are deeply concerned about this problem, and the Senate Foreign Relations Committee voted to recommend a new article in the neutrality treaty to take care of it. That was on a Friday, not quite two weeks ago The following Monday the State Department sent a spokesman to the committee asking that the changes be made in existing paragraphs of the treaty rather than by adding a new one. Well, it turns out that the Panamanians had burned up the telephone wires over that weekend urging the change It doesn't sound all that important. Why were they so concerned? Well, it reveals a deep difference in interpretation

between ourselves and Panamanians; also why we can't afford to take anything for granted where treaties are concerned. Our Senate has been talking consistently about amendments to the treaties. But the Spanish word for amendment, *enmienda*, has a different meaning. Professor Cesar Quintero, the Dean of Law at the National University of Panama, put it this way. On January 20th, he said, quote: "The word 'amendment' in English is a substantive reform. In Spanish, we speak of correcting something. The word 'amendment' does not have the same strength in Spanish as it does in English." Unquote. So, in Panamanian eyes, adding the changes to existing paragraphs amounts to a minor change, but adding a new paragraph or article would be a major change. The treaties would have to be submitted to Panamanian people for another plebiscite, and that Torrijos doesn't want to do.

If there can be such misunderstanding in one area, what lies ahead in this unchartered course President Carter would have us take? In the process of building what has been called the eighth wonder of the world, we wiped out diseases that had plagued Panama and had killed more than 20,000 workers when the French attempted to build a canal. We gave Panama a lower death rate than we have in the United States. We built sanitation, power and water systems for Panama. We built schools, hospitals, bridges and highways. The value of what we're proposing to give away is estimated to be as high as six to ten billion dollars, depending on whose estimate you choose. We're debating over treaties by which we not only will give away the Canal, we'll also pay a considerable amount to the government of Panama for taking it off our hands. We also promise to turn it over debt-free to Panama. In addition to some hundreds of millions of dollars in loans and aid, we would pay the 10-million a year I mentioned for municipal-type services, another 10-million from Canal operations each year, plus 30 cents a ton on cargo going through the Canal. Estimates on the total range up to seventy, even eighty million dollars a year. And to top it off, under the new treaties we would give up the right to build another Canal elsewhere without Panama's permission.

The President says we aren't paying Panama; that the payments would come from tolls paid by ships using the Canal and not from tax dollars. But the law says the Canal must be self-supporting, so an increase in tolls is almost a certainty. *Industry Week* magazine says its estimated tolls must rise between 25 and 46 percent above the current level of a dollar twenty-nine per ton. The publication quotes a consultant of the Panama Canal Company as saying that the payment provisions of the treaty give him little optimism that the Canal will be financially viable. Shippers who use the Canal are worried, too. The Gulf Ports Association, representing 23 U.S. ports through which move nearly 40 percent of our water-borne commerce, warns that such toll increases may price some American exports—notably grain and machinery to Eastern and Pacific markets—out of world competition. I'm sure I don't need to remind you what that would mean to American farmers and in jobs.

Who will pay Panama its share of the revenues as promised in the treaties? And what about the 43-million the Army says it will cost to rearrange our military bases? Then there is some $16-million in interest paid to the United States Treasury annually, because we've never recovered the original cost of building the Canal. Won't the American taxpayers have to come up with all of that?

Since General Torrijos came to power, Panama's national debt has climbed steeply. The country's economy is in serious difficulty, and Panama is having trouble meeting its loan obligations to banks in New York and elsewhere. Perhaps this explains why our negotiators felt they had to pay Panama to take the Canal.

We are talking here about a huge and complex public enterprise—one that is difficult to operate and maintain, yet we've done so efficiently for more than 60 years. The government of Panama, operating much smaller utilities, some of them expropriated, doesn't have an encouraging record of public management. It is not a matter of skill; it's a matter of effective, honest management.

The President made one other point in his talk which deserves comment, namely that these treaties giving up the Canal—quote—"have overwhelming support throughout Latin America"—unquote Well, the fact is only a few states neighboring Panama have been actively supporting these treaties. Many others have repeatedly expressed, in private, their concern. Now we have very convincing evidence of that concern. Last week, Lieutenant General Gordon Sumner, Jr.—chairman of the 19-nation Inter-American Defense Board, the only group specifically charged with defense of the Western Hemisphere—testified before the Senate Armed Services Committee. He told the Senators he had talked with high-level officials of all the 18 Latin American nations in the Organization. He said: "All express a very grave concern about the treaties. They see the possibility there for conflict. They also see the possibility for mischief-making by the Communists, and there is not one of these countries that does not have some type of Communist subversion or terrorism going on. And they are very concerned about the economics of the Canal. When they look at what this is going to cost them, they have very serious reservations. Almost without exception, they have expressed their opinion that the way the United States has operated the Canal has been fair. Because they are faced now with an unknown situation, they are concerned that the Torrijos government will be unable, or unwilling, to keeping the Canal in operation." Unquote. The General then asked for early retirement from active duty.

The President made much of the support for the treaties by the Joint Chiefs of Staff. Well, our military is under civilian control. The President is Commander in Chief. The military must accept his policy decisions or resign. It is significant that in a poll 340 former top-ranking generals and admirals, now retired and free to speak their minds, are strongly opposed to ratification of the treaties, while only seven are in favor. Many distinguished veterans of the military and the diplomatic service have expressed their concern that our friends and allies worldwide would see our giving up the Canal as another indication of American weakness: a retreat from the free world leadership which is our responsibility. Can we afford this in today's world?

I believe these proposed treaties contain fatal flaws. Their ratification would not be in our national interest. But I also believe we should continue to seek ways to eliminate friction with the people of Panama, and to strengthen the bond between our two countries. Great nations which believe in progressive and friendly relations with their neighbors do not ignore those neighbors, and we must not ignore our friends, the people of Panama, and their aspirations. We must seek alternatives to these treaties, but alternatives that will also preserve our basic right to use the Canal permanently. There are some features of the proposed Panama Canal treaty which have merit. It would permit us to embark on the third-lock modernization program. This would take about 10 years and one to two billion dollars to complete. Its construction could directly benefit the people and economy of Panama. And once completed, the Canal would be able to handle all but a few of the world's largest ships. That treaty also introduces the idea of a governing board which would have Panamanian as well as United States representatives. Why not go further and consider having some seats, probably on a rotating basis, for the user nations, thus increasing participation by other Latin American nations? We should consider negotiations to adjust Canal Zone boundaries, so that areas no longer needed by us could be turned over to Panama for commercial development. There's also the possibility of offering Panamanian citizens who break the law in the Canal Zone the option of being tried in their court system or ours. We should discuss the possibility of building more vehicular bridges over the Canal to improve access to either side. Sovereignty easements on the bridge might even be part of that discussion.

Isn't it time for us to take a collective deep breath, to realize that our negotiators took a wrong turn some months ago, but that the mistakes can be corrected? We don't have to plunge into a series of fresh mistakes to replace a workable, sensible and time-tested system with a bundle of uncertainties. Greatness may be measured in many ways. Carrying out our responsibilities as a nation is one of them. Being the middle point, the vital center of the free world, is not an easy responsibility. We have shown in recent years that we can get very weary of shouldering our burdens. But if not us, then who?

The Panama Canal is vital to the free world, and that world depends on us. It's part of our rendezvous with destiny. We must not shrink from it, for the ultimate price we pay may one day be our own freedom.

Thank you and good night.

MUDD. That, of course, was Ronald Reagan, the former Republican Governor of California and himself a—a candidate for the Republican nomination in 1976. This evening the former Governor launched a general attack on President Carter's defense of the Panama Canal treaties. Mr. Reagan said it contained, as proposed, fatal flaws. He said he doubts that the United States will have the permanent right to use the Canal. He says that the United States legally acquired the Canal in the beginning. He claims that President Carter negotiators took a sharp break from past negotiations. He said that we were not in a partnership with Panama in a mountain cabin, but that the two countries were dealing with each other's national security. He generally sketched a picture of chaos and of disruptive operation, and the possibility of seizure by Panama of the Canal. And he attacked President Carter's explanation as being, if not less than truthful, at least fudging with the facts.

And at the end, he proposed that certain steps be made to ease the pinch on the Panamanians, who have perhaps general complaints about transgressions against their sovereignty.

With me this evening to discuss and analyze the former Governor's remarks are, first, Bob Schieffer, who covers the White House, and Phil Jones, who covers Capitol Hill.

Bob, that was what you call a consummate performance. Of course, Governor Reagan is a former professional actor himself. But beside his performance, what did you think of the substance and its impact on President Carter's presentation?

BOB SCHIEFFER. Well, it's really—you know, it's really difficult, in a sense, to comment on it, because this in—because of just what it is: this is an answer to an argument that's already been given by President Carter. Mr. Reagan repeated so many of those things he said during the Republican primary campaign, and he is an effective speaker. There's no question about that. Just watching him during this speech reminded me why he was able to make the Panama Canal such an issue in the Republican campaign, and why it was so difficult for President Ford to deal

with. As that campaign began, no one really thought that the Panama Canal was something that (most people hadn't given a lot of thought to, it seems to me, until that campaign came along) would really become an issue, but Reagan made it an issue, and he—and he hammered at it again and again, using some of these same points we saw him make tonight. Besides that, this represents just a differing point of view and a differing philosophy about what the Canal is really all about. You know President Carter thinks that the way we acquired the Canal is a kind of a black mark on America's history. Reagan, clearly, does not. He talks about the effects of the new treaties. It seemed to me one of the things he did not talk about—he talked about again and again how this treaty—what if a new government decides to just say these new treaties are—are no longer valid. It seems to me the other side of the argument is, if they can declare the new treaties invalid, they could also declare the old treaties invalid. And, of course, the Carter Administration feels that the Canal is a—a symbol of American imperialism; that it's—that it's resented throughout all of South America; and that it—it could be the focal point for anti-American feelings and trouble down the road. Again, Mr.—Mr. Reagan, clearly, does not agree with that.

MUDD. Let me ask Phil Jones whether he saw any flaws in the Reagan speech. Are there misstatements, as he accused Carter made?

PHIL JONES. Well, I don't think that there are any flaws as such. Certainly he took his own interpretation of—of the history of the Canal, as—as both of you have pointed out. One—one area where he got very close to having a little flaw was where he talked about the Panamanians had been burning up the telephone lines after they understood that the Foreign Relations Committee was going to suggest new articles. Well, that's not exactly true. What happened was, Senator Alan Cranston, who is the assistant majority leader in the Senate, was in Panama at the time the Foreign Relations Committee was dealing with this, and he talked to the Panamanians on how they would react if new articles were put in there, and they told him that this was going to cause trouble, and it would probably provoke another plebiscite. It was Cranston and the Senators who were burning up the telephone lines back—back to the Capitol. I think that Mr. Reagan made a big point out of the cost—what it's going to cost the taxpayers. That is something that could make a difference in the outcome of this. There are a lot of the Senators who—who want to support the treaties, think it's the right thing to do, but yet they are afraid that the taxpayers are going to resent a big bill it's going to come to.

MUDD. One thing he didn't—one phrase he didn't use was "tinhorn dictator". He didn't—

JONES. Not—

MUDD. Refer to the—

JONES. One—one other point. He talked about how easy it is to defend this Canal, and certainly there are many military men who think you can do this. There are some others who don't think you can do it. For example, retired General Maxwell Taylor testified on Capitol Hill that this—this Canal could be brought to a close by just a couple of Panamanians standing alongside with rifles, firing at ships. So it is not that easy to defend and not that easy to keep open.

MUDD. Well, with the opening of the debate in the Senate it appears that, from what I can gather, some major changes are going to be made in the—in the Canal. And what we are seeing tonight perhaps was the opening gun in—in the 1980 campaign, because Ronald Reagan obviously is still a very tough customer.

For Bob Schieffer and Phil Jones, Roger Mudd, CBS News, Washington.

ANNOUNCER. "The Panama Canal—An Opposition View" has been a CBS News Special Report.●

The PRESIDING OFFICER. The hour of 3 o'clock having arrived, the time between now and 4 p.m. shall be equally divided between and controlled by the Senator from Idaho (Mr. CHURCH) and the Senator from Nevada (Mr. LAXALT).

Who yields time?

Mr. CHURCH. Mr. President, I am happy to yield such time as he may require to the distinguished minority leader, Senator BAKER.

Mr. BAKER. Mr. President, I ask that I may have not to exceed 15 minutes.

Mr. CHURCH. I am happy to yield 15 minutes to the Senator.

The PRESIDING OFFICER. The Senator is recognized for 15 minutes.

Mr. BAKER. Mr. President, this has been a difficult time for the Senate of the United States, and our trial and our time of decision is not yet over. As we approach the last hour of debate, we are mindful of the fact that the vote on the neutrality treaty will be very close.

We are reminded at this time that there is still another treaty. Following the consideration of the neutrality treaty, the Senate will turn its attention to the second treaty, the Panama Canal treaty. No fixed time has been set for consideration of that second treaty.

Mr. President, I think the Senate has comported itself well in these days of debate. We as a body, and Senators individually have conducted themselves in the highest traditions of the Senate of the United States. I believe every Member of this body has taken to heart fully and completely his or her responsibility under the Constitution to advise and consent, with the President of the United States, in the making of treaties.

This is a matter of extraordinary importance to the country and, indeed, to the Senate. How well we conduct ourselves, how thoroughly we extend this debate, and how carefully we make our judgment will form, to a large degree, the basis on which this country judges the current Senate of the United States and its ability to make sound constitutional judgments as a full partner in the foreign policy of the United States.

Few issues in my time in the Senate have been more filled with emotion or more divisive than this one. Few issues have come before the Senate in the field of foreign or domestic policy that have so divided the Members of the Senate on both sides of the aisle, Republicans and Democrats.

Few issues have produced such a stunning array of arguments as we have heard for and against the ratification of the first of these treaties, the neutrality treaty.

As I said earlier in this debate, it is a very, very close call. Any Member of this body, I am sure, could marshal arguments in support of or in opposition to this treaty and feel perfectly at home and at ease with it—the logic and the reason and the rationale for new treaties is that close.

However, Mr. President, in a matter of only a few moments, the time will have arrived in the Senate when difficult judgments must be made by the body which has the ultimate constitutional responsibility to determine this issue. The fact that it is a close call and a difficult issue and that convincing arguments have been made on both sides only makes it a more difficult decision.

Before I make my concluding remarks in justification for the ratification of the neutrality treaty and in support of that resolution, I should like to pay my special respects to all those on both sides of the aisle who have participated so ably in this debate, particularly to the distinguished Senator from Idaho (Mr. CHURCH), who has managed the matter on behalf of the proponents, and to the distinguished Senator from Nevada (Mr. LAXALT), who has carried the burden in opposition to these treaties. Both of them have acted in a responsible way and have brought great credit on themselves and on the Senate.

The distinguished Senator from Michigan (Mr. GRIFFIN), who, as he pointed out a moment ago, was the lone dissenting vote in the Foreign Relations Committee, has acted not only effectively in this debate but also responsibly, in pointing out both his position and the alternative proposals that might be adopted by the Senate.

There are many others I could name, such as the distinguished Senator from Alabama (Mr. ALLEN), who is such a skilled and consummate parliamentarian and such a skillful debater and orator; and finally, of course, the distinguished majority leader. This has been a divisive and emotional debate on a controversial issue. Notwithstanding that, in working with the majority leader, I believe we have navigated our way through the rocks and shoals of this debate without anger, without the creation of animosity, without personalizing this debate in a destructive way.

In a word, Mr. President, I think the Senate has comported itself well in these difficult times.

Mr. President, why should the Senate of the United States give its advice and consent to the neutrality treaty proposed by the executive department with the Republic of Panama? I believe we should do so because new treaties in this form, with these amendments and reservations and understandings, represent a superior position for the national defense, the foreign policy, the ultimate security, and public welfare of this country to the status quo. I believe that our opportunity to continue to have the quiet use and enjoyment of the Panama Canal for many years to come is greatly enhanced and improved by the adoption of these treaties—by this step forward in the relations between our two countries, the Republic of Panama and the United States of America.

I believe that the national defense of this country is greatly improved when we continue to enjoy the opportunity to navigate a canal located in a friendly host country, when we avoid the danger that a great facility and a national resource of this country might be located in a hostile host country—as is, for example, our naval base at Guantanamo Bay.

It is a useful comparison, Mr. President, to see the difference between the Panama Canal, quietly useful to all the nations of the earth and freely available to the United States for its defense, and the military facility at Guantanamo Bay, in Cuba. Guantanamo is fenced, guarded and garrisoned, and we must have facilities to protect against the Cuban Communist government cutting off our freshwater supply—it is, in short, a facility in a hostile country.

Mr. President, Panama is not a hostile country. By the adoption of these treaties, as amended, I believe we can continue a friendly relationship with the Republic of Panama and encourage and improve upon that relationship in the future, thereby guaranteeing and providing for our peaceful enjoyment of the canal.

I believe that the national security interests of the United States are best served by these treaties. I believe that the two amendments which were offered by the distinguished majority leader and me, and cosponsored by 78 of our colleagues, clearly give us a right to defend that canal in perpetuity. I believe our rights to defend the use of that canal in perpetuity are greater than our rights in any other military installation in any other part of the world.

Mr. President, the argument is often made that a vote for the Panama Canal treaty is a vote against the overwhelming sentiment of Americans in this country. No one in this Chamber, I suspect, knows better than I that many, many Americans, and certainly many Tennesseeans, are opposed to these treaties.

But, Mr. President, I very much doubt that a majority of Americans are opposed to the ratification of these treaties; on the contrary, I suggest that a preponderance of the evidence and the available data indicate that, with the safeguards that were provided by the leadership amendments, a majority of Americans support the improvement in our foreign policy position and the enhancement of our national defense position resulting from the adoption of these treaties.

Mr. BARTLETT. Mr. President, will the Senator yield?

Mr. BAKER. Nobody needs to explain to me the importance of public opinion.

Mr. BARTLETT. Will the Senator yield?

Mr. BAKER. Nobody needs to explain to me that it is important to a Senator who is up for reelection, as I am in 1978, that 64,000 letters which I received in my office represent a substantial point of view. Mindful of that importance, Mr. President, I commissioned a poll to be done in my native State, a professional sampling of public opinion. When the question was asked in that poll, "Do you support the treaties that were negotiated by the administration with the Republic of Panama?" it did not surprise me to find that the numbers were 23 percent in favor, 45 percent opposed, and 32 percent undecided. This survey was taken between the 10th and 18th of December 1977.

But, Mr. President, when it was asked in the same poll, how would you feel about those treaties with the two amendments, which have now been adopted by the Senate, the people of Tennessee responded 56 percent in favor of the treaties, 29 percent opposed, and 15 percent undecided.

Mr. President, I have no quarrel with those who say that an overwhelming majority of the people of this country oppose the treaties. I simply disagree. And based on the professional sampling done within my State, based on my travel from one end of Tennessee to the other, based on my communications by mail, by telephone, based on every political instinct I have, I am convinced that the people of my State and the people of the United States still feel fundamentally what they have always felt. The American people want to do what is best for our country, and in this case, Mr. President, I believe, and I believe a majority of Americans believe, that what is best for our country is not to cling to the status quo, but to move forward with an improvement in our use and enjoyment of that great and historic canal.

Mr. President, I yield the floor.

Mr. BARTLETT. Mr. President, will the Senator yield?

Mr. LEAHY addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. BARTLETT. Will the Senator yield?

Mr. BAKER. Mr. President, I yield the floor. I understand I have used 13 minutes, and I will be happy to yield for the remainder of those 2 minutes.

Mr. CHURCH. Yes; the Senator had 15 minutes.

Mr. BAKER. Yes.

Mr. BARTLETT. Mr. President, the Senator referred to safeguards of the treaty and indicated that these safeguards were assured with the two leadership amendments. How do we know that those amendments are agreed to by the citizens of Panama?

Mr. BAKER. Mr. President, the question of the distinguished Senator from Oklahoma is a good question. The question is how do we know that the leadership amendments will be concurred in by the Panamanian Government.

Mr. President, it will take just a few minutes to recite a situation that I think the Senator from Oklahoma is aware of; that is, in the fall of this year the President of the United States assembled a group of us at the White House to say that he understood that we had certain concerns about the defense rights of the United States in this treaty and could those concerns be satisfied by a letter of agreement between General Torrijos and President Carter. It was my reply that they could not, that now the Senate must act, and the Senate has acted.

There is a second point that should be made in answer to the distinguished Senator's query about what assurances we have that the Panamanian Government will concur in these amendments? The assurance we have is that they are amendments to the treaty. They are not memorandums of understanding. They are not reservations. These are amendments that change the treaty.

I would not presume to tell Panama whether or not they have to have another plebiscite.

But I asked General Torrijos about such amendments. I said, "Will you accept these amendments?" And to abbreviate his reply, his answer was "Yes." I did not ask him whether his Government could accept them without a plebiscite, but he volunteered that he thought these two amendments were within the contemplation of the country at the time of the first plebiscite and that a second plebiscite would not be required.

The PRESIDING OFFICER. The time has expired. Who yields time?

The Senator from Nevada.

Mr. LAXALT. Mr. President, I decided that we will share the half hour allocated to us in this final closing debate among several of my colleagues who have been so greatly helpful to me during the course of this debate. I will yield the first 4 minutes to the man who has served as our principal floor manager, the Senator from Michigan, Senator GRIFFIN.

Mr. GRIFFIN. Mr. President, I first want to acknowledge the kind words of the distinguished minority leader and reciprocate by saluting him and the majority leader, the distinguished Senator from Idaho (Mr. CHURCH), and also the Senator from Maryland (Mr. SARBANES), who has done an outstanding job in this debate, and certainly that only begins to mention those who have played an important role.

I share, Mr. President, the view and the position of many that a new treaty relationship with the Republic of Panama is in order and that it could serve the interests of both countries.

My problem as a lawyer and as a Senator is that I have studied the text of these treaties, and I can come to no conclusion other than that this treaty, and the other one as well, is riddled with ambiguities and that the security interests of the United States are not adequately protected and that the defects are so serious and basic that they cannot be remedied by trying to rewrite the treaties here on the Senate floor.

I will focus just on a couple of the more serious concerns.

First of all, and most importantly, it seems to me, insofar as the defense of the canal is concerned after the year 2000, the instrument before us entitled "A Treaty" does not really represent an agreement between the United States and the Republic of Panama. Instead this instrument called "A Treaty" is a mass of ambiguities, covering over and trying to hide sharp and wide differences that exist between the United States and the Government of Panama on several important points.

Let me be specific:

First of all, the administration and its advocates here in the Senate have said over and over again that the United States will have the right to use military force after the year 2000 to defend the canal's neutrality against any threat whatever, including an internal threat from within Panama.

On the other hand, Panamanian spokesmen, including General Torrijos,

have always insisted and continue to insist that the United States can come in with military forces after the year 2000 only if the canal is threatened by a foreign power.

Many people, including this Senator, believe that the greatest danger to the canal down the road is likely to be from forces organized within the Republic of Panama itself.

Second, the administration and its advocates say that the United States can determine independently and unilaterally when the canal's neutrality is threatened. Panamanian spokesmen, including General Torrijos, have insisted and continue to insist, indeed up to and including yesterday when the Panamanian Ambassador called at the White House, that the United States could use military force to defend the canal only if the action were agreed to by Panama, indeed as General Torrijos put it, "When we ring the bell."

The difference as between the United States and Panama has been highlighted and sharpened today by the adoption of the DeConcini reservation and by the Hayakawa reservation. These are but two examples of widely differing interpretations by the two countries of ambiguous but vitally important provisions in the Neutrality Treaty. And I think it is unconscionable in my view to proceed to ratify a treaty when it is so obvious that the two countries actually differ and do not agree concerning the terms of this treaty.

Mr. President, particularly now that this treaty has been significantly amended and changed here on the Senate floor in a number of respects, the Senate ought not to proceed to approve the treaty in the absence of a reservation or amendment along the lines of that offered by Senator BARTLETT and which was rejected out of hand by a vote of the Senate.

The Bartlett reservation, you will recall, would have conditioned our ratification upon a new plebiscite by the Panamanian people to approve the changes that the Senate has adopted.

The danger now is, as I have said over and over again, that the dictator Torrijos will ratify these changes by himself without submitting them to a vote of the people.

The PRESIDING OFFICER (Mr. HOLLINGS). The Senator's 4 minutes have expired.

Mr. GRIFFIN. I thank the Senator from Nevada for yielding.

The PRESIDING OFFICER. Who yields time? The Senator from Nevada.

Mr. LAXALT. At this time I yield to the Senator from Wyoming (Mr. WALLOP) 3 minutes.

The PRESIDING OFFICER. The Senator from Wyoming.

Mr. WALLOP. I thank my distinguished colleague from Nevada.

I rise in sadness at the approaching moment if the truth is as the opponents have described it.

It is evident to me, Mr. President, in the closing minutes of debate on the Panama Canal Neutrality Treaty that we have been involved in an exercise of self-delusion, and the delusion of the American people that is, perhaps, unbecoming despite the efforts of those who would convince us otherwise.

We have pinned to this treaty, Mr. President, a number of reservations, understandings, and even a couple of things called amendments which, in vain, we hope will give an air of legitimacy, but which, and I agree with the Senator from Michigan, will have little legal basis in Panama.

The treaty reminds me of the story of the emperor's new clothes. These treaties are paraded now in front of the American people and in front of this Senate in virtually meaningless reservations and understandings. Proponents praise these reservations and understandings, but will not accept them as amendments. So whilst we clothe our little emperor with these pretty things, these reservation and understandings, and pretend that he is dressed for the ball, when that treaty and that little emperor arrive in Panama he will be as naked as a jaybird, as naked as the day he was born. He will have no meaning to the Panamanians.

The treaty will be seen as it was when it arrived here on our desks in the first place, and with no other clothes on it. These little reservations and understandings are binding upon America and our sense of collective guilt while we crawl out of these negotiations, but they will not be binding upon Panama.

If the treaty is so unclear that we have to interpret it with understandings and reservations in the closing minutes of this debate so that we tell the American people that we understand it says this, these "clarifications" are still not binding on the Panamanians. The treaty text of article IV is not clear, so we add reservations and understandings to aid our interpretation. We "clarify" our rights to intervene. We understand what we can do. But do the Panamanians?

Article V presents no option for both parties to negotiate for military base privileges. It just says that we think we have the option, but, if so, a new treaty will be required.

Article VI concerns the question of transit of the canal for U.S. military vessels. I think in the long run, my colleagues, you will find that we have deluded ourselves, and we have not deluded the Panamanians. Our little emperor is just as naked as he can be.

The PRESIDING OFFICER. The Senator's 3 minutes have expired.

The Senator from Nevada.

Mr. LAXALT. Mr. President, I would like at this time to yield 3 minutes to the Senator from Alaska (Mr. STEVENS).

The PRESIDING OFFICER. The Senator from Alaska.

Mr. STEVENS. I thank the Senator from Nevada, Mr. President, but I will only take a minute because I think he has yielded away all his time, and he has done a tremendous job in this debate and deserves the right to speak himself.

Mr. President, I started out by saying that I would support these treaties if they were amended to take care of the national security and economic needs of the country.

We have presented, I presented, an amendment to the leadership amendment to redefine auxiliary vessels so that charted civilian vessels would definitively be included. In my opinion some 80 to 90 percent of our supplies traveling in vessels owned and operated by private enterprise may well not be covered by this treaty.

We had an amendment similar to the amendment of the Senator from Alabama prohibiting the transit of vessels of war and auxiliary vessels of nations in a state of belligerency with the United States or Panama, and an amendment that would have restored the role of the United States as a partner in the defense, operation, and maintenance after the year 2000.

I think the problem is we are doomed if we approve these and we are doomed if we do not. We tried to convince the administration to change these treaties so that they would reflect the will of the people of the United States. They have refused to do so. They have stonewalled any amendments to these treaties, as far as I am concerned.

Some of us tried to prevent the future misunderstandings that will leave the future generations of this country no alternative but the use of force in order to preserve its role in operation, maintenance, and defense of the Panama Canal.

I think the treaties as they stand, even as amended by the leadership amendment, are still defective. The reservations, the declarations are meaningless in my opinion. I intend to vote against the treaties.

I thank my friend from Nevada.

Mr. LAXALT. I thank the Senator from Alaska.

At this time I would like to yield 3 minutes to the Senator from Montana (Mr. MELCHER).

The PRESIDING OFFICER. The Senator from Montana.

Mr. MELCHER. Mr. President, the announced positions of individual Senators on this Neutrality Treaty assure its passage. It is a judgment on which I cannot agree. My objections are not for reasons that would deny more use of the land in the Canal Zone to the Panamanians nor deny to them more economic return from operations of the canal, because I believe those points within the treaties, are good and should have been adopted a long time ago without new treaties.

Mr. ALLEN. Mr. President, let us have order in the Senate, please. I can hardly hear the distinguished Senator even though I am sitting just a few feet from him.

The PRESIDING OFFICER. Let there be order.

Mr. MELCHER. My objection is rather for reasons that this treaty leaves in doubt significant and vital concerns. I question its validity, and I question the judgment on accepting it and, therefore, I will vote against accepting it.

It is not just for the best interests of the United States that I seek to protect in the Neutrality Treaty the continued efficient operations of the canal. It is a broad interest of all of the people

throughout the world who use the canal, including, I believe, also the best interests of Panama itself that we assure that.

We can assure justice for the people of Panama in their own country without jeopardizing the continued efficient operation and defense of the canal. I think the Neutrality Treaty fails to do so.

Meanwhile, after adoption of this Neutrality Treaty, we will plunge right on into the other treaty, the Panama Canal Treaty, and it is there, Mr. President, that I find tragedy in that we will be tied up perhaps for 3, 4, 5, or 6 weeks here in the Senate, not acting upon highly important domestic needs of this country. I think that is part of the tragedy involved in our consideration of the treaties.

There are problems we should be addressing that affect vital industries in the United States—agriculture, steel, copper, energy, and others. And they need the attention of the Senate, they need passage of legislation for assistance to help the economy of the United States without further delay.

Mr. ROBERT C. BYRD. Mr. President, may we have order in the Senate so that the Senator may be heard.

The PRESIDING OFFICER. Let us be in order.

The Senator may proceed.

Mr. MELCHER. During the time of the debates on the treaty, highly important domestic issues have been put aside and held in abeyance. I find that very regretful, I find it damaging to the American economy.

The PRESIDING OFFICER. The Senator's 3 minutes have expired.

Mr. LAXALT. Mr. President, I would like to yield 3 minutes to the distinguished Senator from Mississippi (Mr. STENNIS).

Mr. STENNIS. Mr. President, and I shall be quite brief.

The PRESIDING OFFICER. Let us have order.

Mr. STENNIS. Beginning last fall, the Senate Armed Services Committee began a careful preparation of a study of the money involved, the money costs and the money values, which are affected by this treaty. It was very carefully gone into by the General Accounting Office, by the office of the Governor of the canal, and by auditors we employed. Public hearings were held some 6 weeks ago. The figures show that the direct and indirect, costs for this treaty, to put it down in dollars and in round numbers to start with, are at least $2 billion.

That is an appreciable sum of money, Mr. President, I can give an itemized statement of that which will follow these brief remarks. I have explained all these figures before; but there is not time to do that now. I ask unanimous consent to insert this itemized statement in my remarks.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

ESTIMATED POTENTIAL COST OF PANAMA CANAL TREATIES AND RELATED MATTERS

I. Illustrative potential Panama Canal operating deficit until 2000 A.D.:

	(1)	(2)
If tolls are not increased above current rates (loss, billions)	$3.57	$3.75
If tolls are raised only 75 percent (the total currently available increase estimated to produce maximum revenue was 75–100 percent) (loss, billions)	.99	1.16
Cumulative toll increase needed to fully offset deficits (assuming no toll caused traffic loss after first 20 percent toll increase) (percent)	+149	+168

[1] With full North Slope oil.

[2] 75 percent loss of North Slope oil after 1980.

II. Estimated value of assets transferred to Panama by 2000 A.D.:

	Book value, millions	*Replacement cost, billions*
Panama Canal	$310	$5.0
Panama Canal Zone	257	3.6
Military Plant	353	1.2
Total	920	9.8

III. Potential cost to U.S. for items not covered by Panama Canal tolls until 2000 A.D.:

	Millions
Military relocation construction cost	$43
Civil service early retirement	135
Incremental cost for DoD schools/hospitals	110
Foregone interest payment to U.S. Treasury	505
Contingent payment to Panama ($10 M/yr)	220
Foregone payment for past services to Panama	8
Cost of inventory/evaluation of assets	2
Payment of employee accrued leave	—
Increased training for PCC employees	—
Total (plus)	1,023

IV. Other possible liabilities for U.S. Government:

	Millions
Military assistance (FMS credits)	$50
AID housing guarantees	75
Export-Import Bank credits	200
Overseas Private Investment Corporation loan guarantee	20
Total	345

Mr. STENNIS. I want to emphasize, and I say this respectfully, those figures have not been effectively refuted, explained, nor totally denied by the State Department in the answer they made to my letter requesting their comments.

I can say that the figures stand here without effective challenge.

Furthermore, in addition to the direct and indirect costs the United States will incur, a vast amount of land and facilities, like the ports and buildings, will go to Panama with the treaty, if approved. These assets have a book value of $920 million and a replacement cost of $9.8 billion. Other costs are bound to accrue during the life of the treaty, that will not be covered by tolls, of $1 billion. Another $1 billion may be added unless the tolls can be very substantially increased.

But the overwhelming point here—and this has run all through the debate—is the fact that we are pulling out of that whole area at the turn of the century, leaving the sidewalks as clean as a swept floor so far as any kind of a military force as a deterrent, as a power, as a protection or anything else. We will be out and gone. Serious-minded men have strayed during the debate. One of the amendments just said we would have the authority to negotiate. This is a very weak position for our great Nation to be trying to observe. We will be giving up a lot.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. STENNIS. I thank the Chair.

Mr. LAXALT. I thank the distinguished Senator from Mississippi. At this time, Mr. President, I yield 3 minutes to the distinguished Senator from Kansas (Mr. DOLE).

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. Mr. President, let me express my thanks to the distinguished Senator from Nevada, the distinguished Senator from Idaho, the distinguished Senator from Maryland, and others, who have been leaders for and against the treaties.

The Senator from Kansas, like many others, sought to amend the treaties. We were told we could not add one word to the treaties, not one word could be added as an amendment. We could add tons of words as understandings and reservations, but not one word—not even the word American—could be added to the treaties as an amendment because that might require another plebiscite, and we did not want another plebiscite.

It seems to this Senator, as one who has had some input in these treaties going back to September and October, that we are not trying to send the best treaties, we are not trying to approve the best treaties.

It has been demonstrated in the past several days, where one reservation after another has been accepted, one understanding after another has been accepted, they have been taping over one weakness after another in the treaty until they have enough votes.

Now they have enough votes. The administration has 68, 69, maybe 67, depending on who went off the hook in the last 30 minutes.

It seems to this Senator that the die is cast. When we were told on the Senate floor, some of us who would have voted for the treaties, that we could not add one word as an amendment, we did not have any other choice if we wanted to be Senators, if we wanted to carry out our constitutional responsibilities to advise and consent and not rubber stamp.

We are down to the last 25 minutes. I am not certain what is happening in back

rooms, but I think it has already happened. The votes are there. But we are only on the very basic treaty. The big treaty is coming up. Then we start all over again with week after week of debate. The preliminary round is over. The American people have lost because we could not add meaningful amendments, because we could not improve the treaties.

I would hope that come the next debate on the next treaty those of us who want to support strong treaties will have a right to make the necessary changes, will have the right to make the necessary amendments with reference to the transfer of the Canal Zone, and all the other important features.

Mr. President, the Senate is nearing the end of its consideration of proposed modifications to the Neutrality Treaty. In the course of this debate, 26 amendments were proposed. But only two amendments—the so-called leadership amendments—were adopted by a majority of the Senate, with the blessings of the administration. All other amendments, branded "killer amendments," have been rejected at the behest of the leadership and the administration. Yesterday, a "salvation reservation" and a "bandwagon reservation" were approved with administration endorsement. The final product is nearly complete.

When the Senator from Kansas became the first to propose treaty amendments last September, I suggested that we all should "analyze these treaties in an objective and responsible manner." I am not aware of any of us who just rejected the proposed treaties out of hand. Many of us did suggest that these treaties could be improved upon. During the past 3 weeks of debate, we proposed substantive treaty modifications in good faith.

But at every point, the Senate leadership moved to "table," or to set aside each of those amendment proposals. At one point, as many as 41 of the Members of this body opposed the tabling motion. That suggests genuine concern among a large percentage of this body, that treaty modifications should be looked at carefully.

ADMINISTRATION YIELDED

Mr. President, the fact that 24 of the 26 treaty amendments proposed were rejected is not to say that the administration did not have to yield to public pressure on certain points. At the outset last September, the word from the administration was: "No amendments, no reservations, maybe understandings, and declarations."

Momentum was building for clarification of America's future defense and passage rights. It was obvious the Senate votes just were not there to ratify the treaty in its pristine form. The message relayed by the Senator from Kansas and others in this body was that the American people would not accept a treaty with so many ambiguities and misunderstandings.

So, in January of this year, the new word from the administration was: "No amendments—except the approved leadership amendments." That approach appealed to a good many more Senators. But the votes still were not there.

And so, just this week, it became clear that three, or four, or five Senate votes could spell the fate of this treaty. And it appears that the word from the administration is now: "The leadership amendments plus approved treaty reservations equal success."

OTHER CONCERNS

The Senator from Kansas is gratified that the administration gradually came to see the light. The President and his advisers at the State Department gradually realized the frailties of this treaty. Under the pressure of public opinion, reality was recognized.

In fact, the administration strategy appears to have been: "If we admit to just one more weakness in the treaty, we may have the votes we need." And so the question all along has been: "How many treaty weaknesses do we have to recognize, and how many treaty modifications do we have to accept, in order to get these treaties ratified?" The necessary 67 votes are not there.

But what about our other concerns? If we admit to three flaws in the treaty, are we justified in ignoring the other 2 or 5, or 10? I think not.

Legitimate concerns about the treaties are conveyed to us every day by our constituents. Legitimate concerns have been raised here on the Senate floor. The Senator from Kansas, a few days ago, expressed concern about six major treaty concessions made by the Carter administration during treaty negotiations last year. There has been no attempt to explain or justify those concessions.

The Senator from Kansas expressed concern last fall about allegations that high-level members of the Panamanian Government have engaged in drug trafficking. Other senators shared these concerns. The Senate did conduct a secret session in late February to discuss the drug allegations and many of this senator's concerns were resolved. But the Senate Intelligence Committee concluded that Gen. Omar Torrijos himself was aware of high level drug trafficking in his government, and looked the other way. Is this the type of regime to which we can confidently entrust the canal?

So, this senator is still concerned. Although the leadership amendments were approved, they are riddled with ambiguities that may well cause problems in the future if these treaties are ratified. Although a treaty reservation has been adopted which touches on American base rights in Panama after the year 2000, there is still concern. The reservation makes no changes in the treaty, either in substance or in interpretation. It only spells out a "right to agree" which is already implicit in the treaty. It may have been an easy proposal to vote for. It may have eased a conscience or two. But it added no rights or guarantees to this treaty.

UNDERSTANDINGS MEANINGLESS

There is even less point to the multitude of understandings which have been proposed. An authoritative report prepared by the Library of Congress advises that:

> Treaty "understandings" . . . do not endeavor to alter the substantive obligations of the parties, but are limited to statements of clarification, policy, or internal domestic procedures. (David M. Sale, legislative attorney, Congressional Research Service, 1978.)

Former State Department consul and New professor of law at Columbia University, Louis Henkin, has written:

> Sometimes the Senate can be persuaded to achieve clarification or even some modification of a treaty provision without entering a reservation, by expressing instead its "understanding" of the provision. If that understanding is communicated to the other party and is accepted or acquiesced in there is no issue and the treaty need not be reopened. There is danger, however, of failure of communication that may engender doubt and controversy as to whether the parties agreed to the same terms. (Foreign Affairs and the Constitution, 1972)

And now, suddenly, we find any number of weaknesses in the treaty addressed by treaty understandings. So what? These are unilateral statements of interpretation and intention by the U.S. Senate, outside the treaty language. They require no consent or comment by Panama. When, in years to come, there are conflicts over these points, the United States may point in vain to its treaty understandings. The Panamanian Government can say, with impunity, "That may have been the way your Senate interpreted this provision, but we interpret it differently. Show us where this guarantee is written in the treaties." At that late point, Mr. President, we may better comprehend the difference between treaty amendments, reservations, and understandings.

WILL OPPOSE TREATY

Mr. President, for all of these reasons, the Senator from Kansas will vote against final ratification of the Neutrality Treaty. It is not because he decided at the outset that he would oppose any treaty in any form. He did not.

It is not because he felt the treaties were flawed and made no effort to strengthen them. He did.

But because, after all these efforts, the treaty still does not—in my opinion—adequately protect the defense rights and interests of the United States, I cannot in good conscience support this treaty on behalf of the people of Kansas. Neither can I commend this treaty to the American people, and to future generations.

I have had the opportunity and the privilege to discuss the pros and cons of these treaties with a number of statesmen whom I highly respect. I have list-

ened carefully, and exchanged viewpoints with former President Ford, Secretary Kissinger, Governor Reagan, and General Torrijos. In recent days, I have been contacted by President Carter and Ambassador Strauss, as have others of my colleagues. They have their convictions about these treaties, and I respect them. But I cannot agree with them, on the basis of my reading of these treaties.

It would be far better, in this Senator's opinion, to face up to the difficult decisions now—the conflicts of national interests and the uncertainties about our defense rights. Ratification of this treaty at this time may be a momentary sedative for these and other problems, but the underlying difficulties will remain.

Because I believe the majority of Americans agree with me that this treaty should not be ratified, I will cast my vote against the Neutrality Treaty today.

Mr. LAXALT. I thank the distinguished Senator from Kansas. Mr. President, at this time I yield 3 minutes to the distinguished Senator from Virginia (Mr. HARRY F. BYRD, JR.).

Mr. HARRY F. BYRD, JR. Mr. President, the Panama Canal, in my judgment, is very important to the defense and economic interests of the United States. The United States, for more than 60 years, has had operational control of this canal. This arrangement has worked well. We have kept the canal open every day and every year and through four major wars.

The Panama Canal is an asset to the United States, it is an asset to the world, and it is an asset to Panama.

To me, Mr. President, it makes no sense for us to give away the Panama Canal. Panama cannot defend it—there is no way they can defend it.

Under the treaty which will be voted upon today, the United States not only will give away the canal, but will give away all of our military bases and all of our military facilities in that area. We will have no military presence after the year 1999.

Under this treaty, which the Senate will vote on today, the United States will retain the duty to defend the canal but we will give away the tools with which to accomplish that purpose.

In addition, these two treaties will be very costly to the American taxpayer. The Panama Canal Company in a statement to the Senate of the United States said that the replacement cost of all of the property which our country will turn over to Panama if these treaties are approved will equal almost $10 billion.

In addition, there will be many other costs—payments to Panama in the hundreds of millions of dollars. So not only are we giving away the Panama Canal by this legislation, but we will be paying the Panamanians for the privilege of doing so.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. LAXALT. I thank the Senator from Virginia.

Mr. President, at this time I would like to yield 2 minutes to the distinguished Senator from Oklahoma (Mr. BARTLETT).

The PRESIDING OFFICER. The Senator from Oklahoma.

Mr. BARTLETT. I thank the distinguished Senator from Nevada. It is very obvious that the majority of this body had wanted to make substantive changes in this neutrality treaty and they had hoped that their amendments, their reservations, or their understandings which have passed would have and make a meaningful change. But it was the desire of the proponents of the treaty to defeat a reservation which would have required the President to determine whether or not the Panamanians had approved the treaty, as amended, according to their constitution prior to his exchange of the instruments of ratification.

In doing this, the proponents wanted to make sure that there would not be a plebiscite vote by the citizens of Panama. In insisting on that, we are not going to know what we have, because when we receive their treaty and have entered these amendments and substantive changes in the treaty, we have, in a sense, turned down the treaty as they approved it and are resubmitting a different treaty to them.

We are not going to know whether or not they are going to be required to agree to the changes or the changed treaty. So we are up in the air as to just where we are.

I seems to me that, in any kind of arm's-length transaction between nations, it should be very clear that both bodies would have to agree to ratify a treaty according to their constitutional requirements. This, according to those who are proponents of this treaty, they do not desire.

Mr. LAXALT. I thank the Senator.

Mr. President, at this time, I yield 2 minutes of time to the distinguished Senator from South Carolina (Mr. THURMOND).

Mr. THURMOND. Mr. President, not counting against my time, I am glad to yield to the Senator from Maryland.

Mr. MATHIAS. Mr. President, I ask unanimous consent that Mr. Casimir Yost of my staff be granted the privilege of the floor during this debate and votes thereon.

The PRESIDING OFFICER. Without objection it is so ordered.

Mr. THURMOND. Mr. President, first I want to say that these Panama Canal treaties are the big giveaway of the century—giving away a $10 billion investment, paying Panama over $2 billion to take it.

Next I want to say that these treaties are bad from the standpoint of the United States, from an economic standpoint. Every gallon of gasoline that people will use in the future that comes through the Panama Canal—and it is coming down from Alaska—will have an increased tax. Every pound of tobacco or bushel of soybeans that farmers send overseas is going to have an additional tax.

Mr. LAXALT. Mr. President, may we have a little order, please?

The PRESIDING OFFICER. Let us have order in the Chamber.

Mr. THURMOND. All the goods that come to this country and all goods shipped to other countries are going to have higher fees.

Who is going to pay it? The American consumer is going to pay it. The American people are going to pay it. This is certainly not to the benefit of the people of this country.

Mr. President, the most dangerous part of these treaties is from a defense standpoint. It is clear what the four admirals, Admiral Moorer and three others, said, that these treaties could very vitally affect the survival of this Nation. It seems to me that, when our Navy is so small now, we have to be able to shuttle ships from one ocean to the other and do it quickly. We have to be able to bring metals from other countries overseas here and do it quickly. That could be the difference between victory and defeat, from a defense standpoint.

This treaty fails to provide clear, unequivocal authority to the United States to intervene as it deems necessary or to base troops in Panama after 1999.

Further, the pressure by the administration to win passage of this treaty exceeds any such efforts that I have witnessed in my 24 years in the Senate.

Future generations will pay the consequences if the Senate accepts such an inadequate treaty. Its lack of clarity will actually cause it to promote the problems which it purports to prevent.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. LAXALT. I thank the Senator.

Mr. President, how much time do I have left?

The PRESIDING OFFICER. The Senator has 2½ minutes remaining.

Mr. LAXALT. Mr. President, I might indicate that the Senate will now be treated to the shortest Jim Allen speech in Senate history. I yield the remaining 2½ minutes to the distinguished Senator from Alabama (Mr. ALLEN).

The PRESIDING OFFICER. The Senator from Alabama.

Mr. ALLEN. I thank the distinguished Senator from Nevada (Mr. LAXALT) and express my deep appreciation to him and the distinguished Senator from Michigan (Mr. GRIFFIN) for their brilliant leadership in this fight against the Panama Canal treaties.

Since I have so little time, I am sure that we shall not be able to change any Senators' minds with respect to the action that they will take with respect to the treaties. But I would like to comment that this debate has been an interesting study in human character, in human nature, in human frailty, and in human strength.

I want to single out, in addition, all those who had a leadership role in this fight on both sides and before yielding the floor, I want to pay tribute to the distinguished majority leader and the distinguished minority leader for their unfailing courtesy and consideration for the rights of those who are opposed to these treaties. They have been fair; they have given us all the time we have needed to present our case.

I do want to single out for special attention the distinguished Senator from Nebraska (Mr. ZORINSKY) and the distinguished Senator from Kentucky (Mr. FORD). These men have stood tall on this issue. They have been subjected to tre-

mendous pressure by the administration, but they have stood firm. They have announced their opposition to these treaties and no amount of pressure that has been brought against them and on them has influenced their decision. Certainly, I believe that these two Senators deserve a place in any sequel to the book, "Profiles in Courage." I pay tribute to them and all of those who have stood fast in this fight against these treaties, which are not in the best interests of the people of the United States from an economic standpoint or a military standpoint.

I thank the Chair.

● Mr. LAXALT. Mr. President, as we approach the final vote on whether the Senate should give its advice and consent to the Neutrality Treaty, I would like to take just a few moments to reflect on, first, what has been accomplished here in over a month of floor debate; second, the problems that remain in the Neutrality Treaty as I see them; and third, the likely consequences should the Senate choose to give its consent to this document as it now stands.

THE DEBATE

Since the 8th of February, minus 1 week for Lincoln Day, the Senate has been engaged virtually full-time in debating the Panama Canal treaties. After the 3 days for opening statements, we have devoted ourselves almost full time to the Neutrality Treaty, whose resolution of ratification is now before us.

All told, we have devoted 152 hours, 22 days and nearly 1,000 pages of the CONGRESSIONAL RECORD to discussing the treaty concerning the permanent neutrality and operation of the Panama Canal. But, until this afternoon, very little has been accomplished.

No amendments other than the two recommended by the Foreign Relations Committee and annointed in advance by the leadership had been accepted. True—a number of reservations and understandings have been taken. But, as was discussed at length, these were either innocuous or downright meaningless. So, I believe it fair to say that, until this afternoon, even with the leadership amendments added, the treaty was pretty much the same document we started with over a month ago.

The argument raised effectively against all of the nonleadership amendments was that, as substantive changes in the text of the treaty, they would require a new plebescite in Panama. I regret to say that despite the fact that over 70 treaties consented to by the Senate have been amended in such a way as to require further negotiations, and despite the fact that a number of the proposed amendments were highly meritorious, the leadership was able to successfully set its face against any substantive change except those which it had worked out in advance.

Why? The argument offered was that even the most innocuous additional language would wreck the treaty. I disagree. As I see it, the Senate was effectively kept from improving this treaty with amendments for fear of troubling with an additional constitutional complication the maximum leader of Panama, who has been a constitution unto himself for nearly 10 years.

Mr. President, I would like to run quickly through a list of some of the substantive and highly meritorious amendments which have been defeated because of leadership's wish to avoid troubling Panama's dictator with another election. This list is by no means exhaustive. But, it does give an idea of what the Senate has rejected during the course of this debate. To me these are by no means "killer" amendments. Rather, these are substantive improvements without which the treaty will be sadly lacking.

On February 27, by Mr. ALLEN an amendment allowing a continued U.S. military presence in Panama until the year 2019, if the President certified as to its necessity. Tabled 55–34.

On March 7, by Mr. HELMS an amendment allowing continued U.S. maintenance of the highly sensitive Galeta Island communication base. Tabled 58–36.

On March 8, by Mr. STEVENS an amendment prohibiting transit through the canal of vessels of war and auxiliary supply vessels of nations engaged in armed conflict with, or belligerent to, the United States. Tabled 59–34.

On March 9, by Mr. DOLE an amendment guaranteeing the United States authority to intervene militarily when the United States alone determines that the neutrality of the canal is threatened. Tabled 45–37.

On March 10, by Mr. HELMS an amendment setting up procedures for peaceful resolution of disputes but, in the event a threat to the neutrality or security of the canal could not be resolved by peaceful methods, each party would have the right to take, unilaterally, the measures it deems necessary. Tabled 57–27.

On March 10, by Mr. DOLE an amendment allowing for continued U.S. military presence by mutual United States-Panamanian agreement after termination of the Panama Canal Treaty. Tabled 45–37.

On March 13, by Mr. DOLE an amendment allowing the United States, independent of Panama, to declare the existence of an emergency which would permit our warships head-of-the-line passage. Tabled 51–37.

Mr. President, now suddenly the Senate has reversed itself. After spending 6 weeks rejecting highly meritorious amendments, the leadership decided this afternoon to accept a reservation which would allow the United States the right to intervene unilaterally to keep the canal open in the event it were closed or its operations otherwise interfered with. The vote on Senator DECONCINI's reservation was 75 to 23.

I submit that this is too little, too late. After a prolonged effort to keep this Senate from improving the Neutrality Treaty, the leadership has at last conceded a marginal improvement for a simple and compelling reason: without it, they lack the votes for ratification.

REMAINING PROBLEMS

But, after so many hours of debate, I still believe that we have not accomplished very much. Not only because we have not passed very many amendments, but, more importantly, because we have left huge, gaping holes in the treaty upon which we will soon be voting. As this treaty now stands, we are not allowed a military presence in Panama after the year 2000 without Panamanian permission. An excessively broad definition of neutrality allows even enemy warships to pass unimpeded through the canal. And, our right of unilateral intervention, which all have acknowledged to be crucial, remains, at best, ambiguous.

1. MILITARY PRESENCE DENIED

Twenty years is an exceedingly long time in a region as volatile as the Caribbean. Yet, the Neutrality Treaty explicitly denies us a military presence in Panama even if it should prove necessary to defend our rights in the canal or to stave off serious threats to our very national survival.

It is true that we have accepted a reservation which would not prohibit future negotiations for the continuation of a military presence. But, nothing in this or any other treaty can effectively prohibit future negotiations between consenting parties.

Think back 20 years. Since 1958, the United States has narrowly averted nuclear war over the issue of nuclear-tipped Soviet missiles in Cuba. Since 1958, Castro has attempted to export his Cuban style revolution to a number of Latin American countries. And, since 1958, indeed quite recently, Castro has succeeded in intervening with some 40,000 troops in Africa. A U.S. intervention of comparable magnitude would total over 900,000 men.

Who can say what security threats will emerge either to the canal or to the United States itself from the Caribbean region in the next 20 years? And who is to say that a military presence in the Canal Zone will not be either necessary or highly advantageous in meeting such a threat?

But, however essential, the U.S. Senate is now on record against a continued U.S. military presence in Panama without Panamanian agreement. If such a presence is deemed by the President to be vital for our national security—no matter. If there is a crisis or national emergency—no matter. Even if we are at war, the U.S. Senate has made a vote for the Neutrality Treaty an explicit rejection of any continuation of a U.S. military presence in Panama.

As if this were not bad enough, the Neutrality Treaty does not prohibit Panama from turning to the Soviet Union or Cuba for military assistance after our troops depart. True, article V does state that:

> . . . Only the Republic of Panama shall operate the Canal and maintain military forces, defense sites, and military installations within its national territory.

But, what does it mean "to maintain"? And, who are military forces? If the Panamanians provided the port facilities, could the Soviets establish a naval base? Or, could Cuban volunteers be sent to reinforce the Guardia Nacionale? These and similar unanswered questions are a likely source of future trouble should the Neutrality Treaty be ratified.

At any rate, the exclusion of U.S. military presence will make going back into Panama, should that prove necessary by an amphibious landing or airborne assault, an extremely costly and much more hazardous operation. It will also leave us at a tremendous military disadvantage.

As my distinguished colleague from Alabama, Mr. ALLEN, put it at an early point in the debate:

"I do not care if the Joint Chiefs have the military genius of Napoleon, to say that we can better defend the Canal with 4 bases than 14, and that we can better defend the Canal with no troops there after the end of this century than having 14 bases there, just does not make good sense."

2. EXCESSIVELY BROAD DEFINITION OF NEUTRALITY

Mr. President, as you know, the present Neutrality Treaty provides for a neutrality so broad as to include literally the pasage of ships at war with the United States. Let me cite from the appropriate provision (article III, paragraph I, section E):

Vessels of war and auxiliary vessels of all nations shall at all times be entitled to transit the Canal, irrespective of their internal operation, means of propulsion, origin, destination, or armament, without being subjected, as a condition of transit, to inspection, search, or surveillance.

What this means is that enemy vessels would be allowed passage through the Panama Canal. This is what is considered neutrality to treaty proponents. To me it is a potentially serious threat to our national security.

My distinguished friend from Idaho, Mr. CHURCH, argues that it is of no importance that hostile warships are allowed to transit the canal because our Navy will never let them get close enough to use it. To quote him directly:

". . . The United States does not require legal authority to exclude its enemies from the Canal. We keep them at a safe distance by controlling the oceans on either side.

Without meaning for a minute to deprecate the qualities of our superb fighting Navy, I wonder if my colleague has taken the time lately to examine the figures indicating an increasingly powerful Soviet Navy contrasted with the sharp decline in U.S. warships. In view of Soviet bases in Cuba and Soviet encroachment elsewhere in the Caribbean, it seems to me that we need to take every possible precaution to safeguard our national security.

Admiral Holloway, the Chief of Naval Operations, underscored the seriousness of the Soviet Naval threat in last year's authorization hearings when he told the Armed Services Committee:

I have a great deal less confidence in the future because the trendline of Soviet maritime capability has been on the rise, particularly since 1960. The trendline of U.S. Naval capability has been declining, certainly in the last decade. In the number of ships we have gone from 976 ships in the active force in 1968 to 468 ships in the active inventory today; and if this country does not do something to change the projection of those trendlines, they are going to cross. At the point where they cross we will have surrendered our maritime superiority to the Soviet Union.

I understand the concept of a neutral waterway and feel it within reason to be desirable. But I draw the line when it comes to ships at war with the United States. We can and we must leave no stone unturned in our efforts to insure our national security.

3. RIGHT TO UNILATERAL INTERVENTION UNCLEAR

With the addition of the so-called leadership amendment No. 20, the administration and treaty proponents seem convinced that the United States will have the ability to intervene unilaterally to defend the canal against threats to its neutrality from any quarter. At best, this is unclear.

Certainly, the Panamanians do not believe it. As they see it, the United States is obligated to defend the canal if it is attacked by a third power, but we have no right to intervene unilaterally to protect the canal against a threat emanating from within Panama itself.

General Torrijos, before leaving Washington last October, made this clear. In a reference to the Statement of Understanding, which is now part of the Treaty, the Washington Star reported:

. . . [T]he general said through an interpreter that he did not agree to anything that would permit a foreign country to intervene in Panama. . . . Torrijos indicated that the United States had a right to defend the Canal if attacked by a great power.

Other statements by prominent Panamanians can be cited. But, the point is that whatever our interpretation and however many times treaty proponents choose to repeat it, the Panamanians do not accept that we have a unilateral right to intervene to protect the canal.

And, the problem is even more serious, as Hans Smit, a noted international legal expert from Columbia University has pointed out, because the Canal Treaty recognizes Panama as the territorial sovereign, it also makes Panama, in effect, the ultimate judge of what the treaties mean within its territorial confines. The United States may protest and complain, but under the terms of article XIV of the main Treaty we may not use force without violating not only the Treaty itself, but also the United Nations Charter and the Charter of the Organization of American States.

Professor Smit further indicates that the argument maintained by administration spokesmen that the United States, by using force to impose its views on Panama with respect to the canal, would not be acting against "the territorial integrity of political independence of Panama" is specious. It is the essence of the Nation's territorial integrity and political independence not to suffer military action on its territory and there is no support in international law for the contention that the alleged pursuit of treaty rights is unobjectionable so long as the detachment of territory or change in the character of the regime is not its proclaimed goal.

Against this, the reservation approved this afternoon pales into virtual insignificance. This reservation does allow the United States the right to intervene unilaterally to keep the canal open in the event it is closed or its operations are otherwise interfered with, but only in accordance with and, thus, subject to the same ambiguities as article IV listed above. Furthermore, in turning down the Allen amendment that the reservation should have the force of an amendment, the Senate has made it clear that the reservation is clearly subordinate to the language included in the text of the treaty itself.

Mr. President, under the terms of the treaty concerning the permanent neutrality and operation of the Panama Canal currently before us, the United States would be effectively denied a military presence in Panama, although potentially hostile powers might not be. Hostile warships would have unimpeded transit rights. And, our ability to intervene militarily to defend the canal without Panamanian permission is, at best, ambiguous. Under these circumstances, I can see little reason for the U.S. Senate to give its consent to such a treaty.

CONSEQUENCES

But, what happens if the Senate does give consent? What kind of message will the work which we have done here send to the American people? One need only examine some of the major arguments of the proponents together with the shortcomings left in this treaty to conclude that our message will make unpleasant reading, indeed, for our constituents.

1. PROPONENTS' ARGUMENTS

Quite a lot of time was spent during the debate on the alleged moral shortcomings of U.S. policymakers in acquiring the canal. Although some of the treaty proponents were careful to repudiate the notion that as a people we should be ashamed of the events of 1903, others were less discrete. One even termed the early history of the canal "a most disgusting page in American history."

But, whether carefully worded or not, a major message of the treaty proponents in this debate has been that the history of the canal is somehow an evil chapter of the strong exploiting the weak. Whether stated explicitly or conveyed implicitly, the message clearly was that the United States obtained the canal in an immoral fashion and that for us to be true to our just and beneficient view of ourselves we must return it to "tiny Panama."

Mr. President, a corollary to the guilt argument may be termed the "how would you like to be Panamanian" position. Time and again on this floor treaty proponents have drawn analogies designed to encourage we recalcitrant to better understand the Panamanians.

Personally, I do not feel in the least bit guilty about the events preceding our construction of the Panama Canal. Nor, I believe, do a vast majority of our American people. Quite the contrary. The canal was obtained and built in a way which transformed a disease infested swamp into an international public utility and technological marvel. Far from representing any dark side of our American character, the Panama Canal is something we can and should be proud of.

Furthermore, I think by the looks of the treaty before us that Panama was

ably represented at the negotiating table. I belive our people are much more concerned that we assess the merits of the proposed treaties for American interests than that we spend a lot of time hypothesizing about such things as French troops and how we would feel trying to cross it under such circumstances.

A second message sent to the American people by arguments raised by treaty proponents concerns our historical concern for the human rights of individual citizens in other lands. Without being unduly harsh, I believe it is fair to say that many of this body's greatest opponents of human rights violations in Chile, South Africa, South Korea, or even the Soviet Union are now on record indicating that in Panama the human rights record of the regime should be subordinated to the exigencies of power politics as they define them.

Either human rights considerations matter in our foreign policy or they do not. If we shy away from bringing up the matter with Panama over the issue of the canal where so many of the cards are in our hands, the American people will be forgiven for believing that the vaunted human rights policy so hopefully begun by this administration is now little more than a dead letter.

Finally, the American people have been told during this debate that to be respected internationally and to win friends, particularly in Latin America, it is important to capitulate to an implied threat of force even before it is made. To give in now, the argument runs, is to be magnanimous—a great nation wisely accommodating itself to the trends of history. On the other hand, to give in later, after clinging to an outmoded position after history has passed it by, is not only the height of folly, but it will mobilize all of Latin America and a good portion of the rest of the developing nations against us.

I believe the American people will see through this. They know that one cannot buy friends either personally or internationally, and they know that in the hard world of international politics even a hint of weakness buys not peace but continuing pressure from aggressive opponents.

HOLES IN THE TREATIES

On the merits, the substantial holes left in this treaty after such extensive Senate examination can only indicate to the American people that we have not protected their interests very well. What other conclusion can they draw from a vote in favor of a treaty which forbids a U.S. military presence, allows enemy warships unimpeded passage through the canal and fails to grant us clear rights to intervene unilaterally should our interests there be threatened?

Mr. President, I am not up for reelection this fall. But, I can assure you that if I were, I would not want to go back to Nevada and have to explain a vote for this treaty to my constituents.●

The PRESIDING OFFICER. The time of the Senator from Nevada has expired.

The Senator from Idaho is recognized.

Mr. CHURCH. Mr. President, I yield the remaining time to the distinguished majority leader (Mr. ROBERT C. BYRD).

Mr. ROBERT C. BYRD. Mr. President, I thank the very distinguished Senator from Idaho (Mr. CHURCH).

I express my gratitude to him and to Senator PAUL SARBANES, in particular, at this time, for the unstinting dedication to purpose and to the work of debating, defending, and improving the treaty and the resolution of ratification.

There are others whose names I should call, but time will not permit that at this point. Suffice it to say that the leadership is indebted to all who have played a part in bringing the Senate to the point where it stands today.

In that midnight discussion between Brutus and Cassius concerning the contemplated battle at Phillipi, Brutus urged that the cause was right, that the legions were brim full and ready to decline. He said:

There is a tide in the affairs of men
Which taken at the flood leads on to fortune;
Omitted, all the voyage of their life
Is bound in shallows and in miseries.
On such a full sea are we now afloat,
And we must take the current when it serves,
Or lose our ventures.

Today, in the Senate, we have reached such a tide and we must take the current which now serves, or lose our ventures.

The Rubicon of decision on the treaty is now to be crossed. The Senate has given its attention to the treaty now for 22 days. It has discussed this treaty and the Panama Canal Treaty more than any other treaty has been discussed since the Treaty of Versailles in 1919 and 1920.

The history of the 1903 treaty has been discussed in detail. We have been reminded of the magnificence of the engineering and also of the brave deeds of those who fought the diseases of malaria and yellow fever. These reminders have excited our admiration. We have also been reminded, Mr. President, that the role which the United States played in the creation of Panama was a role of rough-riding diplomacy and that it does not have the luster of that history of engineering and public health achievements.

We have been reminded that the United States does not, indeed, have sovereignty over the Panama Canal Zone, and that the relations with Panama have been burdened, over these many years, with strong Panamanian feelings concerning the 1903 treaty and, as they see it, the inequities that are embraced in that treaty, and the fact that they view the control of the United States, a foreign power, over a strip of land 50 miles long and 10 miles wide which bisects their country, as one which causes them to feel that they are being subjugated.

I do not desire to be repetitious of all of these arguments. Many words have filled this Chamber during the days since February 8, when the Senate first began its deliberations on the treaties.

The neutrality treaty itself has been improved by the leadership amendments cosponsored by 78 Senators, including the majority and the minority leaders. The resolution of ratification has been improved by certain amendments. The Senate has deliberated, and it has deliberated carefully. I know of no subject during my 20 years in the Senate that has been so thoroughly explored, so exhaustively studied, or so thoughtfully addressed as has this treaty. But before the final chapter is written, I have just a few observations.

The treaties, I remind my colleagues, are between nations and not between men. Men are merely the temporary players on the stage of world affairs who exercise the instruments that are placed in their hands; but the treaties themselves are not between Mr. Carter and Dictator Torrijos. They are between nations, as all treaties are between nations.

Second, the United States will maintain control over the Panama Canal Zone for 22 years, until December 31, 1999.

Third, the treaty as amended will guarantee that the United States has the right to act against any threat to the canal or to the peaceful transit of vessels through the canal. The treaty will also, as amended, guarantee that U.S. war vessels and auxiliary vessels will go to the head of the line in time of emergency and in time of need.

The Joint Chiefs of Staff have said repeatedly—Mr. President, may we have order in the Senate?

The VICE PRESIDENT. The Senate will be in order.

The Senator may proceed.

Mr. ROBERT C. BYRD. The Joint Chiefs of Staff have said repeatedly that the strategic military value of the canal lies in its use; and the same is true with respect to our commercial and economic interests: The value of the canal lies in its continued accessibility, its openness, and its use.

Another observation I would like to make is this: I believe that no greater contribution to the strength and the moral standing of these United States and to the image of our country in the eyes of the world can be made than to ratify the treaty before us. It will not be a sign of weakness, as some have maintained, but it will be a sign of strength.

Mr. President, nothing can be politically right if it is morally wrong. In my judgment, it is not only economically right, not only commercially right, not only right from the standpoint from the security interests of our country, not only politically right, but it is morally right that we vote to ratify these treaties, and thus live up to the principles that we have so long espoused among nations. Mr. President, if one bases his vote on that strong and unshakeable foundation as to what is morally right, then I feel that history will accord to him the just deserts to which he is entitled.

Finally, I would like to say a word of admiration for those Senators who voted with me today in support of this treaty. Caesar once asked the question of his captain in the Roman Army:

Will this day be fortunate for us?

The centurion answered:

You will be victorious. As for me, I can only pray that when the night comes, whether I live or die, I shall have deserved the praise of Caesar.

Mr. President, those Senators who vote for this treaty tonight will have deserved the praise of thoughtful Americans and thoughtful people everywhere. There is no political mileage in voting for these treaties, and there is no doubt in my mind but that every Senator who votes for these treaties will to some extent suffer a loss of support among his people. To you who vote for the treaty, may I say that your badges of courage may be the dents in your armor. But there are words of even greater comfort that I would offer: He who undertakes to conduct the affairs of a great government as a dedicated, faithful public servant, if sustained by the approval of his own conscience, can rely with confidence upon the candor and the intelligence of a free people, and can bear with patience the censure of disappointed men.

Now, Mr. President, a word of respect to those who do not agree with me. We can only admire them also, and speak words of great respect. They, too, have sought to do what they have perceived to be in the best interests of our country, and they have rendered a service. They have contributed to the discussion, and as a result of the concerns which they have expressed the treaties have been improved. But for those concerns, the leadership amendments would probably never have been offered. And so, Mr. President, I have only the deepest of respect for those of you who vote against the treaty. We have searched for truth, and both sides lay claim to the answer to the ultimate question, the ultimate question being, What is in the best interests of the United States of America?

So, as we bring this debate to a conclusion, those who vote for the treaties and those who vote against perceive their own positions as being—Mr. President, may we have order in the Senate?

The VICE PRESIDENT. The Senate will be in order.

Mr. ROBERT C. BYRD. Perceive their own positions and their own decisions as being the ultimate answer to that question. I will close, therefore, by repeating the words of Daniel Webster when he said:

Let our object be, Our Country, Our Whole Country, and Nothing But Our Country. And, by the blessing of God, may that country itself become a vast and splendid monument, not of oppression and terror, but of wisdom, of peace, and of liberty——

And, if I may add one word, of justice——

upon which the world may gaze with admiration forever.

Mr. GRIFFIN. Mr. President, a parliamentary inquiry.

The VICE PRESIDENT. The Senator will state his inquiry.

Mr. GRIFFIN. What will be the pending question at the hour of 4 o'clock?

The VICE PRESIDENT. The hour of 4 o'clock having arrived, the Senate will now proceed to vote on the amendment of the Senator from Michigan. The yeas and nays have been ordered.

Mr. GRIFFIN. I ask it be read.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent it not only be read, but that the Senator from Michigan have 1 minute and the Senator from Idaho have 1 minute in explanation.

The VICE PRESIDENT. Without objection, it is so ordered.

The clerk will state the amendment.

Mr. CRANSTON. Mr. President, a parliamentary inquiry.

The VICE PRESIDENT. The Senator will state it.

Mr. CRANSTON. How many amendments are pending at the desk to be voted upon?

The VICE PRESIDENT. Just the single amendment offered by the Senator from Michigan.

Mr. CRANSTON. I thank the Chair.

The VICE PRESIDENT. The clerk will state the amendment.

AMENDMENT NO. 71, AS MODIFIED

The legislative clerk read as follows:

The amendment of the Senator from Michigan (Mr. GRIFFIN), as modified, in the nature of a substitute, No. 71, reads as follows:

Resolved, That the Senate return to the President of the United States the Treaty Concerning the Permanent Neutrality and Operation of The Panama Canal, together with the annexes and the Protocol relating thereto, done at Washington on September 7, 1977 (Ex. N, Ninety-fifth Congress, first session), with the advise of the Senate that negotiations to develop a new treaty relationship with the Republic of Panama, involving all the Nations of North and South America who wish to participate be resumed and continued until a treaty is agreed upon that better serves the interests of both nations, and all the Nations of the Western Hemisphere.

The VICE PRESIDENT. The yeas and nays have been ordered.

The Senator from Michigan.

Mr. GRIFFIN. Mr. President, under the Constitution, the Senate has the power of advice and consent. That is a coequal power along with the President who negotiates the treaty.

I have the uneasy feeling today as we approach this vote that a requisite number of Senators in this body realize that this treaty is inadequate and flawed and ought to be rejected, but there is reluctance to reject a treaty.

There is reluctance because of the impact that would have on our relations with the people of Panama and on our relations with the hemisphere.

Of late, we have been hearing that there is reluctance because of the impact it might have on the Presidency and the prestige of a particular President.

I, too, am concerned about the Presidency and our relations. I believe that the Senate does have an alternate course to take.

The VICE PRESIDENT. The Senator's time has expired.

Mr. GRIFFIN. In the form of the resolution now before the Senate, that is, to withhold our consent, but to advise the President to send this treaty back to the bargaining table for further negotiations.

The VICE PRESIDENT. The Senator from Idaho.

Mr. CHURCH. Mr. President, if the Senate were to adopt this proposal, we would not go back to the bargaining table. In all probability, we would go back to the trenches.

Two hundred years ago, America may have experienced her finest hour at the moment of her birth. It was then that we repudiated the authority of a distant throne. It was then that we drove out the royal governors and their redcoats. It was then we proclaimed principles by which freedom has lived and flourished and grown throughout the world, in all the years since.

Now is the time to reaffirm those principles by extending to the people of Panama the rights we once seized for ourselves, by ending our own colonial control of the Canal Zone, at a time when colonies have vanished—and empires withered—elsewhere from the Earth.

It is a time to stand up for what we believe. It is a time to do right.

I urge the Senate to reject this proposal and, to that end, I now move to table it.

The VICE PRESIDENT. The Senator's time has expired.

Mr. ROBERT C. BYRD. Mr. President, I ask for the yeas and nays.

The VICE PRESIDENT. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The VICE PRESIDENT. The question is on agreeing to the motion to lay on the table the amendment of the Senator from Michigan, as modified. The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

The result was announced—yeas 67, nays 33, as follows:

[Rollcall Vote No. 65 Ex.]

YEAS—67

Abourezk	Haskell	Metzenbaum
Anderson	Hatfield,	Morgan
Baker	Mark O.	Moynihan
Bayh	Hatfield,	Muskie
Bentsen	Paul G.	Nelson
Biden	Hathaway	Nunn
Bumpers	Hayakawa	Packwood
Byrd, Robert C.	Heinz	Pearson
Cannon	Hodges	Pell
Case	Hollings	Percy
Chafee	Huddleston	Proxmire
Chiles	Humphrey	Randolph
Church	Inouye	Ribicoff
Clark	Jackson	Riegle
Cranston	Javits	Sarbanes
Culver	Kennedy	Sasser
Danforth	Leahy	Sparkman
DeConcini	Long	Stafford
Durkin	Magnuson	Stevenson
Eagleton	Mathias	Stone
Glenn	Matsunaga	Talmadge
Gravel	McGovern	Weicker
Hart	McIntyre	Williams

NAYS—33

Allen	Garn	Schmitt
Bartlett	Goldwater	Schweiker
Bellmon	Griffin	Scott
Brooke	Hansen	Stennis
Burdick	Hatch	Stevens
Byrd,	Helms	Thurmond
Harry F., Jr.	Johnston	Tower
Curtis	Laxalt	Wallop
Dole	Lugar	Young
Domenici	McClure	Zorinsky
Eastland	Melcher	
Ford	Roth	

So the motion to table Mr. GRIFFIN's amendment was agreed to.

Mr. CHURCH. Mr. President, I move to reconsider the vote by which the motion to lay on the table was agreed to.

Mr. SARBANES. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD addressed the Chair.

The VICE PRESIDENT. The Senator from West Virginia.

Mr. ROBERT C. BYRD. Mr. President, I ask for the yeas and nays on the resolution of ratification.

The VICE PRESIDENT. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask that the Chair insist upon order in the Chamber and in the galleries, that the well remain clear, and that the legislative clerk repeat after each Senator votes the name of the Senator and the vote so that all Senators may hear and the media may hear. Since Senators hope to keep a running tally they have tally sheets at their desks. This vote will require 20 minutes and a warning bell is to sound after the first 12½ minutes.

So I ask the Chair once again to keep the well clear while the vote is in progress.

The VICE PRESIDENT. If there is no amendment, reservation, and so forth, the question is on the resolution of ratification on Executive N, 95th Congress, 1st session, a Treaty Concerning the Permanent Neutrality and Operation of the Panama Canal.

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk proceeded to call the roll.

(During the call of the roll, the following occurred:)

The VICE PRESIDENT. The Senate will be in order.

The gallery is admonished to remain silent.

The Senate will be in order.

The clerk will resume.

The legislative clerk resumed and concluded the call of the roll.

The yeas and nays resulted—yeas 68, nays 32, as follows:

[Rollcall Vote No. 66 Ex.]

YEAS—68

Abourezk	Hart	Metzenbaum
Anderson	Haskell	Morgan
Baker	Hatfield, Mark O.	Moynihan
Bayh	Hatfield, Paul G.	Muskie
Bellmon	Hathaway	Nelson
Bentsen	Hayakawa	Nunn
Biden	Heinz	Packwood
Brooke	Hodges	Pearson
Bumpers	Hollings	Pell
Byrd, Robert C.	Huddleston	Percy
Cannon	Humphrey	Proxmire
Case	Inouye	Ribicoff
Chafee	Jackson	Riegle
Chiles	Javits	Sarbanes
Church	Kennedy	Sasser
Clark	Leahy	Sparkman
Cranston	Long	Stafford
Culver	Magnuson	Stevenson
Danforth	Mathias	Stone
DeConcini	Matsunaga	Talmadge
Durkin	McGovern	Weicker
Eagleton	McIntyre	Williams
Glenn	Metcalf	
Gravel	Mondale	

NAYS—32

Allen	Goldwater	Roth
Bartlett	Griffin	Schmitt
Burdick	Hansen	Schweiker
Byrd, Harry F., Jr.	Hatch	Scott
Curtis	Helms	Stennis
Dole	Johnston	Stevens
Domenici	Laxalt	Thurmond
Eastland	Lugar	Tower
Ford	McClure	Wallop
Garn	Melcher	Young
	Randolph	Zorinsky

Mr. ROBERT C. BYRD. Mr. President, I realize that no debate is in order during a rollcall, but with all 100 Senators having voted, I suggest, if there is no objection, that the time run and the Chair state the vote.

The VICE PRESIDENT. Without objection, it is so ordered.

On this vote, the yeas are 68, the nays are 32. Two-thirds of the Senators present and voting having voted in the affirmative, the resolution of ratification is agreed to.

The resolution of ratification as agreed to is as follows:

Resolved (two-thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of the Treaty Concerning the Permanent Neutrality and Operation of the Panama Canal, together with Annexes A and B thereto and the Protocol relating thereto, done at Washington on September 7, 1977 (Executive N, Ninety-fifth Congress, first session), subject to the following—

(a) AMENDMENTS:

(1) At the end of Article IV, insert the following:

"A correct and authoritative statement of certain rights and duties of the Parties under the foregoing is contained in the Statement of understanding issued by the Government of the United States of America on October 14, 1977, and by the Government of the Republic of Panama on October 18, 1977, which is hereby incorporated as an integral part of this Treaty, as follows:

" 'Under the Treaty Concerning the Permanent Neutrality and Operation of the Panama Canal (the Neutrality Treaty), Panama and the United States have the responsibility to assure that the Panama Canal will remain open and secure to ships of all nations. The correct interpretation of this principle is that each of the two countries shall, in accordance with their respective constitutional processes, defend the Canal against any threat to the regime of neutrality, and consequently shall have the right to act against any aggression or threat directed against the Canal or against the peaceful transit of vessels through the Canal.

" 'This does not mean, nor shall it be interpreted as, a right of intervention of the United States in the internal affairs of Panama. Any United States action will be directed at insuring that the Canal will remain open, secure, and accessible, and it shall never be directed against the territorial integrity or political independence of Panama.'."

(2) At the end of the first paragraph of Article VI, insert the following:

"In accordance with the Statement of Understanding mentioned in Article IV above: 'The Neutrality Treaty provides that the vessels of war and auxiliary vessels of the United States and Panama will be entitled to transit the Canal expeditiously. This is intended, and it shall so be interpreted, to assure the transit of such vessels through the Canal as quickly as possible, without any impediment, with expedited treatment, and in case of need or emergency, to go to the head of the line of vessels in order to transit the Canal rapidly.'."

(b) CONDITIONS:

(1) Notwithstanding the provisions of Article V or any other provision of the Treaty, if the Canal is closed, or its operations are interfered with, the United States of America and the Republic of Panama shall each independently have the right to take such steps as each deems necessary, in accordance with its constitutional processes, including the use of military force in the Republic of Panama, to reopen the Canal or restore the operations of the Canal, as the case may be.

(2) The instruments of ratification of the Treaty shall be exchanged only upon the conclusion of a Protocol of Exchange, to be signed by authorized representatives of both Governments, which shall constitute an integral part of the Treaty documents and which shall include the following:

"Nothing in the Treaty shall preclude the Republic of Panama and the United States of America from making, in accordance with their respective constitutional processes, any agreement or arrangement between the two countries, to facilitate performance at any time after December 31, 1999, of their responsibilities to maintain the regime of neutrality established in the Treaty, including agreements or arrangements for the stationing of any United States military forces or the maintenance of defense sites after that date in the Republic of Panama that the Republic of Panama and the United States of America may deem necessary or appropriate.".

(c) RESERVATIONS:

(1) Before the date of entry into force of the Treaty, the two Parties shall begin to negotiate for an agreement under which the American Battle Monuments Commission would, upon the date of entry into force of such agreement and thereafter, administer, free of all taxes and other charges and without compensation to the Republic of Panama and in accordance with the practices, privileges, and immunities associated with the administration of cemeteries outside the United States of America by the American Battle Monuments Commission, including the display of the flag of the United States of America, such part of Corozal Cemetery in the former Canal Zone as encompasses the remains of citizens of the United States of America.

(2) The flag of the United States of America may be displayed, pursuant to the provisions of paragraph 3 of Article VII of the Panama Canal Treaty, at such part of Corozal Cemetery in the former Canal Zone as encompasses the remains of citizens of the United States of America.

(3) The President—

(A) shall have announced, before the date of entry into force of the Treaty, his intention to transfer, consistent with an agreement with the Republic of Panama, and before the date of termination of the Panama Canal Treaty, to the American Battle Monuments Commission the administration of such part of Corozal Cemetery as encompasses the remains of citizens of the United States of America; and

(B) shall have announced, immediately after the date of exchange of the instruments of ratification, plans, to be carried out at the expense of the Government of the United States of America, for—

(i) removing, before the date of entry into force of the Treaty, the remains of citizens of the United States of America from Mount Hope Cemetery to such part of Corozal Cemetery as encompasses such remains, except that the remains of any citizen whose next of kin objects in writing to the Secretary of the Army not later than three months after the date of exchange of the instruments of ratification of the Treaty shall not be removed; and

(ii) transporting to the United States of America for reinterment, if the next of kin so requests, not later than thirty months after the date of entry into force of the

Treaty, any such remains encompassed by Corozal Cemetery and, before the date of entry into force of the Treaty, any remains removed from Mount Hope Cemetery pursuant to subclause (i); and

(C) shall have fully advised, before the date of entry into force of the Treaty, the next of kin objecting under clause (B)(i) of all available options and their implications.

(4) To carry out the purposes of Article III of the Treaty of assuring the security, efficiency, and proper maintenance of the Panama Canal, the United States of America and the Republic of Panama, during their respective periods of responsibility for Canal operation and maintenance, shall, unless the amount of the operating revenues of the Canal exceeds the amount needed to carry out the purposes of such Article, use such revenues of the Canal only for purposes consistent with the purposes of Article III.

(d) UNDERSTANDINGS:

(1) Paragraph 1(c) of Article III of the Treaty shall be construed as requiring, before any adjustment in tolls for use of the Canal, that the effects of any such toll adjustment on the trade patterns of the two Parties shall be given full consideration, including consideration of the following factors in a manner consistent with the regime of neutrality:

(A) the costs of operating and maintaining the Panama Canal;

(B) the competitive position of the use of the Canal in relation to other means of transportation;

(C) the interests of both Parties in maintaining their domestic fleets;

(D) the impact of such an adjustment on the various geographical areas of each of the two Parties; and

(E) the interests of both Parties in maximizing their international commerce.

The United States of America and the Republic of Panama shall cooperate in exchanging information necessary for the consideration of such factors.

(2) The agreement 'to maintain the regime of neutrality established in this Treaty' in Article IV of the Treaty means that either of the two Parties to the Treaty may, in accordance with its constitutional processes, take unilateral action to defend the Panama Canal against any threat, as determined by the Party taking such action.

(3) The determination of 'need or emergency' for the purpose of any vessel of war or auxiliary vessel of the United States of America or the Republic of Panama going to the head of the line of vessels in order to transit the Panama Canal rapidly shall be made by the nation operating such vessel.

(4) Nothing in the Treaty, in Annex A or B thereto, in the Protocol relating to the Treaty, or in any other agreement relating to the Treaty, obligates the United States of America to provide any economic assistance, military grant assistance, security supporting assistance, foreign military sales credits, or international military education and training to the Republic of Panama.

(5) The President shall include all amendments, conditions, reservations, and understandings incorporated by the Senate in this resolution of ratification in the instrument of ratification to be exchanged with the Government of the Republic of Panama.

Mr. CHURCH. Mr. President, I move to reconsider the vote by which the resolution of ratification was agreed to.

Mr. SARBANES. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. CHURCH. Mr. President, I ask unanimous consent that the Secretary of the Senate be authorized to make technical and clerical corrections in the engrossment of the resolution of ratification.

The VICE PRESIDENT. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President. if I may have order——

The VICE PRESIDENT. The Senate will be in order. The Senate will be in order.

Mr. ROBERT C. BYRD addressed the Chair.

The VICE PRESIDENT. The Senate will be in order.

THE PANAMA CANAL TREATY

Mr. ROBERT C. BYRD. Mr. President, if we have order in the Senate—and I thank the Chair for securing order in the Chamber and in the gallery—I ask unanimous consent that at this time the Senate proceed to the consideration of Calendar Order No. 2 on the Executive Calendar, the Panama Canal Treaty, with the understanding that there be no rollcall votes today.

The VICE PRESIDENT. Without objection, the clerk will report.

The assistant legislative clerk read as follows:

Calendar Order No. 2, Executive N (95th Cong., 1st sess.) the Panama Canal Treaty.

The Senate proceeded to consider the treaty.

Mr. ROBERT C. BYRD. Now, Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. FORD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. MELCHER. Objection.

The PRESIDING OFFICER (Mr. SASSER). Objection is heard.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Is there objection?

Mr. MELCHER. I object.

The PRESIDING OFFICER. Objection is heard.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, may we have order in the Senate?

The PRESIDING OFFICER. The Senate will be in order. Senators will take their seats or retire to the cloakrooms.

The Senator from West Virginia.

Mr. ROBERT C. BYRD. Mr. President, the Senate is still not in order.

The PRESIDING OFFICER. The Senate will be in order. Will Senators kindly take their seats or pursue their conversations in the cloakrooms.

The Senator from West Virginia.

Mr. ROBERT C. BYRD. Mr. President, I yield to the distinguished Senator from Kentucky without losing my right to the floor.

Mr. FORD. I thank the distinguished majority leader.

Now, I understand there is——

Mr. STENNIS. May we have order, Mr. President.

Mr. FORD. I would like to have order so that I may make a statement for 3 minutes.

The PRESIDING OFFICER. Will the Senator suspend, please. The Senate is not in order. Will the Senate kindly be in order.

The Senator from Kentucky.

Mr. FORD. Mr. President, now that the first of these treaties has been acted upon and the will of the Senate has been spoken, let me take this opportunity, if I may, to urge the Members of this body to move with all due dispatch in the consideration of the second treaty.

Energy, agriculture, international trade agreements, authorizations and appropriations for school and health programs, the congressional budget are but a few of the areas awaiting congressional action. Needless delay of their consideration would be contrary, in my opinion, to the national interest.

The debate on the first treaty has been thorough and complete. Remember the Senate should by now have a solid grasp of the treaties and be prepared to move without undue delay toward a final reconciliation.

Few facts remain to be discussed; few arguments are left to be spoken. The amount of time that has been spent on the first treaty, some 22 years, has put the Senate far behind in its other business. The prolonged debate on this issue, while important, has obscured to some degree the other issues which, in my opinion, are more important to the Nation's domestic tranquility and economic well-being.

I hope my colleagues share this concern. Our emphasis on these treaties has not been misdirected. The time has come to move on and deal with the other important issues awaiting congressional attention during this session.

Mr. President, I am hopeful that in a very short period of time we can move to a vote on the second treaty and be about those things that are for our country's good.

I thank the majority leader.

Mr. MATHIAS addressed the Chair.

The PRESIDING OFFICER. The Senator from Maryland is recognized.

DEATH OF JOHN MARSHALL BUTLER

Mr. MATHIAS. Mr. President, it is with great personal regret and sorrow that I announce to the Senate the death of John Marshall Butler of Baltimore. Senator Butler, who was our colleague for many years, came to the Senate in the election of 1950, and he served here through January of 1963. He made an enormous contribution to the Senate. He was one of the great experts in the field of maritime commerce. He spoke eloquently and forcefully for the American merchant marine, and will be long remembered as one of the great champions of America's marine commerce.

Senator Butler died on the 14th of March while he and Mrs. Butler were returning to Maryland from a vacation

in Florida. I am sure that his death is a great shock to his wife, to his children, and certainly a great sorrow to all of us who served with him and who knew him well.

Mr. JAVITS. Will the Senator yield?

Mr. MATHIAS. I yield to the Senator from New York.

Mr. JAVITS. I served with Senator Butler and found him to be a true Maryland gentleman and friend. Though we disagreed on many points, I considered he exerted a most constructive influence in the Senate. I would like to join the Senator from Maryland on behalf of Mrs. Javits and myself in mourning his loss and expressing our condolences to Mrs. Butler and his family.

Mr. MATHIAS. I thank the Senator from New York. I yield to the Senator from Mississippi.

Mr. STENNIS. Mr. President, I appreciate the Senator yielding. I learned with great sorrow from his remarks of the passing of the late Senator from Maryland, who was a very active Member of this body, a hard-working member of committees and on the floor, and with a very fine, genial disposition. We enjoyed him as a man as well as a fellow lawmaker. I will always remember him.

Mr. MATHIAS. And I think the Senator from Mississippi would agree with me that Senator Butler had a quality that I am not sure all of us have, certainly I would not claim it for myself, he looked like a U.S. Senator.

Mr. STENNIS. That is correct.

Mr. SARBANES. Will the Senator yield?

Mr. MATHIAS. I yield to my colleague from Maryland.

Mr. SARABANES. I appreciate the Senator yielding. I want to join with him in his expressions of sympathy to Mrs. Butler and to the family. Senator Butler was a man who was generous with his advice and counsel. While I was of an opposite party, I must say I, on occasion, benefited greatly from the advice and counsel which he was so generous in giving. He was a man of extraordinary qualities which was always reflected in his personal relationships, in the truest sense, as a gentleman. I join with my distinguished colleague from Maryland in expressing great sorrow at his passing.

Mr. MATHIAS. I thank my colleague.

Mr. HELMS. Will the Senator yield?

Mr. SARBANES. I yield to the Senator from North Carolina.

Mr. HELMS. Mr. President, I am in a little different position, perhaps, from some of the others who have paid tribute to the late Senator Butler.

A few years ago, more years than I care to admit, I served as an administrative assistant to a Senator from North Carolina and our offices were next door to Senator Butler's. I recall him as a man of great charm and courage, just one of nature's noble men. I join with the Senator from Maryland in paying tribute to Senator Butler.

Mr. MATHIAS. I thank the Senator.

The PRESIDING OFFICER. The Senator from Wyoming (Mr. HANSEN).

LOOK OUT YOUR WINDOW, MR. BOSWORTH

Mr. HANSEN. Mr President, thousands and thousands of America's farmers and ranchers have served time in Washington these past few months in an attempt to awaken their Government to the fact that they are going broke.

I have seen and talked to many of these people, and all of us here have seen and talked to them. Their mission here has been reported by the news media. But there is at least one person in this town who apparently has not noticed what is going on.

His name is Barry Bosworth, and he is Director of the Council on Wage and Price Stability. He advises our President on economic matters, and according to a recent newspaper story, Mr. Bosworth is concerned about inflation.

I am glad Mr. Bosworth is concerned about inflation. I have been concerned about it for a long time, and I am pleased to know there is similar concern on the part of a high adviser to the President. But Mr. Bosworth and I do not see eye to eye on what should be done to combat inflation.

According to an article in the Washington Post, Mr. Bosworth has sent a lengthy memo to the President about how to curb inflation, and one of the steps he recommends is to increase the amount of meat we import from foreign countries in order to drive down livestock prices in this country.

Well, I say, "Look out your window, Mr. Bosworth. You might spy some of the hundreds of American livestock producers who have been trudging from office to office to inform the bureaucrats therein that for many months now, they have been getting less for their livestock than it costs to produce them."

It might do Mr. Bosworth a lot of good to talk to some of these livestock producers. After all, they are just as concerned about inflation as he is, and they might have some pretty good suggestions for curbing it. Besides, it would be fascinating to hear him explain to them how it would be a good thing for their government to arrange for increased foreign competition now that livestock prices look like they might approach the level of 20 years ago.

Mr. President, we all know the livestock industry has been in deep trouble for a long time. Even so, none of the producers with whom I have talked wants or expects Government subsidies. They are not dumb. They know that if the Government were to give them anything with one hand, it would only take more away with the other. But they do expect Government to take their side when it comes to international trade matters. And they do not expect Government to deliberately ruin their chances for economic recovery by inviting foreign governments to make further inroads in our markets with their cheap products.

Foreign countries have always enjoyed significant access to our markets for their meat products. Even in times such at these past 3 years when the American livestock industry was in deep financial trouble, foreign imports have been allowed to increase steadily. We do not need any more imported meat. In fact, we need to change the law to reduce the amount that is flooding our markets now. Legislation is pending to do that, and Mr. Bosworth's memo to the President graphically demonstates the need for prompt action.

Mr. President, I commend Mr. Bosworth for expressing concern about inflation. But I recommend to him that instead of sacrificing any of our own industries, we make a concerted effort to stop Government's contribution to inflation. I urge him to urge the President to make good his promise to balance the Federal budget and to stop imposing rules and regulations on Americans which increase costs.

TREATY CONCERNING THE PERMANENT NEUTRALITY AND OPERATION OF THE PANAMA CANAL

The PRESIDING OFFICER. The Senator from Maryland.

Mr. SARBANES. Mr. President, in the course of the consideration of the treaty I know we all agree as to the extraordinary leadership provided by the distinguished Senator from Idaho (Mr. CHURCH). It was a privilege for me to have had the opportunity to work closely with him. I know the role he played and the positions he took in some respects were difficult ones, but he is a man of great ability, great courage and great commitment.

Mr. President, the Idaho Daily Statesman, of Boise, Idaho, carried on the 16th of March an article with respect to the role which Senator CHURCH has played. I ask unanimous consent that it be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

CHURCH STAKES JOB ON PANAMA TREATY

(By Bill Dietrich)

WASHINGTON.—Senator Frank Church, D–Idaho, looked weary Wednesday afternoon, but then he had every right to be: in his own words, he had been "perhaps digging a political grave for myself as long as one of the Panama Canal locks."

In the face of a flood of adverse mail from Idaho, Church has spent 10 to 12 hours a day on the Senate floor leading the debate in favor of the Panama Canal treaties.

Today, his diligence will be tested. The first and least significant of the two canal treaties will be voted on in what is seen as a crucial test—for Church, for President Carter, for the Senate.

"No one can say right now how it will go," Church said Wednesday. "It will be within a few votes either way."

Church is managing the canal debate as ranking Democrat on the Foreign Relations Committee. Chairman John Sparkman asked Church to shoulder the job because of Sparkman's sagging health.

The Idaho Senator has approached what to him is a politically thankless job with a sense of deja vu: "It's a lonely road," he said, "but I've been down it before. When I first opposed the war in Vietnam, no one agreed with me. Today a big majority would acknowledge the war was a terrible mistake."

Church is betting events will prove him right again. He has received only 500 to 600 letters from Idaho favoring the treaties, compared to an estimated 6,000 letters opposed, 2000 more on postcards generated by political groups and 15,000 names on petitions.

Senator James McClure, a treaty opponent, has received 50,000 Idaho letters or names on petitions opposing the treaties.

Why is Church, an elected representative, going against the grain?

One aide to an Idaho Republican forecast that the Senator's role on Panama will cost him 10 per cent in the 1980 election and his Senate seat.

"How can people respect a Senator who bends with the wind?" Church retorted, looking rumpled and tired after coming off the Senate floor. "What I am here for if not to use my best judgment after careful study? Anyone who wets his fingers every time he casts a vote is unworthy of being in the U.S. Senate. Sometimes it's necessary to take the unpopular position. Because there are so many public officials who won't take an unpopular stand, our problems aren't being solved. The country is drifting. There is no leadership."

He paused. "I have never weighed opinion by the pound."

In a March 2 floor speech explaining his stand, Church said, "to those who warn me that my support of these treaties will cost me my job—even if the treaties are amended, as I have proposed, to spell our U.S. rights to defend the canal and to assure first passage for our ships in time of emergency—I have responded that my vote is a matter of conscience and I must live with my conscience much longer than I must live with my job."

Church expanded on that Wednesday, saying, "at least I'll be able to face myself in the mirror. If the Senate rejects these treaties, I don't want that on my conscience when the coffins start coming home."

Church believes Senate rejection would lead to violence in the Canal Zone and a needless loss of life. He has also pointed to two Idaho polls, one by the Professional Resource Group in Boise and the second by the Rocky Mountin Poll, broken down state by state, as evidence that he may not be ignoring the wishes of his constituents after all.

The PRG poll in January showed that, when asked if they favored the treaties if the U.S. has the right to intervene and priority passage for its ships in time of need—which Church says the treaty, as now amended, will do—Idahoans support climbed from 12.7 to 28 per cent. The Rocky Mountain Poll, which asked for support if the U.S. was guaranteed the right to defend the canal, showed 56 per cent of Idahoans in favor.

Church does not claim that means a majority of Idahoans back him, but he said it did hint that support may be greater than the letters indicate.

The Idaho Senator would not claim he does not watch public opinion closely, as does any politician. Some have charged that he is responding to a prevailing Western mood by becoming more conserative on natural resource issues, for example.

But Church also pointed out that taking unpopular stands is not new for him in this Congress. He bucked Democratic President Carter in two fights: to keep the nuclear breeder reactor and restore oral auctions on national forest timber bidding in the West, and won both in the Senate. He opposed Idaho's three Republican representatives to lead in the creation of the Gospel-Hump wilderness (at one point he was hung in effigy in Grangeville), and won that fight, too.

"If the country is going to be led only by elected officials who take popular positions, it will not be led at all," he said. "Idaho people have always given their respect to elected officials who stand by their principles—especially when it was politically difficult to do so."

But the momentary toll on Church seems evident. He stifled a yawn Wednesday, as an opponent railed against the treaties, with the same arguments both sides have trotted out for months now. And when he came off the Senate floor, his walk was more a shuffle than a march.

But Church is no neophyte at this kind of thing. "If you can't take the heat, stay out of the kitchen," he finally recited to a reporter.

And his lope back onto the floor and the long debate was positively spry.

The PRESIDING OFFICER (Mr. LEAHY). The Chair will remind Senators that it is almost impossible to hear. The Chair will ask for order.

Mr. JAVITS. Will the Senator yield?

Mr. SARBANES. I yield.

Mr. JAVITS. Mr. President, Senator CASE is not here. He is the ranking minority member of the Foreign Relations Committee. I know he would want me to join in our thanks and appreciation for the outstanding service rendered by Senator CHURCH, not only to our committee and to the Senate but to our Nation in respect to his management of this historic and very difficult issue on the floor.

I would also like to pay tribute to my colleague from Maryland. He is by no means one of our senior Members, but he perceived the need for the kind of assistance which Senator CHURCH would need if he was to carry this enormous burden, and he rendered it in a magnificent way. I am very proud of him. I feel all my colleagues of the minority would wish me to say exactly the same thing. I am very proud of the fact that though a relatively new Member he took on this great responsibility and handled it so admirably. I think our whole country should be grateful to him for it.

Mr. SARBANES. I thank the Senator.

Mr. CHURCH. Will the Senator yield?

Mr. JAVITS. I yield.

Mr. CHURCH. It is typical of the graciousness of the Senator from New York that he expresses himself as he has. I thank him for his kindness to me.

I want to underscore what he has said about Senator SARBANES. There is a western expression I would like to use. I think he won his spurs in this debate.

It has been a matter of great comfort and satisfaction to have had the Senator right alongside me these past 5 weeks. I look forward to the same close association with the Senator in the weeks to come as we debate the next treaty.

Mr. SARBANES. I thank the Senator very much.

Mr. HATCH. Will the Senator yield?

Mr. CHURCH. I am happy to yield.

Mr. SCOTT. Mr. President, today I was disappointed with the results of the vote on the Neutrality Treaty. Nevertheless, the Senate has spoken and has consented to this treaty. I believe this was somewhat of a precedent today. We will have another day. The battle is not entirely over. I would hope that the people of the country might advise and consent, or at least confer, with their own Senators to see whether the vote of their Senators met with the approval of their constituency.

When we have a vote on the more important, the more comprehensive treaty, the Panama Canal Treaty, under which the ownership and control of the Canal Zone would be transferred to the Panamanians, this, to me, is the real test in the Senate. I would say that if we retain the present votes against the treaty and gain two additional votes, the results will be different.

I make the suggestion that each of us confer with our constituency over the Easter recess, because I doubt that there will be a final vote on the Panama Canal Treaty until after the Easter recess. I express the hope that the results will be different in the ratification process of the canal treaty so that a part of our country will not be given away.

Mr. HATCH. Mr. President, I rise to extend my congratulations to the other side for having won their day, especially to Senator CHURCH, who, I think, has conducted the leadership of the pro-treaty forces with dignity and I think a great deal of fairness. Senator SARBANES has been a tough opponent on the floor. I think they deserve a certain amount of credit for what they have done.

The most significant thing that has occurred here today, in my opinion, has been the fact that, for the first time in this whole debate—and of course, we are only on the beginning and I shall have something to say about that. But for the first time in this whole debate, everybody in America knows exactly where every Senator on the floor of the Senate stood on this issue. I think that, for the first time in this whole debate, since it began, everybody in America knows who are for these treaties and who are against these treaties.

I also compliment the distinguished Senator from Nevada (Mr. LAXALT). I think he led a very courageous, a very decent, a very good fight, along with Senator GRIFFIN of Michigan and Senator ALLEN and a number of others, a great fight against the easier of these two treaties. I do not think anybody here, if the Panama Canal Treaty has to be passed or ratified, would want it to be ratified without the Neutrality Treaty. So it is my belief that there are a number of Senators who would vote for the Neutrality Treaty who can be turned around by the population and by their constituents with regard to the more significant of the two treaties. That is the Panama Canal Treaty.

I want to give congratulation where it is deserved, and certainly, those who have fought to win on the Neutrality Treaty deserve congratulations at this time. I would feel much better if, in their zeal to win, they had allowed some of these amendments, which are so crucial to the Neutrality Treaty, to pass. But they, in their wisdom, chose not to do that.

Then their wisdom chose to allow—as a result, I think, of intense pressure by the administration—certain understandings and reservations, which, of course, everybody knows and everybody out there listening ought to know, are not worth the paper they are written on. Because, as a matter of fact, without a plebiscite on those reservations and understand-

ings, which have been, at times, called amendments, Panama will not be bound by those nor will Omar Torrijos be bound by those.

I think the American people deserve to know that. So, when a Senator comes home and says, "Well, I got this reservation for you," that reservation should have been put in the form of an amendment to the treaties themselves so that Panama would be bound.

I think that, regardless of the amendments that may have been enacted, that would have, I think, cleared up the defects in the treaties, the ambiguities and many of the things which I find so reprehensible and so unprotective of America—regardless of the fact that we have had these problems, had the treaty been amended, we would all be better off. I think Torrijos would have accepted whatever we had done.

Be that as it may, I have congratulations for those who have won here today. I want to add my pledge to this august body that the battle has just begun. The Neutrality Treaty is one thing. It is clearly the lesser of the two treaties. It is not nearly as important as the Panama Canal Treaty, which still has ambiguities, which contains many differences between the Spanish version and the English version, which transfers $10 billion of American property without the consent of both Houses of Congress, as is mandated by article IV, section 3, clause 2 of the Constitution; and, of course, which is going to bind the American taxpayers to pay billions of dollars over the next few years, and I think they will have to, in order to satisfy those treaties' demands if the Panama Canal Treaty is ratified.

I think the most significant thing that happened here today was that everybody knows who is for what, for a change. The battle, from that standpoint, I think, is over. But I have to believe that there are Senators in this body who will listen to their constituents on a close question and give their constituents the benefit of the doubt. So, those constituents out there who feel frustrated and who feel as though their views have not been listened to, do not despair. I think you should try twice as hard to convince your Senators, all of whom, I am sure, were very sincere here today, that they should vote against the Panama Canal Treaty.

Another very significant thing about the future debate is that it is going to contain issues that are even, I think, more interesting than the issues on the Neutrality Treaty. I cannot imagine any issue more important than the one concerning the constitutional illegality of the administration's approach in this matter. We have 232 Members of the House of Representatives who have demanded the right to vote on the transfer of $10 billion of American property and are demanding the right under the Constitution, which is mandated to them, to vote on appropriations to which this country is going to be bound in advance of the treaties. That, I think, is very reasonable. Certainly, I think it ought to be done.

I suspect that the country is going to hear some very strong constitutional arguments over the next ensuing weeks. I suspect that these arguments may really make a much greater difference than people might think at first blush. If we allow the transfer of $10 billion of American property without the consent of both Houses of Congress, as mandated by article IV, section 3, clause 2 of the Constitution, then we will be allowing one branch of the Federal Government—that is, the President, the executive—to extend his power to the detriment of the other two coequal branches of Government; in particular, to the detriment of the combined Congress, consisting of the Senate and the House of Representatives. We will be allowing him to do so in violation of the separation of powers doctrine of the Constitution of the United States of America. I think it will be one of the largest breaches of the Constitution to occur in the history of this country.

I might mention that—that I think 232 Members of the House of Representatives—way better than half of the House of Representatives—who have demanded the right to vote on this issue certainly ought to be accorded that privilege by the Members of the Senate, because Congress is only as good as both Houses. We should recognize the needs, the desires, and, certainly, the constitutional mandates that the House of Representatives has put before us as well.

There is dissension in the full Congress, dissension because we are ignoring our brethren in the House. I hope that, after the constitutional debates on this great issue, we will not ignore the brethren in the House and that they will be given an opportunity to vote on these most important matters involving the transfer of American property and on appropriations that will be mandated as a result of these treaties, assuming that they will be enacted or ratified.

So, in my giving congratulations to the other side—they have acknowledged it has been a tough fight—I want to also let them know that the fight has only begun and that there is no rancor in my feelings in saying that. I am just saying that, as a matter of fact, there are some of us here who really believe the American people want to be heard, and I might mention there are those of us in the Senate who are going to give them that right.

I will suggest that the American people start being heard over the next few days and certainly over the Easter recess, since they now know which way the various Senators have voted, so that they can work on either side, to the extent that they deem necessary, to fulfill their desires and to listen to them.

I am happy to yield to the distinguished Senator from Virginia, who has played such an integral role here on the floor and who is one of the greatest Senators here in the U.S. Senate.

Senator HARRY BYRD, of Virginia.

Mr. HARRY F. BYRD, JR. I thank the distinguished Senator from Utah.

I think it is important to point out that while the resolution of ratification was approved today, a change of two votes would have defeated it. It think it is also significant that some six or eight Senators, who supported the resolution of ratification today, told this Senator during the debate on this first resolution, first treaty that this did not bind them to support the second treaty, and some of those who made that statement went so far to say that as of today they would not support the second treaty.

So I think the second treaty is in great jeopardy. It certainly will be in great jeopardy if the American people react to what happened today and let their representatives know that they the American people do not look with favor upon giving away property valued by the Panama Canal Company on a replacement basis of approximately $10 billion.

I would hope, along with the able Senator from Utah, that the Senate would take adequate time in discussing this second treaty. Many Members who supported the first treaty today stated on the floor of the Senate time and time again that many, many amendments needed to be made to the second treaty. Those are the Senators that I am referring to who voted today for the first treaty, but they made it clear that that did not bind them in any way to support the second treaty.

Insofar as the Senator from Virginia is concerned, I want the record to show, and I hope the leadership will protect the Senator from Virginia on any unanimous-consent request for time limitation.

I would like to be informed by the leadership before any requests are made for time limitations on the second treaty or amendments thereto, because we are dealing with huge sums of American tax dollars, for one thing, and the second thing we are dealing with is installations that are vital and extremely important to the defense interests of the United States.

So, I see no reason to rush through the second treaty. It will not become operative for 22 years. If there is other legislation that needs to be considered, the second treaty can be set aside. Twenty-two years is a long time, so I see no reason at all for this Senate to rush through consideration of this second treaty, which will be so costly to the American taxpayer.

I join my distinguished friend and the able Senator from Utah in his statement that the fight is not yet over.

Mr. HATCH. I certainly want to thank the distinguished Senator from Virginia for his comments. He is exactly right.

Inasmuch as I was not on the other side, I think they deserve congratulations for the hard work and the effort that they have put forth. The fight has just begun and the second treaty is really much more important than the first. However, it is easy to see why some Senators would vote for the first because they certainly would not want the second without the first.

I agree with the distinguished Senator from Virginia. A number of Senators have made it clear that they are not bound as a result of the promises, as a result of the pressure or as a result of requests that were made with regard to this first treaty.

I think we have a whole new ball game here and, frankly, I am looking forward

to it. I think the past has been very stimulating and very enjoyable.

I want to thank the public broadcasting services for at least putting this all over America and I think for the first time the American people have heard some of these crucial issues.

I yield at this time to the distinguished Senator from Alabama, for whom I have such high regard and who has ably led a great deal of the fight here on the floor of the Senate, as is usually the case when he is standing up for things that he believes are right for America.

I yield to the distinguished Senator from Alabama (Mr. ALLEN).

Mr. ALLEN. I thank the distinguished Senator, but I do not wish to impose on the Senator's time, and at such time as he does yield the floor, after having completed his remarks, I would like to be recognized.

Mr. HATCH. I appreciate that.

At this time I would like to yield to my colleague, who sits right next to me in the Senate Chamber, who I think is one of the greatest Senators who ever sat in the Senate, who has led notably, and I think intelligently, a great deal of the fight against this neutrality treaty, Senator STROM THURMOND from South Carolina.

Mr. THURMOND. I thank the Senator from Utah for those kind remarks, and I commend him for his outstanding leadership in this fight. He is a very able man. He has presented his arguments well. He is dedicated. He loves his country and he follows a course of action here which I think is for the best interests of America.

Now, Mr. President, I congratulate the proponents of the treaty who attained victory today, but I do not feel that their victory is going to be in the best interests of America if the second treaty is also ratified. I think it will be a costly mistake.

However, the second treaty that will come up will be the main treaty. Those of us who opposed the first treaty have lost the first battle but we have not lost the war, and we feel that there is a chance to defeat the second treaty, which is the important treaty, and we hope to be able to do so.

Now, Mr. President, this treaty fails to provide clear, unequivocal authority to the United States to intervene as it deems necessary or to base troops in Panama after 1999.

Further, the push by the administration to win passage of this treaty exceeds any such efforts that I have witnessed in my 24 years in the Senate.

Future generations will pay the consequences of today's vote in the Senate of such an inadequate treaty, if the second treaty is also confirmed. The lack of clarity of the treaty that was ratified today will actually cause it to promote the problems which it purports to prevent, but the Senate can still correct today's mistake by voting no on the main treaty.

Mr. President, there are many Senators here who worked valiantly and fought hard against these Panama Canal treaties. I would specially single out the able Senator from Alabama who has fought here day after day, spoken day after day, offered amendment after amendment and has done such a fine job against this treaty.

In my opinion, the able Senator from Alabama is the most distinguished parliamentarian that has served in this Senate since I have been a Member here.

I would also like to commend others who have been active in opposing the treaty that was ratified today, and I am sure will be active in opposing this second treaty that will come up, the Panama Canal treaty, the main treaty.

The Senator from Oklahoma (Mr. BARTLETT). The Senator from Virginia (Mr. HARRY F. BYRD, Jr.), who has spoken here time and again and rendered such outstanding service in opposing these treaties.

The Senator from Nebraska (Mr. CURTIS). The Senator from Kansas (Mr. DOLE) who has offered a number of amendments and has been an outstanding leader and opponent of these treaties, and one of our ablest Senators.

The Senator from Utah (Mr. GARN). The Senator from Michigan, (Mr. GRIFFIN).

Incidentally, Senator GRIFFIN was the only member of the Foreign Relations Committee who said "no" on this treaty, and he has rendered valiant service here on the floor of the Senate.

I have already referred to the able Senator from Utah (Mr. HATCH) and the great job he has done. The able Senator from North Carolina (Mr. HELMS) has worked exceedingly hard against these treaties. He and I had the privilege of going to Panama and visiting down there together on a trip. We talked with a lot of people there. We worked together, and we think alike on this particular matter.

The Senator from Nevada (Mr. LAXALT), who acted as the leader on the floor against these treaties, did a fine job. He was very fair in handling the matter. He presented good arguments and deserves to be highly commended.

The Senator from Idaho (Mr. MCCLURE) did a fine job here in offering amendments and standing up against these treaties.

So did the Senator from Montana (Mr. MELCHER) who presented splendid arguments here against these treaties.

The Senator from Wyoming (Mr. WALLOP), who rendered valiant service here, ought to be highly commended for his service.

Mr. President, in closing, I say again that there is no question in my mind, I do not think there is any question in the minds of the majority of the people in this Nation, that these treaties are not in the best interests of the United States.

I sincerely feel we do have a chance yet to defeat the main Panama Canal Treaty and, if we do that, then, of course, this first treaty would fall automatically.

I hope the Members who have opposed these treaties so far will stand firm, and I believe they will, and we hope others will gain information that will enable them to join us in opposing these treaties which are so important to the future of this country.

Mr. ALLEN addressed the Chair.

The PRESIDING OFFICER. The Senator from Alabama.

Mr. ALLEN. Mr. President, the Senate has been engaged for some 5 weeks, I believe, in a momentous debate on a most important issue. I believe it is the most important issue we have had before the Senate in the 9 years that I have been in the Senate.

A decision has been made. I had hoped the decision would have been different. I had hoped we would have received at least 34 votes against the treaties. The Senate has seen fit to cast 68 votes in favor of the Neutrality Treaty, so-called, and 32 opposed.

So the administration, President Carter, the joint leadership, headed by the distinguished majority leader (Mr. ROBERT C. BYRD) and the distinguished minority leader (Mr. BAKER), have achieved a great triumph here in the U.S. Senate, and I commend them for their victory.

There has been much rejoicing by the victors, and that is understandable.

The opponents of the treaties are disappointed, but far from being defeated in this great fight.

I say again, as I said earlier this afternoon when I had some 2½ minutes to close the debate for the opponents of the Neutrality Treaty, that we were accorded every courtesy, every opportunity by the joint leadership to present our case against the treaties, to offer amendments, and to have them acted upon.

No advantage whatsoever was taken of the opponents of the treaties by the leadership, and I commend them for that. They have been considerate in every way of the opponents of the treaties.

The distinguished Senator from Idaho (Mr. CHURCH), to whom I have referred here many times in the debate, and the distinguished Senator from Maryland (Mr. SARBANES), have managed the Neutrality Treaty with great ability, great expertise, great knowledge of the subject, but at the same time they were always considerate of the position of the opposition.

So we have no recriminations. We have no second guessing. We do not speculate that if this Senator had voted thus-and-so, another Senator would have voted in a different way, that we might have come up with a larger total vote.

Certainly, I give great praise to the distinguished Senator from Nevada (Mr. LAXALT), the distinguished Senator from Michigan (Mr. GRIFFIN), the distinguished Senator from North Carolina (Mr. HELMS), the distinguished Senator from South Carolina (Mr. THURMOND), the distinguished Senator from Nebraska (Mr. CURTIS), the distinguished Senator from Utah (Mr. HATCH), and many others among the opposition who have fought side by side, first, in an effort to improve the Neutrality Treaty, the treaty that is supposed to give us defense rights as to the canal, but the joint leadership saw fit to reject every single amendment offered by the opponents of the treaties.

Therein, Mr. President, I believe the leadership made a strategic and tactical

blunder. If that foretells the policy that they are going to use on the Panama Canal Treaty, I would predict that the outcome on the Panama Canal Treaty will be different.

Mr. President, I sought in the early days of this debate to reverse the order of consideration of these treaties so that we would consider first the question of whether we should give the canal away, and the conditions under which we might give it away, before we considered the matter of defense of the canal in the year 2000. But the leadership thought otherwise, and, on my motion to reverse the order, the motion was defeated by a vote, I believe, of 67 to 30.

Mr. President, it would seem that that was a vote that indicated a possible eventual outcome, though some were voting against the motion to table rather than on the merits. That would reduce our vote considerably.

As a matter of fact, Mr. President, at the time the debate was started, the most avid opponents of the treaties were speculating that we had only about 21 votes against the treaties. So I believe this debate has been highly successful and effective.

I believe that much credit is due National Public Radio, which has carried these debates from gavel to gavel. I noticed in the newspapers just the other day that the audience of the public broadcasting radio stations throughout the land that have been carrying the debates in the Senate has expanded by some 500 percent. So millions have been hearing these debates in the Senate, for the very first time, because these debates are a historic occasion.

I think it has been an excellent idea. I believe that greater coverage has been given to the opposition to the treaties than would have been possible without the public radio, because the commercial media have been strong in support of the treaties and have been loath to give any substantial amount of publicity on the views of the opponents of the treaties.

Opinion has shifted in the Senate in the last 2 or 3 days. There were some last-minute changes. Various charges have been made—to which I do not refer—about strong administration pressure. I do not know the nature of this pressure, but apparently efforts have been made—in a perfectly proper way, I am sure—to influence the votes of Senators. So it was uncertain right up to the last minute how this vote was going to go.

Let us see what has been accomplished, Mr. President.

The U.S. Senate has agreed that if the canal is given away—and I stress again that it is based upon that predicate—if the canal is given away by the Panama Canal Treaty, then this treaty will go into effect at the very same time as the Panama Canal Treaty. But they are a package. One cannot be approved and the other defeated. If one is defeated, both are defeated. I am sure there is no difference of opinion on the accuracy of that statement. The treaty that has just been approved by the Senate provides that it shall go into effect simultaneously with the Panama Canal Treaty. Obviously, if the Panama Canal Treaty does not go into effect, then this treaty cannot go into effect.

I am wondering whether perhaps the negotiators of the treaty slipped up again in drafting the treaty. We see many ambiguities, uncertainties, and contradictions. This may well be the fatal defect in the drafting of the treaties.

Had we had before us today both treaties in the form of a single treaty, I have little doubt that the Senate would have approved the one treaty embracing both treaties. How could that be, if the Panama Canal Treaty goes out in the year 2000 and the Neutrality Treaty takes up there and goes on in perpetuity? We could have two parts: One up to the year 2000, the other starting then. But that was not done, and that gives the people of the United States a great opportunity to help defeat these treaties.

This treaty has been approved only conditionally. It cannot go on to an exchange of notes of ratification between the dictator and the President until smilar notes are exchanged with respect to the Panama Canal Treaty.

So, Mr. President, it seems to me that the approval that the Senate has given to this treaty is tentative approval. It is approval conditioned upon approval of the Panama Canal Treaty.

We have some Senators who say, "I am for the Neutrality Treaty." Mr. HEINZ said that he is for the Neutrailty Treaty, with certain reservations; he would be for the Panama Canal Treaty, with an amendment to the treaty.

If the leadership does not set the same policy with respect to the Panama Canal Treaty and then that amendment is defeated, they might lose that Senator.

Mr. BROOKE said that if he had to vote today on the Panama Canal Treaty, his vote would be "No." So the battle is really just getting started.

I am glad that we have been able to have 32 votes, just two votes short of the required number to defeat these treaties. We had 32 votes cast against the Neutrality Treaty. My goodness, that is a pretty good vote against a treaty that provides for defending the canal. Who could be opposed to defending the canal? Senators who did not think the treaty provided strong enough defense rights for the United States—that is who could be against it.

I believe that the draftsmanship of the Panama Canal Treaty leaves much more to be desired than does the draftsmanship of the Neutrality Treaty. It is replete with ambiguities, discrepancies, and provisions that are not in the best interests of the people of the United States. The thrust of these treaties is to give away the canal, and that has not yet been decided. All that has been decided is this: If we give the canal away, we shall defend it under certain grant of rights. That is all that has been decided. We still have the main question to decide.

This is a peripheral matter, and ancillary matter—the defense of the canal in the year 2000—because the Panama Canal Treaty provides for the defense up to the year 2000.

We have not decided the main question. So I do not know. We are having a lot of elation here in the Senate in certain quarters among 68 at least, or maybe not all 68. Some voted for the treaty with misgivings. So I do not know how much elation there was. There was some dejection, I assure you, among the 32, but I do not know just how much elation there was among all 68 who voted for the treaty. I am hopeful, Mr. President, that those Senators who were awarded, shall I say, reservations by the leadership—and you know, of course, that not one single reservation was passed, if it had not had the support of the leadership—I am hoping that those Senators who accepted those reservations and voted for the treaty will feel that their vote was committed only for the neutrality treaty and, Mr. President, I am hoping, too, that as to Senators who did receive reservations attached to the treaty as they consider what they received they will feel that they traded their right to vote against this treaty for a mess of pottage because, in my judgment, the reservations will not be submitted to a plebiscite. We will not have a compact with the people of Panama. We will have only Mr. Torrijos' approval and bear in mind my judgement: He would have approved anything to start this $100 million a year coming into his government.

So as to Senators—and there were three, four, or five, who based their vote for the treaty on the adoption of certain reservations—when they find that the reservation that they accepted and then voted for the treaty is just a hollow shell I am hopeful they will go back to their position of opposition to the treaties.

Mr. President, as I see the situation—and I am going to yield the floor in just a moment, because I believe there will be plenty of opportunity in the next few weeks for me to discuss these issues—presented by the treaties and the tentative approval of one, these debates remind me or are analogous to two teams playing two baseball games in consecutive months.

The first game does not count at all. The results of the first game do not count at all. Whereas, the result of the second game will be all-decisive. So we have gone through an exercise here, Mr. President, but in the final analysis this is not going to accomplish one single thing in furthering this treaty unless the Panama Canal Treaty is approved. It takes the approval of the Panama Canal Treaty to breathe life into this treaty that we have just given tentative approval to.

It is dead as a doornail unless it is followed by affirmative action on the Panama Canal Treaty. So what have we got? We have a treaty that is in a suspended state of animation, not worth a thing. Mr. Torrijos cannot derive any benefits from it whatsoever unless the Panama Canal Treaty is approved.

So the first game does not count, and it is this last game, this last debate on the Panama Canal Treaty that is going to be all-decisive.

So that is the situation we find ourselves in. Of course, we recognize the strategy of the administration under the leadership in putting the Neutrality Treaty first, that that would gain so much

momentum that there would not be any resistance to the second treaty.

I want to disabuse the leadership of any such feeling as that because, as far as I am concerned, the momentum caused by the tentative approval of the Neutrality Treaty has stopped right now. There is no momentum at all. It is dead in the water. It had not gained any momentum.

Tomorrow we will start a debate on the Panama Canal Treaty. And I do not know what erosion there is going to be in our 32 and in their 68 but, quite obviously, there is more opportunity for erosion in a 68 figure than there is in a 32 figure.

So we will see, and the leadership was kind enough to set this vote today and the start of the next debate in such a way that we will have several days of general debate, I assume, on the Panama Canal Treaty, and then go back home and check with our constituents and see if we have acted in accordance with their wishes. And I believe that might have some interest to some Senators. Others have stated here on the floor that they are going to vote like they see fit no matter what their constituents say. Maybe that is a good attitude and maybe it is not. We will soon find out.

But the point I am trying to make and I feel needs to be made, lest the leadership feel that the Panama Canal Treaty is going to be easy pickings after the great victory today, is that that is not going to be the way it is because it is going to be resisted article by article, and I might say this: The plea was made for this neutrality treaty because the sovereign rights of Panama were involved, we could not insult their national honor by demanding defense rights in a sovereign country, and we must not do things to heap indignity upon them. But, Mr. President, when we get to the other treaty that is a gift plus a business arrangement, and I do not see any national honor involved if we provide in the Panama Canal Treaty that it shall not be a burden to the American taxpayer from and after the date of the exchange of notes of ratification.

This issue, I do not think, is going to raise the question of national honor. It is going to raise a question of whether or not you are going to bilk the American taxpayer after giving the canal away.

With these thoughts, Mr. President, I will yield the floor and I plan to speak on another occasion.

(Mr. MOYNIHAN assumed the chair.)

Mr. DOLE. Mr. President, let me first express my appreciation to the distinguished Senator from Alabama and also to the earlier remarks of the distinguished Senator from South Carolina.

I agree with much of what the distinguished Senator from Alabama had to say, although I would hope that as important as the next debate will be that it can somehow be expedited every possible time because the distinguished Senator from Alabama has pointed out we have had a preliminary round and it was almost a draw as far as the ratification and approval was concerned, and that the treaty is more complex.

There are some amendments that will be offered. The Senator from Kansas has not a number of amendments but some amendments that I feel are significant and, as the Senator from Alabama pointed out, we are into the area in the treaty that talks about money, costs and a number of other items that will be, in the opinion of this Senator, rather controversial and, perhaps, some Senators who voted one way today may find themselves voting a different way on the Panama Canal Treaty.

I would guess that we have had a very, not heated debate, but a very intense debate. It has ended. The proponents have won, but I would hasten to add that it is not a game we are playing. We are making a decision for the American people, and whether or not we made the correct decision we will find that out, I would guess, in the next 5 days, 10 days, 1 month, 2 months, 6 months, because it seems to this Senator that the American people will not approve of what happened in the Senate today, the majority of the American people; not that the majority of the American people do not feel we should have some updating or modernization of the treaty with Panama, but I would guess if the American people have had a chance to listen in part to the debate, maybe all of the debate, they understand one thing: that there was a stonewalling, there was a strategy not to accept any amendment to the treaty itself, not even one word. Not one word could be added to the treaty because of the fear that it might call for another plebiscite, and this might upset General Torrijos, who somehow became the focal point in this entire process.

As the Senator from Kansas indicated a couple of days ago, then we entered into the period of accommodation, that period where we accommodate certain views in the Senate to pick up enough votes to pass the resolution of ratification. That has been done. I do not suggest it was done improperly, but I suggest that it happened, and even after all the tugging and hauling and alleged arm-twisting, and whatever else may have been alleged—whether or not it is a fact this Senator does not know—there was only a 2-vote margin.

So I would guess that the American people now and tonight and tomorrow morning, and when all the press will be filled with "First Treaty Approved," will make a judgment. They will decide whether or not the Senator from Kansas voted properly or the Senator from Alabama, the Senator from Maryland, whoever may have been involved, whether he voted properly.

I share the view that the American people want to do the right thing. I also believe the American people had serious reservations about many of the provisions in the Neutrality Treaty, and are going to have even more reservations about certain provisions in the canal treaty.

I would hope and just suggest that as a matter of strategy the administration take a look at some of the amendments. Again if we are concerned about good treaties, why not the best treaties, and if amendments are necessary, perhaps that can be cleared with General Torrijos, the maximum ruler of Panama.

It would be the hope of this Senator if there can be some agreement on amendments to the text of the treaty that we might move more quickly. Otherwise it would be much the same, lengthy debate, a lot of time spent on amendments. They will all be tabled or laid aside by the treaty proponents, and then the nose-counting will start in the final 48 hours, and then they will make the necessary reservations, the necessary accommodations, in an effort to reach the magic number of 67.

I assume that could take a month or it could take much less. This Senator hopes it may take much less, and we can move very quickly, have some agreement on time, if necessary.

I would conclude by pointing up that there are a number of other matters coming before the Senate that I think have a higher priority than the Panama Canal Treaty. One of those hopefully may come to the Senate floor next week. That deals with American agriculture and the American farmer and the American consumer.

I would hope that the leadership would be willing to set aside the treaty long enough for this body to take action on emergency farm legislation, legislation that may mean, if passed by the other body and signed by the President and properly implemented and administered by the Department of Agriculture, the survival for American agriculture and many farmers who are now around the Capitol. They are not here because they want to visit. They are here because their very lifeblood is threatened. They are here because their life and their lifeblood are threatened, their economic life and their economic lifeblood.

So I would hope that we can set aside the treaty. In fact, it would not be a bad idea to set aside this second treaty until next year, maybe early next January or February, when we could take up the Panama Canal Treaty and then we could have disposed of one this year and maybe one next year.

There is really no big rush. There are many other matters that must be piling up in the committees, and I would hope that would be considered. But in the event the leadership decides to pursue the second treaty hopefully we can set it aside long enough to consider this emergency farm legislation, and then as we get into debate on the treaty itself reach some agreement on time so that we can move rather quickly and expeditiously in resolving the issue, and then voting and letting the American people know our judgment on the canal treaty itself.

The PRESIDING OFFICER. The Senator from Maryland.

Mr. SARBANES. Mr. President, I appreciate the remarks just delivered by the Senator from Kansas. I appreciate the reflection of his wry sense of humor which all of us in this body enjoy, his suggestion that the other treaty be set aside until next January or February so that we do one treaty a year.

We obviously now face the task of moving ahead on the Panama Canal

Treaty. I share his concern about many of the other problems which face the country. I think that is an important point to be made.

The Senator from Alabama, of course, has pointed out that he regards this issue as the most important which has come before this body in the 9 years in which he has been a Member of this body.

It would seem to me that reasonable men and women at some point ought to be able to work out some understanding on the time frame in which we consider this second treaty so that we can move ahead thoughtfully and carefully, and yet expeditiously, in order to handle that matter, and, therefore, enable ourselves to deal with some of these other pressing problems which face the country.

We have had 22 days of actual debate on this treaty since February 8, 36 days ago. Many of the arguments which have been brought forth in the course of debate apply not only to the treaty on which we have just voted and consented to by a vote of 68 to 32, but apply to both treaties as we consider the relationship. So much of the ground has been covered. We have gone over it. I do not know how much is to be gained by plowing it again and again and again.

There are issues remaining before us in the Panama Canal Treaty to which we obviously need to address ourselves and which, hopefully, we can do in the near future in such a way that we can reach a resolution of that matter and then be able to pass on to the other issues which are before the country.

I believe I share the inclination or the concern that I discern on the part of the Senator from Kansas that we reach time agreement with respect to the treaty which is now pending, which would enable us to dispose of it within a reasonable period of time, so that we are able to move on to the other issues which confront the country. The Senate has been involved in this issue for virtually all of the month of February, and most of the month of March. I am not criticizing that, because I share the view that this is an important issue. However, I do know that it was possible to reach an agreement between the proponents and opponents with respect to this treaty in terms of a time schedule for handling the matter and considering it, which worked well.

I have not heard of any Member who has expressed any sense of unfairness or any sense that there was a lack of sufficient time for proper consideration, or that proper respect was not accorded to the rights of Senators on both sides of this issue in the consideration of the treaty to which the Senate has just given its advice and consent by a vote of 68 to 32.

It seems to me we should be able to work out a comparable arrangement with respect to the Panama Canal Treaty which would enable us to move ahead, to handle it thoughtfully and yet expeditiously, and reach a judgment on that.

I think we clearly owe the country the responsibility to do that, to come to a judgment, not only because of the importance of this issue, but also so that the Senate might then be able to turn its attention to the other issues which face the Nation. We need to get on with this business and then on with the remainder of the business which is before us.

I would hope that very shortly we would be able to reach some understanding with respect to how we will proceed on the Panama Canal Treaty, which is now pending before us, which may be comparable to the understanding we reached with respect to this treaty, which enabled us to go ahead.

Mr. ROBERT C. BYRD. Will the distinguished Senator yield?

Mr. SARBANES. I yield.

ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business not to exceed 30 minutes, with statements limited therein to 10 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECESS UNTIL 11 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until the hour of 11 o'clock tomorrow morning.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF SENATOR HART ON TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that on tomorrow, after the prayer, Mr. HART be recognized for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR FILING REPORT ON S. 2481

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Committee on Agriculture and Forestry be authorized to have until midnight tonight to file a report on S. 2481, the Flexibility Parity Act of 1958, as well as the budget waiver resolution.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. I thank the distinguished Senator for yielding.

Mr. SARBANES. Mr. President, I yield the floor.

WHY WE MUST PASS THE GENOCIDE TREATY—WHAT HAPPENS WHEN WE SET ASIDE TREATIES

Mr. PROXMIRE. Mr. President, the Senator from Kansas has suggested that the second treaty be set aside until next year, until next January. While I have not made up my mind on the second treaty—I did not make up my mind on the first treaty until we knew exactly what we were voting on—I think it is possible to see what can happen when we set aside treaties if we look at the Genocide Treaty. That has been set aside for year after year. I think that can happen to the Panama Canal Treaty. I think some Senators would be happy if that did happen.

Mr. President, for years I have spoken before the Senate urging the ratification of the Genocide Convention. I continue to speak because I feel this matter is of more immediate concern now than ever before.

Every day that passes, the memory of World War II and the Nazi atrocities fades a little more. It becomes increasingly convenient to believe that genocide is a relic of the past, a sorry page in history best forgotten in today's civilized world. The fact is that genocide is going on in various parts of the world, as I have stated frequently.

I would like to believe this, but I fear it may be unrealistic. As long as the possibility remains that another act of genocide may be committed somewhere in the world, it should be our duty to take every measure possible to prevent its occurrence. The most effective means of minimizing the tragedies of war is to confront difficulties and hostilities before they escalate into massive bloodshed.

The same bold, direct approach must be taken in the prevention of genocide. The best approach would be our ratification of the Genocide Treaty. International moral disapproval of genocide in the form of a collective declaration can help isolate and discourage potential genocidal acts. Providing means for the punishment of individuals committing such abominable acts can help deter these acts. The Genocide Treaty would help accomplish both of these goals.

It should not be forgotten that the United States played an instrumental role in the drafting of the Genocide Treaty. For that, we should be commended. However, we have since failed to ratify this treaty. It is time to end this embarrassment.

THE NEW YORK CASE

Mr. PROXMIRE. Mr. President, I am delighted to see the distinguished junior Senator from New York presiding tonight. He is a Senator for whom I have the greatest esteem. He represents his State with great vigor and ability.

I call to his attention, as I call to the attention of all my colleagues, a remarkable speech which was given this morning by the junior Senator from Indiana (Mr. LUGAR).

Mr. LUGAR is a most valued Member of this body for many reasons. He is a brilliant man, he was a Rhodes scholar, and also an outstanding mayor of a great city, Indianapolis. He has hard practical experience as well as a fine mind. He has been a diligent member of our committee and one of the outstanding experts in the Senate on urban policy.

I would just like to call to the attention of the Senate once again what a Senator delivered this morning, a small part of Senator LUGAR's speech. He concluded as follows:

In my judgment, the current Four Year Budget Plan of New York City is unaccept-

able because it guarantees that New York City budgets will remain unbalanced indefinitely. Secretary Blumenthal's response predicated on retention of so much that remains unmentioned and untouched in New York City, is equally insupportable, and not a final solution. It is only another temporary fix. In the next 100 days, we have an opportunity to make progress in formulating urban policy. The purpose of this speech is to indicate that, absent many more favorable developments in which the federal government agrees to liberate New York from crippling guidelines, New York City prepares much more seriously to balance its budget, and the State of New York moves to guarantee the fiscal integrity of its major city, the reasons for taking no action in regard to loans and guarantees for New York City by June 30 clearly outweigh reasons which have been offered to support such federal action. At this juncture, the State of New York should be planning to take a much more comprehensive role in the post-June 30 period as should New York banks, pension funds, labor unions, and citizens at large assisted by a vigorous press that could help frame issues and focus decision making.

It will be no service to New York City or to any other city to paper over the cracks once again, and I invite other Senators to join me in pledging that we do not intend to do so.

This is a remarkable speech, because Senator LUGAR not only talks about New York City, but puts it in the perspective of an overall urban policy. He does it, I think, with a considerable amount of intelligence.

I might also mention that the senior Senator from New York—speaking, I believe, yesterday or the day before yesterday—spoke about guarantees and the history of guarantees and the record of guarantees right now, in talking about whether guarantees would be an appropriate device to assist New York City. Again, I think that was a most intelligent contribution to our debate and our understanding of the situation. I commend that speech to the attention of my colleagues.

THE TRUTH ABOUT TRUTH-IN-LENDING

Mr. PROXMIRE. Mr. President, back in 1968, the Senate passed the truth-in-lending bill. We had a hard struggle to get it passed. It took 7 long years in the Banking Committee to get it reported. Senator Paul Douglas fought year after year. He was defeated. After he was defeated, I sponsored the bill as did others. We were able to get it enacted.

It was criticized by business, especially by the banks, as being something that really would not do the job. I am happy to say that the American Banker, which is the publication of the American Bankers Association, has indicated how useful the truth-in-lending bill has been. They point out that the level of awareness in 1969, the year truth-in-lending was adopted, was 14.5 percent for close-end credit—that is, awareness of what the true annual rate was; 35.2 percent for retail revolving credit and 26.6 percent for bank cards. Here is what the truth-in-lending has done:

It has increased the level of awareness for consumer credit users to 54.6 percent. That is a tremendous increase in awareness. Almost four times as many people are now aware of what their true annual rate is. That is for closed-end credit cards. It has gone up even more, to 67.7 percent, for retail revolving credit and 71 percent for bank credit cards.

It is also pointed out that the minority groups, that have been particularly exploited because of the fact that they have paid exorbitant interest rates, have greatly increased their knowledge of interest rates because of truth-in-lending—

The survey also breaks out results according to three racial categories—caucasian (non-Hispanic), black (non-Hispanic), and a grouping of Hispanic, American Indian and Asian.

The Fed report notes that black users of closed-end credit have a lower level of awareness than the others but it has shown a fourfold increase, from 9.4 percent in 1969 to 38.6 percent in 1977.

(Mr. ZORINSKY assumed the chair.)

Mr. PROXMIRE. The editorial concludes that the—

Truth-in-Lending Act and Regulation Z have imposed a reporting and compliance burden on banks, some of it unnecessary and calling for correction. But the consumer awareness surveys do show they have gone far toward achieving a major aim—assuring that the ordinary borrower knows what he is paying for a loan.

Mr. President, I ask unanimous consent that the editorial from the American Banker be printed in the RECORD at this point.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the American Banker]

THE TRUTH ABOUT TRUTH-IN-LENDING

The average consumer, as bankers know, has become markedly more sophisticated about interest rates in recent years. When market rates rise above Regulation Q ceilings, he disintermediates, for example.

Interest costs are the other side of the coin. And some notion of how much more knowledgeable the retail borrower is about that comes from a consumer awareness survey conducted last summer by the Survey Research Center of the University of Michigan under the sponsorship of the three Federal bank regulatory agencies.

The results are summarized in the annual report to Congress on Truth-in-Lending by the Federal Reserve Board. The survey is the third it has sponsored on consumer awareness of credit costs.

"The 1969 and 1970 studies indicated that awareness of rates increased sharply in the first 15 months after Truth-in-Lending went into effect," the Fed report states, "but the 1977 study shows that there have been significant further increases in consumer awareness over the last eight years."

The survey breaks down the results among three types of credit. One is closed-end credit, the installment lending on automobiles, appliances and furniture, home improvements, and personal loans. The other two types—retail revolving credit and bank credit cards—are two forms of open-end credit.

"As of the summer of 1977," the Fed report says, "the proportion of consumer credit users who were aware of the annual percentage rates charged had reached 54.6 percent for closed-end credit, 64.7 percent for retail revolving credit, and 71.0 percent for bank credit cards."

Thus, more than half the consumer credit borrowers now are aware of the rate charged them. It was not so in 1969. The level of awareness in that year was 14.5 percent for closed-end credit, 35.2 percent for retail revolving credit, and 26.6 percent for bank cards.

But less than half the users of certain types of consumer credit still are not aware of their annual percentage rate. Only 37.8 percent of those financing used automobiles are, for example, though this is up from 7.2 percent in 1969.

For those using consumer credit for durable goods and recreation goods, the level of awareness last year was 44.7 percent. In 1969, it was 11.7 percent for a comparable category: appliances and furniture.

The survey shows a clear correlation between the levels of both education and income and the level of awareness of interest costs. As either of the first rises, so does awareness.

Thus, those with some high school or less last year had a 41.0 percent level of awareness of the rates they paid on closed-end credit, while those with some college or more had 64.8 percent. And those closed-end credit borrowers with less than $7,500 income had a 32.8 percent level, while those with $17,500 or more had 64.1 percent.

But age patterns were irregular. Again using the results for closed-end credit, those under 35 years had a 55.3 percent level of awareness, from 35 to 49 years 58.2 percent, and 50 years or more 49.1 percent.

Those 50 or over had the lowest awareness in the case of the two kinds of open-end credit also, perhaps because their income tends to be higher and they thus can afford to be less concerned with credit costs, though the Fed expresses no such conclusion.

The survey also breaks out results according to three racial categories—caucasian (non-Hispanic), black (non-Hispanic), and a grouping of Hispanic, American Indian and Asian.

The Fed report notes that black users of closed-end credit have a lower level of awareness than the others but it has shown a fourfold increase, from 9.4 percent in 1969 to 38.6 percent in 1977.

"Most of this increase in awareness has occurred since 1970," the Fed says, "in contrast to the other racial groups, which showed about two-thirds of their increase in awareness during the first 15 months after Truth in Lending went into effect."

The Truth-in-Lending Act and Regulation Z have imposed a reporting and compliance burden on banks, some of it unnecessary and calling for correction. But the consumer awareness surveys do show they have gone far towards achieving a major aim—assuring that the ordinary borrower knows what he is paying for a loan.

Mr. PROXMIRE. Mr. President, I yield the floor.

THE NEW YORK CASE

Mr. MOYNIHAN. Mr. President, I rise to speak briefly to the matter which the distinguished Senator from Wisconsin, the chairman of the Committee on Banking, Housing, and Urban Affairs, brought up just previously, the address of our colleague (Mr. LUGAR). I say, at the risk of immodesty, that I shall have printed in the RECORD an address I gave on Wednesday night to the Citizens Union in New York, in which I spoke to this question of what the Congress is going to do.

Mr. PROXMIRE. If the Senator will yield for just a moment on this, I might point out to the Senator from New York that the Senator from Indiana referred at some length to the excellent speech given by the Senator from New York

(Mr. MOYNIHAN) and indicated that it was a most useful contribution.

Mr. MOYNIHAN. That is very generous of the Senator from Wisconsin, to say that. It was trying, for the concerned citizens in New York, to put into some perspective our own situation. I said that there are now a very limited number of days before a complex legislative program had to be enacted in Congress if the city of New York is not to go bankrupt; that hearings had scarcely been held and legislation had, in fact, not been agreed to and introduced; and that no one should suppose that we are not in a situation of very considerable uncertainty, which verges on peril; and that this was not likely to change as the spring went forward.

I made a very general observation, which I might take the liberty at this moment to repeat in the presence of the Senator from Wisconsin. That is to say that it has been the curious experience of government and politics in the State of New York to have devised most of the present modes of government, of the American national Government and, in particular, the enormous redistributional quality of American national Government, and yet, somehow, not to have participated in any of the rewards, or insufficiently associated itself with the procedures that have brought the rewards of redistribution.

The last Member of the U.S. Senate from New York who was a committee chairman was Senator Wagner himself, who helped enact the legislation of the New Deal. Since that time, we have played a very small role in national politics. The consequences are to be seen in an extraordinary imbalance between what the State of New York pays in Federal taxes and what it receives in Federal outlays.

A year ago, when I began looking at the Federal outlay account series for New York, the curious fact was that we did not seem to be that much out of balance, only to find that we were being credited with receiving half the interest on the public debt and 40 percent of the foreign aid payments of the United States. I know it seems somewhat distant to many people, but "foreign" comes as something of a surprise.

I addressed this matter to the President in the first instance, then to the Chairman of the Council of Economic Advisers and the Secretary of the Treasury. The national accounts have now been changed in this regard and the figures for the fiscal year 1977 have just come forward. They really are devastating.

The State of New York pays in taxes proportionally half again as much as it receives in outlays, in proportion respectively. If the State of New York had received as much in Federal outlays as the State of California, we would have had $13 billion more last year; $13 billion would pay off every penny of debt of the city of New York in just the 8 weeks.

This imbalance is so built into the nature of Federal expenditure that I do not know how we are going to overcome it. But I do think I know this, which is that if American liberalism abandons New York for fear of being associated with the circumstances in which we now find ourselves, American liberalism will change, because the great fountainheads of progressive ideas in this country have been two. They have been the State of Wisconsin and the State of New York; and if the Senator from Wisconsin will permit me to suggest that, New York has been perhaps the more influential.

If our liberalism should in the end prove our undoing, if our own commitment to redistribution and progressive standards should be turned against us, and when the time comes that we need help from others none is forthcoming, then we shall have been taught a lesson that neither we nor many other constituencies in this country will forget. It will be a lesson of a narrowness which cannot redound to the large advantage or political help of American society. I hope we are not going to do this.

I spoke in New York out of concern that with so many persons required to cooperate, and so many details yet to be agreed to, we may in the end inadvertently, but nonetheless irretrievably, fail to do what it seems to me is so clearly in the national interest that we do do, and which my party and my President are so firmly committed to doing.

Mr. President, I ask unanimous consent that my address at the annual Distinguished Service Awards Dinner be printed in the RECORD at this point.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS BY SENATOR DANIEL PATRICK MOYNIHAN

Samuel H. Beer has observed that "a people needs frequently to be put in mind of what makes them a public."

Surely this is appropriate to a distinguished service award dinner of the Citizens Union. You were founded in 1897, the same year the modern city of New York was formed. The signatories of your famous "Declaration of Independence" included the most illustrious financiers, attorneys and businessmen of that age—J. P. Morgan, Elihu Root, Jacob H. Schiff. For American business this was a great age of confidence and in nothing was it more confident than the efficacy of rational organizing principles applied to the business of government.

Thus the "public regarding" citizenry of New York, to use that useful term of Edward C. Banfield and James Q. Wilson, was organized and commenced a not always cordial, but essentially creative competition with the great masses of the city which had organized themselves in political parties and in trade unions. (It is useful, I believe, in thinking about our present situation, to remember that there were three organizing constituencies at the turn of the century. We remember the period as one in which the "Goo Goo's" as they used to say fought Tammany. But in organizing the masses, if you will, Tammany had to compete with the trade unions, and if no one else noticed this, Tammany did.)

One thinks of this as a creative tension if only because in the process New York City emerged as the greatest metropolis of the modern age. I never tire of citing the French historian Fernand Braudel who when trying to describe the position of Venice in the 15th and 16th centuries wrote "Venice dominated the 'Interior Sea' as New York dominates the Western world today." I might note that he wrote that just a short while ago, for New York has continued in the role which it created for itself at the beginning of this century.

There is still a good deal of writing to be done about this experience. It was only, I dare to think, fifteen years ago when Nathan Glazer and I published Beyond the Melting Pot that the ethnic basis of so much of the organizational life of the City began to be explored. Perhaps I should say, began to be written about in polite circles. Even so, it seems clear that out of the tensions and conflicts of the time there occurred a considerable enhancement of what Leonard Cottrell has called "the level of community competence."

The Citizens Union played a remarkable role in this, and in this enterprise none was more remarkable than the very special role of George Hallet, who was for four decades your executive secretary. I first met him just a quarter century ago, in the first city-wide campaign in which I was involved, that of Mayor Robert F. Wagner. I cannot imagine a young person entering the political world who would not have been impressed to encounter there a man of such quiet authority and unshakeable attachment to clearly defined principles. I cannot say that I adopted his principles, for he was and is a Quaker, which I was not and am not. We have a very different understanding of the nature of sin and the tendency of man to transgression.

At this time Dwight McDonald described Hallet as "a man with an unbridled appetite for good government." It was an enthusiasm many of us shared. The reform movement was just then beginning in the Democratic Party. I certainly counted myself one of those, and soon was an election district captain in the Samuel J. Tilden Club of Manhattan's First Assembly District middle.

I did not then know of Roscoe Conkling's observation that when Dr. Johnson said that patriotism was the last refuge of a scoundrel he underestimated the potential of reform.

But even then it was possible to sense that the day would come when, by a not very complex mutation, "an unbridled appetite for good government" would become an unbridled appetite for government itself.

I believe one can be specific about this. The process began when a sufficient number of "public regarding" persons began to make their way into public administration and into electoral politics that it become possible and almost necessary—for not to do so would be to cast doubt on one's own caste—for the elites of the City to support a great expansion of government activity. Not only to support, but to finance. It is surely elemental that the first fact of New York City's trouble is that it had the curious fortune to be governed by persons to whom the successors of Morgan and Schiff would lend $14 billion. All over America there are cities which would happily have borrowed as much and more if anyone would have lent it to them, but of course no one would.

The great failure of perception—and there was a failure—lay in not recognizing the restraints which traditional government placed on government activity. The stereotype was, of course, that of the Board of Alderman as forty thieves distributing patronage with wild abandon and total disregard for the public interest. Reality was, or so I believe, rather the opposite.

(Anyone for example who has ever been involved in distributing patronage appointments know it to be a painfully slow and parsimonious procedure. As a procedural matter it is simply much easier to hire ten thousand civil servants than to pick ten commissioners.)

This change came suddenly, with the equally sudden triumph of elite government. In 1966 per capita expenditures on state and local government as a percentage of per capita income was only 4.8 percent higher in New York than in the nation. By 1976 it

was 34 percent higher, a difference we can simply no longer afford.

But there was another, and more profound failure of perception that has to be associated with the forces of progressive government here in New York. It is very simply this. New York, first of all, was immensely successful in creating new modes of governance, modes which made bigger government both possible and desirable. Then we proceeded to colonize these ideas at the federal level, and thus to transform national government as well as our own. This was a curiously combined effort of all our original three groups, if one thinks of Franklin D. Roosevelt and Alfred E. Smith, the sacred and profane traditions in politics, and of the trade unions which were given their national standing through the efforts of Robert F. Wagner.

This not only transformed the national government, it equally transformed the political economy of New York.

New York did not notice this. Largely as a result of our own success, we continued to be preoccupied with the operation of our own state and local governments. More and more we rid ourselves of the politics of naked economic aggression and acquisitiveness. But we did not notice that those politics took hold with a vengeance in Washington.

Let me give you an example. The President is just now going to great efforts to win the final votes needed for approval of the Panama Canal Treaties. He has every reason to do this. They are good treaties and it is unthinkable that they not be ratified. Thinking just that, and thinking of the progressive New York tradition in foreign policy, and as the only former Ambassador now serving in the Senate, I announced my support for the treaties on August 12. I believe I was the first Senator to do so. But I do wish I could be sure the President will value that first vote as much as he seems to value the potential 67th. If Presidents don't start doing this, we may have to stop being first.

Because we must break out of our incredible and now destructive ignorance of what goes on in Washington and what it means to us. Consider our role in Congress. In the eight decades since the founding of Citizens Union, no New Yorker has served as either Majority or Minority Leader in the Senate. In this period, only one New Yorker, briefly, served as a Minority Leader in the House. The last Senate committee chairman we had was Robert F. Wagner. We have two committee chairmen in the House, and none other in prospect for a decade.

I, for example, serve on the Finance Committee, perhaps the most important committee of the Congress. We control rather more than $500 billion in federal funds each year. I am the first New Yorker to serve on the Committee in fifty years. I am the first New York Democrat in a century. My predecessor, Frances Kernan, is the man who nominated Samuel J. Tilden for the Presidency.

The fact is that service in Congress has not been held in much esteem in New York public life. It is most often a way to higher office within our state, but rarely an end in itself.

Characteristically, Citizens Union provides the most meticulous evaluations of candidates for state and local office, but none for candidates for the House or Senate.

The result is that we have not held our own in Washington, have been drained of resources by Washington, and are now utterly dependent on Washington.

I don't know if even now we realize this. When I went to the Senate fourteen months ago I began studying the Federal Outlays series. I could not understand how, if the Federal government was expending as much money in New York as it claimed, our economy could be so deflated. I found that in fact the Federal government was overstating its annual expenditures by some $14 billion. (We were being credited, inter alia, with half the interest on the public debt.)

It took most of a year to persuade the President and the Secretary of Treasury and the Chairman of the Council of Economic Advisors that this was so, but in the end they concurred with good grace, and in good time.

The data for fiscal year 1977 have just become available and now show a startlingly different story. As percentages of national totals, New York pays half again as much in taxes as it receives in outlays. The contrast with other states is striking. Last year federal outlays in California were $47.1 billion. In New York, $33.9 billion. The difference, $13.2 billion, would pay off the entire debt of the city of New York in thirteen months. It is I fear a measure of our collective incompetence that we have allowed this vast disparity of treatment to come about.

It verges on the criminal, for now we are forced to beg. I am in a black mood about our prospects in Washington. There are sixty-seven legislative working days between now and July one by which time a complex legislative program must be enacted if the City is to avoid bankruptcy.

Because of a lack of the requisite agreement among the state, municipal, and federal governments, none of that legislation has even been introduced!

I have spoken with the principal actors on the Senate side. They are adamant that New York City not receive long-term bond guarantees which even the Secretary of the Treasury agrees we must have. (Within the Administration, Vice President Mondale had to struggle to win approval in principle for even a fifteen-year guarantee.)

We have deluded ourselves that our opponents are somehow conservatives. Nothing of the kind. Senator Proxmire has a seventy percent rating with the Americans for Democratic Action, the same as I. Senator Brooke has an eighty percent rating. (The Conservative Union gives us seventeen percent, nine percent, and eight percent respectively.) But liberalism has become fearful of New York, and some liberals are apparently quite prepared to see us disgraced and even destroyed rather than become associated with us.

I have said before, and I say now that American liberalism will not survive such an event.

But for the moment there is one task: to break out of the autotherapeutic trance in which we have been living.

There is no national urban crisis. There is only a crisis of New York City.

There is no constituency of conscience in the nation that will help us; there is only a congerie of interests which either we will succeed in manipulating or will fail in manipulating. On that success or failure rests the fate of the urban culture of New York which the Citizens Union did so much to establish.

Mr. PROXMIRE. Will the Senator yield?

Mr. MOYNIHAN. With great pleasure.

Mr. PROXMIRE. The Senator from Wisconsin wishes to congratulate my great friend from New York that New York is extraordinarily well represented. They have on the Republican side as shrewd, as intelligent, as brilliant, as energetic a Senator as I have ever seen in the Senate in all my years. The senior Senator from New York is one of the ranking Members of the Senate and he has very considerable influence.

As far as the junior Senator from New York is concerned, he is much too modest. I do not know if he has had a chance to see the recent U.S. News & World Report issue list of prominent, powerful persons. They circulated a list asking various Members of the Congress and others to vote on who they would consider the outstanding people and most powerful in our Nation—not just in our Government but in our Nation. As a result, I can state that two of the Senators were on that list. Senator LONG was not on it, the chairman of the Finance Committee. I do not know of other Senate committee chairmen. Senator ROBERT BYRD was on it, the majority leader, of course, as you might understand; and also on it was Senator MOYNIHAN; and I think he should have been on it.

He has true ability and in this body, I think you do not have to be here very long to recognize that that is the kind of ability, imagination, initiative, even aggressiveness that really makes the difference, whether or not a person is chairman of a Senate committee. It may be helpful or not. But when a Senator has the kind of quality that Senator MOYNIHAN has, it makes a difference.

New York is well represented. Furthermore, if I look at the statistics the Senator has given us, I think you will recognize that the reason New York pays so much in taxes and receives so much less back is because it is the corporate headquarters of this country. In case after case after case, huge corporations have their headquarters in New York. Their employees, their plants, where they use the services are located all over the country in various areas.

I think if you take that into account, plus the fact that California, of course, does have enormous defense contracts, that is why they receive that part of the Federal dollar, in that sense, but if you will look also at the discretionary legislation we have passed, it favors New York. In community development legislation and other legislation, we have done our best in our committee to give consideration to the northeast cities, particularly New York. The Senator will see there has been no bias against his State. And, of course, the Senator himself, in the short time he has been here, has done notably on the Finance Committee in providing an opportunity for New York to get its fair share.

I wish I had more of a chance tonight to debate this, but I think as the days go on I will try to put in the RECORD how well New York does participate in getting its fair share of the Federal dollar.

The Senator from New York is making a good case, as strong a case as could be made, but I think when all the facts are known, it is clear that New York is hardly forgotten. New York does very well.

Mr. MOYNIHAN. Well, I thank the Senator and the chairman for his very generous words. I must find a copy of the U.S. News & World Report list. If Senator LONG is not therein listed as an important American, there are lots of things Americans need to know about the way their Government operates, and I would certainly want to be one of

those helping to put them right. I would welcome the opportunity to join in that effort with the distinguished and truly committed chairman of the Banking, Housing, and Urban Affairs Committee.

May I say, I will put in the RECORD—I will not ask that the Senator take my word—evidence that the so-called "headquarters effect" in the collection of taxes could at most account for a very small bit of the discrepancy. We have controls for that in various exercises and it just does not loom that large. There is no question that if you fight three specific wars in one generation you are going to buy, as military expenditures in that one direction as against another, and that is not as per se a political matter, but the fact remains that New York is singular in the degree to which it provides more resources to the Federal Government than the Federal Government provides back.

And the ones we do get back are singularly free of economic infrastructure. We tend to get food stamps and noncumulative, nonapplicable kinds of resources. The balance is wrong. It is there to be seen. We are the only State in the Nation whose employment has not returned to the levels of 1969. The State of New York has lost 700,000 jobs in 8 years. I believe there are 23 States in the Union that do not have a total work force of 700,000 jobs.

Mr. PROXMIRE. Will the Senator yield?

Mr. MOYNIHAN. I am happy to yield.

Mr. PROXMIRE. There are four or five cities, some of the biggest cities, which have lost more than New York. Detroit has lost more, Baltimore has lost more, Philadelphia has lost more. The economic analysts find that New York is very likely to do better over the next few years, and Mr. Benstock was one of the few people who foresaw the difficulties that New York would run into in the early 1970's. He was a strong advocate of the view that New York is not in any deteriorating condition. It is likely to have great strength. It has most of the outstanding law firms, it has three-quarters of the big 8 accounting firms, it has great advantage in banking. Six of the 10 biggest banks in the country are located in New York. It is a rich city with colossal resources.

It is subject to being able to meet its problems. New York, I am not saying, should not have assistance on a temporary basis, but I am saying there is a strong case that New York can do a whale of a lot better than has been indicated so far.

Mr. MOYNIHAN. I was only trying to interrupt the Senator to say that among the list of resources of the city of New York, one which surely ranks high on that list is the fact that it has a friend and a constructive critic in the chairman of the Senate Committee on Banking, Housing, and Urban Affairs. I do not question your observation about Mr. Benstock. He began expressing his concerns about the city of New York early in the 1970s. I was then Assistant Secretary of Labor under President Kennedy and whenever I made a speech in New York and Mr. Benstock, who worked in the Regional Bureau of Labor Statistics, would provide me with data, and even then he was very clearly anticipating our present troubles.

I do question the relative loss of jobs. I do not think that we need continue this exchange this evening, but I would hope there might be an opportunity as the weeks go by for us to do so, and I would like to state that I know that one thing that commands the attention and regard of the chairman of the Committee on Banking, Housing, and Urban Affairs is facts, and I mean facts and data that in the end are going to be compelling, persuasive or otherwise. I shall do my best to introduce as many as I can; and where the facts fail I shall plead patriotism, compassion, or call upon whatever other resources of concern might elicit a favorable response from my good friend the distinguished chairman.

I thank the Chair.

QUORUM CALL

Mr. SARBANES. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. SARBANES. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER TO RESUME CONSIDERATION OF THE PANAMA CANAL TREATY TOMORROW

Mr. SARBANES. Mr. President, I ask unanimous consent that upon the conclusion of remarks by Senator HART, as in legislative session, on tomorrow the Senate resume consideration of the pending treaty.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORIZATION FOR ENERGY AND NATURAL RESOURCES COMMITTEE TO MEET ON MONDAY, MARCH 20

Mr. SARBANES. Mr. President, I ask unanimous consent that the energy and Natural Resources Committee be authorized to meet—beginning at 2 p.m. during the session of the Senate on Monday, March 20, to hold hearings to consider executive nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

UNANIMOUS-CONSENT AGREEMENT—H.R. 6782

Mr. SARBANES. Mr. President, I ask unanimous consent that when the Senate proceeds to H.R. 6782, the emergency agriculture bill, there be 6 hours of debate on the bill, equally divided between the Senator from Georgia (Mr. TALMADGE) and the Senator from Kansas (Mr. DOLE), with the time for debate on all amendments, motions, appeals, and points of order, submitted to come out of the 6 hours, that at the conclusion of the 6 hours there be a vote in relation thereto, that immediately the Senate proceed to S. 2481 under the same conditions, and that these agreements be in the usual form.

Mr. BAKER. Mr. President, reserving the right to object, and I will not object, this request was cleared on our side. I would only ask for clarification that we proceed under this formula to the second bill without any intervening point of order, motion or appeal.

Mr. SARBANES. Mr. President, I include that in the unanimous-consent request.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONCURRENT RESOLUTION ADOPTED BY THE SOUTH CAROLINA GENERAL ASSEMBLY

Mr. THURMOND. Mr. President, on March 6, 1978, the South Carolina General Assembly passed a concurrent resolution memorializing the Congress of the United States to express the opposition of the South Carolina General Assembly to the proposed fuel economy standards for 1980–81 light trucks, vans, and utility vehicles.

On behalf of the junior Senator from South Carolina (Mr. HOLLINGS) and myself, I ask unanimous consent that this resolution be printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

A CONCURRENT RESOLUTION

Expressing the opposition of the South Carolina General Assembly to the proposed fuel economy standards for 1980–81 light trucks, vans and utility vehicles

Whereas, the National Highway Traffic Safety Association (N.H.T.S.A.) has proposed fuel economy standards for model year 1980–81 light trucks below eight thousand five hundred pounds (Gross Vehicle Weight Rating); and

Whereas, testimony given at public hearings on these proposed standards indicates that the standards are not now technologically feasible or economically practical; and

Whereas, manufacturers forecast and the United States Department of Transportation acknowledges the possibility that the proposed standards may result in vehicles having: (a) less utility; (b) lower performance; (c) higher purchase costs; and (d) restricted availability of some vehicles; and

Whereas, the South Carolina State, County and Municipal governing bodies, along with commercial users such as farmers, the construction industry, and many other businesses requiring light duty delivery trucks would be adversely affected if these fuel economy standards were adopted; and

Whereas, these proposed standards will apply to all light duty vehicles including public utility trucks, rescue vehicles, delivery vans, many types of farm vehicles, pickup trucks, four-wheel drive vehicles, and most types of vans, and could have a resulting impact on large segments of the population; and

Whereas, these proposed standards could work a hardship on the consuming public as well as have a serious economic impact on the State's economy, including the possibility of an increase in the rate of unemployment. Now, therefore, be it resolved by the House of Representatives, the Senate concurring:

That the South Carolina General Assembly hereby goes on record opposing the N.H.T.S.A.'s proposed fuel economy standards for model years 1980–81 for light trucks, vans and utility vehicles.

Be it further resolved that a copy of this resolution be forwarded to The Honorable Brock Adams, Secretary, United States Department of Transportation, and to each member of the South Carolina Congressional Delegation.

PUBLIC PARTICIPATION IN FEDERAL AGENCY PROCEEDINGS ACT

Mr. THURMOND. Mr. President, on March 7, 1978, I noticed comments printed in the CONGRESSIONAL RECORD which were introduced by my good friend and distinguished colleague, the senior Senator from Massachusetts, relative to S. 270, the Public Participation in Federal Agency Proceedings Act. I would like to add some further comments in order to balance the record.

First, S. 270 was indeed reported out by the Subcommittee on Administrative Practice and Procedure of the Senate Judiciary Committee, of which I am a member. However, on August 4, 1977, a vote to report by the full committee was taken, with the result that the measure was defeated.

Second, by way of legislative history, S. 270 represents an expanded version of a provision in the Magnuson-Moss warranty—Federal Trade Commission Improvement Act (Public Law 93–637, January 4, 1975), the administration of which the subcommittee found to be fraught with abuse. Specifically, it developed in hearings that the Federal Trade Commission was not complying with clear statutory requirements, and that the Federal Trade Commission was not adhering to its own published procedures for processing applications for grants under the act. Also, the act failed to guard against Federal Trade Commission staff excesses such as writing prepared statements for delivery by ostensible "public" witnesses.

Finally, I want to make it clear that I and other subcommittee and committee members who voted against S. 270 are not opposed to the central concept of consumer protection. All Americans are consumers, and consumer legislation to meet our needs is highly desirable. But such legislation should be well-drafted and thoroughly considered, and not of doubtful substance. As Senators, we ought to meet this challenge. Accordingly, Congress should establish a comprehensive and flexible framework that will assure vigorous and independent representation of the public interest and avoid potential abuses.

GOVERNORS' CONFERENCE POSITION STATEMENT ON NUCLEAR POWER

Mr. THURMOND. Mr. President, recently, I received correspondence from Gov. James Edwards of my State concerning a meeting that he and 47 of this country's other Governors had with the President on the energy problem. During their stay in Washington, a number of the Governors met together to formulate a position paper on a positive nuclear power program. Because of the timely and well thought-out nature of their position statement, I would like to share it with my colleagues, and ask unanimous consent that the letter from Governor Edwards and the position of the nuclear roundtable be included in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

MARCH 8, 1978.

DEAR SENATOR THURMOND: Recently forty-eight of the Nation's Governors met with the President and shared with him their thoughts, concerns, and recommendations for dealing with the energy dilemma.

The unanimous feeling of the Governors was typified by the expression that production of energy from all sources was as necessary and vital as conservation. To focus narrowly on one energy option to the exclusion of others would only invite national economic instability and loss of job opportunities for our workers.

It was a great honor to work with some sixteen other Governors in exploring the realm of nuclear power as a vital element in continued energy production. Many Governors were eager to learn, discuss, and support the continued development of a positive Nuclear Power Program.

For your information and use, I have enclosed a copy of the Governors' position statement which we presented to the President.

Nuclear power is one option; and in order to meet the energy demands of tomorrow, we must exercise and develop all our options to the fullest.

With warmest personal regards,

JAMES B. EDWARDS.

NUCLEAR ROUNDTABLE

STATEMENT BY THE GOVERNORS

The Governors recognize that there is a direct correlation between energy and jobs. Without adequate energy there can be no industrial expansion, no new jobs, and modern agriculture. Without energy our economy will falter.

Under the Administration's projection of a 2 percent annual national growth rate, 130,000 megawatts from light water reactor plants will be needed by 1985.

If the Administration is to reach even this modest projection of energy facilities needed (the current growth rate is in excess of 4 percent), a firmer commitment to nuclear energy must be articulated by the President.

Until the solution to the waste management problem is clearly articulated and a positive commitment made, this country will not build enough nuclear reactors to produce the energy needed by 1985, (130,000 megawatts). Unless there is immediate action, by the year 2000 the situation will grow even worse.

Therefore, we need a more positive commitment to nuclear energy by the Administration and a demonstrated solution to the waste management problem.

Under present regulatory processes the lead time for building nuclear plants now approaches 12 to 14 years. The current proposed legislation does not materially reduce the 12 to 14 year time frame. The enactment of a "statute of limitations" provision to prevent administrative and legal intervenor activity that is repetitious and endless is essential.

It was the overwhelming opinion of the Governors present that there needs to be a clear cut decision by the Federal Government on the waste management problem before the public can be convinced that a nuclear energy option is a viable production alternative.

Without reprocessing, there is a real question whether there will be enough domestic nuclear fuel to fullfill the needs of the current planned nuclear facilities after the year 2000. This determination must be made at the Presidential level by the end of the current year. In this regard, the National Uranium Resources Evaluation Program should be accelerated. The Nation cannot wait until 1983.

The clear cut consensus of the Governors is that the nuclear energy program should be continued, and if the Administration's modest projections of electrical demand are to be met, we need a definite timetable and policy adopted at the Presidential level to produce answers on the reprocessing and breeder technology issues. The President must take the lead and rally public support.

The Governors understand that the President's policy on reprocessing and the use of breeder technology is based on foreign policy concerns and the potential for further proliferation of nuclear materials. However, many Governors feel that such a viewpoint will seriously damage our world position economically and endanger our national security.

We also feel that the options or alternatives to conventional reprocessing and use of breeder technology have not been clearly stated. In order that the American people can plan realistically, we request that definite decisions be made and timetables for those decisions be provided by the Administration. Prolonged delay of clearly defined timetables and commitments are unacceptable and unresponsive to our energy needs.

If the decision not to reprocess continues, then a plan of action must be set forth immediately outlining the number of plants which can be operated with existing domestic uranium supplies that can be economically recovered. Otherwise, the projected needs for imported nuclear fuel and the alternative options for dealing with the spent fuel are needed to fill the resulting void.

The majority of the Governors feel that the reprocessing and breeder technology decisions of the Administration must be reconsidered. Other Governors want to consider additional facts on the subject before deciding their position.

All agree, that nuclear energy must play a large part in production of electricity and the present Administration policy is inadequate to bring this about.

ATTENDANCE

Governor George Ariyoshi—Hawaii.
Governor Richard A. Snelling—Vermont.
Governor James B. Longley—Maine.
Governor Michael S. Dukakis—Massachusetts.
Governor Ricardo J. Bordallo—Guam.
Governor John V. Evans—Idaho.
Governor Dixy Lee Ray—Washington.
Governor Robert D. Ray—Iowa.
Governor Meldrim Thomson, Jr.—New Hampshire.
Governor Joseph Garrahy—Rhode Island.
Governor James B. Edwards—South Carolina.

Ralph Williamson—DOE.

MESSAGES FROM THE HOUSE

ENROLLED BILLS AND JOINT RESOLUTION SIGNED

At 11:21 a.m., a message from the House of Representatives delivered by Mr. Berry, one of its reading clerks, announced that the Speaker has signed the following enrolled bills:

S. 1671. An act to designate the Absaroka-Beartooth Wilderness, Custer, and Gallatin National Forests, in the State of Montana.

H.R. 1432. An act for the relief of Mrs. Desolina Sciulli.

H.R. 1939. An act for the relief of Meda Abilay Florin.

H.R. 2761. An act for the relief of Su-Hwan Choe.

H.R. 3081. An act for the relief of Mrs. Chong Sun Yi Rauch.

H.R. 4401. An act for the relief of Kwi Sok Buckingham (nee Kim).

H.R. 6975. An act to amend title 5, United States Code, to provide the hearing examiners shall be known as administrative law judges, and to increase the number of such positions which the Civil Service Commission may establish and place at GS–16 of the General Schedule.

H.J. Res. 715. A joint resolution proclaiming May 5, 1978, "Sun Day".

The enrolled bills, with the exception of H.R. 1939, were subsequently signed by the President pro tempore. The enrolled bill, H.R. 1939, was subsequently signed by the Acting President pro tempore (Mr. ROBERT C. BYRD).

ENROLLED BILL PRESENTED

The Secretary of the Senate announced that on today, March 16, 1978, he presented to the President of the United States the following bill:

S. 1671. An act to designate the Absaroka-Beartooth Wilderness, Custer, and Gallatin National Forests, in the State of Montana.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. NELSON, from the Select Committee on Small Business:

A special report on the Select Committee on Small Business entitled "Federal Reclamation Policy" (Rept. No. 95–702).

● Mr. NELSON. Mr. President, I am submitting today a report of the Senate Committee on Small Business entitled "Will the Family Farm Survive in America: Federal Reclamation Policy." The report was approved by a vote of 5 to 1. The report represents a year and a half of research following 4 days of hearings on the subject, held both here and in Fresno, Calif. I believe that it is particularly timely to submit the report now, as the Senate Energy and Natural Resources Committee prepares for hearings on legislation. Those hearings, which will cover, among others, a bill introduced by Senators HASKELL, ABOUREZK, and myself, are scheduled for hearings April 12. I ask that the report be printed.●

By Mr. CANNON, from the Committee on Commerce, Science, and Transportation, without amendment:

H.R. 9169. A bill to amend title XI of the Merchant Marine Act, 1936, to permit the guarantee of obligations for financing fishing vessels in an amount not exceeding 87½ per centum of the actual or depreciated actual cost of each vessel (Rept. No. 95–703).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. TALMADGE, from the Committee on Agriculture, Nutrition, and Forestry:

P. R. Smith, of Georgia, to be a member of the Board of Directors of the Commodity Credit Corporation.

(The nomination from the Committee on Agriculture, Nutrition, and Forestry was reported with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By Mr. YOUNG:

S. 2752. A bill to authorize the Secretary of Agriculture to carry out a special export subsidy program for wheat, wheat flour, feed grains, and rice similar to the program that was in effect for such commodities during the calendar year 1971; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. HASKELL:

S. 2753. A bill to extend for 4 years the exclusion from gross income of amounts which represent a discharge of indebtedness under certain student loan programs; to the Committee on Finance.

By Mr. ANDERSON (for himself and Mrs. HUMPHREY):

S. 2754. A bill to amend title 23 of the United States Code to clarify policies relating to the accommodation of utilities on Federal-aid highway rights-of-way; to the Committee on Environment and Public Works.

By Mr. KENNEDY (for himself, Mr. NELSON, Mr. JAVITS, Mr. WILLIAMS, Mr. RANDOLPH, Mr. PELL, Mr. CRANSTON, Mr. HATHAWAY, Mr. EAGLETON, and Mr. RIEGLE):

S. 2755. A bill to revise and reform the Federal law applicable to drugs for human use and to establish a National Center for Clinical Pharmacology within the Department of Health, Education, and Welfare; to the Committee on Human Resources.

By Mr. RIEGLE:

S. 2756. A bill entitled the "Anti-Blackout Act of 1978"; to the Committee on Commerce, Science, and Transportation.

By Mr. MAGNUSON (for himself, Mr. JACKSON, Mr. ABOUREZK, Mr. BROOKE, Mr. PACKWOOD, Mr. RIEGLE, and Mr. STEVENS):

S. 2757. A bill to establish a national policy concerning agricultural land; to establish an Agricultural Land Review Commission; to establish a demonstration program for protecting agricultural land from being used for nonagricultural purposes; and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. CLARK:

S. 2758. A bill to amend the Commodity Exchange Act to prevent conflicts of interest and the appearance of conflicts of interest by former Commissioners and specified employees of the Commodity Futures Trading Commission; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. CRANSTON (for himself, Mr. WILLIAMS, Mr. JAVITS, Mr. RIEGLE, Mr. HAYAKAWA, Mr. RANDOLPH, Mr. PELL, Mr. KENNEDY, Mr. STAFFORD, Mr. ANDERSON, Mr. BAYH, Mr. ABOUREZK, and Mr. LEAHY):

S. 2759. A bill to provide for Federal support and stimulation of State, local, and community activities to prevent domestic violence and assist the victims of domestic violence, for coordination of Federal programs and activities pertaining to domestic violence, and for other purposes; to the Committee on Human Resources.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. YOUNG:

S. 2752. A bill to authorize the Secretary of Agriculture to carry out a special export subsidy program for wheat, wheat flour, feed grains, and rice similar to the program that was in effect for such commodities during the calendar year 1971; to the Committee on Agriculture, Nutrition, and Forestry.

SPECIAL EXPORT SUBSIDY PROGRAM

● Mr. YOUNG. Mr. President, I am introducing a bill which would authorize and direct the Secretary of Agriculture to provide export subsidies for wheat, wheat flour, feed grains, and rice when necessary to meet foreign competition based on variable export prices established by other exporting countries.

For the past 2 years or more, the Canadian Government, which sets Canadian prices for export grain, has been reducing their prices below our export prices established in the free marketplace. As a result, they have been successful in underbidding us and thus able to export their wheat while our exports are very limited. This same thing is true of other exporting nations such as Argentina and Australia.

The United States finds itself in the situation now where these three exporting countries have sold or committed practically all of their exportable wheat, while we have huge surpluses still on hand. Our exports are increasing now since we have the only residual surpluses available. This places the United States in the position of being a residual supplier.

If the Secretary of Agriculture only used export subsidies sparingly and when needed to meet the price cutting of other exporting nations, it would bring about a situation where the other exporting nations would be more willing to cooperate in establishing a more uniform world price.

Another international wheat agreement, in my opinion, would not be effective as long as we have no means of meeting arbitrary prices established by other exporting nations.

Mr. President, it is not my intention to make it a general practice of subsidizing exports. It is my strong belief, however, that if the Secretary of Agriculture used this as leverage in securing the cooperation of other exporting countries, we would not have the cut-rate price of export wheat that we have now.●

By Mr. HASKELL:

S. 2753. A bill to extend for 4 years the exclusion from gross income of amounts which represent a discharge of indebtedness under certain student loan programs; to the Committee on Finance.

● Mr. HASKELL. Mr. President, I introduce today legislation to extend the special exclusion from income for Federal tax purposes for certain cancellations of educational loans. The Tax Reform Act of 1976 reversed IRS Revenue Ruling 73–256 which took the position that if a student loan obligation is forgiven, because the recipient renders service in certain professions and certain areas of the country, for example, as a nurse in a rural community, the forgiven portion of the loan constitutes taxable income. The Tax Reform Act declared a moratorium on the taxation of such loan cancellations through calendar year 1978. My bill would extend that moratorium for an additional 4 years, through January 1, 1983.

Section 117(a) of the Internal Revenue Code provides that subject to certain limitations, amounts received as scholarships and fellowships are not to be included in an individual's gross income for purposes of Federal taxation. Section 1.117–4(c) of the Treasury regulations provides that amounts paid to an individual to enable him to pursue studies or research are not considered as scholarships or fellowships if the studies or research are primarily for the benefit of the grantor. It would appear that the intent of the regulations is to distinguish between the ordinary understanding of a scholarship, which is that of a disinterested educational grant, and a scholarship that exacts a substantial quid pro quo from the recipients. Where a substantial quid pro quo is exacted, the payment of educational expenses may be analogous to wages paid for work performed. Therefore, it may be reasonable in such cases to require that payments be included in the recipient's taxable income.

However, it is difficult to see how the work performed under Federal and State programs to encourage trained medical or teaching personnel to locate in areas where their skills are in short supply can be said to serve primarily the narrow interest of the grantor. When, for example, a State government forgives a loan, because the recipient agrees to work for 3 years as a doctor in a physician-short area, a general social purpose rather than a narrow interest is clearly served.

The result of the Internal Revenue Service's interpretation in this matter really runs contra to clearly defined Government policy. On the one hand, the U.S. Government may make a grant to a student, requiring nothing of him in return, and the grant may be totally excluded from gross income as a scholarship under section 117. But, if a governmental entity attempts to secure some socially beneficial service in exchange for funds expended, and the loan is converted to a grant where the recipient engages in the generally desirable activity, the grant is then considered as being a benefit to the grantor and is treated as taxable income to the recipient. Tax legislation that is so contrary to the dictates of good sense and responsible social policy should not go unchallenged.

Revenue Ruling 73–256 is one of a series of related revenue rulings. These Revenue Rulings have declared that scholarships received under the Armed Forces health professions scholarship program which requires the recipient to serve in the Armed Forces and under the National Research Awards Act requiring the recipient to engage in health research or teaching or equivalent service are not excludable scholarship or fellowship grants. These rulings are based on the same theory that the requirement of a substantial quid pro quo from the recipients means that the awards are made primarily for the benefit of the grantor. The fact is, however, that in each case, the award is made by a particular governmental entity and the benefits of the required quid pro quo flow to the larger community or the Nation as a whole.

The Senate Finance Committee has recently approved the Tax Treatment Extension Act (H.R. 9251) which provides in part that Armed Forces health professional scholarships received by students entering the program through December 31, 1979, are to be treated as scholarships under section 117. The committee further approved as an amendment to H.R. 9251 a provision under which National Research Service awards are also to be treated as scholarships or fellowships under section 117. My bill simply continues comparable treatment for the forgiven part of educational loans. It insures that tax policy does not discourage programs which are clearly in the interest of many worthy and dedicated young people and in the interest of our Nation as a whole.

Mr. President, I ask unanimous consent that this bill be printed at this point in the RECORD, and that following the printing of this bill, that S. 2747, a bill to provide for a study of methods by which individuals could be aided in filing their Federal income tax returns, be printed in the RECORD.

There being no objection, the bills were ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subsection (c) of section 2117 of the Tax Reform Act of 1976 (relating to cancellation of certain student loans) is amended by striking out "January 1, 1979" and inserting in lieu thereof "January 1, 1983".

S. 2747

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the Secretary of the Treasury or his delegate shall conduct a study with respect to methods by which the process of filing Federal income tax returns by individuals could be made simpler, more efficient and less costly by increasing the availability of taxpayer assistance programs, by improving the manner in which the commercial preparation of such returns is monitored, and by simplifying Federal income tax forms. Such study shall include, but not be limited to, consideration of—

(1) the simplification of Federal income tax provisions and forms relating to low income, disabled, and retired taxpayers;

(2) the simplification of Federal income tax provisions and forms relating to cases involving section 117 of the Code—Medical Interns and Residents, section 1034—Sale or Exchange of Residence, and Income Averaging;

(3) the simplification of Federal income tax provisions and forms relating to cases involving divorced individuals and the payment of alimony and child support; and

(4) means for eliminating the so-called "marriage penalty" in the case of married taxpayers, including the feasibility of using only the schedule X tax rate schedule (single taxpayers) for all taxpayers; the spouses could elect to split their income and each would use the single taxpayer tables.

(5) the extension of the original due date for the filing of returns by individuals 65 years of age or older to June 15;

(6) the feasibility of allowing individuals 65 years of age or older to make scheduled appointments for assistance in filing their returns;

(b) The Secretary of the Treasury or his delegate shall report to the Congress, not later than 1 year after the date of the enactment of this Act, the results of the study conducted under subsection (a) together with such recommendations, including recommendations for legislation, as he deems advisable.

(c) There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.●

By Mr. ANDERSON (for himself and Mrs. HUMPHREY):

S. 2754. A bill to amend title 23 of the United States Code to clarify policies relating to the accommodation of utilities on Federal-aid highway rights-of-way; to the Committee on Environment and Public Works.

UTILITY FACILITIES ACCOMMODATION

● Mr. ANDERSON. Mr. President, for the past several weeks the Nation's Capital has hosted delegations of farmers who have arrived from all over America to let us know of their discontent with Federal farm policies. Their presence here reminds us all of the great debt owed to these men of the soil. Without their determination in the face of great risks, their hard work and long hours, and their skillful land management, none of us would enjoy the bounty we now take for granted.

Mr. President, whenever Federal policies interfere with our farm community's ability to provide for our citizens, the policies ought to be closely examined. A case in point is the Federal policy of discouraging accommodation of utility facilities, such as powerlines, along Federal-aid highways. There are good reasons for the present policy. Safety, environmental, and esthetic considerations all play a part in the current policy. However, as a result of the policy, the only alternative often available to persons responsible for planning the siting of utility powerlines is to use productive farmland.

To help remedy this situation, I am introducing S. 2754, a bill to allow the Secretary of Transportation to weigh the detrimental effect on productive agricul-

tural land likely to result if utility facilities are not sited along a Federal-aid highway right-of-way. The bill does nothing to impair the Secretary's consideration of other factors relating to highway accommodation of utility facilities such as issues relating to safety and traffic flow. Rather, the intent and effect of S. 2754 is merely to give Federal highway officials the legislative authority to consider the interests of the farmer and the impairment of his ability to provide for us all if his land, and not the highway rights-of-way, is used to site utility facilities.

This legislation is actually a companion measure to H.R. 11389, introduced on March 8, 1978, by a bipartisan coalition of five Minnesota Congressmen. Senator HUMPHREY and I are pleased to add our efforts on this side of the Capitol to protect the interests of our State's, and our Nation's farmers.

Mr. President, the necessity of constructing future powerplants and future powerlines is a fact of life for energy consuming America. Even if the most optimistic conservation forecasts come true, our energy demands will continue to grow. If Congress does not act to give the Federal Highway Administration some leeway in the accommodation of utility facilities along Federal highway rights-of-way, more and more productive agricultural land will be lost and the farmers' ability to produce that all important energy source, food, will be increasingly impaired.

Mr. President, I ask unanimous consent that the text of S. 2754 be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2754

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 109 of Title 23, United States Code, is amended by adding at the end thereof the following new subsection:

"(l) (1) In determining whether any right-of-way on any Federal-aid system should be used for accommodating any utility facility, the Secretary shall—

"(A) evaluate the direct and indirect environmental and economic effects of any loss of productive agricultural land or any impairment of the productivity of any agricultural land which would result from the disapproval of the use of such right-of-way for the accommodation of such utility facility; and

"(B) consider such environmental and economic effects together with any interference with or impairment of the use of the highway in such right-of-way which would result from the use of such right-of-way for the accommodation of such utility facility.

"(2) For the purpose of this subsection—

"(A) the term 'utility facility' means any privately, publicly, or cooperatively owned line, facility, or system for producing, transmitting, or distributing communications, power, electricity, light, heat, gas, oil, crude products, water, steam, waste, storm water not connected with highway drainage, or any other similar commodity, including any fire or police signal system or street lighting system, which directly or indirectly serves the public; and

"(B) the term 'right-of-way' means any real property, or interest therein, acquired, dedicated, or reserved for the construction, operation, and maintenance of a highway."

By Mr. KENNEDY (for himself, Mr. NELSON, Mr. JAVITS, Mr. WILLIAMS, Mr. RANDOLPH, Mr. PELL, Mr. CRANSTON, Mr. HATHAWAY, Mr. EAGLETON, and Mr. RIEGLE):

S. 2755. A bill to revise and reform the Federal law applicable to drugs for human use and to establish a National Center for Clinical Pharmacology within the Department of Health, Education, and Welfare; to the Committee on Human Resources.

DRUG REGULATION REFORM ACT OF 1978

● Mr. KENNEDY. Mr. President, I rise on behalf of myself and Senators NELSON, JAVITS, WILLIAMS, RANDOLPH, CRANSTON, PELL, HATHAWAY, EAGLETON, and RIEGLE to introduce the Drug Regulation Reform Act of 1978.

Mr. President, the Senate Health and Scientific Research Subcommittee began its inquiry into the pharmaceutical industry in December of 1973. Since that time, we have established a hearing record that is now well over 20 volumes in length. We began with a focus on the patient. We wanted to know the impact of prescription drug use in the United States on the health and well-being of American citizens. We wanted to know whether drugs were well or poorly used. We wanted to know the nature of misuse, the incidence of misuse, and the consequences of misuse. To our surprise, we found that no one—not the Food and Drug Administration, not the American Medical Association, not the pharmaceutical industry—could tell us how drugs were being used, what the incidence of adverse reactions was, what the consequence of misuse was in the United States. There simply is not any good drug use data available in the United States. The subcommittee heard estimates of deaths from adverse drug reactions that ranged from 17,000 to 120,000. But the simple truth was that no one could tell the subcommittee, with any degree of assurance, what the true figure would be.

From our initial focus on the consumer, we then turned our attention to the doctor. We wanted to find out how doctors learned about drugs in medical school, what kind of information they received once in practice. This led us to an intensive examination of the relationship between the advertising, marketing, and promotional practices of the industry and the prescribing practices of the individual physician.

From this relationship between the pharmaceutical industry and the physician, we turned to examine the regulatory interface between the Food and Drug Administration and the pharmaceutical industry. We examined the workings of the Food and Drug Administration in great detail. We examined the regulatory process, trying to understand what impeded it and what helped it.

Mr. President, since we began our inquiry in 1973, several major pieces of legislation have been proposed to deal with some of the problems we have identified. Senator NELSON has put forth many proposals; Senators PELL, HATHAWAY, and I have put forth major proposals; Senators JAVITS and WILLIAMS have put forth a proposal; Congressman ROGERS has put forth a proposal in the House of Representatives; and in December of last year, a draft of an administration proposal was made public. At that time, I felt that the Nation's interests would best be served if all the authors of varying legislative proposals could be brought together to pool their talents and resources to develop a single, comprehensive, legislative proposal. Secretary Califano and my colleagues in the House and Senate readily agreed with that suggestion, and a staff work group was formed that began meeting last December and which has met intensively until this past week. The legislation that I am proposing today is the product of that work group. It is the single, most comprehensive drug reform legislative proposal since the creation of the Food, Drug, and Cosmetic Act in 1936. It addresses all of the problems identified in the hearings before the Health Subcommittee. It represents the views and the best thinking of all the knowledgeable parties in this area.

Mr. President, it is a consensus bill. As such, no single sponsor endorses every single aspect of this legislation. We all have our own specific disagreements with specific provisions of this legislation, but, by and large, we agree that this legislation provides the basis for sound, comprehensive, legislative reform of the drug provisions of the Food, Drug, and Cosmetic Act.

I would now like to explain why I think this legislation addresses the major problems identified by the Health Subcommitee during its 5 years of hearings.

The first question was, "How are drugs being used in the United States?" This proposal requires that all new drugs, except for those where the Secretary determines that no useful purpose could be served, will be subject to postmarketing surveillance for a period of 5 years. In addition, any drug, old or new, could be subjected to postmarketing surveillance requirements if the Secretary determines that there is a public health reason to do so. As a result of these two requirements, a comprehensive profile of drug useage in the United States will emerge. Because all new drugs will be tightly monitored, we will be able to allow them on the market more rapidly than the process allows today.

Once this drug data is collected, it will allow for preparation of an annual Drug Experience Assessment Report, which will be prepared by the new National Center for Clinical Pharmacology, established by the legislation. This report, which will be a public document, will describe the state of drug usage in the United States. It will analyze patterns of practice within the major categories of drugs. It will include suggestions for improving the way drugs are used and for reducing the risks to consumers.

How does the collection of this data enable us to improve the way drugs are used in the United States? The legislation provides several answers. The first is regulatory. Under this legislation the secretary can limit the distribution of

drugs to certain facilities or to physicians who are experienced in the use of the particular drug. This would enable drugs which might otherwise have to be removed from the market because of the dangers of general distribution, to remain on the market for their selected use in certain populations. The need for such a distribution curtailment might become clear on the basis of postmarketing surveillance data. In addition, labeling revisions could be prompted by an analysis of the drug usage data. Finally, the legislation allows the Secretary the discretion to require informed consent for the use of specific drug products when the risks of using those products are significant.

The second way that drug use can be improved is by education. I will deal with this topic separately below.

The third area to improve drug usage involves providing consumers with reliable and understandable information about the drug products they are to consume. This legislation requires patient package inserts which are to explain in layperson's language what the risks of taking the drug are, what the benefits are, what side effects can be expected, et cetera.

How then can we improve the physician's education about drug usage during medical school, residency training, and in practice? Our hearings showed that physicians, once in practice, rely on detailmen for information. Yet the detailmen themselves testified that they often exaggerate the good qualities of a drug and downplay the side effects. This legislation requires detailmen to leave a sheet of full prescribing information on each drug which they detail to a physician. That sheet must be handed to the physician. This is similar to the system that has worked so well in Great Britain.

In addition, the legislation requires that a compendium be prepared for all drugs by the Food and Drug Administration to be distributed to all physicians. This compendium will be a useful reference guide that describes the basic pharmacology of drugs and their appropriate place in the clinical armamentarium.

One of the major focuses of the National Center for Clinical Pharmacology will be on the education of physicians, both during school and once out in practice. The center will provide funds to medical schools to be sure that the clinical pharmacology receives the priority it deserves. It will have funds for continuing education programs targeted at the use of drugs. In addition, it will provide a base of support for the training of the clinical pharmacologists of the future.

The advertising, marketing and promotional excesses of the pharmaceutical industry will be curbed by this new legislation. These practices have a significant impact on the way doctors prescribe drugs. As the excesses are eliminated, and as more useful information is substituted, physician prescribing practices should be based on a more solid foundation. This legislation provides for the elimination of samples, except in emergency situations. When we began our hearings in 1973, the pharmaceutical industry was distributing over 2 billion free samples a year. The purpose of these samples was simple: to influence the prescribing behavior of physicians. The physician's choice of a drug for a particular patient should be based on the individualized needs of that patient, and not on the availability of a free product in the physician's drawer. In addition, the legislation eliminates the giving of gifts and gimmicks to pharmacists and other health professionals. The freezer full of meat in return for the prescribing of a certain company's drug is a practice whose time should long have passed.

Finally, the legislation would prohibit prescription surveys by detailmen. This is the practice whereby detailmen would go into the pharmacies, look at pharmacists' records, review individual patient cards and see which particular drugs a particular physician was prescribing. This is highly unethical and violates the privacy of the patient. It was done because it enabled the detailman to know what a given physician in a given area was prescribing, so that he might tailor his huckstering more appropriately to the individual physician. Such practices will be outlawed by this legislation.

The third question explored in the hearings of the subcommittee was, "What major changes in the regulatory process of the Food and Drug Administration are necessary to improve it and to provide for greater public accountability?" This legislation completely overhauls the regulatory process of the Food and Drug Administration. This new system depends on the introduction of a monograph. If a new drug is to be marketed, the manufacturer must petition the Food and Drug Administration for the establishment of a monograph. That first manufacturer must then do the necessary animal and clinical studies to demonstrate the safety and efficacy of the new product. No other manfacturer will ever have to repeat those studies. Not only will this save money, but it will correct the ethical abuse of the current system. That is to say, under the current system, even though a drug is known to be safe and effective, each manufacturer must repeat the studies of the original manufacturer. Thus, some patients are subjected to double-blind studies where placebos may be given (for example, treatment is withheld), even though the drug is known to work. This places that patient at an unacceptable level of risk. The first company's animal and clinical test data are made public after a certain period of time. No other manufacturer may bring a product on the market based upon the first manufacturer's data for at least 5 years after the first manufacturer has been allowed on the market. After that period of time, additional protection may be afforded the first manufacturer if a valid patent is being held and if there are still years left on that patent. However, once the 5 years have expired, or once the patent has expired, other manufacturers may simply make the drug and market it without repeating the animal and clinical test data.

Overall, the decisionmaking process for the approval of a new drug would work as follows: After the initial petition is filed, a scientific paper prepared by the drug company would be made public. The petition would then be reviewed by the staff of the Food and Drug Administration. They would make a recommendation for regulatory action. Within a certain period of time, a public hearing would have to be held. This is an important, new innovation in the law. Ninety days prior to the public hearing, the detailed summary, as well as the raw data of the animal and human clinical tests, would be made available to any individual who demonstrated a legitimate interest in participating in the public hearing.

This legislation prohibits however, any representative of a pharmaceutical company from having access to the data. This is to protect the interests of the original manufacturer. After the public hearing, the Food and Drug Administration's staff would have to review the major issues raised at that hearing. It would have to respond to those issues and make a final recommendation to the Commissioner. At the same time, an advisory committee would be asked to review and make recommendations to the Commissioner. Finally, the Commissioner would decide. This system provides for checks and balances on the internal Food and Drug Administration staff. There is a public hearing; the recommendations of that public hearing must be responded to, both by the FDA staff and by an advisory committee of distinguished experts.

Once a drug is on the market, there is greater regulatory discretion with regard to removal of the product than currently exists. At the present time, a drug can be removed if it is an imminent hazard. Under the new law, a drug would be able to be removed for an unreasonable, direct and substantial risk of harm to the health of an individual.

I would like to briefly summarize a major change that has been made in what is now called the investigational new drug phase. Under the current system, phase I involves the testing of a drug on a limited number of healthy people. Phase II involves the testing of a drug on a limited number of people with a disease for which the drug is intended. And phase III expands those tests to thousands of patients with the disease. Many drugs are dropped between phases II and III because they do not pan out in humans. In order to expedite the time for the completion of phases I and II, this legislation restricts the Food and Drug Administration's control over that aspect of the research to the protection of human subjects of that research. The Food and Drug Administration cannot delay an investigation if it disagrees with the scientific methodology. It can only delay the investigation if it feels that human subjects are not being adequately protected.

This legislation also makes an important change in the definition of safety. It recognizes safety for what it is—a value judgment made by individuals who weigh the risks of a drug versus the benefits. There is no such thing as absolute safety in drugs, and this re-

vision of the definition places that concept in the law for the first time.

Many Americans are concerned that drugs are not reaching the marketplace as rapidly as is possible. I believe this legislation will speed up the time it takes for drugs to reach the market. Because of the postmarketing surveillance, which would enable early detection of any problems, one can speed up the initial approval process with some confidence. This is done in a special fashion for those drugs that are considered to have major medical significance and for which there are no other alternative forms of therapy available, or for which alternative forms of therapy are less appropriate. In these instances, the demonstration of effectiveness will not require adequate and well-controlled studies. These breakthrough drugs may be provisionally approved if effectiveness is demonstrated by scientific evidence, adequate in the opinions of experts in the field to show that the drug is effective—short of adequate and well-controlled studies. In such circumstances, provisional approval will be granted and, when feasible, adequate and well-controlled studies will be conducted while the drug is on the market.

I am particularly interested in an aspect of the legislation which will be of great benefit to the developing nations of the world. The National Center for Clinical Pharmacology will have the mandate to do its own research and development on drugs of limited commercial value. Anytime the pharmaceutical industry is not pursuing a scientific lead the Government will have the option of doing it under this legislation. Thus, the diseases of developing nations will get the special attention that they so desperately need. In addition, the export standards in this legislation reflect the different needs of other countries, and the different risk/benefit ratios that need to be applied in those countries. Under this legislation, if a drug is approved by the other country, and if the Secretary of Health, Education, and Welfare determines that a drug is not a threat to the public health and safety, it can be exported, even if it is not approved for use in the United States.

The legislation also provides for the posting of drug prices in the Nation's pharmacies, so that consumers will know at a glance the relative costs of filling a prescription in one drugstore versus another.

Finally, this legislation provides for an independent evaluation of the impact of the law itself. Over a 7-year period of time, the effect of the new regulatory system will be measured on research productivity in the pharmaceutical industry, the economics of the industry, the protection of the American consumer, the prices of pharmaceutical products.

Mr. President, I am aware of the great controversy that this bill has generated. Even before its formal introduction, the major issue is whether or not this new system will provide incentives for industry research and expedite the approval of new drugs in a manner fully consistent with the protection of the health and safety of the American people, or whether this bill will further delay the entry of new drugs onto the market, and whether it actually provides disincentives for private pharmaceutical research. It is my intent, and the intent of the cosponsors of this legislation, to maintain a vigorous and viable private pharmaceutical research capability in the United States. We want research to flourish. We want to encourage it. We want it to stay in the United States. We will listen very carefully to those who believe that this bill hinders, rather than helps, that situation.

I am also concerned about the due process provisions of this legislation. I will insist upon full procedural and legal remedies. At the present time, the legislation contains broad discretionary authority for the Secretary. We will have to look long and hard at whether that discretionary authority needs to be limited.

Finally, Mr. President, I am committed, along with Senator JAVITS, to the establishment of the Food and Drug Administration in the Food, Drug, and Cosmetic Act. It does not exist in the law at the present time. The Commissioner does not require the advice and consent of the Senate. His responsibilities are not delineated at all, yet the Commissioner of the Food and Drug Administration is one of the most important health officials in this Nation. He heads the most important health regulatory agency in the world. I will move to amend this legislation to establish the agency in law, to transfer the powers of the Secretary of HEW to the Commissioner of the Food and Drug Administration, and to require advice and consent to the nomination of the Commissioner.

Mr. President, in spite of my reservations, I believe that after 15 years the Congress of the United States will make the necessary revisions in the Food, Drug, and Cosmetic Act. I will begin hearings on this legislation tomorrow morning. I expect to appear before you again, Mr. President, during this session of Congress to present you and our other colleagues an opportunity to vote on the most significant piece of health regulatory legislation the Congress of the United States has considered since 1936. I want to thank my colleagues in the Senate and the House of Representatives and the Department of Health, Education, and Welfare for their tireless efforts to produce this unique consensus approach. I look forward to working with them to produce the kind of legislative reform that is not only needed, but that will be welcomed by both the American people and the pharmaceutical industry.

I ask for unanimous consent that this legislation be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2755

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE AND TABLE OF CONTENTS

SECTION 1. This Act may be cited as the "Drug Regulation Reform Act of 1978".

TABLE OF CONTENTS

Sec. 1. Short title and table of contents.
TITLE I—DRUG REGULATION REFORM
PART A—FINDINGS AND DECLARATIONS; DEFINITIONS
Sec. 101. Findings and declarations.
Sec. 102. Definitions.
PART B—APPROVAL OF DRUG ENTITIES AND DRUG PRODUCTS
Subpart 1—General Requirements
Sec. 105. General requirements.
Subpart 2—Monographs for Drug Entities
Sec. 107. Drug monographs.
Sec. 108. Contents of a drug monograph.
Sec. 109. Standards for issuance, amendment, suspension, and revocation of monographs generally.
Sec. 110. Standards for provisional issuance, amendment, suspension, and revocation of drug monographs in special circumstances.
Sec. 111. Procedures for issuing, amending, and revoking monographs.
Sec. 112. Procedures for suspending monographs.
Subpart 3—General Requirements for Drug Entities and Drug Products
Sec. 113. Requirements for registration of establishments in which drug entities and drug products are manufactured or distributed.
Sec. 114. Requirements regarding manufacturing and distributing practices.
Sec. 115. Requirements regarding compendial standards of identity, strength, quality, purity, and stability.
Sec. 116. Requirements regarding components of drug entities and drug products.
Sec. 117. Requirements regarding packaging and containers of drug entities and drug products.
Sec. 118. Requirements regarding color additives.
Sec. 119. Requirements regarding importation of drug entities and drug products.
Subpart 4—Licensure of Drug Products Under Monographs
Sec. 120. General requirements.
Sec. 121. Drug products eligible for licensure.
Sec. 122. Drug product licenses.
Subpart 5—Investigational Use of Drug Products
Sec. 125. Objectives in regulating the investigational use of drug products.
Sec. 126. General requirements.
Sec. 127. Registration requirements for drug innovation investigations.
Sec. 128. Registration requirements for drug development investigations.
Sec. 129. Registration requirements for drug treatment investigations.
Sec. 130. Requirements for protection of participants in drug investigations.
Sec. 131. Standards for scientific validity of investigations.
Sec. 132. Guidelines and drug development advice.
Sec. 133. Informal procedures for resolution of scientific disagreements.
Subpart 6—Export of Drug Entities and Drug Products
Sec 134. General requirements.
Sec. 135. Export permits.
Sec. 136. Cooperation with foreign governments and international organizations.
Subpart 7—Formal Proceedings for Denial and Revocation of Licenses, Registrations, and Export Permits for Drug Products
Sec. 140. Applicability of subpart.
Sec. 141. Initiation of proceedings.
Sec. 142. Conduct of formal proceedings.
Sec. 143. Judicial review.

Subpart 8—Homeopathic Drug Entities and Drug Products
Sec. 144. General requirements.
Sec. 145. Homeopathic drug entities and drug products.
PART C—DRUG INFORMATION, PROMOTION, AND EDUCATION
Subpart 1—General Provisions
Sec. 146. General requirements for all labeling.
Sec. 147. Requirements for identification labeling for a drug entity or drug product.
Sec. 148. Notification regarding risks.
Sec. 149. Education programs.
Sec. 150. Official names for drug entities.
Subpart 2—Information for Patients
Sec. 151. Requirements for patient information labeling.
Sec. 152. Requirements for drug products dispensed on prescription.
Sec. 153. Posting of prescription drug product prices.
Subpart 3—Information for Practitioners
Sec. 154. Requirements for practitioner information labeling.
Sec. 155. Federal Drug Compendium.
Subpart 4—Promotion of Drug Products
Sec. 156. Requirements for promotion labeling for prescription drug products.
Sec. 157. Corrective promotion labeling.
Sec. 158. Drug product promotion requirements.
Sec. 159. Restrictions on surveys of prescriptions.
Sec. 160. Requirements for detailing of drug products.
PART C—PROHIBITED ACTS AND PENALITIES
Sec. 161. Prohibited acts.
Sec. 162. Criminal penalties.
Sec. 163. Civil penalties.
Sec. 164. Injunctions.
Sec. 165. Seizure, forfeiture, and administrative embargo.
Sec. 166. Administrative disqualifications.
Sec. 167. Conference before report of criminal violation.
Sec. 168. Separability of penalties.
Sec. 169. Enforcement proceedings.
Sec. 170. Notices and warnings.
PART E—ADMINISTRATIVE PROVISIONS
Sec. 172. Authority to issue regulations.
Sec. 173. Administrative hearings.
Sec. 174. Subpenas.
Sec. 175. Administrative inspections.
Sec. 176. Powers of enforcement personnel.
Sec. 177. Cooperative arrangements.
Sec. 178. Advisory committees.
Sec. 179. Research programs.
Sec. 180. Confidentiality of commercial information.
Sec. 181. Burden of proof.
Sec. 182. Judicial review.
Sec. 183. Citizens' petitions.
Sec. 184. Compensation for fees and expenses.
Sec. 185. Encouragement of joint activities.
PART F—CONFORMING, TRANSITIONAL, EFFECTIVE DATE, AND OTHER GENERAL PROVISIONS
Sec. 191. Repeals and conforming amendments.
Sec. 192. Effective dates and transitional provisions.
Sec. 193. Issuance of initial monographs.
Sec. 194. Pending proceedings.
Sec. 195. Continuation of regulations.
Sec. 196. Savings provisions.
Sec. 197. Application of State law.
TITLE II—NATIONAL CENTER FOR CLINICAL PHARMACOLOGY; EVALUATION OF THE ACT
Sec. 201. National Center for Clinical Pharmacology.
Sec. 202. Evaluation of the Act.

TITLE I—DRUG REGULATION REFORM

PART A—FINDINGS AND DECLARATIONS; DEFINITIONS

FINDINGS AND DECLARATIONS

SEC. 101. Congress makes the following declarations and findings:

(1) Safe and effective drug products intended for human use have a useful and important role in protecting and promoting the health of the American people.

(2) It is in the interest of the American people to encourage, to the extent consistent with the protection of the public health and safety and with ethical standards, the increase of knowledge regarding disease or other aspects of health in humans and the discovery and development of safe and effective drug products intended for human use and, to that end, to maintain optimum freedom for scientific investigators in their pursuit of those objectives.

(3) The manufacture, distribution, promotion and use of, and investigations involving, drug entities and drug products for humans have a substantial and direct effect upon United States interstate and foreign commerce, because—

(A) many essential substances used in the manufacture of drug entities and drug products are transported in interstate commerce for such manufacture,

(B) after manufacture, many drug products are transported in interstate commerce for dispensing to patients,

(C) many patients themselves move from one State to another in order to receive drug products, particularly drug products used in specialized therapies, and

(D) many drug products are paid for, directly or by reimbursement, by private health insurance companies operating in interstate commerce.

(4) Drug entities and drug products manufactured, distributed, and being used or investigated intrastate cannot be differentiated from drug entities and drug products manufactured, distributed, or being used or investigated interstate. Thus, for effective regulation of interstate commerce, it is neither feasible nor reasonable to distinguish, in terms of regulatory controls, drug entities and drug products moving in interstate commerce from drug entities and drug products moving solely in intrastate commerce.

(5) Federal regulation of interstate commerce in drug entities and drug products without concurrent Federal regulation of intrastate commerce in identical, similar, or related drug entities and drug products would discriminate against persons engaged in interstate commerce, would depress interstate commerce in drug entities and drug products, and would adversely burden, obstruct, and affect interstate commerce. Interstate commerce would be particularly depressed, burdened, obstructed, and affected by reason of conflicting State and local requirements regarding the packaging and labeling of drug products.

(6) Although the regulation of the manufacture, distribution, labeling, prescribing, and dispensing of drug products has a direct impact upon the practice of the professions of medicine and pharmacy, the establishment of the qualifications for admission to, and the standards and conduct of members of, these professions, for purposes of protecting the public health, has been and should remain the primary responsibility of the States.

(7) The United States, with respect to international trade involving drug entities and drug products manufactured in this country, seeks—

(A) to respect the informed benefit-risk assessments of responsible governmental officials in other nations regarding drug products not approved for use in the United States,

(B) to assure that the manufacture of drug entities and drug products exported from the United States are not regulated by standards regarding manufacturing requirements and practices that are significantly different from those applied to the manufacture of drug entities and drug products approved for use in this country, and

(C) to assist national and international efforts to protect and improve the health of all people, through research, exchanges of information, and cooperation in regulatory and health care delivery activities.

DEFINITIONS

SEC. 102. As used in this title—

(1) The term "component" means any substance (other than a drug entity) that is—

(A) used in the manufacture of a drug entity or a drug product, including those substances that do not remain in the drug entity or drug product upon completion of manufacturing and those substances that are used in the packaging of the drug entity or drug product; and

(B) contained in a drug entity or drug product upon completion of manufacture, including those substances that are not intended to be contained in the drug entity or drug product.

(2) The term "counterfeit drug product" means a drug product which because it, or its container or identification labeling, without authorization, bears the trademark, proprietary name, or other identifying mark, imprint, or device, or any likeness thereof, of a drug product licensed under subpart 4 of part B of this title, is falsely represented to be the product of, or to have been distributed by, a person other than the person who in fact manufactured or distributed it. The term "counterfeit drug product" does not include a drug product which, or the container or identification labeling of which, conspicuously and accurately identifies the person who in fact manufactured or distributed it.

(3) The term "Department" means the Department of Health, Education, and Welfare.

(4) (A) The term "dispense" means—

(i) in the case of a nonprescription drug product, the act of delivering the drug product to a patient or an agent of a patient; and

(ii) in the case of a prescription drug product, the act of delivering the drug product to a patient or an agent of a patient—

(I) by a practitioner or an agent of a practitioner (either by direct administration or by transfer to the patient (or agent of the patient) for later administration), or

(II) by a pharmacist (either directly or through an agent) pursuant to the lawful prescription of a practitioner.

(B) The term "dispense" includes the compounding, packaging, and labeling of a drug product necessary for, and as an incident to, preparing the drug product for delivery to a patient or an agent of a patient, as provided in subparagraph (A).

(5) The term "distribute" means the act of delivering (other than by dispensing) to any person a drug entity or drug product. The term "distributor" means a person who so delivers a drug entity or drug product.

(6) (A) Except as provided in subparagraph (B), the term "drug entity" means a substance, or a combination of substances, which is intended—

(i) to be used in the diagnosis, cure, mitigation, or treatment of a disease, injury, or other condition affecting the health of a human, or in the prevention of a disease or other condition (other than an injury) affecting the health of a human, or

(ii) otherwise to affect or evaluate the structure or any function of the human body.

(B) The term "drug entity" does not include any substance which is—

(i) a food as defined in section 201(f) of the Federal Food, Drug, and Cosmetic Act, unless the food is also represented for use by individuals in the diagnosis, cure, miti-

gation, or treatment of a disease, injury, or other condition affecting the health of a human, or in the prevention of a disease or other condition affecting the health of a human, in which case the substance shall be other condition affecting the health of a human, in which case the substance shall be subject to the pertinent provisions both of that Act and of this title,

(ii) a cosmetic as defined in section 201 (i) of the Federal Food, Drug, and Cosmetic Act, unless the cosmetic is also intended (I) to be used in the diagnosis, cure, mitigation, or treatment of a disease, injury, or other condition affecting the health of a human, or in the prevention of a disease or other condition affecting the health of a human, or (II) to otherwise affect or evaluate the structure or any function of the human body, in which case the substance shall be subject to the pertinent provisions both of that Act and of this title, or

(iii) a device as defined in section 201(h) of the Federal Food, Drug, and Cosmetic Act.

(7)(A) The term "drug product" means a drug entity, alone or combined with one or more components, in a finished dosage form capable of being dispensed to a human (except for packaging, labeling, and any final manipulation required immediately before dispensing).

(B) The terms "licensed drug product", "registered drug product", and "permitted drug product" refer to a particular drug product manufactured or distributed by a particular person under a license, registration or export permit, issued by the Secretary under subpart 4, 5, or 6, respectively, of part B of this title.

(C) The term "prescription drug product" refers to a drug product licensed under a monograph which, under section 108(d) or the law of the State in which it is dispensed, may only be dispensed by or upon the prescription of a practitioner.

(D) The term "nonprescription drug product" refers to a drug product licensed under a monograph which, under section 108(d) and the law of the State in which it is dispensed, may be dispensed without the prescription of a practitioner.

(8) The term "established name" means—

(A) any official name for the drug entity designated pursuant to section 150,

(B) if there is no official name and the drug entity is recognized in the United States Pharmacopeia, the official title thereof in the United States Pharmacopeia, or

(C) if neither subparagraph (A) nor (B) of this paragraph applies, the common or usual name, if any, of the drug entity.

(9)(A) The term "labeling" means identification labeling, information labeling, and promotion labeling regarding a drug entity or a drug product.

(B) The term "identification labeling" means any display of written, printed, or graphic matter upon the immediate or other container of any drug entity or drug product.

(C) The term "information labeling" means any written, printed, or graphic matter regarding and accompanying a drug entity or a drug product providing information on its use.

(D) The term "promotion labeling" means any written, printed, or graphic, or other reproduced matter (including audio, visual, or audiovisual communication) regarding a drug entity or drug product which is disseminated by or on behalf of the manufacturer or distributor of the drug entity or drug product, and which is not identification or information labeling.

(10)(A) The term "manufacture" means the production, preparation, propagation, compounding, processing, or packaging into containers, of a drug entity or drug product, or the placing of labeling on a drug entity or drug product.

(B) The term "manufacture" does not include the compounding of a drug product by a practitioner or pharmacist necessary for, and as an incident to, preparing the drug product for delivery to a patient or an agent of a patient, as provided in paragraph (4)(A).

(C) The term "placing of labeling on a drug entity or drug product" means the placing of identification or information labeling on, with, or to accompany a drug entity or drug product, including the alteration, removal, mutilation, destruction, or obliteration of the whole or any part of any identification or information labeling on, with, or accompanying such entity or product.

(D) For purposes of sections 147 and 154, the term "manufacturer" does not include a person who is solely engaged in the packaging of a drug entity or drug product into containers or in the placing of labeling on a drug entity or drug product.

(11) The term "patient" means any individual with respect to whom a drug product is intended to be, or has been, used. The term "patient" includes a participant in an investigation involving a drug product (whether in normal health or with the disease, injury, or condition being investigated) and a consumer of a nonprescription drug product.

(12) The term "person" includes any individual corporation, business trust, partnership, association, government, governmental subdivision or agency, or other legal entity.

(13) The term "pharmacist" means an individual licensed, registered, or otherwise permitted by the jurisdiction in which the individual practices to dispense drug products on prescription in the course of professional practice.

(14) The term "practitioner" means an individual licensed, registered, or otherwise permitted by the jurisdiction in which the individual practices to prescribe drug products in the course of professional practice.

(15) The term "prescription" means an oral or written authorization given by a practitioner to a pharmacist to dispense a drug product to a specified patient. The term "prescribe" means to give such an authorization.

(16) The term "Secretary" means the Secretary of Health, Education, and Welfare.

(17) The term "State" means any of the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, American Samoa, the Northern Mariana Islands, Guam, the Trust Territory of the Pacific Islands, and the Canal Zone.

(18) The term "United States", when used in the geographic sense, means all places and waters, continental or insular, subject to the jurisdiction of the United States.

(19) The term "untrue statement of material fact" includes the omission of facts material in the light of other facts or statements presented.

PART B—APPROVAL OF DRUG ENTITIES AND DRUG PRODUCTS

Subpart 1—General Requirements

GENERAL REQUIREMENTS

SEC. 105. (a) MANUFACTURE, IMPORTATION, AND DISTRIBUTION OF DRUG ENTITIES.—No drug entity may be manufactured, imported, distributed, or held for distribution or for use in the manufacture of a drug product, unless—

(1)(A) there is in effect a monograph issued or provisionally issued under subpart 2 for the drug entity;

(B) it is being manufactured, imported, distributed, or held (i) for use in the manufacture of a drug product the manufacture of which is not prohibited by subsection (b) or (c), or (ii) for export and the export is not prohibited by subsection (c); and

(C) the requirements applicable to the drug entity under sections 114 through 119, 146, and 147 are fulfilled; or

(2)(A) the drug entity is being manufactured, imported, distributed, or held for export and the export is not prohibited by subsection (c); and

(B) a permit for the export is in effect under subpart 6.

(b) MANUFACTURE, IMPORTATION, AND DISTRIBUTION OF DRUG PRODUCTS.—No drug product may be manufactured, imported, distributed, or held for distribution, unless—

(1) there is in effect (A) a monograph issued or provisionally issued under subpart 2 for the drug entity contained in the drug product, and (B) a license issued to the manufacturer or importer of that drug product under subpart 4 for its manufacture or importation; or

(2) in the case of a drug product which is to be manufactured or imported for investigational use, a registration for such purpose is in effect under subpart 5.

(c) EXPORT OF DRUG ENTITIES AND DRUG PRODUCTS.—(1) No drug entity may be exported from the United States unless—

(A) the requirements of subparagraphs (1)(A) and (1)(C) of subsection (a) are fulfilled; or

(B) a permit for the export is in effect under subpart 6.

(2) No drug product may be exported from the United States unless—

(A) the requirements of subsection (b) have been met, or

(B) a permit for such export is in effect under subpart 6.

(d) EXEMPTION FOR HOMEOPATHIC DRUG PRODUCTS AND RELATED DRUG ENTITIES.—A drug product which complies with the requirements of subpart 8, and a drug entity which is used in the manufacture of such a drug product and which complies with that subpart, shall be exempt from the requirements of this section.

Subpart 2—Monographs for Drug Entities

DRUG MONOGRAPHS

SEC. 107. (a) IN GENERAL.—As prescribed by section 108, a monograph for a drug entity—

(1) identifies the drug entity,

(2) states the indications for which the use of drug products eligible to be licensed under the monograph has been determined to be effective and safe,

(3) describes the types of drug products that are eligible to be licensed under the monograph, and

(4) prescribes standards and requirements respecting such drug products.

(b) ACTION ON MONOGRAPHS.—The authority for, and procedures applicable to, the issuance, amendment, suspension, and revocation of a monograph for a drug entity are set forth in sections 109, 110, 111, and 112.

CONTENTS OF A DRUG MONOGRAPH

SEC. 108. (a) GENERAL.—A monograph shall contain the information required in subsections (b) through (l) of this section.

(b) DESCRIPTION OF THE DRUG ENTITY.—The description of a drug entity in a monograph shall include the following:

(1) The established name, if any, of the drug entity and, if the drug entity is a combination of separate drug entities, the established name, if any of each such separate drug entity.

(2) A statement of the types of dosage forms of drug products that are eligible to be licensed under the monograph and the strength of each type of dosage form.

(c) REQUIREMENT AND GUIDELINES FOR THE CONTENTS OF INFORMATION LABELING FOR A DRUG PRODUCT.—A monograph for a drug entity shall include requirements and guidelines for the contents of information labeling for the forms of drug products that are eligible to be licensed under the monograph, as follows:

(1) The monograph shall set forth the indications for which use of the drug product has been determined to be effective and safe.

(2) The monograph shall, in the case of a prescription drug product, state whether a practitioner may direct that information labeling for patients required under section 151 not be provided to an individual patient, as determined by the Secretary in accordance with subsection (d)(1) of that section.

(3) The Secretary shall provide, as an appendix to a monograph, a guideline for the content of information labeling which will fulfill the requirements of sections 146 and 154, and, if such labeling is required, section 151.

(d) REQUIREMENTS FOR DISPENSING.—(1) Except as provided in paragraph (2), a monograph for a drug entity shall authorize drug products that are eligible to be licensed under the monograph to be dispensed without the prescription of a practitioner.

(2) The monograph shall require a drug product that is eligible to be licensed under the monograph to be dispensed only by or upon the prescription of a practitioner if the Secretary determines that the supervision by a practitioner of the patients to whom the drug product is dispensed is required because of (A) the toxic or other potential adverse effects that may result from use of the drug product, (B) the methods of administration or collateral measures necessary for its safe and effective use, or (C) the nature of the disease, injury, or condition being treated with the drug product.

(3) Additional requirements for dispensing of a drug product may be included in a monograph under subsection (e).

(e) SPECIAL REQUIREMENTS FOR THE DISTRIBUTION AND DISPENSING OF A DRUG PRODUCT.—(1)(A) If the Secretary determines that—

(i) because of the significance of risks which are presented to patients or to the public health from the use of drug products containing a particular drug entity, which use is known to occur or can reasonably be expected by experts qualified by scientific training and experience to evaluate the safety and effectiveness of drugs to occur, such drug entity cannot be determined to be safe and consequently a monograph for such entity cannot be issued, or if issued, would have to be revoked, unless the requirements authorized by this paragraph are imposed through the monograph on the distribution and dispensing of such drug products;

(ii) such requirements can reasonably be expected to reduce, in a reasonable period of time, the risks referred to in clause (i) sufficiently to permit such drug entity to be determined to be safe; and

(iii) no other administrative or educational action authorized to be taken by the Secretary under this title or under any other law can reasonably be expected to so reduce such risks;

the monograph for the drug entity shall include, either at the time of its issuance or as an amendment, such requirements relating to the distribution and dispensing of drug products eligible to be licensed under the monograph as the Secretary determines are necessary to reduce the risks referred to in clause (i) sufficiently to permit such drug entity to be determined to be safe.

(B) No requirement authorized to be imposed under subparagraph (A) may—

(i) restrict the use of a drug product licensed under the monograph to practitioners with specific training or experience in its use or to practitioners for use in certain facilities unless the Secretary determines that such requirement is necessary for the drug entity to be determined to be safe,

(ii) exclude a practitioner from using a drug product licensed under the monograph solely because the practitioner does not have the training or experience to make the practitioner eligible for certification by a certifying board recognized by the American Board of Medical Specialties or has not been certified by such a board,

(iii) be included in a monograph unless it has been specifically submitted to and considered by an appropriate drug science advisory committee appointed under section 178(a), and

(iv) be imposed on a nonprescription drug product.

(2) If the Secretary determines that the drug product in a particular use involves the risk of serious illness or injury but does not outweigh the health benefits from such use, the monograph for the drug entity under which such drug product is licensed may include, either at the time of its issuance or as an amendment, a requirement that the drug product may not be dispensed to a patient unless the informed consent of the patient (or the patient's legal representative) has been received in such form and manner as shall be prescribed by the Secretary. Such a requirement may be included in a monograph only if it has been specifically submitted to and considered by an appropriate drug science advisory committee appointed under section 178(a).

(3) Any requirement imposed under this subsection shall have due regard for the health needs and privacy of patients.

(4) Any requirement imposed under this subsection shall expire three years following the date it becomes effective. The requirement may be renewed upon a new determination by the Secretary, in accordance with the procedures for amending a monograph, that the conditions described in paragraph (1) or (2) still exist with respect to the drug product involved. The determination shall be based upon all relevant information, including information obtained since the previous imposition of the requirement.

(f) REQUIREMENTS FOR INFORMATION TO BE SUBMITTED TO OBTAIN A LICENSE FOR A DRUG PRODUCT UNDER A MONOGRAPH.—(1) A monograph for a drug entity shall specify the information to be submitted in order for the Secretary to determine whether a drug product is eligible to be licensed under the monograph, and whether the drug product fulfills the requirements for licensure under the monograph.

(2) A monograph for a drug entity may require that an application for licensure of a drug product containing the drug entity contain or be accompanied by, in addition to the information required by section 122, the following:

(A) Evidence that the drug product meets applicable standards of identity, strength, quality, purity, and stability under subsection (k) and section 115. If no such standards exist under those provisions, the application for licensure shall contain appropriate standards.

(B) A list of the components in the drug product, or in the drug entity that is contained in the drug product.

(C) A complete and detailed description of the methods used in, and the facilities and controls used for, manufacturing, holding, and distributing the drug product or the drug entity contained in the drug product.

(D) Samples of the drug product, or of the drug entity contained in the drug product.

(E) Evidence regarding the bioavailability of the drug product.

(F) Such other data, information, or materials as the Secretary determines are necessary to determine whether a drug product is eligible to be licensed under the monograph.

(G) Such information as the Secretary determines is necessary to determine whether the applicant will comply with the conditions of licensure required under the monograph or under subpart 3 or 4.

(g) REQUIREMENTS FOR SURVEILLANCE OF DRUG USE AND EXPERIENCE.—(1)(A) At the time of its issuance, a monograph for a drug entity shall include the requirement described in paragraph (2) unless the Secretary finds that such requirement is not necessary or useful in evaluating the continuing safety of the drug product.

(B) At any time after its issuance, a drug entity shall be amended to include the requirement described in paragraph (2) if the Secretary determines that such requirement is necessary and useful in evaluating the continuing safety of the drug product.

(2) The Secretary may require in a monograph, as a condition of initial or continued licensure of a drug product under the monograph, that a person obtaining or holding a license for the drug product establish and maintain a system for identifying and collecting data and information regarding the use of, and the experience with, the drug product, and make reports to the Secretary regarding the data and information collected. Such a requirement shall specify the purpose for which data and information is to be identified and collected and for which reports on the data and information are to be made. If such a requirement is imposed in a monograph, the Secretary shall provide as an appendix to the monograph guidelines for systems which will meet such requirement.

(3) Any requirement imposed under paragraph (2) shall expire five years following the date on which it becomes effective. The requirement may be renewed upon a determination by the Secretary, in accordance with the procedures for amending a monograph, that continuation of the requirement is necessary or useful in evaluating the continuing safety of the drug product involved.

(h) REQUIREMENTS FOR THE CONDUCT OF SCIENTIFIC INVESTIGATIONS ON A DRUG PRODUCT.—(1) A monograph for a drug entity may include, as a condition of the initial or continued licensure of a drug product under the monograph, a requirement that a person obtaining or holding a license for the drug product conduct scientific investigations to detect and evaluate the risks of a significant adverse effect of the drug product, if on the basis of scientific information, including information regarding chemically or pharmacologically related drug products, the drug product is known or may reasonably be expected to produce such adverse effect.

(2)(A) A monograph for a drug entity may include, as a condition of the initial or continued licensure of a drug product under the monograph, a requirement that a person obtaining or holding a license for the drug product conduct scientific investigations relating to the effectiveness of the drug product in accordance with subparagraph (B) or (C).

(B) If—

(i) the drug product is known to be used, or can reasonably be expected by experts qualified by scientific training and experience to evaluate the safety and effectiveness of drug products to be used, for a purpose or in a manner which is not set forth in the information labeling for the drug product, and

(ii) use of the drug product for such purpose or in such manner may present a risk of illness or injury to persons who use the product because of adverse effects or lack of effective treatment,

a person obtaining or holding a license for the drug product may be required to conduct scientific investigations to determine whether its effectiveness clearly outweighs such risk of illness or injury and consequently if the drug product is safe.

(C) If—

(i) the drug product is known to be used, or can reasonably be expected by experts qualified by scientific training and experience to evaluate the safety and effectiveness of drug products to be used, for a purpose or in a manner which is not set forth in the information labeling for the drug product, and

(ii) there exists a scientific basis on which experts qualified by training and experience to evaluate the safety and effectiveness of drug products could fairly and responsibly

conclude that the drug product may be effective when used for such purpose or in such manner,

a person obtaining or holding a license for the drug product may be required to conduct scientific investigations to determine the effectiveness of the drug product when used for such purpose or in such manner.

(3) In imposing a requirement under this subsection the Secretary shall provide, as an appendix to the monograph, guidelines on protocols for conducting investigations which will fulfill such requirement. The Secretary may also specify a timetable by which the investigations are to be completed and the results from the investigations are to be reported to the Secretary.

(4) No requirement shall be imposed under this subsection unless the Secretary has submitted the specific requirement to an appropriate drug science advisory committee appointed in accordance with section 178(a).

(i) REQUIREMENTS FOR RECORDKEEPING AND REPORTING REGARDING DRUG PRODUCTS LICENSED UNDER A MONOGRAPH.—A monograph for a drug entity may include, as a condition of initial or continued licensure of a drug product under the monograph, a requirement that a person obtaining or holding a license for the drug product establish and maintain accurate, complete, and current records of, and make reports to the Secretary regarding, data and information generated, received, or otherwise obtained by the licensee after the issuance of the license relating to the drug product and its manufacture, distribution, preclinical studies, and clinical use and experience, if the records and reports so required are reasonably necessary to evaluate the continued effectiveness and safety of the drug product or the continued compliance of the licensee with the conditions of licensure under the monograph. No reports may be required to be made under this subsection regarding any information that may not be inspected or obtained during an inspection under section 175 of this title.

(j) REQUIREMENTS FOR THE APPROVAL OF BATCHES OF DRUG PRODUCTS LICENSED UNDER A MONOGRAPH.—(1) A monograph may include, as a condition of initial or continued licensure of a drug product under the monograph, a requirement that a person obtaining or holding a license for the drug product obtain, in accordance with this subsection, the approval of the Secretary for each batch of the drug product before distributing that batch, if the Secretary determines that—

(A) there is reason to believe that a significant number of individual batches of the drug product (manufactured either by several licensees or by one licensee who supplies a significant proportion of the total production of the drug product) would not consistently meet one or more of the applicable standards of identity, strength, quality, purity, and stability, under the monograph, section 115, or the application for licensure for the drug product, or have a proper level of bioavailability in patients, and

(B) failure of a batch of the drug product to meet such standards or have such a level of bioavailability poses a risk of illness or injury to patients using drug products from that batch, either from adverse effects or as a result of a lack of effectiveness.

(2)(A) A requirement imposed under this subsection shall identify the standards of identity, strength, quality, purity, or stability, or levels of bioavailability, for which batches of the drug product shall be tested.

(B) The Secretary shall provide, as an appendix to the monograph, guidelines describing the specific tests or methods of assay to be used.

(3) If a requirement is imposed under this subsection in a monograph, any licensee for a drug product licensed under the monograph may request the Secretary to include in the license an exemption for such drug product from such requirement. In determining whether to grant such an exemption the Secretary shall consider—

(A) the consistency with which the licensee has manufactured consecutive batches of the drug product which have been approved as prescribed by paragraph (2) during a period of time deemed significant in light of the volume of the drug product manufactured; and

(B) any other information relevant to determine whether continued batch approval of the drug product is necessary to assure that it complies with the applicable standards of identity, strength, quality, purity, and stability, and levels of bioavailability.

(4) Any requirement imposed in a monograph under this subsection shall expire three years following the date it becomes effective. The requirement may be renewed upon a new determination by the Secretary, in accordance with the procedures for amending a monograph, that the conditions described in paragraph (1) still exist with respect to the drug product involved. This determination shall be based upon all relevant information, including the experience of all manufacturers of drug products licensed under the monograph in demonstrating consistency in the manufacture of approvable batches of drug products during the period of time in which the requirement has been in effect.

(k) STANDARDS OF IDENTITY, STRENGTH, QUALITY, PURITY, AND STABILITY.—A monograph for a drug entity may include, as a condition for initial or continued licensure of a drug product under the monograph, a requirement that, in addition to the requirements of section 115, a person obtaining or holding a license for the drug product comply with one or more prescribed standards of identity, strength, quality, and purity for the drug entity described in the monograph or for drug products containing that entity, or with one or more standards to assure the stability of such drug products, if the Secretary determines that other standards either do not exist or are not adequate to assure the safe and effective use of the drug product. If a requirement is imposed under this subsection, the Secretary shall provide, as an appendix to the monograph, guidelines describing the standard and a least one test or method of assay for determining whether the standard is met.

(l) STANDARDS AND SPECIFICATIONS FOR PACKAGING.—A monograph for a drug entity may include, as a condition for initial or continued licensure of a drug product under the monograph, a requirement that, in addition to the requirements of section 117, a person obtaining or holding a license for the drug product comply with one or more prescribed standards and specifications for the packaging of drug products containing the drug entity, if the Secretary determines that such standards or specifications are necessary to assure safe handling of the drug products, to minimize their deterioration, to prevent deception of purchasers or contamination of other drug products, or otherwise to protect the public health.

STANDARDS FOR ISSUANCE, AMENDMENT, SUSPENSION AND REVOCATION OF MONOGRAPHS GENERALLY

SEC. 109. (a) GENERAL REQUIREMENT.—The Secretary shall, pursuant to the procedures set forth in section 111, issue a monograph for a drug entity under this section if the Secretary determines that the drug entity—

(1) is effective, as described in subsection (b);

(2) has been assessed for risks, as described in subsection (c); and

(3) is safe, as described in subsection (e).

(b) EFFECTIVENESS.—(1) The Secretary may issue a monograph under this section only if the Secretary determines that the petitioner for the monograph has shown by substantial evidence that the drug entity described in the monograph is effective.

(2) For purposes of this section and section 110, the term "effective" means that a drug entity, when incorporated into a drug product which is used in accordance with the conditions of use set forth in the information labeling of the drug product, will have the effect it is represented in such labeling to have in the diagnosis, cure, mitigation, or treatment of a disease or other condition affecting the health of a human, or in the prevention of a disease or other condition (other than an injury) affecting the health of a human; and

(3) For purposes of this section, the term "substantial evidence" means evidence consisting of adequate and well-controlled investigations, including clinical investigations, conducted by experts qualified by scientific training and experience to evaluate the effectiveness of the drug entity involved, on the basis of which it could fairly and responsibly be concluded, by experts qualified by scientific training and experience to evaluate the effectiveness of the drug entity involved, that the drug entity will have the effect represented in information labeling for drug products eligible to be licensed under the monograph.

(c) RISK ASSESSMENT.—The Secretary may issue a monograph under this section only if—

(1) the Secretary determines that the petitioner for the monograph has shown that the drug entity has been tested by all methods reasonably applicable and sufficient to detect and evaluate the risks of the drug entity; and

(2) the results of the testing of the drug entity by such methods have been reported to the Secretary in such form and manner as the Secretary has prescribed.

(d) REQUIREMENTS UNDER A MONOGRAPH.—The Secretary may issue a monograph which includes any standard or requirement authorized in section 108 only if the requisite determinations with respect to such standard or requirement are made.

(e) SAFETY.—The Secretary may issue a monograph under this section only if the Secretary determines that the petitioner for the monograph has shown that the drug entity is safe. As used in this section and in section 110, the term "safe" means that the health benefits of the drug entity clearly outweigh the risks presented by the drug entity, taking into account the standards and requirements applicable to drug products eligible to be licensed under the monograph. In determining whether a drug entity is safe, the Secretary shall consider, among other things, the following:

(1) The health benefits of the drug entity and their significance. In considering such benefits the Secretary shall consider—

(A) the known, suspected, or potential effects on the health of patients, and the frequency and magnitude of these effects, that result from the effectiveness of the drug entity when such patients use drug products eligible to be licensed under the monograph under the conditions of use set forth in the information labeling for such products;

(B) the known effects on the acceptability of drug prouct eligible to be licensed under the monograph to patients, due to the convenience of the dosage forms, the frequency and severity of adverse effects, or related factors; and

(C) the known, suspected, or potential effects on the public health that result from the effectiveness of the drug entity when drug products eligible to be licensed under the monograph are used under the conditions of use set forth in the information labeling for such products.

(2) The risks presented by the drug entity and the significance of such risks. In considering such risks the Secretary shall consider—

(A) the known or suspected adverse effects upon the health of patients and medical personnel, and the frequency and severity of these effects, that result from the use of drug products eligible to be licensed under the monograph under the conditions of use set forth in the information labeling for such products;

(B) the potential adverse effects upon the health of patients and medical personnel implied by animal investigations or other scientific information, including information regarding chemically or pharmacologically related drug entities;

(C) the known, suspected, or potential adverse effects upon the health of individuals, when drug products eligible to be licensed under the monograph are used under conditions of use which are not set forth in the information labeling for such products but which are known or can reasonably be expected to occur, including intentional abuse of such products and use of such products for therapeutic purposes or in patient populations not described in such labeling; and

(D) the known, suspected, or potential adverse impact on the public health when the drug products eligible to be licensed under the monograph are used under conditions which may or may not be in the labeling for such products, including the intentional abuse of such products and the use of such products for therapeutic purposes or in patient population not described in such labeling.

(3) The benefits and risks associated with other forms of therapy, including drug therapy, that are available to treat the population of patients for whom drug products eligible to be licensed under the monograph are intended.

(4) The adequacy of the information labeling for such drug products in reasonably assuring their appropriate use.

(5) The adequacy of the standards and requirements prescribed by the monograph in reasonably assuring the appropriate use of all drug products licensed under the monograph.

(f) AMENDMENTS.—(1) The Secretary shall amend a monograph under this section to include within (or to delete from) the monograph an indication or a type of dosage form of a drug product, or to change the strength of a type of dosage form of a drug product, if the Secretary makes (or, in the case of deletion, can no longer make) the determinations required in this section with respect to that indication, dosage form, or strength.

(2) The Secretary may amend a monograph under this section to add a standard or requirement, if the Secretary makes the relevant determinations required under section 108 with respect to that standard or requirement.

(3) The Secretary may amend a monograph under this section to delete a standard or requirement, if the Secretary can no longer make the relevant determinations required under section 108 with respect to that standard or requirement.

(4) Amendments to monographs shall be made by orders issued in accordance with section 111, except that the Secretary may make an order proposing an amendment effective upon its publication in the Federal Register if the Secretary determines that unless such order is made so effective, the monograph would be suspended under subsection (h) pending completion of proceedings under subsection (g) to revoke the monograph. If such an order is made so effective, the Secretary shall (A) notify each licensee of a drug product licensed under the monograph of the terms of the amendment proposed by the order, and (B) initiate and complete proceedings under section 111 with respect to the order on an expedited basis. Upon completion of such proceedings, the Secretary shall affirm, modify, or revoke such order.

(g) REVOCATION.—The Secretary shall, pursuant to section 111, revoke a monograph under this section if the Secretary determines that on the basis of new information, the drug entity described in the monograph—

(1) is no longer shown by substantial evidence to be effective for the conditions of use set forth in information labeling for drug products eligible to be licensed under the monograph; or

(2)(A) is no longer shown to be safe; and

(B) cannot reasonably be expected to be made safe by amendment of the monograph to include additional requirements or standards for drug products eligible to be licensed under the monograph.

(h) SUSPENSION.—(1) The Secretary may by order suspend a monograph under this section, pending completion of proceedings under subsection (g) to determine whether the monograph should be revoked, if the Secretary determines that—

(A) the drug entity presents an unreasonable and substantial risk of illness or injury, and

(B) amendment of the monograph to include additional requirements or standards for drug products licensed under the monograph cannot reasonably be expected to eliminate or reduce the risk sufficiently to permit the Secretary to determine that the drug entity is safe.

(2) An order suspending a monograph shall become effective on the date specified in the order and shall remain in effect until completion of proceedings to determine whether the monograph should be revoked. The Secretary shall publish in the Federal Register notice of any order issued under paragraph (1) and shall also notify each licensee of a drug product licensed under the monograph of the order. If such an order is issued, proceedings under subsection (g) shall be initiated and completed on an expedited basis.

STANDARDS FOR PROVISIONAL ISSUANCE, AMENDMENT, SUSPENSION, AND REVOCATION OF DRUG MONOGRAPHS IN SPECIAL CIRCUMSTANCES

SEC. 110. (a) GENERAL REQUIREMENTS.—The Secretary shall, pursuant to the procedures set forth in section 111, provisionally issue a monograph for a drug entity under this section if the Secretary determines that—

(1) on the basis of the information submitted in the petition, the requirement described in subsection (a)(1) of section 109 for issuance of a monograph for the drug entity under that section cannot be met at the time the petition is filed with the Secretary;

(2) the petitioner for the monograph has shown that—

(A) the drug entity is intended to be used in the diagnosis, cure, mitigation, or treatment of a disease, injury, or other condition affecting the health of a human, or in the prevention of a disease or other condition (other than an injury) affecting the health of a human, which disease, injury, or condition is life threatening or is severely debilitating or disabling in a significant portion of the patient population affected by that disease, injury, or condition,

(B) with respect to such disease or injury—

(i) no other effective methods of diagnosis, cure, mitigation, treatment, or prevention (as the case may be) exists, or

(ii) the drug entity offers a major advantage to patients compared to the benefits offered by alternative methods of diagnosis, cure, mitigation, treatment, or prevention (as the case may be) because use of the drug entity will significantly reduce risks to health, or provide significantly greater effectiveness, or both, and

(C) the patient population affected by the disease, injury, or condition described in subparagraph (A) will not be adequately served by the registration under subpart 5 of a drug product containing the drug entity;

(3) the petitioner for the monograph has shown that the drug entity offers such an advantage in the diagnosis, cure, mitigation, treatment, or prevention of the disease, injury, or condition described in paragraph (2)(A) that delaying issuance of the monograph until completion of adequate and well-controlled clinical investigations would present significantly greater risks to patients affected by that disease, injury, or condition than would issuing the monograph without those investigations;

(4) the drug entity is effective, as described in subsection (b);

(5) the drug entity has been assessed for risks, as described in subsection (c);

(6) the monograph is subject to mandatory and other appropriate requirements, as described in subsection (d); and

(7) the drug entity is safe, as described in subsection (e).

(b) EFFECTIVENESS.—(1) The Secretary may provisionally issue a monograph under this section only if the Secretary determines that the petitioner for the monograph has shown by significant evidence that the drug entity described in the monograph is effective (as defined in section 109(b)(2)).

(2) As used in this subsection, the term "significant evidence" means evidence consisting of valid and meaningful scientific investigations, including investigations in animals and well-documented clinical experience and clinical investigations (unless such investigations are not feasible due to an absence of methodology or due to ethical proscriptions on such investigations), conducted by experts qualified by scientific training and experience to evaluate the effectiveness of the drug entity involved, on the basis of which it could fairly and responsibly be concluded by experts, qualified by scientific training and experience to evaluate the effectiveness of the drug entity involved, that the drug entity will have the effect represented in information labeling for drug products eligible to be licensed under the monograph.

(c) RISK ASSESSMENT.—The Secretary may provisionally issue a monograph under this section only if—

(1) the Secretary determines that the petitioner for the monograph has shown that the drug entity has been tested by all methods reasonably applicable and sufficient to detect and evaluate the risks of the drug entity; and

(2) the results of the testing of the drug entity by such methods have been reported to the Secretary in such form and manner as the Secretary has prescribed.

(d) REQUIREMENTS UNDER A MONOGRAPH.—(1) The Secretary may provisionally issue a monograph under this section only if the monograph contains the following requirements for drug products eligible to be licensed under the monograph:

(A) Such drug products shall be dispensed only by or upon the prescription of a practitioner.

(B) A person obtaining or holding a license for any such drug product shall be required to establish and maintain records and make reports regarding the manufacture, distribution, and clinical use and experience of the drug product.

(C) A person obtaining or holding a license for any such drug product shall be required to establish and maintain a system for collecting data and information on the use of and experience with the drug product.

(D) A person obtaining or holding a license for any such drug product shall be required to continue and complete adequate and well-controlled clinical investigations to provide substantial evidence for determining whether the drug entity in such drug products is ef-

fective, unless such investigations are not feasible due to an absence of methodology or due to ethical proscriptions on such investigations.

(2) The Secretary may include in the monograph any requirements or conditions authorized in section 108 if the requisite determinations are made.

(e) SAFETY.—The Secretary may provisionally issue a monograph under this section only if the Secretary determines that the petitioner for the monograph has shown that the drug entity is safe, as determined in accordance with section 109(e).

(f) AMENDMENTS.—(1) The Secretary shall amend a monograph under this section to include within (or to delete from) the monograph a type of dosage form of a drug product, or to change the strength of a type of dosage form of a drug product, if the Secretary makes (or, in the case of deletion, can no longer make) the determinations required in this section with respect to that dosage form or strength.

(2) The Secretary may amend a monograph under this section to add a standard or requirement, if the Secretary makes the relevant determination required under section 108 with respect to that standard or requirement.

(3) The Secretary may amend a monograph under this section to delete a standard or requirement (other than a requirement mandated under subsection (d)(1)), if the Secretary can no longer make the relevant determinations required under section 108 with respect to that standard or requirement.

(4) Amendments to monographs shall be made by orders issued and made effective in accordance with section 111, except that the Secretary may make an order proposing an amendment effective upon its publication in the Federal Register if the Secretary determines that unless such order is made so effective, the monograph would be suspended under subsection (i) pending completion of proceedings under subsection (h) to revoke the monograph. If such an order is made so effective, the Secretary shall (A) notify each licensee of a drug product licensed under the monograph of the terms of the amendment proposed by the order, and (B) initiate and complete proceedings under section 111 with respect to the order on an expedited basis. Upon completion of such proceedings, the Secretary shall affirm, modify, or revoke such order.

(g) EXPIRATION OF MONOGRAPH.—Approval of a monograph issued under this section shall expire three years following the date it becomes effective. Approval of a monograph may be renewed if the Secretary determines, pursuant to the procedures set forth in section 111, that the conditions and requirements for approval of a monograph under this section still exist. This determination shall be based upon all relevant information, including information obtained since the previous approval of the monograph.

(h) REVOCATION OF MONOGRAPH.—(1) The Secretary shall, pursuant to section 111, revoke a monograph issued under this section if the Secretary determines—

(A) that any of the standards or requirements under subsection (d) of this section are not being complied with;

(B) on the basis of new information, that the drug entity is no longer shown by significant evidence to be effective for the conditions of use set forth in information labeling for drug products eligible to be licensed under the monograph; or

(C) on the basis of new information, that the drug entity described in the monograph is no longer shown to be safe.

(i) SUSPENSION.—(1) The Secretary shall by order suspend a monograph under this section, pending completion of proceedings under subsection (h) to determine whether the monograph should be revoked, if the Secretary determines that proceedings should be commenced to revoke the monograph.

(2) An order suspending a monograph shall become effective on the date specified in the order and shall remain in effect until completion of the proceedings to determine whether the monograph should be revoked. The Secretary shall publish in the Federal Register notice of any order issued under paragraph (1) and shall also notify each licensee of a drug product licensed under the monograph. If such an order is issued, proceedings under subsection (h) shall be initiated and completed on an expedited basis.

PROCEDURES FOR ISSUING, AMENDING, AND REVOKING MONOGRAPHS

SEC. 111. (a) GENERAL STATEMENT OF PROCEDURE.—(1) Any person may submit for filing under subsection (b) a petition to the Secretary to issue, amend, or revoke under section 109 or 110 a monograph for a drug entity.

(2) If a petition is filed under subsection (b) to issue, amend, or revoke a monograph for a drug entity—

(A) the Secretary shall notify the public, in accordance with subsection (c)(1), of the filing;

(B) the petition shall be reviewed and evaluated by personnel of the Department in accordance with subsection (d) and such personnel shall prepare a report recommending action to be taken by the Secretary in response to the petition;

(C) the Secretary shall, in accordance with subsection (e), provide an opportunity for a public hearing and make available to the public the report referred to in subparagraph (B) prior to the hearing;

(D) a hearing requested shall be held within two hundred ten days of the date of filing, and opportunity shall be provided for the submission of additional written comments following such hearing;

(E) a drug science advisory committee shall prepare, in accordance with subsection (g), a recommendation for action by the Secretary and Department personnel shall review their recommendation to the Secretary in accordance with such subsection; and

(F) within three hundred sixty days of the date of the filing, the Secretary shall take the action prescribed by subsection (h).

(3) The Secretary may, on the Secretary's own initiative, amend or revoke a monograph for a drug entity. If the Secretary proposes to amend or revoke a monograph, the Secretary shall—

(A) notify the public, in accordance with subsection (e)(3), of his proposed action;

(B) provide an opportunity for a public hearing in accordance with subsection (f), to be commenced within ninety days of the date of the notice;

(C) provide opportunity for the submission of additional written comments on the action of the Secretary which was the subject of the hearing;

(D) have a drug science advisory committee prepare, in accordance with subsection (g), a recommendation on the action proposed by the Secretary; and

(E) within one hundred eighty days of the date of the notice take the action prescribed by subsection (h).

(b) PETITIONS REGARDING A MONOGRAPH.—(1) A petition to issue a monograph for a drug entity shall contain the following:

(A)(i) A description of the drug entity, which description meets the requirements of section 108(b).

(ii) Proposed requirements and guidelines for the contents of information labeling for drug products that would be licensed under the monograph.

(iii) If the petition proposes that the Secretary impose any requirement or standard described in subsection (e), (f)(2), (h)(2), (i), (j), (k), or (l) of section 108 information which is adequate to show the basis for the conclusion of the petitioner that such requirement should be imposed and a proposal for the text of such requirement (including guidelines, where applicable).

(iv) If the petition proposes that the requirement described in subsection (g)(2) of section 108 not be imposed, information which is adequate to show the basis for the conclusion of the petitioner that such requirement should not be imposed.

(B) Three reports (in such form as the Secretary shall prescribe) of evidence derived from all investigations that have been made to evaluate the effectiveness of the drug entity and to assess its risks, as follows:

(i) A report in summary form of (I) each such investigation, and (II) data and information from such investigations. Such summary shall be adequate to disclose the basis on which the petitioner concludes that the drug entity is effective and has been assessed for risks.

(ii) A report containing (I) a detailed description of each such investigation, (II) the protocols for each such investigation, and (III) tables, compilations, and analysis of all data and information obtained from each such investigation and relevant to the evaluation of the effectiveness of the drug entity and the assessment of its risks.

(iii) A full report of all data and information from each such investigation.

(C) If the petition is for the issuance of a monograph under section 110, data and information adequate to show the basis for the conclusion of the petitioner that the determinations required by paragraphs (2) and (3) of section 110(a) may be made by the Secretary.

(D) The basis for the conclusion of the petitioner that the drug entity is safe within the meaning of section 109(e).

(E) Any other data and information that the Secretary may request to determine whether the monograph should be issued.

(2) A petition to amend a monograph shall include (A) the text of the proposed amendment, and (B) information adequate to show the basis for the conclusion of the petitioner that the monograph as proposed to be amended should be issued under the applicable requirements of section 109 or 110. If evaluation of the proposed amendment requires the review of evidence not otherwise available from investigations to evaluate the effectiveness of the drug entity involved or to assess its risks, such evidence shall be submitted in accordance with paragraph (1)(B).

(3) A petition to revoke a monograph shall include information adequate to show the basis for the conclusion of the petitioner that the monograph should be revoked under the applicable requirements of section 109 of 110. If evaluation of the proposed revocation requires the review of evidence not otherwise available from investigations to evaluate the effectiveness of the drug entity involved or to assess its risks, such evidence shall be submitted in accordance with paragraph (1)(B).

(4) Not later than thirty days after the date a petition is received by the Secretary, the Secretary shall determine whether the petition meets the applicable requirements of paragraph (1), (2), or (3). If the Secretary determines that a petition meets such requirements, the Secretary shall file the petition. If the Secretary determines that it does not meet such requirements, the Secretary shall notify the petitioner in writing that the petition may not be filed and shall specify the grounds for that determination.

(c) NOTICE OF FILING OF PETITION.—The Secretary shall, by notice in the Federal Register, notify the public (1) of the filing of any petition under subsection (b) respecting a monograph for a drug entity, and (2) that the petition is available for public

inspection except for the reports in the petition described in clauses (ii) and (iii) of subsection (b)(1)(B) respecting the effectiveness of the drug entity and its risks. Such a notice shall be so published not later than fifteen days after the date of the filing of the petition involved.

(d) STAFF REVIEW AND RECOMMENDATION RESPECTING A PETITION.—(1) Upon the filing of a petition, the Secretary shall have officers and employees of the Department designated by the Secretary—

(A) conduct a review and evaluation of the petition, and

(B) prepare a report (i) of such review and evaluation, (ii) containing a statement of the issues presented by the petition, and (iii) containing a recommendation for action to be taken by the Secretary in response to the petition.

(2) The report described in this subsection shall be submitted to the Secretary either within one hundred and eighty days of its being filed or at least thirty days before the date of the hearing on the petition involved set under subsection (e), whichever is earlier.

(3) The Secretary shall take into account the extent to which the procedures used in any scientific investigation are consistent with a guideline issued, or advice given, under section 132.

(e) NOTICE OF HEARING ON PETITION, REPORT, AND INFORMATION; INITIATION OF PROCEEDINGS BY SECRETARY.—(1) With respect to any petition filed under subsection (b), the Secretary shall, by notice published in the Federal Register—

(A) provide opportunity for a public hearing to commence not later than two hundred ten days after the date of the filing of the petition,

(B) notify the public that the hearing shall be held on the statement of issues and recommendation contained in the report filed with respect to the petition under subsection (d)(1)(B) and on other relevant issues raised by the participants in the hearing.

(C) notify the public that the report prepared on the petition under subsection (d)(1)(B) will be available for inspection at least fifteen days before the date set for the hearing.

(2) The notice setting the date for a public hearing shall be published in the Federal Register at least ninety days before the date set for the hearing.

(3) If the Secretary proposes to amend or revoke a monograph for a drug entity, the Secretary shall publish in the Federal Register a notice (A) of the action proposed to be taken by the Secretary, (B) containing a summary of the basis for such action, (C) stating that a detailed statement of such basis is available for public inspection, and (D) provide opportunity for a public hearing on such proposed action which hearing shall be commenced not later than ninety days after the publication of such notice.

(f) HEARINGS; ADDITIONAL VIEWS.—(1) If a public hearing is held, it shall be conducted in accordance with section 173(c).

(2) Opportunity shall be provided for the submission of additional written views on the subject of a public hearing not later than thirty days after the completion of oral testimony in the public hearing.

(g) ADVISORY COMMITTEE AND STAFF RECOMMENDATIONS.—(1)(A) Upon completion of a hearing under subsection (f)(1), the Secretary shall submit to a drug science advisory committee appointed under section 178(a)—

(i) the petition or a detailed statement of the proposed action of the Secretary which was the subject of the hearing,

(ii) the report made on the petition under subsection (d)(1)(B) or the detailed statement of the basis for the proposed action of the Secretary referred to in the notice published under subsection (e)(3),

(iii) the record of the hearing and any views submitted under subsection (f)(2), and

(iv) the scientific determinations required to be made under sections 108, 109, and 110 before the action proposed by the petition or the Secretary may be taken.

(B) The advisory committee shall—

(i) advise the Secretary if the determinations submitted to it under clause (iv) of subparagraph (A) may be made,

(ii) advise the Secretary on other scientific matters related to the petition involved or action proposed by the Secretary,

(iii) prepare responses to other significant issues it determines were raised in the hearing, and

(iv) prepare a recommendation for action to be taken by the Secretary on the petition or on his proposed action.

(2) Personnel of the Department designated by the Secretary who, to the extent feasible, shall be the same personnel who prepared the report under subsection (d)(2) which was the subject of a hearing under subsection (f) shall upon completion of the hearing (A) review the record of the hearing and any additional views submitted on the subject of the hearing, (B) prepare responses to the significant issues they determine were raised in the hearing, and (C) make such revisions in their report as they deem appropriate.

(3) The actions required by paragraphs (1) and (2) shall be completed and submitted to the Secretary not later than sixty days after the date of the completion of the hearing with respect to which the actions were taken.

(h) ACTION BY THE SECRETARY.—Not later than one hundred twenty days after the completion of a hearing under subsection (f), the Secretary shall (1) by order take such action as the Secretary determines is appropriate or terminate the proceedings initiated upon the filing of the petition involved or by the Secretary, and (2) make available for public inspection submissions made to the Secretary under subsection (g) after the completion of the hearing.

(i) JUDICIAL REVIEW.—Any person may obtain review of a final order of the Secretary under this section issuing, amending, or revoking a monograph, or refusing to issue, amend, or revoke a monograph, may obtain review of that order pursuant to section 182. The commencement of proceedings under this subsection shall not, unless specifically ordered by the court to the contrary, operate as a stay of an order of the Secretary issuing, amending, or revoking a monograph.

(j) DISCLOSURE OF REPORTS CONTAINED IN A PETITION.—(1) This subsection governs the disclosure of reports of evidence which are derived from investigations made to evaluate the effectiveness of a drug entity and to assess its risks and which are included in a petition to issue or amend a monograph. Section 552 of title 5, United States Code, section 1905 of title 18, United States Code, and section 301(j) of the Federal Food, Drug, and Cosmetic Act do not apply to the disclosure of such reports in accordance with this subsection.

(2)(A) Upon the filing of a petition under subsection (b)(4), the report in the petition described in subsection (b)(1)(B)(i) shall be available to the public.

(B) Except as provided in paragraph (3), the reports in a petition described in clauses (ii) and (iii) of subsection (b)(1)(B) shall not be available to the public until the date the Secretary issues or amends the monograph with respect to which the petition was filed. On and after such date such reports (other than any matter in such reports which is described in section 552(b)(6) of title 5, United States Code) shall be available to the public.

(3) Upon the filing of a petition under subsection (b)(4), the reports in the petition described in clauses (ii) and (iii) of subsection (b)(1)(B) may be disclosed to, but not copied by, any person who demonstrates to the satisfaction of the Secretary that such person—

(A) seeks information in such reports solely for the purpose of participating in any public hearing held on the petition,

(B) will not use the information for commercial purposes,

(C) is not employed (directly or indirectly), by, and is not serving as the agent of or on behalf of, any person who would be able to use the information for commercial purposes,

(D) will take such security precautions respecting the taking and storage of notes on the information, and the further disclosure of the information obtained, until such time as the information becomes available to the public under paragraph (2), as the Secretary may by regulation prescribe, and

(E) is aware of the prohibitions and penalties under section 161(7) against further disclosure of the information and use of it for commercial purposes.

(k) APPENDICES TO MONOGRAPHS.—The Secretary shall issue guidelines as appendices to monographs without regard to the procedures set forth in this section or in section 553 of title 5 of the United States Code. The legal status of guidelines is defined in section 132(a)(2).

PROCEDURE FOR SUSPENDING MONOGRAPHS

SEC. 112. (a) PETITIONS.—A monograph for a drug entity may be suspended in accordance with section 109(h), and shall be suspended in accordance with section 110 (i), by an order of the Secretary issued on his own initiative or in response to a petition. Any person may submit a petition to the Secretary to suspend a monograph for a drug entity. Such a petition shall contain (1) information adequate to show the basis for the conclusion of the petitioner that the monograph should be suspended, and (2) if the petition seeks suspension of the monograph under section 109, information adequate to show the basis for the conclusion of the petitioner that the monograph should be revoked under such section.

(b) JUDICIAL REVIEW.—Any person may obtain review of an order of the Secretary under section 109 or 110 suspending a monograph pursuant to section 182. The commencement of proceedings under this section shall not, unless specifically ordered by the court to the contrary, operate as a stay of an order by the Secretary suspending a monograph.

Subpart 3—General Requirements for Drug Entities and Drug Products

REQUIREMENTS FOR REGISTRATION OF ESTABLISHMENTS IN WHICH DRUG ENTITIES AND DRUG PRODUCTS ARE MANUFACTURED OR DISTRIBUTED

SEC. 113. (a) ESTABLISHMENTS LOCATED IN THE UNITED STATES.—Except as provided in subsection (d), any person who manufactures, imports, exports, or distributes (or intends to manufacture, import, export, or distribute) drug entity or a drug product, in an establishment located in the United States shall register under this section each establishment at which the activity occurs or is to occur.

(b) ESTABLISHMENTS LOCATED OUTSIDE THE UNITED STATES.—Except as provided in subsection (d), any person who manufactures (or intends to manufacture) a drug entity or a drug product, in an establishment located in a country other than the United States, which drug entity or drug product is to be imported or offered for import into the United States, shall register under this section each establishment at which the activity occurs or is to occur. No establishment shall be registered under this subsection unless the Secretary determines that adequate and effective means are available, either by

the agreement of the applicant or by arrangement with the government of the country in which the establishment is located, to enable the Secretary to determine whether drug entities and drug products manufactured in the establishment, if imported or offered for import into the United States, should be refused admission on any of the grounds set forth in section 119.

(c) INFORMATION REQUIRED FOR REGISTRATION.—(1) The Secretary shall register an establishment under subsection (a), and under subsection (b) (except as provided in that subsection), upon the submission of the following information:

(A) The name of the person seeking to register the establishment. In the case of a person which is a corporation, the name of the jurisdiction of incorporation shall also be submitted.

(B) The address of the principal place of business of the person seeking to register the establishment.

(C) The address of each establishment which the person is required to register under subsection (a) or (b), including a brief description of the type of activity occurring at each establishment.

(D) A list of any drug entity that is being or is intended to be manufactured, imported, exported, or distributed. In the case of a registration required under subsection (b), the list is not required to include drug entities that are not imported or offered for import into the United States.

(2) The Secretary may require a person who has registered an establishment under this section to amend the information required for registration from time to time in order for the Secretary to maintain current records relating to registration.

(d) EXEMPTION FROM REGISTRATION.—The following establishments shall not be required to be registered under this section:

(1) A pharmacy which is licensed or registered under applicable laws regulating the practice of pharmacy and which compounds drug products solely in the course of filling and dispensing a prescription as part of the practice of pharmacy.

(2) An establishment at which nonprescription drug products are dispensed.

(3) An office or place of business of a practitioner at which drug products are compounded solely for dispensing in the course of professional practice.

(4) An establishment at which drug entities or drug products are manufactured, imported, exported, or distributed solely for use in preclinical research, teaching, or chemical analysis and not for use in humans.

(5) An establishment of a common or contract carrier at which drug entities or drug products are held or distributed on behalf of other persons in the usual course of business.

(6) Any other establishment or type of establishment that the Secretary may, by regulation, exempt from the application of this section upon a determination that registration is not necessary for the efficient implementation and enforcement of this title.

REQUIREMENTS REGARDING MANUFACTURING AND DISTRIBUTING PRACTICES

SEC. 114. (a) USE OF CURRENT GOOD PRACTICE.—The methods used in, and the facilities and controls used for, manufacturing, holding, and distributing a drug entity or a drug product shall conform to current good manufacturing practice, as prescribed in regulations promulgated by the Secretary, taking into consideration the competitive effects of such regulations (including competition among suppliers of machinery or materials that might be necessary in order to comply with such regulations), in order to assure that such entity or product will be safe, will have the identity, strength, and bioavailability, and will meet the quality, purity, and stability characteristics, required under this title.

(b) VARIANCES IN CURRENT GOOD PRACTICES.—(1) Any person subject to any requirement prescribed by regulations under subsection (a) may petition the Secretary for a variance from such requirement as applied to one or more specific drug entities or drug products. The petition shall be submitted either as part of an application for licensure for the drug product under subpart 4 or in such other form and manner, and shall contain such information, as the Secretary shall prescribe.

(2) The Secretary may approve a petition for a variance if the Secretary determines that the petitioner has demonstrated that—

(A) alternative methods, facilities, or controls proposed to be used by the petitioner for the drug entity or drug product are at least equal to those required under subsection (a) in assuring that such entity or product will be safe, will have the identity, strength, and bioavailability, and will meet the quality, purity, and stability characteristics, required under this title; or

(B) (i) the drug entity or drug product will be adversely affected, degraded, or rendered unstable in terms of its safety, identity, strength, quality, purity, stability, or bioavailability if manufactured, held, or distributed in accordance with the requirements of subsection (a), and

(ii) alternative methods, facilities, or controls proposed to be used by the petitioner for the drug entity or drug product are adequate to assure that such entity or product will be safe, will have the identity, strength, and bioavailability, and will meet the quality, purity, and stability characteristics, required under this title.

(c) PROHIBITED PRACTICES.—No drug entity or drug product shall be manufactured, held, or distributed under unsanitary conditions whereby it may be either contaminated with filth or rendered injurious to health.

REQUIREMENTS REGARDING COMPENDIAL STANDARDS OF IDENTITY, STRENGTH, QUALITY, PURITY, AND STABILITY

SEC. 115. (a) COMPLIANCE WITH COMPENDIAL STANDARDS.—If a drug entity, drug product, or in the case of a drug entity which is a combination of separate drug entities, any such separate drug entity, is recognized in the United States Pharmacopeia, such drug entity or drug product shall have the identity described in, and shall not differ in strength from, nor fail in terms of quality, purity, or stability to meet the standards set forth in, such compendium, except as provided in subsection (b). The determination as to identity strength, quality, purity, and stability shall be made in accordance with the tests or methods of assay prescribed in the compendium, except as provided in subsection (b).

(b) ALTERNATIVE OR ADDITIONAL STANDARDS.—(1) If the Secretary determines that the compendial standards, tests, or methods of assay described in subsection (a) are inadequate, incomplete, or inappropriate to determine and assure the identity, strength, quality, purity, and stability of the drug entity or drug product, the Secretary shall prescribe alternative or additional standards or tests or methods of assay to those in subsection (a).

(2) In approving applications for licenses under subpart 4, the Secretary may permit use of standards, tests, or methods of assay that differ from, but are adequate and appropriate as alternatives to, or have a sensitivity equal to or greater than, those prescribed in subsection (a) or (b)(1) as the basis for determining and assuring the identity, strength, quality, purity, or stability of the drug product, or the drug entity contained in the product (or the separate drug entities contained in the drug entity).

REQUIREMENTS REGARDING COMPONENTS OF DRUG ENTITIES AND DRUG PRODUCTS

SEC. 116. No drug entity or drug product shall contain any component which—

(1) is a filthy, putrid, decomposed, poisonous or deleterious substance;

(2) is not shown by the manufacturer of the drug entity or the licensee of a drug product containing the drug entity (A) to be safe and suitable for its intended purposes, or (B) not to interfere with the effectiveness of such drug entity or drug product;

(3) interferes with tests or methods of assay prescribed for the drug entity or drug product under the drug product license, under the applicable monograph, or under section 115; or

(4) if the component is recognized in the United States Pharmacopeia, fails to comply with the standards of identity, strength, quality, and purity set forth in such compendium.

REQUIREMENTS REGARDING PACKAGING AND CONTAINERS OF DRUG ENTITIES AND DRUG PRODUCTS

SEC. 117 (a) COMPLIANCE WITH COMPENDIAL STANDARDS AND SPECIFICATIONS.—If a drug entity, drug product, or in the case of a drug entity which is a combination of separate drug entities, any such separate drug entity is recognized in the United States Pharmacopeia, the packaging of such drug entity or drug product shall comply with the compendial standards and specifications for such packaging, except as provided in subsection (b).

(b) ALTERNATIVE OR ADDITIONAL STANDARDS.—If the Secretary determines that the compendial standards or specifications described in subsection (a) are inadequate, incomplete, or inappropriate to assure safe handling of the drug entity or drug product, to minimize deterioration, to prevent deception of purchasers or contamination of other drug entities or drug products, or otherwise to protect the public health, the Secretary shall prescribe alternative or additional packaging standards or specifications.

(c) PROHIBITED CONTAINERS.—No drug entity or drug product shall be packaged in a container which may render the contents injurious to health, or which is composed, in whole or in part, of any poisonous or deleterious substance which may render the contents injurious to health.

REQUIREMENTS REGARDING COLOR ADDITIVES

SEC. 118. No drug entity or drug product, except those covered by an export permit issued under subpart 6, shall contain a color additive which does not comply with section 706(a) of the Federal Food, Drug, and Cosmetic Act.

REQUIREMENTS REGARDING IMPORTATION OF DRUG ENTITIES AND DRUG PRODUCTS

SEC. 119. (a) GROUNDS FOR REFUSAL TO ADMIT INTO THE UNITED STATES.—Except as provided in subsection (c) of this section, a drug entity or drug product shall be refused admission into the United States if it appears, from the examination of samples or otherwise, that the drug entity or drug product—

(1) in the case of a drug entity, is required to have a monograph in effect under subpart 2 of this part and such a monograph is not in effect;

(2) in the case of a drug product, is required to be licensed under subpart 4 of this part and is not so licensed;

(3) in the case of a drug product, is required to be registered under subpart 5 of this part and is not so registered;

(4) was manufactured in an establishment which is required to be registered under section 113(b) and is not so registered;

(5) has been manufactured, held, or distributed under conditions that do not conform to the requirements of section 114; or

(6) fails to comply with any requirement under section 115, 116, 117, 118, 146, or 147.

(b) NONRELEASE PENDING DECISION ON ADMISSIBILITY.—(1) The Secretary may identify for the Secretary of the Treasury the name of any drug entity or drug product (whether licensed or not) that, if offered for import into the United States, should not be admitted until samples have been furnished to the Secretary for examination to determine whether admission shall be denied under subsection (a) of this section.

(2) The Secretary of the Treasury shall not release into the United States, pending a decision under subsection (d) on admissibility into the United States, any of the following when offered for import into the United States:

(A) Any drug product that is not accompanied by a certificate showing that—

(i) the drug product is licensed under subpart 4, or registered under subpart 5, of this part, and

(ii) the drug product was manufactured in an establishment registered under section 113(b).

(B) Any drug entity that is not accompanied by a certificate showing that a monograph is in effect for it under subpart 2 of this part and it was manufactured in an establishment registered under section 113(b).

(C) Any drug entity or drug product (whether licensed or not) that the Secretary has requested be sampled and examined before being admitted.

(3) If the Secertary of the Treasury does not release a drug entity or drug product under paragraph (2), he shall so notify the owner or consignee and the Secretary. In the event that the Secretary has requested that the drug entity or drug product be sampled, the Secretary of the Treasury shall also provide samples to the Secretary.

(c) RELEASE PENDING DECISION ON ADMISSIBILITY.—If the Secretary finds that a drug entity or drug product can be brought into compliance with this title or rendered other than a drug entity or drug product, a final determination regarding admissibility under subsection (d) may be deferred. Upon the timely filing by the owner or consignee of a written application to the Secretary, and the execution of a good and sufficient bond (as determined in accordance with regulations issued under section 177(c)) conditioned that the drug entity or drug product will not be distributed or disposed of contrary to any applicable law, the Secretary may authorize the Secretary of the Treasury to release the drug entity or drug product to the owner or consignee in order (as specified in the authorization) either to bring it into compliance with this title or to render it other than a drug entity or drug product. Any action pursuant to an authorization under this subsection shall be under the supervision of an officer or employee of the Department designated by the Secretary, or an officer or employee of the Department of the Treasury designated by the Secretary of the Treasury. Upon completion of any work to bring the drug entity or drug product into compliance with this title, the Secretary shall determine whether it shall be refused admission in accordance with subsection (d) of this section.

(d) DENIAL OF ADMISSION INTO THE UNITED STATES.—If, after any examination and after providing notice and an opportunity for an informal hearing under section 173 of this title to the owner or consignee, the Secretary determines that a drug entity or drug product shall be refused admission under subsection (a), the Secretary shall so notify the Secretary of the Treasury. The Secretary of the Treasury shall cause the destruction of any drug entity or drug product denied admission under this section, unless it is removed from the United States in lieu of destruction within ninety days of the date of the notice of denial, or within any additional time as may be established by the Secretary of the Treasury. Removal from the United States shall be permitted only upon a showing by the owner or consignee that all of the requirements of subpart 6 of this part are met.

(e) PAYMENT OF EXPENSES.—(1) All expenses of the United States in connection with a drug entity or drug product denied admission into the United States under this section, or permitted admission under subsection (c), shall be paid by the owner or consignee thereof.

(2) The expenses of the United States under this section shall include—

(A) expenses (including travel, per diem or subsistence. and salaries of officers or employees of the United States), the amount of which are to be determined in accordance with regulations issued under section 177 (c), in connection with—

(i) any supervison of actions authorized under subsection (c) of this section to bring the drug entity or drug product into compliance with this title, or to render it other than a drug entity or drug product; or

(ii) the destruction or removal from the United States of the drug entity or drug product pursuant to subsection (d) of this section; and

(B) expenses in connection with the storage, cartage, or labor with respect to the drug entity or drug product.

(3) In the event of a default of payment by an owner or consignee under this subsection, the amount owed (plus interest from the date of default) shall—

(A) constitute a lien against any future importations made by the owner or consignee, and

(B) be recoverable by the Attorney General by an action brought in any appropriate district court of the United States.

(f) JUDICIAL REVIEW.—The owner or consignee of any drug entity or drug product that is refused admission into the United States by a final order of the Secretary under subsection (d) may obtain review of that order pursuant to section 182.

Subpart 4—Licensure of Drug Products Under Monographs

GENERAL REQUIREMENTS

SEC. 120. (a) GENERAL REQUIREMENTS.—Any person who intends to manufacture a drug product, or to import a drug product into the United States, shall obtain from the Secretary a drug product license under this subpart before commencing manufacturing, distribution, or importation of the drug product.

(b) NONAPPLICABILITY.—The requirements of this subpart shall not apply to the manufacture, import, export, or distribution of a substance which the person manufacturing, importing, exporting, or distributing neither intends to be, nor has reason to know will be, used in a human or for dispensing for use in a human.

DRUG PRODUCTS ELIGIBLE FOR LICENSURE

SEC. 121. (a) GENERAL RULE ON ELIGIBILITY.—Subject to the restrictions set forth in subsection (b), the Secretary may issue a drug product license only if (1) a monograph for the drug entity contained in the drug product for which licensure is sought has been issued under subpart 2, and (2) that monograph includes in its description of the drug entity the dosage form and strength for such drug product.

(b) LIMITED ELIGIBILITY AFTER ISSUANCE OF MONOGRAPH.—Notwithstanding subsection (a), the Secretary shall not issue a drug product license under any monograph during a period of five years following the date on which the monograph first becomes effective unless—

(1) the person who petitioned for issuance of the monograph authorizes the Secretary in writing to issue the license to a particular applicant, or

(2) the applicant for the license provides data and information, including data and information from preclinical and clinical investigations, which, independently of the data and information submitted as part of the petition to issue the monograph, would be adequate to support a determination, under the criteria in subpart 2, that the monograph could be issued.

DRUG PRODUCT LICENSES

SEC. 122. (a) APPLICATION FOR LICENSURE.—Except as provided in subsection (b), an application for a drug product license shall contain the following information:

(1) The name and address of the applicant.

(2) The identity of the monograph under which the drug product is to be licensed.

(3) Each proprietary name, if any, under which the drug product will be distributed.

(4) The National Drug Code number of the product, if known at the time of application.

(5) The composition of the product, including the established name and quantity of the drug entity and all components contained in the drug product. If the drug entity is a combination of separate drug entities, the established name and quantity of each such separate drug entity shall be provided.

(6) The name, address, and registration number of the establishment or establishments in which the drug product will be manufactured.

(7) The name, address, and registration number of the establishment or establishments in which the drug entity contained in the drug product will be manufactured.

(8) Specimens of all identification and information labeling to be used for the drug product.

(b) EXPANDED APPLICATION FOR LICENSURE.—In the event that a monograph requires, under section 108(f)(2), that an application for licensure of a drug product under that monograph contain information in addition to that required by subsection (a), an expanded application for licensure shall be submitted, containing the information required under subsection (a) and under the monograph.

(c) STANDARDS FOR DENIAL OF LICENSURE.—The Secretary shall issue a drug product license under this section unless the Secretary determines that—

(1) the applicant failed to demonstrate that the drug product—

(A) is eligible for licensure under the monograph under which licensure is sought;

(B)(i) meets all applicable standards of identity, strength, quality, purity, and stability, prescribed by the monograph and under section 115, if any, or (ii) if no such standards are prescribed by the monograph or under section 115—

(I) is subject to adequate standards of identity, strength, quality, purity, and stability, as set forth in the application, or

(II) meets all such standards as set forth in the application; or

(C) complies with all applicable requirements regarding components, packaging, and containers, and color additives prescribed by the monograph and under sections 116 through 118;

(2) the applicant failed to demonstrate, with respect to labeling of the drug product, that—

(A) identification and information labeling complies with section 146;

(B) identification labeling complies with the requirements of section 147;

(C) patient information labeling either complies with section 151 or is not required under the monograph; or

(D) practitioner information labeling complies with section 154;

(3) any establishment in which the applicant intends the drug product or the

drug entity contained in the drug product to be manufactured—

(A) is not registered pursuant to section 113; or

(B) could not be inspected because the person responsible for the establishment refused to permit an inspection authorized by section 175;

(4) the applicant failed to demonstrate that the methods used in, and the facilities and controls used for, manufacturing, holding, or distributing the drug product, or any drug entity contained in the drug product, conform to the current good manufacturing practices for manufacturing, holding, or distributing of drug entities and drug products required under section 1114;

(5) the application fails to contain information required under subsection (a) or (b) or contains an untrue statement of material fact; or

(6) the drug product is otherwise in violation of this title.

(d) PROCEDURES FOR DENIAL OF LICENSURE.—(1) Except where an expanded application for licensure is required under subsection (b) or except as provided in paragraph (3), the Secretary shall notify the applicant, within thirty days following receipt of the application, if the Secretary determines that manufacture, distribution, or importation of the drug product should be delayed pending a determination whether the application should be denied. If such notice is not given within the thirty days, the drug product license shall be deemed to be issued.

(2) Except as provided in paragraph (3), where an expanded application for licensure is required by subsection (b) of this section, the Secretary shall notify the applicant, within one hundred fifty days following receipt of the application, if the Secretary determines that manufacture, distribution, or importation of the drug product should be delayed pending a determination whether the application should be denied.

(3) Where an application for licensure is submitted in conjunction with a petition to issue or amend a monograph under subpart 2, the Secretary shall notify the applicant, within sixty days following the effective date of an order issuing or amending the monograph, if the Secretary determines that manufacture, distribution, or importation of the drug product should be delayed pending a determination whether the application should be denied.

(4) If notice is given under paragraph (1), (2), or (3), the applicant shall not permit the drug product to be manufactured, distributed, or imported until a drug product license is issued by the Secretary. During a thirty-day period following issuance of the notice, the applicant shall have an opportunity to meet with appropriate officers and employees of the Department to discuss and, if possible, resolve any questions that prevented issuance of the drug product license initially. Within thirty days following the end of such thirty-day period (or at the end of such additional time as the applicant and the Secretary may agree upon), if the drug product license has not been issued, the Secretary shall review the application and either issue the license or commence formal proceedings to deny the license. Procedures for such proceedings are set forth in subpart 7.

(5) In the event that during the process described in paragraph (4) the applicant submits material not contained in the original application, the Secretary shall have a reasonable period of time, not exceeding the time permitted for review of the original application, to review such material in addition to the time periods provided in paragraph (4).

(e) REQUIREMENTS FOR CONTINUED LICENSURE.—As conditions to continued licensure of a drug product under this section, the licensee shall—

(1) comply with any requirements prescribed in the monograph under which the drug product is licensed;

(2) assure that the methods used (by or on behalf of the licensee) in, and the facilities and controls used (by or on behalf of the licensee) for, manufacturing, holding, or distributing the drug product, or the drug entity contained in the drug product, conform to—

(A) any which are set forth in the application for licensure, and

(B) the current good manufacturing practices required under section 114;

(3) assure that the drug product meets all applicable standards of identity, strength, quality, purity, and stability—

(A) set forth in the application for licensure.

(B) prescribed by the applicable monograph, and

(C) under section 115;

(4) assure that the drug product complies with all applicable requirements regarding components, color additives, and packaging and containers—

(A) set forth in the application for licensure,

(B) prescribed by the monograph, and

(C) under sections 116 through 118;

(5) assure that labeling of the drug product complies with all requirements under section 146;

(6) assure that identification labeling of the drug product complies with—

(A) the sample contained in the application for licensure, as amended, and

(B) the requirements under section 147;

(7) assure that patient information labeling of the drug product, if required under the monograph, complies with—

(A) the sample contained in the application for licensure, as amended, and

(B) the requirements under section 151;

(8) assure that practitioner information labeling of the drug product complies with—

(A) the sample contained in the application for licensure, as amended, and

(B) the requirements under section 154;

(9) in the case of prescription drug product, assure that promotion labeling of the drug product complies with all requirements under section 156;

(10) assure that promotional activity regarding the drug product, carried out by or on behalf of the licensee, complies with all requirements under sections 158, 159, and 160; and

(11) comply with any lawful order—

(A) regarding notification regarding risks of the drug product, issued under section 148;

(B) regarding corrective promotion labeling for the drug product, issued under section 157;

(C) regarding an administrative embargo of the drug product, issued under section 165(j); or

(D) regarding processing after importation of the drug product, issued under section 119(c).

(f) AMENDMENTS TO A DRUG PRODUCT LICENSE.—(1) Except as permitted by the Secretary in regulations, a license shall not alter or modify the composition of a drug product, its identification or information labeling, or any other aspect of the drug product or its manufacture that is subject to a condition of licensure, from that set forth in the approved application for licensure, unless the Secretary has approved an application to amend the drug product license regarding the change. The Secretary may, by regulation, permit alterations or modifications specified in those regulations to be made either without submission of an application to amend the drug product license, or upon submission of the application without prior approval (but subject to subsequent denial) of the application by the Secretary.

(2) On or before the effective date of any change in the conditions of licensure prescribed by an amendment to the monograph under which the drug product is licensed, a licensee for a drug product affected by the change shall—

(A) submit and obtain the Secretary's approval of an application for an amendment of the license regarding the change; or

(B) withdraw the drug product license for the drug product under subsection (j).

(3) An application for an amendment of a drug product license shall contain information to identify the drug product involved and to describe the proposed changes in the license. An application for amendment shall be processed in the same manner as an application for initial licensure.

(g) STANDARDS FOR REVOCATION OF A DRUG PRODUCT LICENSE.—The Secretary may revoke a drug product license if he determines any of the following:

(1) The licensee has failed to comply with one or more of the conditions for continued licensure of the drug product, set forth in subsection (e).

(2) Any of the following contained an untrue statement of material fact:

(A) The application for licensure of the drug product.

(B) Any application for amendment of the drug product license.

(C) Any report regarding the drug product submitted by the licensee pursuant to any requirement under this title.

(D) Any record regarding the drug product made by the licensee pursuant to any requirement under this title.

(3) If batch approval is required under the applicable monograph, the licensee has been unable to obtain approval of the Secretary for a substantial number of batches of the drug product during a period of time determined to be significant in light of the volume of the drug product submitted by the licensee.

(4) The drug product, or the drug entity contained in the drug product, is manufactured in an establishment that—

(A) is not registered under section 113; or

(B) could not be inspected because the person responsible for the establishment refused to permit an inspection authorized by section 175.

(5) The monograph under which the drug product is licensed is revoked under subpart 2.

(h) PROCEDURES FOR REVOCATION OF A DRUG PRODUCT LICENSE.—(1) Before formal proceedings are commenced to revoke a drug product license under this section, the Secretary may, in his discretion provide the licensee written notice of the possibility that the drug product license might be subject to revocation proceedings. The notice shall specify the matters that might justify the action and allow a reasonable period of time, as determined by the Secretary, for corrective action to be taken. If corrective action is taken to the satisfaction of the Secretary, no proceedings to revoke the drug product license shall be commenced based upon the matters specified in the notice to the licensee.

(2) Procedures for formal proceedings to revoke a drug product license are set forth in subpart 7, except that in the event that the Secretary revokes a monograph under subpart 2, the Secretary shall revoke the drug product license for each drug product licensed under that monograph at the same time an order revoking the monograph is issued, without regard to the procedures set forth in subpart 7.

(i) SUSPENSION OF A DRUG PRODUCT LICENSE.—(1) The Secretary may suspend a drug product license issued under this section, pending completion of formal proceed-

ings to determine whether the license should be revoked under subsection (g), if the Secretary determines that the action is necessary to reduce or eliminate an unreasonable and substantial risk of illness or injury.

(2) An order of suspension may be issued without regard to the procedures set forth in subpart 7, shall become effective on the date specified in the order, and shall remain in effect until completion of the proceedings to determine whether the license should be revoked or until the order of suspension is withdrawn by the Secretary.

(3) In the event the Secretary suspends a license under this subsection, proceedings to evoke the license shall be commenced under subsection (h) and completed on an expedited basis.

(j) WITHDRAWAL OF A DRUG PRODUCT LICENSE.—Any licensee under this section may at any time withdraw a drug product license.

Subpart 5—Investigational Use of Drug Products

OBJECTIVES IN REGULATING THE INVESTIGATIONAL USE OF DRUG PRODUCTS

SEC. 125. (a) GENERAL OBJECTIVES.—In regulating the investigational use of drug products in humans, the Secretary shall—

(1) protect the rights and health of humans who may participate in the investigation, and

(2) to the extent consistent with paragraph (1), avoid interfering with the discovery and development of new drug products intended to benefit and promote the public health, and to that end, facilitate the opportunities for scientific investigators in their pursuit of that objective.

(b) SPECIFIC OBJECTIVES IN DRUG DEVELOPMENT INVESTIGATIONS.—In regulating the investigational use of a drug product in humans for purposes of evaluating the effectiveness and assessing the risks of the drug entity contained in the drug product being investigated, or for purposes of obtaining data and information in support of a petition for a monograph under subpart 2 of this part or an application for a drug product license under subpart 4 of this part, the Secretary shall, in addition to subsection (a)—

(1) assure the quality, reliability, and validity of the scientific data and information obtained in the investigations, and

(2) to the extent consistent with his obligation to evaluate monograph petitions and license applications fairly and objectively, advise persons who conduct scientific investigations on the purposes, design, and conduct of investigations, and evaluate the results of these investigations, in order to minimize the potential for unnecessary investigations or delays in the process of drug development.

GENERAL REQUIREMENTS

SEC. 126. (a) GENERAL REQUIREMENTS.—(1) Any person who intends to conduct an investigation in which a drug product which is not licensed under subpart 4 will be dispensed to a human, shall obtain from the Secretary a registration for such investigation under this subpart before permitting the drug product to be dispensed in the course of such investigation. A registration issued under this subpart authorizes the dispensing of the drug product to humans only in the course of an investigation approved in such registration.

(2) Any person who intends to manufacture or distribute, or to import into the United States, a drug product which is not licensed under subpart 4, for purposes of conducting an investigation involving the drug product, shall obtain from the Secretary, or assure that the person to whom the drug product will be distributed has obtained from the Secretary, a registration for such investigation under this subpart, before commencing manufacture, distribution, or importation of the drug product for such purposes.

(3) Any practitioner who intends to dispense to a human a drug product which is not licensed under subpart 4, for purposes of conducting an investigation involving the drug product, shall obtain from the Secretary, or assure that the person from whom the drug product will be received has obtained from the Secretary, a registration for such investigation under this subpart, before commencing dispensing of the drug product in the course of such investigation.

(b) NONAPPLICABILITY.—The requirements of this subpart shall not apply to the manufacture, import, export, or distribution of a substance which the person manufacturing, importing, exporting, or distributing neither intends to be, nor has reason to know will be, used in a human or for dispensing to a human.

(c) APPLICABILITY TO FOREIGN CLINICAL INVESTIGATION AND TO NONCLINICAL INVESTIGATIONS.—The requirements of sections 130 and 131 shall apply to any foreign clinical investigations and to any nonclinical investigations that are submitted to the Secretary in support of a petition under subpart 2 of this part, an application for a drug product license under subpart 4 of this part, or an application for a registration under this subpart, to the extent the Secretary determines appropriate to fulfill the objectives of those sections and section 125.

REGISTRATION REQUIREMENTS FOR DRUG INNOVATION INVESTIGATIONS

SEC. 127. (a) DEFINITION.—The term "drug innovation investigation" refers to those investigations involving small numbers of human participants (in normal health or with the disease, injury, or condition under investigation) which are intended to examine the clinical pharmacology of a drug entity or drug product in humans, to assess preliminarily its risks and effectiveness, or to study, with the use of a drug product, biological mechanisms in humans.

(b) REQUIREMENT OF REGISTRATION.—Any person who intends to conduct a drug innovation investigation shall, before permitting the drug product to be dispensed to a human as part of the investigation, obtain from the Secretary in accordance with this section a registration for the drug product being investigated.

(c) APPLICATION FOR REGISTRATION.—Any application for registration under this section shall contain the following information:

(1) A description of the drug product, including the drug entity contained in the drug product, that is to be investigated.

(2) Reports of previous investigations and experience involving the drug entity, including preclinical investigations, clinical investigations, and clinical experience with drug products containing the drug entity.

(3) A description of and the protocol for the clinical investigation to be conducted under the registration, including the maximum number of humans to be included as participants, the criteria for participant selection, the estimated duration, and the names of the investigators, for the investigation.

(4) Such information as is necessary for the Secretary to determine whether the requirements in subsection (f) are or will be met.

(5) Any other information that is necessary for the Secretary to determine whether the application should be approved or denied under subsection (d) of this section.

(d) STANDARDS FOR DENIAL OF REGISTRATION.—The Secretary shall register a drug product under this section unless the Secretary determines that—

(1) the proposed investigation is not within the scope of a drug innovation investigation, as defined in subsection (a);

(2) the proposed investigation will not comply with the conditions required under subsection (f) for registration under this section;

(3) human participants would be subjected to an unreasonable and significant risk of illness or injury; or

(4) the application for registration fails to contain information required under subsection (c) or contains an untrue statement of material fact.

(e) PROCEDURES FOR DENIAL OF REGISTRATION.—(1) The Secretary shall notify the applicant, within thirty days following receipt of the application, if the Secretary determines that the investigation should be delayed pending a determination whether the application should be denied. If such notice is not given within the thirty days, the registration shall be deemed to be issued.

(2) If notice is given under paragraph (1), the applicant shall not permit the drug product to be dispensed to a human as part of the investigation until a registration is issued by the Secretary. During a thirty-day period following issuance of the notice, the applicant shall have an opportunity to meet with appropriate officers and employees of the Department to discuss and, if possible, resolve any questions that prevented issuance of the registration initially. Within fifteen days following the end of this thirty-day period (or at the end of such additional time as the applicant may request), if the registration has not been issued, the Secretary shall review the application and either issue the registration or hold a conference with the applicant to determine whether proceedings to deny the application should be commenced. If a conference is held, the Secretary shall, within fifteen days following the conference, either issue the registration or commence formal proceedings to deny the registration. Procedures for such proceedings are set forth in subpart 7.

(3) In the event that during the process described in paragraph (2) the applicant submits material not contained in the original application, the Secretary shall have a reasonable period of time, not exceeding thirty days, to review such material in addition to the time periods provided in paragraph (2).

(f) REQUIREMENTS FOR CONDUCT OF INVESTIGATIONS.—As conditions for registration of a drug product under this section, the registrant shall—

(1) distribute the drug product only to experts who are qualified by scientific training and experience to investigate the drug product or the nature of diseases, injuries, and other conditions in humans and who are named in the registration;

(2) require that the drug product not be dispensed to humans other than by, or under the supervision of, the investigators named in the registration;

(3) conduct the investigation in accordance with the protocol in the registration;

(4) establish and maintain records, and submit reports to the Secretary, regarding the investigation to enable the Secretary to determine whether the conditions of registration are being fulfilled;

(5) report to the Secretary (in accordance with regulations promulgated under this subpart) information regarding newly discovered risks of the drug product to enable the Secretary to determine whether human participants are being subjected to an unreasonable and significant risk of illness or injury;

(6) comply with the requirements of section 130; and

(7) not promote or commercialize the drug product.

(g) REVOCATION OF REGISTRATION.—(1) The Secretary shall revoke a registration under this section if he determines that—

(A) the registrant has failed to comply with the conditions of registration; or

(B) the human participants in the investigation are subject to unreasonable and significant risk of illness or injury.

(2) In revoking a registration under this subsection, the Secretary may provide for an orderly transition of participants in the investigation at the time of revocation to other methods of treatment if necessary to prevent illness or injury to such participants from immediate termination of the investigation.

(3) Procedures for the revocation of a registration of a drug product under this subsection are set forth in subpart 7. Informal procedures to resolve scientific conflicts are required under section 133.

(h) SUSPENSION OF REGISTRATION.—(1) The Secretary may suspend a registration issued under this section, pending completion of formal proceedings to determine whether the registration should be revoked under subsection (g), if he has reason to believe that the action is necessary to reduce or eliminate an unreasonable and significant risk of illness or injury to human participants in the investigation.

(2) An order of suspension may be issued without regard to the procedures set forth in subpart 7, shall become effective on the date specified in the order, and shall remain in effect until completion of the proceedings to determine whether the registration should be revoked or until the order of suspension is withdrawn by the Secretary.

(3) In suspending a registration under this subsection, the Secretary may provide for an orderly transition of participants in the investigation at the time of suspension to other methods of treatment, if necessary to prevent illness or injury to such participants from immediate termination of the investigation.

(4) In the event the Secretary suspends a registration under this subsection, proceedings to revoke the registration shall be commenced under subsection (g) and completed on an expedited basis.

(i) WITHDRAWAL OF REGISTRATION BY REGISTRANT.—Any registration for investigational use of a drug product under this section may at any time be withdrawn by the registrant.

REGISTRATION REQUIREMENTS FOR DRUG DEVELOPMENT INVESTIGATIONS

SEC. 128. (a) DEFINITION.—The term "drug development investigation" refers to those investigations involving human participants which are for the purpose of evaluating the effectiveness of a drug product and assessing its risks. This category of investigations is primarily intended for drug products for which petitions to issue or amend monographs are intended to be submitted under subpart 2.

(b) REQUIREMENT FOR REGISTRATION.—Any person who intends to conduct a drug development investigation shall, before permitting the drug product to be dispensed to a human as part of the investigation, obtain from the Secretary in accordance with this section a registration for the drug product being investigated. No requirement imposed by this section shall be interpreted to affect the continuation of any clinical investigation conducted in accordance with a registration issued under section 127.

(c) APPLICATION FOR REGISTRATION.—An application for registration under this section shall contain the following information:

(1) A description of the drug product, including the drug entity contained in the drug product, that is to be investigated.

(2) Reports of prior investigations and experience involving the drug entity, including preclinical investigations, clinical investigations (including investigations conducted under a registration for a drug innovation investigation, if any), and clinical experience with drug products containing the drug entity.

(3) A proposed overall plan for the development of the drug product, including, to the extent possible, descriptions and protocols of, and names of the investigators to be involved in, the investigations proposed to be conducted under the registration. Descriptions and protocols not submitted in the application shall be submitted in accordance with subsection (g).

(4) Such information as is necessary for the Secretary to determine whether the requirements in subsection (f) are or will be met.

(5) Any other information that is necessary for the Secretary to determine whether the application should be approved or denied under subsection (d) of this section.

(d) STANDARDS FOR DENIAL OF REGISTRATION.—The Secretary shall register a drug product under this section unless the Secretary determines that—

(1) the proposed investigations will not comply with the conditions required in subsection (f) for registration under this section;

(2) the human participants in the investigations would be subjected to an unreasonable and significant risk of illness or injury;

(3) the applicant has failed to demonstrate that the risks to the human participants in the proposed investigations are outweighed by the benefits to be derived from the investigations;

(4) the proposed plan for the development of the drug product is not adequate to meet its stated objectives;

(5) the proposed investigations are inadequate to meet their stated objectives; or

(6) the application for registration fails to contain information required under subsection (c) or contains an untrue statement of material fact.

(e) PROCEDURES FOR DENIAL OF REGISTRATION.—(1) The Secretary shall notify the applicant, within sixty days following receipt of the application, if the Secretary determines that the investigation should be delayed pending a determination whether the application should be denied. If such notice is not given within the sixty days, the registration shall be deemed to be issued.

(2) If notice is given under paragraph (1), the applicant shall not permit the drug product to be dispensed to a human as part of the investigation until a registration is issued by the Secretary. During a thirty-day period following issuance of the notice, the applicant shall have an opportunity to meet with appropriate officers and employees of the Department to discuss and, if possible, resolve any questions that prevented issuance of the registration initially. Within fifteen days following the end of this thirty-day period (or at the end of such additional time as the applicant may request), if the registration has not been issued, the Secretary shall review the application and either issue the registration or hold a conference with the applicant to determine whether proceedings to deny the application should be commenced. If a conference is held, the Secretary shall, within fifteen days following the conference, either issue the registration or commence formal proceedings to deny the registration. Procedures for such proceedings are set forth in subpart 7.

(3) In the event that during the process described in paragraph (2) the applicant submits material not contained in the original application, the Secretary shall have a reasonable period of time, not exceeding thirty days to review such material in addition to the time periods provided in paragraph (2).

(f) REQUIREMENTS FOR CONDUCT OF INVESTIGATIONS.—As conditions for registration of a drug product under this section, the registrant shall—

(1) distribute the drug product only to experts who are qualified by scientific training and experience to investigate the drug product or the nature of diseases, injuries, and other conditions in humans and who are named in the registration;

(2) require that the drug product not be dispensed to humans other than by, or under the supervision of, the investigators named in the registration;

(3) conduct the investigations in accordance with the protocols submitted under the registration;

(4) establish and maintain records, and submit reports to the Secretary, regarding the investigations to enable the Secretary—

(A) to determine whether the conditions of registration are being fulfilled;

(B) to review the progress and results of the ongoing and completed investigations;

(C) to review protocols for proposed new investigations; and

(D) to evaluate the risks and effectiveness of the drug product;

(5) report to the Secretary (in accordance with regulations prescribed by him) information regarding newly discovered risks of the drug product to enable the Secretary to determine whether the risks to human participants outweigh the benefits to be derived from the investigations;

(6) comply with the requirements of sections 130 and 131; and

(7) not promote or commercialize the drug product.

(g) NEW OR MODIFIED CLINICAL INVESTIGATIONS.—(1) The registrant may propose new clinical investigations or significant modifications of investigations commenced under the registration as amendments to the registration, in accordance with regulations issued by the Secretary, and shall submit protocols for such investigations, before permitting the drug product to be dispensed to a human as part of the new or modified investigation.

(2) The registrant shall not begin a proposed new investigation, or implement a proposed significant modification, for at least thirty days following receipt of the submission by the Secretary. The Secretary may direct the registrant not to implement, or to suspend implementation of, the proposed significant modification, or not to commence the proposed new investigation, if the Secretary determines that an initial application for registration under this section for the modified or proposed investigation would have been denied under subsection (d). In so doing, the Secretary shall follow the procedures for denial of registration set forth in subsection (e), except that if the Secretary does not notify the registrant within thirty days following receipt of the submission by the Secretary, the registrant may proceed to implement the modification or commence the new investigation.

(h) REVOCATION OF REGISTRATION.—(1) The Secretary shall revoke a registration of a drug product under this section if the Secretary determines that—

(A) the registrant has failed to comply with the conditions of registration;

(B) the risks to the human participants in the investigations are not outweighed by the benefits to be derived from the investigations; or

(C) the human participants in the investigation are subject to an unreasonable and significant risk of illness or injury.

(2) In revoking a registration under this subsection, the Secretary may provide for an orderly transition of participants in the investigation at the time of the revocation to other methods of treatment if necessary to prevent illness or injury to such participants from immediate termination of the investigation.

(3) Procedures for the revocation of a registration of a drug product under this subsection are set forth in subpart 7. Informal procedures to resolve scientific conflicts are required under section 133.

(l) SUSPENSION OF REGISTRATION.—(1) The Secretary may suspend a registration issued under this section, pending completion of formal proceedings to determine whether the registration should be revoked under subsection (h), if the Secretary has reason to believe that the action is necessary to reduce or eliminate an unreasonable risk of illness or injury to human participants in the investigations.

(2) An order of suspension may be issued without regard to the procedures set forth in subpart 7, shall become effective on the date specified in the order, and shall remain in effect until completion of the proceedings to determine whether the registration should be revoked or until the order of suspension is withdrawn by the Secretary.

(3) In suspending a registration under this subsection, the Secretary may provide for an orderly transition of participants in the investigation at the time of suspension to other methods of treatment, if necessary to prevent illness or injury to such participants from immediate termination of the investigation.

(4) In the event the Secretary suspends a registration under this subsection, proceedings to revoke the registration shall be commenced under subsection (h) and completed on an expedited basis.

(j) WITHDRAWAL OF REGISTRATION BY REGISTRANT.—Any registration for investigational use of a drug product under this section may at any time be withdrawn by the registrant.

REGISTRATION REQUIREMENTS FOR DRUG TREATMENT INVESTIGATIONS

SEC. 129 (a) DEFINITION.—The term "drug treatment investigation" refers to those investigations involving small numbers of human participants with a serious disease, injury, or condition who cannot be satisfactorily served by alternative methods of diagnosis, cure, mitigation, treatment, or prevention, which investigations are primarily intended to provide diagnosis, cure, mitigation, treatment, or prevention for such participants rather than to assess the risks and effectiveness of the drug product involved (although information relevant to such assessment may be derived during the investigations).

(b) REQUIREMENT OF REGISTRATION.—Any person who intends to conduct a drug treatment investigation shall, before permitting the drug product to be dispensed to a human as part of the investigation, obtain from the Secretary in accordance with this section a registration for the drug product being investigated.

(c) APPLICATION FOR REGISTRATION.—Any application for registration under this section shall contain the following information:

(1) A description of the drug product, including the drug entity contained in the drug product, that is to be investigated.

(2) Reports of previous investigations involving the drug entity, including preclinical investigations, and clinical investigations and experience with drug products containing the drug entity.

(3) A description of the investigation or investigations to be conducted under the registration, including the number of humans to be included as participants, the criteria for participant selection, and the names of the investigators, for each investigation.

(4) Such information as is necessary for the Secretary to determine whether the requirements in subsection (f) are or will be met.

(5) Any other information that is necessary for the Secretary to determine whether the application should be approved or denied under subsection (d) of this section.

(d) STANDARDS FOR DENIAL OF REGISTRATION.—The Secretary shall register a drug product under this section unless the Secretary determines that—

(1) the proposed clinical investigations are not within the scope of a drug treatment investigation, as defined in subsection (a);

(2) the proposed investigations will not comply with the conditions required in subsection (f) for registration under this section;

(3) human participants would be subject to an unreasonable and significant risk of illness or injury;

(4) the risks to the participants in the proposed clinical investigations are outweighed by the benefits to those participants to be derived from the investigations because the applicant has failed to demonstrate a reasonable probability that the participants will be satisfactorily treated by the drug product; or

(5) the application for registration fails to contain information required under subsection (c) or contains an untrue statement of material fact.

(e) PROCEDURES FOR DENIAL OF REGISTRATION.—(1) The Secretary shall notify the applicant, within thirty days following receipt of the application by the Secretary, if the Secretary determines that the investigation is to be delayed pending a determination whether the application should be denied. If such notice is not given within the thirty days, the registration shall be deemed to be issued.

(2) If notice is given under paragraph (1), the applicant shall not permit the drug product to be dispensed to a human as part of the investigation until a registration is issued by the Secretary. During a thirty-day period following issuance of the notice, the applicant shall have an opportunity to meet with appropriate officers and employees of the Department to discuss and, if possible, resolve any questions that prevented issuance of the registration initially. Within fifteen days following the end of this thirty-day period (or at the end of such additional time as the applicant may request), if the registration has not been issued, the Secretary shall review the application and either issue the registration or hold a conference with the applicant to determine whether proceedings to deny the application should be commenced. If a conference is held, the Secretary shall within thirty days following the conference, either issue the registration or commence formal proceedings to deny the registration. Procedures for such proceedings are set forth in subpart 7.

(3) In the event that during the process described in paragraph (2) the applicant submits material not contained in the original application, the Secretary shall have a reasonable period of time, not exceeding thirty days, to review such material in addition to the time periods provided in paragraph (2).

(f) REQUIREMENTS FOR CONDUCT OF INVESTIGATIONS.—As conditions for registration of a drug product under this section, the registrant shall—

(1) distribute the drug product only to individual physicians who have a limited number of patients with disease, injury, or other condition to be treated with the drug product and who are named in the registration;

(2) require that the drug product not be dispensed to humans other than by, or under the supervision of, the investigators named in the registration;

(3) conduct the investigations in accordance with the protocols in the registration;

(4) establish and maintain records, and submit reports to the Secretary, regarding the investigation to enable the Secretary to determine whether the conditions of registration are being fulfilled;

(5) report to the Secretary (in accordance with regulations prescribed by him) information regarding newly discovered risks of the drug product, or regarding the effectiveness of the drug product, to enable the Secretary to determine whether the risks to human participants continue to be outweighed by the benefits to those participants from the investigation;

(6) comply with the requirements of sections 130 and 131; and

(7) not promote or commercialize the drug product.

(g) REVOCATION OF REGISTRATION.—(1) The Secretary shall revoke a registration issued under this section if he determines that—

(A) the registrant has failed to comply with the conditions of registrations; or

(B) the risks to human participants in the investigation are not outweighed by the benefits to those participants from the investigation.

(2) In revoking a registration under this subsection, the Secretary may provide for a continued investigation involving participants in the investigation at the time of revocation if necessary to prevent illness or injury to such participants from immediate termination of the investigation.

(3) Procedures for the revocation of a registration of a drug product under this subsection are set forth in subpart 7. Informal procedures to resolve scientific conflicts are set forth in section 133.

(h) SUSPENSION OF REGISTRATION.—(1) The Secretary may suspend a registration issued under this section, pending completion of formal proceedings to determine whether the registration should be revoked under subsection (g), if the Secretary has reason to believe that the action is necessary to reduce or eliminate an unreasonable and significant risk of illness or injury to human participants in the investigations.

(2) An order of suspension may be issued without regard to the procedures set forth in subpart 7, shall become effective on the date specified in the order, and shall remain in effect until completion of the proceedings to determine whether the registration should be revoked or until the order of suspension is withdrawn by the Secretary.

(3) In suspending a registration under this subsection, the Secretary may provide for an orderly transition of participants in the investigation at the time of suspension to other methods of treatment, if necessary to prevent illness or injury to such participants from immediate termination of the investigation.

(4) In the event the Secretary suspends a registration under this subsection, proceedings to revoke the registration shall be commenced under subsection (g) and completed on an expedited basis.

(i) WITHDRAWAL OF REGISTRATION BY REGISTRANT.—Any registration for investigational use of a drug product under this section may at any time be withdrawn by the registrant.

REQUIREMENTS FOR PROTECTION OF PARTICIPANTS IN DRUG INVESTIGATIONS

SEC. 130. (a) INFORMED CONSENT.—(1) As a condition of registration of a drug product under section 127, 128, or 129, and as a part of any investigation required under a drug monograph approved under subpart 2, the Secretary shall require that except where not feasible (as determined in accordance with paragraph (2)), informed consent shall be obtained from each human participant (or the participant's legal representative) to whom a drug product is dispensed for investigational purposes and from each human who participates in the investigation as a control.

(2)(A) The obtaining of informed consent shall be deemed to be feasible unless, before use of the drug product (except as provided in subparagraph (B)), the investigator conducting or supervising the investigation and a practitioner who is not otherwise participating in the investigation both determine in writing that—

(i) the participant is confronted by a life threatening situation necessitating the use of the drug product; and

(ii) informed consent cannot be obtained from the participant; and

(iii) time is not sufficient to obtain consent from the legal representative of the participant.

(B) In the event that immediate use of the drug product is, in the opinion of the investigator, required to preserve the life of the participant, and time is not sufficient to obtain the independent determination in advance of using the drug product, the determinations of the investigator shall subsequently be reviewed and evaluated in writing by a practitioner who is not participating in the investigation.

(b) INSTITUTIONAL REVIEW.—The Secretary shall by regulation prescribe the conditions under which investigations conducted under section 127, 128, or 129, or required under a drug monograph approved under subpart 2, shall be reviewed by appropriate institutional review boards that comply with such regulations.

(c) PRIVACY.—As a condition of registration of a drug product under section 127, 128, or 129, and as part of any investigation required under a drug monograph approved under subpart 2, the Secretary shall require that the privacy of human participants, including the confidentiality of records regarding those participants, be protected.

(d) AUTHORITY TO ASSURE FURTHER PROTECTIONS.—The Secretary may by regulation prescribe such further requirements as the Secretary determines are appropriate to protect the health and rights of human participants on investigations conducted or submitted to the Secretary under section 127, 128, or 129, submitted to the Secretary under subpart 4, or conduct under a monograph approved under subpart 2.

STANDARDS FOR SCIENTIFIC VALIDITY OF INVESTIGATIONS

SEC. 131. The Secretary may prescribe regulations to assure that any scientific investigation (including a preclinical investigation but not including an investigation conducted under a registration under section 127) that is submitted to the Secretary under this title is conducted in a manner that assures the quality, reliability, and validity of the results of the investigation. In prescribing such regulations, the Secretary shall take into consideration the current standards and practices among persons sponsoring or conducting such scientific investigations.

GUIDELINES AND DRUG DEVELOPMENT ADVICE

SEC. 132. (a) GUIDELINES.—(1) The Secretary may issue written guidelines regarding protocols and methods for conducting investigations that are conducted under this subpart or that are intended or required to be submitted to the Secretary under this title.

(2)(A) Written guidelines issued under this subsection shall represent the formal position of the Secretary on the matters provided for in the guidelines. Except as provided in subparagraph (B), the Secretary is obligated to adhere to that position until it is amended or revoked. A person may rely on a written guideline with assurance that the procedures or standards described in it are acceptable to the Secretary. A person is not required to follow those procedures and standards and may, without consulting the Secretary, choose to use different procedures or standards, subject to evaluation by the Secretary of the quality, reliability, and validity of the investigation. A guideline on an investigational procedure indicates that the procedure is scientifically valid, if properly conducted, but does not indicate approval of the drug entity or drug product tested.

(B) The Secretary may amend or revoke a written guideline issued under this subsection at any time in light of new information or upon a reevaluation of the information available at the time the guideline was issued. Action undertaken or completed in conformity with a guideline which has been subsequently amended or revoked shall remain acceptable to the Secretary unless the Secretary determines that such acceptance would be inconsistent with the requirements of this title. The Secretary shall issue any amendment or revocation under this paragraph in writing and shall provide prompt and adequate notice of the change to persons who may be relying on the guideline being changed.

(b) DRUG DEVELOPMENT ADVICE.—Any person who is conducting or intends to conduct clinical investigations under section 128 may request that the Secretary provide advice regarding the development of the drug product being investigated. The Secretary may, in response to such a request and in the Secretary's discretion, review at appropriate times and advise in writing upon one or more of the following:

(1) The overall plan for investigating the drug product.

(2) Specific protocols for investigations of the drug product.

(3) The results of completed investigations.

(4) The potential acceptability of information that may be submitted in a petition to issue a monograph under subpart 2, or in an application for licensure of a drug product under subpart 4.

INFORMAL PROCEDURES FOR RESOLUTION OF SCIENTIFIC DISAGREEMENTS

SEC. 133. The Secretary shall establish informal and expeditious procedures for the review and, if possible, resolution of disagreements over the design or conduct of an investigation involving a drug product under section 127, 128, or 129. These procedures shall not be in lieu of the formal procedures provided in subpart 7, but shall provide persons undertaking drug investigations an opportunity to confer with the Department on matters affecting their activities without the necessity of resorting to those procedures.

Subpart 6—Export of Drug Entities and Drug Products

GENERAL REQUIREMENTS

SEC. 134. (a) DRUG ENTITIES SUBJECT TO MONOGRAPHS.—A drug entity which is subject to a monograph issued under subpart 2 may be exported without a permit under this subpart if all of the requirements and conditions of such monograph and of subpart 3 applicable to the drug entity are met.

(b) LICENSED DRUG PRODUCTS.—A drug product which is licensed under subpart 4 may be exported without a permit under this subpart if all of the requirements and conditions of such license are met, except that labeling required under this title may be translated into the language specified by the foreign purchaser or consignee.

(c) UNLICENSED DRUG PRODUCTS AND DRUG ENTITIES NOT SUBJECT TO MONOGRAPHS.—Any person who intends to manufacture or distribute a drug entity or a drug product which is not described in subsection (a) or (b), for the purpose of export from the United States to any country, shall obtain from the Secretary under this subpart a permit to export the drug entity or drug product to that country, before such export may occur.

EXPORT PERMITS

SEC. 135. (a) APPLICATION FOR PERMIT.—An application for an export permit shall contain the following information:

(1) The name and address of the applicant.

(2) A description of the drug product or drug entity.

(3) The name, address, and registration number of each establishment in which the drug product, if any, will be manufactured.

(4) The name, address, and registration number of each establishment in which the drug entity will be manufactured.

(5) The country of destination of the export.

(6) Evidence that the drug product or drug entity accords to the specifications of the foreign purchaser or consignee.

(7) Samples of the identification labeling for shipping conainers, which shall clearly state that the contents are intended only for export from the United States.

(8) Certification from the government of the country of destination that it has been informed of the legal status of the drug entity or drug product in the United States and that it does not disapprove of the importation and distribution of the drug entity or drug product.

(9) Information whether the drug product, or a drug product containing the drug entity, is or has been registered under subpart 5.

(b) STANDARDS FOR DENIAL OF PERTMIT.—The Secretary shall issue an export permit unless the Secretary determines that—

(1) the drug entity or drug product does not accord to the specifications of the foreign purchaser or consignee;

(2) the identification labeling for shipping containers of the drug entity or drug product does not clearly state that the contents are intended only for export from the United States;

(3) the applicant has failed to provide the certification of the government of the country of destination that, after having been informed of the legal status of the drug entity or drug product in the United States, it does not disapprove of the importation and distribution of the drug entity or drug product;

(4) based on the evidence available to the Secretary, the export of the drug entity or drug product is contrary to the public health; or

(5) the application for the permit contains an untrue statement of material fact.

(c) PROCEDURES FOR DENIAL OF PERMIT.—(1) The Secretary shall notify the applicant, within thirty days following receipt of the application if the Secretary determines that the export should be delayed pending a determination whether the application should be denied. If such notice is not given within the thirty days, the permit shall be deemed to be issued.

(2) If notice is given under paragraph (1), the applicant shall not export the drug product or drug entity until a permit is issued by the Secretary. Within thirty days following the notice under paragraph (1), the Secretary shall either issue the permit or commence formal proceedings to deny the permit.

(d) REQUIREMENTS FOR EXPORTS.—As conditions for an export permit under this section, the permit holder shall—

(1) assure that the drug product or drug entity is manufactured, repacked, relabeled, distributed, and held in accordance with sections 114, 115, 116, 117, 146, and 147 of this title;

(2) assure that the drug product reaches the country of destination identified in the permit and that the drug product is not distributed (except for export) or dispensed in the United States; and

(3) establish and maintain records, and submit to the Secretary reports, to enable the Secretary to determine whether the conditions of the permit are being met.

(e) REVOCATION OF PERMIT.—(1) The Secretary shall revoke an export permit issued under this section if the Secretary determines that—

(A) the permit holder has failed to comply with the conditions of the permit;

(B) the government of the country of destination has disapproved the importation and distribution of the drug product or drug entity within its country;

(C) the continued export of the drug product or drug entity is contrary to the public health; or

(D) the application for the permit, or any report submitted regarding the exports, contained an untrue statement of material fact.

(2) Procedures for the revocation of an export permit under this section are set forth in subpart 7.

(f) SUSPENSION OF PERMIT.—(1) The Secretary may suspend an export permit issued under this section, pending completion of formal proceedings to determine whether the permit should be revoked under subsection (e), if the Secretary determines that the action is necessary to reduce or eliminate an unreasonable and substantial risk of illness or injury.

(2) An order of suspension may be issued without regard to the procedures set forth in subpart 7, shall become effective on the date specified in the order, and shall remain in effect until completion of the proceedings to determine whether the permit should be revoked or until the order of suspension is withdrawn by the Secretary.

(3) In the event the Secretary suspends a permit under this subsection, proceedings to revoke the permit shall be commenced under subsection (e) and completed on an expedited basis.

(g) WITHDRAWAL OF PERMIT.—Any permit holder under this section may at any time withdraw an export permit.

COOPERATION WITH FOREIGN GOVERNMENTS AND INTERNATIONAL ORGANIZATIONS

SEC. 136. The Secretary, in consultation with the Secretary of State, may arrange for the exchange of information with health officials of foreign governments and international organizations concerning drug entities and drug products and the manufacture, distribution, investigation and use of drug entities and drug products. The Secretary may also provide for the training, either within the United States or abroad (including payment of the costs of travel and per diem), of officers or employees of foreign governments, to enable those officers or employees to carry out any function under section 135, related to the consideration by their governments of the importation of drug entities and drug products from the United States.

Subpart 7—Formal Proceedings for Denial and Revocation of Licenses, Registrations, and Export Permits for Drug Products

APPLICABILITY OF SUBPART

SEC. 140. The procedures in this subpart govern formal proceedings for the denial or revocation of a drug product license under subpart 4, a registration for investigational use of a drug product under subpart 5, and an export permit for a drug product under subpart 6.

INITIATION OF PROCEEDINGS

SEC. 141. (a) DENIAL OF APPLICATION.—The Secretary shall commence formal proceedings to deny an application for a drug product license under section 122, or to deny an application for registration for investigational use of a drug product under section 127, 128, or 129, or to deny an application for an export permit under section 135, by serving upon the applicant within the time specified by the relevant section an order to show cause why the application should not be denied.

(b) REVOCATION.—The Secretary shall commence formal proceeding to revoke a drug product license under section 122, or to revoke a registration for investigational use of a drug product under section 127, 128, or 129, or to revoke an export permit under section 135, by serving upon the licensee, registrant, or permit holder an order to show cause why the license, registration, or permit should not be revoked.

(c) CONTENTS OF AN ORDER TO SHOW CAUSE.—An order to show cause under this section shall contain a statement of the factual and legal basis for the proposed denial or revocation under this section and shall call upon the person upon whom it is served to appear before the Secretary at a time and place stated in the order, which shall not be less than thirty days after the date of receipt of the order unless a shorter period of time is agreed upon by the Secretary and the person receiving the order.

CONDUCT OF FORMAL PROCEEDINGS

SEC. 142. Formal proceedings to deny or revoke a drug product license, a registration for investigational use of a drug product, or an export permit for a drug product, shall be conducted in accordance with the adjudication procedures of section 554 of title 5 of the United States Code.

JUDICIAL REVIEW

SEC. 143. Any person whose application is denied, or whose drug product license, registration for investigational use of a drug product, or export permit is revoked or suspended by an order of the Secretary under section 122, 127, 128, 129, or 135 may obtain review of that order pursuant to section 182. The commencement of proceedings under this section shall not, unless specifically ordered by the court to the contrary, operate as a stay of an order by the Secretary revoking or suspending a drug product license, registration, or export percent.

Subpart 8—Homeopathic Drug Entities and Drug Products

GENERAL REQUIREMENTS

SEC. 144. (a) GENERAL REQUIREMENTS.—Any person who intends to manufacture, or to import into the United States, a homeopathic drug entity or homeopathic drug product shall comply with the requirements set forth in subpart 3 and in this subpart with respect to such drug entity or drug product.

(b) EXEMPTION FROM OTHER REQUIREMENTS.—Except as provided in subsection (c), any drug entity or drug product which is manufactured, imported, exported, and distributed in compliance with the requirements set forth in subpart 3 and in this subpart, and any person so manufacturing, importing, exporting, or distributing such entity or product in such compliance, shall be exempt from the requirements of subparts 1, 2, 4, 5, and 6 of this part and from subparts 2 and 3 of part C.

(c) REVOCATION OF EXEMPTION FROM OTHER REQUIREMENTS.—The Secretary may, by regulation, revoke the exemption provided in subsection (b) for a homeopathic drug entity or homeopathic drug product, and thereafter require that such entity or product meet the requirements of subpart 1, 2, 4, 5, or 6 of this part or subpart 2 or 3 of part C, if the Secretary determines that the homeopathic drug entity or homeopathic drug product presents a risk of illness or injury to persons using such drug entity or drug product, either from adverse effects or as a result of a lack of effectiveness.

HOMEOPATHIC DRUG ENTITIES AND DRUG PRODUCTS

SEC. 145. (a) DEFINITION.—A "homeopathic drug entity" or "homeopathic drug product" means a drug entity or drug product which was recognized in the official Homeopathic Pharmacopeia on the date of enactment of this title, or any combination thereof, which is in compliance with the requirements of subsection (b).

(b) REQUIREMENTS APPLICABLE TO HOMEOPATHIC DRUG ENTITIES AND HOMEOPATHIC DRUG PRODUCTS.—Any drug entity or drug product that is represented to be a homeopathic drug entity or homeopathic drug product shall—

(1) be manufactured, imported, exported, or distributed only in establishments registered in accordance with section 113;

(2) comply with all applicable requirements under section 114 through 119;

(3) meet the standards and specifications set forth for such drug entity or drug product in the official Homeopathic Pharmacopeia as of the date of enactment of this title;

(4) take the form of—

(A) a tincture, aqueous solution or first trituration to be diluted or compounded by a homeopathic practitioner or homeopathic pharmacist as an incident to preparing the homeopathic drug entity or drug product for dispensing to a patient;

(B) a subsequent serial dilution of such tincture, aqueous solution, or first trituration in a hydroalcoholic solution (containing ethyl alcohol) and/or lactose, each stage of dilution being accompanied by succussion and (if lactose is the vehicle) trituration; or

(C) in a finished dosage form capable of being dispensed to a patient, consisting of not more than one-tenth of 1 per centum of the tincture, aqueous solution, or first trituration and not less than 99.9 per centum of the vehicle (hydroalcoholic solution of lactose), or as otherwise specified in the Homeopathic Pharmacopeia; and

(5) bears identification labeling containing the word "homeopathic" together with one of the following words: drug, medicine, tablet, dilution, trituration, ointment, tincture, potency, or attenuation.

PART C—DRUG INFORMATION, LABELING, PROMOTION, AND EDUCATION

Subpart 1—General Provisions

GENERAL REQUIREMENTS FOR ALL LABELING

SEC. 146. (a) GENERAL REQUIREMENT.—Each drug entity and drug product shall bear identification labeling in compliance with this section and section 147. Each drug product shall be accompanied by information labeling in compliance with the applicable requirements of sections 151 and 154.

(b) IDENTIFICATION OF DRUG ENTITIES.—(1) All labeling for a drug entity or a drug product shall state, to the exclusion of any other nonproprietary name (except the applicable systematic chemical name or the chemical formula), the established name, if any, of the drug entity. If the drug entity is a combination of separate drug entities, the established name, if any, of each such separate drug entity shall also be stated.

(2) The statement of all established names shall be printed prominently and, in the case of a prescription drug product, in type at least as large as that used for any proprietary name of the drug product.

(c) QUANTITY OF DRUG ENTITY IN A DRUG PRODUCT.—All labeling for a drug product shall state the quantity or concentration of the drug entity contained in the drug product. If the drug entity is a combination of separate drug entities, the quantity or concentration of each such separate drug entity shall also be stated.

(d) IDENTIFICATION OF CERTAIN COMPONENTS.—The Secretary may require that some or all of the labeling for a drug entity or drug product state the name of any component that is contained in the drug entity or drug product if the Secretary determines that the presence of the component in the drug entity or drug product should be disclosed in order to reduce or eliminate the risk of an adverse effect to patients from the component.

(e) STATUS AS PRESCRIPTION DRUG PRODUCT.—All labeling for a prescription drug product shall state that Federal law prohibits dispensing the drug product without a prescription.

(f) PROMINENCE OF REQUIRED STATEMENTS.—Any word, statement, or other information

required under this title to appear on identification labeling, information labeling, or promotion labeling for a drug product shall be prominently placed on the labeling conspicuously (compared with other words, statements, designs, or graphic matter in the labeling) and in terms that render it likely to be read and understood by the ordinary individual who would reasonably be expected to see the labeling.

(g) PROHIBITION OF FALSE OR MISLEADING STATEMENTS.—Labeling shall not be false or misleading in any particular, nor contain an untrue statement of material fact. In determining whether specific labeling is misleading, account shall be taken not only of representations made or suggested in the labeling but also of the extent to which the labeling fails to reveal facts material in light of these representations or material with respect to consequences which may result from the use of a drug entity or drug product under the conditions of use set forth in the information labeling for the drug product or drug product containing the drug entity.

(h) EXEMPTIONS.—(1) A prescription drug product dispensed with identification labeling in compliance with the requirements of section 152 shall be exempt from the requirements of this section (except subsection (g)) and section 147.

(2) The Secretary may exempt, in a monograph or by regulation, certain labeling from the requirements from this section or section 147 if the Secretary finds that compliance is impracticable.

REQUIREMENTS FOR IDENTIFICATION LABELING FOR A DRUG ENTITY OR DRUG PRODUCT

SEC. 147. (a) IDENTIFICATION OF LICENSEE, REGISTRANT, PERMITTEE, AND MANUFACTURER.—(1) Identification labeling for—

(A) a drug entity shall identify (and state the place of business of) the person who manufactured, imported, or distributed the drug entity;

(B) a licensed drug product shall identify (and state the place of business of) the person who holds a license issued under subpart 4 of part B for the drug product;

(C) a registered drug product shall identify (and state the place of business of) the person who holds a registration issued under subpart 5 of part B for the drug product; and

(D) a permitted drug product shall identify (and state the place of business of) the person who holds an export permit issued under subpart 6 of part B for the drug product.

(2) If a person identified under paragraph (1) in identification labeling for a drug product is also the manufacturer of the drug product, such labeling shall state that fact. If a person identified under paragraph (1) in identification labeling for a drug product is not the manufacturer of the drug product, the identification shall also identify (and the place of business of) the manufacturer.

(b) STATEMENT OF CONTENTS.—Identification labeling for a drug entity or drug product shall provide an accurate statement of the quantity of the contents of the container of the drug entity or drug product in terms of weight, measure, or numerical count.

(c) STORAGE INSTRUCTIONS.—Identification labeling for a drug entity or drug product shall describe any necessary or desirable procedures or precautions regarding the storage and handling of the drug entity or drug product to prevent its deterioration.

(d) EXPIRATION DATE.—Identification labeling for a drug entity or drug product shall provide an expiration date, based upon scientifically valid stability studies appropriate to any storage conditions stated in the identification labeling, beyond which the drug entity or drug product should not be presumed to meet the applicable standards of identity, strength, quality, or purity, or for assuring the bioavailability.

(e) CONTROL NUMBER.—Identification labeling for a drug entity or drug product shall contain a distinctive combination of letters, numbers, or symbols which identifies the lot or batch in which the drug entity or drug product was manufactured.

(f) COMPLIANCE WITH COMPENDIAL STANDARDS.—If a drug entity, drug product, or in the case of a drug entity which is a combination of separate drug entities any such separate entity, is recognized in the United States Pharmacopeia, the identification labeling of the drug entity or drug product shall comply with any compendial requirements regarding information to be contained in such labeling.

NOTIFICATION REGARDING RISKS

SEC. 148. (a) AUTHORITY.—The Secretary may issue any order necessary to assure that adequate notification regarding a risk posed by a drug product is provided to all practitioners and pharmacists who prescribe or dispense the drug product, and to all other persons (including manufacturers, importers, distributors, retailers, and patients) who should properly receive the notification in order to eliminate or reduce the risk, if the Secretary determines that—

(1) the drug product presents a substantial risk of illness or injury,

(2) notification under this section is necessary to eliminate or reduce the risk, and

(3) no more practicable means is available under other provisions of this title to eliminate or reduce the risk.

(b) FORM OF NOTIFICATION.—An order under this section shall require that notification be provided in an appropriate form by the persons and means best suited under the circumstances involved.

(c) PERSONS TO BE NOTIFIED.—An order under this section shall require that the individuals subject to the risk with respect to which the order is issued be included among the persons to be notified of the risk, unless the Secretary determines that notification to these individuals would present a greater danger to the health of the individuals than would no notification.

(d) CONSULTATIONS PRIOR TO ORDER.—Before issuing an order under this section, the Secretary shall consult with representatives of persons who may be required to give notice under the order.

EDUCATION PROGRAMS

SEC. 149. The Secretary may publish materials, and otherwise disseminate information, for the public or for health professionals, regarding the effectiveness, risks, and safety of drug products, their proper use, warnings about situations which, in the opinion of the Secretary, involve a risk of illness or injury or deception of patients, and related matters that would contribute to public and professional understanding of the risks and benefits of drug products, would help avoid deception of patients, or would otherwise promote the public health.

OFFICIAL NAMES FOR DRUG ENTITIES

SEC. 150. (a) AUTHORITY.—The Secretary may, in accordance with this section, designate an official name for any drug entity if necessary or desirable in the interest of usefulness, simplicity, and ease of understanding.

(b) REVIEW OF OFFICIAL NAMES.—The Secretary shall periodically review the official titles by which drug entities are identified in the United States Pharmacopeia to determine whether revision of any of those titles is necessary or desirable in the interest of usefulness, simplicity, and ease of understanding.

(c) RECOMMENDATIONS OF COMPENDIAL OFFICIALS.—If a drug entity is recognized in the United States Pharmacopeia, the Secretary shall request in writing that the compiler of that compendium recommended a single official name for that drug entity, if the Secretary determines that—

(1) any official title is unduly complex or is not useful for any other reason,

(2) two or more names or titles have been applied to a single drug entity, or to two or more drug entities which are identical in chemical structure and pharmacological action and which are substantially identical in strength, quality, and purity, or

(3) no official title has been applied to a drug entity subject to a monograph or a petition for a monograph under subpart 2 of part B.

(d) DESIGNATION OF OFFICIAL NAME.—If a single official name recommended by the compendial official under subsection (c) is useful, simple, and easy to understand, the Secretary shall designate that name as the official name of the drug entity. If a single official name has not been recommended within one hundred and eighty days after a request under subsection (c), or if the Secretary finds that the name recommended is not useful, simple, and easy to understand, the Secretary shall by regulation designate a single official name for the drug entity. The Secretary shall not establish an official name that would infringe upon a valid trademark.

(e) PUBLICATION OF LISTS OF OFFICIAL NAMES.—The Secretary shall from time to time compile, publish, and distribute a list of all official names of drug entities designated under this section and shall include descriptive and explanatory matter for the effective use of those names.

Subpart 2—Information for Patients

REQUIREMENTS FOR PATIENT INFORMATION LABELING

SEC. 151. (a) REQUIREMENT FOR NONPRESCRIPTION DRUG PRODUCTS.—The Secretary shall require, as a condition of initial or continued licensure of a nonprescription drug product, that a person who obtains or holds a license for such a product shall prepare, in compliance with subsection (c), information labeling for patients respecting the product and shall distribute such labeling to accompany the product.

(b) REQUIREMENT FOR PRESCRIPTION DRUG PRODUCTS.—(1) The Secretary shall require, as a condition of initial or continued licensure of a prescription drug product, that a person obtaining or holding a license for the drug product shall prepare, in compliance with subsection (c), information labeling for patients respecting the product and shall distribute such labeling to accompany the product, unless the Secretary determines that such labeling, or any portion thereof, as applied to the drug product or to a particular circumstance of administration of the drug product, is not necessary to protect the public health or to promote the safe and effective use of the drug product by patients.

(2) The monograph for a drug entity under which a prescription drug product is eligible for licensure shall state whether information labeling for patients is required in accordance with this subsection.

(c) CONTENTS.—Information labeling for patients for a drug product shall contain the following information:

(1) Adequate directions for use, including—

(A) the purposes or indications for which the drug product is intended,

(B) the proper method of administration of the drug product,

(C) precautions to be taken during the use of the drug product, and significant side effects and adverse reactions that may result from the use of the drug product, as well as instructions for treating or obtaining treatment for these effects and reactions, and

(D) warnings against unsafe use of the drug product.

(2) The proper storage and handling of the drug product.

(3) Any other information that the Secretary finds necessary to protect the public health or to promote the safe and effective use of the drug product by patients.

(d) EXCEPTIONS TO REQUIREMENTS FOR PRESCRIPTION DRUG PRODUCTS.—(1) A practitioner may direct, in a prescription for a prescription drug product, that the information labeling for patients for such drug product required under subsection (b) not be provided with the drug product when dispensed to the patient for whom the prescription is given, unless the Secretary determined that, in light of the circumstances relating to the nature, use, or method of administration of such drug product, such labeling is necessary to assure the opportunity for an informed decision by a patient regarding whether to use the drug product.

(2) The monograph for a drug entity under which a prescription drug product is eligible for licensure shall state whether a practitioner may direct that patient information labeling not be provided to an individual patient.

(e) CONSULTATIONS ON PATIENT INFORMATION LABELING FOR PRESCRIPTION DRUG PRODUCTS.—The Secretary shall consult with representatives of patients, health care providers, licensees of drug products, and other interested persons on the implementation of subsections (b) and (d) generally and with reference to patient information labeling for specific prescription drug products.

REQUIREMENTS FOR DRUG PRODUCTS DISPENSED ON PRESCRIPTION

SEC. 152. (a) REQUIREMENTS.—A prescription drug product shall be dispensed in accordance with the following requirements:

(1) The drug product may be dispensed only—

(A) by a practitioner or an agent of a practitioner, or

(B) by a pharmacist upon the prescription of a practitioner.

(2) A prescription shall either be in writing and signed by the practitioner or be transmitted orally by the practitioner to a pharmacist and promptly reduced to writing by the pharmacist.

(3) When dispensed by a pharmacist, the drug product shall bear identification labeling containing—

(A) the name and address of the pharmacy or hospital from which the drug product was dispensed,

(B) the serial number and date of the prescription;

(C) the name of the practitioner who prescribed the drug;

(D) the name of the patient;

(E) unless directed by the practitioner that the identification labeling not contain this, the established name of the drug entity contained in the drug product and the strength of the drug product;

(F) an expiration date, if known, beyond which the drug product should not be presumed to meet applicable standards of identity, strength, quality, or purity or for assuring bioavailability; and

(G) if stated in the prescription, directions for administering the drug product and cautionary statements.

(4) When dispensed by a practitioner or an agent of a practitioner (except when immediately administered to a patient), the drug product shall bear identification labeling containing—

(A) the name and address of the practitioner;

(B) the name of the patient;

(C) unless the practitioner determines that the identification labeling not contain this, the established name of the drug entity contained in the drug product and the strength of the drug product; and

(D) an expiration date, if known, beyond which the drug product may not be presumed to meet applicable standards of identity, strength, quality, or purity or for assuring bioavailability.

(5) The drug product, when dispensed by a practitioner, by an agent of a practitioner, or by a pharmacist, shall—

(A) bear information labeling for the patient when required under section 151, and

(B) be packaged in compliance with any applicable requirements under section 117.

(b) EXEMPTIONS.—(1) The Secretary may exempt a drug product from the requirements of subsection (a)(3)(E) or (4)(C) if the Secretary determines that compliance is impracticable.

(2) A drug product dispensed with identification labeling in compliance with this section shall be exempt from the requirements of section 146 (except subsection (g)) and 147.

(c) SAVINGS PROVISION.—Nothing in this section shall be construed to relieve any person from any requirement prescribed by or under the Controlled Substances Act.

POSTING OF PRESCRIPTION DRUG PRODUCT PRICES

SEC. 153. (a) IN GENERAL.—The Secretary may, in accordance with regulations issued by the Secretary after consultation with the Chairman of the Federal Trade Commission, require a pharmacy, practitioner, or other person who is engaged in the practice of dispensing any prescription drug product, to post, in the form and manner set forth in such regulations, the prices of those prescription drug products which are designated by the Secretary and dispensed by that pharmacy, practitioner, or other person.

(b) PREEMPTION.—No State or political subdivision of a State may enact or enforce any law or regulation which prohibits or burdens the truthful posting or advertising of prescription drug prices.

Subpart 3—Information for Practitioners

REQUIREMENTS FOR PRACTITIONER INFORMATION LABELING

SEC. 154. (a) DIRECTIONS FOR USE.—Information labeling for a drug product intended to provide information to practitioners shall contain adequate directions and other information for use of the drug product, including a description of the drug entity contained in the drug product and information regarding indications, clinical pharmacology, dosage, and administration, and any relevant contraindications to use, warnings, precautions, and side effects, to permit the safe and effective prescribing or dispensing of the drug product by a practitioner.

(b) IDENTIFICATION OF LICENSEE, REGISTRANT, PERMITTEE, AND MANUFACTURER.—(1) Information labeling for—

(A) a licensed drug product shall identify (and state the place of business of) the person who holds a license issued under subpart 4 of part B for the drug product;

(B) a registered drug product shall identify (and state the place of business of) the person who holds a registration issued under subpart 5 of part B for the drug product; and

(C) a permitted drug product shall identify (and state the place of business of) the person who holds an export permit issued under subpart 6 of part B for the drug product.

(2) If a person identified under paragraph (1) in information labeling for a drug product is also the manufacturer of the drug product, such labeling shall state that fact. If a person identified under paragraph (1) in information labeling for a drug product is not the manufacturer of the drug product, the identification shall also identify (and state the place of business of) the manufacturer. If more than one manufacturer manufactures a single licensed drug product or a registered drug product, the information labeling for the product shall identify (and state the place of business of) each such manufacturer.

FEDERAL DRUG COMPENDIUM

SEC. 155. (a) IN GENERAL.—(1) The Secretary shall, in accordance with this section, prepare and publish, in a form as convenient, readable, and practical as is feasible for its intended use and under a distinct and suitable name, a compendium of all prescription drug products eligible to be licensed under monographs issued under subpart 2 of part B. The Secretary shall distribute such compendium to all practitioners and make such other distribution of the compendium as in the Secretary's judgment is appropriate.

(2) The Secretary shall from time to time revise such compendium, or issue supplements thereto, so as to maintain insofar as practicable, the currency of the contents thereof, and shall publish and distribute such revisions in accordance with paragraph (1).

(b) COMPENDIUM CONTENTS.—Drug products shall be arranged in the compendium by diagnostic and therapeutic categories and within each such category drug products shall be listed by their established names. In the beginning of each category there shall be a general discussion of the nature of each of the drug products listed in the category. The compendium shall provide for each drug product listed in it the guideline for information labeling provided by the Secretary as an appendix to the monograph under which the product is eligible to be licensed. The Secretary may include such additional relevant information that the Secretary determines would promote proper use of such drug products.

(2) The Secretary shall include in the compendium, or in a supplement thereto, the proprietary names or designations of drug products containing a drug entity listed in the compendium which are available and the names of suppliers from whom drug products that are listed may be obtained.

Subpart 4—Promotion of Drug Products

REQUIREMENTS FOR PROMOTION LABELING FOR PRESCRIPTION DRUG PRODUCTS

SEC. 156. (a) REQUIRED CONTENTS.—For any prescription drug product, promotion labeling issued by or on behalf of the licensee of the drug product under subpart 4 of part B, or any other person under whose proprietary name the drug product is being distributed, shall contain, in addition to the information required under section 146—

(1) information relating to the side effects, contraindications, and effectiveness of the drug product, and

(2) any other information relating to the use of the drug product that the Secretary finds necessary or desirable to assure an adequate and balanced presentation of the benefits and risks of the drug product.

(b) PROHIBITED MATERIALS.—For any prescription drug product, no promotional labeling issued by or on behalf of the licensee of the drug product under subpart 4 of part B, or any other person under whose proprietary name the drug product is being distributed, shall contain indications for use, comparisons with other drug products, or dosage recommendations that are not contained in the information labeling of such drug product.

(c) REVIEW OF PROMOTION LABELING.—The Secretary may require that promotion labeling subject to this section be submitted to and approved by the Secretary prior to its dissemination—

(1) at the time a drug product is initially licensed under a monograph;

(2) after a finding that other promotional labeling for the drug product does not comply with the requirements of this section or section 146; or

(3) at any time for any drug that is scheduled under the Controlled Substances Act.

(d) EXEMPTION FOR PRICE INFORMATION.—The requirements of subsections (a), (b), and (c) that are in addition to the requirements of section 146 shall not apply to promotion labeling that conveys only information related to prices for prescription drug products, including information related to the availability of, and comparative prices for, two or more drug products licensed under a single monograph.

(e) EXEMPTION FROM FEDERAL TRADE COMMISSION ACT.—No promotion labeling subject to this section shall, with respect to the matters required pursuant to this section, be subject to the provisions of sections 12 through 17 of the Federal Trade Commission Act.

CORRECTIVE PROMOTION LABELING

SEC. 157. The Secretary may require that adequate notification of complete and accurate information regarding a prescription drug product be provided to persons who are likely to have read, seen, or heard any promotion labeling that the Secretary has found to be in violation of section 156 and who should properly receive information identifying and correcting the inaccurate or incomplete statements made in that labeling.

DRUG PRODUCT PROMOTION REQUIREMENTS

SEC. 158. (a) GIFTS.—(1) Except as provided in paragraph (2), no person licensed under subpart 4 of part B for a drug product or under whose proprietary name the drug product is being distributed, and no other person acting on behalf of such licensee or distributor, may directly or indirectly provide (or cause to be provided) any service for, or transfer (or cause to be transferred) any article to—

(A) any practitioner, nurse, pharmacist, or other individual engaged in the delivery of health care,

(B) any student in a school of medicine, osteopathy, dentistry, nursing, or pharmacy,

(C) any member of the immediate family of an individual described in subparagraph (A) or (B), or

(D) any other person if such service was provided or such article was transferred (or caused to be provided or transferred) with the intent to influence any person to purchase, prescribe, or dispense such drug product,

if the retail value of such service or article, at the time the service was provided or the article transferred, was at least $5, and if no charge was made for the provision of the service or the transfer of the article or a charge was made but was less than the retail value of such service or article.

(2) Paragraph (1) does not apply to (A) the provision or transfer of information, labeling, or educational services or materials, or (B) the distribution of a drug product in compliance with subsection (b)(2).

(b) FREE DRUG PRODUCTS.—(1) Except as provided in paragraph (2), no person licensed under subpart 4 of part B for a prescription drug product, or under whose proprietary name the prescription drug product is being distributed, and no other person acting on behalf of such licensee or distributor, may distribute a prescription drug product without charge (or at a charge below the retail value of such drug product) to any person, either by direct distribution of the drug product or by other means by which the drug product becomes available to any person without charge (or at a charge below the retail value of such drug product).

(2) Paragraph (1) does not prohibit the distribution of a prescription drug product—

(A) to a pharmacy or hospital at a charge which is less than the retail value of such drug product,

(B) to a person engaged in the distribution of prescription drug products at wholesale at a charge which is less than the retail value of such drug product,

(C) to a person for use in an investigation authorized or required by this title,

(D) to a charitable organization, in accordance with regulations promulgated by the Secretary,

(E) to an agency of the Federal Government, or a government of any State or political subdivision of a State, of a government of a foreign country, or of the United Nations, or

(F) in an emergency situation as determined by the Secretary.

(3) This subsection shall not apply to the dispensing of a prescription drug product without charge or at a charge below the retail value of such drug product.

(c) SPONSORSHIP OF EDUCATIONAL ACTIVITIES.—A person licensed under subpart 4 of part B for a drug product, or under whose proprietary name the drug product is being distributed, or any person acting on behalf of such a licensee or distributor, may provide medical and scientific educational materials (other than labeling), or sponsor medical and scientific educational programs and activities relating to such drug product, only if, in accordance with regulations prescribed by the Secretary, it is disclosed to those who receive such materials or participate in such programs or activities that the materials are being provided or the programs or activities are being sponsored by or on behalf of the licensee or distributor of such drug product.

RESTRICTIONS ON SURVEYS OF PRESCRIPTIONS

SEC. 159. (a) GENERAL RULE.—No pharmacist or agent or employee of a pharmacist may disclose or otherwise make available any written prescription, any written evidence of an oral prescription, or any information contained in a prescription or in such evidence (hereinafter in this section collectively referred to as "information") to any person except—

(1) the practitioner who issued the prescription,

(2) the patient for whom the prescription was issued, or to the agent of such patient,

(3) another pharmacist for the purpose of filling or refilling the prescription, or the agent of such patient.

(4) an officer or employee of the United States or any State, but only if the information is disclosed or made available to such officer or employee for the performance of official business,

(5) a person for the purpose of verifying an entitlement to payment for the drug product which was the subject of such prescription, but only if the individual for whom the prescription was issued has consented (in such form and manner as the Secretary shall by regulation prescribe) to the disclosure or making available of the information,

(6) pursuant to a lawful order of a court, or

(7) a person who, under regulations promulgated by the Secretary, is authorized to receive the information, but only if such person does not copy or otherwise remove from the information the name of the physician who issued the prescription or the name of (and any other information which may be used to identify) the patient for whom the prescription was issued.

(b) SUBSEQUENT DISCLOSURES.—Information which is disclosed or otherwise made available, as authorized by subsection (a), to a person may be further disclosed or otherwise made available by such person subject to the following conditions:

(1) A practitioner may not disclose or otherwise make available the name of (or other information which may be used to identify) the patient for whom such prescription was issued without the consent of such individual.

(2) An officer or employee described in paragraph (4) of subsection (a) may disclose or otherwise make such information available only in the performance of official duties.

(3) A person described in paragraph (5) of such subsection may disclose or otherwise make such information available only for the purposes for which it was originally received by such person.

(c) PROHIBITION AGAINST OBTAINING PROTECTED INFORMATION.—No person licensed under subpart 4 of part B for a drug product, or under whose proprietary name the drug product is being distributed, and no person acting on behalf of such licensee or distributor may obtain or attempt to obtain any information which under subsection (a) may not be disclosed or otherwise made available to such entity or person.

REQUIREMENTS FOR DETAILING OF DRUG PRODUCTS

SEC. 160. Each employee or agent of a person licensed under subpart 4 of part B for a drug product, or under whose proprietary name the drug product is being distributed, and any other person acting on behalf of such licensee or distributor, shall, when promoting or otherwise giving information respecting such drug product in a personal visit to a practitioner, provide the practitioner with the information labeling of such drug product.

PART D—PROHIBITED ACTS AND PENALTIES

PROHIBITED ACTS

SEC. 161. The following acts and the causing thereof are prohibited:

(1) The manufacture in, importation (or attempted importation) into, export (or attempted export) from, or distribution within the United States, or holding within the United States for export or distribution, of a drug product, except that this paragraph shall not apply to a drug product which is—

(A) licensed under subpart 4, registered under subpart 5, or subject to an export permit under subpart 6, or part B;

(B) if licensed under subpart 4 of part B, complies with the conditions of licensure under section 122(e);

(C) if registered under subpart 5 of part B, complies with the applicable conditions of registration under section 127(f), 128(f), or 129(f); or

(D) if subject to an export permit under subpart 6 of part B, complies with the conditions for the permit under section 135(d).

(2) The manufacture in, importation (or attempted importation) into, export (or attempted export) from, or distribution within the United States, or the holding within the United States for export distribution, or further manufacture, of a drug entity or drug product, except that this paragraph shall not apply to a drug entity or drug product which is manufactured, imported, exported, or distributed—

(A) in compliance with section 105(b);

(B) in an establishment registered under section 113; and

(C) in compliance with the requirements of sections 146 and 147 and 114 through 118.

(3) The failure or refusal of any person (other than a practitioner or pharmacist when acting in that capacity)—

(A) who holds a drug product license under subpart 4 of part B to comply with any condition of licensure under section 112(e);

(B) who holds a registration for investigational use of a drug product under subpart 5 of part B to comply with any applicable condition of registration under section 127(f), 128(f), or 129(f);

(C) who holds an export permit for a drug product under subpart 6 of part B to comply with any condition under section 135(d);

(D) to comply with any condition imposed under section 108(e);

(E) to register an establishment as required under section 113;

(F) to conduct an investigation without complying with the requirements of section 126;

(G) to notify designated persons of a risk under section 148; or

(H) to comply with a lawful administrative embargo order issued under section 165 (j);

(I) to permit entry or inspection authorized under section 175 or during such an inspection to permit access to or copying of any record required under this title, or verification of any report submitted to the Secretary under this title.

(4) The making of any untrue statement of material fact in any petition, application, report, or other document submitted to the Secretary, or in any record required under this title, including the making of such statement by a person who did not submit the statement to the Secretary but had reason to believe that such statement might be so submitted.

(5)(A) The forgery, counterfeiting, simulation, or false representation, or other use without proper authority, of any identification labeling or other identification device authorized or required under this title.

(B) The manufacture, distribution, or possession of any punch, die, plate, stone, or other article used or designed to print, imprint, or reproduce the trademark, proprietary or trade name, or other identifying mark, imprint, or device or any likeness thereof, of a drug product upon any drug product, or any container or labeling of a drug product, so as to render the drug product to be a counterfeit drug product.

(C) The doing of any act which causes a drug product to be a counterfeit drug product.

(D) The manufacture, distribution or dispensing, or the possession for distribution or dispensing, of a counterfeit drug product.

(6)(A) The giving of a guaranty or undertaking referred to in section 162(c)(2), which guaranty or undertaking is false, except by a person who relied upon a guaranty or undertaking to the same effect signed by, and containing the name and address of, the person residing in the United States from whom he received in good faith the drug entity or drug product; or

(E) The giving of a guaranty or undertaking referred to in section 162(c)(3), which guaranty or undertaking is false.

(7) The disclosure by any person of information obtained by such person under the provisions of section 111(h), 159(a), or 180 (b) in violation of the restrictions set forth in those respective sections.

(8) The failure or refusal of any practitioner or pharmacist—

(A) to comply with any condition imposed under section 108(e);

(B) to comply with any requirement under subpart 5 of part B regarding the investigational use of drug products;

(C) to notify designated persons of a risk under section 148;

(D) to comply with any requirement under section 152 regarding drug products dispensed on prescription;

(E) to comply with requirements regarding disclosure of information under section 159;

(F) to comply with a lawful administrative embargo order issued under section 165 (j);

(G) to permit an entry or inspection authorized under section 175 or access to or copying of any record or verification of any report required under this title, during such an inspection.

CRIMINAL PENALTIES

SEC. 162. (a) MISDEMEANOR.—If any person violates a provision of section 161 (other than section 161(8)) as a result of negligence of that person, the person, if an individual, shall be imprisoned for not more than one year or fined not more than $25,000, or both, or if other than an individual, shall be fined not more than $50,000. As used in this section, the term "negligence" means acting without the care, skill, prudence, or diligence, under the circumstances then prevailing, that a prudent person would use if acting in a like capacity and familiar with the matters with which a prudent person in like capacity would be familiar.

(b) FELONY.—Notwithstanding subsection (a) of this section, if any person violates a provision of section 161 (other than section 161 (7)) after a conviction under this section, or under section 303 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 333), has become final, or if any person knowingly or willfully violates a provision of section 161 (other than section 161(7)), the person, if an individual, shall be imprisoned for not more than three years or fined not more than $50,000, or both, or if other than an individual, shall be fined not more than $1,000,000.

(c) EXCLUSIONS.—No person shall be subject to the penalties of subsection (a) of this section—

(1) for having received any drug entity or drug product and delivered it or proffered delivery of it, if such delivery or proffer was made in good faith, unless he refuses to furnish, on request of the Secretary, the name and address of the person from whom the entity or product was received and copies of all documents pertaining to such receipt;

(2) for having violated section 161 (1) or (2), if he establishes a guaranty or undertaking signed by, and containing the name and address of, the person residing in the United States from whom he received in good faith the drug entity or drug product, to the effect that the entity or product was in full compliance with this title;

(3) for having violated section 161 (1) or (2), where the violation exists because the drug entity or drug product contains a color additive which was not in compliance with section 706(a) of the Federal Food, Drug, and Cosmetic Act, if such person establishes a guaranty or undertaking signed by, and containing the name and address of, the manufacturer of the color additive, to the effect that such color additive was in compliance with such section;

(4) for having violated section 161 (1) or (2) by the failure to comply with the requirements of part C applicable to identification and information labeling for drug entities and drug products, with respect to a drug entity or drug product received, which entity or product is not exempt from such requirements under section 146(h), if the delivery or proffered delivery was made in good faith and the labeling at the time thereof contained the same statements that were contained in the labeling at the time of such receipt of such entity or product; or

(5) for having violated section 161(5)(B) if such person acted in good faith and had no reason to believe that use of the punch, die, plate, stone, or other article involved would result in a drug product being a counterfeit drug product, or for having violated section 161(5)(D), if the person doing the act or causing it to be done acted in good faith and had no reason to believe that the drug product was a counterfeit drug product.

CIVIL PENALTIES

SEC. 163. (a) LIABILITY FOR PENALTY.—Any person who violates section 161 shall be liable to the United States for a civil penalty for each violation of not more than $10,000, if an individual, or $25,000, if other than an individual.

(b) ASSESSMENT OF PENALTY.—(1) A civil penalty for a violation of section 161 shall be assessed by the Secretary by an order made on the record after an opportunity (provided in accordance with this subsection) for a hearing in accordance with section 554 of title 5 of the United States Code. Before issuing an order of assessment, the Secretary shall give written notice to the person to be assessed a civil penalty under the order, containing the Secretary's proposal to issue the order, and shall provide the person an opportunity to request, within thirty days of the date the notice is received by the person, a hearing on the proposed order.

(2) In determining the amount of the penalty, the Secretary shall take into account the nature, circumstances, extent and gravity of the violation or violations and, with respect to the violator, the degree of culpability, any history of prior violations, ability to pay, effect upon ability to continue to do business, and any other matters that justice may require.

(3) The Secretary may compromise, modify, or remit, with or without conditions, any civil penalty which may be or has been imposed under this section. The amount of the penalty, when finally determined, or the amount agreed upon in compromise, may be deducted from any sums owing by the United States to the person assessed.

(c) JUDICIAL REVIEW.—Any person who exercised the opportunity to be heard under subsection (b)(1) respecting the assessment of a civil penalty, and who has by an order been assessed a civil penalty, may obtain judicial review of that order in accordance with section 182.

(d) RECOVERY OF ASSESSMENT.—If any person fails to pay an assessment of a civil penalty after it has become a final order and the person does not file a petition for judicial review in accordance with subsection (c), or after a court in an action brought under subsection (c) has entered final judgment in favor of the Secretary, the Attorney General shall recover the amount assessed (plus interest from the date when the opportunity to obtain judicial review under subsection (c) expires or when the opportunity for judicial review under that subsection has been exhausted) by an action brought in any appropriate district court of the United States. In that action, the validity, amount, and appropriateness of the penalty shall not be subject to review.

(e) DISPOSITION OF PENALTIES.—All penalties collected under authority of this section shall be paid into the Treasury of the United States as miscellaneous reecipts.

INJUNCTIONS

SEC. 164. (a) JURISDICTION.—The district courts of the United States and all courts exercising general jurisdiction in the territories and possessions of the United States shall have jurisdiction to enjoin violations of section 161 of this title. Such jurisdiction shall include authority to order the defendant to recall, and reimburse patients and other purchasers for, any drug entities or drug products distributed by the defendant in violation of section 161, if such order is appropriate in the circumstances.

(b) TRIAL BY JURY.—In case of an alleged violation of an injunction or restraining order issued under subsection (a), which also contributes a violation of section 161, trial shall be by the court, or, upon demand of the accused or of the United States, by a jury.

SEIZURE, FORFEITURE, AND ADMINISTRATIVE EMBARGO

SEC. 165. (a) PROPERTY SUBJECT TO SEIZURE AND FORFEITURE.—The following shall be subject to seizure by and forfeiture to the United States, may be seized at any time; and, except as provided in subsection (g), upon forfeiture no private property right shall exist in them:

(1) Any drug entity or drug product that has been manufactured, imported, distributed, or is being held for purposes of manufacturing, distribution, export or dispensing, or is offered for export, in violation of section 161.

(2) Any counterfeit drug product.

(3) Any punch, die, plate, stone, labeling, container, or other article used or designed for use in making a counterfeit drug product.

(b) SEIZURE OF PROPERTY.—Any property subject to seizure by and forfeiture to the United States under subsection (a) may be seized—

(1) by the Attorney General, at the request of the Secretary, upon process issued by any district court of the United States having jurisdiction over the property pursuant to the Supplemental Rules for Certain Admiralty and Maritime Claims; or

(2) by any customs officer, if the property is in the process of being imported or exported.

(c) GENERAL PROCEDURES FOR SEIZURE AND FORFEITURE.—Provisions under the Supplemental Rules for Certain Admiralty and Maritime Claims, relating to the seizure and forfeiture of property for violation of the customs laws, shall apply to seizures and forfeitures under this section, insofar as applicable and not inconsistent with the provisions of this section. On demand of either party, any issue of fact joined in any forfeiture proceeding shall be tried by a jury. The duties imposed upon the customs officer or any other person with respect to the seizure and forfeiture of property under the customs laws shall be performed with respect to seizures for forfeitures of property under this section by the officers or employees authorized by the Attorney General, except to the extent that the duties arise from seizures and forfeitures effected by any customs officer.

(d) CONSOLIDATION OF PROCEEDINGS.—When forfeiture proceedings under this section involving the same claimant and the same issues are pending in two or more jurisdictions, the pending proceedings, upon application of the claimant reasonably made to the court of one such jurisdiction, shall be consolidated for trial by order of that court. Trial shall be in any district selected by the claimant where one of the proceedings is pending. If no order for consolidation is made under this subsection within a reasonable time, the claimant may apply to the court of one such jurisdiction, and such court (after giving the United States attorney for such district reasonable notice and opportunity to be heard) shall by order, unless good cause to the contrary is shown, specify a district of reasonable proximity to the claimant's principal place of business, in which all such pending proceedings shall be consolidated for trial and tried. The order of consolidation shall not apply so as to require the removal of any case the date for trial of which has been fixed. The court granting the order shall give prompt notification thereof to the other courts having jurisdiction of the cases covered thereby. The clerk of the court from which removal is made shall promptly transmit to the court in which the case is to be tried all records in the case necessary for that court to exercise jurisdiction. The court to which the case is removed shall have the powers and be subject to the duties, for purposes of the case, which the court from which removal was made would have had, or to which that court would have been subject, if the case had not been removed.

(e) SAMPLES OF SEIZED PROPERTY.—At any time after seizure up to a reasonable time before trial, the court having jurisdiction over the article shall by order allow any party to a condemnation proceeding, or the attorney or agent for that party, to obtain a representative sample of the property seized, a true copy of any analyses on which the proceeding is based, and any identifying marks or numbers of the packages from which any sample analyzed was obtained.

(f) DISPOSITION OF FORFEITED ARTICLES.—Whenever property is ordered forfeited under this section by a court having jurisdiction over the property, the court may direct that any of the following be done:

(1) The property be destroyed.

(2) The property be retained by the United States for official use.

(3) The property be sold by the General Services Administration, unless such sale would be contrary to the provisions of this title or to the laws of the jurisdiction in which sold. The proceeds from any sale shall, as authorized in appropriations Acts, be used to pay all proper expenses of the proceedings for forfeiture and sale, including expenses of seizure, maintenance and custody, and advertising and court costs and fees, and the balance shall be paid into the Treasury of the United States as miscellaneous receipts.

(4) Deliver the property to the person who intervened in the proceeding as claimant, upon payment of the costs of the forfeiture proceedings and the execution of a good and sufficient bond, as determined in accordance with regulations issued by the Secretary, conditioned that the property shall not be distributed or disposed of contrary to any applicable law, in order to permit that person—

(A) to destroy the property,

(B) to bring it into compliance with the provisions of this title, under the supervision of an officer or an employee designated by the Secretary, the expenses of the supervision being paid by the person obtaining release of the property under bond, or,

(C) to export the property, upon a showing by the person obtaining release of the property that all of the requirements of subpart 6 of part B of this title can and will be met.

(g) REMISSION OR MITIGATION OF FORFEITURE.—Whenever any equipment or thing (other than a drug entity or drug product) is ordered forfeited under paragraph (3) of subsection (a) of this section by a court having jurisdiction over such equipment or thing, the court shall allow the claim of any claimant, to the extent of such claimant's interest, for remission or mitigation of such forfeiture if such claimant proves to the satisfaction of the court that:

(1) the claimant has not committed or caused to be committed any prohibited act referred to in such paragraph (3) and the claimant has no interest in any drug product referred to therein;

(2) the claimant has an interest in such equipment or other thing as owner or lienor or otherwise, acquired by the claimant in good faith; and

(3) the claimant at no time had any knowledge or reason to believe that such equipment or thing was being or would be used in, or to facilitate, the manufacture of counterfeit drug products in violation of this title.

(h) COSTS OF FORFEITURE PROCEEDING.—Whenever property is ordered forfeited under this section by a court having jurisdiction over the property, all proper expenses of the proceedings for forfeiture, including expenses of seizure, maintenance of custody, and court costs and fees, shall be awarded against the person, if any, intervening as claimant of the property. If the forfeited property is ordered sold in accordance with paragraph (3) of subsection (j), any expenses of the proceedings for forfeiture and sale not paid by the proceeds of the sale shall be awarded against the person, if any, intervening as claimant of the property.

(i) ADMINISTRATIVE EMBARGO OF PROPERTY.—(1) If an officer or employee of the department has reason to believe that property is subject to seizure and forfeit are under this section, the officer or employee may by written order place the property under embargo for a reasonable period of time, not to exceed twenty days, in order to prevent distribution of the property pending initiation of formal proceedings under this section or under section 164. If the Secretary determines that a period of time greater than twenty days is required to institute such proceedings, the Secretary may authorize an extension of the embargo period for up to ten additional days. Before property may be placed under embargo under this subsection, the Secretary (or an officer or employee designated by the Secretary other than the officer or employee proposing the embargo) shall approve the embargo order. An order of embargo under this subsection may require the identification of property during the period of its embargo as under embargo. A person who would be entitled to claim a property if it were seized under this section may appeal to the Secretary the placement of the property under embargo under this subsection within ten days of the issuance of the embargo order. Within five days of the date an appeal of an embargo order is filed with the Secretary, the Secretary shall afford the person an opportunity to present views, orally or in writing, with regard to the matter, and then by order confirm, modify, or revoke the embargo.

(2) Except as authorized by paragraph (3) of this subsection, property subject to an order of embargo issued under paragraph (1) shall not be moved by any person from the place at which it is ordered embargoed until—

(A) the Secretary releases the property from embargo, or

(B) the embargo period applicable to the property expires.

(3) Property subject to an embargo order under paragraph (1) of this subsection may be moved only in accordance with any requirements prescribed by the Secretary.

ADMINISTRATIVE DISQUALIFICATIONS

SEC. 166. (a) AUTHORITY TO DISQUALIFY PERSONS.—(1) If the Secretary determines that—

(A) any person has failed or refused to comply with the requirements of section 130 to protect human participants in clinical investigations involving a drug product, or of section 131 to assure the validity of scientific data, or of sections 127, 128, and 129 to conduct an investigation;

(B) the noncompliance with such requirements has adversely affected or placed in jeopardy the safety or the rights of human participants in an investigation involving a drug product, or the validity of scientific data from any investigation involving a drug entity or drug product, or both; and

(C) the action authorized by this subsection is an appropriate step to assure that such person will not be able to conduct investigations involving human participants, or to be the source of scientific data submitted under this title, or both, until such person demonstrates to the Secretary that the person will comply with the applicable requirements.

The Secretary may by order (issued in accordance with subsection (b)) take the action described in paragraph (2).

(2) The action referred to in paragraph (1) is as follows:

(A) Exclusion from consideration in the evaluation of a petition or application under this title any material scientific data submitted at any time in support of the petition or application and generated by or under the supervision or review of a person with respect to whom the Secretary has made the finding described in paragraph (1), until such data are independently validated.

(B) Suspension, termination, or denial of any clinical investigation involving human participants under a registration issued un-

der subpart 5 of part B which is being or is to be conducted by or under the supervision or review of such person.

The action described in this paragraph is referred to in this section as "disqualification".

(b) PROCEDURES.—An order of disqualification under subsection (a)(1) may be issued only after providing an opportunity for an informal hearing in accordance with section 173 of this title. Before issuing an order of disqualification, the Secretary shall give written notice to the person subject to the order of the Secretary's proposal to issue the order and provide the person an opportunity to request, within thirty days of the date the notice is received by the person, an informal hearing on the proposed order.

(c) STANDARDS.—In determining whether to issue an order under subsection (a), the Secretary shall take into account the nature, circumstances, extent, and gravity of the noncompliance with respect to which the order is proposed to be issued, the extent to which it may have placed human participants at unreasonable risk or violated their rights or placed in question the validity of scientific data, any history of prior noncompliance, and any other matters in the interest of justice.

(d) JUDICIAL REVIEW.—Any person who exercised the opportunity to be heard under subsection (b) respecting a disqualification order and who has by such an order been disqualified may obtain judicial review of that order in accordance with section 182.

(e) TERMINATION OF DISQUALIFICATION.—The Secretary shall terminate an order of disqualification under this section at such time as the Secretary determines that the disqualified person will conduct, supervise, or review investigations in a manner that will comply with the requirements of this title regarding protection of the safety and rights of human participants in investigations involving drug entities or drug products and assurance of the validity of scientific data to be submitted to the Secretary.

CONFERENCE BEFORE REPORT OF CRIMINAL VIOLATION

SEC. 167. Before any violation of this title is reported by the Secretary to any United States attorney for institution of a criminal proceeding (other than an investigation), the person against whom such proceeding is contemplated shall be given appropriate notice and an opportunity to present views, either orally or in writing, with regard to such contemplated proceeding.

SEPARABILITY OF PENALTIES

SEC. 168. Any criminal or civil penalty, administrative disqualification, administrative action taken with regard to a license, registration, or permit under part B of this title, or any other administrative action or order, imposed for violation of this title, or taken because of an action which constitutes such a violation, shall not be in lieu of any other criminal or civil penalty or administrative action authorized by law.

ENFORCEMENT PROCEEDINGS

SEC. 169. All judicial proceedings for the enforcement, or to restrain violations, of this title shall be by and in the name of the United States. Subpenas for witnesses in a judicial proceeding who are required to attend a court of the United States in any district may be served in any other district.

NOTICES AND WARNINGS

SEC. 170. Nothing in this title shall be construed as requiring the Secretary to report for judicial proceedings, or to commence formal administrative proceedings in response to, violations of this title where the Secretary believes that the public interest will be adequately served by a written notice of warning.

PART E—ADMINISTRATIVE PROVISIONS

AUTHORITY TO ISSUE REGULATIONS

SEC. 172. The Secretary is authorized to promulgate any regulations that the Secretary finds necessary and appropriate for the efficient implementation and enforcement of this title.

ADMINISTRATIVE HEARINGS

SEC. 173. (a) AUTHORITY.— In carrying out this title, the Secretary may hold hearings, administer oaths, examine witnesses, and receive evidence at any place in the United States.

(b) INFORMAL HEARINGS.—When an informal hearing is provided for in this title, the hearing shall not be subject to section 554, 556, or 557 of title 5 of the United States Code, but shall be subject to the following requirements:

(1) The presiding officer in the hearing shall be designated by the Secretary from among the officers and employees of the Department who have not (prior to being designated) participated in any action which is the subject of the hearing and who are not directly or indirectly responsible to any officer or employee of the Department who has participated in the action.

(2) Each responding party to the hearing shall have the right at all times to be represented by counsel.

(3) Before the hearing, each responding party to the hearing shall be given reasonable notice of the matters to be considered at the hearing, including a statement of the basis for the action taken or proposed by the Secretary which is the subject of the hearing and a summary of the information which will be presented by the Secretary at the hearing.

(4) At the hearing, each responding party shall have the right to hear a full and complete statement of the basis for the action of the Secretary which is the subject of the hearing, together with the information and reasons supporting the action, to conduct reasonable questioning of witnesses, and to present oral or written information relevant to the action.

(5) The Secretary may require the hearing to be transcribed. A responding party shall have the right to have the hearing transcribed at his expense.

(6) At the conclusion of the hearing the presiding officer shall prepare a written report of the hearing and a recommended decision. Each responding party shall have the opportunity to submit, within a reasonable period of time, exceptions to the presiding officer's report of the hearing and recommended decision.

(7) In completing any proceeding involving an informal hearing, the Secretary shall issue a written decision stating the reasons for the action taken or to be taken and the basis in the administrative record of the proceeding.

(c) PUBLIC HEARINGS.—When a public hearing is provided for in this title, the hearing shall not be subject to section 554, 556, or 557 of title 5 of the United States Code or subsection (b) of this section, but shall be subject to the following requirements:

(1) The presiding officer in the hearing shall be designated by the Secretary from among the officers and employees (including special Government employees) of the Department who have not (prior to being designated) participated in any action which is the subject of the hearing, who are not directly or indirectly responsible to any officer or employee of the Department who has participated in the action, and who will not (other than for hearing) participate in any action which is the subject of the hearing.

(2) Before the hearing, the public shall be given reasonable notice of the matters to be considered at the hearing, including a statement of the basis for the action taken or proposed by the Secretary (or by a petition) which is the subject of the hearing.

(3) At the hearing, any person shall have the right to present oral or written information relevant to the action which is the subject of the hearing.

(4) The presiding officer in the hearing may take such action as may be necessary to expedite the hearing (including allocation of time for presentation of testimony), to define the issues involved, and to conduct (or permit other employees of or advisors to the Department to conduct) reasonable questioning in order to clarify the testimony presented at the hearing. If the presiding officer determines that the same or similar interests are held by more than one person wishing to present oral testimony at the hearing, the presiding officer may require a consolidation in the presentation of such testimony.

(5) The Secretary shall require the hearing to be transcribed.

(6) At the conclusion of the hearing the presiding officer shall prepare a written report of the hearing.

SUBPENAS

SEC. 174 (a) AUTHORITY.—In any matter relating to implementation or enforcement of this title, the Secretary may compel the attendance and testimony of witnesses by subpena and require the production of any records (including books, papers, documents, and other tangible things) that may be relevant to the matter. The attendance of witnesses and the production of records may be required from any place in any State or in any territory or other place subject to the jurisdiction of the United States at any designated place of hearing. Witnesses summoned under this section shall be paid the same fees and mileage that are paid to witnesses in the courts of the United States.

(b) SERVICE.—A subpena issued under this section may be served by any person designated in the subpena to serve it. Service upon a natural person may be made either by a personal delivery or by registered mail or telegraph, or by leaving a copy thereof at the principal office or place of business of the person being served. Service upon a domestic or foreign corporation, or upon a partnership or other unincorporated association which is subject to suit under a common name, may be made either by delivering the subpena to an officer, to a managing or general agent, or to any other agent authorized by appointment or by law to receive service of process, or by registered mail or telegraph or by having a copy of the subpena at the principal office or place or business of the office or agent being served. The verified return by the individual so serving it setting forth the manner of service shall be proof of service, and the return post office receipt or telegraph receipt therefor when registered and mailed or telegraphed in accordance with this subsection shall be proof of service.

(c) ENFORCEMENT.—In the case of contumacy by, or refusal to obey a subpena issued to, any person, any court of the United States within the jurisdiction in which the subpenaed person is an inhabitant, carries on business, or may be found, may compel compliance with the subpena. The court may issue an order requiring the subpenaed person to appear before the Secretary, to produce records if so ordered, or to give testimony relating to the matter. Any failure to obey the order of the court may be punished by the court as a contempt thereof. All process in such a case may be served in any judicial district in which the person may be found.

ADMINISTRATION INSPECTIONS

SEC. 175. (a) REGULATED PREMISES.—For purposes of this section, the term "regulated premises" includes the following:

(1) Any establishment in which a drug entity or a drug product is manufactured or held for further manufacturing, distribution or export after being manufactured, imported, or distributed, or for which establishment registration is sought under section 113.

(2) Any conveyance which is being used to transport or hold a drug entity or a drug product.

(3) Any establishment, institution, laboratory, or office or place of business of a practitioner, in which any aspect of an investigation which is subject to subpart 5 of part B is conducted, or a report of which has been or is intended to be submitted to the Secretary in support of a petition for issuance of a monograph under subpart 2, or of an application under subpart 4, 5, or 6, of Part B.

(4) Any establishment, institution, or laboratory in which a drug entity or drug product is assessed for risks or is tested for identity, strength, quality, purity, stability, or bioavailability.

(5) Any establishment in which original or other records or documents required under section 108(e) are kept or required to be kept.

(b) OTHER PREMISES.—For purposes of this section, except insofar as, and only to that extent that, it is included in subsection (a), the term "regulated premises" does not include the following:

(1) A pharmacy which is licensed or registered under applicable State laws regulating the practice of pharmacy and which compounds drug products solely in the course of filling and dispensing prescriptions as part of the practice of pharmacy.

(2) The premises of a practitioner who compounds drug products solely for dispensing in the course of professional practice.

(3) The premises of a person who manufactures drug products solely for use in preclinical research (other than preclinical research a report of which has been or is intended to be submitted to the Secretary in support of a petition for issuance of a monograph under subpart 2 or of an application under subpart 4, 5, or 6, of part B), teaching, or chemical analysis and not for use in humans.

(4) The premises of any other person or class of persons that the Secretary may by regulation exempt from the application of this section upon a determination that inspection of these premises is not necessary for the efficient implementation and enforcement of this title.

(c) AUTHORITY TO INSPECT REGULATED PREMISES.—The Secretary is authorized, in accordance with this section, to enter any regulated premises and to conduct inspections thereof and of things specified in this section that are located in those premises, for purposes of—

(1) determining whether drug entities and drug products have been or are being manufactured, imported, exported, distributed, dispensed, tested, investigated, or held in conformity with this title,

(2) inspecting, copying, and verifying the correctness of records, reports, or other documents required to be made or kept under this title, or

(3) otherwise implementing and enforcing this title.

(d) PROCEDURES.—Entries and inspections shall be carried out by officers or employees of the Department designated by the Secretary. Any such officer or employee, upon stating his purpose and presenting to the person in charge of the regulated premises appropriate credentials and a written notice of inspection authority, shall have the right to enter the premises and conduct inspections at reasonable times, within reasonable limits, and in a reasonable manner. A separate notice shall be given for each inspection, but a notice shall not be required for each entry made during the period covered by an inspection. Each inspection shall be completed with reasonable promptness after its commencement.

(e) SCOPE OF AN INSPECTION.—An officer or employee conducting an authorized inspection under subsection (c) shall have authority—

(1) to inspect and copy records, reports, and other documents required to be kept or made under this title;

(2) to inspect and photograph the regulated premises and all pertinent equipment, finished and unfinished drug products, drug entities, and other materials, containers, and labeling found therein, and, except as provided in subsection (f), all other things therein (including records, files, papers, processes, controls, and facilities) appropriate for verification of the records, reports, and documents referred to in paragraph (1) or otherwise relevant to determining compliance with the provisions of this title;

(3) to observe manufacturing operations;

(4) to inventory the stock of, and to obtain samples of, any drug entity, drug product, or component of a drug entity or drug product; and

(5) to obtain samples of substances used as reference or control standards for testing the identity, strength, quality, purity, stability, or bioavailability of, a drug entity, drug product or a component of a drug entity or drug product, or for assessing the risks or demonstrating the effectiveness of a drug product.

(f) LIMITS ON SCOPE OF AN INSPECTION.—Except when the person in charge of the regulated premises so consents in writing, no inspection authorized by this section shall extend to—

(1) financial data;

(2) sales data other than shipment data;

(3) pricing data;

(4) personnel information other than information as to the qualifications and responsibilities of technical professional, and supervisory personnel performing functions subject to this title.

(g) REPORT OF INSPECTION.—Upon completion of any inspection under this section, and prior to leaving the premises, the officer or employee of the Department making the inspection shall give to the person in charge of the regulated premises a written notice identifying any conditions or practices observed which, in the judgment of the officer or employee, indicate that any drug entity or drug product in the premises is not in conformity with this title.

(h) RECEIPT FOR SAMPLES.—If a sample has been obtained in the course of an inspection, the officer or employee making the inspection, upon completion of the inspection and prior to leaving the premises, shall give to the person in charge a receipt describing the sample obtained.

(i) AUTHORITY TO INSPECT OTHER PREMISES.—The Secretary is authorized to enter any premises described in subsection (b) and to conduct inspections thereof and of things specified in this subsection that are located in those premises, for purposes of determining whether the premises are, and the extent to which the premises are, also a regulated premises under subsection (a).

(j) INSPECTION WARRANTS.—(1) An inspection warrant shall not be required (A) to make entries and conduct inspections pursuant to the authority in subsection (c) or (i), (B) to inspect books and records pursuant to a subpena issued under section 174, or (C) for any other inspection for which an inspection warrant is not required by the United States Constitution. An inspection warrant may be sought and obtained by the Secretary even though not required under this subsection. The issuance and execution of an inspection warrant under this subsection shall not preclude administrative or judicial proceedings for a violation of section 161(3)(I) or 161(8)(G).

(2) Any judge of the United States or any United States magistrate may, within his or her territorial jurisdiction, and upon proper oath or affirmation showing probable cause, issue warrants for the purpose of conducting inspections authorized by this title. For the purposes of this paragraph, the term "probable cause" means a valid public interest in the effective enforcement of this title, or regulations thereunder, sufficient to justify inspection in the circumstances specified in the application for the warrant.

(3) A warrant shall issue only upon an affidavit of an officer or employee of the Department having knowledge relating to the facts alleged, which is sworn to before the judge or magistrate and which sets forth the grounds for issuing the warrant. If the judge or magistrate is satisfied that grounds for the issuance of a warrant exist or that there is probable cause to believe they exist, the judge or magistrate shall issue a warrant identifying an area, premises, building conveyance, or contents thereof to be inspected, the purpose of such inspection, and, where appropriate, the type of property to be inspected, if any. The warrant shall state the grounds for its issuance and the name of the person or persons whose affidavits have been taken in support thereof. It shall command the person to whom it is directed to inspect the area, premises, building, or conveyance identified for the purpose specified. The warrant shall direct that it be served at any reasonable time. It shall designate the judge or magistrate to whom it shall be returned.

(4) A warrant issued pursuant to this subsection shall be executed and returned within ten days of its date unless, upon a showing by the United States of a need therefor, the judge or magistrate allows additional time in the warrant.

(5) The judge or magistrate who has issued a warrant under this section shall attach to the warrant a copy of the return and all papers filed in connection therewith and shall file them with the clerk of the district court of the United States for the judicial district in which the inspection was made.

POWERS OF ENFORCEMENT PERSONNEL

SEC. 176. Any officer or employee of the Department designated by the Secretary to conduct investigations or inspections under this title, may, when so authorized by the Secretary—

(1) serve and execute search warrants and inspection warrants;

(2) serve subpenas issued under section 174;

(3) make inspections under section 175;

(4) order embargo of articles pursuant to section 165(i); and

(5) perform such other duties as the Secretary may designate.

COOPERATIVE ARRANGEMENTS

SEC. 177. (a) COOPERATION WITH OTHER FEDERAL AND STATE AGENCIES.—The Secretary shall cooperate with Federal, State and local government agencies concerning the manufacture, importation, export, distribution, prescribing, dispensing, testing, or investigation of drug entities and drug products. To this end, the Secretary is authorized to—

(1) arrange for the exchange of information among governmental officials concerning drug entities and drug products;

(2) cooperate in the institution and prosecution of cases in the courts of the United States and before the licensing boards and courts of any State or political subdivision thereof;

(3) accept from any State or local authorities engaged in activities relating to health, safety, or consumer protection assistance in such functions as data collection, investigation, and educational programs, as well as other assistance in the administration and enforcement of this title which the

Secretary may request and which such States or localities may be able and willing to provide and, if so agreed, may pay in advance or otherwise for the reasonable cost of such assistance;

(4) commission any qualified officer or employee of any State or local agency as an officer of the Secretary for the purpose of conducting investigations and inspections;

(5) conduct training programs on the regulation of drug entities and drug products; and

(6) take other steps necessary or desirable to coordinate regulatory activities, in order to promote the efficiency and effectiveness of, and to minimize duplication of activities involving, the regulation of drug entities and drug products.

(b) ACCESS TO RECORDS OF OTHER FEDERAL AGENCIES.—For purposes of enforcement of this title, records of any department or independent establishment in the executive branch of the Government relating to the administration, implementation, or enforcement of this title shall be open to inspection and copying by any officer or employee of the Department authorized by the Secretary to make the inspection, unless such inspection or copying is otherwise prohibited by law.

(c) JOINT REGULATION OF IMPORTS AND EXPORTS WITH THE SECRETARY OF THE TREASURY.—The Secretary of the Treasury and the Secretary shall jointly prescribe regulations for the efficient implementation and enforcement of the provisions of sections 119 and 135, except as otherwise provided therein.

(d) COOPERATION WITH COMPENDIAL OFFICIALS.—The Secretary, in implementing this title, shall cooperate with associations and scientific societies in the revision of the United States Pharmacopeia and in the development of methods of analysis and mechanical, chemical, physical, and any other tests necessary to carry out the duties of the Secretary under this title. The Secretary may also provide for the training, either within the United States or abroad (including payment of the costs of travel and per diem), of officers or employees of foreign governments, to enable those officers or employees to carry out any function under section 135, related to the consideration by their governments of the importation of drug entities and drug products from the United States.

ADVISORY COMMITTEES

SEC. 178. (a) DRUG SCIENCE ADVISORY COMMITTEES.—The Secretary shall appoint one or more advisory committees to advise the Secretary and the Department with respect to the issuance, amendment, and revocation of monographs under subpart 2 of part B. In selecting individuals to serve as members of such committees, the Secretary shall obtain and consider recommendations from health care providers, scientific investigators, and organizations interested in public health, particular diseases, or consumer affairs. The Secretary shall appoint individuals to be members of the committee, so that each committee reflects in its composition, to the extent possible, scientific, consumer, and health care provider interests. In asking any such committee for advice on whether a monograph should be issued, amended, or revoked, the Secretary shall submit written questions to the committee regarding each specific determination required under subpart 2 of part B to be made in order for such action to be taken with respect to such monograph. The advisory committee shall respond in writing to each of the questions posed by the Secretary.

(b) OTHER ADVISORY COMMITTEES.—The Secretary may, from time to time, appoint committees to advise the Department with respect to implementation of this title.

(c) COMPENSATION.—Members of the committees may be entitled to receive compensation at the rate fixed by the Secretary, not exceeding the daily equivalent of the annual rate of basic pay in effect for grade GS–18 of the General Schedule, for each day, including travel time, during which they were engaged in the actual performance of duties. While away from their homes or regular places of business, members of these committees may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5 of the United States Code.

RESEARCH PROGRAMS

SEC. 179. (a) AUTHORITY.—The Secretary may conduct research, testing, and preclinical and clinical investigations respecting drug entities, drug products, or any component of a drug entity or drug product.

(b) CONTRACTS.—The Secretary may award grants and enter into contracts for research authorized by this section, and may obtain drug entities, drug products, or components for these purposes without regard to sections 3648 and 3709 of the Revised Statutes (31 U.S.C. 539; 41 U.S.C. 5).

CONFIDENTIALITY OF COMMERCIAL INFORMATION

SEC. 180. (a) GENERAL PROHIBITION AGAINST DISCLOSURE.—Except as provided in this section, no officer or employee of the Department shall disclose any information revealed to, or otherwise obtained by, the Department or any of its representatives, which is exempt from disclosure under section 552(b)(4) of title 5 of the United States Code.

(b) DISCLOSURE RELEVANT TO ENFORCEMENT ACTIVITIES.—Information described in subsection (a) of this section may be disclosed as follows:

(1) To any officer or employee of the United States in connection with the performance of official duties.

(2) To the courts when relevant in any judicial proceeding.

(3) To a person other than an officer or employee of the United States if the Secretary determines that the other person requires the information in connection with an activity which is undertaken under contract with the Secretary, which relates to the administration of this title, and with respect to which the Secretary is not prohibited from using the information. The Secretary shall require, as a condition to the disclosure of information under this paragraph, that the person receiving it take such security precautions respecting the storage, use, and further disclosure of information received that the Secretary may, by regulation, prescribe.

(4) Whenever the Secretary determines that disclosure is necessary to reduce a risk of serious illness or serious injury to patients or a risk to the public health.

(c) EFFECT OF DISCLOSURE UNDER THIS SECTION.—Disclosure of information under subsection (b) of this section shall not (1) constitute release of the information to the general public, (2) remove the exemption from mandatory disclosure otherwise pertaining under section 552(b)(4) of title 5 of the United States Code, or (3) constitute a violation of section 1905 of title 18 of the United States Code.

BURDEN OF PROOF

SEC. 181. (a) CLAIMS OF LICENSURE, REGISTRATION, OR PERMIT.—In any administration or judicial proceeding under this title, a person claiming to be the duly authorized holder of a license, registration, or permit issued under subpart 4, 5, or 6 of part B of this title, shall have the burden of proof, including the burden of going forward with the evidence and the burden of persuasion, with respect to such license, registration, or permit.

(b) CLAIMS OF EXEMPTIONS.—In any administrative or judicial proceeding under this title, a person claiming the benefit of any exemption, exception, or variance set forth or permitted in this title (including any under section 113, 114, 115, 117, 120, 126, 146, 147, 151, 156, 158, or 175), shall have the burden of proof, including the burden of going forward with the evidence and the burden of persuasion with respect to such exemption, exception, or variance.

JUDICIAL REVIEW

SEC. 182. (a) JURISDICTION.—Any person entitled to obtain review of an order of the Secretary under this title may do so in the United States Court of Appeals for the District of Columbia or for the circuit in which such person's principal place of business is located, upon petition filed with the court and served upon the Secretary within sixty days after receiving notice of the final order. Upon the filing of a petition, the court shall have exclusive jurisdiction to affirm, modify, or set aside the order, except that until the filing of the certified record, the Secretary may modify or set aside the order.

(b) CERTIFIED RECORD.—Within forty days after receipt of the petition, the Secretary shall certify to and file in the court the record upon which the order complained of was entered, as provided in section 2112 of title 28 of the United States Code.

(c) SCOPE OF REVIEW.—No objection to the order of the Secretary shall be considered by the court unless the objection was urged at the appropriate time during the administrative proceedings or unless there were reasonable grounds for failure so to urge it. The findings of the Secretary as to the facts shall be conclusive, (1) with respect to all orders of the Secretary under this title (except orders issued under subparts 4, 5, and 6 of part B, or under section 163) unless the findings are shown to be arbitrary or capricious, or (2) with respect to orders of the Secretary under subparts 4, 5, and 6 of part B, and under section 163, if supported by substantial evidence. If any person applies to the court for leave to adduce additional evidence, and shows to the satisfaction of the court that the additional evidence is material and that there were reasonable grounds for failing to adduce the evidence in the administrative proceeding, the court may remand the matter to the Secretary in order to permit additional evidence to be taken before the Secretary (to be adduced in the manner and upon the terms and conditions that the court may determine), and to permit the Secretary to reconsider and, if appropriate, to modify or set aside, the Secretary's original findings of fact or the Secretary's original order.

(d) FINALITY OF JUDGMENT.—The judgment of the court affirming, modifying, or setting aside any order of the Secretary shall be final, subject to review by the Supreme Court of the United States upon certiorari or certification as provided in section 1254 of title 28 of the United States Code.

CITIZENS' PETITIONS

SEC. 183. (a) IN GENERAL.—Any person may petition the Secretary to initiate a proceeding for the issuance, amendment, or repeal of any regulation authorized by this title.

(b) ADMINISTRATIVE PROCEDURES.—(1) A petition under this section shall set forth the facts which it is claimed establish that it is necessary or appropriate for the Secretary to take the action requested in the petition.

(2) The Secretary may hold a public hearing or may conduct such investigation or proceeding as the Secretary finds appropriate in order to determine whether or not such petition should be granted.

(3) Within one hundred eighty days after filing of a petition described in paragraph (1), the Secretary shall either grant or deny the petition or inform the petitioner in writing why the Secretary has been unable to reach a decision on the petition. If the Secretary grants the petition, the Secretary shall commence an appropriate proceeding in ac-

cordance with the procedure required by this title and by title 5 of the United States Code. If the Secretary denies the petition, the Secretary shall either publish in the Federal Register the Secretary's reasons for the denial or provide the petitioner a document setting forth these reasons.

(c) JUDICIAL ACTION.—If the Secretary denies a petition filed under this section (or if the Secretary fails to grant or deny such petition within the one hundred eighty day period and to notify the petitioner in writing why no decision has been made) the petitioner may commence a civil action in a district court of the United States to compel the Secretary to initiate the proceeding requested in the petition. Any such action shall be filed within sixty days after the Secretary's denial of the petition or, if the Secretary fails to grant or deny the petition or properly to notify the petitioner within one hundred eighty days after filing the petition, within sixty days after the expiration of the one hundred eighty day period.

(d) AWARD OF COSTS AND FEES.—The court, in issuing any final order in any action brought pursuant to subsection (c) may award costs of suit and reasonable fees for attorneys and expert witnesses if the court determines that such an award is appropriate. Any court, in issuing its decision in an action brought to review such an order, may award costs of suit and reasonable fees for attorneys if the court determines that such an award is appropriate.

(e) SAVINGS PROVISION.—The remedies under this section shall be in addition to, and not in lieu of, other remedies provided by law.

COMPENSATION FOR FEES AND EXPENSES

SEC. 184. (a) AUTHORITY.—The Secretary may, pursuant to regulations prescribed under this section, provide compensation for reasonable attorneys' fees, expert witness fees, and other costs of participating in a proceeding for the issuance, amendment, suspension, or revocation of a monograph under subpart 2 of part B, to any person—

(1) who represents an interest which would substantially contribute to a fair and informed determination of the issues to be resolved in the proceeding, and

(2) if—

(A) the economic interest of such person is small in comparison to the costs of effective participation in the proceeding by such person, or

(B) such person demonstrates to the satisfaction of the Secretary that such person does not have sufficient resources adequately to participate in the proceeding without compensation under this subparagraph.

(b) DETERMINATION OF CONTRIBUTION.—In determining for purposes of subsection (a) (1) whether an interest will substantially contribute to a fair and informed determination of the issues to be resolved in a proceeding, the Secretary shall take into account the number and complexity of such issues and the extent to which representation of such interest will contribute to public participation in the proceeding and representation of a fair balance of interests for the resolution of such issues.

(c) LIMIT ON COMPENSATION.—(1) In determining whether compensation should be provided to a person under subsection (a), the Secretary shall take into account the ability of such person to bear all or some of the financial burden incurred by such person in connection with a proceeding.

(2) The rate of compensation for any fee established by the Secretary by regulation under subsection (a) may not exceed 75 per centum of the rate in effect for the last step of grade GS–13 of the General Schedule at the time the services for which the fee is sought were performed.

ENCOURAGEMENT OF JOINT ACTIVITIES

SEC. 185. The Secretary may, in accordance with regulations issued by the Secretary after consultation with the Attorney General and the Chairman of the Federal Trade Commission, encourage or require licensees under subpart 4 for drug products under a single monograph, or under monographs for related drug entities, to join in conducting surveillance activities required under section 108(h) or in conducting investigations required under section 108(i), in order to reduce the exposure of humans to risks to their health and rights, to prevent the waste of scarce scientific resources, and to promote competition. Nothing in this section is intended to create any exception to the antitrust laws or defense to any action under the Sherman Act (15 U.S.C. 1), the Clayton Act (15 U.S.C. 12), or the Federal Trade Commission Act (15 U.S.C. 41).

PART F—CONFORMING, TRANSITIONAL, EFFECTIVE DATE, AND OTHER GENERAL PROVISIONS

REPEALS AND CONFORMING AMENDMENTS

SEC. 191. Within one hundred eighty days following the date of the enactment of this title, the Secretary shall recommend to the Congress for enactment those amendments to laws related to this title that the Secretary determines are required to bring those laws into conformity with this title.

EFFECTIVE DATES AND TRANSITIONAL PROVISIONS

SEC. 192. (a) GENERAL.—Except as otherwise provided in this section, this title shall become effective upon enactment.

(b) DRUG MONOGRAPHS.—Subpart 2 of part B of this title shall become effective as follows:

(1) "EFFECTIVE" PRESCRIPTION "NEW DRUGS", ANTIBIOTIC DRUGS, AND INSULIN.—(A) Subpart 2 of part B of this title shall become effective 36 months following the date of enactment of this title, with respect to—

(i) any drug entity or drug product for which an application filed pursuant to section 505(b) of the Federal Food, Drug, and Cosmetic Act was "effective" and "approved", within the meaning of that section, on the day preceding the date of enactment of this title, and which could only be dispensed on a prescription under section 503(b) of such Act,

(ii) any drug or drug product which is subject to certification regulations issued prior to enactment of this title pursuant to section 507 of the Federal Food, Drug, and Cosmetic Act, and which could only be dispensed on a prescription under section 503 (b) of such Act, and

(iii) any drug or drug product composed wholly or partly of insulin which is subject to certification regulations prior to enactment of this title pursuant to section 506 of the Federal Food, Drug, and Cosmetic Act.

(B) Before the effective date under this paragraph, the Secretary shall issue an initial monograph in accordance with section 193 for each drug entity subject to this paragraph.

(2) "LESS THAN EFFECTIVE" PRESCRIPTION "NEW DRUGS" AND ANTIBIOTIC DRUGS SUBJECT TO FURTHER TESTING REQUIREMENTS.—(A) Subpart 2 of part B of this title shall become effective 60 months following the date of enactment of this title, with respect to any drug entity or drug product which could only be dispensed on a prescription under section 503(b) of the Federal Food, Drug, and Cosmetic Act—

(i) (I) for which an application filed pursuant to section 505(b) of the Federal Food, Drug, and Cosmetic Act was "effective" within the meaning of that section, and was "deemed approved" pursuant to section 107 (c) (2) of the Drug Amendments of 1962, on the day preceding the date of enactment of this title; or (II) which is subject to certification regulations issued prior to enactment of this title pursuant to section 507 of the Federal Food, Drug, and Cosmetic Act on the day preceding the date of enactment of this title; and

(ii) for which the Secretary has not issued a final order, under the procedures governing the drug efficacy study applicable to such drug entity or drug product, determining the drug to be "effective" within the meaning of section 505(d) of the Federal Food, Drug, and Cosmetic Act; and

(iii) which the Secretary has determined may remain on the market pending completion of scientific tests to determine effectiveness where there is a compelling justification of the medical need for the drug entity or drug product.

(B) Before the effective date under this paragraph, the Secretary shall either issue an initial monograph in accordance with section 193, or a notice described in clause (iii) of subparagraph (3)(A) of this subsection, for each drug entity subject to this paragraph.

(3) "LESS THAN EFFECTIVE" PRESCRIPTION "NEW DRUGS" AND ANTIBIOTIC DRUGS SUBJECT TO FINDINGS THAT THE DRUGS HAVE NOT BEEN SHOWN TO BE EFFECTIVE.—(A) Except as provided in paragraph (2) of this subsection, subpart 2 of part B of this title shall become effective 36 months following the date of enactment of this title, with respect to any drug entity or drug product which could only be dispensed on a prescription under section 503(b) of the Federal Food, Drug, and Cosmetic Act—

(i) (I) for which an application filed pursuant to section 505(b) of the Federal Food, Drug, and Cosmetic Act was "effective" within the meaning of that section, and was "deemed approved" pursuant to section 107 (c) (2) of the Drug Amendments of 1962, on the day preceding the enactment date of this title; or (II) which is subject to certification regulations issued prior to enactment of this title pursuant to section 507 of the Federal Food, Drug, and Cosmetic Act;

(ii) for which the Secretary has not issued a final order, under the procedures governing the drug efficacy study applicable to such drug entity or drug product, determining the drug entity or drug product to be effective" within the meaning of section 505(d) of the Federal Food, Drug, and Cosmetic Act; and

(iii) for which the Secretary has issued a notice of opportunity for hearing, under the procedures governing the drug efficacy study applicable to such drug entity or drug product, stating that the drug entity or drug product has not been shown to be "effective" within the meaning of section 505(d) of the Federal Food, Drug, and Cosmetic Act.

(B) Before the effective date under this paragraph, the Secretary shall either issue an initial monograph in accordance with section 193 or shall withdraw approval of the application or revoke the certification regulation in accordance with the procedures set forth in section 111 of this title and not the procedures set forth in section 505 or 507 of the Federal Food, Drug, and Cosmetics Act.

(4) NONPRESCRIPTION DRUGS.—(A) Subpart 2 of part B of this title shall become effective 60 months following the date of enactment of this title with respect to any drug entity or drug product which could be dispensed without a prescription under section 503(b) of the Federal Food, Drug, and Cosmetic Act and which is subject to the procedures and standards established by the Secretary for determining whether these drug entities and drug products are generally recognized as safe and effective and not misbranded.

(B) Before the effective date under this paragraph, the Secretary shall issue, in accordance with those procedures and standards as they may from time to time be amended, for each drug entity or drug prod-

uct subject to this paragraph, either a monograph or a final order excluding the drug entity from a monograph. A monograph issued under the procedures and standards referred to, notwithstanding any differences between those procedures and standards and the requirements of subpart 2 of part B, shall have the same status as a monograph issue in accordance with subpart 2 of part B.

(C) With respect to any drug entity or drug product which is described in paragraph (1), (2), or (3) of this subsection and which is also subject to the procedures referred to in this paragraph, the provisions of paragraph (1), (2), or (3) shall apply unless the Secretary, by a notice published in the Federal Register, determines that it would promote the efficient administration of this title to apply the provisions of this paragraph instead to the drug entity or drug product.

(5) LICENSED BIOLOGICAL DRUGS.—(A) Except as provided in paragraph (6) of this subsection, subpart 2 of part B of this title shall become effective 36 months following the date of enactment of this title with respect to any biological drug entities or biological drug products for which a product license filed pursuant to section 351 of the Public Health Service Act was approved and in effect on the day preceding the enactment date of this title.

(B) Before the effective date under this paragraph, the Secretary shall issue an initial monograph in accordance with section 193 for each drug entity subject to this paragraph.

(6) LICENSED BIOLOGICAL DRUG SUBJECT TO FURTHER REVIEW.—(A) Subpart 2 of part B of this title shall become effective 60 months following the date of enactment of this title with respect to any biological drug entity or biological drug product:

(i) for which a product license filed pursuant to section 351 of the Public Health Service Act was approved and in effect on the day preceding the enactment of this title, and

(ii) which is subject to the procedures established by the Secretary for determining whether these drug entities are generally recognized as safe and effective and not misbranded.

(B) Before the effective date under this paragraph, the Secretary shall issue, in accordance with those procedures, for each drug entity subject to this subparagraph either a monograph or a final order excluding the drug entity from a monograph. A monograph issued under the procedures referred to shall have the same status of a monograph issued in accordance with subpart 2 of part B.

(7) DRUGS PENDING APPROVAL.—(A) Subpart 2 of part B of this title shall become effective as provided in subparagraph (B) with respect to any drug entity or drug product—

(i) which is subject to an application filed pursuant to section 505(b) of the Federal Food, Drug, and Cosmetic Act prior to, but not "approved" within the meaning of that section on or before, twelve months following enactment of this title; or

(ii) which is subject to a petition for the issuance of certification regulations filed pursuant to section 507(f) of the Federal Food, Drug, and Cosmetic Act prior to, but not acted upon on or before, twelve months following the enactment of this title, or

(iii) which is subject to an application for a license filed pursuant to section 351 of the Public Health Service Act prior to, but not approved pursuant to that section on or before, twelve months following the enactment of this title.

(B) Subpart 2 of part B of this title shall become effective with respect to drugs described in subparagraph (A) on whichever of the following first occurs:

(i) twenty-four months following the date of enactment of this title; or

(ii) upon issuance of an order by the Secretary denying approval of the application or declining to issue the certification regulation; or

(iii) upon issuance of an order by the Secretary approving the application or issuing the certification regulation (in which case the Secretary shall, within three months of subpart 2 of part B becoming effective with respect to the drug, issue an initial monograph for the drug in accordance with section 193).

(8) "GRANDFATHERED" DRUGS.—(A) With respect to any drug entity or drug product for which an exemption was claimed from the definition of "new drug" under section 201 (p)(1) of the Federal Food, Drug, and Cosmetic Act on the date of enactment of this title, or for which an exemption was claimed from the certain provisions of the Drug Amendments of 1962 by reason of section 107 (c) of those Amendments, subpart 2 of part B of this title shall become effective one-hundred-twenty months following the date of enactment of this title.

(B) Within twenty-four months following the date of enactment of this title, the Secretary shall promulgate special procedure and standards for the review of the effectiveness risks, and safety of all drug entities and drug products described in subparagraph (A).

(C) Before the effective date under this paragraph, the Secretary shall issue a monograph in accordance with the procedures and standards promulgated under subparagraph (B) for each drug entity or drug product subject to this paragraph which upon review has been found to be effective and safe.

(9) HOMEOPATHIC DRUGS.—With respect to any drug entity or drug product recognized in the official Homeopathic Pharmacopeia as of the date of enactment of this title, subparts 3 and 8 of part B of this title shall become effective on the date of enactment of this title.

(10) ALL OTHER DRUGS.—Part B of this Act shall become effective twelve months following the enactment of this Act with respect to any drug entity or drug product not specifically described in paragraphs (1) through (9) of this subsection.

(c) LICENSES FOR DRUG PRODUCTS.—(1) Subpart 4 of part B of this title shall become effective with respect to any drug product eligible for licensure under a monograph issued in accordance with subsection (b) on the date six months following the date of issuance of that monograph.

(2) The provisions of section 121(b) shall not apply to any monograph for a drug entity issued under section 193, except to the extent that any limited eligibility would remain in effect after the issuance of the monograph if this title had been in effect five years prior to its effective date and if the monograph had been issued at the same time as the approval for marketing the drug entity, if any, was issued under chapter V of the Federal Food, Drug, and Cosmetic Act or section 351 of the Public Health Service Act.

(3) Any drug product with respect to which an application filed pursuant to section 505(b) of the Federal Food, Drug, and Cosmetic Act was "effective" and "approved" or "deemed approved" within the meaning of that section, or with respect to which a biological product license filed pursuant to section 351 of the Public Health Service Act was approved and in effect, and any drug product which could be dispensed without a prescription under section 503(b) of the Federal Food, Drug, and Cosmetic Act and which was listed in accordance with section 510(j) of that Act, on the day preceding the effective date under this paragraph shall be deemed to be licensed on the effective date.

(3) Any drug product which is eligible for licensure under a monograph and with respect to which an application for a product license was submitted to the Secretary on the day preceding the effective date under this paragraph shall be deemed to be licensed on the effective date.

(d) REGISTRATION FOR INVESTIGATIONAL USE OF DRUG PRODUCTS.—(1) Subpart 5 of part B of this title shall become effective twenty-four months following the date of enactment of this title.

(2) Any drug product subject to an exemption granted under section 505(i) or 507(d) of the Federal Food, Drug, and Cosmetic Act and in effect on the day preceding the effective date under this subsection shall be deemed to be registered on the effective date.

(e) EXPORT PERMITS FOR DRUG PRODUCTS.—Subpart 6 of part B of this title shall become effective twelve months following the date of enactment of this title.

(f) INFORMATION LABELING FOR PATIENTS.—Section 151 of this title shall become effective upon the date of enactment of this title. The Secretary shall, within twelve months following the date of the enactment of this title, publish in the Federal Register a list of priorities for requiring prescription drug products to be accompanied by information labeling for patients. Such priorities shall be based upon consideration of the frequency of the use of drug products containing particular drug entities, the frequency of use of such drug products for a purpose or in a manner other than that set forth in the information labeling, the frequency of occurrence of adverse effects from the use of such drug product, the seriousness of such adverse effects, and the potential for misuse or abuse of such drug products.

(g) FEDERAL DRUG COMPENDIUM.—Section 155 of this title shall become effective thirty-six months following the date of enactment of this title.

ISSUANCE OF INITIAL MONOGRAPHS

SEC. 193. (a) CONTENT AND PROCEDURES.—When so directed by section 192 of this title, the Secretary shall issue initial monographs in accordance with the following:

(1) The monographs shall be issued as final orders, without regard to the procedures set forth either in subpart 2 of part B of this Act or in subchapter II of chapter 5 of title 5 of the United States Code.

(2) The portions of the monograph containing the requirements and guidelines for contents of the information labeling for a drug product shall be based solely upon the following:

(i) Any specific requirements applicable to the labeling of such a drug product on the day immediately preceding the issuance of the monograph.

(ii) Where no specific requirements existed, appropriate information labeling used for such a drug product in compliance with the Federal Food, Drug, and Cosmetic Act or with section 351 of the Public Health Service Act, as applicable, on the day immediately preceding the issuance of the monograph.

(3) The portions of the monograph containing the standards and requirements for licensure of drug products under the monograph shall be solely upon the standards and conditions applicable to such products on the day immediately preceding the issuance of the monograph, except as follows:

(i) For prescription drug products which were subject to section 505 of that Act on the date of enactment of this title, the Secretary shall not require the submission of any preclinical or clinical data or information regarding the risk or effectiveness of the drug product unless the Secretary finds that these

data or information are necessary to determine that the drug product is eligible for licensure or may be licensed under the monograph, except insofar as such is required pursuant to sections 121(b) and 192(c)(2).

(ii) For any drug subject to requirements for listing under section 510(j) of the Federal Food, Drug, and Cosmetic Act, but not to the requirements of sections 505, 506, or 507 of that Act, the Secretary shall not require the submission of any information other than that described in section 122(a). This restriction shall not apply with respect to any drug product which was exempt from the requirements of sections 505, 506, or 507 of the Federal Food, Drug, and Cosmetic Act solely because the drug product was not in interstate commerce.

(b) STATUS OF INITIAL MONOGRAPHS.—Any initial monograph issued pursuant to this section shall have the same status as a monograph issued pursuant to subpart 2 of part B of this title, and shall thereafter be subject to the standards and procedures for amendment, revocation, suspension, and judicial review provided for a monograph issued pursuant to that subpart.

PENDING PROCEEDINGS

SEC. 194. (a) CRIMINAL PROSECUTIONS.—Prosecutions for any violation of law relating to a drug entity or drug product occurring prior to the effective dates of section 192 shall not be affected by the repeals or amendments made by part F of this title, or abated by reason thereof.

(b) CIVIL ACTIONS.—Civil seizures or forfeitures and injunctive proceedings relating to a drug entity or drug product commenced prior to the effective dates of section 192 shall not be affected by the repeals or amendments made by part F of this title, or abated by reason thereof.

(c) ADMINISTRATIVE PROCEEDINGS.—Except as provided in subsection (b)(3) of section 192, administrative proceedings relating to a drug entity or drug product pending before the Secretary on the effective dates of section 192 shall not be affected by the repeals or amendments made by this title or abated by reason thereof.

CONTINUATION OF REGULATIONS

SEC. 195. Any orders, rules, and regulations which have been promulgated under any law affected by this title and which are in effect on the day preceding enactment of this title shall continue in effect until modified, superseded, or repealed.

SAVINGS PROVISIONS

SEC. 196.(a) SPECIFIED LAWS.—Nothing in this title, except this part, shall be construed as in any way affecting, modifying, repealing, or suspending the provisions of any of the following Acts:

(1) The provisions of the Act of Congress approved March 14, 1913 (37 Stat. 832–833) relating to viruses, serums, toxins, and analogous products applicable to domestic animals.

(2) The Controlled Substances Act (21 U.S.C. 801).

(3) The Controlled Substances Import and Export Act (21 U.S.C. 951).

(4) The Sherman Act (15 U.S.C. 1).

(5) The Wilson Tariff Act (15 U.S.C. 8 and 9).

(6) The Clayton Act (15 U.S.C. 12).

(7) The Act of June 9, 1936, ch. 592 (15 U.S.C. 13, 13a, and 212).

(8) The Federal Trade Commission Act (15 U.S.C. 41).

(b) AUTHORITY OF THE SECRETARY OF THE TREASURY AND THE ATTORNEY GENERAL.—Nothing in this title shall derogate either from the authority of the Secretary of the Treasury under the customs and related laws, or from the authority of the Attorney General under the laws relating to controlled substances.

APPLICATION OF STATE LAW

SEC. 197. (a) GENERAL RULE.—Except as provided in subsection (b), no State or political subdivision of a State may establish or continue in effect with respect to a drug product any requirement—

(1) which is different from or in addition to any requirement applicable under this title to the drug product, and

(2) which relates to the packaging or labeling of the drug product.

(b) EXEMPT REQUIREMENTS.—Upon application of a State or political subdivision of a State, the Secretary may, by regulations promulgated after notice and opportunity for a public hearing, exempt from subsection (a), under such conditions as may be prescribed under such regulations, a requirement of such State or political subdivision of a State applicable to a drug product if—

(1) the requirement is more stringent than a requirement under this title which would be applicable to the drug product if an exemption were not in effect under this subsection; or

(2) the requirement—

(A) is required by compelling local conditions, and

(B) compliance with the requirement would not cause the drug product to be in violation of any applicable requirement under this title.

TITLE II—NATIONAL CENTER FOR CLINICAL PHARMACOLOGY; EVALUATION OF THE ACT

NATIONAL CENTER FOR CLINICAL PHARMACOLOGY

SEC. 201. The Public Health Service Act is amended by inserting after title XVII the following new title:

"TITLE XVIII—NATIONAL CENTER FOR CLINICAL PHARMACOLOGY

"ESTABLISHMENT OF CENTER

"SEC. 1801. (a) There is established in the Department of Health, Education, and Welfare the National Center for Clinical Pharmacology (hereinafter in this title referred to as the 'Center') which shall be under the direction of a Director who shall be appointed by the Secretary.

"(b) To implement this title, the Secretary may, in addition to any other authority available to him, use personnel, equipment, and facilities and other physical resources of the Department of Health, Education, and Welfare. The Secretary may also secure for the Center, for such periods as the Secretary deems advisable, the assistance and advice of experts and consultants from the United States and abroad.

"RESEARCH FUNCTIONS OF THE CENTER

"SEC. 1802. (a) Upon request or on its own initiative, the Center may conduct and support research in clinical pharmacology and clinical pharmacy, including investigations (1) of the safety and effectiveness of existing and new uses of drug products, (2) for the development of drug products or diseases and other conditions of low incidence, (3) of drug products of special significance or with respect to which there is substantial controversy as to safety and effectiveness and for which there have been either no or minimal investigations, and (4) to otherwise facilitate breakthroughs in research on drug products.

"(b) The Center shall conduct an ongoing review and analysis of the use of drug products in the United States (as determined on the basis of information submitted under the Drug Regulation Reform Act of 1978 and other information obtained by the Secretary) and on the basis of such review and analysis prepare an annual Drug Experience Assessment Report for the Secretary. The report may be on such categories of drug products as the Secretary determines is appropriate. The report shall include, for the drug products included in the report, a qualitative analysis of the use of such drug products as are currently in use in the United States, adverse effects and other unanticipated reactions from such drug products, an assessment of the frequency of the occurrence of such effects and reactions, an analysis of the use of such drug products on a regional basis, by specialties of medicine, or any other category of use of such drug products and shall include recommendations for improvement in the use of such drug products.

"(c) The Center shall facilitate and may support analysis of the consequences of State and Federal regulation of the manufacture, importation, export, and distribution of drug products; public and private research activities and practices involving drug products; and practices of the pharmaceutical industry and health professionals respecting drug products. The Director of the Center shall report, on a periodic basis, the results of the analysis conducted and supported under this subsection.

"(d) The Director shall periodically report to the Secretary on (1) promising areas of and new techniques in research on drug entities and drug products and (2) diseases or other conditions for which current research on drug entities and drug products is insufficient.

"(e) The Secretary shall publish and otherwise make available to the public the reports made by the Director under this section.

"TRAINING FUNCTIONS OF CENTER

"SEC. 1803. (a)(1) The Secretary, acting through the Center, may make grants—

"(A)(i) to schools of medicine, osteopathy, dentistry, pharmacy, and nursing and to groups of such schools for—

"(I) the planning, establishment, and operation of new programs, and

"(II) the expansion of existing programs, of training in clinical pharmacology for full-time students (as defined in section 770(c)(2) or 810(d)(2)) enrolled in such schools;

"(ii) to training centers for allied health professions for—

"(I) the planning, establishment, and operation of new programs, and

"(II) the expansion of existing programs, of training in clinical pharmacology for students enrolled in such centers; and

"(iii) to schools of pharmacy for—

"(I) the planning, establishment, and operation of new programs, and

"(II) the expansion of existing programs, of training in clinical pharmacy for full-time students (as defined in section 770(c)(2)) enrolled in such schools;

"(B) to schools of medicine, osteopathy, dentistry, pharmacy, and nursing and to other public and nonprofit private entities for the planning, establishment, and operation of new programs, and for the expansion of existing programs, of continuing education in clinical pharmacology and clinical pharmacy for physicians, dentists, pharmacists, and nurses, and to training centers for allied health professions for the planning, establishment, and operation of new programs, and for the expansion of existing programs, of continuing education in clinical pharmacology for allied health personnel; and

"(C) to public and nonprofit private entities for demonstration projects to demonstrate new roles for (i) clinical pharmacologists and clinical pharmacists in the practice of medicine, osteopathy, dentistry, and pharmacy, and (ii) clinical pharmacology in nursing.

Not more than 50 per centum of any grant (or series of grants) for any program made under subparagraph (A) or (B) of this paragraph may be used for the planning and establishment of such program.

"(2) No grant may be made under subsection (a) unless an application therefor has been submitted, in such form and man-

ner as the Secretary shall prescribe, to and approved by the Secretary The Secretary shall not consider any such application until there has been review of it by an appropriate peer review group. The Secretary shall determine the amount of any such grant. Payments of any such grant may be made in advance or by way of reimbursement and in such installments and on such conditions as the Secretary deems necessary to carry out the purposes of this subsection.

"(b)(1) The Secretary, acting through the Center, may provide fellowships to assist physicians, dentists, nurses, and pharmacists and other qualified individuals in meeting the cost of obtaining graduate training and research training in clinical pharmacology and clinical pharmacy.

"(2) The Secretary, acting through the Center, may provide fellowships to physicians, dentists, nurses, and pharmacists and other qualified individuals to undertake research at the Center. The Secretary shall provide leaves of absence and otherwise assist scientists and other qualified individuals employed by the Department of Health, Education, and Welfare in obtaining such fellowships.

"(3) Fellowships provided under this subsection shall include such stipends and allowances (including travel and subsistence expenses and dependency allowances) as the Secretary may deem necessary.

"(c) In carrying out this section, the Secretary shall consult with the administrative entity of the Department of Health, Education, and Welfare which administers section 770."

EVALUATION OF THE ACT

SEC. 202. (a) The Secretary shall arrange, in accordance with subsection (b), for the conduct of an independent evaluation of title I, including an evaluation of the effect of such title on—

(1) the protection afforded the public by such title against adverse reactions from and misuse of drug products,

(2) innovation in research on drug entities and drug products,

(3) the economics of the pharmaceutical industry,

(4) the cost of drug products,

(5) prescribing practices, and

(6) the time required for the issuance of monographs for drug entities under such title and the extent to which such time reflects the public health need to advance capabilities to treat diseases and other harmful conditions in humans and to facilitate breakthroughs in research on drug entities and drug products and the need for the protection of the public health from unsafe drug entities and drug products.

(b) The Secretary shall enter into such contract (or contracts) with a qualified entity (or entities) as may be necessary to conduct and complete, in accordance with subsection (c), the evaluation required by subsection (a).

(c) Within seven years of the date of the enactment of this Act the evaluation required by subsection (a) shall be completed and a comprehensive report on the results of the evaluation shall be submitted to the Committee on Interstate and Foreign Commerce of the House of Representatives and the Committee on Human Resources of the Senate. Interim reports shall be made to such committees on the progress of the evaluation and on any significant findings.

● Mr. JAVITS. Mr. President, today I am joining with my colleagues in the introduction of the Drug Regulation Reform Act of 1978, the principal purpose of which is to improve the system by which safe effective drugs for human use are developed, reach the marketplace, and are appropriately used by physicians and patients.

As ranking member of the Committee on Human Resources and an active member of the Subcommittee on Health and Scientific Research, I have worked closely with my colleagues, Senator KENNEDY, chairman of the subcommittee and Senator WILLIAMS, chairman of the full committee, also cosponsors, in our efforts to develop legislative reforms to assure a regulatory process which will meet the public needs.

The drug regulatory process is one of the most critical aspects of Federal health responsibilities to the public. Each decision to approve or disapprove a new drug directly affects the lives of American citizens. Drugs are powerful tools of medicine which if appropriately tested, studied, and used can prevent disease, alleviate excruciating pain, and even treat and cure life-threatening or debilitating conditions. If these tools are not appropriately tested, studied, and used, they can cause serious illness, suffering, and death. We have an obligation to guarantee that each American be assured that these responsibilities are carried out in the public interest.

At the same time we cannot inhibit the earliest possible use by the American people of new drugs, especially when in other leading countries such drugs are already available.

There have been many bills introduced in this Congress to meet this objective. In the Senate, Senators KENNEDY and NELSON have each introduced important proposals. Senator WILLIAMS and I have done so also. In the House of Representatives, Congressman ROGERS, chairman of the Health Subcommittee of the Interstate and Commerce Committee has worked diligently on his bill.

In December, Secretary Califano of the Department of Health, Education, and Welfare and Commissioner Kennedy of the Food and Drug Administration presented to us a preliminary draft of an administration bill which was designed to meet similar objectives. It was decided, rather than introduce the administration bill at that time, that Secretary Califano and Commissioner Kennedy would join with us in developing a consensus bill.

I am pleased to say that, after long and constructive sessions of negotiating and deliberation, the bill we are introducing today is the result of this process. This was an unique process of cooperation between and among the interested parties. I believe very deeply that in major matters of this nature, party lines and lines between the executive and legislative branches have to be used.

The main reason that we were able to join together in the development of this bill is because we share two fundamental principles: First, we believe in the importance of and need for legislative reform; and second, we have a common understanding of the public policy objectives we wish to achieve. I wish to state these objectives as follows:

First. Create a more open decisionmaking process with effective participation by interested members of the public;

Second. Establish criteria for making important scientific and public policy decisions and inform the public of the criteria and the reasons why these decisions are made;

Third. Increase the scientific capability of the agency;

Fourth. Simplify and expedite the operation of the agency's procedures governing the premarket testing of innovative drugs;

Fifth. Assure the protection of human subjects of experimentation during the testing of drugs;

Sixth. Encourage innovation and the development of new and important drugs;

Seventh. Eliminate the duplicative testing of essentially identical drugs, while increasing the ability of the agency to insure high quality products;

Eighth. Provide a means of assuring the prompt availability of new lifesaving drugs, without weakening the safeguards for safe and effective drugs;

Ninth. Grant public access to nontrade secret safety and efficacy information supplied to the agency;

Tenth. Provide authority for post approval surveillance and testing of approved drugs to assure that drugs are safely used;

Eleventh. Eliminate irrational influences on the physician's prescribing decisions; and

Twelfth. Provide consumers and patients with basic information about the prescription drugs they use in order to enhance their ability to make informed decisions.

I strongly support these objectives; however there are inherent dilemmas in accomplishing them all. One example is the extent to which regulation constrains innovation. As we begin hearings on these bills and move toward committee consideration, I will continue to work, with my colleagues, toward finding sound solutions to this and other difficult public policy choices which preserve the basic tenet of the greatest good for the greatest number of people.

I have supported and participated in the development of this proposal which we are introducing today because it serves as a vehicle for raising and further clarifying the critical issues and choices we must make with respect to drug regulation in our society.

Although I reserve my rights to further clarify and balance these issues, I would like briefly to highlight some major concerns. This bill does not establish the Food and Drug Administration by statute. It is not generally recognized that the FDA is the only regulatory agency not established by the Congress. The Commissioner of the FDA is the only head of a major regulatory agency not confirmed by the Senate. This is a great deficiency in the bill. I intend with Senator KENNEDY to establish the FDA by statute as an independent agency within HEW.

I also have serious reservations about granting new powerful authority to the Government without carefully delineated standards for application of the authority and regard for due process.

We all know that if there is strong opposition to this bill, it is likely to come from the pharmaceutical manufacturers. Now I wish to serve notice on them that

they have nothing to fear, provided that they join in the same process that we have joined in, of trying to fashion a bill in the best interests of the American people. Some of their leaders have informed me, as recently as yesterday, that they know the legislation is needed and therefore it is up to us creatively to fashion it. Now the pharmaceutical industry is a powerful one, and it has been responsible for many great breakthroughs and can be responsible for many more, and the fact that we inhibit, for too long a time, the utilization by the American people of great breakthroughs in these drug fields while foreign peoples can use them very much sooner, is something which troubles me very deeply. Also, we have a sense of responsibility to assure that the industry shall have the resources and the framework within which to operate in an innovative way. I wish to assure them that this is our common care, and we can only discharge it if they will join us in trying to fashion a consensus bill; I would welcome very much that kind of cooperation. I hope we get it, and it will be one of my principal concerns as we develop this bill.

Similarly, it is my expectation that consumers will come and express their views and suggestions for making this legislation more effective.

Again, it is my view that today begins the careful consideration of all the legislative proposals before the Human Resources Committee with respect to drug reform legislation. I believe this will result in the most important drug reform law in the last 40 years.●

● Mr. CRANSTON. Mr. President, I am pleased to join in cosponsoring this truly momentous legislation. In doing so I want to make clear that neither I nor my staff have had a full opportunity to study, in any detail, this very lengthy bill. Thus, my cosponsorship in no way should be interpreted as suggesting that I am in agreement with all or even most of the provisions in the legislation.

I am joining as a cosponsor to signify my very strong approval of and support for two aspects of this legislation.

First, this bill represents the product of a unique cooperation between the Department of Health, Education, and Welfare, and the Health Subcommittee leaders in both the House and the Senate. In December, I strongly urged that such a cooperative effort be undertaken because of the great need for action to reform the processes and performance of the Food and Drug Administration.

Thus, I congratulate all the parties who have labored so diligently to produce the consensus legislation. I believe they have made a major contribution to our national well-being.

I would like to note the leadership which has been exhibited in this matter by FDA Commissioner Donald Kennedy—a fellow Californian. Although there has been a general recognition for many years that improvements were badly needed in the drug approval and surveillance procedures, it was not until Commissioner Kennedy was named to head the Food and Drug Administration that a concerted and sincere effort has been made by any administration to address these issues. His dedication has been crucial to the success of the cooperative HEW-congressional effort.

Second, I am in general agreement with the principal goals of the legislation as I understand them—to speed up substantially the entire Food and Drug Administration approval process for new drugs so that important new medicines can be made available to help treat illness while, at the same time, providing a clear mandate to remove from the market substances that prove harmful in use so that the public health can be fully and fairly protected.

I am fully cognizant of the concerns that have been expressed by the pharmaceutical manufacturers about provisions they believe would have a deleterious effect on the incentives for their initiating research into new areas of exploration and development.

This is certainly an extremely serious question. We cannot afford to slow down in our war on disease and disability. We must continue to move forward, surely and steadily, to make the gains of medical science available to all people as quickly and as safely as we can.

Thus, I will be looking very closely at industry's suggestion on how to achieve these goals and will be seeking a wide spectrum of advice from scientists, health care professionals, and manufacturers in my State. Indeed, I will specifically be contacting them to request their input.

It is essential that the drug industry, researchers, providers, consumers, and all other parties be given a full opportunity to be heard on these and other questions. The administration and pharmaceutical manufacturers should come forward with all the evidence they can marshal on the issue of incentives to discovery and development.

It is my hope that in the course of hearings and consideration of this legislation, a regulatory procedure will be found that will encourage the development of new products and will also insure that the benefits of these products will be made available to the public as soon as possible.●

By Mr. RIEGLE:

S. 2756. A bill entitled the "Anti-Blackout Act of 1978"; to the Committee on Commerce, Science, and Transportation.

● Mr. RIEGLE. Mr. President, I am pleased today to introduce the Anti-Blackout Act of 1978. This legislation is designed to restrict blackouts of professional sporting events in communities where games are played.

Under old blackout provisions games which were not sold out 72 hours prior to starting time could be blacked out within a 75-mile radius of the stadium or gymnasium. Passage of the Anti-Blackout Act of 1978 would reduce the blackout radius from 75 miles to 30 miles; reduce the sellout deadline from 72 hours to 48 hours; require 95 percent instead of 100 percent sales of tickets; and, prohibit blackouts of playoff games.

The old law was enacted by the Congress in 1973, and expired in 1975. National Football League Commissioner Pete Rozelle agreed to a 2-year extension of the terms of the old law for professional football on the condition that Congress restrain from passing new legislation. That agreement expired at the end of the 1977 football season.

While the purview of this act includes professional football, baseball, basketball, and hockey, its passage would most significantly affect professional football fans. Football fans from around the country have experienced the frustration of having their local football team's games blacked out. The case of the Baltimer Colts/Oakland Raiders playoff game last year is illustrative.

Most Washington football fans will recall that Baltimore qualified for the playoffs only 5 days before the game with Oakland. Baltimore's Memorial Stadium did not possess the manpower to sell out the game before the 72-hour deadline. The game was blacked out within a 75-mile radius of Memorial Stadium, which encompassed the entire Washington metropolitan area.

The Washington experience is not uncommon. In fact, Washington has been very fortunate compared with some other cities. Most Los Angeles Rams, all Houston Oilers and New Orleans Saints, and six of the seven Detroit Lions home games were blacked out last year. I fail to see why Detroit Lion fans must watch the Chicago Bear games while Chicago fans are watching the Detroit Lions.

The Federal Communications Commission has estimated that elimination of the blackout rule would not substantially reduce ticket sales. In addition, any loss of seating would have a negligible effect on the revenues of NFL teams.

NFL teams earned an average gross profit in 1977 of $4 million. Television revenues next season will exceed both player salaries and revenue from tickets sales. It is patently clear that fans of professional football deserve some of the benefits of the NFL's prosperity.

The four major provisions of the Anti-Blackout Act of 1978 are constructed to remedy the problems that have occurred in the past and prevent occurrence of similar problems in the future. Reducing the blackout radius from 75 to 30 miles will eliminate blackouts of many nonlocal home games—for example, of Los Angeles Rams games in San Diego and Baltimore Colt games in Washington. Reduction of the sellout deadline from 72 hours to 48 hours will simply give teams more time to sell their tickets. Reduction of the ticket sales requirement to 95-percent seating capacity would eliminate the need of selling poor or obstructed-view seats to guarantee local telecasts of games. The prohibition of blackouts of all playoff games is self-explanatory.

I ask unanimous consent that the Anti-Blackout Act of 1978 be included in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2756

Be it enacted by the Senate and House of the United States of America in Congress assembled, That part I of title III of the

Communications Act of 1934 is amended by adding at the end thereof the following new section:

"BROADCAST OF GAMES OF PROFESSIONAL SPORTS CLUBS

"SEC. 331. (a) If any game of a professional sports club is to be broadcast by means of television pursuant to a league television contract and at least 95 percent of the tickets of admission for seats at such game which were available for purchase by the general public 120 hours or more before the scheduled beginning time of such game have been purchased 48 hours or more before such time, no agreement which would prevent the broadcasting by means of television of such game at the same time and in an area within a radius of 30 miles of the location at which such game is being played shall be valid or have any force or effect. In the case of any such game which is engaged in or conducted as part of any competition occurring immediately after the conclusion of a regular season of play, no such agreement shall be valid or have any force or effect whether or not the percentage of tickets specified in the preceding sentence have been purchased during the period specified in such sentence. The right to broadcast any such game by means of television at such time and in such area shall be made available, by the person or persons having such right, to a television broadcast licensee on reasonable terms and conditions unless the broadcasting by means of television of such game at such time and in such area would be a telecasting which section 3 of Public Law 87-331, as amended (15 U.S.C. 1293), is intended to prevent.

"(b) If any person violates subsection (a) of this section, any interested person may commence a civil action for injunctive relief restraining such violation in any United States district court for a district in which the defendant resides or has an agent. In any such action, the court may award the cost of the suit including reasonable attorney's fees.

"(c) For the purposes of this section:

"(1) The term professional sports club includes any professional football, baseball, basketball, or hockey club.

"(2) The term 'league television contract' means any joint agreement by or among professional sports clubs by which any league of such clubs sells or otherwise transfers all or any part of the rights of such league's member clubs in the sponsored telecasting of the games engaged in or conducted by such clubs.

"(3) The term 'agreement' includes any contract, arrangement, or other understanding.

"(4) The term 'available for purchase by the general public', when used with respect to tickets of admission for seats at a game or games to be played by a professional sports club, means only those tickets on sale at the stadium where such game or games are to be played, or, if such tickets are not sold at such stadium, only those tickets on sale at the box office closest to such stadium.

"(d) The Commission shall conduct a continuing study of the effect of this section and shall, not later than April 15 of each year, submit a report to the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Interstate and Foreign Commerce of the House of Representatives with respect thereto. Such report shall include pertinent statistics and data and any recommendations for legislation relating to the broadcasting of professional football, baseball, basketball, and hockey games which the Commission determines would serve the public interests".

By Mr. MAGNUSON (for himself, Mr. JACKSON, Mr. ABOUREZK, Mr. BROOKE, Mr. PACKWOOD, Mr. RIEGLE, and Mr. STEVENS):

S. 2757. A bill to establish a national policy concerning agricultural land; to establish an Agricultural Land Review Commission; to establish a demonstration program for protecting agricultural land from being used for nonagricultural purposes; and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

NATIONAL AGRICULTURAL LAND POLICY ACT

Mr. MAGNUSON. Mr. President, I rise to introduce a bill designed to preserve and protect our agricultural farmlands.

As we all know, agriculture has been at the heart of the American experience. In fact, the story of the westward movement of our population, the settling of the frontier, is the story of the expansion of American agriculture.

But since the turn of the century, farming in this country has been in retreat. We have seen a relentless decline in the number of tillable acres.

For most of the century, the growth of corporate farming and the increased use of mechanization has been the prime factor in driving many people off the land and into the cities.

Since 1940, mechanization enabled the farm population to decline from 31 million to less than 10 million in 1970. The number of farms in the same period shrunk from 6.4 million to 2.9 million.

But even as the number of farms decreased, the output of those that remained increased.

It is a tremendous testimony to the American farmer that in 1951, a single farm worker produced enough food for only 16 people. Two decades later, that same farmer fed 51 people.

However, the decline in our farm acreage continues. And we can no longer rely on technological innovation to increase the yield on a smaller and smaller amount of land.

Scientists tell us that the green revolution is over. Increases in agricultural production cannot be projected because of changing weather patterns, soil erosion, competition for water, genetic vulnerability, increased costs, and scarcities of fuels and fertilizers.

This is all the more alarming when you consider that each year between 2 and 3 million acres of land are being converted from agriculture to nonagricultural uses. The United States has a cropland reserve of only 111 million acres, and only 24 million acres is immediately convertible to the plow.

Today, it is not that farmers are acquiring larger farms, but that many farmers are leaving the land altogether, selling their homesteads to the developers, who pave over the green spaces with housing, roads, and industrial plants.

The loss of agricultural land has been especially severe near our urban areas. And this is a tragedy, because urban agricultural farm lands are a unique resource.

Their loss means an ever-increasing dependency on energy-intensive mechanized farming, with its expensive use of irrigated lands and its high cost associated with long-haul transportation.

Preserving a green belt of farm lands around our urban areas would insure a fresh supply of agricultural products to our city dwellers at a price they can afford.

It would continue to separate the rapidly expanding developed areas with expenses of open, unfettered land, enhancing the natural beauty and the quality of life for everyone.

And it would preserve a rapidly disappearing way of life, by insuring an opportunity for citizens to earn their living on farms, to pass their lands on to their children.

Having those fertile, green acres producing fruits and vegetables is both an economic and aesthetic asset for everyone.

But without some Federal, nationwide program, the farms inevitably will yield to the pressures to sell out to homes and industry. They cannot be protected by land use regulations or ad valorem taxation alone.

That is why, Mr. President, I rise today to introduce the National Agricultural Land Policy Act.

Its purpose is to establish a national policy of retaining and protecting our agricultural land, and to insure that all activities of the Federal Government are in harmony with this policy.

First, let me calm any fears there might be by stating unequivocally that this is not a Federal land use bill.

There are severe limitations built into the legislation which prevent the Federal Government from restricting the use of privately owned land, or depriving landowners of their property rights. And it states that the Federal Government shall in no way usurp the authority or responsibility now delegated to States or local governments.

This bill is merely an attempt to use the resources of the Federal Government to provide research assistance and financial aid to local governments in their efforts to develop programs to preserve our rapidly dwindling supply of usable farm acreage.

The act would establish an 11-member Agricultural Land Review Commission. Two members would be appointed from each House of Congress. The Secretary of Agriculture or his designee would sit on the Commission. The remaining six members would be appointed by the President, three from State or local government, three from private life. They would be geographically representative of the affected parts of the United States.

The Commission would be empowered to study our agricultural lands, their quantity, quality, location and financing.

It would be asked to study how agricultural land and its use fits into the fabric of our national life, how it relates to the concerns of energy, economy, urban growth and development, foreign relations and trade, and humanitarian aid.

The Commission would be asked to report back to the President and Congress with a preliminary report within 18 months. A final report would be submitted within 3 years.

That final report could include modifications in policies, programs, and the laws of the United States, as well as recommendations for the coordination of all governmental activities affecting agricultural lands.

It should be admitted that the Federal Government does not have a very good history of coordinating its agricultural lands policy. Many times the issuing of permits, the making of grants or loans for industrial or home development, for new highways, powerlines, or road works to cover up, pave over, or divide precious farmland.

This act would attempt to bring governmental action into harmony with itself.

The act also establishes a program which will provide technical and financial assistance to reduce the amount of farmland annually converted to nonagricultural use, to provide aid to State and local governments that have demonstration projects designed to preserve farmlands.

The aid program would encourage local governments to experiment with a variety of protective measures, and it would limit the encroachment of industry where it would pollute the air and water, thereby damaging the yield of farmlands.

Here, Mr. President, it should be noted that in my home State of Washington, King County has been a pioneer in the preservation of urban, agricultural land. It has been so out of necessity.

In the last three decades, King County has watched its farmlands vanish. Between 1945 and 1974, the number of farms in the county declined from 6,500 to less than 1,400. During that same period, some 100,000 acres of farmland were lost to development.

Now a proposal is under consideration that would put a halt to the wholesale liquidation of King County farms. It is being proposed and managed by a bipartisan coalition, headed by King County Executive John Spellman, and county council members Bernice Stern and Mike Lowry.

Their work in this field has taken great courage, intelligence, and foresight.

But they are discovering that the preservation of agricultural lands is very expensive.

In King County alone, the options under consideration include the buying of development rights to 24,000 acres of land, at a cost of $30 million, to the outright purchase of some 40,000 acres of farmland. At their current fair market value, that would cost between $80 and $90 million.

Clearly, Federal assistance is needed. Local taxpayers cannot be expected to come up with the total amount of money required for obtaining perpetual agricultural reserves.

Therefore, this act contains an authorization of $15 million to enable the Commission to complete its 3-year study.

And it includes $450 million over a 5-year period to enable the Federal Government to assist locals in implementing preservation programs.

It would include $75 million for each of fiscal years 1979 and 1980, and $100 million for fiscal years 1981, 1982, and 1983.

Such an expenditure can be considered an investment in the future of America, for the economic reasons for preserving our agricultural lands are compelling.

It is imperative to provide adequate and affordable food supplies for domestic consumption; to provide adequate supplies for exportation, to offset rising import costs of foreign oil and other products, and to insure a stable agricultural economy in the United States.

By approving this act, Congress would recognize the importance of such preservation to the economy, to the quality of the environment, to human health and welfare, and to the position of the United States as an international leader in food production.

In summation, we should heed the words of Franklin Delano Roosevelt, who noted that "The history of every nation is eventually written in the way in which it cares for its soil."

Mr. President, I ask unanimous consent that the text of the bill and a summary thereof be printed in the RECORD.

There being no objection, the bill and the summary were ordered to be printed in the RECORD, as follows:

S. 2757

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "National Agricultural Land Policy Act".

FINDINGS AND PURPOSES

SEC. 2. (a) The Congress hereby finds that—

(1) the preservation of productive agricultural land is essential to provide adequate and affordable food supplies for domestic consumption, for exportation which will help offset rising import costs of foreign oil and other products, for emergency and humanitarian purposes, for a stable agricultural economy in the United States, and for the maintenance of jobs associated with agriculture;

(2) despite a history of increasing yields per acre, further increases in agricultural production—

(A) Will be dependent on variable and unpredictable factors such as changing weather patterns, population growth, soil erosion, air pollution, competition for water, genetic vulnerability, increased costs and scarcities of fuels and fertilizers, and other factors; and

(B) will depend on the quantity, quality, location, and financing of agricultural land;

(3) each year between two and three million acres of land, including land in and around urban areas, are being converted from recognized agricultural uses to nonagricultural uses which is an alarmingly high conversion rate since it is estimated that the United States has a cropland reserve of only one hundred and eleven million acres of which only twenty-four million acres is immediately convertible to tillage;

(4) conversion of agricultural land to nonagricultural uses occurs primarily in and near urban areas;

(5) the loss of agricultural lands in and near urban areas increases the dependence of many urban populations on the energy-intensive capabilities of irrigated lands, mechanized farming, food-processing technology and long-haul transport of agricultural commodities;

(6) agricultural lands in and near urban areas are a unique land resource and should be protected because such lands provide:

(A) fresh agricultural products for urban residents at affordable prices by means of direct marketing,

(B) visual and physical separation between developed areas which provide beautiful and natural scenery,

(C) the opportunity for residents of urban areas to pursue livelihoods dependent upon this specialized land resource, and

(D) education benefits to urban residents that contribute to the quality of life they enjoy;

(7) agricultural operations often have significant effects on the quality of life in and around urban areas;

(8) because of the intense market pressure for the conversion of agricultural lands to nonagricultural uses, the preservation of such lands cannot be guaranteed solely by means of land use regulations or current use ad valorem taxation of such lands, or by both such means;

(9) urabn and industrial encroachment in high quality agricultural areas affects agricultural yields through air pollution and competition for water;

(10) poor use of agricultural land results in soil erosion, low water tables, oversalinity of soils, depletion of natural soil consituents, and other yield-decreasing effects; and

(11) other essential activities, such as energy development, economic growth, and residential development, compete with agricultural activities for use of the Nation's land, water, and related resources;

(12) the timing and location of major Federal actions are important determinants in the conversion of agricultural land and often are directly responsible for the unnecessary or premature conversion of agricultural land;

(13) many State and local governments are interested in developing innovative and effective programs to project and retain agricultural land but lack the financial cr technical resources to initiate such programs;

(14) for the foregoing reasons, the Federal Government must establish a national program to help farmowners and farm counties protect their agricultural land.

(b) It is, therefore, the purpose of this Act—

(1) to establish a national policy of retaining and protecting agricultural land, and to insure that all activities of the Federal Government are in harmony with this policy;

(2) to establish a commission (A) to study agricultural land, especially the quantity, quality, location, and financing of agricultural land, (B) to study the relationship of agricultural land as a national concern to other national concerns (including but not limited to energy, the economy, the environment urban growth and development, foreign relations and trade, and humanitarian aid), and (C) to recommend to the President and each House of the Congress various methods of accomplishing the national policy described in clause (1); and

(3) to establish a program which will provide technical and financial assistance to States and political subdivisions of States to carry out pilot projects for the purposes of—

(A) encouraging such States and subdivisions to experiment with a variety of methods for protecting agricultural land in

areas where such land is being converted to nonagriculture uses at a high rate;

(B) assisting existing agricultural preservation programs;

(C) providing the commission described in paragraph (2) with information concerning methods of reducing the amount of land which is annually being converted from agricultural uses to nonagricultural uses;

(D) demonstrating practicable methods of reducing the amount of land which is annually being converted from agricultural uses to nonagricultural uses; and

(E) providing technical assistance to political subdivisions of States in determining what constitutes the most significant agricultural land in their areas and in controlling the conversion of agricultural lands to nonagricultural uses.

TITLE I—OBJECTIVES

NATIONAL AGRICULTURAL LAND POLICY

SEC. 101. (a) The Congress, recognizing the importance of the preservation of agricultural lands to the economy, to the quality of the environment, to human health and welfare, and to the position of the United States as an international food-producing leader, declares that it is the policy of the Federal Government, in cooperation with the governments of the States and political subdivisions of States, to use all practicable methods to retain and protect agricultural lands.

(b) In order to advance the policy described in subsection (a), it is the responsibility of the Federal Government to assist state and local government to use all practicable methods consistent with other considerations of national policy—

(1) to reduce the amount of land which is annually being converted from agricultural uses to nonagricultural uses;

(2) to limit the encroachment of industrial activities in high-quality agricultural areas if such activities deprive croplands of needed water or produce yield-reducing air pollution;

(3) to include in environmental impact statements under the National Environmental Policy Act of 1969 an assessment of the effects of major Federal actions on agricultural land;

(4) to inventory, assess, and evaluate the Nation's farmland on a continuing basis in order to assure that public and private decisions are made on an informed basis;

(5) to assist local subdivisions and/or the States, in determining what constitutes the most significant agricultural lands in their areas;

(6) to cooperate with the States and political subdivisions of States in retaining and protecting agricultural lands;

(7) to provide financial assistance to political subdivisions of States for the purpose of controlling the conversion of agricultural lands to nonagricultural uses; and

(8) to require that all activities carried out by departments and agencies of the United States which affect agricultural lands be effectively coordinated in order to protect such land.

TITLE II—RESEARCH PROGRAM

AGRICULTURAL LAND REVIEW COMMISSION

SEC. 201. (a) There is hereby established a commission to be known as the Agricultural Land Review Commission (hereinafter in this Act referred to as the "Commission").

(b) The Commission shall be composed of eleven members. Such members shall be appointed, within ninety days after the date of enactment of this Act, as follows:

(1) two members from the Agriculture, Nutrition, and Forestry Committee of the Senate, one appointed by the majority leader of the Senate and one appointed by the minority leader of the Senate.

(2) Two members from the Agriculture Committee of the House of Representatives, one appointed by the Speaker of the House and one appointed by the minority leader of the House.

(3) The Secretary of Agriculture or his designee.

(4) Six members from among persons who are not officers or employees of the Federal Government and who are knowledgeable of and particularly interested in the protection of agricultural land appointed by the President, three of the six shall be officers or employees of a State, a county, and other political subdivision of a State confronted with the problem of agricultural land being converted to nonagricultural uses and at least two of the three shall be persons who are especially qualified to serve on the Commission by virtue of their education or experience concerning conversion of land from agricultural uses to nonagricultural uses, and three of whom shall be from private life. Two of the members appointed from private life shall be persons who are currently engaged in activities related to the production of agricultural commodities. The six members appointed by the President shall be selected to represent a geographical cross section of the United States. Not more than three of the six may be members of the same political party.

(c) A Chairman and Vice Chairman of the Commission shall be designated by the President from among the six members appointed under subsection (b).

(d) Members of the Commission shall be appointed for the life of the Commission.

(e) A vacancy in the Commission shall be filled in the manner in which the original appointment was made.

(f) Six members of the Commission shall constitute a quorum, but a lesser number, as determined by the Commission, may conduct hearings.

DUTIES

SEC. 202. (a) The Commission shall study—

(1) the quantity, quality, location, availability, ownership and financing of agricultural land in the United States;

(2) the relationship of such land to the supply and demand of food and to the production of food;

(3) the interrelationship of the loss of agricultural land as a national concern to other national concerns (including, but not limited to, the economy, the environment, population growth, urban growth and development, foreign relations and trade, and humanitarian aid);

(4) the effects on agricultural land and productivity of urbanization, industrial development, road building, power line construction and other nonagricultural activities, including such effects as air and water pollution, soil contamination, and losses due to theft, trespassing, and vandalism;

(5) the effects of agricultural operations on urban areas and on individuals residing in and around urban areas, including such effects as noise, dust, odors, and pesticide contamination;

(6) the effects and interrelationships of existing Federal laws and regulations on uses of agricultural land;

(7) the effects of variable and unpredictable factors, such as climate, agricultural technology, air pollution, genetic vulnerability, soil salinity, and environmental regulations, on productivity of agricultural land;

(8) the acquisitions of agricultural land by persons who are not engaged in activities which produce agricultural commodities (including acquisitions by agricultural land investment funds, trusts, foreign citizens or agents of foreign citizens, or other similar entities) and the effects of such acquisitions on agricultural production;

(9) the effects of competition between agricultural and nonagricultural demands for water;

(10) methods of protecting and improving agricultural land and the benefits of such methods with respect to their costs;

(11) methods of reducing the amount of land which is annually being converted from agricultural uses to nonagricultural uses, where such conversion is occurring at a rate which, if continued, will result in the rapid and extensive loss of agricultural lands of the areas.

(12) the relationship between future supplies of energy and fertilizer resources and the production of food from available agricultural land.

(b) In order to obtain information for the study described in subsection (a)—

(1) the Commission may utilize pertinent available studies, reports, statistics, and other data gathered or compiled by departments or agencies of the Federal Government or other public or private groups or organizations or individuals;

(2) the Department of Agriculture, at the request of the Commission, shall cooperate to the extent practicable and feasible by carrying out such research activities as the Commission may determine necessary; and

(3) the Commission is authorized (A) to make grants, through contracts and other arrangements, for studies and surveys to public and private organizations, and (B) if necessary, to transfer funds to Federal agencies from sums appropriated pursuant to this Act to carry out such aspects of the study as the Commission determines can best be carried out by such agencies.

(c) A grant made under subsection (b)(3)(A) for the costs of carrying out the research activities for which the grant is made.

(d) The Commission may also make grants to institutes of higher education which the Commission selects and which are willing to carry out such research activities concerning such agricultural lands as the Commission deems necessary to obtain information for the study described in subsection (a). As used in this paragraph, the term "institute of higher education" means an educational institutional in any State which (A) admits as regular students only persons having a certificate of graduation from a school providing secondary education, or the recognized equivalent of such a certificate, (B) is legally authorized within such State to provide a program of education beyond secondary education, (C) provides an educational program for which it awards a bachelor's degree or provides not less than a two-year program which is acceptable for full credit toward such a degree, (D) is a public or other nonprofit institution, and (E) is accredited by a nationally recognized accrediting agency or association.

(3) A grant made under this subsection shall be for the costs of carrying out the research activities for which the grant is made.

(4) The Commission may only make a grant to public and private organizations under this subsection if—

(A) the research activities for which the grant is made will be completed at least sixty days before the date on which the Commission will cease to exist under section 204; and

(B) such organization agrees to provide such fiscal control and fund accounting procedures as the Commission determines are necessary to assure proper disbursement and accounting for Federal funds received by such organization under this Act.

(e) In conducting the study under subsection (a), the Commission shall make appropriate use of research activities of the Department of Agriculture, activities carried out under section 302 and title V of the Rural Development Act of 1972 and under the Soil and Water Resources Conservation Act of 1977 (Public Law 95–192), and other activities being carried out under the laws of the United States so as to minimize duplication

of effort. The Commission may advise the Secretary of Agriculture and make recommendations with respect to the conduct of activities referred to in the preceding sentence.

(f) In conducting studies, reviews, and evaluations under subsections (a) and (b) of this section, the Commission shall conduct such meetings, workshops, and hearings as are necessary to obtain adequate public participation.

REPORTS OF THE COMMISSION

SEC. 203. The Commission shall transmit to the President and to each House of the Congress, within eighteen months after the date of enactment of this Act, a preliminary report of its findings and conclusions concerning such study described in section 202 and, within three years after such date, a final report of its findings and conclusions concerning such study and the research activities carried out under this title. The preliminary and final reports shall also include recommendations of the Commission concerning

(1) modifications in policies, programs, and laws of the United States, the States, and political subdivisions of States which are necessary to prevent agricultural land from being used for nonagricultural purposes;

(2) coordination of those activities carried out by the various departments and agencies of the United States which affect agricultural lands, including activities such as issuing permits, making grants or loans, and carrying out programs; and

(3) such other matters as the Commission may deem appropriate.

TERMINATION

SEC. 204. One hundred and twenty days after the date on which it submits its final report under section 203, the Commission shall cease to exist.

PAY AND TRAVEL EXPENSES OF MEMBERS

SEC. 205. (a) Members of the Commission who are Members of Congress shall receive no additional pay on account of their service on the Commission.

(b) Members of the Commission, other than those referred to in subsection (a), shall receive $100 for each day (including traveltime) during which they are engaged in the actual performance of duties vested in the Commission.

(c) While away from their homes or regular places of business in the performance of services for the Commission, members of the Commission shall be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in the Government service are allowed expenses under section 5703 (b) of title 5, United States Code.

ADMINISTRATIVE PROVISIONS

SEC. 206. (a) The Commission may appoint such staff, including a Director, as it deems desirable without regard to the provisions of title 5, United States Code, governing appointments in the competitive service. The Commission may pay such staff without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title, relating to classification and General Schedule pay rates, except that no individual so appointed may receive pay in excess of the annual rate of basic pay in effect for grade GS–18 of the General Schedule.

(b) (1) The Commission may establish such advisory committees as the Commission deems necessary to advise it regarding the administration of this Act. Any advisory committee established under this subsection shall cease to exist at the same time the Commission ceases to exist under section 204 unless abolished sooner by the Commission.

(2) The Commission may fix the rates of pay, not in excess of $100 per day, of members of any advisory committee established under paragraph (1), except that members of such committee who are employees of the Federal or a State Government shall receive no additional pay on account of their service on such committee.

(3) Members of any advisory committee established under paragraph (1), while away from their homes or regular places of business in the performance of their duties for such committee, may be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in the Government service are allowed expenses under section 5703 of title 5, United States Code.

(c) The Commission may procure temporary and intermittent services to the same extent as is authorized by section 3109(b) of title 5, United States Code, at rates of pay which are fixed by the Commission and which do not exceed $100 per day.

(d) Upon request of the Chairman or Vice Chairman of the Commission, each department, agency, and instrumentality of the United States shall furnish to the Commission, on a reimbursable basis or otherwise, such information as the Commission deems necessary to carry out its duties under this Act. The Commission may request that the departments, agencies, and instrumentalities of the States furnish, on a reimbursable basis, such information concerning agricultural lands as the Commission deems necessary to carry out its duties under this Act.

(e) Upon request of the Commission, the head of any Federal agency may detail, on a reimbursable basis, any of the personnel of such agency to the Commission to assist the Commission in carrying out its duties under this Act.

(f) The Commission may, for the purpose of carrying out the provisions of this Act, hold such hearings, sit and act at such times and places take such testimony, and receive such evidence as the Commission deems advisable. The Commission may administer oaths or affirmations to witnesses appearing before it.

(g) The Commission may issue subpenas requiring the attendance and testimony of witnesses and the production of any evidence which relates to any matter studied by the Commission under this title. Such attendance of witnesses and the production of such evidence may be required from any place within the United States at any designated place of hearing within the United States.

TITLE III—DEMONSTRATION PROGRAMS

PILOT PROJECTS

SEC. 301. The Secretary of Agriculture (hereinafter in this Act referred to as the "Secretary") shall provide financial and technical assistance for the purpose of demonstrating and testing methods of reducing the amount of land, including land in and near urban areas, which is annually being converted from agricultural uses to nonagricultural uses. Such assistance shall be provided to States, counties and other political subdivisions of States which have authority to establish and collect property taxes and regulate the use of, and acquire land.

APPLICATION

SEC. 302. Any State or political subdivision of a State willing to carry out under this title a pilot project demonstrating or testing a method of reducing the amount of land which is annually being converted from agricultural uses to nonagricultural uses may submit to the Secretary an application at such time, in such form, and containing such information as the Secretary may, by rule, require. Such application shall contain a description of the pilot project. Any State or political subdivision of a State conducting an agricultural preservation program is eligible to submit an application under this Title.

APPROVAL OF APPLICATIONS

SEC. 303. (a) The Secretary shall establish and publish in the Federal Register criteria on the basis of which applicants will be selected to receive assistance under this title. Such criteria shall give priority to applicants who submit applications to carry out pilot projects which are demonstrated to be effective, or which, if carried out—

(1) will provide, at a low cost, timely information and will be useful to the Commission in carrying out the research program under title II;

(2) will provide, at a low cost, data concerning the preservation of agricultural lands which is not currently available or which, if currently available, is not reliable; and

(3) will assure that the Commission, in carrying out the research program under title II, will have a range of projects to study in terms of (A) geographical location, and (B) reducing the amount of land which is annually being converted from agricultural uses to nonagricultural uses, including agricultural lands in and near urban areas.

(b) The Secretary may only provide assistance under this title with respect to an application—

(1) which the Secretary approves under the criteria established under subsection (a);

(2) under which the pilot project described in the application will be completed within five years after the date of enactment of this Act;

(3) under which the Secretary has received written assurance from the applicant that the applicant has the ability to finance its share of the cost of carrying out the pilot project described in the application;

(4) under which the Secretary is satisfied that the applicant has the capability of carrying out the pilot project described in the application and is satisfied that the applicant will make a good faith effort to cooperate with the Commission; and

(5) under which the applicant has agreed to—

(A) transmit to the Secretary and the Commission, during its existence, such reports at such times, in such form, and containing such information as the Secretary or the Commission determines is necessary to carry out the provisions of this Act;

(B) provide such fiscal control and fund accounting procedures as the Secretary determines are necessary to assure proper disbursement and accounting of Federal funds appropriated under this Act; and

(C) in order that the Commission may review the results of pilot projects funded under this Act, the Secretary shall, to the maximum extent practicable, fund such projects during the life of the Commission.

AMOUNT OF ASSISTANCE

SEC. 304. (a) The amount of assistance with respect to any pilot project carried out under this title shall be determined by the Secretary and shall not exceed an amount equal to 75 per centum of the cost of planning, establishing, demonstrating, carrying out, issuing reports concerning such project, and other costs of administering and conducting such projects, including the acquisition of interests in land. The remainder of such costs shall be provided by the applicant in a manner which the Secretary determines is satisfactory. In determining the share of costs provided by the applicant, the Secretary shall include the value of services provided by the applicant in planning, carrying out, and issuing reports concerning such project.

(b) In providing assistance to an applicant under this title, the Secretary may make payments to the applicant as the applicant progresses toward completion of the pilot project.

CONSULTATION WITH THE COMMISSION

SEC. 305. The Secretary shall consult with the Commission in planning and carrying out

the demonstration program described in this title.

REPORT OF THE SECRETARY

SEC. 306. Within ninety days after completion of the last pilot project carried out under this title, the Secretary shall transmit a report to the President and to each House of the Congress. The report shall contain a detailed statement of the findings and conclusions of the Secretary concerning methods of reducing the amount of land which is annually being converted from agricultural uses to nonagricultural uses, together with the Secretary's recommendations for such legislation or administrative action concerning such methods as the Secretary deems appropriate.

STATEMENT OF LIMITATIONS

SEC. 307. Nothing in this Act shall authorize or be construed to authorize the Federal Government or any department, agency, or official thereof to—

(1) restrict or otherwise regulate in any way the use of privately owned land;

(2) deprive land owners of their rights to property or to income from the sale of property; or

(3) abrogate, restrict, or in any way diminish existing authority and responsibilities of the various States and counties and other political subdivisions of a State respecting land use, zoning, taxation, or any other aspect of the regulation, utilization, and disposition of public or private lands within their respective jurisdictions.

TITLE IV—GENERAL PROVISIONS

DEFINITION

SEC. 401. For purposes of this Act, the term "State" means any of the fifty States, the District of Columbia, the Commonwealth of Puerto Rico, or any territory or possession of the United States. "Agricultural Lands" means class one, two and three lands as defined by the Soil Conservation Service of the U.S. Department of Agriculture.

TITLE IV—FUNDING

AUTHORIZATIONS FOR APPROPRIATIONS

SEC. 402. (a) There are authorized to be appropriated $15,000,000 to carry out the provisions of title II of this Act.

(b) There are authorized to be appropriated $75,000,000 to carry out the provisions of title III of this Act for each of the fiscal years ending September 30, 1979, and September 30, 1980, and $100,000,000 for each of the fiscal years ending September 30, 1981, September 30, 1982, and September 30, 1983.●

SUMMARY OF THE NATIONAL AGRICULTURAL LAND POLICY ACT

NATIONAL AGRICULTURAL LAND POLICY

The Congress, recognizing the importance of the preservation of agricultural lands to the economy, to the quality of the environment, to human health and welfare, and to the position of the United States as an international food-producing leader, declares that it is the policy of the Federal Government, in cooperation with the governments of the states and the political subdivisions of the states, to use all practicable methods to retain and protect agricultural lands.

In order to advance this policy, it is the responsibility of the Federal Government to use all practicable methods consistent with other considerations of national policy to inventory, assess and evaluate the Nation's farmland in order to assure that public and private decisions are made on an informed basis; to assist states and local subdivisions in determining what constitutes the most significant agricultural lands in their areas; to cooperate with the states and local governments in retaining and protecting agricultural lands; and to require that all activities carried out by the departments and agencies of the United States which affect agricultural lands are effectively coordinated in order to reduce the amount of farmland which is annually being converted to nonagricultural uses.

The Act does not authorize the Federal Government to regulate the use of private land or to deprive owners of land of their rights to property or to income from the sale of property, and does not diminish in any way the rights and responsibilities of the states and political subdivisions of the states.

AGRICULTURAL LAND REVIEW COMMISSION

The Act would establish an 11-member Agricultural Land Review Commission. Two members would be appointed from each house of Congress. The Secretary of Agriculture, or his designee, would serve on the Commission. The remaining six members would be appointed by the President, three from state and local governments, three from private life. They would be geographically representative of the affected parts of the United States.

The Commission would be empowered to study our agricultural lands, their quantity, quality, location and financing.

It would be asked to study how agricultural land and its use fits into the fabric of our national life, how it relates to the concerns of energy, economy, population growth, urban growth and development, foreign relations and trade, and humanitarian aid. The Commission would also study the effects of urbanization, industrial development, road building, power line construction and other nonagricultural activities, including such effects as air and water pollution, soil contamination and competition for water and other resources on agricultural land and productivity.

The Commission would be asked to report back to the President and Congress with a preliminary report within 18 months. A final report would be submitted within three years.

That final report could include recommendations for modifications in policies, programs and laws of the United States, as well as recommendations for the coordination of all governmental activities affecting agricultural lands, such as the issuing of permits, the making of grants and loans.

DEMONSTRATION PROGRAMS

The Bill authorizes the Secretary of Agriculture to provide technical and financial assistance to states, counties and other subdivisions of states for the purpose of demonstrating and testing methods of reducing the amount of land which is annually being converted from agricultural uses to nonagricultural uses. Existing agricultural preservation programs can also apply for assistance.

The aid program would encourage local governments to experiment with a variety of protective measures and would provide, at low cost, data concerning the preservation of farmlands which is currently not available.

To qualify for Federal assistance, a local pilot program must be completed within five years after the enactment of this Act. The amount of assistance for any demonstration project will be determined by the Secretary of Agriculture and shall not exceed 75% of the cost of planning, carrying out, issuing reports and other costs of administering and conducting the project, including the acquisition of interests in land.

FUNDING

The Act contains an authorization of $15 million to enable the Agricultural Land Review Commission to complete its three-year study. The Act also authorizes $75 million in FY 1979 and FY 1980, and $100 million for FY 1981, 1982, and 1983 to fund the local demonstration programs.

By Mr. CLARK:

S. 2758. A bill to amend the Commodity Exchange Act to prevent conflicts of interests and the appearance of conflicts of interest by former commissioners and specified employees of the Commodity Futures Trading Commission; to the Committee on Agriculture, Nutrition, and Forestry.

● Mr. CLARK. Mr. President, we all understand that no person can serve two masters. That understanding is the basis for condemning a public servant who places himself or herself in a conflict of interest situation. The present conflict of interest provision in the Commodity Futures Trading Commission Act of 1974 does not do a great deal to address this problem. It simply states that no commissioner or employee of the commission may accept employment or compensation from any firm or exchange regulated by the commission.

Even this elementary requirement may have been violated by high-placed commission officials who have become vice presidents of exchanges and brokerage firms immediately upon retirement from the CFTC—it is not unreasonable to assume that these officials arranged for their positions while they were still CFTC employees.

But even if such violations have not occurred, there is still a perceived impropriety in this kind of movement between Government regulatory agencies and the industries which they regulate—in so-called "revolving door" personnel practices. The perceived impropriety is that these personnel practices lead to the getting and giving of unfair advantage.

Perhaps no technical conflict of interest does exist when—as was reported recently in the press—three lawyers come from one Wall Street law firm to the Treasury, and the Treasury colleagues of one enter into a no-bid personal services contract with the firm.

Perhaps no technical conflict of interest exists when an associate of a Washington or New York law firm is given a position as counsel, division director or office chief of a Government agency and is rewarded with a partnership when he returns to legal practice a few months or years later.

But the possibility of conflict of interest occurring in such cases is, to say the least, very strong.

I know of instances involving the CFTC where these kinds of scenarios have been played out. And I fear that they are likely to be repeated more frequently unless we broaden the present statutory proscription.

I am therefore today introducing legislation to amend section 2(a)(7) of the Commodity Exchange Act (7 U.S.C. 4a (f)). This legislation would add to the existing dual employment proscription certain provisions which would have the effect of requiring that CFTC commissioners and employees with a grade of GS–15 or higher refrain, for a year after leaving office, from making any appearance before the CFTC or initiating any communication on behalf of a client or private employer.

I do not mean to imply that post-Government employment with a related private firm is necessarily tainted or suspect per se. But steps can and should be taken to at least minimize the possibility

of influence peddling in such situations. That is what this legislation is intended to do.

The one-year time limit which the legislation contains is admittedly somewhat arbitrary. Influence of an ex-official may vanish overnight, or it may persist for years. But I feel that a 1-year limit represents a reasonable, workable approach. In most cases the period immediately following Government employment is the period when former officials are most likely to still have close ties to their former associates in Government. It is the period when chits are most likely to be called in. It is the period when unfair advantage is most likely to be given and gotten.

It should be noted that the same kind of proscription is already in effect for the Department of Energy. The same kind of proscription is also pending approval for the FTC, in the conference report on H.R. 3816. And it was also contained in the Public Officials Integrity Act (S. 555) passed by the Senate last June.

Ultimately, I would like to see this proscription applied across the board in Government. But I think it is especially important that it be applied now to the CFTC. The CFTC is still a relatively new agency—there is still time to steer it toward the proper track. It also is in a uniquely sensitive position because of the relative smallness and highly specialized nature of the talent pool from which it must draw. And the velocity of the revolving door at this agency—already set spinning by the ranking staff—may well accelerate unless we apply some brakes.

The reauthorization proceedings for this agency which the Senate Committee on Agriculture, Nutrition, and Forestry is now conducting give us an appropriate opportunity to take this step. I believe we should.●

By Mr. CRANSTON (for himself, Mr. WILLIAMS, Mr. JAVITS, Mr. RIEGLE, Mr. HAYAKAWA, Mr. RANDOLPH, Mr. PELL, Mr. KENNEDY, Mr. STAFFORD, Mr. ANDERSON, Mr. BAYH, Mr. ABOUREZK, and Mr. LEAHY):

S. 2759. A bill to provide for Federal support and stimulation of State, local, and community activities to prevent domestic violence and assist the victims of domestic violence, for coordination of Federal programs and activities pertaining to domestic violence, and for other purposes; to the Committee on Human Resources.

DOMESTIC VIOLENCE PREVENTION AND SERVICES ACT

Mr. CRANSTON. Mr. President, today I introduce, for appropriate reference, S. 2759, the proposed Domestic Violence Prevention and Services Act, a bill to provide for Federal support and stimulation of State, local, and community and activities pertaining to domestic and assist victims of domestic violence, for coordination of Federal programs and activities pertaining to domestic violence, and for other purposes.

I am pleased that joining me in the introduction of this measure are the chairman and ranking minority member of the Full Human Resources Committee, Mr. WILLIAMS and Mr. JAVITS, as well as of the subcommittee, the Senator from Michigan (Mr. RIEGLE) and my colleague from California (Mr. HAYAKAWA)—comprising the full membership of the subcommittee—the ranking majority member of the full committee, my great friend from West Virginia (Mr. RANDOLPH), other full committee members, Senators PELL, KENNEDY, and STAFFORD, as well as Senators ANDERSON, BAYH, ABOUREZK, and LEAHY.

The purpose of the measure we introduce today is to increase the participation by States, local communities, private nonprofit organizations, and individual citizens in efforts to prevent domestic violence and assist domestic violence victims and their children; to establish regional centers to provide technical assistance with respect to domestic violence programs and projects to States, local communities, private nonprofit organizations, and other interested groups, officials, and persons; to establish a Federal interagency council to seek to coordinate Federal programs with respect to domestic violence; and to provide for research and reporting activities relating to domestic violence. To accomplish this purpose, the bill authorizes the appropriation of $30 million a year for 5 years.

When I speak of domestic violence, I am referring to an act or threatened act of violence—including any forceful detention of an individual—which results or threatens to result in physical injury and is committed by a person 18 years of age or older against another such person to whom such person is married or with whom such person is residing, or if such person is under the age of 18, is committed by a person with whom he or she is living as husband or wife.

HEARINGS AND NEED

Mr. President, the Subcommittee on Child and Human Development of the Committee on Human Resources held 2 days of hearing earlier this month—one in Los Angeles and one here—with respect to domestic violence and legislation to provide domestic violence programs. During the course of the hearings, the subcommittee heard from a variety of interested individuals, groups, and officials. Throughout the hearings, the extent of the problem and the need for Federal involvement was stressed again and again.

For example, at the hearing on March 8, in Washington, Dr. Blandina Cardenas, Commissioner of the Administration for Children, Youth, and Families of the Office of the Human Development Services, Department of Health, Education, and Welfare, testified as follows:

> Under the leadership of Secretary Califano, representatives from various agencies throughout the Department have recently begun meeting to discuss the extent of our knowledge in this area. . . . We have learned that spousal violence occurs in epidemic proportions. . . . that violence between spouses may and often does occur separately from other forms of violence.

Testimony showed that in a recent study of couples randomly selected, during a single year, one out of six couples had engaged in violent acts—such as beatings, throwing objects at one another, or threats with a knife or a gun. The study also showed that when the entire period of marriage rather than just 1 year was the focus, the estimate increased to approximately 30 percent of all couples having experienced domestic violence in some form. Hearing testimony reveals that in California, one of three female homicide victims is murdered by her spouse, and approximately one-quarter of all murders in the United States occur within the family.

Further, testimony indicated approximately one-fifth of all deaths of police officers in the line of duty occurs in domestic violence interventions; and in 85 percent of the cases of spouse murder in a single year in Kansas City, Mo., police were summoned at least once before the murder occurred. In 50 percent of the cases they had been called five or more times before the homicide. FBI figures reveal that annually approximately 12 percent of all murders occur between spouses.

Over 30 witnesses appeared before the subcommittee. They included representatives of the administration, researchers, State officials, State senators, service providers, law enforcement personnel, representatives from the American Bar Association, the National Association of Social Workers, the American Psychiatric Association, the Coalition of Family Organizations, the National League of Cities, and also from victims of domestic violence. The testimony showed that projects and programs currently providing services and assistance to victims of domestic violence often, because of limited facilities, have to turn away victims seeking shelter. For example, Haven House, a shelter in Pasadena, Calif., turned away 400 people seeking assistance in the month of October 1977, alone. In Haywood, Calif., during this February, the emergency shelter program refused 146 requests for service because the shelter was full and funding does not permit further expansion. During 1977, the Haywood emergency shelter program provided shelter for 437 women and 476 children—a total of 5,967 bednights. Yet, the program was unable to provide services for far more who had asked for assistance—1,776 women and children were turned away.

Mr. President, the hearings held by the subcommittee clearly illustrated the need for Federal action. Unfortunately, the problems are complex and there are no simple answers. To overcome this problem—to develop any type of successful program, commitment is necessary—and not just from the Federal Government.

It is my belief that domestic violence is a problem best met by State and community efforts.

Any resolution of the problem is dependent upon the efforts of States and local communities. However, all levels of government, including the Federal Government, must be involved in seeking solutions. Most importantly, interested private citizens and groups themselves must continue to take the lead.

Thus, in drafting this legislation, we have attempted to devise a program designed to stimulate Federal, State, and local efforts with respect to domestic violence, and designed to capitalize upon local community and nonprofit organization involvement.

Mr. President, I would like to outline briefly the legislation we are introducing today. Next week, a more extensive analysis of the legislation will be inserted into the RECORD.

SUMMARY OF S. 2759

The proposed Domestic Violence Prevention and Services Act authorizes a State grant program to assist in supporting programs and projects to prevent incidents of domestic violence and to assist victims and dependents of victims of domestic violence. In order to qualify for a State grant, a State must establish a State citizens panel on domestic violence and provide, in cash, in all years after the first year, a specified proportionate match of the amount of Federal assistance provided during any fiscal year. The amount of Federal assistance that the State must match increases each year. In 1979, the State is not required to match the Federal share with any of its own money. However, the amount of the State match requirement increases each year as follows: in 1980, 20 percent; in 1981, 35 percent; in 1982, 50 percent; and in 1983, 65 percent.

STATE CITIZEN PANEL ON DOMESTIC VIOLENCE

A State citizen panel on domestic violence must be established by each State, and members are to be appointed by the chief executive. Each panel must have at least 9 members but no more than 15 members—one-third of the membership must be individuals who have had experience in providing community services with respect to domestic violence or who are individuals who have been victims of domestic violence. The panel membership shall also include individuals with experience in law enforcement, health care, alcohol and drug abuse, and social work. The panels will be charged with overseeing the implementation of programs and projects under this act. I foresee that members of the panel will serve as advocates on the State level for programs and projects with respect to preventing domestic violence and providing assistance to victims of domestic violence.

STATE GRANTS

The amount of the grant to which each State will be entitled will be determined on the basis of population. The chief executive of each State must submit to the Secretary of Health, Education, and Welfare an application providing that the grants received under the act will be used only for programs to prevent incidents of domestic violence or to assist victims of domestic violence. The States must also assure that funds will be equitably distributed throughout the State to local public agencies and private nonprofit organizations; that appropriate procedures for fiscal control and fund accounting will be followed; and that the State will comply with the act's confidentiality requirements.

The act limits the amount of grant money that a State can expend in any given year for the administration of the program on the State level and for the operation of the citizens' panel. The bulk of the State grant money will be for activities and services with respect to domestic violence conducted by the State, local communities, and private nonprofit organizations. A significant amount of State grant money will be available for grants to local public agencies and nonprofit organizations. An important provision limits to $25,000 in any 1 fiscal year and $40,000 over a period of 5 fiscal years the amount a State may grant to any private, nonprofit organization.

Mr. President, I want to stress that the vast majority of the money would be granted ultimately to community projects run by local public agencies or private nonprofit organizations. The bill provides that of the amount appropriated 85 percent shall be for grants. Of the amount available for State grants from 35 to 50 percent would be passed on by each State in mini-grants to local public agencies and private nonprofit organizations—and at least half of this amount in each State would go to the nonprofit organizations. Moreover, of any sums reallocated—either because a State does not submit a qualifying application for a grant or because the Secretary of HEW determines the State cannot use some or all of its grant—at least half will be phased on to local public agencies and nonprofit organizations.

This basic approach to providing assistance through States to local communities and private nonprofit organizations seemed to be the most equitable and most comprehensive method of assuring Federal stimulation of various community, grassroots, and State efforts. By providing mini-grants, or seed money, to those projects or programs or prospective projects or programs, we hope to encourage participating States and recipient, local communities, and private nonprofit organizations to tap into potential public and private resources—resources such as revenue sharing, LEAA, ACTION volunteers, HUD community block grants, and others.

REGIONAL CENTERS

To facilitate community efforts with respect to domestic violence, the act requires the Secretary to contract out in each region—as designated by the Secretary—for regional domestic violence centers. These regional domestic violence centers will be responsible for providing technical assistance and appropriate information to interested groups, officials, and people with respect to domestic violence. These centers will assist in coordinating and in bringing to the attention of such interested groups, persons, and officials, information about available resources, and the necessary steps required to tap such resources for use in domestic violence programs and projects.

DIRECT FEDERAL GRANTS TO COMMUNITIES AND ORGANIZATIONS

Mr. President, an important component of the bill is a program for direct Federal grants to local projects and local communities. The bill stringently limits the amount of grant money which may be awarded under this authority in any State not participating in the State grant program so as not to encourage nonparticipation by the State itself. This authority for a Federal grant program assures a pluralistic approach to resolving the problem of domestic violence and will further serve the bill's purpose of providing a catalyst for community efforts. The $25,000 limit applicable under the State grant program to private nonprofit groups is applicable to all Federal grants, as is the $40,000 5-year maximum.

IDENTIFIABLE ADMINISTRATIVE UNIT

Mr. President, the legislation further provides for the establishment within the Office of the Secretary of an identifiable administrative unit to serve as the national centers on domestic violence. A main function of the national center will be to provide for a national information and resource clearinghouse with respect to domestic violence. The national center will also be responsible for the regional centers I previously discussed.

RESEARCH ACTIVITIES

Mr. President, the measure also provides for the conduct of research with respect to domestic violence through the National Institute of Mental Health at least 50 percent of the sums appropriated for research—and other agencies.

CONFIDENTIALITY OF RECORDS

Mr. President, two additional aspects of the introduced bill should be highlighted—one relates to confidentiality and the other to evaluation. With respect to confidentiality, we provide that the confidentiality provisions of the Drug Abuse and Treatment Act of 1972 (P.L. 92-55) will be applied to the records of any individual who is subject to any program, project, or activity assisted under the provisions of the act.

EVALUATION AND REPORTING

Mr. President, with respect to evaluation, the legislation is specifically designed to provide assistance to the Congress in overseeing the implementation of the program. Mr. President, the maximum amount of the grant being provided under the bill for a private nonprofit organization would be $25,000. Hence, it is imperative to the success of this program that grantees not spend an inordinate amount of time, energy, and money complying with paperwork requirements. However, even though the grants are small, we continue to have a responsibility for assuring the appropriate expenditure of Federal dollars. The bill attempts to balance these two needs by including provisions with respect to oversight and evaluation worked out in conjunction with the General Accounting Office. As my colleagues are aware, the Comptroller General recently released a report with respect to improving congressional oversight efforts. That report outlines a process for planning and carrying out congressional oversight programs. GAO staff provided grant assistance to us in designing and drafting those programs.

AUTHORIZATION OF APPROPRIATIONS

As I mentioned previously, $30 million would be authorized to be appropriated each year for programs under this act. Eighty-five percent of this amount would be used for grants; 8 percent for the operation of the national center—including regional centers; and 7 percent for research. Of the amount used for grants, 80 to 85 percent would be allotted for grants to States and the remainder would be for direct Federal grants to local public agencies and nonprofit organizations.

Mr. President, at the full appropriation, $25.5 million would be available for grants—of which $20.4 million would be for States, and $3.82 million for direct Federal grants to communities—$2.3 million for operation of the national center, and $2.1 million for research.

Mr. President, it is my belief that the legislation we introduce today represents an important step in addressing an important, and, sadly, a widespread problem—domestic violence. The approach in this legislation is designed to assure the active involvement at the grassroots level—by individuals; private nonprofit organizations; and local public agencies in our efforts to grapple with this problem. The Federal Government's role should be to serve as a catalyst for State and local commitment to resolving this problem, and the legislation we introduce today should do just that.

Mr. President, I ask unanimous consent that the full text of the bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2759

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Domestic Violence Prevention and Services Act".

FINDINGS AND PURPOSE

SEC. 2. (a) The Congress hereby finds that—

(1) a significant number of homicides, aggravated assaults, and assaults and batteries occur within the home between adult members of families;

(2) the reported incidence of domestic violence represents only a portion of the total number of incidents of domestic violence;

(3) a large percentage of police officers killed in the line of duty die as a result of intervention in domestic violence situations;

(4) domestic violence is a complex problem affecting families from all social and economic backgrounds; and

(5) the effectiveness of State Laws and State and local community programs in identifying and preventing domestic violence and assisting victims and dependents of victims of domestic violence is not readily ascertainable.

(b) It is the purpose of this Act to increase the participation by States, local communities, private non-profit groups, and individual citizens in efforts to prevent domestic violence and assist victims and dependents of victims of domestic violence; to establish regional centers to provide technical assistance with respect to domestic violence programs to interested States, local communities, private non-profit organizations and other interested groups, officials, and persons; to establish an interagency council to seek to coordinate Federal programs with respect to domestic violence; and to provide for a research and reporting program relating to domestic violence.

STATE CITIZEN PANEL ON DOMESTIC VIOLENCE

SEC. 3. (a) In order to provide an opportunity for citizen participation in planning and developing efforts to prevent domestic violence and assist victims and dependents of victims of domestic violence, and provide citizens familiar with the problems of domestic violence an opportunity to make recommendations with respect to resolving such problems, each State, in order to qualify for a grant under section 4(a), shall establish a State Citizen Panel on Domestic Violence (hereinafter referred to as "Panel").

(b) A Panel shall be composed of not less than nine nor more than fifteen members appointed by the chief executive of the State and shall include individuals with experience in law enforcement, health care, alcohol and drug abuse, and social work. Not less than one-third of the members of a Panel shall be individuals who have experience in the provision of community services with respect to domestic violence or who are individuals who have been victims of domestic violence.

(c)(1) A Panel shall—

(A) oversee within the State the implementation of Federal, State, and local projects under this Act with special attention to an examination of the equitable geographic distribution of grants made by the State under section 4(a), and, to the extent feasible, examine and evaluate other Federal, State, and local programs operating within the State relating to the prevention of domestic violence or the provision of assistance to victims and dependents of victims of domestic violence; and

(B) coordinate activities under this section with the appropriate regional center on domestic violence established pursuant to section 8(c).

(2) A panel may study and make recommendations, as appropriate, to the chief executive of the State, the State Legislature, the Secretary of Health, Education, and Welfare, and the Congress with respect to—

(A) State criminal or civil laws relating to domestic violence;

(B) the extent to which the State judicial system affects victims and perpetrators of domestic violence;

(C) the development of a uniform law enforcement reporting system with respect to incidents of domestic violence;

(D) the relationship between incidents of domestic violence and drug or alcohol abuse;

(E) the results of an evaluation, carried out by the Panel, of the effectiveness of Federal, State, and local programs with respect to the ways in which such programs may be improved; and

(F) such other matters relating to domestic violence as the Panel may deem appropriate.

(d) Members of a Panel who are not regular full-time employees of the United States shall, while attending meetings or conference of the Panel or otherwise engaged in the business of the Panel, be entitled, subject to the provisions of section 6(a)(2)(B), to compensation at a rate equal to a per diem amout established by the State wherein the Panel is located for each day they are engaged in the performance of their duties as members of the Panel, and may, if determined by such State, and subject to the provisions of section 6(a)(2)(B), be entitled to reimbursement for travel, subsistence, and other necessary expenses incurred by them in carrying out the duties of the Panel.

GRANTS AUTHORIZED

SEC. 4. (a)(1) In order to assist in supporting programs and projects to prevent incidents of domestic violence and to assist victims and dependents of victims of domestic violence, the Secretary is authorized, in accordance with the provisions of this Act and through the Director, to make grants to States meeting the non-Federal share and other requirements of this Act.

(2) No grant may be made under this subsection unless a Panel has been established in accordance with the provisions of section 3.

(b)(1) The Secretary, through the Director, is authorized to make grants to local public agencies and private non-profit organizations for projects designed to prevent incidents of domestic violence or to assist victims and dependents of victims of domestic violence.

(2) No grant may be made under this subsection in any fiscal year to any single entity in excess of $25,000, and the total amount of such grants over a period of 5 fiscal years to any single public agency or private non-profit organization shall not exceed $40,000.

(3) The amount of grants provided under this subsection in any fiscal year to entities located in a State not qualifying for assistance under section 4(a) of this Act shall not exceed the following percentages of the amount of funds allotted for a grant to such State for such fiscal year by section 5: for fiscal year 1979, 50%; for fiscal year 1980, 45%; for fiscal year 1981, 40%; for fiscal year 1982, 35%; and for fiscal year 1983, 30%.

(c)(1) Not less than 80 per centum nor more than 85 per centum of sums appropriated for any fiscal year under section 17 and made available for grants under this section shall, except as otherwise provided in section 5, be used for grants to States.

(2) To the maximum extent feasible, not less than 50 per centum of the amounts appropriated under section 17 and made available for grants under subsection (b) of this section shall be for grants to private non-profit groups.

ALLOTMENT OF FUNDS

SEC. 5. (a) From the sums appropriated for any fiscal year pursuant to section 17, each State shall be allotted for payment in a grant under section 4 an amount which bears the same ratio to such sums as the population of such State bears to the population of all States, except that—

(1) no State shall be allotted less than one-half of 1 per centum of the sum appropriated for the fiscal year for which the determination is made; and

(2) Guam, American Samoa, the Virgin Islands, the Commonwealth of the Northern Marianas, and the Trust Territory of the Pacific Islands shall each be allotted not less than one-eighth of 1 per centum of the sum appropriated for the fiscal year for which the determination is made.

For the purpose of the exception contained in clause (1) of this subsection only, the term "State" does not include Guam, American Samoa, the Virgin Islands, the Commonwealth of the Northern Marianas, and the Trust Territory of the Pacific Islands.

(b)(1) Funds allotted to any State under subsection (a) of this section shall remain available for qualification by such State until the end of the sixth month of the fiscal year for which the sums have been appropriated. If at the end of such sixth month, sums allotted to a State have not been paid in a grant under section 4 because of the State's failure to qualify, in accordance with the provisions of this Act, for a grant authorized under this Act, the Secretary shall—

(A) make available for grants to the States which have qualified under section 4(a) fifty per centum of the total of such sums not so paid, and shall distribute such sums in the same proportion as the allotment to each such State under subsection (a) of this section; and

(B) make available the remaining fifty per centum for grants under section 4(b) unless the Secretary finds that a lesser amount would more effectively carry out the purposes and provisions of this Act.

Not less than 30 days prior to making a determination pursuant to subparagraph (B) of this paragraph that less than 50 per centum would be made available for grants under section 4(b), the Secretary shall advise the appropriate committees of the Congress and publish in the Federal Register a statement, with supporting reasons, of his or her intention to make such determination.

(2) The Secretary may make available for reallotment in accordance with the provisions of paragraph (1) of this subsection such sums made in any fiscal year in a grant to a State under section 4(a) which the Secretary determines, after consultation with such State, will not be used by such State during such fiscal year for carrying out the provisions of this Act.

(3) For the purposes of paragraphs (1) and (2) of this subsection, a State which the Secretary, pursuant to paragraph (2) of this subsection, has determined will not use any of the sums made in a grant pursuant to section 4(a) shall not be eligible for a reallotment of funds under such paragraphs.

(4) Sums made available by the Secretary after reallotment pursuant to paragraph (1) or (2) of this subsection shall remain available for obligation and expenditure until the end of the fiscal year following the fiscal year in which such sums become available for reallotment.

APPLICATIONS

SEC. 6. (a) No grant may be made under section 4(a) unless the chief executive of the State submits an application to the Secretary at such time in such manner, and containing or accompanied by such information as the Secretary may reasonably require. Each such application shall—

(1) provide that payments under this Act will be used only for programs within such State to prevent incidents of domestic violence or to assist victims and dependents of victims of domestic violence;

(2) provide with respect to funds received by the State under section 4(a) for any fiscal year that—

(A) not in excess of 15 per centum of such funds will be used for the administration of the program for which application is made;

(B) not in excess of 10 per centum but not less than 5 per centum of such funds will be used for the cost of administering the Panel established in accordance with section 3;

(C) not less than 25 per centum but not more than 40 per centum of such funds as are remaining after the allocation of funds for the purposes described in subclauses (A) and (B) of this clause will be used for activities and services with respect to domestic violence conducted by or caused to be conducted by State agencies; and

(D) the remainder of such funds will be distributed through grants to local public agencies and private nonprofit organizations, but not less than 50 per centum of such remainder shall be used for grants to private nonprofit organizations within the State;

(3) provide assurances that no grant of funds to a private nonprofit organizations will exceed $25,000 and that the total amount of such grants over a period of 5 fiscal years to any single private nonprofit organization will not exceed $40,000;

(4) set forth procedures designed to assure an equitable distribution of funds to local public agencies and private nonprofit organizations;

(5) set forth procedures for such fiscal control and fund accounting procedures as may be necessary to assure proper disbursement of, and accounting for, Federal funds paid in the grant, including such funds distributed by the State to local public agencies and nonprofit private organizations, under this Act;

(6) provide for making such reasonable reports in such form and containing such information as the Secretary may reasonably require to cary out the Secretary's functions under this Act, and for keeping such records and affording such access thereto as the Secretary may find necessary to assure the correctness and verification of such reports; and

(7) provide assurances of and procedures for compliance with the provisions of section 11, relating to confidentiality.

(b) No grant may be made under section 4(b) unless an application is made to the Secretary at such time, in such manner and containing or accompanied by such information as the Secretary may reasonably require. Such application shall comply, as applicable, with the provisions of clauses (1), (5), (6), and (7) of subsection (a) of this section.

(c) The Secretary shall approve any application that meets the requirements of subsection (a) or (b) of this section, and the Secretary shall not finally disapprove an application except after reasonable notice and an opportunity for a hearing.

STATE REPORTS

SEC. 7. (a) For the purpose of furnishing information to the Congress to aid in its oversight activities, each State receiving a grant under esction 4(a) shall prepare and submit to the Secretary a concise report providing specific information on the implementation of programs and projects under this Act. Each such report shall include (for both the funds provided under this Act and the funds provided by the State pursuant to section 15 of this Act) information for the preceding fiscal year as to—

(1) the amount used to administer the State program;

(2) the amount used to administer the Panel;

(3) the amount used for services provided and activities conducted by the State by agency and by types of services and activities conducted by such agency;

(4) the amount used for administration of services provided and activities conducted by the State;

(5) the number, recipients, and amounts of grants to local public agencies and private non-profit organizations;

(6) the number of persons estimated to have been assisted in projects described in clauses (3) and (5) of this subsection; and

(7) such other specific information as the Director may reasonably require.

(b) Prior to requiring any specific information under clause (7) of this subsection, the Director shall notify the Committee on Human Resources of the Senate and the Committee on Education and Labor of the House of Representatives and each participating State of the reasons for requiring such information.

NATIONAL CENTER ON DOMESTIC VIOLENCE

SEC. 8. (a)(1) There is established within the Office of the Secretary an identifiable administrative unit to serve as the National Center on Domestic Violence.

(2) The Center shall be headed by a Director who shall be appointed by the Secretary and shall be compensated at a rate not less than the rate prescribed of the United States Code for a GS–16 under section 5332 of title 5 of the United States Code.

(b) The Director of the Center shall—

(1) be responsible for overseeing all programs and activities carried out under this Act and shall seek to coordinate, through the interagency council established by section 14(b), all Federal programs and activities carried out with respect to the prevention of domestic violence or the provision of assistance to victims and dependents of victims of domestic violence, to the extent such programs relate to domestic violence;

(2) in order to aid the Congress in its oversight activities, take whatever action is necessary to keep the Congress fully and currently informed with respect to the administration and implementation of this Act; and

(3) provide for a national information and resource clearinghouse for matters with respect to domestic violence in order to—

(A) collect, analyze, prepare, and disseminate information relating to the prevention of domestic violence and the provision of assistance to victims and dependents of victims of domestic violence;

(B) serve as an advocate for the establishment of programs and projects with respect to domestic violence and of State and local domestic violence information centers; and

(C) serve as an advocate for the prevention of domestic violence and the provision of assistance to victims and dependents of victims of domestic violence, and assist persons or groups interested in preventing domestic violence or providing assistance to victims and dependents of victims of domestic violence by providing ready access to appropriate information.

(c) The Secretary, through the Director, shall enter into contracts to provide for not less than one regional center for domestic violence to be located in each region of the United States as designated by the Secretary. Each such regional center shall receive, to the maximum extent feasible, an amount from sums made available for any fiscal year for the purpose of this subsection that bears the same ratio to the total amount of the sums so made available as the population of such region bears to the total population of the United States. Each such regional center shall, in coordination with activities carried out under subsection (b)(3) of this section, provide technical assistance and outreach activities to States, local public agencies, and private non-profit organizations participating or interested in participating in the programs and projects authorized by this Act, and inform such entities and all other interested parties, officials, and groups of alternative sources of assistance available with respect to the prevention of incidents of domestic violence and the provision of assistance to victims and dependents of victims of domestic violence.

RESEARCH

SEC. 9. (a) The Secretary, through the Director, shall conduct or cause to be conducted research activities with respect to domestic violence.

(b) Not less than 50 per centum of sums made available for any fiscal year for the purposes of this section shall be made available by the Secretary, through the Director, to the National Institute of Mental Health, established under section 455 of the Public Health Service Act (42 U.S.C. 289 k–1), for research activities jointly agreed to by the Director and the Director of such Institute, conducted or caused to be conducted by such Institute.

NATIONAL CENTER REPORTS

SEC. 10. For the purpose of furnishing information to aid the Congress in its oversight activities, the Secretary, through the Director, on or before February 1 of each year shall prepare and submit to the Congress a report providing specific information on the programs authorized by this Act. Each such report shall include for the preceding fiscal year—

(1) the name of each State receiving a grant under section 4(a) of this Act and the amount of funds paid in such a grant by way of allotment and reallotment;

(2) the total amount reallotted for each State pursuant to section 5 of this Act and the amount distributed to each State by the Secretary pursuant to section 4(b);

(3) a listing of the contracts awarded, and the amounts thereof, for the establishment of regional centers on domestic violence;

(4) the total amount made available to the National Institute of Mental Health for research activities;

(5) the names of grantees and the amounts of grants made for the conduct of research under this Act;

(6) with respect to all grants made under section 4(a), a tabulation of the data described in section 7(a);

(7) with respect to grants made under section 4(b)—

(A) the number of such grants;

(B) the number, and the amount thereof, of grants made in States not receiving and utilizing in full such State's allotments of funds for grants under section 4(a);

(C) the number of grants made, and the percentage of all amounts so granted, to projects conducted in rural areas; and

(D) the percentage of funds granted to private non-profit organizations and the names, locations, and the amounts of all grants made to such private nonprofit organizations; and

(8) any recommendation which the Secretary determines to be appropriate for improving the programs authorized by this Act.

CONFIDENTIALITY

SEC. 11. The provisions of section 408 (including the penalty in subsection (e)), of the Drug Abuse Office and Treatment Act of 1972 (Public Law 92-255, 21 U.S.C. 1175), relating to confidentiality, shall be applied to the records of any individuals subject to any program, project, or activity assisted under the provisions of this Act.

AUDIT PROVISIONS

SEC. 12. The Secretary and the Comptroller General of the United States, or any of their duly authorized representatives, shall, until the expiration of 5 years after the completion of the program, project or activity authorized or assisted under this Act, have access, consistent with the provisions of section 11, for the purpose of audit and examination, to any books, documents, papers, and records of recipients which, in the opinion of the Comptroller General, after consultation with the Secretary, may be related, or pertinent to, the grants or contracts authorized to be made under this Act.

EVALUATION

SEC. 13. (a) The Secretary shall review, evaluate, and report to Congress, not later than 3 years after the date of enactment of this Act, as to the effectiveness of the programs administered and/or operated by the National Center for Domestic Violence and the National Institute on Mental Health pursuant to this Act. Such evaluation shall include examination of—

(1) the extent to which public awareness of the problem of domestic violence has been increased;

(2) the extent to which the availability of services with respect to domestic violence has been increased;

(3) the extent to which assistance made available under this Act has served as a catalyst for State and local community involvement and support (financial and otherwise) for projects with respect to domestic violence;

(4) whether limiting the dollar amount of grants which may be awarded in any one fiscal year or over a five-year period has provided more opportunities for communities and non-profit organizations to maintain projects under this Act;

(5) whether limiting the dollar amount of the grant which may be made to a nonprofit organization in any one fiscal year or over a five-year period has resulted in stimulating community financial support for projects with respect to domestic violence;

(6) the extent to which projects assisted under this Act have continued, without assistance under this Act, to provide services with respect to domestic violence;

(7) the extent to which regional technical assistance centers established under this Act have assisted State, local communities, and private nonprofit organizations in utilizing other available sources of funding to support projects with respect to domestic violence.

(8) the extent to which the Center has provided the necessary relevant information and technical assistance with respect to domestic violence to participating and interested States, local public agencies, and private nonprofit organizations; and

(9) the extent to which research conducted pursuant to this Act has improved understanding of the causes, effects, and incidence of domestic violence, and to which information developed in such research has been useful to projects providing services relating to domestic violence.

(b) Prior to conducting the evaluation required to be conducted under this section, the Secretary shall consult with the Director and advise appropriate Committees of the Congress. As part of the evaluation, the Secretary, to the maximum extent feasible, shall consult with appropriate State officials, and Panel members, local community officials, providers of services, private nonprofit organizations, and victims of domestic violence.

COORDINATION OF FEDERAL PROGRAMS

SEC. 14. (a) In seeking to coordinate programs with respect to domestic violence, providing information and otherwise carrying out clearinghouse functions, and in making grants under section 4, the Director shall give particular attention to the availability for assignment of VISTA volunteers serving under part A of title I of the Domestic Volunteer Service Act of 1973, as amended (P.L. 93-113), and of assistance through the conduct of or grants to special volunteer or demonstration programs under part C of title I of such Act.

(b)(1) In order to assist the Director in coordinating at the Federal level programs for the prevention of domestic violence and the provision of assistance to victims and dependents of victims of domestic violence, an interagency domestic violence council is established. Such council shall be chaired by the Director and shall include representatives of the Department of Justice (including the Law Enforcement Assistance Administration), Department of Housing and Urban Development, Department of Labor, the Department of Commerce, Department of Agriculture, ACTION Agency, Community Services Administration, Department of Defense, and National Institute of Mental Health, and representatives of such other agencies as the President shall designate.

(2) The interagency council shall identify, assess, and coordinate, to the maximum extent feasible and appropriate, all Federal programs and projects and plans for programs and projects providing services or support in carrying out research with respect to domestic violence and shall make such recommendations, as it deems appropriate, with respect to coordination of policy and development of objectives and priorities for all Federal programs regarding the prevention of incidents of domestic violence and the provision of assistance to victims and dependents of victims of domestic violence.

PAYMENTS: NON-FEDERAL SHARE

SEC. 15. (a) Payments pursuant to grants or contracts under this Act may be made in installments and in advance, or by way of reimbursement, with necessary adjustments on account of overpayments or underpayments, as the Secretary may determine.

(b) A State shall be eligible for a grant under this Act only if such State provides in cash the following proportion of the amount of Federal assistance provided during the fiscal year in question as follows: for fiscal year 1979, 0%; for fiscal year 1980, 20%; for fiscal year 1981, 35%; for fiscal year 1982; 50% and for fiscal year 1983, 65%.

DEFINITIONS

SEC. 16. As used in this Act, the term—

(1) "Center" means the National Center on Domestic Violence established under section 8;

(2) "Director" means the Director of the Center;

(3) "Domestic violence" means any act or threatened act of violence, including any forceful detention of an individual, which—

(A) results or threatens to result in physical injury; and

(B) is committed by a person 18 years of age or older against another such person to whom such person is married, or with whom such person is residing, or, if such person is under the age of 18, is committed by a person with whom he or she is living as husband or wife;

(4) "Panel" means the State Citizen Panel on Domestic Violence established pursuant to section 3;

(5) "Secretary" means the Secretary of Health, Education, and Welfare; and

(6) "State" means each of the several States, the District of Columbia, the Commonwealth of Puerto Rico, and, except as otherwise provided, Guam, American Samoa, the Virgin Islands, the Commonwealth of the Northern Marianas, and the Trust Territory of the Pacific Islands.

AUTHORIZATION OF APPROPRIATIONS

SEC. 17 There are authorized to be appropriated $30,000,000 for the fiscal year 1979 and for each of the four succeeding fiscal years in order to carry out the provisions of this Act. Of the sums so appropriated for any fiscal year, 85 per centum shall be used for making grants under section 4; 8 per centum shall be used for the operation and activities of the Center under section 8; and 7 per centum shall be used for research conducted or caused to be conducted under section 9.

● Mr. WILLIAMS. Mr. President, I am pleased to join my colleague, Senator CRANSTON, in sponsoring the Domestic Violence Prevention and Services Act. This legislation addresses a problem that is eroding the very core of our society—the family. This legislation was fashioned to pull together a number of existing proposals and incorporate into them several new ideas to more effectively deal with this complex societal problem. Recently, the Senate Human Resources Committee's Subcommittee on Child and Human Development held hearings on domestic violence. These hearings documented the tragic problems of battered and abused spouses and the critical need to provide assistance to States and local communities, as well as private non-profit organizations, to more effectively combat these atrocities.

Domestic violence occurs in all levels of society, regardless of ethnic or socioeconomic background. Surveys have indicated that as many as 3 million women are beaten by their spouses each year. The incidence of domestic violence is clearly on the rise, but facilities to accommodate the needs of battered women and their families are all too often minimal if they exist at all in a community.

Subcommittee witnesses underscored the necessity to provide primary supportive services such as shelter, food, and clothing, and ancillary services such as legal assistance, public relief, and moral support and encouragement. Mr. David Lowenberg, a program coordinator for a victim witness advocate pro-

gram in Tucson, Ariz,, in an article on battered women, writes as follows:

If a community does have a sufficient primary and secondary support system to aid women who have been assaulted by their mates, more women may have the opportunity to liberate themselves from their victimizers. Neither primary nor secondary support services alone will help a battered woman to become permanently liberated from her violent home environment. Both primary and secondary services must be available and functional before a community can actively provide viable alternatives for battered women.

My own State of New Jersey has made significant progress in dealing with this problem. Last May, a conference was held in New Jersey to examine some of the many facets of the problems of battered women, including the extent of the problem; the need for services for victims; and the availability of funding to accelerate establishment of emergency shelters. The conference generated considerable attention and concern by the public on this growing family problem. An organizer of the conference was also a witness before the Subcommittee on Child and Human Development, Ms. Sandy Ramos, executive director of Shelter Our Sisters, Inc., of Hackensack, N.J., gave powerful and moving testimony on her experience with battered women and their families. Ms. Ramos has been involved for over a decade in the struggle to serve the needs of these refugees from violent homes. She was one of the first activists to focus attention to the pervasiveness of this crime within the State. Ms. Ramos endorsed involvement of the Federal Government in efforts to deal with domestic violence and gave the following recommendations to the committee.

Until society's attitudes change. . . . The government must be the first to be truly responsive to the needs of women and children who flee from the violence in their home. Money must be allocated for programs where a woman with no other place to go can find resources with which to restructure her life without violence. This program must include counseling for mother and children, in order to break the cycle of violence. It must provide advocacy for services from social service programs, legal counseling, job, housing and child care services. Ideally, this Federal assistance should be diverted toward the grass-roots agencies which have demonstrated the ability to understand the dynamics and sensitivity of the problem.

The Domestic Violence Prevention and Services Act is designed to assist in accomplishing these objectives. The bill would provide grants to States for establishment of programs to prevent, and assist victims of, domestic violence and grants to private nonprofit organizations to provide services. It would encourage the establishment of State citizen panels on domestic violence to oversee the implementation of Federal, State, and local programs. It would also establish a National Center for Domestic Violence within the Office of the Secretary of Health, Education, and Welfare to collect, analyze, prepare, and disseminate information related to domestic violence and to conduct research into the variety of factors that contribute to the causes of, and relate to the treatment of, domestic violence.

While this legislation would authorize only $30 million for domestic violence efforts, it is designed to maximize efforts to stimulate local and State projects with seed money for States and qualified organizations. During the first year of qualification, a grantee could be awarded up to $25,000 for startup funds, with a maximum of $40,000 over a 5-year period.

Mr. President, the Federal Government should take a lead in catalyzing the efforts of organizations to eradicate domestic violence. Enactment of the Domestic Violence Prevention and Services Act would assist in accomplishing this goal.●

● Mr. RIEGLE. We are a violent society. Armed robbery, war, gratuitous violence—these are not only tragedies of our history, they are also daily entertainment through our airwaves. On a personal level, many people take out these violent tendencies on those closest to them, members of their own family.

Because our Nation cannot afford to let domestic violence continue to disrupt and all too often destroy the lives of its innocent victims, I join the chairman of the Child and Human Development Subcommittee, Senator CRANSTON, and the chairman of the full Human Resources Committee, Senator WILLIAMS, in offering a bill to commit the Federal Government firmly on the side of the victims of this horrible crime.

This bill authorizes appropriations of $30 million a year for 5 years, with requirements for increasing State matching funds over this period. This amount will not solve the problem of domestic violence. Quite frankly, it will not even come close. But it is a significant Federal commitment to helping States, localities, and volunteer groups deal with individual victims who face violence in their own homes.

In drafting this bill, I have been impressed with the depth of knowledge and concern shown by Senators CRANSTON and WILLIAMS, as well as by the authors of an earlier bill, Senators ANDERSON and KENNEDY. The list of cosponsors of this measure illustrates the general consensus that it sets up an effective mechanism to mobilize community and Government resources at all levels to address the problem of violence in our families. I strongly hope that every other Member of the Senate will join with us in our effort to aid the women, of all economic and social circumstances, who fall victim to force and violence within their own homes.●

Mr. KENNEDY. Mr. President, I am pleased to join in cosponsoring the Domestic Violence Prevention and Services Act introduced today by Senator CRANSTON.

Domestic violence is a problem that cuts across all socioeconomic lines. It is as much a problem in Milton, Mass., as it is in the South End. A recent study at the University of New Hampshire showed that 16 percent of students witnessed one act of physical violence between their parents in the previous year. A Harris survey conducted for the National Commission on the Causes and Prevention of Violence said that—

One-fifth of all Americans approve of slapping one's spouse on appropriate occasions. Surprisingly, approval of this practice increases with income and education . . .

Victims of domestic violence suffer from a multitude of problems. Many of them are economic prisoners—how will they support themselves and raise children if they leave? Many lose their own sense of self-respect. They get little support from the legal system. Only three States have laws that make it an automatic felony for a husband to beat his wife. And yet assault is a crime in every State. Most States, however, treat wife-beating not as a crime, but as a civil matter. In many instances the police are not adequately trained to handle this problem. The problems are multifaceted and certainly the Federal Government cannot solve them all. But we can and must do more.

Last June, I joined Senator ANDERSON as a cosponsor of S. 1728, "The Domestic Violence Prevention and Treatment Act." This was the first bill introduced in the Senate to address this issue. Since the introduction of that bill we have heard from many organizations and individuals dealing at a grossroots level with this problem. Violence in the home was also a topic seriously discussed at the National Women's Conference in Houston last November. We have received excellent suggestions on the problems from all these groups. They have suggestions about what the Federal Government could and should do. Many of these suggestions have been incorporated in the bill introduced today by Senator CRANSTON.

In my own State of Massachusetts there are several groups already quite active. These include Casa Myrna Vazquez in the South End of Boston, Transition House in Cambridge, and RESPOND in Somerville. Throughout the Commonwealth there are other programs in early stages of development. Many of them need not only the money that could come from this bill, but also the technical assistance that this comprehensive bill would provide. There are, of course, a variety of services already available through Federal, State, and local efforts. These services are, however, quite fragmented. The bill that we will propose will do much to help coordinate these efforts.

The Federal Government has finally started to respond to this problem. The Office of Public Liaison at the White House has held a series of meetings on this issue. In addition, the U.S. Commission on Civil Rights sponsored an excellent symposium on this issue in January. With a coordinated program within HEW, the Federal Government can begin to do more than just address the issue. It can provide services and money to both private nonprofit organizations and local government programs addressing this need.

We live, unfortunately, in a violent society. Domestic violence is another manifestation of a society that has lost its respect for the individual. There are many examples of the prevalence of violence in our Nation. As a member of the Senate Judiciary Committee, I have seen efforts for a more stringent gun control legislation thwarted year after year. The Senate recently passed S. 1437, the Criminal Code Reform Act of 1978. As sponsor of this major reform bill, I was pleased that the bill as it passed the Senate eliminates the current common law rule that a spouse cannot rape his wife.

The family is the basis and strength of our society. And yet, in many families there are problems that for too long have been hidden from the rest of society. In 1973, the Federal Government finally recognized the problems of child abuse and began to respond. And now we are addressing the problems of domestic violence. It is a sad fact that many women are physically abused by their husbands. In many instances these women have no place to turn. They live with this situation for many years either believing that the situation will change or fearing the unknown if they leave and seek outside assistance.

No single Federal program can solve this problem. But this legislation will provide direct Federal focus on this serious problem and will work with the States, local governments and private, nonprofit agencies to insure that the tragic needs of these people are being addressed.●

● Mr. ANDERSON. Mr. President, I am pleased to join Senator CRANSTON in introducing S. 2759, the "Domestic Violence Prevention and Services Act," which provides a comprehensive approach to meeting the critical needs of battered women and their families. The bill employs a State granting mechanism to insure program stability and continuity, as well as important direct Federal contingency funds to address service needs not met through the State programs.

In June of 1977 my bill, S. 1728, on which Senator KENNEDY joined me as an original cosponsor, brought the urgent problem of wife battering before Congress. Since that time we have witnessed a tremendous outpouring of concern and interest by hundreds of dedicated individuals committed to reducing the tragedy of family violence. It has been a privilege to work with Senator CRANSTON in translating this concern into tangible provisions to effectively respond to the abuse and violence occurring with alarming regularity in families today.

From the beginning, this has not been an easy or enjoyable task. It has brought each of us working on domestic violence legislation face-to-face with some painful realizations. We learned that family life is not always as tranquil and happy as we would like to think. We learned, in fact, that in some situations family members exist at the end of a short fuse, which, if ignited, can explode into violence resulting in permanent physical injury or even death. We learned also that today's violent adults are often in one way or another the product of an earlier cycle of violence in childhood. And family violence is not a phenomenon that does not occur in "nice" families. It crosses all cultural and socioeconomic lines.

In my home State of Minnesota the St. Paul Police Department reports that about 100 police reports dealing with domestic violence are written each week. These figures are undoubtedly low since they do not include cases in which the victim did not press charges. Moreover, many, if not most, incidents of domestic violence are not reported to the police at all.

Women's Advocates of St. Paul has sheltered over 2,000 women and children over a 3½-year period, and had to turn away three times that many people seeking help.

In Duluth, the Northeast Minnesota Coalition for Battered Women served 140 women and their children for the 9-month period ending this January.

In Sherburn County, law enforcement officials report that wife assaults represent one-quarter of all assaults there. In Wright County they represent more than half.

And I assure you, Mr. President, this is not a problem that is peculiar to Minnesota. In Atlanta, for example, 60 percent of all calls received on the night shift are reported domestic disputes, indicating more trouble in this area than in any other crime category. And in Lincoln, Nebr., in 1973 the police handled 2,000 cases of wife abuse—an average of five a day. Here in the metropolitan District of Columbia area, in 1974, two counties reported domestic quarrel numbers as: Fairfax County, 4,073; and Prince Georges County, 8,440. The District of Columbia keeps no such statistics.

So it is not difficult to see how quickly the alarming national statistics we have seen can add up.

As discouraging as this sounds, preventing and treating family violence is not a hopeless cause. It is estimated that there are 145 programs serving battered women in the United States and some 100 research projects to provide data to help us determine its causes. Effective treatment models have been identified and it is our responsibility to promote and support such efforts. I believe the bill we are submitting today will go a long way toward putting an end to the anguish and isolation of domestic violence victims. It can assist in breaking the chain of violence that links the present victims and perpetrators to future generations, and halt the cycle of violence to which the Eugene O'Neill quote so aptly applies. He said:

There is no present or future—only the past, happening over and over again—now.

On March 8 I was honored to testify before the Subcommittee on Children and Human Development on the issue of domestic violence. I ask unanimous consent that my testimony and the testimony of Cheryl Beardslee of Women's Advocates in St. Paul, and the testimony of Harriet (surname withheld), a former resident of Women's Advocate, be printed in the RECORD.●

There being no objection, the material was ordered to be printed in the RECORD, as follows:

STATEMENT OF SENATOR WENDELL ANDERSON

Mr. Chairman, thank you for inviting me to testify before the Subcommittee on Legislation to prevent and treat domestic violence. I want to commend the subcommittee for its prompt attention to this urgent problem. As the primary forum on Legislative issues affecting children, youth and families, your subcommittee has responded admirably to a wide range of concerns such as inadequacies within the adoption and foster care system and the effects of government policies on family life. Although I am not a member of the committee, it has been a pleasure to work with you and support your efforts on several occasions in the past.

Today we are turning to a problem which is perhaps the most perplexing and severe of all in its effect on children and families.

Violence in America has become a major national social disaster and scandal. We too frequently accept it as inevitable, grow callous to its presence, seem almost indifferent or overwhelmed by its enormity.

We have, incredibly, raised violence to a form of entertainment, filling our homes with endless hours and incidents of television violence. The beaches of Normandy seem occasionally like a Sunday school picnic compared to what is provided nigntly to the American public. Our children see more violence than love, more deceit than decency.

Whether there is a connection or not, I do not know, but our schools in the past decade have become battlegrounds with teachers and students victims of aggression leading to fear, psychological breakdown, hospitalization for injuries, and even death.

On our streets, we have witnesed immense amounts of crime—not against property alone, but against people, crimes of assault and rape and murder.

And there is yet another form of violence which for many years we pretended did not exist, except as an aberrant and occasional phenomenon. That, of course, is domestic violence . . . the beating and abuse, and in some instances, murder of wives, husbands and children by each other.

We denied it because it violated our view of the American home as a place of love and affection, of mutual respect and happiness. The home was, we seemed to say, a haven from the surrounding chaos.

It was easy to deny because the victims and the perpetrators of the violence themselves denied the abuse or disguised it where possible.

Society, in turn, through the law enforcement system, through the courts, through the social service agencies, treated the problem lightly or not at all or with hostility or at best ambiguity.

We raised lots of questions. Could we intrude into the home? Weren't the bonds of marriage supreme? Wasn't it just the pattern of some marriages and didn't the victims invite the violence? We ducked and dodged and never dealt with the reality any better than the victims themselves.

But, slowly, during the past several years, we have begun to recognize this social illness and to some extent we have also begun to analyze and define it.

Today, the magnitude of the problem is no longer deniable. Encouraged by the women's movement, many of the victims themselves have come out from behind closed doors into public view.

We have learned from study after study that domestic violence is widespread, cuts

across social and economic lines, and may be increasing, certainly it is not a decreasing phenomenon which, if left alone, will just go away.

There are some studies which would suggest that close to five million wives suffer extreme violence at some time in their marriages, some frequently and regularly. We know that nearly two million American couples have used a lethal weapon on one another during their marriages. We know that over a fourth of all murders and a far larger percentage of aggravated assaults occur between spouses. We know that the most common relationship between murderer and victim is membership in the same family.

Maybe one set of figures can demonstrate more clearly what I am saying. From 1967 to 1973, there were 39,521 American deaths in Vietnam. It was a war which tore this country apart.

During those same years, with virtually no public attention, there were 17,570 deaths due to domestic violence—the result of spouse and child abuse.

The Vietnam war is over. Domestic violence continues. The time is long overdue for Federal action that is coordinated, substantial and humane.

More victims want help, more people want to help them. In recent years, shelters have begun to appear in various parts of the country. Those shelters are almost always themselves victims of inadequate funding erratically given. You will hear shortly from Cheryl Beardslee, a staff member of Women's Advocates in St. Paul, Minnesota, the oldest shelter for battered women in the U.S.

During 3½ years, this shelter housed over 2,000 women and children. That is hopeful. They saved lives. What is sad is that they turned away three times that many family members during the same period. What is sad is that there are countless more women, countless more families who would come forth if there were safe places for them. You will hear a formerly battered wife describe that need in personal terms and how Women's Advocates shelter was indeed a haven of love and succor for her.

We have before us S. 1728, which I introduced with Senator Kennedy, a companion of which has been introduced in the House of Representatives by Representatives Newton Steers and Lindy Boggs.

This bill was designed to support projects in the prevention and treatment of domestic violence, concentrating on family rehabilitation and support, as well as on emergency shelter for threatened family members.

It identified the need for examination of existing State domestic violence laws and programs and for coordination of Federal, State and local efforts in prevention, identification and treatment of domestic violence.

Finally, the bill, which would provide $60 million over a three-year period, addressed the need to complement previous and ongoing domestic violence research by National Institutes of Mental Health, Law Enforcement Assistance Agency and other Federal agencies.

The response to this legislation has been enormous. Since June when the bill was introduced, the sponsors have received a tremendous amount of valuable, constructive advice from people working to prevent and treat family violence. It has been a special privilege to work with the subcommittee in translating those ideas into effective, responsive legislation to help battered women and their families, and I was pleased to join you as a cosponsor of the new bill now pending before the subcommittee.

Mr. Chairman, I am sure when these hearings are done and you have heard the testimony of the people who have been the victims of domestic violence and those who have been the pioneers in solving this national problem that you will move favorably ahead.

I want to conclude with one thought. Domestic violence is like a bad gene. Its effects show up in later generations. Children abused today are the parents of tomorrow who abuse their own children. Children today who watch a father pummel a mother become bullies in their own marriages. Clearly, not every child who is abused or witnesses abuse will follow in the same path, but virtually everyone in the next generation who becomes an abuser will be able to look back on domestic violence involving themselves. Our investment now pays off this year and next, but it is also an investment in a happier generation many years from now.

SHELTER: A VIABLE ALTERNATIVE

(Presented to Child and Human Development Subcommittee, Washington, D.C.)

Historically, women beaten in their own homes have been seen as recipients of justified punishment, participants in a private fight or masochists. As a result there has been little help given to assist abused women in changing their situations; more likely, responses to requests for help leave abused women feeling more responsible, more at fault.

In the past few years shelters have developed in response to the unmet need for safety for abused women and their children. Women's Advocates shelter in St. Paul, Minnesota opened in October of 1974. In the past three and one half years we have housed over two thousand women and children, while forced to turn away three out of every four families who request housing. I will share with you the development of one shelter created in response to the plea of women in St. Paul for a place to seek shelter with their children, to escape the fear and violence in their homes; and the development of a program continually defined by the women—and the children—for whom it exists. In doing so, I share with you not only our own experience, but that of the growing network of shelters developed by women across the country who at last initiated a response based on the right of each woman to control her own life, respecting and nurturing her own sense of what needs to be done to change her situation.

In 1971, with no intention of developing a shelter, a consciousness raising group decided to begin work that would be supportive to women. They began a telephone service designed to provide women with information about their rights in the area of family law. Women's questions about what they could do to get out of violent family situations spurred a search for available options. Legal options available to a woman in an abusive relationship only presented increased danger, since she was expected to live with her assailant while proceeding against him in the courts. Possible sources of shelter were explored; the only emergency housing provided for a woman with children was a night or two in a rundown hotel provided by Emergency Social Service. Nearly every call from a woman who had been abused would begin with "you're going to think I'm crazy", or "you're not going to believe this". In previous calls for help or attempts to get support she had most often been discounted for exaggerating or told she was to blame for the violence. It was clear that she needed a safe shelter, time, and people who would believe her, validate her experience, and trust her so that she could begin to trust herself to make decisions for herself and family.

Women's Advocates incorporated as a Minnesota non-profit corporation in April 1972 and began reaching out to the community for financial support through letters and eventually a newsletter. As individual donations were received a small office-apartment was rented providing a bedroom for housing and office space for the phone service. Volunteers began housing women in their own homes. By continuing the phone service and beginning to meet the need for shelter, Women's Advocates was able to document the problem of women abuse in St. Paul and demonstrate that emergency housing created an alternative for women living in violent homes.

The documentation and demonstration of an alternative were crucial in the search for funding over the next two years. In 1974 Women's Advocates received grant-in-aid money for salaries from the State Welfare Department, followed by private foundation money for a downpayment on a house and its rehabilitation. Program money then became available from private foundations and the local mental health board.

When we opened the house in October of 1974 there were not enough beds and there was no food. We were confident that women working together had the resources to solve any upcoming problems. No preconceived policies or procedures had been set out. House policies and procedures have been continually developed through decision making processes involving residents, staff, ex-residents and other members of Women's Advocates work groups. We had begun operating a shelter based on the belief that women could define a space and a program that would meet their needs. Three and one half years of experience have strengtehned that belief. In our shelter and other shelters across the country programs for battered women gain strength and clarity through processes in which residents, staff and boards cooperate to constantly redefine their programs.

Advocacy for an individual woman is the process of helping her reach goals she determines for herself. The success of our shelter depends on that process. When a woman has the opportunity to make her own decisions about her life she gradually begins to see herself differently. She feels sane, capable and worthwhile. She sees herself as someone who deserves to be treated well; with a right to not be beaten.

Our work with community agencies focuses on ways in which they can provide services that will facilitate a woman's opportunity to make her own decisions. The welfare department is one example. When we first opened, women had to pay us room and board out of their own pockets, leaving little money for personal needs and none to find suitable housing after the shelter. Work between Women's Advocates and the welfare department has resulted in the creation of a vendor system for emergency housing. The county now pays a per diem for room and board for a family, leaving the woman with the financial resources to decide when she wants to leave the shelter and where she wants to live. We also worked with the welfare department to develop consistent procedures so that the woman has control over who knows her whereabouts. Frequently, a search for a father for the purpose of collecting child support means a new seige of assault for a woman and her children.

So far, I have mentioned children only in connection with their mothers. When we first opened we considered children to be the mother's responsibility and we focused on helping her. We soon learned that children share the mother's fear, insecurity and lack of self-esteem. We made efforts to help children as we carried on our program with mothers and gradually decided that we needed child advocates. We now have two staff positions for child advocates. Though most of the children who come to the house have not been the direct targets of abuse,

the fact that they experience the affects of violence toward their mothers makes them victims and means they have special needs. The child advocates have worked with the public schools, head start, and child care coordinators at the city, county, and state levels to see that the special needs of children are met not only while they are at the shelter but after they leave as well.

Other community agencies we have important relationships with are the police, Family Service, Community Planning Organization, Legal Assistance, and the county mental health center. We depend on the city police to provide protection for us and they depend on us as a referral source for women in domestics they respond to. Women's Advocates shares a chemical dependency counselor with Family Services. The Community Planning Organization provides a resource library on battered women and cooperates with us in community education efforts. Workers at the Ramsey County Mental Health Center refer women to our support groups and we use them as a referral source for women who want on-going counseling. Legal Assistance has worked out a system whereby a woman who has been physically abused can be seen on an emergency basis. We are also involved in educating our community, and our legislature to facilitate the passage of legislation which would protect battered women wherever they are and provide funding for shelters.

Though we're now primarily supported by public funds; the county mental health board, the welfare department, and a grant through our state's shelter legislation our budget is not met. We must continually prove our need to present funding sources and seek new sources at the same time even though programs for battered women are in the limelight. There are groups of women all over the country who are ready to open shelters when funding is available. We all need funding that will be stable and will continue when some other social concern captures the public eye. The most pressing funding problem we've faced is the difficulty in obtaining capital funds for building, equipment and furnishings. Throughout our existence we have had to rely largely on private donations for capital investments. Private donations were the only way we were able to construct a fence to improve our neighbor relations.

Our relationship with our neighborhood is important to mention because it has been relatively smooth. Our arrival in the neighborhood went unheralded. We are licensed as a room and board facility and located within an area already zoned to permit room and boarding houses. In the three and one half years since our arrival we have received complaints from neighbors about the noise of children and children in their yards. We have taken such complaints seriously and negotiated solutions to the problems. Angry men have confined their threats and harassment to the house itself and our relationship with the police helps provide the immediate response we need to prevent threats from becoming assaults.

Our success with our neighbors and with agencies is a visible, objective quantity. The success of the program for women who use it is more elusive. There are objective ways we measure our success. Women who stay at the house experience safety from abuse and fear. That is success. Some women who have stayed at the house maintain contact with us and we hear about others so we know what changes they've made. We want to know more about what happens to women and their children once they have left the shelter but tracing families when they leave takes time and money that we don't have. Subjective measures are also important to us. The way a woman looks and what she tells us about how she feels are the day to day feed back that tells us whether or not the house helps her meet her needs. We have been careful not to define the "successful client". Each woman knows best what she needs to do for herself and her children and only she knows if she has succeeded.

I have talked a lot about providing an opportunity for women to take control over their lives. I want to erase any implication that that will solve the problem. It is not true that she is responsible and if she would only act the problem would be solved. At Women's Advocates we have heard from and/or housed women who were beaten by attorneys, doctors, business men, elected officials and police officers as well as women beaten by men who are laborers or underemployed. One researcher estimates that 50 percent of the women in the United States experience physical abuse. As a society we have an obligation to look not just at the individuals involved in violent families but at the ways our institutions support violence against women as an acceptable part of family life. Until we have made some real changes in our cultural view of the family, shelters are a necessary and immediate alternative to living in a violent home. Women and their children have a right to such an alternative.

HARRIET'S STORY

(Presented to Child and Human Development Subcommittee, by Harriet (Surname withheld))

My name is Harriet ———.

I am a battered wife, married seven years. I went through physical and mental abuse for the last five of those seven years. I left my husband three times previous to my coming to the Women's Advocates Shelter. To me the shelter was a blessing, my only way of escaping my situation, which before I discovered the Battered Wives Organization seemed inescapable. I needed a safe place to go, where I wouldn't have to worry about my husband finding me, as he had previously been able to do. I had tried staying with relatives and friends, but my husband would either assault them or convince them to support him in getting me to return home, so I was made to feel unsupported and guilty about what I had done.

So after realizing I had gone through all the people I thought I could depend on for help, I decided the situation was hopeless. I felt I would never be able to get away from him safely. After the last return my husband warned me that if I left again I had better leave the state so that he couldn't find me. I thought about how would the children and I survive, where would we go, where would we stay?

One day I read about the Battered Wives Organization in the paper and decided to try and locate an organization in my city. I called a Women's Resource Center and was given the name of the woman in charge and her number. I called her and she told me to come down and discuss my situation with her. She told me all about the organization and what type of help was available. We discussed shelters out of state which was my basic need, and I decided to go to Women's Advocates in St. Paul, Minnesota. She called ahead to let them know I was coming with three children, Keith age 10, Troy age 8, and Ena age 5. I went home that day feeling so much relief, I couldn't believe my prayers had finally been answered, I had people who were really going to help me. I knew I was going to make it this time.

I knew I wouldn't have to go back to him this time. So when I got the opportunity I got the children and some clothes together and the money I had put away for the rent and left. Upon my arrival at the shelter I was immediately given a chance to talk about my situation, and offered food, and given a room for myself and the children. Within the first week my children were enrolled in school that was very cooperative about my need for confidency and helping the children to feel comfortable in their new environment. I also had help in getting financial and housing aid.

What was more important I had people supporting me for a change. I was helped to get a understanding about myself so I could realize I didn't have to dump a lot of guilt on myself for my marriage not working, because I had honestly tried. There was no need to continue to punish myself by taking the mental and physical abuse I had taken for five years. I stayed at the shelter for seven weeks and within those seven weeks I was feeling very positive about my future and in control of my life again and my childrens. It really felt good to know that I could be me, I didn't have to be what someone else thought I should be.

I was ready to start organizing a new life for myself and the children and feeling very enthusiastic about what I wanted to do. I have been out on my own for five months now and managing quite well despite a few ups and downs. I plan to attend the University by the fall at least. I am doing volunteer work for Women's Advocates which I really enjoy doing a lot because it gives me a chance to help and give the much needed support I got when I came to Women's Advocates. I stop and think, I would never have made it if I hadn't found out about the Battered Wives Organization and came to Women's Advocates, I feel so much anxiety when I think about the women that don't know about the organization, and how hopeless their situation must seem.

The need for shelters far out number the available shelters, its really dishearting to me to know that three out of every four women that call for shelter have to be turned down and put on a waiting list because the shelter is full and all the alternative shelters are full. I know for a woman in that situation that's very discouraging because by the time they get to your name it may be too late. Battered Wives Shelters are very much in need because there just isn't any alternative that will work. Every woman needs to know there is some place she can come to and escape these situations, no woman should have to be subjected to physical and mental violence every day. Shelters are an absolute must there is no alternative.

● Mr. BAYH. Mr. President, I am very pleased to join my colleagues Mr. CRANSTON, Mr. ANDERSON, Mr. KENNEDY, Mr. JAVITS, and Mr. ABOUREZK in introducing the Domestic Violence Prevention and Services Act. This legislation has grown out of the desire of many Members of this body to address an ever-expanding problem in our Nation—the problem of spouse abuse. Through the leadership of three of my distinguished colleagues in particular, Senators ANDERSON, KENNEDY, and CRANSTON, we have before us today a comprehensive response to the inadequacy of our present system in combating the growing epidemic of domestic violence.

Del Martin in her authoritative study, "Battered Wives" estimates that conservatively there are well over a million brutalized women in the United States. Sociology professor Murry Straus testi-

fied before the New York State Legislature that this number is probably closer to between 3 and 6 million brutalized women. In my own State of Indiana, the YWCA-sponsored Shelter for Women Victims of Violences estimated that there are from 5,000 to 7,000 cases of spousal assault a year in Allen County, Ind., alone. No matter what the actual number is, all authorities who have studied the problem of battered wives agree that the present system provides no adequate answers for these unfortunate victims of violence.

What recourse does a battered woman have at the present? The answer is not much. She can appeal to the local police who are frequently unwilling to intervene in what they determine is a "family matter." She can seek restraint on her spouse through the courts; most frequently to be admonished by a family court judge that she has provoked the attacks herself. She can run away provided she has the economic independence to sustain herself or her children. Finally, she can turn to local shelters for battered women which have been springing up in localities all over our Nation.

The legislation we are introducing today seeks to increase the participation by States, local communities, private nonprofit organizations, and individual citizens in efforts to prevent domestic violence and to assist victims and dependents of victims of violence. In order to accomplish this purpose, this legislation establishes a grant program through the Department of HEW which authorizes $30,000 a year through fiscal 1983.

I urge my colleagues to support this worthwhile legislation.●

ADDITIONAL COSPONSORS

S. 1185

At the request of Mr. MAGNUSON, the Senator from Indiana (Mr. BAYH) was added as a cosponsor of S. 1185, a bill to regulate interstate commerce with respect to parimutuel wagering on horseracing to maintain the stability of the horseracing industry.

S. 2164

At the request of Mr. ZORINSKY, the Senator from Alaska (Mr. GRAVEL) and the Senator from Minnesota (Mrs. HUMPHREY) were added as cosponsors of S. 2164, a bill to amend title 23 of the United States Code, relating to highways, to authorize a program to separate rail and highway crossings in certain energy impacted cases.

S. 2400

At the request of Mr. BAYH, the Senator from Minnesota (Mrs. HUMPHREY) was added as a cosponsor of S. 2400, a bill to establish a National Alcohol Fuels Commission.

S. 2402

At the request of Mr. STAFFORD, the Senator from New Mexico (Mr. DOMENICI), the Senator from Rhode Island (Mr. CHAFEE), and the Senator from North Dakota (Mr. BURDICK) were added as cosponsors of S. 2402, a bill to require that competitions be considered to enhance the Nation's architecture and determine the design of certain new Federal office buildings.

S. 2472

At the request of Mr. CASE, the Senator from Maine (Mr. HATHAWAY), the Senator from Alaska (Mr. GRAVEL) and the Senator from Rhode Island (Mr. PELL) were added as cosponsors of S. 2472, a bill to authorize the Secretary of State to implement solar energy and other renewable energy projects in certain buildings owned by the United States in foreign countries.

S. 2481

At the request of Mr. DOLE, the Senator from South Dakota (Mr. ABOUREZK), the Senator from Idaho (Mr. MCCLURE), and the Senator from Michigan (Mr. RIEGLE) were added as cosponsors of S. 2481, the Flexible Parity Act of 1978.

S. 2691

At the request of Mr. WILLIAMS, the Senators from Oklahoma (Mr. BELLMON and Mr. MCCLURE) were added as cosponsors of S. 2691, a bill to provide for the furnishing of congregate housing services under the U.S. Housing Act of 1937.

S. 2710

At the request of Mr. SASSER, the Senator from Minnesota (Mr. ANDERSON) was added as a cosponsor of S. 2710, a bill to create a National Academy of Medicine, under the direct supervision of the Surgeon General, for the education and training of doctors of medicine, and other medical specialists who shall serve in the Regular Corps of the Public Health Service as commissioned officers thereof, to amend the Public Health Service Act, as amended (42 U.S.C. 201 et seq.), and for other purposes.

S. 2730

At the request of Mr. WILLIAMS, the Senator from New York (Mr. MOYNIHAN) was added as a cosponsor of S. 2730, a bill to establish a Hubert M. Humphrey Fellowship in Social and Political Thought at the Woodrow Wilson International Center for Scholars at the Smithsonian Institution and to establish a trust fund to provide a stipend for such fellowship.

S. 2731

At the request of Mr. PERCY, the Senator from New Hampshire (Mr. MCINTYRE), the Senator from Rhode Island (Mr. PELL), and the Senator from Alaska (Mr. GRAVEL) were added as cosponsors of S. 2731, the Solar Global Market Survey Act.

S. 2732

At the request of Mr. PERCY, the Senator from Alaska (Mr. GRAVEL) was added as a cosponsor of S. 2732, the Small Scale Energy Technology Programs Reorganization Act.

S. 2733

At the request of Mr. MCINTYRE, the Senator from Alaska (Mr. GRAVEL) and the Senator from New Jersey (Mr. CASE) were added as cosponsors of S. 2734, the Small Business Energy Loan Act.

S. 2734

At the request of Mr. MCINTYRE, the Senator from Alaska (Mr. GRAVEL) and the Senator from New Jersey (Mr. CASE) were added as cosponsors of S. 2734, the Solar Energy Bank Act.

SENATE RESOLUTION 414

At the request of Mr. PERCY, the Senator from Ohio (Mr. GLENN) was added as a cosponsor of Senate Resolution 414, directing the Architect of the Capitol to study the feasibility of installing a solar energy system in the extension of the Dirksen Office Building.

SENATE RESOLUTION 416

At the request of Mr. GRIFFIN, the Senator from Virginia (Mr. SCOTT), the Senator from California (Mr. HAYAKAWA), the Senator from North Dakota (Mr. YOUNG), and the Senator from Utah (Mr. GARN) were added as cosponsors of Senate Resolution 416, to disapprove standards authorized under section 402(a)(26)(B) of the Social Security Act.

SENATE CONCURRENT RESOLUTION 62

At the request of Mr. MCGOVERN, the Senator from Maine (Mr. HATHAWAY) was added as a cosponsor of Senate Concurrent Resolution 62, requesting the United Nations to convene a World Alternate Energy Conference and establish an International Alternate Energy Commission.

SENATE CONCURRENT RESOLUTION 66

At the request of Mr. GLENN, the Senator from Michigan (Mr. GRIFFIN) was added as a cosponsor of Senate Concurrent Resolution 66, relating to the disapproval of import relief to domestic producers of nuts, bolts, and large screws.

SENATE CONCURRENT RESOLUTION 72—SUBMISSION OF A CONCURRENT RESOLUTION TO COMBAT INTERNATIONAL TERRORISM

Mr. CASE (for himself, Mr. STONE, Mr. MOYNIHAN, Mr. JAVITS, Mr. MCGOVERN, Mr. RIBICOFF, Mr. DURKIN, Mr. BIDEN, Mr. METZENBAUM, Mr. PERCY, Mr. ANDERSON, Mr. HEINZ, and Mr. BENTSEN) submitted the following concurrent resolution, which was referred to the Committee on Foreign Relations:

S. CON. RES. 72

Whereas a series of unprovoked terrorist attacks have been conducted against citizens of Israel, Egypt, and Jordan since President Sadat's trip to Jerusalem last November;

Whereas the attacks have resulted in the loss of life and the wounding of civilians, including several Jordanian citizens living on the West Bank, the editor of the Egyptian newspaper Al Ahram on February 18, 1978, and men, women and children who were trapped in a burning bus or deliberately shot during the attack in Israel March 11, 1978;

Whereas the Palestine Liberation Organization has publicly accepted responsibility for the March 11 attack; Now, therefore be it

Resolved, That it is the sense of the Senate (the House of Representatives concurring) that

(1) Such acts of terrorism are strongly condemned and are obstacles to peace in the Middle East and thus are against the national interest of the United States;

(2) The Congress extends its condolences and deep sympathy to those wounded and the families of those killed in the terrorist attacks;

(3) The President should direct the Executive Branch to intensify its efforts to counter international terrorism including use of diplomatic, economic, and security measures taken unilaterally or in cooperation with other nations to terminate assistance received by (a) organizations, groups or individuals which commit or attempt to commit acts of terrorism and (b) governments which provide any assistance to organizations, groups and individuals which conspire to commit or actually commit terrorism.

(4) The President should report to Congress within 30 days after the adoption of this Resolution with respect to action the Executive Branch has taken to implement existing laws regarding terrorism, including Section 3(8) of the Export Administration Act of 1969, as amended and Section 18 of the International Security Assistance Act of 1977 in regard to countries cited under (5) which provide assistance to the PLO and other groups involved in terrorist activities.

(5) The President should report to Congress within 30 days on the nature and extent of the activities of the Palestine Liberation Organization office in New York.

(6) The President should report to the Senate Foreign Relations Committee and the House of Representatives International Relations Committee within 30 days the names of nations which provide to the PLO and its constituent groups financial assistance, training, weapons, sanctuary, bases, escape routes, transportation assistance and documents and other forms of assistance in committing acts of terrorism.

● Mr. CASE. Mr. President, it is time for the United States and other nations to act more forcefully to combat international terrorism.

In recent weeks, terrorists have:

Brutally and deliberately slaughtered 34 persons in Israel.

Assassinated a leading Egyptian newspaper editor, a close friend of President Sadat.

Killed several prominent West Bank Arabs who favored moderate approaches to Middle East problems.

Threatened publicly to kill President Sadat.

Captured a government building in Holland and held more than 70 persons hostage until rescued by the Dutch Marines.

And today, kidnapped a former Prime Minister of Italy, killing his bodyguards.

Some of the terrorist groups might have been less active and deadly if there had been more vigorous efforts by this country and other responsible countries to curtail the resources being made available to the terrorists.

It is not solely a question of passing new laws, although tougher legislation is being drafted, administration officials have been reluctant to use laws already on the books that could help dissuade countries that have been providing assistance to the terrorists.

For example, the State Department recently approved the sale of an executive jet airliner to Libya, a nation which is a major supporter of extremist terrorist groups. That type of aircraft, with a range of 7,000 miles, is extremely useful in helping terrorists move from one country to another or helping them smuggle in terrorists. I made this point in a letter to the State Department on February 16.

The Department replied that the executive jet has "little potential to be employed in any militarily significant fashion by the Libyans." Apparently transportation of terrorists is not militarily significant in the State Department's view.

To the Department's credit, export licenses for two other passenger planes and for maintenance of C–130 transport planes were turned down. But that does not justify the sale of the executive jet.

It is regrettable that officials who are supposed to be concerned about terrorism would approve such a sale. In its reply, the State Department said the sale signals that:

We are not trying to prohibit all bilateral commercial exchanges, an important point in view of our major economic interests in Libya.

Even if one accepts that point—and I am not sure I do—there are other items we can continue to sell them rather than a plane so ideally suited for sneaking terrorists and weapons past the customs inspections which are slack at many airports.

I opposed the sale not because I thought the executive jet was potentially useful in military operations but because it could be so handy for terrorist operations.

I urge the President to reconsider the sale and refuse to allow the plane to be delivered until there is an across-the-board halt to Libya's support for terrorists. Citing Libya's recent refusal to allow hijacked planes to land there is not a sufficient sign of progress for they may have merely been trying to avoid bad publicity. It is the clandestine activities which cause more concern.

Another example of the State Department's mixing of signals concerns the financial support for the PLO which issued press statements saying that Al Fatah, its military arm, conducted the March 11 attack in Israel.

More than 2 months ago, on January 1, Al Fatah representative in Saudi Arabia made a broadcast on the Government-controlled Saudi radio thanking the Saudis for providing more than $42 million of aid to his group last year. There had been earlier press reports that the Saudis had been providing millions of dollars in aid to the PLO. Since President Sadat's courageous trip to Jerusalem last November there also have been reliable reports from a number of sources that the PLO was planning to take a more activist role. Yet, according to reports in the Washington Star and by the Associated Press, the top American official in Saudi Arabia said last week that he did not know of any effort to ask the Saudis to stop bankrolling the group.

Our Ambassador, John West, also was quoted by the Associated Press as saying the Saudis denied they were contributing to terrorist organizations of any kind. If he does not know that Al Fatah is a terrorist group, he should spend more of his time in Washington getting briefed instead of trying to persuade Members of Congress to approve selling 60 F–15's by telling them that the Saudis are backing moderate forces in the Middle East.

Tuesday, the Assistant Secretary of State for Near Eastern Affairs, Mr. Alfred Atherton, told the Senate Foreign Relations Committee that the United States had raised the funding issue with the Saudis over a period of years, including "quite recently."

There is reason to believe that the "quite recently" meant since this weekend after the PLO publicly admitted its role in terrorist activities.

From comments made by State Department and Saudi officials, it is obvious that the Saudis—at least so far—are turning down the approaches made to them regarding their funding of the PLO.

Mr. President, I am well aware of the frustrations in trying to counter terrorism and of the limits to what we can do to prod nations to stop giving assistance to international terrorists.

The Senate Foreign Relations Subcommittee on Foreign Assistance, of which I am the ranking Republican member, has held hearings on the issue and will hold more. The Senate Committee on Governmental Affairs already has held hearings on Senator RIBICOFF'S omnibus antiterrorism bill which I cosponsored. It is my hope that the Senate Foreign Relations Committee will have an opportunity to act on it soon.

There are, however, existing laws which can and should be used more vigorously. I would like to point out in particular an amendment added to the Export Administration Act last year and signed into law by President Carter, which declares that it is national policy to use export controls to encourage other countries to take immediate steps against international terrorism. This section reads:

"(8) It is the policy of the United States to use export controls to encourage other countries to take immediate steps to prevent the use of their territory or resources to aid, encourage, or give sanctuary to those persons involved in directing, supporting, or participating in acts of international terrorism. To achieve this objective, the President shall make every reasonable effort to secure the removal or reduction of such assistance to international terrorists through international cooperation and agreement before resorting to the imposition of export controls."

I interpret the word "resources" in subsection (8) to include financial resources.

Mr. President, it is time that officials make more vigorous use of the laws, particularly when it comes to trying to cut off aid to outlaw groups which violate all standards of humanity by deliberately slaughtering as many people as possible.

I have no doubt that some administration officials will find all sorts of excuses for not wanting even to consider using export controls.

The administration faces a key test of its seriousness in opposing terrorism with action instead of words. The test cannot help but influence whether Con-

gress will go along with the discretionary phrases of "wiggle room" the administration will want when Congress acts upon future antiterrorism legislation designed to close the existing loopholes.

Mr. President, with this background in mind, I am submitting, with a number of my colleagues of both parties, a resolution calling on the President to take additional actions to combat international terrorism.●

● Mr. PERCY. Mr. President, I have chosen to be one of the original cosponsors of this resolution because I believe that greater efforts must be made to combat terrorism. The recent terrorist acts against citizens of Israel, Jordan, and Egypt demonstrate that terrorism remains one of the world's most intractable problems.

The outrageous raid against civilians in Israel was a premeditated murder both of innocent civilians and of the Israeli-Egyptian peace process as well. The obvious objective of the PLO attack was to poison the atmosphere for the Israeli-Egyptian peace negotiations. For this reason, all of us who seek a just peace should redouble our efforts to bring the parties together, while rejecting the destructive activities of the rejectionists.

The PLO cannot really believe that this criminal attack on innocent civilians will convince Israel to invite a PLO-dominated state to be its neighbor. On the contrary, Israel can now be expected to be even more adamant in its opposition to the PLO.●

AMENDMENTS SUBMITTED FOR PRINTING

TAXES, TECHNICAL CORRECTIONS ACT OF 1977—H.R. 6715

AMENDMENT NO. 1732

(Ordered to be printed and referred to the Committee on Finance.)

Mr. McCLURE submitted an amendment intended to be proposed by him to the H.R. 6715, the Taxes. Technical Corrections Act of 1977.

NAVIGATION DEVELOPMENT ACT—H.R. 8309

AMENDMENT NO. 1733

(Ordered to be printed and to lie on the table.)

Mr. McCLURE (for himself and Mr. CHURCH) submitted an amendment intended to be proposed by them, jointly, to the bill (H.R. 8309) to authorize certain public works on rivers for navigation and for other purposes.

AMENDMENT NO. 1734

(Ordered to be printed and to lie on the table.)

Mr. McCLURE submitted an amendment intended to be proposed by him to the bill (H.R. 8309), supra.

NOTICES OF HEARINGS

COMMITTEE ON SMALL BUSINESS

● Mr. NELSON. Mr. President, I wish to announce that the Select Committee on Small Business will hold a hearing on two bills before the committe, title I, of S. 807, and S. 2733. The hearing will commence at 9 a.m. on Wednesday, March 22, 1978, in the committee's hearing room, room 424 of the Russell Building. Senator MCINTYRE will chair. A witness list will be announced before the hearing. For further information, please contact the committee office at 244–5175.●

CAPITAL FORMATION PROBLEMS OF SMALL AND MEDIUM-SIZED INDEPENDENT ENTERPRISES

● Mr. NELSON. Mr. President, I wish to announce that the Select Committee on Small Business has scheduled a hearing on the capital formation problems of small- and medium-sized independent enterprises on May 15, 1978.

The hearing, to be chaired by Senator WEICKER, will commence at 9:30 a.m. at the American Stock Exchange, 86 Trinity Place, New York, N.Y.

Further information can be obtained from the committee offices, room 424D, Russell Senate Office Building, Washington, D.C. 20510, telephone (202) 224–8497.●

SUBCOMMITTEE ON ALCOHOLISM AND DRUG ABUSE

● Mr. HATHAWAY. Mr. President, I wish to announce that the Subcommittee on Alcoholism and Drug Abuse will hold a hearing on Friday, March 24, 1978, at 9 a.m. in the auditorium of the Eastern Maine Medical Center, Bangor, Maine. The purpose of the hearing is to examine the alcohol and drug abuse problems of youth, women, and other underserved groups and to consider alternative community responses. For further information regarding the hearings, please contact the subcommittee office at 224–8386.●

SUBCOMMITTEE ON PUBLIC LANDS AND RESOURCES

● Mr. BUMPERS. Mr. President, on Tuesday, April 11, the Subcommittee on Public Lands and Resources of the Committee on Energy and Natural Resources will hold a hearing on S. 74, a bill to amend the act of October 20, 1976 (Public Law 94–565) to include payments for lands on which certain semiactive or inactive military installations are located.

The hearing will be held in room 3110, Dirksen Senate Office Building and will begin at 10 a.m.

Anyone who wishes to testify at the hearing or who has questions concerning the hearing should contact Steven P. Quarles, counsel to the subcommittee at (202) 224–3349.

Anyone wishing to submit written statements for the hearing record should send them to the Subcommittee on Public Lands and Resources, room A–420 Senate Annex, Washington, D.C. 20510.●

ADDITIONAL STATEMENTS

DRUG TRAFFICKING: THE FRENCH CONNECTION—IS IT BACK IN OPERATION?

● Mr. PERCY. Mr. President, Andrew Borowiec for the Chicago Daily News recently reported the discovery of what appears to be a reemergence of the notorious "French connection."

In a recent drug raid, French police confiscated 40 kilograms, 88 pounds, of pure heroin that would fetch $200,000 a kilogram 2.2 pounds, at street prices. The processing lab was detecting at La Ciotat near Marseilles and the heroin was intended for shipment to the United States. There is speculation that this French lab represents an effort to revive the old Marseilles heroin distribution route because of recent crackdowns on Turkish and Chinese connections.

French and American narcotics officers virtually sealed tight the "French connection" in 1972–73. As a result, the Chinese connection grew by leaps and bounds. Heroin, produced in Laos, Burma, and Thailand, was shipped to Amsterdam and distributed from there. After Dutch police completed several successful raids last year, heroin distribution shifted to the "Turkish connection."

Opium growing is a centuries-old tradition in Turkey. However, in response to U.S. Government pressures, Turkey banned the production of opium in 1973. In 1975, due to massive opposition from opium farmers, the Turkish Government lifted the U.S.-induced ban on opium production. Since that time, there has been an increase in heroin going to Europe and the United States from Turkey, Lebanon, and Iran, notwithstanding death penalties for drug-peddling and processing in Iran. Most of the transhipment of Turkish heroin to the United States and throughout Europe originates in West Germany, now perhaps the major drug distribution center of Europe.

Recently, West German police began attacking the "Turkish connection" with limited success. In 1977, more than 500 young German addicts died of drug overdoses. These deaths, and huge amounts of heroin moving through West Germany, have alarmed authorities and have precipitated an immense campaign to wipe out the "Turkish connection."

These crackdowns may drive underworld drug traffickers back to the former Marseilles route. The recent drug seizure at La Ciotat indicates that the "French connection" already may be on the rise.

Mr. President, I ask unanimous consent that Andrew Borowiec's highly informative article, "France Fears Rerun of French Connection," be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Chicago Daily News, Feb. 18–19, 1978]

FRANCE FEARS RERUN OF "FRENCH CONNECTION"

(Andrew Borowiec)

PARIS.—The scene would delight screen writers: A neat, white-walled villa near the blue expanse of the Mediterranean is suddenly invaded by French police. Whistles shrill and guns are brandished.

The catch is on a Hollywood scale, too: 40 kilograms (88 pounds) of pure white heroin, of the quality Marseilles "specialists" are proud of. Known among profes-

sionals as "H 4," it fetches on the European market $200,000 a kilogram (2.2 pounds).

But the heroin discovered earlier this month in the clandestine lab at La Ciotat near Marseilles was not meant for local resale. The seven persons arrested in connection with the raid apparently confessed to police that the shipment was destined for the United States.

The announcement caused consternation in France. Is the infamous "French connection" back in operation? giant headlines asked.

Bombarded by reporters' questions, French narcotics police had no immediate answer. The lab at La Ciotat could have been an isolated effort to start the traffic again after American and French narcotics agents virtually killed the "connection" in 1972–73.

However, it could also represent a new concerted effort by the Marseilles underworld "financiers" and local "chemists" to again seize control of the profitable racket from the hands of expatriate Chinese and Middle Eastern operators.

According to Paris-based INTERPOL, the "French connection" has been replaced by two new ones: the "Chinese connection" and the more recent "Turkish connection."

The "Chinese connection" is masterminded by "exporters" in the so-called "Golden Triangle" of opium-growing countries: Laos, Burma and Thailand. The heroin refined in Thailand and Malaysia was transported by couriers mainly to the Dutch port of Amsterdam. There, a crime brotherhood thriving among the 30,000-strong Chinese expatriate colony would take over further shipments.

TRAFFIC PROLIFERATED

Until the Dutch police began a series of sweeping and successful raids last year, the traffic grew by leaps and bounds. The seizures illustrate its extent: In 1973 only 28 kilograms of heroin were seized, but in 1976 the haul was 644 kilograms.

The "Chinese connection" fell on hard times in 1977 with the expulsion of 900 smugglers from Amsterdam.

And that's when the "Turkish connection" moved in, backed by big money from such countries as Lebanon, Iran and Turkey itself and using opium grown mainly in Turkey.

The growing of opium is a centuries-sanctioned tradition in the Turkish region of Anatolia. The government condoned opium farming, ostensibly for use by medicine manufacturers. But tons of opium gum were put aside, transformed into morphine base and eventually shipped to Europe and the United States.

Because of U.S. government pressures, Turkey discontinued opium growing in 1973. Massive opposition by opium farmers and traditionalist agricultural lobbyists eventually forced the Turkish government to lift the ban in 1975. Officially, there are controls and quotas. In practice, they mean little. There is no drug problem in Turkey itself.

The apparent dismantling of the "French connection" with its clandestine laboratories in the early 1970s prompted Turkish exporters to look for "chemists" elsewhere. Turkish specialists can only transform opium gum into morphine base. They have no know-how as far as heroin is concerned.

Such know-how as eventually was found in Iran, despite the fact that the regime of Shah Mohammed Reza Pahlavi punishes any drug peddler or "chemist" by death before a firing squad.

In the past year or so, European distributors were receiving large shipments of processed heroin via the "Turkish connection." While West Germany has become the main receiving area because of the large number of Turkish laborers living there, Amsterdam, Rotterdam and other North Sea ports are being used for shipment to the United States.

During 1977, West German police began attacking the "Turkish connection." The results, so far, have been limited: Only 50 kilograms of heroin have been seized on Turkish laborers.

The birth of the "Turkish connection" has made West Germany into the major drug distribution center in Europe. But a lot of heroin remains in West Germany, causing increasing concern for the authorities. In 1977, more than 500 young German addicts died of drug overdoses.

The dramatic increase in heroin-caused deaths has, understandably, alarmed the West German authorities. There are indications that a massive campaign to wipe out the "Turkish connection" is being prepared.

Consequently, the possibility that those who mastermind the drug traffic are thinking again in terms of the old Marseilles route has not been rejected. The discovery at La Ciotat could be the beginning of a new round in the war against the "French connection."●

SENATOR GLENN'S DALLAS SPEECH PUBLISHED AS PART OF MAJOR NEW BOOK ON MAGNET SCHOOLS

● Mr. KENNEDY. Mr. President, in the Spring of 1976, I joined Senators Hubert Humphrey and GARY HART as cosponsors of Senator JOHN GLENN's bill, the School Integration Innovation Act. That bill provided the first specific legal authority for Federal assistance in the form of emergency school aid money for the purpose of establishing and operating magnet schools. I joined Senator GLENN as he led the fight that ultimately resulted in the enactment into law of his bill as part of the Education Amendments of 1976. Thanks to the very able assistance of my colleague from Massachusetts, Senator BROOKE, and Senator MAGNUSON, funding was obtained for fiscal year 1977 and 1978.

Today, we see magnets functioning across the country in communities undertaking desegregation. Many of them are being funded with some assistance from ESAA, thanks to Senator GLENN's legislative initiative. In Boston, roughly one-fourth of the district's students are enrolled in magnet schools.

This is an exciting new development in education and much of the expertise and thought surrounding it appears in a new book "Magnet Schools: Legal and Practical Implications" edited by Nolan Estes and Donald R. Waldrip. Included in it is an excellent speech delivered by Senator GLENN at the First Annual International Conference on Magnet Schools held last March in Dallas, Tex. Senator GLENN's speech is a thoughtful and incisive treatment of the legislative process as it operates in this most difficult of subject areas. Incidentally, I noticed that Senator GLENN, in his speech, mentions his very able legislative assistant in this area, Reginald Gilliam. Prior to joining Senator GLENN in 1975, Mr. Gilliam was an outstanding young administrator and professor of political science at Williams College in Williamstown, Mass. Williams, under the leadership of President John W. Chandler, has obviously continued its long tradition of contributing many of its great faculty and student talents to the national policy arena.

I urge my colleagues to read Senator GLENN's speech and I ask unanimous consent that it be printed in the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

LEGISLATIVE IMPLICATIONS OF MAGNET SCHOOLS

(By Senator JOHN GLENN)

INTRODUCTION

(Senator John Glenn of Ohio is committed to the concept of Magnet Schools. In the following paper, he explains in some detail the work he has done in Washington, D.C. that has led to the financing of that commitment. Since Senator Glenn's presentation to the conference in Dallas, his congressional bill, the School Innovation Integration Act, enacted the fall of 1976 as P.L. 94–482, has been funded for the Fiscal Year 1977 and 1978.)

When one addresses the subject of Magnet Schools in our society—schools that draw from a broad population, and which attempt to remedy an enormous range of educational, social, familial, and governmental ills—one is addressing, basically, the subject of the incredible interrelatedness of our society. Changing one element here has an effect there—perhaps in an unexpected way. Even in more conservative terms, keeping the *status quo* in one area causes repercussions in another. Our personal lives and the lives of our institutions are so interwoven, in fact, that it is virtually impossible to make a change in one part without affecting the whole. Yet none of us is big enough, bright enough, strong, powerful, or brave enough to tackle the whole with all its ramifiactions. So we work a little at a time, making small improvements here, and putting out fires on the other end that may result.

Given all the diverse elements in our country, we have developed such a complex, interrelated society that we exist in a kind of modern-day, colonial village where each part pulls its own weight, operating for the good of itself as well as for the good of the whole. If one part breaks down, the other parts suffer. In the old colonial village, there was the cobbler down the street here, the buggy-maker over there, while the vegetables were grown behind the house in yet another place. Consequently, one needed very little from outside that colonial village. But, today, that village concept has expanded so greatly that the garden is in central California, the buggy-maker is in Detroit, and the cobbler probably is not even in this country; he is probably in Italy or another remote place; for today we import about fifty percent of our shoes.

Our expanded interrelationships can be epitomized by the events of a few years ago, in which the drawbridge operators in New York went on strike. Since there were only about 800 drawbridge operators in New York, everyone thought, so what? It's a joke! Who cares if a few guys want to go on strike? It was a joke—that is, until a few days after the strike was in effect. Then the people on Wall Street were not getting to work; they were running a reduced ship, and, to make a long story short, the entire economic system of our country and of much of the free world was beginning to grind slowly to a halt, simply because of that strike. The 800 drawbridge operators of New York bringing the economic free world to its knees? How much more interrelated can we get?

Similarly, when we talk about Magnet Schools today—seemingly a minute area of our society to focus upon—we are talking about that modern-day colonial village. You all know this just as well, or probably better, than I do. When I look at the very challenging program you have laid out for the next few days of this symposium, I feel a bit like

a kid from the farm club during spring training trying to teach big leaguers how to bat. You have been working out in the field on these problems, and I have done a little bit in Washington, but I still think you are far more familiar with many of the details and problems than I. Even the laymen in our urban centers have some appreciation of the significance of Magnet Schools and a basic knowledge of how they function.

I would like to take a few minutes here to discuss my bit of business in Washington that has, I think, complemented your field work in this area. I am referring to the School Integration Innovation Act, and the legislation I introduced in the 94th Congress which stands today as the only federal law that authorizes U.S. money for Magnet Schools—in cases where the schools become part of a desegregation plan.

First, here are some of the underlying assumptions and attitudes that went into my drafting of No. S-3319, as the bill was numbered. The goal, as I saw it from the beginning, was to provide schools with superior education—education so attractive to all racial groups that integration would occur naturally, rather than as a result of a governmental requirement. Although I think that some federal judges have moved almost instinctively toward mandatory transportation, I did not offer the bill as a means of short-circuiting court-ordered busing. There are, I believe, some intransigent school systems left in our country which, unfortunately, will not budge from thoroughly segregatory patterns that should have been corrected years ago. I have felt all along that, if the courts as a last resort need busing as a tool—although we hope not the *only* tool—then we will just have to keep this remedy available.

But there should be other options, a variety of different methods available. And to this end I have made efforts to help provide for and to encourage other options and remedies. Having said that, I must say, too, that I still believe the turmoil surrounding this emotional issue has been negative and counter-productive, playing in disheartening fashion upon the legitimate and very understandable concerns of parents.

I introduced the School Integration Act last April, almost a year ago. At the same time a companion bill in the House was sponsored by two other Ohioans, John Seiberling from Akron, and Charles Whalen of Dayton, one a Democrat and one a Republican; so we had bipartisan support. One of the principal architects of this bill, a man present with me today, was Reg Gilliam, from my staff. Reg is an educator, a former professor and dean at Williams College. He is also an attorney and is from the Harlem area of New York City. He is an outstanding expert on the subject we are addressing.

When we began work on this bill, we thought we needed about one billion dollars to start the program. So, in the bill, we called for an expenditure of one billion dollars a year for the *Emergency School Aid Act* with newly authorized activities that would include:

1. Construction and operation of Magnet Schools. (Now, obviously, when we put the word "construction" in there, the cost went up. We did not get the construction money, and so the cost was scaled down considerably. However, originally that was our number one objective.)

2. Pairing specific schools and programs with specific colleges, universities, and leading businesses in the cities.

3. Development of plans for construction of neutral site schools.

4. Construction and development of education parks.

5. Education programs, specifically designed to improve the quality of inner-city schools.

The bill was carefully designed and drawn. I drew on the expertise of Reg Gilliam since, as I indicated, he is not only an attorney but a professor of political science as well. We also consulted other educators and educational systems throughout the country about the merits of the bill, and I imagine that some of you here today were contacted while we were getting the bill ready. We drew a great amount of support throughout the country and, if you want further information about that, I would refer you to our hearing record of August 5, 1976.

In the House, on HR-14365, you will find statements of support, as well as critical comments on our bill. There was not, of course, unanimous support for the bill. But the intent of the bill was very clear. We wanted to provide direct federal funding so the localities involved in school desegregation disputes would be able to design a full range of remedies for problems encountered in school desegregation. Our hope was that, by increasing available remedies, and by having these additional remedies stress educational methods significantly improving educational quality, we might encourage increased voluntary integration, while reducing mandatory transportation as a means to accomplish desegregation.

Of course, we realize, and we clearly stated this, that our bill in no sense sought to reduce legal authority to correct a constitutional wrong, by whatever means. In fact, our bill was designed to work independently, or in conjunction with transportation orders, as well as to encourage a combination and variety of desegregation methods. In short, we envisioned the bill as a mechanism to fund a full range of programs to help accomplish desegregation, whether court-ordered or not.

Here is a brief description of the features of our bill—features that are novel, positive, and constitutionally sound ways of attacking a problem that has its real roots in segregated housing patterns, job discrimination, unemployment, and other elements beneath the tip of the iceberg we call "school desegregation." (Recall, in this connection the interrelatedness of our modern colonial village . . .) It is in this context that I cite our original proposal to provide funding to encourage parks and neutral site schools. We thought that, by encouraging building or developing convenient, centrally located schools, or cluster schools, we might then establish more long-term and effective methods of education designed to attract students from different racial backgrounds.

While what finally passed Congress did allow for neutrally-situated schools, it is indeed unfortunate that poorly-articulated fears of so-called "metropolitan area solutions" resulted in the striking out of a clause encouraging more educational parks in traditional feeder patterns in convenient locations. We had better luck in winning authorization for the development of, and operation of, Magnet Schools—schools established on a city-wide basis or within a zone that had specialized educational offerings; that, when well-administered, would prove capable of attracting integrated student bodies—schools like the William Monroe Trotter School in the heart of black Roxbury of the Boston area. Waiting lists last year included 235 white students wanting to get into the school.

Whitney Young Magnet School in Chicago opened in 1975, specializing in science, medical arts, and performing arts—three options at one location—and expected to enroll about 2,000 students. In a meeting a couple of days ago with Jesse Jackson, in which we spoke of a whole range of educational options, Jesse spoke happily of the fact that his own daughter had just been accepted into Whitney Young Magnet High School. I might mention that in Chicago the Magnet School concept is beginning to get a great reputation.

Still another example is Houston Technical Institute, which functions as a special purpose high school, drawing students from throughout the city. St. Louis and Boston businesses and institutions of higher education have likewise been deeply involved in carrying out several cooperative magnet programs with local Magnet Schools. As for Cincinnati magnet programs, they have drawn 1,076 students back from private schools. These programs are working!

Dan Levine and Connie Moore of the University of Missouri are in the process of completing a major work in an attempt to determine whether the use of Magnet Schools and magnet programs are indeed as promising and educationally sound as they appear to be. Levine and Moore have identified four prime goals in urban education that Magnets might yet achieve, and which I would like to present to this conference for consideration:

1. Maintaining and improving racial balance in the public schools.

2. Maintaining and improving social and economic balance in the public schools.

3. Improving the opportunity structure for inner-city schools.

4. Contributing to the long-range development of the central city and metropolitan area, particularly through renewal of the inner city and stabilization of integration within communities.

I believe that Magnets can help accomplish these four goals, *if* they are well-administered, and *if* they avoid some of the following pitfalls:

1. Do they merely represent new labels for old programs?

2. Do they draw only the brightest students and best teachers, leaving the remainder of the school system under-resourced? Or are they really a part of a balanced, over-all plan to enrich the entire school system?

3. Are there too many Magnets in a given area, thus diluting the effectiveness of Magnets as schools that draw racially diverse students in significant numbers?

4. Are the Magnets sufficiently tailored and planned so as to be complementary to the neighborhood schools, as well as to the plans of the city as a whole?

We succeeded in winning seventy-five million dollars' authorization over two years in start-up money for this proposal. However, along the way, because of the tortured climate in which we operate in this area, none of the educational issues and questions was addressed. We were told at various stages that there should be no federal involvement in construction; that our bill was a sheep that would be gobbled up by the vocal anti-busing wolves; that our money figure, whether one billion or seventy-five million, was only a drop in the bucket. Yet all of this, all of this emotional turmoil when there are, according to Professor William Taylor of Catholic University Law School, only about 130 school districts in the entire nation involved in school desegregation proceedings! I think it is very reasonable to assume that we can target aid to these areas and that this aid can make a difference. I truly believe we can make a start in doing things that should have been done many, many years ago; things that, if they had been done, would have reduced some of the necessity for many of the court-ordered busing decrees we have today.

One of the most disturbing things I found when we got into this whole thing was that HEW, according to its staff, lacked authority to use its planning money, or in fact any of its money for many of the activities authorized by S.3319. So before anyone ridicules the seventy-five million that finally was author-

ized over a two-year period as being inadequate for the task, let me say this: I think that, even if we had no actual authorization or appropriation money for this bill, we should still find it worthwhile in that it does provide clear legal authority to HEW to use some of its other planning funds for looking into the viability and the feasibility of Magnet Schools across the country. So the bill has had that great benefit, quite apart from the direct authorization of dollars that we provided for in the bill itself.

We had difficulty getting through just in terms of discussing problems. I was not on any of the committees directly involved with the bill. I did have good co-sponsors on the bill, people who shared my views. Some of these were Senators Hubert Humphrey of Minnesota, Gary Hart of Colorado, Ted Kennedy of Massachusetts. We did have clout, and used it the best we could. The billion dollar figure scared a lot of people, and I'll tell you, when you get before the Congress these laws and you combine the word "billion" with the word "integration," you've got problems! So we didn't get all we would have liked.

We have published a number of articles in the Congressional Record—articles that include testimony from some of you people here today—because it is important to get this information to all parts of the country. We have attempted to make a balanced entry, so some of these articles include views both pro and con on Magnet Schools, neutral sites, and educational parks. I think it very important that Magnet Schools not get lost and go unrecognized. In that spirit, I would like to pay tribute to some of our people in Ohio: to Dr. Waldrip, for one, for the noteworthy work he has done in Cincinnati with alternatives and Magnets. And to Dr. Paul Briggs in Cleveland, who has also done excellent work in this field.

My primary goal is quality education for our nation's young people; and, in that context, Magnet Schools constitute a very long stride on a very long avenue in the right direction. I am aware, too, that some communities in earlier years used Magnets for reasons not limited to integration, but for the educational excellence they provide. This excellence they can continue to offer, quite apart from the issue of integration. And now, in our time, they can also provide a very much needed alternative to mandatory transportation, which so upsets some people in our society.

The great advantage of Magnet Schools today is that they enable many Americans to voluntarily achieve the goal of integrated, quality education on a hitherto unprecedented scale. That is why I have involved myself in this issue after only a little more than two years in Washington. I consider the enactment of the School Integration Innovation Act a matter of real pride and importance, and a vehicle by which we can all travel toward the great goals we have set for ourselves and for American education.●

TOP AMERICAN BANKER ON CLOSER IMF-COMMERCIAL BANK COOPERATION

● Mr. JAVITS. Mr. President, on numerous occasions—most recently in my floor speech of February 8 on the world economy—I have sought to bring to the attention of the American people the serious consequences for the international monetary system of the continued dependence of the nonoil exporting countries on external borrowing to meet their balance of payments needs. Close to 75 percent of this borrowing since the dramatic oil price increases of 1973–74 has come from the commercial banking system.

To begin to meet this problem, I have urged the commercial banks and the IMF to overcome their individual reluctance to work more closely with one another. I believe that it is essential that some form of institutionally sanctioned cooperation be developed between the private and official elements of the international monetary system to help insure that mistakes—due to misinformation and misperceptions—do not lead to the inadvertent unraveling of the international monetary system. That system is as far as possible in harmony.

Gabriel Hauge, chairman of the board of Manufacturers Hanover Trust Co., has made an important and objective contribution to the discussion of the issue in a recent article that appeared in the international financial journal, Euromoney. Mr. Hauge presents cogent proposals for bringing the banks and the IMF together. His proposals represent a positive response on the part of the commercial banks and merit close and serious analysis by all concerned.

Mr. President, I commend this article to my colleagues as an important first step in the dialog and request unanimous consent that the following article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

HOW THE BANKS SHOULD WORK WITH THE FUND

(By Gabriel Hauge)

At the Tokyo meeting of the International Monetary Conference last May, I canvassed a spectrum of possible forms of collaboration between the International Monetary Fund and commercial banks as they related to financing balance of payments deficits.

Behind this concern is the stubborn fact that the gross imbalances in the international monetary system, whose proximate cause was the oil price increase of 1973–74, are not going to fade away any time soon. The redistribution of payments surpluses and deficits has involved the intermediation of the commercial banking system increasingly in the last several years to a point where the banks now hold some 55 percent of the estimated external debt of the less developed countries. Concern is more frequently expressed these days that private institutions will not be able to continue this major role in the future. Jelle Zijlstra, in his chairman's address to the annual meeting of the Bank for International Settlements this year, commented that, though commercial banks had been successful in their intermediary role, "things cannot go on quite in the same way as before".

Closer cooperation between the Fund and commercial banks may hold promise and should be examined. The IMF has access to extensive information directly germane to creditworthiness, as well as a unique capability to encourage national monetary and economic policies in constructive directions. The use of this power of conditionality has had considerable effect in improving the creditworthiness of borrowers in the eyes of commercial bankers. At the same time, it cannot be assumed that the resources of the IMF alone will be adequate to the task in spite of a history of replenishments and the funding of special facilities by member governments.

The banks and the Fund have already collaborated in certain situations as, for example, the recent restructuring of the external debt of Zaire. In 1970 a commercial bank loan to the Philippines was arranged simultaneously with negotiations by that country with the Fund for access to a third credit tranche. An economic stabilization programme was a condition of that drawing and the bank loan was made contingent upon adherence to the IMF programme. Failure to do so would have constituted an event of default under the commercial bank agreement. At the time this loan was negotiated, there were discussions between the bank and the Fund to assure a coordinated approach to the Philippine financing.

The current discussion of strengthened Fund-bank cooperation has generally focused on two matters: exchange of information and forms of co-financing.

The consultative role which the IMF plays vis-a-vis its members gives it special access not only to the latest statistical information, but to analytical and projective data as well.

Quite rightly, the Fund fears that its release of some of this information would jeopardize the forthrightness with which it would be given. At the same time the lack of comprehensive information complicates the decisionmaking process for commercial banks generally.

In the absence of reliable data, the degree of risk in lending is hard to assess. To the dismay of some bankers, others appear not to have been discouraged from offering large credit facilities by the absence of such facts. What seems to be even more foolhardy is the making of such loans without adequate covenants, conditions or rates.

LACK OF INFORMATION

Rene Larre, of the Bank for International Settlements, has pointed out the additional risk involved in country lending, due to the scarcity or even the lack of information on the total volume of indebtedness of many countries. He concludes that today's precarious world monetary order calls for closer cooperation among international organizations, such as the IMF, particularly in the area of exchange of information on indebtedness. If the Fund could make available the latest information on a country's external debt, its structure and maturities, he agreed this would go a long way to meeting the needs of commercial banks. The inquiry now under way by Mr. Larre's BIS, through the central banks of the Group of Ten countries, to obtain data on the total amounts, maturity profile and guarantee status of bank credits to countries other than those participating in the study is a pioneer effort in this direction.

As far as the IMF goes, the crux of the matter lies in finding a way in which the confidentiality of its reports could be maintained and yet useful information from them could be made available to potential lenders. There are, I believe, ways in which this could be done. Some were touched upon by U.S. Treasury Secretary Michael Blumenthal in his address to the IMC meeting in Tokyo. Recognizing the IMF's need for confidentiality in its relations with members and its reluctance to becoming a credit rating agency, Mr. Blumenthal, without endorsing any particular approach, suggested:

Providing staff reports and country assessments to prospective lenders on the basis of formal requests by the countries in question;

Publishing reports based upon its annual consultations with countries, again subject to approval of the countries in question;

Making available its reviews to help design stabilization programmes if requested by both prospective borrowers and lenders.

Let me suggest some possible lines for discussion. The IMF could, for example, design a report format which eliminated confidential information. To protect itself, the Fund could describe the provenance of the report and the conditions surrounding its preparation. Or perhaps another international body, such as the BIS, in conjunction with the IMF, might design a standard report form which it would recommend for use by commercial banks and individual countries. This report would be submitted to the banks and the IMF by the prospective borrower as a part of loan negotiations. Its distribution among commercial banks and the IMF would assure that the information would be considered "standard" by all potential lenders.

COFINANCING

Co-financing of loans, whether as joint loans or in some form of parallel lending, has also been raised as a potential field for cooperation between the IMF and commercial banks. The total external debt of non-oil LDCs to banks, official institutions and governments was probably close to $180 billion at the end of 1976. The aggregate current account deficit of the same countries is expected to continue at a level exceeding $25 billion per year to 1980. Including debt service, current financing requirements of non-OPEC countries exceed $50 billion annually and will continue to do so over the next few years. It is clear from these figures that both the resources of the IMF, regularly supplemented, and those of commercial banks will be needed.

One option, of course, is for commercial banks to select only those risks with which they feel comfortable under existing conditions. In this case, the IMF would presumably have to expand its resources to fill the gap. That this solution is far from simple is evident from the protracted nature of recent efforts to establish the so-called Witteveen Facility. The original amount requested was not specified, but it was widely reported to have been in excess of $14 billion. After months of negotiation with potential donors, including the OPEC countries, $10 billion was the sum pledged. Secretary Blumenthal has made the point that, "Legislatures are not prepared to vote the massive amounts of official funds, or guarantees, required for basic shift from reliance on private financing to reliance on official financing." Thus, a substantial continuing role for commercial banks would seem to be necessary if a stable international monetary order is to be sustained. Since the oil price increase, the IMF has financed only about 7% of the aggregate payments deficits.

In speaking of the IMF's power of conditionally, Arthur Burns has noted that, "One reason why countries often are unwilling to submit to conditions imposed by the IMF is that the amount of credit available to them through the Fund's regular channels is in many instances small relative to their structural payments imbalance. That will be so even after the scheduled increase in IMF quotas becomes effective."

Critics of closer cooperation between commercial banks and the Fund are concerned that 1) parallel financing schemes could lead to a credit allocation system in which the banks might be encouraged to lend only to an approved list of countries and, 2) some less developed countries fear that the IMF might become subservient to the banks. Such potential loss of independence, in this view, could lead the IMF to impose more demanding conditions on borrowing countries in order to enlist the participation of commercial banks.

Neither of these fears appears to me to be well grounded. None of the reasonable proposals put forward for improved cooperation suggests that either the IMF or commercial banks surrender traditional and necessary independence of action. What is being suggested is that there will be occasions when it is in the interest of all parties concerned to work together.

LEGAL PROBLEM

The charge has also been heard that some IMF lending in the past has been for the purpose of bailing out commercial banks which might have become overextended. If this were true, it would seem to imply that a close working relationship, indeed a form of collusion, already exists between the banks and the IMF. I have seen no evidence of this kind of abuse. The reverse is true. Commercial banks tend to feel more at ease with their country credits after the IMF has stepped in and, through its consultations, helped establish a viable adjustment programme. It would be unfortunate, indeed, if assistance to member countries from the Fund is shipwrecked on the rock of the bail-out allegation.

A legal problem relating to joint or parallel financing of loans has been the existence of clauses in IMF-country agreements which are confidential between the two parties. Commercial banks would, of course, find it impossible to be a party to a loan if all of the terms and conditions were not known. It would seem, however, that if a form of parallel financing were utilized with cross-default clauses this difficulty could be eliminated. Default under the commercial bank agreement, the terms of which would be known and accepted by the IMF, would result in default under the IMF agreement. Commercial banks would only be concerned about the contents of the IMF loan agreement in the unlikely event that the Fund declares the borrowing country in default under its agreement, in which case the country would be in general default. By the use of parallel but separate loan agreements co-ordinated through cross-default clauses, both the IMF and the commercial banks would be protected by the "conditionality" requirements of the IMF, which, in turn, would benefit from effective access to additional resources to meet its goals.

Mr. Larre has suggested an alternative to co-financing. If surplus international liquidity and its effect on inflation is a cause for concern, as it must be, the possibility should be considered of absorbing some of this excess liquidity through the Fund's tapping commercial banks for at least a part of its needs. Borrowing in private markets is permitted, I believe, under the Fund's Articles of Agreement.

There are other problems that would require attention in further Fund-bank collaboration. For example, a legal question arises from the fact that IMF lending is denominated in SDR's. Would this, in the case of co-financing with U.S. banks, run contrary to U.S. law related to maintenance of value" clauses? Again, if parallel financing were the vehicle, commercial bank loans could be denominated in the national currency of the lending bank (or another currency) and the IMF loan could be denominated in SDRs.

A further form of collaboration which might be explored would permit commercial banks to make certain loans, perhaps a portion of an IMF loan, under a Fund guarantee. This approach would allow both the banks and the IMF to retain freedom of action with respect to the conditions attaching to a particular loan situation. In addition to expanding available resources, his option might quiet criticism directed at both the banks and the IMF that some LDCs are effectively excluded from access to financial markets.

The demand for funds to finance balance of payments deficits will continue to grow. The role of commercial banks in the financing will remain substantial, even with Fund resources expanding. We must, therefore, explore new methods by which the financial resources of commercial banks can be prudently utilized. While the International Monetary Fund remains the keystone of the system, growing cooperation between the IMF, and the commercial banking system is an indispensable element of the future's financial arrangements.●

THE UNIVERSITY OF MINNESOTA AND THE NCAA

● Mr. ANDERSON. Mr. President, on Monday, March 13, 1978, the Subcommittee on Oversight and Investigations of the House Committee on Interstate and Foreign Commerce held a hearing on the penalties assessed by the National Collegiate Athletic Association (NCAA) in 1976 and 1977 on the men's intercollegiate athletic program of the University of Minnesota in the Twin Cities.

The House subcommittee, chaired by Representative JOHN E. Moss, has been holding hearings on the policies and practices of the NCAA's enforcement programs against member schools. The House investigation was prompted by a request to the Subcommittee on Oversight and Investigation by 69 Congressmen on September 15, 1977.

At the hearing on March 13, along with Congressman BRUCE VENTO who has been extremely deligent in bringing to the committee's attention the University of Minnesota case, I had the honor to introduce to the subcommitte the following administrators and present and former student-athletes from the Universiy of Minnesota: Dr. C. Peter Magrath, president; Dr. Stanley Kegler, vice president; Mr. Paul Giel, men's athletic director; Mr. Mychal Thompson, student-athlete; Mr. David Winey, student-athlete; Mr. Phillip Saunders, former student-athlete; Mr. Reed Larson, former student-athlete; Mr. Ronald L. Simon, attorney representing Mr. Larson.

Mr. President, on July 21, 1975, when the University of Minnesota was officially informed by the NCAA that its basketball program was under investigation, a period of anguish, frustration, and doubt began for the administration, athletic department, coaches, and students of the University of Minnesota, and for the citizens of Minnesota, that ended only this month when the university's basketball program suspension ended. The story of the university's dealing with the NCAA was told in great detail to the House subcommittee on March 13.

Mr. President, when my colleagues review the testimony I intend to introduce in the RECORD from the Minnesota hearing, I believe they will agree that the NCAA's conduct in the Minnesota case, particularly from 1976 forward, has been arbitrary, vindictive, and contemptuous of due process of law.

I have been associated with the University of Minnessota for 30 years. I attended the university, both as an undergraduate and a law school student, for 8 years. In addition, I was a member of the U.S. Winter Olympics hockey team in 1956 from the University of Minnesota. As a State legislator, I served on the appropriations committee for 6 years and dealt with the university's budget for many years. And, the budget and operations of the University of Minnesota was a key issue for me during my 6 years as Governor of Minnesota.

The investigation and penalization of the University of Minnesota's athletic program by the NCAA, particularly its impact on student-athletes, Thompson, Winey, and Saunders, is a sad and discouraging tale. While it is too lengthy for proper review at this time, it is covered in detail in the testimony of the Minnesota witnesses. But I do want my colleagues to know that I find it simply incredible that the University of Minnesota has been penalized as it has by the NCAA.

Mr. President, the careers of three college basketball players have been affected by the actions of the NCAA against the University of Minnesota. One of these players, Mychal Thompson, is everybody's All-American, broke the Big Ten scoring record, and is likely to be a first round draft choice in the pro basketball draft this year, and could have signed a professional contract last year worth millions of dollars to him. Mr. Thompson and two other athletes, David Winey and Phillip "Flip" Saunders, were declared ineligible for violations of NCAA rules.

To summarize, Messrs. Thompson, Winey, and Saunders were cited for, respectively, selling basketball season tickets for greater than face value; spending Christmas weekend and another weekend with a university graduate and basketball program supporter; using a WATS line for telephone calls where both personal and basketball issues were discussed, borrowing a car to travel to a summer basketball camp, and spending overnight gratis at the camp. For these violations, these basketball players were, in effect, ordered to be suspended by the NCAA, and the entire athletic program put on probation. The NCAA's rationale for these penalties was detailed to the House Subcommittee on Oversight and Investigations at the Minnesota hearing.

Mr. President, the NCAA and University of Minnesota dispute is all but complete, unless the NCAA chooses to allege further infractions against the University of Minnesota, for whatever the motivation. The university's athletic program suspension is over, the affected basketball players have all completed their careers as Golden Gopher basketball players, and the final legal action of the university against the NCAA has ended. But the frustration and anxiety that the university and these players suffered has not and will not.

As one Member of the Senate, I am prepared to act upon the recommendations that the House Interstate and Foreign Commerce Committee makes on the policies and practices of the NCAA, and am hopeful that the Senate Commerce, Science, and Transportation Committee will be interested in the results of the House investigation.

Mr. President, I ask unanimous consent that the opening statements of Representative JOHN E. MOSS and University of Minnesota President C. Peter Magrath and Vice President Stanley Kegler at the Subcommittee on Oversight and Investigations hearing on the NCAA on March 13, 1978, be printed in the RECORD.

There being no objection, the statements were ordered to be printed in the RECORD, as follows:

OPENING STATEMENT OF HON. JOHN E. MOSS, MARCH 13, 1978

We continue this morning with our inquiry into the enforcement procedures and practices of the National Collegiate Athletic Association.

We started two weeks ago with serious charges of procedural deficiencies resulting in manifest unfairness to institutions and individuals. I note in the press that the hard skepticism with which some observers at first viewed those charges, has been softening remarkably as the days go by.

In our second day of hearings a fortnight ago we heard from no less than ten witnesses—coaches, athletes, alumni and distinguished university administrators—who expressed surprise and disappointment over the unfairness of the NCAA enforcement system when once they encountered it; bewilderment and frustration over their inability to effectively deal with it; and, for some of them, bitterness over the sheer harshness of the system.

It was not lost on us either that some of those witnesses were extremely reluctant to testify before this Subcommittee for fear of offending the NCAA. It is becoming increasingly apparent that trouble with the NCAA is trouble indeed, and that no one encounters it confidently.

Today we hear from representatives of another of this country's great institutions of higher learning, the University of Minnesota. We welcome the university's president, Dr. Peter Magrath and its vice president Dr. Stanley Kegler, both of whom have statements. Joining President Magrath and Vice President Kegler at the witness table will be Minnesota's athletic director, Paul Giel, two present student athletes, Mychal Thompson and David Winey, and a former student athlete at Minnesota, Phillip Saunders, presently basketball coach at Golden Valley Lutheran College in Minneapolis. A little later today we will hear from another former student athlete, Reed Larson, who continues his athletic career as a professional hockey player with the Detroit Red Wings. Testifying with Mr. Larson will be Ronald L. Simon, Esquire, an attorney from Minneapolis.

STATEMENT BY PRESIDENT C. PETER MAGRATH

Mr. Chairman and members of the Subcommittee, my colleagues and I appreciate the opportunity to appear before you this morning and to share with you some of our thoughts and experiences regarding the National Collegiate Athletic Association (NCAA) and, in particular, the University of Minnesota's much-publicized struggle with that organization. In my opinion, your decision to conduct these investigative hearings is both appropriate and timely. It would be all too easy for Congress to conclude that there are more pressing issues that demand attention, or that this subcommittee should ignore the sensitive field of inquiry which you have undertaken. In fact, that is precisely what some critics have argued ever since those hearings were first announced. However, I disagree with those individuals who impugn either the motivations of Congress or the appropriateness of your investigation. As a political scientist and a former professor of Constitutional Law, I place a high value on the Congressional function of investigating, reviewing, and airing issues of public concern. Clearly, such issues are raised by the enormous powers and questionable practices of the NCAA, and it is time, I maintain, to submit those powers and practices to the public scrutiny of Congressional hearings.

My strong endorsement of these investigative proceedings should in no way, however, be viewed as an attempt to evoke public sympathy for the University of Minnesota. Moreover, despite what some critics have insinuated, I am not interested in leading a witch-hunt that would result in the demise of the National Collegiate Athletic Association. Rather, I wish to go on record as supporting the necessity for some type of national organization to assist in the coordination of intercollegiate athletics, to maintain an appropriate and understandable body of rules, and to provide a just means for enforcement of those rules.

But I am also convinced that any enforcement agency whose practices and procedures are, at best, ineffective and, at worst, violate the very principles they are intended to further, must be reformed or replaced. No institution is indispensable or above self-improvement; no collective body should govern its members through a cumbersome, complex, and contradictory set of rules; and no organization should command monopolistic powers that enable it to stifle criticism through threats of expulsion or unduly coercive sanctions. My conclusion, Mr. Chairman, is both considered and sobering: If the National Collegiate Athletic Association cannot reform itself—and that is my personal preference—then Congress must intervene and mandate such an action.

It is my sincere hope that these hearings will provide the stimulus necessary for internal reform. With that objective in mind, let me proceed, first, to outline the unhappy relationship that recently existed between the University of Minnesota and the NCAA. Second, I would like to summarize several important lessons that should be learned from our particular experience. Third, my associate, Vice President Stanley B. Kegler, will outline some of the problems we encountered in our lengthy investigation of our athletic program. And finally, Vice President Kegler and I, along with Mr. Paul Giel, University of Minnesota Athletic Director, and Mr. Mychal Thompson, Mr. David Winey and Mr. Phillip Saunders, will attempt to respond to any questions you might have.

July, 1975, marked the beginning of our episode with the National Collegiate Athletic Association. At that time, the University of Minnesota received a letter of inquiry from the NCAA, alleging numerous violations in our basketball program. We responded immediately and in good faith by undertaking an exhaustive investigation, one that consumed thousands of staff-hours, thousands of dollars, and one that eventually produced a 43-pound document of self-incriminating evidence.

We cooperated in every way possible, and the Association even commended us for our exemplary investigation. What we found caused me, the University community, and many Minnesotans a great deal of embarrassment. The plain and unvarnished truth was that from 1973 to 1975, the University failed to monitor the actions of a basketball coach who firmly subscribed to the belief that "Winning isn't everything, it's the only thing." This particular individual, together with several over-stimulated athletic supporters, engaged in violations that created a climate which was contrary to good sportsmanship and alien to the ideals of the University of Minnesota. Following our exhaustive investigation, we were not afraid to find ourselves guilty of many infractions, nor to admit our mistakes publicly and to suffer the consequences. We accepted our penalties without appeal or recrimination, and we took immediate effective action to prevent future violations.

The irony is that a university which tried so very hard to purge itself of wrongdoing, and that later would be commended by a U.S. Circuit Court for a thorough investigation, would one day find itself in a two-year struggle with the NCAA over the rights of

three basketball players. The students, Messrs. Saunders, Winey, and Thompson, became victims of what Justice Myron Bright of the Circuit Court of Appeals for the 8th District called "punishment which seems grossly disproportionate to the offenses committed by the three student athletes." It is not necessary to detail the specific offenses referred to by Justice Bright. Let me only say that Mr. Thompson's violation involved the selling of two complimentary tickets for more than face value. Mr. Winey was accused of spending two holiday weekends at the vacation home of a basketball booster, and Mr. Saunders purportedly made several telephone calls on a WATS line and stayed overnight at a summer basketball camp operated by his coach.

More important than the alleged violations was the unique brand of justice the NCAA applied to the students. Because we resisted the Association's attempt to impose its questionable enforcement procedures upon the three athletes, we found ourselves locked in a series of courtroom battles with the NCAA. The basic issue in these struggles have become extraordinarily clear over the past two years, although during the initial stages of the controversy, neither the issues themselves, nor the implications of certain actions, were as clear and understandable as they are today. As a result, both the University and the Association made a number of mistakes.

Yes, I am not afraid to admit that my colleagues and I did make mistakes. We erred, for example, in our response to the NCAA's initial directive that we declare the three students ineligible. In December, 1975, the Association informed us that we were obligated under membership rules to take such an action, and should we fail to do so. we would incur additional institutional penalties. Unfortunately, in our haste to avoid further and harsher sanctions, we lost sight of our obligations to the three students.

Mychal Thompson's case illustrates this point. The Assembly Committee on Intercollegiate Athletics (the ACIA), which is a faculty-student group charged with the responsibility of deciding eligibility questions, conducted what were presumed to be pro forma hearings, designed only to expedite the matter of Thompson's eligibility. The ACIA informed Thompson that he, personally, or his legal counsel, could attend the hearings if so desired. However, Thompson was advised by one of the committee members that his attendance at the proceedings was not necessary, since should a declaration of ineligibility be delivered, the University would immediately appeal to the NCAA for restoration of his right to play, and that this appeal would be successful.

In retrospect, it is obvious that this advice was inappropriate, despite the fact that it was based upon the judgments of presumably informed officials from the NCAA, the Big Ten Conference, and our own institution. Subsequently, Thompson waived his right to appear at the hearing, and the ACIA complied with the Association's directives and declared him ineligible. However, the University's appeal for immediate restoration of Thompson's eligibility was unsuccessful.

Mr. Thompson was understandably disturbed by the adverse ruling and took the matter before a state court, where a temporary restraining order was handed down against the enforcement of the University's declaration of ineligibility. In compliance with the court order, the University scheduled a series of hearings designed to rectify our previous procedural error and to insure that the due process rights of Mr. Thompson, as well as those of Mr. Winey and Mr. Saunders, were fully accorded. Furthermore, we informed the Association of our plans, and in a confidential report, we were assured that such hearings could, indeed, be held—prior to the application of any NCAA rules.

Soon afterwards, in the spring of 1976, two separate faculty-student committees conducted due process hearings that, upon later review by four U.S. district court judges, were found to be (and I quote) "fair and impartial." The students, represented by their counsel, appeared before the committees. Witnesses were called, testimony was submitted, and a complete investigation of the alleged charges was undertaken. As a result of these proceedings, the ACIA determined not to declare the three students ineligible.

The NCAA's reaction to this ruling was emphatic and negative. It was apparent that the Association resented the imposition of any procedure that would result in a verdict contrary to that which it had preordained. In criticizing the decision of the independent faculty-student committee, the NCAA charged the University with failure to carry out its membership obligations. Thus, we had a duty to provide objective and impartial hearings, but, at the same time, we were told that if such hearings did not lead to the desired results—as predetermined by the NCAA—then we were in contempt of the Association's rules.

I submit, Mr. Chairman, that due process hearings under these circumstances are nothing short of a sham, both for students and the universities they attend. Any system of justice that allows only one verdict is fundamentally flawed. Equally perverted is any system of due process that permits the determination of guilt or innocence prior to judicial review. Such practices are clearly unfair and contradict the spirit of due process familiar to any American courtroom.

Our willingness to subscribe to the NCAA's interpretation of due process prompted the Association to place our entire men's intercollegiate athletic program on indefinite probation. This probation, which was added to the various penalties that had previously been levied, applied severe economic and psychological pressures against all athletic programs at the University of Minnesota—not just our errant basketball program. In taking this action, the Association was attempting to pressure the University to choose between the due process rights of three student athletes and the post-season tournament privileges of more than 500 other varsity players. The consequences of these options were obvious. If we, under continuing pressure from the NCAA, were to declare the three basketball players ineligible, we would be violating the State requirement of due process, as well as undermining the University's own well-established due process policies. If, on the other hand, we failed to comply with the NCAA directives, we would be unintentionally and indefinitely penalizing every student athlete at the University by incurring continued probation for the entire men's intercollegiate sports program.

Clearly, the choice before us was not easy; indeed, it was painful. After much deliberation, we made what we believed to be the correct decision, a decision consistent with our moral convictions. We would not sacrifice principle for expediency and we would not practice lifeboat ethics by throwing overboard the rights of the three student athletes.

Rather, we decided to continue to defend those rights as we understood them, seeking clarification and resolution of the matter through the courts. Accordingly, in October, 1976, we took our case before a U.S. District Court where presiding Judge Edward Devitt concluded that adherence to the NCAA's position would (and I quote) "make a mockery of due process," for it would permit only one verdict and would hardly protect the rights of the accused. Consistent with this philosophy, Justice Devitt enjoined the Association from enforcing its probationary sanction against our men's intercollegiate athletic program. Unfortunately, this reprieve was short-lived. Approximately one year later, the Circuit Court of Appeals overturned Justice Devitt's ruling, and in so doing, again placed the University in a no-win dilemma. One of the few remaining avenues of appeal was the highest court in the nation, and thus, we submitted a writ of *certiorari* to the Supreme Court, knowing full well that there was less than one chance in a hundred that the High Court would decide to hear our case.

As might be expected, Mr. Chairman, the actions we took to fulfill our due process responsibilities did not escape uncriticized. Internally, the situation that was forced upon us was divisive, as athletes were pitted against athletes, and coaches against coaches. A representative group of varsity players, called the Committee of Concerned Gopher Athletes, pleaded that we not sacrifice their rights and those of hundreds of other innocent student athletes simply to uphold the rights of three of their colleagues. That same message was echoed by members of the coaching staffs of the ten athletic programs affected by the NCAA's blanket probationary sanctions. Externally, some Minnesota newspapers accused me and my colleagues of being quixotic disciples of a lost cause. A spokesman for the NCAA even went a step further when he publicly dubbed our legal action as a grandstanding effort. In his mind (and I quote), ". . . institutions bring suits [against the NCAA] basically as a public relations exercise to show certain constituencies that university administrators care, and more than occasionally, to fog up the fact that institutional management did not handle matters as effectively or correctly as they should."

I can assure you, Mr. Chairman, I was not, and am not, interested in capturing headlines or obfuscating mistakes. As a university president, I know that there are far less painful and embarrassing methods for attracting attention than to become involved in a public battle with an organization as powerful as the NCAA. Moreover, there are far more discrete ways to cover up mistakes than to announce them before public courts and Congressional panels. The actual reason behind our position was a simple one: If the University failed to protect the due process rights of its students, then who would? Our answer was no one, and certainly not the NCAA.

For almost two years we upheld that conviction, until finally we were forced, by what amounts to competitive blacklisting, to declare the student athletes ineligible. We were willing to accept the NCAA penalties against our basketball program; we were willing to suffer the criticism that our actions propelled; and we were even willing to incur the harsh consequences of probation for our entire men's intercollegiate athletic program. But ultimately, we could not match the next ante in the NCAA's power play tactics; we could not risk the right of every basketball player in the Big Ten Conference to participate in postseason NCAA tournaments, and that was precisely the decision confronting the University on October 24, 1977, the day the Assembly Committee on Intercollegiate Athletics reluctantly voted to declare Mychal Thompson and David Winey ineligible.

Prompting the Committee's decision was an Association rule which applies to every athletic conference that participates in NCAA post-season play. According to that rule, any conference that wishes to qualify for post-season tournaments must be in good standing with the Association. Should even one school in the conference fail to be in good standing, then every other member also loses its automatic privilege to participate in NCAA-sponsored post-season play. Thus, had we not backed down, we would have jeopardized the rights of basketball players at

Purdue and Northwestern, the Universities of Michigan and Indiana, Ohio State and Michigan State, and every other member of our conference. Moreover, had we not capitulated, then it was quite apparent that the other Big Ten Schools would have either brought pressure upon us to comply with the regulations, or else they would have decided not to compete with our basketball team this season—and for very sound and understandable reasons.

So in the end, I'm afraid we buckled under to the pressure. I'm afraid we could not say to all the basketball players in the Big Ten Conference that we were willing to sacifice their rights because of our troubles with the NCAA. Yes, I confess, we did eventualy sacrifice principle for expediency!

Given this abbreviated sequence, I think it would be appropriate to bring to the attention of this committee some of the lessons that we learned from our experiences. The first lesson is extremely critical, for it explains the basis of the NCAA's enormous power and contradicts a popular myth. Simply stated, the NCAA is NOT a voluntary organization. Indeed, membership in the Association is as free-willed and spontaneous as paying one's taxes or complying with the regulations of the Internal Revenue Service—which, incidentally, are almost as complicated as the NCAA Manual. Only in theory does a university or college have a choice to join—or conversely, to resign from—the NCAA. If a major college or university wants to compete on the athletic fields, courts, and rinks of schools of a similar size and caliber, then there is absolutely no choice; you must be a member of the NCAA.

The NCAA's power to force an institution to join the organization and to comply with its rules also stems from the blanket incentives the Association commands. In effect, an unchallenged system of rewards and punishments enables the NCAA to regulate the intercollegiate athletic market with the immunity of a protected monopoly. One such mechanism is the NCAA's exclusive right to certain national television contracts and revenues. Last year, the Association distributed more than $24 million to its member schools, many of whom could not afford a conventional athletic program were it not for such outside income. If these revenues are taken away, there would be a severe erosion, and in some cases, a collapse of already financially pressed athletic programs.

University administrators and athletic directors are well attuned to this harsh economic reality and are understandably reluctant to jeopardize an important source of supplemental income by resigning from the Association. They also realize that institutional probation can be eqully catastrophic, resulting in denial of national television coverage, the forfeiture of an important recruiting vehicle, and the loss of critical revenue. And most of all, university officials and athletic officers are sensitive to the NCAA's unique interpretation of the Golden Rule: "He who has the gold, rules."

An equally effective incentive to maintaining membership is represented by the NCAA post-season tournaments. Not to belong to the Association is to forfeit any opportunity for a team or an athlete to compete in the NCAA championships. For many players, particularly those in the minor sports or in sports that accent individual events, the chance to participate in post-season competition is the highlight of the entire season, and in some cases, the highlight of an athlete's career as well. By controlled access to such events, the Association is able to force institutions to join its exclusive club and to abide by the club's rules.

Third, and perhaps most significant, the NCAA is able to maintain its monopolistic power through intimidation and threats of reprisal. My conversations with university presidents across the nation lead me to conclude that many college administrators simply back away from potential controversy with the NCAA. They realize what happens to a maverick school that strays from the NCAA's tight corral. They are well aware that any public criticism of the Association's administrative cadre is apt to be greeted with all the compassion of an avenging angel.

From firsthand experience, I assure you that the organization's staff takes a dim view of those who challenge its authority. For example, in the initial stages of our investigation, we found it necessary to request additional time to complete the lengthy and thorough review of our basketball program. As Dr. Kegler will shortly describe, the Association responded to our request, and a few public comments he made, by threatening to slap the University with an additional allegation of institutional noncompliance. The message was clear: When the NCAA sets a deadline, you meet that date, promptly and without public criticism.

In a second instance, I spoke during the halftime of a University of Minnesota football game. My remarks were short, and I hardly considered them controversial. I asked the assembled fans for donations to assist in paying some of the legal costs incurred in our litigation with the NCAA. Less than three days later, I received a terse letter from the Assistant Director of the Association requesting that I provide him with a verbatim copy of my halftime remarks, and furthermore, that I send him copies of any public remarks that I had made previously, or would make at any time, regarding the NCAA. Again, the implicit message was clear: I should not engage in such unsportsmanlike behavior as publicly criticizing the organization—regardless of what the First Amendment to the Constitution declares.

In a third instance, I referred to the NCAA's enforcement procedures as "a Rube Goldberg contraption gone mad." I argued that, "There is little that is fair about them, there is little that is rational about them, and in truth, there is probably little that is effective about them." This particular opinion seemed to incense some NCAA officials, as I was both publicly and privately reprimanded for espousing a view that I firmly believed at the time, and one that I continue to hold. Less than three weeks after I made that comment, the editor of the NCAA News published an article accusing me of obfuscating the issues, of pursuing a publicity campaign, of institutional mismanagement, of being an ungrateful recipient of NCAA largesse, and of "conjuring up visions of vigilantes stringing up innocent strangers from the limbs of cottonwood trees." Little did I realize, Mr. Chairman, that in one short statement I could accomplish so many things.

The propensity for the NCAA to respond to criticism with threats of reprisals serves as the basis for a second lesson. As I mentioned previously, the Association's hierarchy exhibits a disturbing lack of appreciation for First Amendment values and for constructive dissent to the point where a person who challenges the organization is regarded as a troublemaker and a target to be sniped at through the official house organs. However, the Association is seldom content to stifle criticism through editorial columns alone. Instead, there is a tendency to single out those schools that question the organization's authority for special public flogging, and in so doing, to reinforce upon all of the other Association members the price that is to be paid for institutional insubordination. The real tragedy, of course, is that in attempting to punish an institution or its administration, the NCAA often tramples upon those individuals the organization is pledged to protect, namely, the student athletes.

Let me illustrate this insensitivity through two examples. You will recall that the fundamental disagreement between the NCAA and the University of Minnesota concerned the due process rights of the three student athletes. For months, my colleagues and I had attempted to persuade the Association's staff that a due process hearing was not merely optional but, indeed, proper and mandatory. Eventually, and due primarily to a court order dictating that such a hearing be granted, the NCAA officials appeared to accept the legitimacy of this constitutional protection. However, I later discovered my mistake in assuming the staff endorsed, or even understood, this fundamental privilege. At a meeting in Kansas City to discuss the impasse between the Association and the University, I was informed, in no uncertain terms, of the relative value accorded due process when it came into conflict with the organization's policies and procedures. One of the Association's top ranking officials assured me, "Mr. President, I have no problems whatsoever with due process; you do what you have to do, but then you reach the right decision." The "right decision," as he went on to explain, was to fulfill our institutional obligation to the NCAA and only then to worry about the facade of due process. He also told me that I "would have to choose between the University's due process procedures and the Minnesota Constitution's procedures, and our loyalty and obligations to the rules of the National Collegiate Athletic Association." I could not help but conclude that this officer was far less interested in constitutional or legal principles than he was impressing upon me the high cost of membership in his organization. Unfortunately, the dues he demanded could only be paid by sacrificing the rights of the three students.

There is a second, and equally obvious, example of the NCAA's willingness to punish student athletes as a means of penalizing an insubordinate university administration. Let me cite the example of Mychal Thompson to illustrate this point. According to published accounts, the fourteen game suspension levied against Mr. Thompson was the longest suspension ever meted out for an alleged ticket sale violation. Only after a bitter legal struggle was the sentence commuted to eight games, but even this reduced penalty remains on the record books as the most severe sanction ever accorded in such a situation.

The fact that Mr. Thompson received this special treatment is hardly a coincidence. Rather, it is clear that he—and to a lesser extent, Mr. Winey and Mr. Saunders—was singled out to pay two additional debts, the first incurred by an overzealous basketball coach who had escaped unpunished, and the second incurred by a University administration that had resisted the NCAA's coercive enforcement procedures. In supporting this conclusion, let me read to you an observation made by one of the three judges on the Circuit Court of Appeals. After reviewing the unusually harsh sentences, this particular justice commented:

"In my judgment, the ruling of the Association visits the sins of the "fathers" (the University's basketball coaches) upon the relatively "innocent" sons (the basketball players). The obvious injustice of the NCAA rulings indirectly affecting the athletes in question seem to reflect some degree of vindictiveness, not necessarily against the student athletes but against the University of Minnesota, to punish it for the previous improprieties of the basketball coaching staff."

Mr. Chairman, there are several other important lessons to be learned from our experiences with the NCAA, but at this time, I will call upon my associates to share with you some of their impressions of the matters I outlined. Before I end my statement, however, I wish to emphasize one final point. If the events of this country's recent history teach us anything, they have made it clear that no investigatory and enforcement agency should be allowed to isolate itself from public scrutiny, criticism, and periodic review. Recent revelations have demonstrated

what happens to such organizations when left alone to develop their own traditions, value systems, and procedures. Unfortunately, we have seen that investigatory agencies can slip away from openness and into ways of doing business that might be technically aboveboard, but that in practice, are contrary to the very principles they are designed to protect. But fortunately, we have also observed that it is possible to submit these agencies to public scrutiny, and thereby, prompt constructive self-reform.

I sincerely hope, that as a result of this Congressional review, the same spirit of reform will be exhibited by the National Collegiate Athletic Association. In so doing, the NCAA will emerge as a vastly improved organization, one that is better able to serve student athletes, universities, and the American public. The interest, Mr. Chairman, that you and your Subcommittee colleagues have demonstrated gives me great cause for optimism!

Thank you, and I would now like to introduce University of Minnesota Vice President, Stanley B. Kegler.

NCAA TESTIMONY BEFORE THE SUBCOMMITTEE ON OVERSIGHT AND INVESTIGATION

(By Stanley B. Kegler)

Mr. Chairman, members of the subcommittee. My name is Stan Kegler, vice president of the University of Minnesota; I supervised the investigation of the NCAA allegations into the university's men's basketball program.

One of my first memos to Dr. Magrath when he came to the university dealt with my belief that we had some problems in athletics, the exact dimensions of which I could not describe. This was based on memos by our former faculty athletic representative who had heard recurring rumors that we were under investigation by the NCAA or Big Ten athletic conference or both. Both he and Mr. Giel tried, even before our NCAA saga began, to verify or clarify the nature of the various rumors afoot. Our repeated efforts to discover the nature of the situation were aimed at the attempt to clean up our own act as soon as possible. Those efforts were, except for confirming an occasional rumor, fruitless. It was, however, our first signal of the level of cooperation we might receive from the NCAA.

When we reecived, in July of 1975, our epistle from Shawnee mission, Dr. Magrath and I contracted with a legal firm to conduct our investigation. We attached no strings but instead insisted that the investigators pursue the matter wherever it might lead. That may have been our first mistake.

Our directions to the investigators were based on some relatively simple assumptions: If we really did a good job and cleaned house, not only would our program be the better for it, but we were likely to be dealt with less harshly by the committee on infractions. We believed the emphasis should be on finding facts and setting up procedures to be certain problems did not recur; we discovered that the NCAA seemed much more interested in punishing someone. If some were beyond the grasp of the NCAA, so be it; those left behind—and the institution—were punished.

Our early difficulties with the NCAA stemmed from the fact that we believed them when they said that the investigation would be carried out in a cooperative manner. We also believed we were innocent until proven guilty and we believed, as the NCAA manual states, that self-disclosure would be considered as a mitigating circumstance in assessing penalties.

As I am sure you know, the NCAA alleges violations; the institution must adopt a kind of schizoid personality and investigate itself (while laying plans to defend itself at a hearing); it must develop corrective procedures and assess penalties against itself; then the committee on infractions decides if the institution went far enough and usually assesses further penalties.

It is ironic that one of the best such investigations resulted in a legal saga of the dimensions described by Dr. Magrath; one can only wonder if we hadn't done such a good job if the penalties might have been less harsh.

Let me turn to the investigation and to our relationship with the NCAA.

1. The first problem with the NCAA's policies and practices is the overwhelming number of allegations, both substantial and petty, which they require the institution to admit or to investigate and disprove, as well as the substantial requests for the collection of material. The NCAA compels the institution to put enormous resources into the collection of information on extremely petty, small and insignificant allegations of wrong doing. For example, two of our athletes were charged with receiving a Christmas gift from a representative of the university's athletic interests which turned out to be a small, felt book bag inscribed with the phrase "Ho-Ho-Ho" and having a cost of somewhat under $1.00.

The inclusion of these kinds of allegations causes the institution to spend time and money needlessly in the investigation and to be unnecessarily diverted from those issues which have far more significance to the overall athletic program.

2. Perhaps the greatest problem faced by the institution in attempting to investigate allegations is that NCAA's policy of providing the institution absolutely no assistance in conducting the investigation. When we requested information about the sources of the information contained in the allegations as well as copies of statements, etc., we were advised:

"The official inquiry . . . contains sufficient specific information concerning each allegation to enable the university to investigate and respond in an enlightened manner. For the most part, the individuals identified in each allegation reported the information upon which the allegation is based. Identifying the principals in each allegation provides the university with sufficient notice and adequate opportunity to conduct its own investigation consistent with the administrative and cooperative approach of the NCAA enforcement program."

While it is true that an unlimited investigation could unveil most of the same information made available to the NCAA, the waste inherent in such a duplicative investigation is enormous. I believe that the investigation that we conducted at the University of Minnesota could have been completed at less than half the cost and in less than half the time had we had reasonable access to the information upon which the NCAA was relying.

"Further, the NCAA carried this position to ridiculous extremes. One of the NCAA's allegations against the University of Minnesota involved the mother of an athlete. Although she was the primary source of information contained in several allegations involving transfer of a sizable amount of money and the behavior of a coach, and despite the fact that she had died between the time of her interview by the NCAA and the University's investigation, the University was unable to obtain access to the staff memorandum of interview with her. To quote from Warren Brown's letter to our investigator:

". . . (It) is the policy of the NCAA Committee on Infractions not to provide copies of staff memorandums to institutions involved in infraction cases. In the Committee's view, the extenuating circumstances in (this) case are not cause for a waiver of this policy."

This position, despite the staff's willingness to share in one very short paragraph from those memoranda, is simply incredible. Even the death of a key witness involving a man's future is described as an "extenuating circumstance" to deprive us of equal access to the facts.

Similarly, the NCAA had in its files a newspaper clipping relating to a particular allegation involving one of the central figures in the investigation. This newspaper clipping was offered during the hearing before the committee on infractions as proof of the staff's position. Although theoretically we could have reviewed all local newspapers during the entire period of time covered in the investigation (approximately six to seven years) for the purpose of finding this information and attempting to determine its validity, I hardly feel that such restrictive policies on the disclosure of information falls within the commonly-accepted definition of cooperative.

Finally, the NCAA takes an inconsistent position about the purpose to be served by this unwillingness to disclose information. On one hand, we were told by the NCAA that they do not provide the information because it is obtainable by us in the course of a thorough and "cooperative" investigation; on the other hand, the NCAA has publicly announced that it does not wish to turn this information over to institutions under investigation so as to make it more difficult for those institutions to escape the just results of their wrong-doing. In effect, the NCAA wants to present the image of cooperation while in fact being uncooperative.

3. The third problem with the investigation process is that the entire evidentiary process is often a matter of the staff providing hearsay evidence to the committee without the committee (at least to my knowledge) or the institution (as to which I am sure) ever seeing any hard evidence—either statements, depositions, memoranda of interview, or documents. At the hearing conducted with respect to the University of Minnesota, the staff could say whatever they wanted, true or untrue, without any ability by the institution to obtain or see the basis for the oral assertions of the staff.

The difficulty is compounded by the fact that the NCAA's enforcement procedures provide for no mechanism to even insure that the institution will be able to interview and discuss with its accusers the information being orally provided to the committee on infractions. For example, a student athlete at Wake Forest University refused to discuss the substance of his allegations against the University of Minnesota with University investigators despite significant assistance from the Big Ten office. While the NCAA staff indicated that it would attempt to make a request on our behalf, it also indicated that it had no authority to compel the athlete to talk to us. At the same time, the NCAA staff, without providing any documentation as to what the young man said, or without having him appear at the hearing for cross examination, orally advised the committee on infractions in an extremely conclusionary fashion of the "facts" provided to the NCAA by the student. Again, the institution doesn't have a chance to test the "evidence" or to have equal access to it.

Not only does the NCAA require an almost endless investigation into areas which most of the rest of the world would consider civilities, the amount of time to conduct the investigation, document the results and report to the committee on infractions is extremely limited. When I wrote to ask for an extension, only a brief one was extended—although we had precious little time to prepare the 1,400 plus page report to submit.

When I issued a statement, admittedly argumentative, on this matter, we received an additional letter citing another possible violation by me and asking the investigator to determine if I had acted in violation of the regulations governing good sportsmanship. After our investigator filed a lengthy statement, the allegation was dismissed by the Committee on Infractions as a personal mat-

ter between Warren Brown and me. But not until we had expended many hours of legal time better spent on other matters. Since the allegation was dismissed, I am not certain if I was certified by the NCAA as a good sport or not.

Let me conclude by referring to the problem which I believe is at the core of any institution's problems with the NCAA. The NCAA refers to an institution's "contractual obligations" with the NCAA. For all practical purposes, that is the manual with its policies, by-laws, interpretations and regulations. I would submit that at least one party—the institution—does not fully understand that contract.

Nor does that manual spell out in clear, understandable language what the "contractual obligation" is. Nor does it take into account the fact that institutions no longer operate "in loco parentis" in regard to actions of its students. Nor does it clearly spell out what or who representatives of our athletic interests are, for whose acts we may be punished even if not authorized—or even if we don't know who they are or what they're doing.

Not only does an institution not know that contractual obligation very well, it is not clear the NCAA does either. The tape of our December 18 hearing will reveal one veteran member of the committee on infractions—a professor of law, I believe—asking the staff, "is that our policy?"

Other members of the committee were equally unclear on who is "a Represenstative of the Institution's Athletic interests". Further, the answer to questions concernings, meanings, definitions or interpretations of the rules is all too frequently "well, we have always . . ." but yet, the institution or the investigator have no way of determining how the NCAA staff has "always" construed a particular rule, especially since many of the answers run contrary to established principles.

While I could go on at substantial length with other problems inherent in the investigatory processes used and imposed on institutions by the NCAA, and could give other examples of specific difficulties, I believe that I have stated the most significant difficulties encountered in our effort to conduct a thorough and complete investigation of the allegations made by the NCAA.

Although I am not an attorney, I believe I can say in conclusion that the manner in which the NCAA committee on infractions investigations are conducted runs counter to every established procedure utilized, to my knowledge, in legal or administrative hearings aimed at giving both sides an equal opportunity to present their case and to provide maximum truthful information to the decision makers.

To the extent that the decisions reached by the committee on infractions are often substantially accurate, the result is as likely to be by chance as it is likely to be a product of a meaningful investigatory process. Further, while an occasional inaccuracy in the findings of the Committee on Infractions might be a justifiable "cost" where the rights of an institution are concerned, the "costs" cannot be justified where a single or few allegations involve the rights of an individual student athlete or a coach.

Were I to make recommendations for change, they would be astonishingly simple:

1. Make the investigation genuinely cooperative with equal access to information on which allegations or wrongdoing are based:

2. Simplify the manual to make it understandable and enforceable;

3. Change the emphasis of the NCAA from punishment and retribution to correcting whatever problems exist.

Thank you for providing us with the opportunity to be heard.●

TRIBUTE TO ROBERT MOONEY, INDIANA JOURNALIST

● Mr. LUGAR. Mr. President, throughout my years in public service, it has been my privilege to work with many journalists, and none was more outstanding than my friend, Bob Mooney, a political reporter for the Indianapolis Star. His death on March 2, 1978, marks the end of a career which enriched the lives of Hoosiers for three decades. Bob Mooney was a man of remarkable talent and dedication and a cherished friend.

Known for his thoughtful political analysis, his regular column, "Politics In Perspective," highlighted activities and personalities in the news. Above all else, he strove for fairness in his reporting and in his dealings with fellow journalists and public officials. Only 3 days before he entered the hospital, Bob was named Newsman of the Year by the Indianapolis Press Club, a tribute to his reporting and to his character.

At his death eulogies were offered by Hoosier politicians and journalists who had the good fortune to work with Bob throughout his career. Each agreed that he was eminently qualified for the honors he received for his work, although he shied from such evidences of public recognition.

Perhaps his greatest tributes paid to him were offered by his fellow journalists, such as the following words written by Star reporter Tom Keating:

Thursday morning, when word of Mooney's death spread through the Star, work went on as usual. It is that way in a newspaper office. The phones keep ringing, the wire copy machines keep chattering. There is no moment of silence, no closing up for the day. The world doesn't stop making news. Nonetheless, there was a gap, as though someone had removed half the desks or an entire wall. We won't be able to replace Bob Mooney.●

VALUE OF LORING AIR FORCE BASE CONFIRMED

● Mr. MUSKIE. Mr. President, two recent developments—a statement by President Carter and an award presentation by the Air Force, lend positive support to the efforts to maintain Loring Air Force Base at current operating levels.

Mr. President, since March of 1976 when the Ford administration announced that Loring Air Force Base was a candidate for major reduction, Senator HATHAWAY and I, together with our colleagues from Maine in the House, have challenged the Air Force to justify the proposal to reduce the Strategic Air Command base. We have been assisted in the effort by the Save Loring Committee, a group of business and community leaders from the Limestone area who prepared detailed strategic and economic analyses of the proposed action.

Our challenge to the Air Force was based on these central arguments: First, the clear understanding that Loring, as the Northeastern-most Strategic Air Command base in the continental United States, is one of our most strategically located bases; second, a direct awareness that the local economy would be devastated if Loring were reduced; and third, our understanding that such a reduction was not the most cost effective alternative available to the Air Force, Events since the reduction was proposed have supported our challenge in all three areas.

The Air Force admits, in the environmental impact statement on the proposed reduction, that greater dollar savings could be achieved with alternative base reduction actions. And the Senate Appropriations Committee found that Loring Air Force Base was within the mid-range for base operating support costs, while six other Strategic Air Command bases exceeded the median cost level by more than 20 percent. One of those Strategic Air Command bases exceeding median costs had been listed as an alternative to the reduction of Loring in the early stages of the decision process but was subsequently dropped as an alternative candidate. These findings were included in the report accompanying the Department of Defense Appropriations bill for fiscal year 1978 (H.R. 7133) on pages 30–35.

The environmental impact statement prepared by the Air Force, and studies submitted in conjunction with it, supported our argument that the impact on the local economy would be severe if the Air Force proceeded with an 85-percent reduction of Loring Air Force Base. The initial environmental analysis by the Air Force was faulty and months were consumed while a new draft and final environmental impact statement were prepared. However, the result of these studies supported our initial contentions. The final environmental impact statement found that local unemployment could reach—

Twenty-two percent, a disastrously high rate for a fragile economy which depends on agricultural related employment as its other major economic activity—

And, further, that—

local units of government would be severely disrupted. . . .

Despite these findings, and despite the explicit requirements of section 612 of the Military Construction Authorization Act, it was not clear whether the Air Force and the Department of Defense would give consideration to the local economic impact. Then President Carter addressed the issue. At his town meeting in Bangor, Maine, on February 17, the President said he had asked Secretary of Defense Brown—

To reassess the decision made by the previous administration about Loring. And . . . to take into consideration, not just environmental questions and defense questions but also the economic impact on Maine of closing Loring Air Force Base.

The strategic importance of Loring Air Force Base, as the closest continental U.S. air base to the Soviet Union and closest on the great circle route to Europe, was recognized by President Carter and continues to be recognized by Air Force officials. A quick look at a map confirms that as simple truth, yet the Air Force analysis suggests that the strategic advantage of Loring's location is diminished by other factors, such as weather problems and limitations of Loring's capacity to support other do-

mestic units. An Air Force announcement early this month undercut that argument, however, when the 42d Bombardment Wing at Loring Air Force Base was designated the winner of the Omaha Trophy as the best wing in the Strategic Air Command for 1977.

Gen. Richard H. Ellis, Strategic Air Command Commander-in-Chief, announced that selection of the 42d Bombardment Wing at Loring Air Force Base—

Was based upon its mission effectiveness, outstanding Readiness Inspection, Buy None-exercises, and Combat Evaluation Group visits and Maintenance Standardization and Evaluation Team visits . . . The 42d was consistently a top performer in all areas.

The proposed reduction of Loring Air Force Base would include as a central cost-savings feature the dismantling of the 42d Bombardment Wing, the best wing in the Strategic Air Command. Indeed during 1977, the year for which the award was presented, the 42d Bombardment Wing was under threat of termination and Loring Air Force Base under threat of 85-percent reduction. Were it not for the efforts of the Save Loring Committee, the Maine congressional delegation and our Governor to point out the glaring deficiencies in the proposal to reduce Loring, the Ford administration would have proceeded to reduce the base and dismantle the very unit which instead survived to be designated as the best in the Strategic Air Command.

I am extremely proud that a unit in Maine has earned this distinction and congratulate the members of the unit who earned the award and their families in the community who supported them during this time.

I ask unanimous consent that the announcement of the award, the regulations describing the award, and the Bangor Daily News story relating these events be printed in the RECORD at the conclusion of my remarks.

There being no objection, the material was ordered to be printed in the RECORD.

Mr. President, no institution in Government or in the private sector is anxious to reverse a proposal set in process toward a final decision and action. We in the Congress are perhaps more fickle than most, but even here proposals gather a momentum which becomes an important if unspoken factor in their final disposition. But with the proposal to reduce Loring, I am pleased to say, the Carter administration appears willing to challenge the momentum of the proposal and demand that a decision be made on the merits. I have always been confident that, on the merits, Loring would be retained at full strength. The evidence supporting that position continues to grow and I am increasingly hopeful that a classic military snafu will be avoided in the end.

LORING WINS OMAHA TROPHY

HQ SAC (SAC PS).—The 42d Bombardment Wing, Loring AFB, Maine, has won the Omaha Trophy as the best wing in Strategic Air Command for 1977.

Gen. Richard H. Ellis, SAC Commander in Chief, announced the award March 2.

The 42d BW selection was based upon its mission effectiveness, outstanding Operational Readiness Inspection, Buy None exercises, and Combat Evaluation Group visits and Maintenance Standardization and Evaluation Team visits, according to SAC Operations Officials.

The wing also had outstanding maintenance and support ratings, and flew an accident free year in 1977.

"The 42d was consistently a top performer in all areas," one official said.

THE OMAHA TROPHY

This regulation establishes the Omaha Trophy Award to annually recognize the outstanding wing in the Strategic Air Command, states eligibility criteria, and tells how the selection will be made.

BACKGROUND OF THE TROPHY

On the 25th Anniversary of the Strategic Air Command (SAC) the citizens of Omaha, through the SAC consultation committee, presented the Omaha Trophy to the CINCSAC with the request that it be awarded annually to the outstanding wing in SAC. The Chairman of the SAC Consultation Committee will provide the SAC Chief of Staff a miniature trophy for permanent retention by the winning unit.

ELIGIBILITY

All SAC wings or comparable organizations are eligible for the award.

SELECTION CRITERIA AND PROCEDURES

a. The trophy will be awarded to the outstanding wing in SAC based on overall performance for the previous calendar year.

b. The CINCSAC/DO, as OPR, will conduct the voting by forwarding a ballot with an attached letter of instruction to CINCSAC/AC, DE, IN, LG, DO, DP, XP, IG and SG. These agencies may devise their own selection criteria to determine the unit vote. Consideration will include, but not be limited to, mission effectiveness, flight safety record, the results of Operational Readiness Inspections, Strategic Missile Evaluation Squadron or Combat Evaluation Group visits, Maintenance Standardization and Evaluation Team visits, Commanders Annual Facilities Inspections, and SAC Bombing and Navigation Competition or Missile Combat Competition. The units overall contribution to the accomplishment of the SAC mission should be the determining factor. Do not generate additional reports to facilitate the selection procedure. The voting will be tabulated by DO and presented to the CINCSAC for approval. The results will not be announced until approved by the CINCSAC.

PRESENTATION

The winner will be notified by congratulatory message from the CINCSAC/CS. CINCSAC/CSP will make all appropriate arrangements for the presentation of the trophy and conduct the awards ceremony. Cost for the engraving of the Omaha Trophy will be defrayed by Headquarters SAC.

DISPOSITION OF THE TROPHY

The trophy will not be a permanent possession of the recipient, but will be rotated annually. If no award is presented for a given year the trophy will be retained by the last winner until it is again awarded. A miniature trophy will be presented and permanently retained by the winning unit.

PUBLICITY

Information officers at each level of command must insure that appropriate recognition of the winner is given through proper external and internal news media. The Directorate of Information, Headquarters SAC, will release the winning unit to service journals and other appropriate news media. Security must not be jeopardized in affording recognition.

[From the Bangor Daily News, Mar. 7, 1978]

SAC TO LORING: YOU'RE THE TOPS

LIMESTONE, MAINE.—Loring Air Force Base, the sprawling nuclear armed bomber base being considered by the Air Force for a major cutback, has been rated the number one Strategic Air Command Base in the world.

Gen. Richard Ellis, SAC commander in chief, said that Loring received the honor for its "overall superior performance" in 1977.

Loring scored the highest in evaluations of everything from mission performance to barracks inspections, said Capt. David McClure, public information officer for the 42nd Air Wing.

The OMAHA Trophy is awarded annually to the best of the 35 SAC wings in the world. It is the first time a northeastern base has received the award, McClure said.

The Air Force has proposed a more than 80 percent cutback at Loring, which houses 14 B–52 bombers and 30 KC–135 tankers.

A decision on the cutback is expected later this year.

Col. Larry S. Devall, Loring commander, is scheduled to receive the award at the OFFUTT Air Force Base in Nebraska in the near future.

Loring performed well last October during SAC operational readiness inspections—the longest test of a SAC Wing's ability to perform flying missions, McClure said.

"A team of nearly 60 members evaluated every operation—every scrap of paperwork. But it's not just how well we follow regulations," McClure said. "For instance during the severe winter of 1977, we remained fully operational the whole time," he added.

The base had a perfect refueling aircraft assignment record, meeting every receiver on time and on target in 1977, he said.●

HAROLD ZELLERBACH—1895–1978

● Mr. JAVITS. Mr. President, I wish to mark the passing of one of California's most distinguished sons, a very dear friend of mine over more than four decades, Harold L. Zellerbach, for half a century one of the two family leaders of the Crown Zellerbach Corp., founded by his grandfather in 1870; a member of the San Francisco Art Commission for 30 years—28 years as its president—and a leader in the civic and business life of his native city and State. Mr. Zellerbach was in every way an outstanding personality, a leader in the business community, an extraordinarily fine citizen, and a great benefactor of his community and of the arts and culture.

I ask unanimous consent that there be printed in the RECORD the obituary from the San Francisco Chronicle of January 30, 1978, and my eulogy delivered at the memorial service for Mr. Zellerbach, held at Congregation Emanu-El in San Francisco on February 2, at which the officiating rabbis were Rabbi Alvin L. Fine and Rabbi Joseph Asher.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the San Francisco Chronicle, Jan. 30, 1978]

HAROLD ZELLERBACH DIES ON SHIP

HONOLULU.—Harold Lionel Zellerbach, for decades one of San Francisco's most prominent industrialists and patron of the arts, died in Honolulu yesterday while vacationing on the cruise ship Mariposa.

Mr. Zellerbach, 83, was found dead in his stateroom early yesterday by his wife, Doris. The cause of death was not known immediately.

For a half century, Mr. Zellerbach had been a top executive at Crown Zellerbach Corp., the paper company founded by his grandfather in 1870.

He was appointed president of the firm in 1928. By 1969, when Mr. Zellerbach retired as chairman of the company's executive committee, Crown Zellerbach had become the world's second largest manufacturer of pulp, paper and paper products.

Among his most significant contributions to the Bay Area was his generosity in time, skills and money to the arts.

As a member of the San Francisco Art Commission for some 30 years—28 years as president—Mr. Zellerbach had a long and profound influence on the cultural life of the Bay Area.

As president of the Zellerbach Family Fund, he was instrumental in the $1 million gift to the University of California, Berkeley, to help finance the Zellerbach Theater in 1967.

A few years later, a Zellerbach Theater was erected on the University of Pennsylvania campus, in part because of a $500,000 contribution by the Harold and Doris Zellerbach Fund, of which he was president.

In 1974, Mr. Zellerbach pledged $1 million toward the construction of the proposed San Francisco Performing Arts Center.

Chronicle Art Critic Alfred Frankenstein, vice president of the Art Commission, said last night that during Mr. Zellerbach's presidency, which ended in 1976, "the commission completely changed its character.

"When he assumed its presidency, the commission was very little more than an architectural advisory board.

"During his years as president, the work of the commission continuously expanded until today, it directs activities of a large and very busy network of neighborhood arts centers, runs the San Francisco Symphony Orchestra's summer concert season, underwrites numerous musical, theatrical and dance events, and supervises the activities of the city's street artists . . ."

Mr. Zellerbach was also active on an international scale. In 1957, he headed the Zellerbach Commission that conducted a study of the post-World War II refugee problem. Two years later, he was a U.S. delegate to the Atlantic Congress that met in London under NATO auspices.

Mr. Zellerbach's service to the state government extended over more than a decade, first as a member of the California State Park Commission, appointed by Governor Edmund G. Brown Sr., then as a member of the successor State Park and Recreation Commission, appointed by Governor Ronald Reagan.

He served in varying capacities on other cultural bodies, vice president of the San Francisco Symphony, and director of the Fine Arts Museums of San Francisco, the San Francisco Art Institute, the San Francisco Ballet Guild, and the San Francisco Opera Association.

He was also president of the Crown Zellerbach Foundation and the Newhouse Foundation, a local fund set up to provide financial help to graduate students at the University of California and Stanford. He was director of the Laguna Honda Home Auxiliary.

He was an emeritus trustee of the University of Pennsylvania and an alumnus of its Wharton School of Finance and Commerce, and was long active in their alumni affairs.

Before the merger of the California Palace of the Legion of Honor and the M. H. de Young Memorial Museums, he was a trustee of the former, and was also a trustee of the Saints and Sinners Milk Fund.

Mr. Zellerbach was born here on March 25, 1894, the son of Isadore and Jennie Baruh Zellerbach. He attended the University of California, but took his Bachelor of Science degree in economics at the University of Pennsylvania in 1917.

On graduation he joined, as personnel manager, the Zellerbach Paper Co., which his grandfather had founded in 1870.

In 1928, he was elected president and ten years later was also named executive vice president of Crown Zellerbach Corp.

In 1956, he was named chairman of the corporation's executive committee, serving until 1969. He also served as acting chairman of the board during the term of his brother, J. D. Zellerbach, as Ambassador to Italy from 1956 through 1960.

He was elected chairman of the board of the Zellerbach Paper Co. in 1957.

He served as president of the National Paper Trade Association and in 1961 received the American Marketing Association's highest honor, the Charles Coolidge Parlin Award, as "an eloquent spokesman of the marketing concept."

He served on the boards, of among others, the Pacific National Bank, Rayonier, Inc., Niantic Corp., and Fiberboard Products, and was a member of the San Francisco Stock Exchange, the U.S. Council, and the U.S. Chamber of Commerce, and in 1958 headed the United Crusade.

He served a number of terms as president of Congregation Emanu-El and of the Young Men's and Young Women's Hebrew Association. He also served on the board governing Hebrew Union College in New York and the Jewish Institute of Religion in Cincinnati, the oldest theological seminary in America.

He was honored by Congregation Beth Israel in 1960, on the occasion of the temple's observance of its centennial anniversary, for "bringing great honor to our city and the Jewish community."

Among his clubs were the Commonwealth, Commercial, Press, Stock Exchange, Variety, Concordia-Argonaut, Villa Taverna, the St. Francis Yacht Club, and the Beach Club of Pebble Beach. He was also a Mason and a Shriner.

Survivors include his wife, the former Doris Joseph; a daughter, Mrs. Stephen N. Loew Jr.; two sons, Stephen and William, president of the Zellerbach Paper Co. and a senior vice president of Crown Zellerbach Corp.; seven grandchildren, and three great-grandchildren.

Funeral arrangements were pending.

EULOGY DELIVERED BY SENATOR JAVITS

I come from Washington as a friend of Harold's for 45 years at the gracious invitation of his family to say goodbye to my friend. And first I'd like to express to his beloved Doris, to his children who are here, Rollie and Bill and Steven and to their children, Marion, my wife's and my deep and profund condolences on Harold's passing.

And as the Rabbi has indicated in his own unique way, here was a man who did not wish to be memorialized with tears or sackcloth and ashes but with joy and singing and music; and in that great Valhalla to which he's gone, to which I will go and all of us will go, when we find him, he'll be smiling and happy and doing the things which he knew best how to do: to serve his fellow man and make his own life fuller as a result.

To me he was always "the Coach"; that was my nickname for Harold because from the day I met him in 1933 when he gave me a job to do as a very young lawyer in New York, he always had words of advice, never of criticism. They were much treasured and very useful; and in a preface which I wrote for his memoirs which I hope will be published soon, I called him one of the much beloved gentlemen of our time, and that to me is the very special description of Harold.

To me, from the lower East Side of New York, he was uniquely a Californian with the sun and the open spaces in his eyes and the frontier spirit and the innovation and the unyielding determination in his head and his heart all so characteristic of this state.

He was a highly personal man as all of you must know. His friends, his family, his business associates, his colleagues in public and political endeavors all were deeply involved with him. He was never content simply to have an interface with each of his friends on the particular matter which interested him or them and which brought about their friendship; but rather was very interested in the character of his friends, in their interests, in their activities, in their families, as he expected them to be in his.

And if there's one thing that distinguished him in my eyes above all others, it is that always, whether it was because of his wonderful heritage from his grandfather Anthony, his father Isadore, and this great empire which is California, or whether it came out of the wellsprings of his heart and his convictions, he was a man who had a sense of mission and a sense of responsibility to all with whom he lived; and, indeed, to the people of his country and the people of our world.

In his business affairs he joined with his father in the tradition of his grandfather, with his brother J. David Zellerbach and his son Billy, to make the Crown Zellerbach Corporation and the Zellerbach Paper Company institutions rather than businesses. This company's extraordinary record of achievements, an incomparable record of amity with its suppliers, and a unique friendship with its workers are eloquent testimonies to this facet of Harold Zellerbach's character.

And in his public responsibilities, his long-sighted understanding of the cultural and artistic needs of his beloved city of San Francisco put him and the city years ahead of most of the other great cities of the United States with respect to cultural and artistic endeavors.

For example, something which you may not know, he suggested to me the name of Nancy Hanks to head the National Endowment for the Arts and indefatigably pursued this recommendation; she turned out to be the catalyst who, in 8 years, made the National Endowment for the Arts one of the great national institutions of the United States.

Also, his sense of responsibility for the symphony here, for the opera, for the ballet, and his great interest in what I hope will be created, and what I hope to come out and see one day not too long from now, the Performing Arts Center, are other aspects of this very profound interest.

And he understood the arts. I'd like to read to you as friends just a one-sentence excerpt from a letter which he wrote to me on September 27, 1977, about the arts. He said: "I think the arts should be in the same situation as human needs; they are entitled to their say and their money as well as other human needs."

And indeed, the Zellerbach Family Fund did just that. As I came in on the plane this morning, I reread the purposes of this fund of which Harold was the President and the members of his family were members of the Board of Directors. Their credo was this: "The Zellerbach Family Fund is ready to use its resources to support programs that are unlikely to gain the immediate support of individual donors and whose programs through a modest investment can bring significant service to many persons."

He was an individual, but he was an unusual individual, one who married within his own person a love of city and state, a love of country, a love of friends, a love of his own enterprise, the unique talent for making them successful and a unique talent for serving widely in the process.

I haven't yet referred to his enthusiasm for the University of California, which I'd like to do very briefly. And incidentally, he

was the most enthusiastic athletic buff the University of California has ever known. His enthusiasm resulted in the theater at the University of California at Berkeley and in a theater at his other alma mater, the University of Pennsylvania in Philadelphia.

And finally, no development of Harold's life, no tale of my friendship with him, would be complete did it not include my knowledge of his manifest love for his family and for youth, not youth by age alone, but youth by spirit, youth by innovation, youth by boldness. And indeed, from what I see in his children and his grandchildren, they mirror their father's and their grandfather's enthusiasm for them in their own sprightliness and love of life, a love which he demonstrated so magnificently.

And as to his wife Doris, whom I'm sure you all know, she was not only a dear wife, but she was also the "doll" of his chronicles—among the most amusing and the happiest elements of the stories that Harold knew so well how to tell.

And so, my friends, let us savor the beauty, the happiness, and the life of this man. As so many of you know, Harold Zellerbach remembered every good meal he ever had anywhere in the world and the restaurant or hotel in which he had it. He was greatly admired by me and by a host of friends. He leaves a marvelous heritage to this city, to his state, and to all of us. And as a man who was not far from his age, I hope and pray only that in his children and his grandchildren we may see the emulation of this truly recondite and magnificent man, Harold Zellerbach.●

AMTRAK KEEPS RUNNING DURING RHODE ISLAND DISASTER

● Mr. PELL. Mr. President, this February Rhode Island was paralyzed by a record blizzard which lasted 36 hours and buried the State under several feet of snow.

Within hours after the start of the storm, Rhode Island's major thoroughfares, particularly the interstate routes and central arteries through the Providence area, became impassable by car. One week after the storm our Capitol City was still under a driving ban. During this time of crisis there were only two sure modes of transportation—by foot or by train.

As a long-time proponent of rail mass transit, I could not be more pleased to commend the officials and employees of Amtrak for their extraordinary services during and after the storm. After receiving reports of stranded persons both south of Providence and between Providence and Boston, Amtrak responded immediately by making numerous unscheduled stops at small communities along the corridor to pick up and unload passengers. Without Amtrak's cooperation, hundreds of Rhode Islanders would have been separated from their homes and loved ones for an indefinite period during a time of disaster.

During the recovery efforts and while the driving ban was still in effect in Providence, Amtrak continued special arrangements to allow workers to return to their jobs without using their cars.

It gives me great pleasure to bring to the attention of the Senate the valiant efforts of Amtrak during Rhode Island's recent disaster and I ask unanimous consent that a letter from Rhode Island's Director of Transportation Wendall Flanders to Paul Reistrup, president of the National Railroad Passenger Corporation be printed in the RECORD.

There being no objection the letter was ordered to be printed in the RECORD, as follows:

PROVIDENCE, R.I.,
February 20, 1978.

Mr. PAUL REISTRUP,
President, National Railroad Passenger Corporation, Washington, D.C.

DEAR MR. REISTRUP: As you know Rhode Island suffered one of the worst natural disasters in its history on February 6, 1978, when struck by the most severe blizzard in its history.

Amtrak trains continued to run during and after the storm with little or no delay. During the recovery efforts, your able and cooperative personnel scheduled extra stops and trains to assist otherwise snowbound Rhode Islanders to return to their homes. These same special arrangements also allowed normal work to resume in Providence on February 14, 1978 by transporting workers to Providence without using their cars. This allowed for orderly snow removal from city streets and decreased the severity of traffic into the City.

I would like to commend all your fine personnel for their cooperation and sacrifice during this severe storm.

Please express my personal thanks to those who directed and performed in such an admirable manner.

Sincerely,

WENDALL J. FLANDERS,
Director, Department of Transportation.●

RESTRAINT BY UNITED STATES, U.S.S.R., AND CUBA IN AFRICAN HORN COMMENDABLE

● Mr. MCGOVERN. Mr. President, yesterday's press carries the news that the Somalia-Ethiopia war is over. Apparently, the Soviet and Cuban forces, having assisted in the expulsion of Somalian forces from Ethiopia, have kept their word in not crossing the international border between the two countries. Following Somalia's announced withdrawal from Ethiopia, we are advised by State Department officials, and I quote:

It is our belief that the war is over.

Mr. President, I commend the U.S. administration for its restraint in not interfering in this border dispute between Somalia and Ethiopia. I also commend the Soviet and Cuban Governments for keeping their commitment not to cross an international frontier in the dispute between these two African countries.

While there has been considerable concern expressed in the United States about the Cuban and Soviet presence in Ethiopia, our State Department officials confirm that these forces have respected the Somalian-Ethiopian border. I think such restraint on the part of all the parties is most commendable. It has helped stabilize the situation in Africa and one can only hope that a similar pattern of restraint will characterize other tense situations on the African continent.

I ask unanimous consent that the news report in today's Newark Star-Ledger be printed in the RECORD.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

UNITED STATES REPORTS TROOP WITHDRAWAL—SOMALI-ETHIOPIA WAR IS OVER

WASHINGTON (Reuters).—Hostilities between Somalia and Ethiopia over the Ogaden Desert region have effectively ceased and the war in the Horn of Africa appears to have ended, State Department officials said yesterday.

Spokesman Hodding Carter told reporters that Ethiopia and supporting Soviet and Cuban forces were respecting the international border with Somalia as Somali forces withdrew from the Ogaden region.

He said the fighting died down in the past few days following Somalia's announced withdrawal from Ethiopia. "It is our belief that the war is over," officials here said.

The officials also disclosed that the United States would send a high-level emissary to Somalia shortly. They did not exclude the possibility that Assistant Secretary of State for African Affairs Richard Moose would lead the mission.

An aide to national security adviser Zbigniew Brzezinski, David Aaron, visited Ethiopia last month on a similar mission.

Cuba meanwhile publicly acknowledged yesterday for the first time that its troops fought with Ethiopian forces in the Ogaden Desert war.

An unprecedented detailed account of the Ethiopia-Somali conflict, published in a special edition of the official newspaper Granma in Havana, disclosed that Cuban pilots, tank crews and artillery units as well as armored infantry brigades took part.

Although the paper did not disclose the number of Cuban combatants involved, it indicated they took part in the most crucial phases of fighting.

It said the Cuban troops began arriving last December and January.

The United States has pressed the Soviet Union and Cuba to support a cease-fire and withdraw their military advisers, which now total 13,000 persons, from Ethiopia.

The Soviet Union is reported to have told the United States a substantial part of Cuba's 12,000 soldiers would leave if Somalia withdrew from Ethiopia and the fighting stopped.

Meanwhile, some Cuban forces were still reported en route to Ethiopia via sea routes.●

HEALTH SERVICES FOR RURAL AMERICANS

● Mr. LEAHY. Mr. President, I want to bring to the attention of my colleagues recent speeches by Senator DICK CLARK on the subject of rural health care.

Last Friday, Senator CLARK was to deliver a speech on "Health Services for Rural Americans." Because several crucial votes on the Panama Canal treaties occurred late in the day, he was unable to fulfill his speech commitment that evening in Des Moines.

Senator CLARK, who is chairman of the Senate Rural Development Subcommittee, described the recently enacted Rural Health Clinic Act, Public Law 95–210, within the speech. These remarks, and others on rural health issues generally, demonstrate his keen understanding of the proper Federal role in improving rural health.

Senator CLARK also spoke before the Senate Labor-HEW Appropriations Subcommittee yesterday on fiscal year 1979 funding of health programs that affect rural areas. Among the programs he discussed were community health centers, maternal and child health, home health, and comprehensive health grants.

Because Senator CLARK's comments on rural health may be of timely interest to other Members of the Senate, I ask unanimous consent that his speech and testimony be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

STATEMENT OF SENATOR CLARK

It's a privilege and a pleasure to join you today for this meeting of the Iowa Committee To Combat Huntington's Disease.

I'm particularly pleased that this organization is taking such a broad view of health care. You have combined a deep commitment to finding a cure and effective treatment for Huntington's disease, with an active interest in the issues of access to health services for the handicapped and non-handicapped alike.

Your concern for health needs generally is clearly demonstrated by your invitation to me to speak on rural health. While I know your primary interest is in the new Rural Health Clinics Act, I thought I'd open with a brief description of my views on rural health generally. This backdrop should lead me into the reasons for my drafting the Rural Health Clinics Act.

As Iowans all too well know, the type of medical care provided even 20 years ago is certainly a thing of the past. For one thing, our health needs have significantly changed. Many of the dreaded diseases that once afflicted so many children—polio and diphtheria, for example—have been nearly eradicated. Likewise, many public health hazards that shortened life considerably in the past have been significantly reduced.

The killer diseases of today reflect our changing lifestyles and therefore are related to our health habits—whether we smoke too much, eat and drink liquor in excess, exercise too little, and experience periods of emotional stress.

Just as a sidelight, it's interesting to note that the life expectancy for adults has not changed significantly in the last 20 years, precisely because medical advances have not done anything to affect the lifestyle factors I've mentioned.

This brings me to my next point—that progress in technology, medical science, communication, and transportation has dramatically altered the way medical care is delivered.

Young medical students are now exposed to a vast array of sophisticated machines and techniques that physicians a generation ago never even dreamed of. It's no wonder that today's medical students expect immediate access to up-to-date medical resources when they go out into the world to practice medicine.

And there's the crux of the problem for rural communities, and for rural States like Iowa. Physicians, by and large, are increasingly unwilling to practice medicine in areas that are remote from colleagues, from modern hospitals, from continuing medical education, and even from the type of social life that they experienced "in the big city."

Also, until very recently, we saw more and more medical students choosing specialities. They've been abandoning the type of medicine that brings them into direct contact with patients and with basic medical problems. Since specialists need a relatively large population base to support them, this trend also contributes to the concentration of physicians in the cities.

While Iowa is certainly more fortunate than other states—such as those in Appalachia and the deep south—we've had our share of problems in terms of physician supply. Through several sets of field hearings I've conducted in Iowa as chairman of the Senate Rural Development Subcommittee, we've discovered that:

First, 37 of the 99 counties in Iowa have actually lost primary care physicians in the past few years (1974–6); and second, 33—or one-third of the counties—have what many consider an insufficient number of primary care physicians. That is, there are more than 2,500 people for every physician in these counties.

Two qualifiers, however, before I proceed. First, there is nothing magic about county boundaries. A county that has a poor ratio of physicians to population may, in fact, be adjacent to another county whose doctors serve a wide geographic area. However, at the present time, this perspective is the best we have.

Second, the University of Iowa and several hospitals across the state have embarked on a highly-successful program to attract medical students to family practice, rather than to specialty care. While the program is relatively new and can only make a small dent in Iowa's physician supply in the near future, we've seen that these new family doctors tend to stay in Iowa, and moreover, that they tend to settle in small to middle-sized towns. This certainly is a welcome trend.

My own principal concern is for Iowa's small communities—those that have been losing doctors through death, retirement, or emigration. the trends I've mentioned earlier force these rural Iowans to seek care outside their own communities, to find some form of transportation to get to medical care, and, most probably, to postpone care until their health problems are serious.

While many contend that medical care must be concentrated in the cities, I completely disagree. Certainly, for the sake of quality and efficiency, it's important to regionalize the specialized forms of medical care in larger communities.

But my basic premise is that every community, no matter the size, should have some local entry point into the primary health care system. This means immediate access to locally-based routine medical services.

Unfortunately, several federal health policies conspire to restrict this type of access. One particular policy discourages communities from establishing small, satellite medical clinics that are staffed not by doctors, but by such health workers as nurse practitioners or physician assistants.

This medicare policy stated that only physicians could be paid for medical services, and furthermore, that unless there was "over-the-shoulder" supervision of nurse practitioners or physician assistants, reimbursement could only cover the services provided by the physicians.

So, small communities that attempted to establish satellite clinics—linked to physicians in larger towns—were frustrated in their efforts.

In early 1977, I introduced the rural health clinic bill, which contains these provisions:

First, medicare would pay for medical services furnished by rural health clinics;

Second, among the reimbursable services would be those performed by physician-supervised nurse practitioners and physician assistants;

Third, physicians would not have to provide "over-the-shoulder" supervision; and

Fourth, payment by medicare would be directly related to reasonable costs.

This legislation had substantial support within both houses and after some nine months of working its way through Congress, it was signed into law last December. The final version includes medicaid coverage as well as medicare coverage, and this will be most helpful for patients and clinics alike.

As you know, many rural areas are characterized by an older population—that uses medicare—and a relatively poor population—that uses medicaid. Since as much as half of a satellite clinic's patients use these two programs, this legislation should improve the financial status of these clinics.

I'm very pleased that the Department of Health, Education, and Welfare has been able to implement this new program in such a short time. As of March 1, clinics across the country, including five in Iowa (Tama County, 4-county Rathbun Lake area, Union County area, Lyon County, and Jackson County) are eligible for reimbursement under the Rural Health Clinics Act.

This new law should do more than correct a previous inequity in the Federal Government's health insurance programs. My hope is that it will encourage rural people to organize and establish rural health clinics where they are needed. The need is great, and it will only grow in the coming years.

I also would like to see these clinics become the focal point for a variety of health and health-related services that go well beyond the simple provision of medical care. Among these services should certainly be basic health care for the handicapped, and referral services so the handicapped can be led to the appropriate type of care.

Before I conclude, I'd like to also mention that Congress is moving ahead to re-authorize the existing programs that apply to Huntington's disease. In fact, just late last month, a bill which I co-sponsored, was introduced to accomplish this.

S. 2598—The National Genetic Diseases Act Amendments of 1978, continues an effort originally authorized in 1976 to provide screening, testing, counseling, and information and education services with respect to genetic diseases. In addition to extending this program for 3 years, S. 2598:

Including Huntington's chorea as one of the nine diseases that are specifically mentioned; and

Provides increased flexibility in funding, by authorizing Federal funds for State and local health departments, local community programs, as well as demonstration and pilot projects.

While it would not surprise you who are here today, the general public does not realize how susceptible it is to genetic diseases, nor does it know about the true nature of these diseases.

Each one of us carries from 5 to 8 defective genes, with a real potential for serious illness to our children and grandchildren. For this reason, genetic diseases like Huntington's Disease are the most widespread of all human afflictions, affecting an estimated 15 million Americans.

I was shocked to learn:

That 30 percent of hospitalized children have diseases of genetic origin;

That 40 percent of all infant mortality results from genetic factors; and

That 80 percent of all mental retardation in this country is genetically related.

Our nation cannot afford to postpone accelerated research and projects related to genetic diseases like Huntington's Disease. We owe it to ourselves and to future generations to expand the existing efforts, and I'm committed to this cause.

Thank you very much for this opportunity to chat about rural health, and I welcome your comments or questions.

TESTIMONY BY SENATOR DICK CLARK, BEFORE THE SENATE LABOR/HEW APPROPRIATIONS SUBCOMMITTEE, MARCH 15, 1978

Chairman Magnuson and members of the subcommittee, thank you for giving me the opportunity to speak with you today on Federal funding for health programs that affect rural areas.

Last month, I conducted a series of rural health hearings in Iowa, in my capacity as chairman of the senate rural development subcommittee. We focused on 5 federal health programs and their impact on the health of small town and rural Americans.

Each of these 5 programs—health planning, material and child health, home health, community health centers, and community mental health centers—is within the jurisdiction of your subcommittee.

I feel, therefore, that it's important to share with you what I learned through those hearings.

The overwhelming concensus of hearing participants was that existing health programs are extremely valuable.

At the same time, they felt that only a handful of the sick are being served. Moreover, the point was consistently driven home that limited funds have required a focus upon crisis care rather than on preventive or primary care.

In the brief time I have today, I'd like to talk specifically about the funding for community health centers, maternal and child health, home health services, and comprehensive health grants.

First, community health centers.

This program is designed to develop and support primary health care projects in both rural and urban medically underserved areas. The goal of the community health centers program is to provide all Americans with adequate access to comprehensive, high-quality health services.

Unfortunately, present funding levels make a mockery of this objective. Only about 10 percent of the 45 million medically underserved Americans are served by community health centers. Also, while 27 million, or about three-fifths of the medically underserved population resides in nonmetropolitan areas, only about one-third of the community health centers funds are going to rural communities.

Senator Schweiker, I know that you share my concern about this inequitable distribution of program funds between urban and rural areas. I want you to know that you have my full support in your efforts within the human resources health subcommittee and this subcommittee, to redress the imbalance. Your efforts will be especially timely, given the administration's fiscal 1979 budget, which would give rural areas less than half of the program's funds allotted for new clinics. This proposed allotment itself underscores the urban bias in funding health programs.

I'm particularly disturbed by the urban-rural maldistribution of health center funds, because of its recent impact in my own home State of Iowa. The only two Iowa applications for community health centers funds this year, both of which were endorsed by the regional H.E.W. Office, were subsequently denied funds. These denials were attributed to the low level of total program funding for rural centers.

We must not allow the Federal Government to continue to ignore the health needs of rural Americans. Therefore, we must insure that the community health centers program provides sufficient funds for rural projects, old and new.

I join Senator Schweiker in his call for:

Hold-harmless funding, adjusted for inflation, for on-going community health centers.

At least equal numbers of urban and rural people served by urban and rural new centers, respectively, and

A comparable level of services provided to patients served by urban and rural projects.

Rural citizens would be further assisted through the Rural Health Services Act of 1978, introduced today. This legislation provides communities with added flexibility to meet their identified health needs, and gives special emphasis to addressing environmental health problems.

Next, I'd like to discuss three programs that are funded by the Federal Government with money channeled through State governments: Maternal and Child Health; Home Health Services; and Comprehensive Health Grants.

A key discovery we made during the recent Iowa hearings was that money from these programs support the only available source of health care for many rural people. For many, public health nursing services supported by these programs mean the difference between a person's ability to stay in his own home and his being forced to enter a nursing home.

Maternal and Child Health program funds enable each State to promote the health of mothers and children and to reduce infant mortality and morbidity.

The Home Health Services program provides the necessary funds to initiate services to the elderly, the ill, and the handicapped at home, rather than in an institutional setting.

Comprehensive Health Grants to the State, what is also known as "section 314 (d) health revenue sharing funds", are made to State health departments to be used at their discretion. In Iowa, for example, the funds are primarily used to support ongoing county home health services.

These three programs are important for rural States like Iowa. They deserve increased levels of funding.

Mr. Norman Pawlewski, commissioner for health for the State of Iowa, underscored this point during the Iowa hearings. And I quote:

"There aren't enough funds, for example, in maternal and child health. We are only reaching a very small fraction of what we should be doing throughout the State. Of the target population, we are probably reaching about 11 percent."

His experience with the "314(d)" program was identical:

"The 314(d) funds have been quite beneficial in Iowa in helping to support public health nursing services, but the constant level of the appropriation has severely limited what can be accomplished in these years of inflation. . . . The lack of an increase . . . has had the effect of decreasing the amount of public health services that can be provided to rural Iowans with these funds."

I believe the following levels should be adopted for the next fiscal year:

For the maternal and child health program, I support the coalition for health funding proposal of about $400 million, an increase of $25 million over the President's request.

For the Home Health program, I urge you to set the funding at the $12 million level contained within Senator Kennedy's reauthorization bill.

For the Comprehensive Health Grants, I again support the level suggested by Senator Kennedy—$107 million.●

DEVELOPMENT OF ALTERNATIVE ENERGY SOURCES

● Mr. BAYH. Mr. President, over the past few months I have had ongoing discussions with the Department of Energy about the need to move aggressively ahead in developing the energy potential of our abundant and renewable domestic resources. Last October, 28 of my colleagues joined me in a letter to Secretaries Bergland and Schlesinger urging them to have their Departments undertake immediate and comprehensive efforts to tap the energy potential of the Nation's renewable resources.

In response to this congressional interest, the Department of Energy set up an Alcohol Fuels Task Force to reassess its alcohol fuel activities with a view toward a stronger, well-integrated, and near-term program. Under Secretary Myers was assigned responsibility for monitoring this group and informed me that the task force would complete its work at the end of January. In addition, the Under Secretary advised me that the Department shared my assessment about the potential offered by alcohol fuels to reduce petroleum consumption and help solve our energy supply problems.

In order to follow up on this Department effort, and encourage further coordination between the executive branch and the Congress, I scheduled and chaired a full day of Appropriations Committee oversight hearings on alcohol fuels at the end of January. Needless to say, I was looking forward with great interest to the results of the task force deliberations.

Unfortunately, the task force report was not made available to the committee at that time, although the Department assured me I would be receiving its recommendations for a revised program within a few weeks. This was to include a departmental position paper on alcohol fuels and a revised program plan with budget recommendations. This effort was to be integrated with the Department's ongoing national supply strategy study, designed to evaluate alternative synthetic fuel options and recommend strategies for stimulating commercialization of near-term substitutes for diminishing fossil fuels. The Department testified at the hearing that they were encouraged by the potential of alcohol fuels to become an important element of the national energy supply strategy. I ask unanimous consent that the Department's testimony be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. BAYH. Mr. President, I have just received the alcohol fuel task force position paper on alcohol fuels. The position paper contains no information beyond what the Department submitted in response to the Appropriations Committee oversight hearings which I chaired in January. Moreover, it was not accompanied by the revised program plan and budget information associated with it that the committee requested at that time. It does reflect a lack of effort, commitment and foresight with respect to this energy source, on the part of the Department, which I find disturbing. It also indicates that DOE has made no discernible progress on alcohol fuels since last fall when the task force was formed. I ask unanimous consent that this position paper be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 2.)

Mr. BAYH. Mr. President, last spring the President addressed the Nation to unveil his national energy plan. He emphasized the critical importance of an effective national energy policy and likened the effort needed to meet this challenge to the "moral equivalent of war."

I have been encouraged by the high priority placed by the President on resolving our energy problems, and supported most of his efforts strongly over the past year. However, a crucial ingredient missing from the President's national energy plan was an accelerated program for developing and introducing alternative energy sources—especially new liquid fuels—into our energy mix in a timely fashion.

The President himself, as well as other administration officials, has recognized that a liquid fuels crunch is soon in the offing, despite our temporary oil glut. It is hard to predict with certainty when world demand for oil will overtake production. However, President Carter and Secretary Schlesinger have predicted this is likely sometime in the 1980's.

Even with our best efforts to conserve energy, and curtail all nonessential uses of crude oil products, our economy and society will continue to require a reliable source of liquid fuels for the rest of this century. Right now, highway vehicles alone consume 40 percent of our petroleum-based energy. American drivers use 103 billion gallons of gasoline per year, or almost 1½ million barrels of crude oil per day.

Despite increasingly fuel efficient cars and trucks, and more widespread mass transit facilities, transportation needs will continue to make a major claim on our liquid energy supplies. The same can be said for other functions in our society that require liquid fuels, and will continue to do so, despite our best efforts at increased conservation and conversion. Peak load electricity generation and certain industrial processes will require liquid fuels well into the next century. Our farmers will need liquid fuels to run their farm equipment and get their crops to market. Residential and commercial uses will also demand their share.

We must move ahead, Mr. President, as other nations such as Brazil, Sweden, and Germany are already doing, to develop viable alternatives to petroleum to meet these needs. If we do not, our future looks very bleak indeed. Failure to act soon will consign us to even greater petroleum imports, already approaching 50 percent of our crude oil needs at a cost close to $45 billion per year, horrendous balance-of-payment deficits, further erosion of the value of the dollar, higher unemployment, increased dependence on unstable foreign suppliers, and very real threats to our economic well-being and national security.

Faced with these undesirable consequences, it is clear to me that we must start a concerted effort to develop new liquid fuels that can become commercially viable in the short run, which are plentiful or derived from renewable domestic resources and which can be used for a variety of purposes.

Alcohol fuel is one possibility that has been vastly underestimated, Mr. President, although it is within our reach in the relatively short term, without major disruptions to our economy and society.

I think it is clear to most of us, Mr. President, that there is not going to be one answer to our energy problem, but that future supplies will come from a number of sources. Those of us with responsibility for shaping Government policy owe it to the Nation to explore every option available to us as thoroughly as possible.

In its alcohol fuels position paper, the Department of Energy has raised a number of uncertainties with respect to alcohol fuels, particularly those derived from renewable resources. These uncertainties touch on supply potential, production cost, most appropriate applications, and best approach to achieve commercialization. In its descriptive summary of these issues, the Department expressed strongest concern about the supply potential and cost of alcohol fuels. It is clear from the discussion that these reservations are based on assumptions that are already obsolete. The discussion also demonstrates to me that DOE does not have the current in-house expertise, and perhaps not even the inclination, to approach these issues with much imagination or sophistication. I have no doubt that alcohol fuels can become efficient and economical energy supplements by the application of our best technology to the effort.

To give my colleagues some feel for how close we are to real breakthroughs, I ask unanimous consent to have printed at the conclusion of my remarks some of the testimony I received at the January 31 Appropriations Committee hearings. I include remarks by George Tsao, a constituent of mine doing research under DOE auspices, who is a professor of chemical engineering and food and agricultural engineering at Purdue University, and by Dwight Miller, assistant director of the ARS Northern Regional Research Center in Peoria, Ill.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 3.)

Mr. BAYH. Mr. President, technical and economic problems equally, if not more, complex than those faced with respect to alcohol fuels existed when the petroleum industry was in its infancy. The idea of drilling holes thousands of feet in the ground and transporting oil around the globe struck some people as absurd. But Washington was more than generous in the supports provided the oil companies before petroleum became a preferred fuel. The industry enjoyed import quotas, depletion allowances, intangible drilling deductions, and foreign tax credits; in fact, oil companies still derive some of their profits from these hidden subsidies.

Economic and technical barriers exist for virtually every synthetic fuel under serious consideration by the Department in its supply strategy study, despite the great amounts of money that have been poured into "hard" technologies such as oil shale and coal liquefaction. And the environmental problems associated with these potential energy sources are of serious concern. Given the relative neglect of renewable resources by the energy establishment to date, it is surprising that things have developed as far as they have.

Mr. President, the Department of Energy is barely 6 months old. It is still striving to put its house in order. Its technical strengths, not surprisingly, lie in areas that were in the main missions of the agencies from which it was formed. It has little in-house expertise, and few advocates, of the so-called soft technologies.

I will continue to work with the Department to strengthen its programs in these areas. To this end, I joined Senators BROOKE and DURKIN early this week in introducing an amendment to DOE's authorization bill to increase the Department's level of effort in the biomass area. I will move to fund these programs adequately when the appropriations bill is considered later this spring. I will also do my best to assure that the Department will use these resources to move aggressively ahead and not expend them on reinventing the wheel.

I have also sent Secretary Schlesinger a letter today indicating my dissatisfaction with the Department's progress to date, reiterating my request that the Department, in cooperation with the Congress, move ahead aggressively to develop alcohol fuels in an efficient and economical manner, and seeking his earliest assurances that DOE will meet its responsibilities in this area.

In all candor, Mr. President, I must say that watching the Department's efforts over the past few months has not been an encouraging exercise. I am more convinced than ever that the best way to insure steady progress in the alcohol fuels area is for the Congress to keep the Department's nose to the grindstone by commissioning ourselves the best possible talent available and putting it to work for us.

To this end I have introduced S. 2400, the National Alcohols Fuels Commission Act. To date, 17 of my colleagues have joined me in cosponsoring this legislation. Congressman ROE of New Jersey, who serves on the House Science and Technology Committee, has introduced companion legislation in the House.

This legislation will establish a new national commission, drawn from Members of the Congress and the public at large, to bring together a concentration of talent, expertise, and interest that currently does not exist, either in Congress or the executive branch. Such a study commission can focus exclusively on the issues still outstanding in a way that none of us here have the jurisdictional authority, time, or training to do. Such a body can provide the Congress with the information we need to move ahead intelligently in this area. In addition, by holding public hearings and drawing on the talents of citizens around the country, the Commission can coordinate efforts in this area, focus national attention on alcohol fuels, and foster public understanding and support for an alcohol fuels program.

The legislation mandates the Commission to make a full scale study of the long and short term potential for alcohol fuels, from biomass and coal, making a significant contribution to meeting the Nation's energy needs. Taking into account technical, economic, legal, environmental, and social factors associated with the manufacture, distribution, and use of such fuels, the Com-

mission will be responsible for evaluating the costs and benefits of alternative feedstocks, their possible end uses, and the feasibility and desirability of converting a variety of resources into alcohol fuels. Based on this study, the Commission is required to report to the Congress on its findings no later than December 31, 1980, and make recommendations as to what Federal policies, in the field of alcohol fuels, would most likely minimize our dependence on petroleum, insure adequate energy supplies where they are needed, encourage competition in the energy industry, and contribute to the economic health of the Nation.

The Commission will be comprised of 19 members, drawing from the membership of the relevant committees in both the House and Senate, as well as from the public. The President pro tempore of the Senate and the Speaker of the House of Representatives shall select the 12 congressional Members, with the President selecting 7 public members from a broad spectrum of industrial, labor, agricultural, and consumer groups. The Commission shall disband no later than 6 months after sending its report to the Congress.

I ask unanimous consent that the text of this bill be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 4.)

Mr. BAYH. Mr. President, I believe there are certain steps we can take right now to begin moving on this problem, without foreclosing important choices that must be made a little further down the road. As the session proceeds, I will be exploring various proposals with the Department, my colleagues, and other interested parties. At the same time I feel strongly that early passage of the National Alcohol Fuels Commission bill is necessary to assure that fuels from abundant and renewable resources are given the serious consideration that has not been forthcoming from the Department to date. I urge my colleagues to join me in this effort.

I am confident that a national alcohol fuels program can draw very broad based support from the American people, the business, farm, and scientific communities, and from those of us who serve them. The payoffs from a relatively small Federal investment now are potentially momentous. We are on the verge of developing a range of new energy technologies that will not only reduce our reliance on foreign sources of energy, but will give a boost to local economies all around the Nation. It is safe to say that alcohol fuels—ethanol and methanol—can be produced in virtually every State in the Union. Ethanol can be produced from such diverse sources as corn, wheat, milo, sugarbeets, sugarcane, potatoes, algae, and distressed crops and crop residues, as well as numerous other "energy crops" that our plant geneticists could doubtless develop if given the go-ahead. Methanol can be produced from forestry products, crop residues, wood and municipal wastes, and coal.

In sum, Mr. President, I believe that the development of alcohol fuels can make a major contribution to curbing oil imports while creating new uses for our most abundant domestic resources and helping depressed economies in different regions of the country. These fuels also have the potential to relieve urban areas of some of their waste disposal problems and budgetary drains by developing a new use for the byproducts of industrial and urban life.

EXHIBIT 1

STATEMENT OF LESLIE J. GOLDMAN

Mr. Chairman and Members of the Committee: This hearing of alcohol fuels is timely indeed; we have just last week received the report of a special Department-wide Alcohol Fuels Task Force set up in early December by Under Secretary Dale Myers in response to rising Congressional interest in the subject. Our response to the Congressional concern was a commitment to begin with a clean slate and to thoroughly reexamine the alcohol fuels question. The Task Force examined both the technical and the policy issues surrounding alcohol fuels, and completely redesigned the Alcohol Fuels Program Plan.

We are encouraged by the potential of alcohol fuels to become an important element of our national energy supply strategy. This strategy, currently being developed within the Department of Energy, is the key evaluation mechanism for all fuels options. The Alcohol Fuels Task Force findings and subsequent analyses will play a key role in the supply strategy development, which will lead to policy decisions on the commercialization potential of alcohol fuels relative to other non-petroleum based alternatives. We are developing a Departmental position paper on alcohol fuels, as well as a revised program plan. These will be completed and released within a few weeks.

The Task Force's findings can be summarized as follows:

1. Cost is still the major obstacle to commercialization of either methanol or ethanol. Methanol from coal or biomass (wood or agricultural wastes) appears the most promising, but costs about $5–9 per million Btu, depending on the cost of raw material inputs. Gasoline, by comparison, costs about $3.50/MMBtu at current oil prices, but these costs could rise significantly by the mid 1980's. Ethanol is more expensive, in the range of $13–$17/MMBtu using current technology. Several more promising technologies are the subject of intensive R&D.

2. On a technical basis, ethanol can be considered to be somewhat better than methanol because of its higher energy content, and its better phase stability and volatility in gasoline blends. But methanol is potentially more abundant because it can be made from coal; if practically all available farmland were used for crop plantings in excess of those required for food production, the ethanol produced from the crops and crop residues would satisfy about 8 percent of today's liquid fuel demands. Ethanol could play a major role in regional markets.

3. Preliminary tests have indicated alcohols are suitable fuels not only for internal combustion engines, but also for gas turbine peaking units, utility boilers, industrial heating, and fuel cells. For all the presently foreseen alcohol fuel applications, it appears that fuel supply costs rather than end-use technology will be the pacing factor in achieving widespread commercial implementation. This does not mean that no technological problems remain, but rather than those problems, such as engine starting in cold weather, can be overcome in a reasonable timeframe, certainly within the next five years.

4. Although the costs of existing alcohol production technologies are relatively well known, less is known about the potential economic benefits to be realized by reducing farm subsidies by utilizing surpluses, and by reducing municipal waste disposal costs.

5. Alcohol fuels technology has progressed to the point where a broader assessment of the commercialization potential is warranted.

The Task Force recommended that we initiate an accelerated alcohol fuels commercialization assessment program. The purpose of this immediate action program will be to analyze policy alternatives that would allow alcohol fuels to display a significant percentage of petroleum based fuels.

The needed analysis must include the following tasks:

Identify economic, employment, social and environmental impacts, including the effect of stabilizng farm commodity prices by utilizing surpluses, and reducing municipal waste disposal costs.

Determine the most suitable form (pure, blended, or converted to gasoline) for alcohol fuels used in the transportation, utility, industrial, and agricultural markets. This includes an assessment of various marketing and distribution strategies for both ethanol and methanol.

Assess the fiscal impacts on the U.S. Treasury of alcohol fuels use (e.g., motor fuel and excise taxes, farm subsidies).

Identify and assess policy instruments for inducing greater use of alcohol fuels:

Affecting prices; e.g., tax or subsidy programs;

Assuring a market; e.g., government purchase; mandatory blending of alcohol with various petroleum distillates, and mandatory accommodation of blends in new manufactured products;

Restricting methanol imports once domestic demand is established.

The Task Force also recommended that the technical R&D program on alcohol fuels be accelerated. The program will address improvements in biomass and coal conversion processes as well as in vehicular use of alcohol fuels.

At this time is appears that methanol made from coal or biomass is the most economical of the alcohol substitutes for petroleum based fuels. I would also like to underscore that fact that the facilities required for the production of methanol can be used for a number of other purposes in the event we should later elect not to go the methanol fuel route. For example, the methanol-from-coal plant could be modified to include the additional step of making high-octane gasoline, or the gaseous products produced at an intermediate step could be used directly, or to make ammonia for fertilizer. Thus, commitments to produce methanol-based fuels do leave us with some flexibility, since other fuel options could be phased in at a later date.

These accelerated commercialization studies will be coordinated with the development of the DOE's comprehensive energy supply strategy during the coming year. This major Departmental effort will be quite different from earlier ERDA studies which focused primarily on RD&D strategies for advanced technologies. In this broader framework we will assess the role of alcohol fuels and other options for increasing production of non-petroleum liquids. This effort will ensure that decisions to commercialize new technologies are not made in a piecemeal fashion. Upon completion of these studies we will be able to bring you a commercialization action program, and based on the work of the Task Force, I am hopeful that alcohol fuels can play a key role in our energy future.

The DOE is also addressing the regulatory problems that may inhibit current utilization of alcohol fuels for automotive fuels.

The Economic Regulatory Administration has just issued a temporary stay of its mandatory petroleum allocation and price regulations to allow gasoline retailers in Illinois to market gasoline-alcohol blends at a cost that reflects the alcohol component of the fuel. We are now working to develop a more comprehensive approach to alcohol fuel pricing that would be applicable to all states.

We expect our studies to answer a number of questions that are certain to arise during the current session of Congress. Therefore, we will make every effort to share our results with your committee staff as soon as they become available.

With me today are three technical experts from our alcohol fuels program office. They are Mr. Eugene Ecklund, who is intimately familiar with the detailed work of the Alcohol Fuels Task Force, Mr. Roscoe Ward from our biomass alcohols program and Mr. Brian Harney, who will answer questions relating to the production of methanol from coal.

EXHIBIT 2

U.S. DEPARTMENT OF ENERGY POSITION PAPER ON ALCOHOL FUELS

Ethanol and methanol are the alcohol fuels which are among the non-petroleum liquid fuel options which can be derived from resources available in abundance in the U.S. In addition to the alcohols, these options include: (1) petroleum-like hydrocarbon fuels from coal, oil shale, and biomass, and (2) in the far term, hydrogen.

Federal decisions on commercialization of any fuel option(s) could have significant far reaching and long term effects, domestically and internationally. It is important, therefore, that commercialization decisions be made only after all available options are compared and evaluated on a common basis to determine what option(s) best fit different national needs for different contingency conditions. The Supply Strategy Study, currently underway within the Department of Energy (DOE), serves as the key assembly and evaluation mechanism for all fuels options in this regard. The results of this study will lead to Federal policy decisions on commercialization of non-petroleum based fuels by January 1979. A newly initiated element of the DOE Alcohol Fuels Program (AFP), called the Immediate Action Element, will provide the alcohol fuels data needed for the Supply Strategy Study.

The DOE has been investigating the resource bases and end-use technology aspects of alcohols for several years. The technical advantages and deficiencies of alcohols as fuels are well understood. There appear to be no major technological barriers facing either production or distribution of alcohol fuels. Certain end uses, although not all, require virtually no modification to combustion engines where the alcohol is blended with petroleum derived liquid fuels. There are several major uncertainties which remain concerning alcohol fuel supply potential, production cost, most appropriate applications, and the best approach to achieve commercialization. Lastly, there is uncertainty regarding whether Federally provided incentives are needed to foster commercialization and, if so, the types to be employed.

To help resolve these uncertainties, a series of special studies has been incorporated into the overall DOE AFP as an Immediate Action Element to be conducted in parallel with the Supply Strategy Study. These special studies are structured to examine and help resolve key technological, economic, environmental, and institutional issues. The information supplied to the Supply Strategy Study from the existing data base and the special studies of the Immediate Action Element will contribute to a DOE decision on commercialization of non-petroleum liquid fuels to be made by January 1979. If the decision is made to promote rapid commercialization, specifically of alcohol fuels, implementation of the best method, as defined in the Supply Strategy Study, will commence. Also, at that time the current DOE AFP may be revised and expanded to encompass activities such as end use demonstrations.

The following paragraphs briefly describe the supply, utilization, and economic characteristics of alcohols and note the major issues associated with their implementation. Also described are the major elements of the current DOE AFP.

ETHANOL

About 93 percent of current industrial (non-beverage) ethanol production in the United States is based on synthesis from ethylene derived from petroleum and natural gas constituents. Fermentation of grains, fruit, and sulphite liquors accounts for the remaining 7 percent. As crude oil costs increase, the market share of fermentation alcohol will likely increase. Industrial ethanol manufacture amounts by volume to about one-third of 1 percent of the fuel used in highway vehicles (100 billion gallons of gasoline per year). Ethanol has about 66 percent of the heating value of an equal volume of gasoline, so the amount of energy that this volume represents is an even smaller fraction of that used. If all practicably available farmland were used for farm crop plantings in excess of those required for food production, the ethanol produced from the crops and crop residues would satisfy no more than 8 percent of today's total liquid fuels energy demand.

Ethanol prices[1] at the plant gate are estimated to be in the range of $1–$1.30 per gallon ($13.20–$17.10 per million Btu[2]). The current price of gasoline on a comparable basis is somewhat less than $0.40 per gallon ($3.50 per million Btu[1]) based on overall supply. Therefore, unless ethanol production is heavily subsidized for national security, political, or other reasons, it is not likely to be in commercial fuel use in large quantities because of the high cost alone. Research and development are being conducted to increase crop yields, reduce processing time, and utilize energy conservation and other approaches which would improve both energy use and economics, but it is not likely that these will give savings large enough to enable ethanol to complete nationally with other alternatives. However, production and utilization of ethanol on a regional basis may have merit.

METHANOL

Methanol is presently made almost totally from natural gas in the United States, thus new plants are expected to use different feedstocks. The most abundant domestic source of methanol in the future is coal through gasification to a synthesis gas and subsequent catalytic conversion. The process steps in going from coal to methanol are commercial and commercial size plants could be in operation within 5 years using essentially current technology. Methanol could also be produced from wood, agricultural residues, and municipal solid waste using the same general technical approach as for coal, but process details and economics are not as well defined and costs vary with feedstock. Programs in progress at DOE will more accurately define the process and economics of methanol production for these longer term approaches.

Present manufacture of methanol amounts by volume to about 1 percent of the fuel used in highway vehicles (about ½ percent of the energy used since the heating value of methanol is about half that of gasoline). The forecast is that methanol from coal will be significantly less costly than ethanol, i.e., a selling price at the plant gate of about $0.30–$0.50 per gallon ($5.25–$8.78 per million Btu[1]), depending upon such factors as feedstock price, rate of return on investment, and type of financing.

To provide some perspective on the magnitude of the supply problem, consider a reasonable buildup scenario for methanol from coal in which ten state-of-the-art plants would be constructed in the 1980–1990 time period. Each plant would be capable of producing approximately 6000 tons (1.9 million gallons) per day; the largest current methanol plant produces 2000 tons per day. This production capacity would provide about 5 percent of the expected energy demand for transportation-oriented gasoline by 1990. If one new plant per year of the same size came on stream during the 1990–2000 period, about 8–9 percent of the gasoline demand could be satisfied by 2000. The cost for plant construction alone would be about $450–500 million per plant, or about a $10 billion investment up to the year 2000.

Methanol from high-yield forestry biomass is projected to be in the same general price range as methanol from coal, even though the production facilities are expected to be smaller, more dispersed, and with a total supply less than that from coal. In addition, the technology for biomass gasification requires further development.

END-USE CONSIDERATIONS

Alcohols have been used as fuels in motor vehicles for over 60 years in many places in the world, generally in blends with gasoline or other petroleum products. Petroleum shortages, agricultural surpluses, or national independence have generally been the driving force behind such use of fuel alcohols, which has occurred despite the fact that the consumers had to pay a premium price. Ethanol has been the alcohol of choice in the past because of availability from fermentation of local agricultural products. On a technical basis, ethanol can be considered to be somewhat better than methanol because of its higher energy content (75,670 Btu per gallon compared to 56,560 Btu per gallon for methanol), and also better phase stability and volatility characteristics in gasoline blends. Although methanol has also seen limited engine use in the past as a racing fuel, recent interest has been due to potentially greater availability, lower cost than ethanol, and costs generally competitive with other synthetic fuels.

The DOE has been investigating the utilization of alcohol fuels in highway vehicles for several years, both as blends with gasoline for initial implementation and as straight alcohols in the longer term. Although several problems have been identified with both types of fuels, they are considered to be solvable through available engineering techniques.

Most of the end-use emphasis to date has been on internal combustion engines for vehicles but some preliminary tests have indicated that alcohols are suitable fuels for gas turbine peaking units, utility boilers, industrial heating, and fuel cells. Such applications are planned to be explored in greater depth in the future within the DOE alcohol program.

For all the presently foreseen alcohol fuel applications, it appears that the fuel supply problem rather than end-use technology will be the pacing item in achieving widespread commercial implementation.

MAJOR ISSUES

There are major issues concerning alcohol supply potential, production cost, regional versus national end-use applications, and whether or not the Federal Government should foster commercialization. Despite the general acceptability of alcohols as fuels, numerous potential resource bases, and a variety of potential end-use applications, these issues serve as barriers to commercialization and utilization. The most important

---

[1] All costs and prices herein are given in 1977 dollars.

[2] Based on lower heating value of fuel.

barrier is the fact that alcohols cost more than petroleum fuels. Methanol produced in large scale operations from non-petroleum resources may have a price comparable to current methanol manufactured from natural gas, but it would not be competitive with gasoline, at today's prices, on a dollars per Btu basis. In the case of ethanol, current and proejcted production prices based on fermentation of agricultural products are more than double those of methanol. On the other hand, ethanol from agricultural crops apparently has become cost competitive with industrial ethanol from petroleum.

Some non-energy issues have resulted in considerable interest in producing alcohols. Because of present grain surpluses, local or regional proposals to use ethanol from grain as a supplement to gasoline have raised the issue of the need for government tax and/or other incentives to offset the high cost of production. The desire to dispose of municipal solid waste and utilize forest and agricultural residues has resulted in still other proposals to produce and use methanol and ethanol on a small-volume localized basis.

THE DOE PROGRAM FOR RESOLUTION OF ISSUES

The DOE has a number of current activities directly related to the resolution of most of the above major issues. They include (1) the Alternative Fuels Utilization Program of Transportation Energy Conservation, (2) the coal gasification, methanol conversion, automotive test, and economic analysis projects of Fossil Energy, and (3) the agriultural and wood projects of the Fuels From Biomass Program of Solar Energy. In response to Congressional, DOE, and other concerns regarding the production and use of ethanol and methanol as liquid fuels, an expanded plan of action is being implemented to (1) remove uncertainties, and (2) provide information supportive of potential national decisions in this area. This Plan contains the following basic elements:

Immediate Action Elements: A series of special studies to examine and help resolve key technological, economic, environmental, and institutional issues that obstruct or cloud commercialization decisions. Planning for early end-use demonstration is included.

Alcohol Fuels RD&D Element: An expanded and integrated continuation of current DOE alcohol-related RD&D activities in the Conservation, Fossil Energy, and Solar Energy areas.

The DOE is currently conducting a fuels Supply Strategy Study. The special studies in the Immediate Action Element of the AFP will provide analyses of key issue areas for alcohol fuels to support the Supply Strategy Study. These special studies will examine the following aspects of alcohol fuels use: (1) resource availability, (2) economic, environmental, and social impacts, (3) end use applications, (4) Federal fiscal consequences, (5) industry incentives, and (6) policy instruments for price control, market assurance, and import control.

An output of the Immediate Action Element studies will be an evaluation of various techniques for facilitating the commercialization of alcohol fuels. For example, one such approach to be considered is a regulatory program requiring that a specified percentage of the U.S. liquid fuel demand be met with domestically produced alcohols or other synthetic fuels.

The information provided to the Supply Strategy Study from these special studies together with existing information will permit a comparison with other liquid fuel options and result in a DOE decision on commercialization of alcohol fuels to be made by January 1979. Based on the policy selected, firm decisions can be made at that time as to (1) whether or not the current Alcohol Fuels RD&D program elements requires modifications, and (2) what additional program elements should be initiated, if any.

While these special studies are in progress, current programs will be expanded to (1) inform the U.S. public and industry on various aspects of the use of alcohol fuel in passenger cars and other applications, (2) improve the technology for conversion of renewable biomass via fermentation and gasification techniques (3) perform mission analyses and system studies to assess market potential, (4) cooperate with the USDA in implementing the Food and Agriculture Act of 1977, and (5) cooperate with various state and local programs involving the production and/or use of alcohol fuels.

TIME FRAME CONSIDERATIONS

In the near term (by 1985), alcohol fuels are not likely to be extensively used on a commercial basis in the absence of new Federal initiatives because (1) the production costs of alcohols are much higher than those of gasoline, (2) there is insufficient production capacity with which to supply such fuels, and (3) there is no ready end-use market and support infrastructure. Limited use may occur in local areas where the fermentation of surplus grain to ethanol is subsidized by tax credits and loan guarantees for new plant construction.

Therefore, the DOE Alcohol Fuels Program is structured to (1) help resolve the many issues associated with commercialization of alcohols, (2) help establish a National policy regarding alcohol fuel production and use, and (3) demonstrate selected production and end-use technologies which would permit and facilitate a rapid implementation of alcohol fuel production and use if it should become National policy to do so (for reasons other than traditional marketplace economics).

EXHIBIT 3

UTILIZATION OF GRAIN AND CROP RESIDUES FOR THE PRODUCTION OF FUEL AND CHEMICALS

(By George T. Tsao)

In order to provide a brief technical background, two common chemical terms are first introduced. They are "polymer" and "monomer". A polymer molecule is made of many monomeric units chemically connected together. The words "poly-ethylene" and "ethylene" illustrate how, in chemistry, polymers are named with respect to their specific monomers. Starch is a natural polymer that exists in nearly all agricultural grains including corn, wheat and others. The monomeric unit of starch is called anhydroglucose. Glucose is also known as dextrose and is even better known as grape sugar because glucose is the sugar in grape juice. In wine making, it is glucose that is fermented by yeast into alcohol. A molecule of starch which may also be called polyglucose is illustrated by the diagram in Figure 3 where each letter "G" stands for a glucose unit. One might say that this starch resembles a tree with many branches. The connecting bonds between adjacent glucose units in a starch molecule in this particular state can be considered quite exposed and thus can be easily broken to produce many glucose monomers. In making grain alcohol from corn, starch is first converted to glucose which is then fermented by yeast to produce alcohol.

The table in Figure 4 gives approximate conversion ratios between the tons of alcohol one can produce from the number of bushels of corn consumed in grain alcohol production. At the bottom of this figure, the approximate tonnage of petroleum crude oil consumption of this country is also listed for comparison. These numbers should indicate that grain alcohol should help to reduce our dependence on foreign petroleum if alcohol is used as a liquid fuel in what is called "gasohol", but there is really not enough corn to make a very significant quantity of alcohol as a liquid fuel because the total annual corn harvest of this country is about 6.3 billion bushels weighing about 180 million tons.

Adding all other major agricultural crops including wheat, sorghum, etc., the total annual production is about 355 million tons shown in the table in Figure 5. This table also gives the figure of some one billion tons of cellulosic wastes available annually in this country, which is actually larger in tonnage than that of petroleum crude oil. In this one billion ton figure, included are cornstalks as opposed to corn grain. It includes bagasse and pulp from sugar mills. It also includes sawmill wastes and small limbs and tree branches from forests. It also includes industrial wastes and big city trash. Some of these materials are readily available and some of them need to be collected obviously at a cost. The common characteristics of all these materials is the fact that they all contain the component called cellulose. Cellulose, like starch, is also a polymer, and its corresponding monomer is also the anhydroglucose unit. Cellulose and starch can both be called "polyglucoses" (Figure 6). Unlike starch, however, cellulose is generally difficult to be converted into glucose. Cellulosic materials are of strong and orderly structures that protect cellulose from being broken down into glucose. The following several figures are to illustrate these structures. Shown in Figure 7, is a model of folded ribbon for a molecule of cellulose polymer. It does not have branches like the one shown previously for starch. A folded ribbon forms a "plate", and as shown in Figure 8, several plates on top of one another form an elementary structure unit, each of which has a more or less square cross section. In Figure 9, each of the small squares represents one elementary structure unit. In this figure, 16 small squares are shown to form a higher level of structure unit and 64 squares in total to form a yet still higher level of structure unit which is surrounded by a material called lignin represented by the small crosses. Shown in Figure 10, are plant cells that together form a piece of a woody or cellulosic material. The inner hexagonal shaped space on the left half of this figure is full of plasma when the cells are young. When the cells become old, liquid dries up and this inner space becomes hollow. Practically all cellulose of a plant material is contained in the space in between the two, inner and outer hexagons. This is the cell wall. On the right side of this figure, an enlarged diagram is showing that the cell wall can be further separated into a primary cell wall p and three distinguishable layers of secondary cell wall S_1, S_2, and S_3. Cellulose exists in these cell walls. In between the cells and surrounding the cell walls is a region called middle lamella which is again made of mostly lignin. Thus, lignin surrounds and thus again protects cellulose at this high anatomical structural level. From the few diagrams in these figures, one should be left with the impression that (1) cellulose has orderly structures and (2) lignin protects cellulose by surrounding it. Indeed, as summarized in Figure 11, these are the two major obstacles to converting cellulose in order to obtain glucose.

The idea of obtaining glucose from cellulose is not new and technologists have tried for over 50 years. Recently, we at Purdue University have worked out a new process which gives 100% yield of glucose from available cellulose at a low cost. As diagrammed in Figure 12, a solvent A is first used to remove the third major component of cellulosic materials, besides cellulose and lignin, called hemicellulose. The solid residue containing cellulose and lignin is then treated with another solvent B which dissolves cellulose but not lignin. This approach which is

simple in concept will obviously remove the two major obstacles to cellulose conversion as described by the structure diagrams in the last several figures. As shown in Figure 13, the cellulose dissolved in solvent B can be made to re-precipitate by mixing with water. Solvent B is to be recovered for recycle and the re-precipitated cellulose which is by now no longer protected by lignin and has no strong and orderly structure can be easily converted to give 100% yield of glucose.

In summary, as shown in Figure 14, from both starch in grain and cellulose in crop residues, glucose can be derived. Glucose can be fermented by yeast to produce alcohol and can also be processed to produce many chemicals replacing petroleum. From a ton of grain corn, about three tenths a ton of alcohol has been produced. With the new treatment technique involving solvents, one can potentially produce up to four tenths a ton of liquid alcohol from a ton of dry cornstalks. The work at Purdue University has been supported by the university administration, by previously AEC, then ERDA and now DOE and also by the National Science Foundation. For this generous support, I am very grateful. We at Purdue University are now at a stage of continuing our laboratory research. We are seeking for funds to study our process on a somewhat larger scale. There are several technical tests which cannot be meaningfully done in test tubes and laboratory scale glassware. If we are given a grant of 1.5 million dollars, we can complete the process research on a pilot plant scale in about two years, after which we will have data for detailed economic and energy analysis and for designing production scale factories. We need another 1.0 to 1.5 million dollars to study problems such as the techniques of collecting, compacting and transporting cellulosic materials, re-designing the necessary farm machineries, agronomy and soil research, and the potential long term and short term economical impact.

Based upon our laboratory results, a crude cost analysis was made for the process of conversion of cellulosic wastes to glucose and fermentable sugars. The results are based upon a cost of $30 per ton of cornstalks purchased from farmers. With our treatment techniques, we believe that we can produce crude grade glucose at about 1.8 cents per pound which will mean that alcohol can be produced at about 74 cents per gallon.

Some of the cellulosic wastes such as urban trash and animal feedlot wastes actually have a negative values and thus do not cost $30 per ton to collect. Some of the other wastes such as bagasse from sugarcane are already collected at sugar mills. They are currently burnt for heating value. Because of its high moisture content, the heating value is low and is worth only about $7.50 per ton for direct burning. Using a more optimistic approach by assuming no cost instead of $30 per ton for the cellulosic raw materials and a reasonable return on selling the yeast byproduct from alcohol stillage, one can then come up with an even more attractive cost figure for alcohol production at about 40 cents per gallon.

Alcohol is only one of many products that can be made from glucose. The table in Figure 15 is a partial list of additional products that can be derived from glucose. Some of these are direct consumer products and some of these are industrial intermediates which in turn can be processed into even a larger number of products. From the other two major components of cellulosic materials, namely hemicellulose and lignin, one can also make a large number of petroleum soaring products. These are illustrated in Figure 16, and Figure 17. Indeed, if we have to, complete processing industries can be developed based upon the ultimate raw material, cellulosic materials, which is a valuable renewable resource.

Finally, I would like to share with you a brief discussion I had with an Indiana farmer. With the depressed prices for corn and other farm products in current market, farmers will be happy to obtain $30 per ton for their crop residues such as cornstalks. For instance, our national average of corn harvest is about 80 bushels per acre. At $1.50 per bushel of current price, this yeilds a gross income of only 120 dollars per acre. For each acre of corn field, there is a yield of two to three tons of cellulosic residues per year. Saving a portion of the residues for soil conditioning, in average, one can remove about one ton of crop residues per acre per year from our farms. This ton of residue will yield an extra gross income of $30 per acre per year which is substantial. The "land set aside" program costs our government large sums of tax money. The acreage can be used for producing cellulosic materials sold at $30 per ton. My farmer friend told me that, for an acre of land, if he plants alfalfa he can harvest about 7 tons of dry cellulosic materials contained per year. At $30 per ton, this can give him a better income than planting corn. The wet, freshly harvested alfalfa, if pressed immediately, can produce a juice which contains high quality protein as a byproduct. The fibrous residue after juice removal is where the cellulose is. Furthermore, alfalfa has the capability of fixing nitrogen from atmosphere. If farmers rotate their crops between alfalfa and corn, they can save on the nitrogen fertilizer. Corn, unlike soybean and alfalfa, has no nitrogen fixation capability and requires heavy application of ammonia as its nitrogen source. In average, one third of the energy consumption in farming of corn is for producing the necessary nitrogen fertilizer, ammonia. The energy consumption for this is equivalent to 26 gallons of gasoline per year per acre of corn. My farmer friend does not have answers to all my questions, but he has certainly pointed out the need for much integrated research for both food and energy production. Our country is blessed with the largest and the richest land mass in the world. It is a shame to all of us, today we will pay our farmers for not farming their land; while we spend tens of billions of dollars every year to buy foreign oil. We should all ask ourselves how long can this country afford to let this go on.

STATEMENT OF DWIGHT L. MILLER

Mr. Chairman, I am Dwight L. Miller, Assistant Center Director, Northern Regional Research Center of the U.S. Department of Agriculture in Peoria, Illinois. I am a chemical engineering graduate of the University of Illinois and had over 20 years' experience in the fermentation and chemical industries before joining the Department of Agriculture about 19 years ago. The program at our Center includes research on corn, wheat, grain sorghum, and other cereal grains. About 30 years ago the Center had an extensive research program on agricultural residues and ethyl alcohol fermentation. Research expertise and some of the facilities from this program still exist and the program could be renewed with minimal delay.

In the past few years, we have had increasing interest and inquiries concerning the production of ethyl alcohol and its use in motor fuels. In response, I prepared a series of technical reports and studies about ethyl alcohol and residues and have participated in many conferences on these subjects. Some highlights of these studies will be presented. I will then be pleased to answer questions relating to the technical processes and use of alcohol.

Ethyl alcohol is produced in the U.S. by two major procedures—fermentation and chemical synthesis. For many years, practically all U.S. industrial ethyl alcohol has been manufactured synthetically from petroleum and natural gas because of economic favorability. However, all beverage alcohol continues to be produced by the fermentation of cereal grains, molasses, and other materials with high starch and sugar content. It is technically possible to produce fermentation alcohol from practically any raw material high in carbohydrate and from high cellulose materials such as wood, crop residues, and cultivated biomass crops.

Corn and sugar byproducts (molasses) have been the major fermentation raw materials for ethyl alcohol because of their high carbohydrate content and relatively lower costs. Wheat and other agricultural materials have, at times, been used. For example, during World War II (1942–45) when ethyl alcohol need was critical for synthetic rubber production and cost was less important about 250 million bushels of wheat were used for alcohol production. The alcohol yield from all these materials is theoretically in direct ratio to the contained starch and sugar per unit weight. In actual practice, the chemical and physical properties of each natural raw material has some effect. Chemically, fermentation and synthetic alcohols are practically the same.

Distillers grains are an important byproduct when cereal grains are used as the raw material. These byproduct grains contain practically all of the original ingredients, except the starch or sugar, which was converted to ethyl alcohol. These distillers grains (dry basis) have a protein content of 20–30 percent, depending on the type of original whole grain, its composition, and the recovery processes used. The byproduct is a protein concentrate for animal and poultry feed mixes.

Recovery and marketing of approximately 6.5 pounds of byproduct distillers grains that are produced per gallon of fermentation alcohol, is important to the overall economics of grain alcohol production. A credit of over $0.30 per gallon of alcohol can be obtained from the byproduct grains alone (at $100 per ton). Effects of such a new large quantity of protein byproduct on the current animal feed markets have not yet been resolved. If a lower credit is received, alcohol cost would be higher.

Ethyl alcohol as a component in world motor fuels is not new. Limited amounts have been used in the U.S. The best blend, according to present knowledge, should contain at least 10 percent alcohol (by volume) to prevent handling and separation problems, and anhydrous alcohol is usually required. Lower proportions and less pure alcohol might be possible, but would probably necessitate more expensive carburetor systems and some engine modifications.

A basic deterrent to use of alcohol motor fuels has been unfavorable economics. Approximately 2.5+ gallons of anhydrous alcohol can be produced from a bushel of most cereal grains. Annual U.S. consumption of motor fuel is over 100 billion gallons. Thus, a 10% fermentation alcohol blend would indeed have major impact on U.S. agriculture. This is probably the largest new potential industrial market for such agricultural materials as cereal grains that is known at this time.

Alcohol fuel blend costs depend on many factors, including grain prices, conversion costs, byproduct feed values, profits, and other expenses. Typical grain prices versus alcohol cost are shown in the included table. (In all cases, the costs do not include allowances for profit, packaging, and sales expenses.) It is evidence that basic fermentation alcohol cost is currently more expensive than the refinery price of gasoline.

Thus, we can report with confidence that the fermentation production of ethyl alcohol is possible from a technical standpoint; and the alcohol is suitable for industrial pur-

poses, for use as a motor fuel additive, or for use in beverages. However, for several decades, without financial support it has not been economically feasible in the United States to produce fermentation ethyl alcohol for industrial or motor fuel purposes in competition with synthetic alcohol. This situation may change soon for industrial alcohol because of escalating synthetic raw material costs. Factories to produce *large* volumes of alcohol from cereal grains for nonbeverage uses do not now exist. New installed factories must operate essentially continuously even during periods of grain shortages; it would not be economically feasible to operate them only when there is a surplus of cereal grains.

From an energy balance consideration, more energy is required at the distillery to prepare the grain, ferment it, recover the alcohol, and recover the byproducts than there is in the alcohol produced. The energy used for this conversion in existing plants is supplied by such fossil fuels as coal, gas, and oil.

The foregoing discussion has been primarily concerned with the production of ethyl alcohol from grains and sugar crops by fermentation. Many types of renewable plant materials can be converted to useful forms of stored energy such as alcohol and gases or burned directly for energy. We are confident that through Department of Agriculture research these resources can be developed to significantly contribute to our Nation's future energy requirements. For example, broad programs include plant materials selection; production of biomass; conversion of biomass to energy products; efficient use of energy products and processing byproducts; and production of products that release other materials for more efficient uses. Specific research approaches might include the following examples:

FOR ALCOHOL

Improved energy efficiency for alcohol production through improved substrate processing.

Development of new yeasts and fermentation conditions that produce more alcohol in a shorter time.

Improve energy efficiency for alcohol production through new alcohol distillation techniques and valuable byproduct grains recovery systems.

Processing of lower quality and distressed grains into alcohol and quality grain residues.

Production of alcohol and other chemicals from such alternative substrate byproducts as straw, corn stalks, and other residues high in cellulose.

Utilization of agricultural byproducts and residues for energy, food and feeds, and manufacture of such materials as paper, fiberboard, and plastic fillers.

FOR BIOMASS

Systematic screening of present-day crops and other plant species to identify those with potential for high biomass productivity.

Development of agricultural practices and techniques to maximize biomass production.

Development of required transportation, storage, and processing systems for the use of plant biomass in energy production.

Investigative on-farm or small community production of energy from biomass.

Development of on-farm uses of energy from biomass sources.

The nucleus of facilities and scientific expertise around which a broad program involving these approaches might be built is already in existence at the Northern Regional Research Center, and certain other public research agencies. A multifaceted research effort could be initiated soon after the necessary funds and authorizations were received.

Effect of corn cost on ethyl alcohol cost

[Basis: 2.7 gallon 200° proof alcohol/bushel]

Corn price/bushel	Alcohol cost/gallon, cents		
	Corn	Conversion [1]	Total base cost [2]
$1.50	55.5	25.4	80.9
1.75	64.8	25.4	90.2
2.00	74.0	25.4	99.4
2.25	83.3	25.4	108.7
2.50	92.6	25.4	118.0
3.00	111.0	25.4	136.4
3.50	129.5	25.4	154.9
4.00	148.4	25.4	173.8

[1] Byproduct grains credited at $100/ton in conversion cost.

[2] These costs do not include profits, packaging, and sales expenses (1976).

EXHIBIT 4

S. 2400

A bill to establish a National Alcohol Fuels Commission, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "National Alcohol Fuels Commission Act".

ESTABLISHMENT OF COMMISSION

SEC. 2. (a)(1) There is hereby established a Commission to be known as the National Alcohol Fuels Commission, hereinafter referred to as the "Commission".

(2) The Commission shall make a full and complete investigation and study of the long- and short-term potential for alcohol fuels, from biomass (including, but not limited to, animal, crop and wood waste, municipal and industrial waste, sewage, sludge, and oceanic and terrestrial crops) and coal, making a significant contribution to meeting the Nation's energy needs. It shall take into consideration the technical, economic, legal, environmental, and social factors associated with the production, manufacture, distribution, and use of such fuels. It will evaluate the costs and benefits of alternative feedstocks, and their possible end uses, and analyze the feasibility and desirability of converting these resources to alcohol fuels. Based on such study it shall recommend those policies, and their attendant costs and benefits, most likely to minimize our dependence on petroleum, insure adequate energy supplies, encourage competition in the energy industry, and contribute to the economic health of the Nation.

(3) Such Commission shall be comprised of nineteen members as follows:

(A) six members appointed by the President pro tempore of the Senate from the membership of the Committee on Energy and Natural Resources, the Committee on Appropriations, and the Committee on Agriculture, Nutrition, and Forestry of the United States Senate;

(B) six members appointed by the Speaker of the House of Representatives from the membership of the Committee on Appropriations, the Committee on Science and Technology, and the Committee on Agriculture of the United States House of Representatives; and

(C) seven members of the public appointed by the President, including a broad representation from industrial, labor, agricultural, and consumer groups.

(c) The Commission shall not later than December 31, 1980, submit to the President and the Congress its final report including its findings and recommendations. The Commission shall cease to exist six months after submission of such report. All records and papers of the Commission shall thereupon be delivered to the Administrator of General Services for deposit in the Archives of the United States.

(d) Such report shall include the Commission's findings and recommendations with respect to—

(1) the long and short term potential of alcohol fuels making a contribution to reducing reliance on both foreign and domestic petroleum.

(2) the relative costs and benefits of developing alcohol fuels from alternative feedstocks, taking into account technical, economic, legal, environmental, and social factors associated with their production, distribution and use; their most appropriate end uses; and a recommended time frame for their introduction into the Nation's energy mix;

(3) the existing policies and programs of the Federal Government which affect the development of such alternative fuels; and

(4) new policies and programs required to develop alcohol fuels from coal and alcohol and other fuels from the biomass to meet the Nation's projected short-term and long-term energy needs.

(e)(1) The Chairman of the Commission, who shall be selected by the President pro tempore of the Senate, in consultation with the Speaker of the House of Representatives, shall request the head of each Federal department or agency which has an interest in or a responsibility with respect to a national alcohol fuels policy to appoint, and the head of such department or agency shall appoint, a liaison officer who shall work closely with the Commission and its staff in matters pertaining to this section. Such departments and agencies shall include, but not be limited to, the Department of Energy, the Department of Agriculture, the Department of Transportation, the Environmental Protection Agency, the Department of the Interior, the Department of Justice, the Department of the Treasury, and the Small Business Administration.

(2) In carrying out its duties the Commission shall seek the advice of various groups interested in a national alcohol fuel policy including, but not limited to, State and local governments, public and private organizations working in the fields of alternative fuel development, industry, labor, and the environment.

(f)(1) The Commission or, on authorization of the Commission, any committee of two or more members may, for the purpose of carrying out the provisions of this section, hold such hearings and sit and act at such times and places as the Commission or such authorized committee may deem advisable.

(2) The Commission is authorized to secure from any department, agency, or individual instrumentality of the executive branch of the Government any information it deems necessary to carry out its functions under this section and each department, agency, and instrumentality is authorized and directed to furnish such information to the Commission upon request made by the Chairman.

(g)(1) Members of Congress who are members of the Commission shall serve without compensation in addition to that received for their services as Members of Congress; but they shall be reimbursed for travel, per diem in accordance with the rules of the Senate, or subsistence, and other necessary expenses incurred by them in the performance of the duties vested in the Commission.

(2) Members of the Commission, except Members of Congress shall each receive compensation for such periods of time as they are engaged in the business of the Commission at a rate not in excess of the maximum rate of pay for GS–18 as provided in the General Schedule under section 5332 of title 5, United States Code, and shall be en-

titled to reimbursement for travel expenses, per diem in accordance with the rules of the Senate, or subsistence and other necessary expenses incurred by them in performance of duties while serving as a Commission member.

(h)(1) The Commission is authorized to appoint and fix the compensation of a staff director, and such additional personnel as may be necessary to enable it to carry out its functions. The Director and personnel may be appointed without regard to the provisions of title 5, United States Code, covering appointments in the competitive service, and may be paid without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates. Any Federal employees subject to the civil service laws and regulations who may be employed by the Commission shall retain civil service status without interruption or loss of status or privilege. In no event shall any employee other than the staff director receive as compensation an amount in excess of the maximum rate for GS–18 of the General Schedule under section 5332 of title 5, United States Code. In addition, the Commission is authorized to obtain the services of experts and consultants in accordance with section 3109 of title 5, United States Code, but at rates not to exceed the maximum rate of pay for grade GS–18, as provided in the General Schedule under section 5332 of title 5, United States Code.

(2) The staff director shall be compensated at level II of the Executive Schedule in subchapter II of chapter 53 of title 5, United States Code.

(3) The Director and Commission personnel shall be reimbursed for travel, per diem in accordance with the rules of the Senate, or subsistence, and other necessary expenses incurred by them in performance of duties while serving the Commission staff.

(i) The Commission is authorized to enter into contracts or agreements for studies and surveys with public and private organizations or consultants, and, if necessary, to transfer funds to and accept funds from Federal agencies from sums appropriated pursuant to this section to carry out such of its duties as the Commission determines can best be carried out in that manner.

(j) Any vacancy which may occur on the Commission shall not affect its powers or functions but shall be filled in the same manner in which the original appointment was made.

(k) Subject to the provisions of the Federal Advisory Committee Act, the Chairman may appoint advisory committees to aid in the work of the Commission.

(l) The Commission is exempt from the requirements of section 4301 of title 5, United States Code.

(m) There are authorized to be appropriated such sums as may be necessary to carry out the purposes of this Act.●

THE RECORD OF SOVIET COMPLIANCE WITH PROVISIONS OF SALT I

● Mr. SPARKMAN. Mr. President, on February 28, I inserted in the RECORD for the use of my fellow Senators a report to the Committee on Foreign Relations on the record of Soviet compliance with the provisions of the SALT I ABM Treaty and interim agreement limiting strategic offensive arms.

This report, which represented the coordinated views of the executive branch, indicated that there have been questions raised about Soviet compliance and that those questions have been resolved to the satisfaction of the executive branch. Significantly, neither the last two American Presidents nor President Carter has seen fit to charge the Soviet Union with violating the SALT I Treaty and interim agreement. On balance, the evidence is that the Soviet Union has not acted in bad faith.

At about the time this report was received, yet another charge of Soviet cheating was raised—first in the February 27 issue of Aviation Week and Space Technology magazine, and later in other publications. These reports allege that the Soviet Union is now operating 64 ballistic missile submarines instead of the 62 limit specified in the interim agreement.

At a meeting on March 1 with the Honorable Paul C. Warnke, Director of the Arms Control and Disarmament Agency, the Senator from Iowa (Mr. CLARK) asked Mr. Warnke to respond for the record to the charge made in this magazine article. The committee has received a response from the Honorable Spurgeon M. Keeny, Jr., Acting Director of the Agency, which states,

We have no evidence that the Soviets have deployed any modern SLBM submarines beyond the 62 limit as of this date.

I ask unanimous consent that the full text of Mr. Keeny's letter to me be printed in the RECORD following my remarks.

Mr. President, I consider any charge of Soviet violation of the interim agreement to be a very serious matter. I am glad to be able to make available this reassuring response to the charge in regard to Soviet submarines. It is important that those passing judgment as to possible Soviet violations of SALT agreements take particular care that their sources of information be accurate. Clearly, any violation by the Soviet Union of the SALT I ABM Treaty and interim agreement—or of any future strategic arms agreement—could jeopardize our national security and bring an end to the SALT process. We must also realize, however, that erroneous charges of violations could jeopardize our ability to achieve a new SALT II agreement in the national security interests of the United States.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. ARMS CONTROL
AND DISARMAMENT AGENCY,
Washington, D.C., March 9, 1978.

Hon. JOHN J. SPARKMAN,
Chairman, Foreign Relations Committee.

DEAR MR. CHAIRMAN: At the March 1 Committee hearing on SALT, Senator Clark requested a response by ACDA for the record to an allegation that the Soviets now have operational 64 ballistic missile submarines in violation of the 1972 SALT Interim Agreement's limit of 62. This letter is a response for the hearing record to Senator Clark's question.

Although the Interim Agreement expired last October, the United States and the Soviet Union have both stated that they would not take actions inconsistent with its provisions while productive negotiations on a SALT TWO Agreement continue. The Protocol to the SALT ONE Interim Agreement limited the Soviet Union to no more than 62 modern ballistic missile submarines. An Agreed Statement associated with the Interim Agreement indicates that new modern SLBM submarines will be counted at the time of the beginning of sea trials. We have no evidence that the Soviets have deployed any modern SLBM submarines beyond the 62 limit as of this date. Additional SLBM submarines are under construction, but have not yet commenced sea trials.

Sincerely,

SPURGEON M. KEENY, JR.,
Acting Director.●

EXPERTS ASSESS NATIONAL INFANT SCREENING ACT

● Mrs. HUMPHREY. Mr. President, on February 28, I introduced, with Senator ANDERSON, the National Infant Screening Act (NISA) to provide for a national program of screening of newborn infants for metabolic disorders that can cause mental retardation.

I tried very hard to develop an approach that would be generally acceptable and compatible with existing programs at both State and national level, yet would provide the added stimulus required to make the benefits of multiple screening available to families throughout our Nation.

There are so many persons who have been active in this field for years and who understand better than I the necessary elements of a national policy. It is therefore with satisfaction that I share with you a favorable reaction from Dr. Franklin C. Smith of Minneapolis, who worked for many years to promote mandatory testing for PKU in Minnesota, and Dr. George C. Cunningham, chief of the genetic disease section of the Department of Health of the State of California.

Dr. Cunningham also makes some astute observations about cost estimates for such screening. This correspondence makes a substantial contribution to debate of NISA and deserves the full consideration of my colleagues.

Mr. President, I ask unanimous consent that Dr. Smith's letter and relevant excerpts from Dr. Cunningham's letter be printed in the CONGRESSIONAL RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

I have had an opportunity to review Mrs. Muriel Humphrey's comments on Infant Screening for Metabolic Disorders and her proposed National Infant Screening Act of 1978 and would like to submit for your consideration the following comments.

As director of one of the largest and most comprehensive State genetic programs, I have followed developments in this field for several years. Enclosed for background information is a summary of our current program.

As Mrs. Humphrey observed, the passage of a law is only the first step in actually providing screening services. The Comprehensive National Sickle Cell, Cooley Anemia, Tay Sachs and Genetic Disease Act illustrates this fact. The failure of HEW to expeditiously publish regulations and commit funds and the failure to provide sufficient funds have frustrated legislative intent. We have experienced similar difficulties in California. I would urge you to do whatever you can to see that these moneys are rapidly committed.

I also feel that a defect of the National Genetic Disease Act is that it will not provide funds for mandatory programs. Since most states have mandatory PKU and are considering adding new tests to this base the issue may prevent the states from using this money. The benefits of a mandatory program which insures complete testing for these rare

diseases, at minimal intrusion on the lives of infants or parents, is clearly a responsible and necessary exercise of state power. It not only prevents personal damage and misery but protects the taxpayers from large outlays for less satisfactory institutions and other services for the mentally retarded.

As a former chief of a state Title V program, I was pleased to see that the contributions of this often neglected program were recognized. I feel that such genetic programs should be planned and integrated on a statewide basis within this more comprehensive approach to maternal and child care. The state programs do need federal leadership and federal funding and I fully agree with the basic content of your analysis of the problem and your approach. I find it one of the most constructive proposals in this area that I have ever seen and one that would materially assist and expedite our efforts in California.

I have only one criticism. The cost estimates appear to us to be too low for a quality program even if large regional laboratories, which we support, are used. Laboratory costs are only part of the program. In a large state or regional lab much effort must be expended in followup of initial positives, in obtaining expeditious referral for diagnosis and treatment; forms production and record keeping; evaluation; public education; collection and transmission of samples, etc. require additional funds. We have not yet completed a detailed cost analysis for our expanded testing program which will include these three disorders but it will be somewhere between $5 and $10 per infant screened. The total cost in California alone will, for 330,000 births, be $1,650,000 to $3,300,000.

I therefore urge you to seek a higher authorization and appropriation of at least $10,000,000. I am requesting the Association of State and Territorial Maternal and Child Health and Crippled Children's Directors, the American Academy of Pediatrics and the State of California to formaly endorse your legislation. If I can be of any assistance in securing this legislation's speedy passage, please feel free to call on me.

Respectfully,

GEORGE C. CUNNINGHAM, M.D.,
Chief, Genetic Disease Section.

MARCH 2, 1978.

Senator MURIEL HUMPHREY,
Dirksen Building,
Washington, D.C.

DEAR SENATOR HUMPHREY: On Tuesday evening, one of the local radio stations included in its newscast the information that you had introduced the bill which provides for infant screening.

This was pleasant news as Dr. Guthrie had stopped in my office last Friday and brought a couple of us up to date on this matter. In fact, I intended to write you to urge you to go forward with the bill. As events turned out, I am wriitng you instead to thank you for doing so.

I have been interested in infant screening for many years and in the early 60's worked with other Minnesota ARC pepole in promoting mandatory testing for PKU with the lab work done in a central location under the supervision of the State Department of Health. At one time in recent years, the Department proposed to decentralize this lab work, but we managed to stop that one in its tracks.

The program costs about $25,000 per year, and we pick up an average of three PKU victims per year. Thus, the benefit-cost ratio runs about 400 to 25 to say nothing of the heartbreak which is avoided and the fact that we enable three persons, who otherwise would have been completely dependent on others, to lead satisfying and useful lives.

The benefit-cost ratio would be increased with the expansion of the testing to cover a greater number of problems and with a regionalization of the lab work.

If there is anything that we in Minnesota can do to help promote the passage of your bill, please let us know.

It has been some years since I have had the pleasure of meeting with you, and I hope that an occasion arises soon. In the meantime, best personal regards and greet Betty South for me.

Sincerely yours,

FRANKLIN C. SMITH,
NARC North Central Regional
Vice President.●

NEW TRENDS IN CHINA

● Mr. CHURCH. Mr. President, Mary Clark Dimond is a personal friend of mine who recently wrote a paper describing her experiences in the People's Republic of China and her observations about United States-China relations. It is entitled, "New Trends in China or 'Why the United States Should Get Along With China.'" In it she describes the transition that seems to be in process during the rule of Comrade Hua Kuo-feng as Chairman of the Central Committee of the Communist Party of China, and the reemphasis on education and learning and readjustment of the Chinese people. She then makes some interesting statements about the attitude of the United States to the People's Republic of China and how we should strive for closer relations with this, the largest country on the globe.

I want to thank Mrs. Dimond for sending me her work, and I ask unanimous consent that it be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

NEW TRENDS IN CHINA OR "WHY THE UNITED STATES SHOULD GET ALONG WITH CHINA"

(By Mary Clark Dimond)

Great red leather drums with large brass studs were beaten, cymbals clashed, fire crackers and "cherry bombs" exploded, there were cheers, speeches, martial and patriotic music, and above all sometimes the persistent honking of a lonely vehicle intent upon reaching its destination. All of these sounds and more poured in through the door which opened onto the balcony of my hotel room in Peking this very early morning of July 22 of 1977. A two and one-half days of celebration had been decreed and the people in huge numbers had responded by pouring into the center of China's capital. Countless orderly processions of men and women wearing white shirts and marching in formation, carried first their colorful red banners with the white characters identifying their group, others then held high great red flags, and large photos of China's leaders, and then smaller home made banners were clutched in the hands of each and all. The groups surged ahead converging at the cross streets and turning to march toward the great square and pass the reviewing stand above Tien Am Men Gate. Millions of Chinese people had finally participated in this incessant parade before the days of jubilation were officially ended and the joyous young with a number of their more weary elders had returned to their commune, factory, army barracks, naval quarters, or organizational headquarters within and beyond their capital city to resume their normal duties. The heavy heat of midsummer had not deterred them, the hot sun nor the sudden showers which produced an instant galaxy of pastel umbrellas.

What was this all about? What explained the crimson flags topping every building as far as one could see and the strings of lights outlining the same as masses of people moved through the streets after dark? What had precipitated this massive demonstration?

The governmental structure of The People's Republic of China is not assimilated by the average foreign visitor in a matter of minutes. But of the several hierarchal organs of government, the Central Committee of the Communist Party of China is strong. The Third Plenary Session of this Committee of their Tenth National Congress had ended on July twenty-first and the decisions handed down were considered justifiable reason for calling out the whole population of this great country to celebrate. In the language of the official news media of China, the following was announced promptly at eight that evening: First, the Session had unanimously adopted appointment of "Comrade" Hua Kuo-feng as Chairman of the Central Committee of the Communist Party of China; second, "Comrade" Teng Hsiao-ping had been restored to all of his posts, including that of Vice Premier, from disgrace and house arrest (for a second time); third, the "Gang of Four" had been officially "read out of the party". Those, who represented the "Shanghai Group" had been named enemies of their country, and included the widow of the late Chairman Mao Tse-tung; fourth, it had been agreed to convene the Eleventh National Congress before the due date.

In this summer of 1977 we soon became aware of changes which had begun and were continuing to come about in The People's Republic of China, and we were fortunate to have been present in Peking during the spectacular demonstrations which erupted all over China after the formal government announcements. After an approximate ten year hiatus referred to as the Cultural Revolution, a new leadership had begun to settle in, and one could say also that, in many respects, an old political line was being reborn. The results of the Third Plenary Session were to have established even more firmly alterations of theory and practice at many levels.

In 1971, 1972. 1973, and again in 1976, we continued to observe every sign of a rigid leveling of the social order, to note competition of any kind was not encouraged, even in sports, and that equal all out effort by every citizen was sourred on by a series of propaganda issues which drew out a maximum contribution from each individual. The total population was kept on almost "a war footing" working for their country and *all* of its people. Leading slogans such as, "Serve the People", "Down With Elitism", "Unite the Workers of the World", went hand in hand with such negative exhortations as "Down With the Russians", "Down With Confuscius and Lin Piao", and "Down With Lui Shao-chih". Now, the new cry taken up by even the smallest children in song, was "Down With the Gang of Four".

The reference on everyone's lips to "Workers, Peasants, Soldiers" had served to describe and to emphasize the equal status of all of the people over many years.

We had not been in China in this past July and August more than an hour before we sensed a different demeanor among our friends and hosts. They laughed aloud (artificially?) and told us, "Everything is different now. There have been great changes, everything is better, much better". An absolute reticense was somewhat dissolved, and so it gradually came out. Most succinctly put, the familiar words, "Workers, Peasants, Soldiers" (which combination our students in 1976 had run into one word) was now "Workers, Peasants and Intellectuals". Our eyebrows shot up. Education was at the fore-

front, to be won, to be used and respected. All available talent, brains and cultural background were to be sought out, cultivated and assigned for an immense push to build their vast country with its prodigious supply of human labor and natural resources to bring about a highly progressive, strong industrialized nation, one which led the world in science, industry, and military strength.

For those who had not seemed to respect the old party line or to have been uncooperative in some respect in former years, there had been the "May Seventh" schools to which such persons were sent to "reorient his thinking" through extensive political discussion combined with manual labor. We learned in a few days there were no more May Seventh schools. An elite who had resisted regimentation, or a revitalization, often, of more primitive ways (particularly in medicine), or had even shown partial reluctance to be one of an altogether classless society had now been summoned from these schools, reinstated to their former positions and told to get to work, use their learning and imagination, and set China onto a path of rapid progressive development. A more broad general education and technical knowledge were extolled; research along with sophisticated procedures which had been forbidden for nearly a decade were now acceptable and encouraged.

Regimentation continues to exist, of course, and everyone works at those jobs to which they are assigned, observes a strict discipline, and may not leave a specified geographical area without permission. At the same time, vast numbers of people are moved great distances to develop natural resources, the extent of which not even the government itself has learned, and large settlements are established in the region until the completion of the job. At the great Taching oil field in the north, a new permanent city of over 500,000 people has been created in an area known to have oil reserves equal to those of Arabia. By taking families from the large overcrowded cities, other communities will be similarly created to serve, and planned also to be self-sufficient in food production and other living necessities. This technique also is aimed to improve living conditions in those cities. Tens of thousands of men and women are also relocated for shorter periods to transform a desolate area into an agriculturally productive one, or to build dams, aquaducts and canals of formidable size and strength.

As we sat and listened at many oral "briefings", at attention with our covered cup of tea, we noted that texts were read at times, and from these the phrase "the Great Cultural Revolution" had generally disappeared. The latter was considered ended, a painful phase, an unfortunate segment of recent history which had held back the modernization and development of the nation.

We learned, too, that the regulation that all students who had completed their substantial high school education must then work for two years either in the army, on the farm, or in the factory, had been altered. Formally, after their years of labor, if some of them had first proven an understanding and devotion to the party line, then won approval of both their leaders and peers, next, shown a high degree of diligence, and finally, were endowed with superior intelligence and talent, they might have the opportunity for higher education.

A new ruling would now allow a student to forgo these years of manual labor and enter the university immediately. Many of us had thought the years of labor a rather good system as we reflected on some of our own young who went into college often to drift and accomplish nothing, so were almost disappointed to hear every young person might not now be required to put through these years of manual labor after high school. We had to re-adjust our thinking. We were assured, however, that a careful system of selection would prevail, and those individuals getting on to the university immediately after "upper middle school" must be especially qualified and committed to scholarship and acquiring refined skills in order to aid their country become an up-to-date strong industrial and powerful nation.

I describe the above not only because as an American I have had an unusual series of exposures to The People's Republic of China and possess a deep respect for these diligent, sensitive, civilized Chinese people with their longest continuous culture of any nation in the world, but also because I care very much about my own people and to have of this United States of America, both the government and citizenry, understand what is happening in The People's Republic of China and thus realize that there exists a great urgency for this country "to get along with" The People's Republic of China.

Eighty percent of China's population of 850,000,000 are under twenty-five years old. In 1949, since "Liberation", citizens of China commenced to live under a system of regimentation of dimensions hitherto unimagined. As a result, this "quarter of mankind" now provides schooling for all, health care for all, food for all, and care for young and old. A moral atmosphere bringing out the best in a vast majority prevails, coupled with a modesty and realization of how much more need be improved and achieved. The individual is sublimated to the group. There is discipline, poise, confidence, pride, and determination based on a life style on a poverty level, to be sure, but a secure one. Ninety percent of the women have jobs. There is no alcoholism, thievery, criminal violence or any drug problem. There is safety on the streets. Population control is in effective command. Prostitution and venereal disease are eliminated.

The streets are clean, the people are clean, and there is a physical fitness program for all ages. And now talent is recognized and study and research are encouraged to build sophistication in every field among this vast number of humans who have risen from indescribable misery to a secure status. Indeed, the most remarkable social accomplishment in the history of mankind has occurred in The People's Republic of China.

And these are the Chinese people of whom we speak. Historically, the Chinese have protected their own country but have not been aggressors ambitious to dominate other parts of the world. They are good businessmen. They work so very hard. And they have a heritage of five thousand uninterrupted years of civilization, one which will bring them through any limitations Communism may have which could become obstacles over time, while still preserving an enduring appreciation of all which this political ideology and its relentless revolutionary leaders has done for them. The Chinese can and will rise above current reverses and misfortunes as they have survived many other torturous events through the centuries.

What is the United States planning to do about The People's Republic of China?

It may be useful and important for us to remember the condition of Japan immediately after the Second World War, and to note the Japan of today, their status among world nations, their industrial and technical capacity, and to note how small a fraction is their population compared to that of today's China. Is not all this impressive to think upon?

I am fearful our own United States will suffer from not facing the reality, and may therefore postpone for too long establishing a normal diplomatic relationship between the governments of our two countries. China is formidable now, even as it commences its rapid rise. We are of the last nations of the world who refuse to have a formal diplomatic relationship with The People's Republic of China.

The Chinese people have many friends all over the world, and have had continuous interchange with these over the years. It was the United States who put a "bamboo curtain" around themselves. The Chinese have an adequate market to whom they can sell their products, enough friends among nations from whom they may import raw materials and food, if necessary. They have no immediate need for us. Perhaps no ultimate need for us.

It may be an unwelcome suggestion to some of us that we should be more modest, or mannerly, and there is perhaps more reluctance than is sensible to realize there may be coming a time when the United States will need China coincidental with an era when China will not care or have any need of us. Should we not be less confident in this shrinking world of diminishing resources?

Should we not practice greater foresight and put aside all traces of bigotry? Can we not admit to some inadequacies of our own? Can we afford oblivion, hostility, or an excess of pride? Would we benefit in the end from using the more harsh manner of thinking and acting only on calculation of our practical needs of the future?

Most nations are selfish. Can we honestly think of one that is not? But should we not at least try very hard not to use the unsmiling decisive route to achieve our goals when such methods tend to cultivate a lack of a most desirable world harmony?

The "Taiwan question", the main "stumbling block" preventing "normalization" between the two countries, must be seen for what it is. And the terms of the Shanghai Agreement must be re-defined and re-emphasized. These are not thought through by most of the people of this country, if considered at all. We made a pact. We have not lived up to it.

I shall not become allegorical beyond suggesting one imagine briefly how it would be for us if foreign people came to our country, settled, disdained our religion and customs, inflicted upon us their own, took advantage of and perpetuated weaknesses and disasters, absconded with our art treasures, grew rich from our resources, behaved as bigots with little regard for our human life or dignity. And when these invaders were losing, they fled, a small handful of people accompanied by a few converts to a small off shore island and declared then that they represented all of the people, a whole nation of whom they were but a tiny fraction.

Few care to admit we "backed the wrong horse". Few care to admit that there is oppression and corruption in Taiwan at this time. How many remember a legal Taiwanese government exists in exile in Tokyo? How many know the invaders and their converts subjugated and put to their use the remaining natives of Taiwan? Some Chinese on Taiwan would like to return to the mainland. Others who can manage it have or are escaping to other parts of the world. And some are thriving on the corruption there, enjoying the money poured into Taiwan by the United States, and would prefer not to be a part of The People's Republic of China. A number would like to be under the rule of Japan.

The United States might suggest some compromise? To expedite matters, might there not be some way in which those fearful to return or be dominated by the People's Republic of China could be re-settled where they would feel out of danger? There may be a variety of solutions which could resolve the matter if The People's Republic of China is not now settled down and prepared to wait indefinitely for the matter to solve itself. This latter is possible. The Chinese are in no hurry. And the situation will, of course, ultimately resolve itself.

Solution to the Taiwan question cannot come too quickly for us now, however. Let us encourage responsible people of both countries to work things out so that the provisions of the Shanghai Agreement are fulfilled and the obstacles surmounted. One or another or both of us might give a bit so that the situation is terminated?

When a Chinese makes a promise he keeps it. If another makes a promise and does not live up to it, the Chinese man is indignant. The Chinese people do not lack confidence or more than reasonable patience.

I suspect in this case the Chinese are prepared to wait, as I mention above, until the opposition sees their mistakes. Their own manners, their standards, even their concept of law are other than ours. But would not the United States of America promote the chance of success sooner rather than later if in small ways we made friendly overtures? Is it not a time for generosities, good manners, and reaching out first, even if it is a second "first"? Give of kindness to the Liaison Officers and their staff confined to their buildings in this country. Ask the Ambassador of the Permanent Mission of The People's Republic of China and his family out for dinner, for a picnic in the country or ask just to come to call?

On the pragmatic side: Reduce the excessively high tariff on exports from China to the United States. Entertain no thoughts of protocol so rigid they demand the Chinese head of state come to our country because we have had our own high officials visit there. Have we any rational basis for thinking such a visit is due when we have not fulfilled our part of a bargain? Must all giving be evenly measured? Should we let ourselves forget that the wheat we sold China was of such deteriorated quality it was unacceptable and the Chinese people canceled further orders? Can we not work to see wherein we have been or are still wrong?

There are sayings such as "Know Thyself" and "Go That Extra Step . . .". I think the time is overdue for the sake of the people of the United States that we act and soon, with such sayings in mind, and even now, it may be too late.

POSTSCRIPT

Within days of the completion of this article, four events have occurred:

Number one, our own Liaison Office to The People's Republic of China, Mr. Leonard Woodcock, has publicly urged that the United States formally recognize The People's Republic of China without delay.

Number two, perhaps most significant and important, and the first evidence of diplomatic failure on our part which may be devastating to us over "the long haul", it has been announced that The People's Republic of China recently concluded a trade agreement with the United European Common Market.

Number three, The People's Republic of China and Japan concluded a nine to eleven billion dollar trade agreement with Chinese coal and oil to go to Japan—. (Wall Street Journal, February 17, 1978)

Number four, Chairman Hua Kuo-feng spoke to the Fifth National People's Congress (this is an arm of the Chinese government representative of all of the people rather than of the Communist Party membership, which is somewhat over two million individuals) and in the course of his speech did rouse the meeting with regard to the Taiwan issue. (Kansas City Times, February 27, 1978)

Too late, perhaps, now, to have secured advantageous economic agreements with China, we may have to hurry more to resolve the Taiwan issue at the same time maintaining a level of cordiality between the two countries necessary to this nation's welfare and perhaps, again, to the peace of the world.●

FULL EMPLOYMENT AND BALANCED GROWTH: KEY TO ELIMINATION OF SLUM POVERTY

● Mrs. HUMPHREY. Mr. President, it has been 10 years since the inner cities of the Nation's largest urban areas erupted in riots and arson-sparked firestorms.

Those scenes of chaos that produced states of siege in our cities were the ultimate expression of the rage and frustration of human beings trapped in poverty.

Now, 10 years later, despite many public and private initiatives to respond to the needs of the impoverished, the problems of our urban ghettos, and those who cannot escape them have grown even worse.

Ten years ago the slums of the Nation's cities symbolized the despair of people who were convinced they were the victims of an unwritten national policy of discrimination. That conviction continues to persist. But today it does so in ever-expanding slum areas that have largely become wastelands of abandoned, burned out, and vandalized buildings where brutal crimes are ordinary everyday events.

Mr. President, this is the alarming portrait drawn by a series of recent articles in the New York Times on the condition of blacks in America today, 10 years after the report on the Advisory Commission on Civil Disorders, better known as the Kerner Commission.

While the Times report describes the condition of inner-city slums as worse now than they were 10 years ago, it also details the significant economic and social strides made by blacks during that time. Efforts to integrate our society and to provide equal opportunities for minorities have benefited large numbers of blacks, one-third of whom now count themselves as members of the middle class, either living in or able to live in what used to be all-white suburbia.

This migration of blacks into the professions and highly skilled trades and into suburban housing developments has left the Nation's riot-scarred ghettos without adequate numbers of spokesmen or leaders. The result is that those who remain in the slums are trapped there, not only by their lack of education and job training, but by lack of aggressive, articulate representation that used to be provided by those who now have successfully entered the mainstream of American life.

These circumstances have combined to make the hundreds of thousands of blacks and other minorities living in urban slums the largest single element in the Nation's structural unemployment problem. That problem, whether it is in inner-city ghettos or rural slums, exists because the country has failed to achieve and sustain a full employment, balanced growth economy. It will continue to exist so long as we fail to reach and hold this goal.

Job training and public service employment programs are required initial steps to open the way to escape from poverty. But, they are largely futile exercises unless useful employment opportunities paying decent wages exist in sufficient numbers in the private sector. The only way the job market is going to be expanded to this extent is through a sustained effort to develop and implement comprehensive and coordinated fiscal and monetary policies that will promote maximum activity and stable prices in the private sector.

Mr. President, this is why the Humphrey-Hawkins bill now being considered in both the House and Senate is the real key to significantly reducing poverty in the Nation for all our citizens. It recognizes that the Federal Government must look at the economy as a whole in shaping economic policy and it requires the administration and Congress, with the assistance of the Federal Reserve, to work in partnership to develop and implement policies that will help guide the economy toward full growth and stability.

It is only within such a total effort that special, targeted policies and programs aimed at the poor and the unskilled can have any lasting meaning. The Full Employment and Balanced Growth Act provides the structure and the procedures to address our economic problems through both broad tax, spending, and credit policies as well as special targeted initiatives providing incentives to business and industry to create employment opportunities and establish Federal job training and public service employment programs to help the unemployed ultimately enter the job market.

Until the provisions of the Humphrey-Hawkins bill are made operable, until the Government is committed to achieving the bills' interim goal of reducing overall unemployment to 4 percent, the tragic waste and disgrace of our urban slums and the abject misery of the people forced to live there will continue needlessly.

Mr. President, with that thought in mind, I ask unanimous consent that excerpts from the Times articles on the condition of blacks in America be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

BLACK-WHITE SPLIT PERSISTS A DECADE AFTER WARNING

(By John Herbers)

("Our nation is moving toward two societies, one black, one white—separate and unequal."—The National Advisory Commission on Civil Disorders, Feb. 29, 1968.)

ST. LOUIS.—The division between white and black Americans still exists, and the prospects of healing the rift may be more dismal today than they were 10 years ago, when that warning was issued by the Presidential panel known as the Kerner commission.

As a whole, the nation's 25 million blacks have gained enormously in the last decade, but many students of the nation's racial struggles as well as black and white community leaders throughout the country see a bleak future for the millions remaining in the urban ghettos.

Outside the ghettos, most whites are even more insulated from the slums than they were in 1968. And the blacks who have left in substantial numbers for better lives else-

where are, for the most part, engrossed in middle-class concerns and no longer active in the cause of those left behind.

Many urban blacks, perhaps 30 percent, have worked their way into the middle class and have moved to the suburbs or to better housing within the cities. Some of those still dependent on public assistance have received substantial increases in real income through rent subsidies, a liberalized food stamp plan, an expanded welfare system and other benefits enacted since 1968.

But chronically high unemployment in black neighborhoods has raised fears that the nation may have acquired a permanent underclass, people who are wards of the Government living out unproductive lives under conditions that most Americans, if they think about them at all, consider unacceptable.

Former Mayor John V. Lindsay of New York City, who was vice chairman of the commission, believes that separation between races and among blacks themselves is a problem so difficult to resolve politically that the Federal Government can approach it only obliquely, not head on.

"They would have to be almost too brave to bear the pain," he said in a telephone interview.

CONSIDERABLE GAINS MADE

The number of black elected officials has increased dramatically, as has the education level of blacks. From the sterile downtown office buildings that still serve as the nerve center of commerce in most cities, it is a salt-and-pepper work force that pours into the streets at 5 P.M. Blacks are more visible on television and in sports. In a number of ways, it is an integrated society.

But the places that experienced urban riots in the 1960's have, with a few exceptions, changed little, and the conditions of poverty have spread in most cities.

Ten years ago, the South Bronx was in deep trouble; today, it is in ruins.

Stable neighborhoods in 1968—the northwest section of St. Louis, for example—are now undergoing housing abandonment.

Scars of the riots are still visible in Washington, Detroit, Newark and other cities. In most of them, blight has been even more devastating than the rioting.

The troubled areas include desolate expanses of New York, Newark, Chicago, Washington, Philadelphia, Cleveland, Detroit, St. Louis, Gary and Buffalo; the sprawling slums of Los Angeles, Houston and Memphis; crumbling old neighborhoods of New Orleans, and hundreds of other central city and suburban areas.

A composite of them would be a land of several thousand square miles of rubble-strewn streets and vacant blocks, abandoned stores, stripped-down hulks of automobiles, bleak and compacted public and private housing projects, battered school buildings, old men with glazed eyes.

Residential boundaries for blacks have expanded, but not through the metropolitan-wide integration that the commission recommended. Blacks have migrated outward along well-defined corridors—the middle class leaving first for safer neighborhoods and better schools, with the poor "tailgating" them.

"It is still mostly a segregated society," said George S. Sternlieb, director of the Center of Urban Policy Research at Rutgers University.

THE PICTURE NOW

A check by The New York Times of representative cities and interviews with scores of people involved shows the following comparisons from 1968 to 1978:

Population: Although the situation in each city varies, there are now fewer people in larger areas that could be described as ghettos, except in Southern cities where the integration of blacks is still taking place. In central St. Louis, for example, children returning from school one day last week picked their way past hundreds of abandoned houses to their homes. Ten years ago, those empty buildings were a bustling neighborhood.

Employment: The unemployment rate for all blacks has doubled over the 10-year period, and has been hovering recently at around 14 percent. In the ghettos it is much higher—40 to 50 percent among black youths in many cities. As factories have moved out and economy has become more concentrated in technology and services, there are fewer opportunities in the manufacturing jobs that once provided the first step into the job market for the urban poor.

Education: There is a consensus that central city schools have declined in quality even as teachers' salaries have risen. In most cities, the ghetto schools are virtually all black or Hispanic as integration efforts have faltered.

Housing: Tens of thousands of deteriorated but structurally sound housing units have been abandoned. Some of the abandoned buildings were erected since 1968 in areas designated as "model cities" by the Federal Government. Rehabilitation and new construction have not kept up with the need in most areas. In New Orleans, there is a waiting list of 10,000 for units of dreary public housing. Blacks there are doubling up in shacks as whites line up old buildings for renovation.

Crime: While the police statistics that measure serious crime are seldom dependable, there appears to have been an increase over the 10-year period. Typically, in New York, there were 304,000 felony complaints in 1966, as against 552,000 in 1976. While New York and most other cities have reported some decline in the past year or so, it is believed to reflect a decline in the number of young, who commit most of the crime, rather than better control over lawlessness.

Federal Aid: While the ghettos have remained unchanged, or have worsened, Federal aid to cities has increased enormously. In 1967, direct Federal aid to St. Louis made up only 1 percent of the general revenue. This year, Federal aid is expected to constitute 54 percent.

Newark will have gone from less than 2 percent to 55, Buffalo from 2 percent to 69, Cleveland from 8 percent to 68. Even Tulsa, Okla., a city not high on the Government's crisis index, is dependent on the Federal Government for about one-half of its total budget.

The money has been such a windfall that Richard P. Nathan of the Brookings Institution recently told Congress that only a handful of cities, New York included, now have a fiscal crisis. But, with few exceptions, the money has gone largely to supplant other sources of revenue rather than to enrich the ghetto or other declining areas.

ST. LOUIS AS AN EXAMPLE

St. Louis is not a typical city but, like a Eugene O'Neill play, it shows a general condition in stark and dramatic form. The city itself, whose boundaries were established in 1876, now makes up only a small part of the metropolitan area. Its population is half a million, down 42 percent from 1950.

George D. Wendel, professor of political science and director of the Center for Urban Programs at St. Louis University, recently described the current state of affairs to a Brookings Institution conference in Washington:

"While we have lost 42 percent of the residents, we have also lost about the same percent of our residential housing. Great sections of St. Louis are simply abandoned. They are essentially flattened. One-sixth of the residents are welfare. The city is 41 percent black, but we are losing 5,000 to 7,000 blacks a year.

"The Black politicians are showing the same concern about the loss of constituents and doing the same things their white predecessors did to try to hold on to their folks.

"We are turning to tourism, like everybody else," he continued. "Wendel's rule is that 10 percent of the nation must be on convention at all times to fill all those convention centers that are happening everywhere. Downtown seems to be booming. A lot of it is illusion, but the doughnut hole gets large around downtown. It's more and more just emptying out."

Most of the emptying out, he said, occurred during the great growth of Federal aid.

"Correlation, not cause and effect," he added. "We are obviously not going to turn down Federal money because of this correlation. We are hooked, 55 percent. We know that we're addicted and will go on."

St. Louis has a strategy for abandonment, Dr. Wendel continued. It is "board and secure." Because abandoned units are so quickly vandalized, the city must move fast to protect them.

But in many cities, boards are no longer sufficient, metal paneling is required. "So strategy for neighborhoods may be no more than starting with boarding and securing and then going on to other kinds of more fundamental strategies," Dr. Wendel said.

A DISTINCT TRIANGLE

In his office here, he pointed to a map to show where the blacks are moving—to the edge of St. Louis and outward to its suburbs, so that the black area now makes a distinct triangle in the metropolitan area.

With the blacks leaving, is not St. Louis becoming proportionately whiter and richer? No, Dr. Wendel said, it is becoming a city of the poor and the old, and they are dying.

While the ghettos have remained, the public discussion of the difficulty, which has begun again after several years of silence, is in a different context. Even the language of the Kerner commission's report seems dated. Problems are no longer discussed in terms of race, but of the urban poor.

Rather than a laundry list of recommendations, a consensus has developed among blacks and whites, and liberals and conservatives, that offering a long list of recommendations is not the answer. The first step toward solving the problems, they say, is better employment opportunities.

"CANNOT AFFORD" TO HIRE BLACKS

M. Carl Holman, president of the National Urban Coalition, said in an interview: "I work with businessmen and when I ask them to find jobs for young blacks, they say, 'No, we cannot afford to as long as there is a pool of better qualified whites to draw from.' And I say, 'Well, what are we to do?' And they say 'Nationalize welfare.' "

That, of course, while considered desirable in many ways, would perpetuate the underclass if used as a substitute for jobs, so Mr. Holman takes a look at the array of Federal programs on the books.

"I find that it costs more to finance all those programs than it would to provide jobs," he said. "What we are spending we are spending negatively. It seems to me that here in America we are running out of the creativity we used to have."

In the black community, so many tactics have been tried and have failed—demonstrations, Federal aid, black separatism, black capitalism, coalitions with business interests. The National Urban League recently sent questionnaires to its affiliates, asking whether they thought "a permanent class of

people is being created who will never be productive members of society." Seventy-eight percent of the replies were affirmative.

POSITIVE ATTITUDE DEVELOPING

Although there is deep skepticism that the Carter Administration's proposed job programs or the emerging new urban policy, to be announced by President Carter next month, will have much effect, people like Carl Holman believe a positive attitude toward the troubled ghettos is developing in the Administration, and some help may come of this.

Reynolds Farley of the Population Studies Center at the University of Michigan recently wrote a paper on Detroit entitled "Chocolate City, Vanilla Suburbs." Using sophisticated polling techniques, he determined that "residential segregation results largely from the preference of whites for segregated neighborhoods."

Dr. Sternlieb of Rutgers suggested a reason that goes beyond racism. When a number of blacks move into open suburbs, such as Plainfield, N.J. and New Rochelle, and buy homes, the real estate values go down because of the concentration of blacks.

"It's called greenlining," he said, "and the blacks are deprived of the forced savings that whites enjoy—the appreciation of real estate values."

"The ultimate answer is the metropolitan-wide acceptance of black communities," Dr. Sternlieb said.

It is one of the Kerner commission's recommendations, and it has not been achieved anywhere.

IN POOR BLACK AMERICA

The disintegration of some inner cities has turned once peaceful black neighborhoods into no-man's-lands where neither blacks nor whites are safe, a condition that further alienates whites. The high unemployment rates among poor blacks, and the crime associated with this group, also forces older blacks to live in fear.

One black man who feels trapped in the house he has owned for 32 years is Mitchell Wood, a 61-year-old retired repairman who lives in the Inner West neighborhood of Dayton, Ohio. "The old people have moved out and the people who move in are undesirable," Mr. Wood complained the other day.

"It wasn't like this 10 years ago," Mr. Wood said. "All the good people have gone."

With the energies of the civil rights movement dissipated, with the withdrawal of massive white support and with black leadership cadres moving into Government jobs or into middle-class communities, the poor black segment of America sees itself as powerless, ignored and lacking a strategy to challenge the status quo.

For some like Dean Lovelace, a former lathe operator in a factory who now heads the Ohio Black Political Assembly, the rage and anger of the black community is as potentially volatile as it was 10 years ago. "I think we're headed for another period of turmoil," he said.

But for young blacks like a tall, gangly teen-ager in the lobby of a Kansas City movie house who identified himself only as Claude, even violence seems unlikely to change things. "The cops got all the fire power they need to blow us away," he said, pulling a cap over hair braided back in cornrows. "They're just waiting for an excuse to get us out in the open with a stick in our hand."

Many see little ahead but a life of idleness, Patricia Stantil quit school in Baltimore when she got pregnant in the 11th grade; now, just turned 21, she is pregnant again.

Welfare gives her $260 a month; she spends $125 of that for rent and $38 for food stamps. Once she entered the Job Corps for training as a nurse's aide, but she dropped out, suffering from homesickness. Now she has no job, no skills and no drive to get either.

"I'm not doing nothing," she said, "but staying home and taking care of my daughter."

For millions of blacks, the situation is like that of Earl Howard, standing on a cold street corner, stamping cheap Italian-style shoes into the swirls of snow eddying at his feet, waiting for a ride that never came.

"I just came up from New Orleans looking for work," he explains, about to give up on the friend who was to meet him. "I need money to buy me some good work boots. I just ain't ready for this cold weather."

Tomorrow he would ask around again. Maybe something would turn up.

"It was the snow," he said after one last look for the friend's car. "It must of been the snow what kept him home."

BLACK PROGRESS AND POVERTY ARE UNDERLINED BY STATISTICS

(By Steve V. Roberts)

WASHINGTON.—In 1976, black families had a median income of $9,252, an increase of 105 percent over 10 years. In that same year, 30 percent of all black families earned $15,000 or more. A decade ago, only 2 percent were at that level.

But 1976 also saw 31 percent of all black individuals living below the poverty line, as against 42 percent in 1966. And among families headed by women, 36 percent of families in the black community in 1976, the poverty rate was 55 percent. It was 65 percent 10 years earlier.

Those statistics illustrate the two faces of black America today, 10 years after the National Advisory Commission on Civil Disorders issued its report. One group is rapidly acquiring more education, better jobs and higher income; another remains mired in poverty, an unyielding "underclass" with few qualifications and little motivation.

In certain ways, the gap between black and white America has closed substantially. Black female clerical workers, for instance, now earn 99 percent of the average salary for whites. In 1975, 93 percent of all black teenagers were enrolled in high school, a jump of 10 percentage points in 20 years and only one point less than the mark for whites.

In other ways, the gap remains large. The median black family income, $9,252, is still only about 60 percent of the average white family median income, $15,537. Blacks are twice as likely to die of diabetes and seven times as likely to be victims of homicide.

DIMINISHED POLITICAL POWER

The Kerner commission said that America was moving toward "two societies, one black, one white—separate and unequal." Today, it's probably more accurate to say that America is divided into two classes, one comfortable and one not.

Professor William J. Wilson, a black sociologist at the University of Chicago and author of "The Declining Importance of Race," points out that a generation ago the new "black bourgeoisie" made its money mainly by serving the black community itself. Most of them were doctors, lawyers, undertakers and teachers. Today, middle-class blacks also make money in the white world, as managers in large corporations, for instance, or as skilled union craftsmen.

While most black leaders are pleased by the success of this rising middle class, they worry that it has fractured the unity of the black community and thus diminished its political power.

If the picture of a divided black America is beyond dispute, interpretations of that picture differ widely. Some analysts point to the progress made by the black middle class and say, in effect, that the glass is half full. Others stress the plight of the underclass and say that the glass is half empty.

On a recent television show on the Public Broadcasting System, for example, Ben. J. Wattenberg, the author and demographer who was the host of the program, said: "I come out with two simple points, one substantive, one tactical. Substantive: blacks are still behind whites but there's a lot of catching up going on, and right through the recession, too. Tactical: if you want to keep in motion some of the causes of progress, it's a good idea to let the country know that progress is being made."

State Senator Julian Bond of Georgia, the prominent black activist, retorted: "My thesis would be that, although undeniable progress has been made in this country on the question of race over the last 77 years, I'd prefer, really, at the risk of being called a pessimist, to concentrate on the negative. The country must be reminded again and again and again that things aren't what they should be."

UNEMPLOYMENT

In sketching a demographic portrait of the racial situation today, some of the most important statistics concern jobs.

Unemployment for all groups varies according to the business cycle, but over the last 10 years the rate for blacks has consistently been twice as high as that for white. At the end of last year, the jobless rate was 6.3 percent for whites, 13.2 percent for blacks. For white teenagers it was about 15 percent, for black youths about 40 percent.

Optimists and pessimists argue that these figures are misleading. In a recent volume published by the Urban League, Dr. Bernard E. Anderson asserted that, if job seekers who had become discouraged and quit looking were included in the totals, black unemployment would have soared to 25.3 percent in the third quarter of 1977, as opposed to 11.7 percent for whites.

Mr. Wattenberg points out, on the other side of the coin, that in 1974 unemployment for married black men was less than 5 percent, a rate only 1.7 times higher than the white figures.

Analysts generally agree that a large part of the unemployment problem in the black community is structural, and not easily solved by an upturn in the economy. Many jobs, from assembly lines to corner groceries, are leaving the inner cities for the suburbs, and many blacks do not have the education to compete for the technological jobs.

Another problem is that many black youngsters are unwilling to take menial jobs that might be available. Some black leaders agree with them, but others take a different view. "Even if it's a dead-end job, the act of working does something for people," said Representative Parren J. Mitchell, a Democrat from Baltimore who heads the Congressional Black Caucus.

Like many other blacks, Representative Mitchell also believes that racial discrimination still influences hiring practices: "It's a more subtle form of racism, that's replaced the more overt, naked forms," he said.

Whatever the reasons for black unemployment, younger working blacks are moving steadily into better jobs. In a recent study, the Congressional Budget Office noted that, as of 1974, 32 percent of all black workers held white-collar positions, up from 14 percent in 1959. In the same period, the percentage doing domestic household work had dropped from 15 to 5.

Among better paid workers, the gap between blacks' and whites' income narrows. In 1974, the median income for black male professionals was $11,088, or 82 percent of the figures for whites. For black female professionals the median was $8,376, or 15 percent more than for comparable white women.

POVERTY

On the other end of the spectrum, the poverty rate for blacks is generally put at

more than three times that for whites, although some economists dispute the computations.

The figures for blacks, they say, do not include illicit or unreported funds that boost the income of some families.

More important, they do not include in-kind benefits such as food stamps, medical care and housing subsidies. If those benefits are counted as income, says the Congressional budget office, the poverty rate for black families is cut in half.

Another key variable in black income is family status. The number of black households headed by women spurted to 36 percent in 1976, as opposed to 11 percent in the white community. And 17 percent of all blacks living in families headed by men were below the poverty line, as opposed to 55 percent in families headed by women.

EDUCATION

Jobs and income are closely related to education, and it is in this area that blacks have made their biggest strides. In 1973, blacks in their mid-20's had completed an average of almost 12 years of schooling, only one year less than the whites and an increase of four years over blacks in the 50's.

At the same time, many educators feel the quality of education received by blacks lags far behind that of whites. One recent test showed that 92 percent of all white 17-year-olds were functionally literate, as opposed to only 58 percent of the blacks.

The number of black college students has more than doubled in the last 10 years, and today blacks make up 10.7 percent of the total college enrollment, only one point below their portion of the school-age population.

Dr. Bernard C. Watson, a black professor at Temple University, points out, however, that 60 percent of the black students went to two-year community or vocational schools and another 20 percent attended historically black colleges.

MEDICAL CARE

Quality of life is difficult to measure statistically, but medical care is one critical benchmark and here, the litany is familiar: A lot has been accomplished, more needs to be done.

Since Medicare and Medicaid were introduced in the mid-1960's, many blacks have had access to the first decent health care. In the last 10 years, infant mortality rates for blacks have dropped almost in half, but remain far above those for whites. Black life expectancy increased three full years, to age 67, but lagged six years behind the white figures.

In education and in health, blacks have benefitted from huge Federal programs initiated after the turmoil of the mid-60's. For instance, black youngsters received between one-third and one-half of all Federal money allocated to elementary and secondary education, a total of more than $3 billion late last year. In health, blacks account for 36 percent of the drug abuse program.

The demographic picture shows that the optimists and pessimists are probably both right. The glass is half full and half empty. For every black who fights to the top, another is stuck at the bottom.

Mr. Wattenburg offers this interpretation: "The glass is filling, that's the operative word. You can argue whether it's fast enough to slow enough, but a tremendous amount of change is going on in this country." ●

LABOR REFORM BILL OF 1977— AN OUTLINE OF PROVISIONS

● Mr. HATHAWAY. Mr. President, as the Senate draws nearer to debate and vote on the labor reform bill of 1977, I am sure that many of my colleagues are receiving a number of inquiries about the bill, as well as expressions of opinion both for and against the bill, S. 2467.

I have found an outline of the basic provisions of the bill to be most helpful in this regard and I ask unanimous consent that it be printed in the RECORD.

There being no objection, the outline was ordered to be printed in the RECORD, as follows:

OUTLINE OF THE BASIC PROVISIONS OF S. 2467

A. THE PROVISIONS DESIGNED TO EXPEDITE THE DECISION OF UNFAIR LABOR PRACTICE CASES

1. Expansion of the Board from five to seven members.—The Board normally sits in panels of three. An increase in Board membership from five to seven, in conformity with a suggestion first advanced by Senator Taft in 1949, will mean that each member of the Board will be required to participate in only 3/7 rather than 3/5 of all panel decisions. This will substantially reduce the bottleneck at the Board level caused by the increase of one-third in contested unfair labor practice cases since 1960 and do so in a manner that continues the personal participation by the Board members in the actual decision-making process. To assure continued balance on the Board, the bill expressly provides that no more than a simple majority of the Board's membership shall be drawn from one party.

2. Summary affirmance procedure for uncomplicated cases.—Approximately 40 percent of all contested cases taken to the Board itself are affirmed by adoption of the Administrative Law Judge's decision without modification or with a minor clarification stated in one or two paragraphs. Many of these cases turn on credibility resolutions by the ALJ which are infrequently overturned.

The bill provides a summary affirmance procedure for use in such cases through which the matter will be presented to a 3-member Board panel on a motion and response within 30 days of the ALJ's decision.

The bill provides that three-member panels should consider summary cases. In addition, the bill spells out that motions for summary affirmance are to be filed within 10 days after the Administrative Law Judge's decision and that the responding party has 20 days in which to reply.

3. Requiring ALJs to issue short form decisions in uncomplicated cases and providing law clerks to ALJs.—

The work of the NLRB Task Force and the testimony at the hearings demonstrate that there are serious delay problems at the Administrative Law Judge level. To assure prompter issuance of ALJ decisions, two amendments to the NLRA are included in the bill.

It presently takes a median of 94 days from the close of an unfair labor practice hearing until the ALJ issues a written opinion. The NLRB Task Force attributes much of this delay to over-elaborate opinions. Plainly the proper functional approach is to provide that the ALJs shall set out their findings of fact and conclusions of law in brief conclusionary paragraphs commenting only briefly on the method they used in resolving conflicts and the basis for their legal conclusions, and to leave it to the newly enlarged Board to explore and settle open legal questions as necessary. The bill, therefore amends Section 10 of the Act to provide precisely that division of responsibility.

Section 4 of the Act permits the Board to appoint attorney assistants to the Board members to assist them in reviewing case records and in the preparation of opinions. However, the Act does not provide for legal assistants or law clerks for the Administrative Law Judges. Just as legal assistants have proved invaluable to the Board members and law clerks have long assisted federal judges, the proper administration of the Act would be enhanced by providing law clerks to the ALJs, a position strongly endorsed by the Task Force. The bill therefore amends Section 4 to permit appointment of such clerks.

4. Self-enforcing Board orders.—

There is no reason why a party aggrieved by a Board decision should not be required to promptly seek review of an adverse decision or to comply with the Board's order. Therefore, the bill provides that a party aggrieved by a Board order must petition for review within 30 days or the order becomes final and must, on application of the Board, be enforced.

B. THE PROVISIONS DESIGNED TO PROVIDE ADDITIONAL REMEDIES TO EMPLOYEES WHOSE RIGHTS ARE VIOLATED DURING ORGANIZING CAMPAIGNS OR EFFORTS TO DEAUTHORIZE OR DECERTIFY A UNION

1. Preliminary injunctions against discriminatory discharge.—

A preliminary injunction is an appropriate remedy when the harm in permitting a probable violation to continue outweighs the possibility that the eventual decision will be in the defendant's favor. Section 10(1) currently embodies the Congress' judgment that preliminary relief should be the norm where a complaint issues alleging violations of Section 8(b)(4), 8(b)(7) and 8(e). A discriminatory discharge inflicts grievous harm on the discriminatee by depriving that individual of his or her livelihood. In addition, it creates a climate of fear that substantially interferes with the exercise of Section 7 rights by the discriminatee's fellow employees. Since the law is well-settled in this area and the possibility of an erroneously-issued injunction is therefore remote, the bill extends Section 10(1) to such discharges.

To meet the point made during the hearings that the period in which employees are seeking to deauthorize or decertify a union is also a time during which it is critical to provide a maximum protection against economic reprisals, the bill extends Section 10 (1) to cover the latter situations as well.

2. One and one-half times back pay for employees whose Setcion 7 rights are interfered with.

Under the present rules an employee who is the victim of an unfair labor practice is entitled after the period of time in which his case is adjudicated to compensation in the amount of back pay plus legal interest, less the amount earned or that should have been earned. This does not make the employee whole for the full cost of the abrupt loss of a sustaining income. Moreover, the deduction of actual or potential interim earnings complicates the computation of back pay, thereby further delaying the employee's receipt of back pay. It also shifts from the wrongdoer to the injured party the full burden of mitigating the damage caused by the wrong.

The bill provides discriminatees one and one-half times their lost wages less any wages actually earned. This remedy, like the extension of Section 10(1) just discussed, applies during organizing campaigns and efforts to deauthorize and decertify a union. The bill's formula covers all unfair labor practices which carry a back pay remedy.

C. PROVISIONS TO IMPROVE THE PROCEDURES FOR DETERMINATION AND SETTLEMENT OF REPRESENTATION DISPUTES

1. Time limits for the holding of representation elections.—

The timing of a representation election should be determined by the difficulty of the legal issues that must be decided before an election can be held, the practical problems inherent in conducting a proper election, and the strength of the preliminary showing

of employee interest in collective bargaining. The timing should not depend, as is currently the case, on the strategic judgments of the parties as to whether delay is good or bad for them.

The bill, therefore, includes time schedules for holding elections based on the considerations just noted: Elections in plainly appropriate units in which a majority of employees support the request for an election are to be held within 21 days after a petition filed with the Board is received by an employer; where there is a substantial unit question that requires a pre-election hearing or only marginal support for the petition, a 45-day limit is set; finally, a 75-day limit is allowed for the decision of unit questions of particular complexity.

Following the pattern set in the added remedy provisions already described, the expedited election section in the bill includes petitions for deauthorization and decertification elections supported by a majority of the employees in the bargaining unit.

This portion of the bill also provides that: First, the provision for 15-day elections found in the House bill be dropped; second, the time limits run from the service of the petition rather than from its filing; and finally, weeks during which 50 percent of the work force is on vacation are not counted.

2. Greater use of rulemaking.—There are inherent limits to the speed with which hearings can be held and decisions based on the resultant record issued. As the Committee on Governmental Affairs has pointed out in its recent study of delay in the Federal regulation process, to the extent that greater expedition is desired, the administrative agencies must be directed toward greater use of rulemaking.

That redirection of the Board's energies and resources is one of the primary objectives of S. 2467. The bill requires the Board to codify its accumulated learning and experience so as to simplify the law, better guide the parties and permit the prompt handling of petitions for representation elections. This view reflects the consensus of scholarly opinion.

3. Equal access.—The bill requires the Board to issue regulations assuring that if, during an election campaign, the employer addresses the employees on the employer's premises or during working time with respect to issues relating to representation, the employees shall be provided an equal opportunity to obtain in an equivalent manner information concerning such issues from the union which is seeking to represent them and if the union holds meetings at its hall an equal opportunity to hear from the employer at that site. The bill permits the Board to impose reasonable conditions on this right to take account of the employer's need to maintain continuity of production and the employees' Section 7 and privacy rights.

4. Free speech.—One of the most controversial issues in the Boards' regulation of representation cases has been the extent to which the Board should police campaign propaganda that carries no threat of reprisal or promise of benefits. The bill in conformity with the consensus of scholarly opinion, adopts with one exception an amendment to the NLRA suggested by Senator Hatch. The Print limits the Board's authority to use non-coercive speech as authority for overturning representation elections. The Board's present broader authority is retained only with regard to the 48 hours prior to the election in order to permit regulation of last minute misrepresentation.

5. A compensatory remedy in favor of employees for unlawful refusals to bargain.—

At present there is no legal incentive for the employer to recognize and bargain with the union which is certified after a Board election. If he does not, a bargaining order issued months or years later merely requires him to do what he should have done originally—open good faith negotiations. The bill therefore, provides that the Board may, as a remedy for a refusal to bargain prior to the entry of the first agreement, award to the affected employees compensation for the delay in bargaining caused by the unfair labor practices. The measure of such damages is an objective one. It consists of the difference between the wages and other benefits received by the employees during the period of delay and the wages and other benefits they were receiving at the time of the unfair labor practice multiplied by a factor which represents the percentage change in such wages and benefits under collective bargaining contracts as determined by the Bureau of Labor Statistics.

6. Review of representation case decisions.—

Congress has chosen the Board as its agent to oversee the representation election process and granted the agency a wide discretion commensurate with the task. Therefore, the bill incorporates the relevant provisions of the Administrative Procedure Act which provides for a relatively narrow scope of judicial review. Following the present procedure, the bill also provides that review of the legality of a rule shall take place only in a proceeding under Section 10 of the Act.

D. DEBARMENT FOR WILLFUL VIOLATIONS OF BOARD ORDERS

S. 2467 provides for debarment for willful violation of Board Orders. Under the provision, the NLRB's General Counsel may issue a complaint including a recidivism allegation which can, if proven, lead to debarment. The Board in judging the case is instructed to issue a debarment order if it finds that the respondent has committed a willful violation of a final order of the Board or a Court of Appeals.

The bill provides that the Secretary of Labor, if he determines that it would effectuate the policy of the Act, may set a shorter period, and provides also that the Secretary's order shall specify the steps the guilty party may take to dissipate the effects of his violation. If these requirements are met, the debarment order is to be rescinded. The bill also follows the rule under the statues which presently provide for debarment, that debarment orders shall run against the entity legally responsible for the violation.●

CONTRIBUTIONS OF THE AMATEUR ASTRONOMERS

● Mr. LEAHY. Mr. President, at a recent Conference on Scientific Research in Vermont, organized by the Vermont Academy of Arts and Sciences, the papers presented covered such diverse subjects as mathematical biology, astronomy, air pollution, cancer, aquaculture, and environmental planning.

Two of the papers will be of special interest to large numbers of people, young and old alike. The first paper, by Alan B. Rohwer, is entitled, "What Does the Amateur Astronomer Contribute to Scientific Research?"

I ask unanimous consent that this informative and well-written article be printed in the RECORD. Tomorrow I will be submitting another paper also presented at the Conference on Scientific Research in Vermont.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

WHAT DOES THE AMATEUR ASTRONOMER CONTRIBUTE TO SCIENTIFIC RESEARCH?

(By Alan B. Rohwer)

Despite the neighbors' suspicions, amateur astronomers are not just crazed people who go out and look at the moon. Amateur astronomers are students of astronomy, surely the oldest of the organized sciences. Despite their sometimes modest equipment, amateur astronomers have been capable of aiding professional astronomers in performing scientific research. This paper outlines some of the contributions which these amateur scientists have made in advancing our knowledge of astronomy.

The heavens have always held a fascination for men and women. From the earliest, the sun in the sky governed their days, its rays warmed them, and its seasons regulated the planting of their crops. In the evening sky, the changing face of the moon, the wandering planets, and a multitude of stars created a spectacle. But the heavens, for all the influence which they have on our lives, remain remote to us and it is this very remoteness which dictates the nature of the study of astronomy. Astronomy has always been, as it remains today, an observation as opposed to an experimental science.

The phenomena of astronomy are, therefore, equally available to the amateur and to the professional. The amateur's limitation comes only in his more modest telescopes and equipment. In observing the heavens, however, the amateur community does have one distinct advantage. That advantage lies in the vast number of amateur astronomers and the diversity of their locations. Amateur and professional astronomers have often worked together to exploit this advantage and the first examples of amateur contributions to scientific research will serve to illustrate the use of this advantage.

The launching of the Russian Sputnik satellite was an event that seemed to startle the Nation. The Smithsonian Astrophysical Observatory, charged with the responsibility of tracking this and the other first artificial earth satellites, was, however, ready for the occasion. To perform the task of tracking these early satellites they had formed an organization called Operation Moonwatch. Moonwatch was a worldwide network composed primarily of amateur observers who observed the transits of satellites across the heavens.

A typical Moonwatch station consisted of a group of volunter observers, each with his or her own individual small telescope, viewing a certain segment of the meridian. An observer would announce the transit of a satellite through the field of his or her telescope and the station timekeeper would record the precise time of the observation. The observer would then plot the satellite's track as seen against the starry background of the telescope's field. In the early days the predictions of satellite transits were incredibly crude, many with errors of a half or more. By the taking of literally hundreds of thousands of observations, Moonwatch stations around the world contributed to our understanding of satellite orbital mechanics. The program remained active from its founding in 1956 until it was disbanded in the late 1960's. By that time the work which Operation Moonwatch had done in helping establish the thory of satellite prediction had contributed to rendering the project no longer necessary.

The second example of amateur astronomers in a network as part of a research program is a project which was also started during the International Geophysical Year 1956–57. For approximately 15 years, the National Research Council of Canada Meteor Centre maintained a network of meteor observing stations not unlike the Moonwatch

stations described above. Meteors are interplanetary debris which the earth encounters in its revolution about the sun. The scientific study of meteor swarms, the random and periodic showers which the earth encounters each year, requires the type of worldwide observing network which amateur astronomers are able to provide.

A meteor observing station was made up of a number of observers, each observing a selected section of the sky, and a station timekeeper. Stations like this were frequently quite portable and very informal, often consisting of no more than a few chaise lounges in the middle of an apple orchard. Their observing sessions have been known more than once to have aroused the interest of the local constabulary. As an observer spotted a meteor he or she shouted, "meteor," to which the timekeeper would reply by giving the individual meteor a number and noting its time. The observer then noted the meteor's number, brillance, and path on a standard star chart.

These data were returned to the Meteor Centre in Canada where they were correlated with results from other meteor observing stations and with simultaneous radar observations. Results from the Meteor Centre's observing program were published in scientific journals and the contributions of amateur observers acknowledged.

In the United States, amateur observations of meteors are currently being coordinated by the American Meteor Society. The Society publishes a bulletin, *Meteor News*, which appears five times a year, and various other publications concerning meteors and meteorites. Research programs undertaken by the group include the observation of meteor rates for periodic showers, reporting of sightings of the very bright meteors, called fireballs, and the coordination of meteor sightings to attempt recovery of meteorites, meteors which have fallen to earth. American Meteor Society activities continue the expansion of our understanding of meteor swarms and have led to the recovery of meteorite samples, which are themselves clues to the composition of the debris in interplanetary space.

Another network of amateur observers organized to do scientific research is an organization called the International Occultation Timing Association. Occultations occur when the moon, a planet, or asteroid passes in front of a star. The precise timing of these events can yield valuable scientific information.

First, because stars are fixed in the sky and their positions can be determined quite accurately, the transit of a planet in front of a known star can yield very precise information about the planet's position and orbit. For observations of this type to have astronomical value the observer must be able to determine his position on the earth's surface to within 100 feet, and must time the occultation's occurrence to within one or two tenths of a second. Amateur observers routinely perform observations to this level of accuracy using topographical maps to chart their location and using radio time signals to time the occultations.

The second aspect of occultation observing that is important is easily understood if one realizes that the planet doing the occulting is actually casting a shadow on the earth's surface. Measuring the edges and locations of occultation shadows on the earth's surface also yields important scientific information. Such an edge occultation of the moon is called a grazing lunar occultation. Observing grazing lunar occultations allows the precise determination of the moon's position in the north-south direction to greater accuracies than can be obtained by any other method. As many as a hundred amateur observing teams have been known to station themselves to observe grazing occultations and in so doing have been able to locate precisely the moon's shadow edge.

Recently, amateurs have organized to observe an even rarer phenomenon, occultations by asteroids. Amateurs, by observing the width of asteroid occultation shadows, have been able to assist in determining the diameter of asteroids which are too small and faint to have their diameters discerned through telescopes. In so doing they have helped advance our knowledge of these small members of the solar system's family.

Any discussion of the amateur's role in increasing our knowledge of the solar system must lead to a mention of one of the most diverse amateur organizations, the Association of Lunar and Planetary Observers. With a worldwide membership of about 800, the ALPO is organized into research sections, one devoted to each of the nine planets, one to asteroids, one to comets and one, of course, to the moon. Each section is run, and its work coordinated, by a section recorder. The recorder organizes and correlates observations of amateurs in his section's area of interest. These results are printed in the ALPO journal, which comes out every other month. A significant activity in which the ALPO has been active has been in supplying planet patrols in support of various space missions.

Most notable has been the work of the ALPO Mars patrol in supplying visual and photographic observations of the planet Mars during the various space missions to that planet. Keeping under close scrutiny a planet which a spacecraft is to visit is helpful in two ways. One, the planet is observed very closely while the spacecraft is en route, to determine what phenomenon might be in progress when the spacecraft arrives. Secondly, when the spacecraft is in the vicinity of the planet, earth-bound observations of changes in the planet may help aid in correlation of smaller changes that can be observed by the spacecraft at close range. The ALPO, through its various sections, and in its journal, acts not only as a clearinghouse for amateur observations of the moon, planets, and comets, but also gives professional planetary observers a forum wherein they can solicit the assistance of amateur lunar and planetary observers.

Amateur astronomers have always been active in the discovery and observation of comets. Although no precise numbers are available, it is probable that half of new comets are discovered by amateurs. Back in the 19th century there was actually a prize of $200 given to any Americn who discovered a comet. It is reported that the famous amateur, later turned professional, astronomer E. E. Bernard paid off his house with the prizes he had received for discovering comets. Sadly, the United States no longer offers gratuities to the discoverers of comets.

The world leaders today in the amateur discovery of comets are most surely the Japanese. Using only modest instruments, but observing with meticulous care, a number of individual Japanese amateur astronomers have discovered three comets each, and several have discovered as many as five. This is significant when one considers the time-consuming job of scanning the heavens for unknown comets. Some amateur comet seekers have been known to spend tens of years searching for comets without discovering an unknown one. However, amateurs need not discover comets to advance our knowledge of them.

Amateurs also assist the professional astronomer by photographing and observing comets during their periods of visibility. Comets are ephemeral creatures and, therefore, have to be observed very closely to record the changes that are involved in their evolution. Amateur astronomers help observe comet structure and also privide estimations of comet brightness. Comet brightness is an important measure in comet evolution, a phenomenon that is not well understood. An example of this lack of understanding took place in 1973 with the Comet Kohoutek. Comet Kohoutek, as may be recalled, did not live up to the Madison Avenue fanfare which proceeded it. Like many comets, it was predictably unpredictable, but because of the fanfare it became one of the most widely observed comets in history. Many useful observations of this and other comets have been contributed by amateur astronomers.

One of the oldest and most respected amateur observing organizations is the American Association of Variable Star Observers. The AAVSO is made up of approximately 1200 members, located in 37 states of the United States and in 23 foreign countries, who make regular observations of the magnitudes of variable stars. Variable stars are stars whose brightness varies either periodically or randomly. These stars are very much of interest to astronomers because their erratic nature often yields information about stellar evolution. The AAVSO maintains a program observing approximately 1500 different variable stars, making measurements of their brightness whenever weather conditions permit. This worldwide network of observers accumulates vast quantities of data, last year totalling over 170,000 individual observations. These observations are forwarded to their headquarters in Cambridge, Massachusetts, where they are computerized, published and the results supplied to astronomers who have interest in particular variable stars.

The AAVSO is also involved in the observation of stellar transient phenomena such as novae. Novae are exploding stars which increase greatly in brightness for a brief period of time and then fade. Astronomers believe that this phase of a star's evolution comes near its death, and thus the nature of this exploding and decay is very much of interest. In observing novae, as in observing the more regular variable stars, AAVSO observers use standard star charts for comparisons to the brightness of the stars under study. As with the other amateur research organizations, AAVSO is often put on alert by professional astronomers when they desire particular observations. In 1975 the AAVSO was put on alert in support of the Apollo-Soyuz space mission and asked to observe specific variable stars of potential interest to one of the experiments on board the spacecraft. In response to AAVSO observations of the peculiar behavior of the variable star SS Cygni, the plan of the Apollo-Soyuz space mission was changed so that the extreme-ultraviolet experiment package could be turned towards the star Cygni to record the activity taking place. These never-before-seen extreme-ultraviolet emissions would not have been observed were it not for the support of the AAVSO observers who were on the alert.

Another AAVSO observing program involves the observation of sunspots. Sunspots are magnetic storms on the sun's surface and their number is used as a gauge of solar activity. AAVSO observers, often using home-made instrumentation, set up and observe sunspots whenever weather permits. The number of spots appearing on the solar disk is recorded, and the datum is sent to the AAVSO Solar Division where it is compiled with the observation of other amateurs. These data are correlated to make up what is known as the U.S. number, which is a gauge of solar activity on that particular day. This type of information is used in research in such diverse fields as radio propagation and longer-term climatic prediction.

Finally, it would be negligent to present a paper in the State of Vermont without making mention of the great impact which Vermonters have had on amateur astronomy. That impact began with the work of Russell

W. Porter who, in 1919, organized a group of amateur telescope makers in the town of Springfield, Vermont. This group was one of the pioneer amateur telescope-making groups in the United States. Not only did its members build telescopes with optics made by their own hands, but they also shared their knowledge by collaborating in the writing of a book on amateur telescope-making.

This book, published in the 1920's, was later expanded into three volumes and is still in print. Even today it is considered one of the basic references, not just in amateur telescope-making, but in telescope-making in general. The thing about the club's work that is of particular importance to amateur astronomy is that it put the study of astronomy within the range of anyone who had the patience and the initiative to build his own instrument. In the early 1920's the club constructed a clubhouse and, of course, an observatory on a hill outside the town of Springfield. In 1926 they held their first amateur telescope-makers convention at their new clubhouse, Stellafane.

This convention goes on, each year attracting approximately 1,000 amateur telescope makers from literally all over the United States and Canada, and from as far away as England, The Netherlands, and Japan. What the participants bring with them, along with their enthusiasm for astronomy, is the telescopes of their own making. Their instruments are of excellent quality and are amateur only in the sense that they were made for love and not for money. The exchange of information and ideas that takes place at the convention exemplifies the element which is best in amateur science. The very special place which Stellafane holds in the mind of amateur astronomers has recently received a wider recognition. First, from the town of Springfield, Vermont, by its inclusion of the Stellafane clubhouse on its bicentennial medal, and, more recently, from the State of Vermont by its nomination of the Stellafane clubhouse for a place on The National Register of Historic Places.

In conclusion it must be said that the professional astronomers will continue to scan the heavens with their sophisticated instruments and at the same time amateur astronomers will continue to observe the heavens with their more modest means. Together they are driven by a fascination for the heavens, and together they will help increase our knowledge of the universe.

The following are the addresses for organizations mentioned in the paper:

Meteor Centre, Herzberg Institute of Astrophysics, National Research Council of Canada, Ottawa, Canada K1A 0R6.

American Meteor Society, P.O. Box 213, Geneseo, New York 14454.

International Occultation Timing Association, Secretary: Berton Stevens, 4032 N. Ashland Avenue, Chicago, Illinois 60613.

Association of Lunar and Planetary Observers, Director: Walter H. Haas, Box 3 AZ, University Park, New Mexico 88003.

American Association of Variable Star Observers, 187 Concord Avenue, Cambridge, Massachusetts 02138.●

SOUTH CAROLINA RESOLUTION 389

● Mr. HOLLINGS. Mr. President, on March 2, 1978, the South Carolina General Assembly passed a concurrent resolution memorializing Congress to pass House Joint Resolution 389 or Senate Joint Resolution 75 designating the pine tree as the national arboreal emblem of the United States.

On behalf of the senior Senator from South Carolina (Mr. THURMOND) and myself, I ask unanimous consent that this resolution be printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

A CONCURRENT RESOLUTION

Whereas, there are presently before the Congress two joint resolutions to name the Pine Tree as the official National Tree of the United States; and

Whereas, the Pine Tree symbolizes the American past more appropriately than any other tree; and

Whereas, it provided the first settlers with shelter and fortresses and has endured to this day flourishing in all fifty sovereign states of the United States; and

Whereas, the Pine Tree represents the renewable resourcefulness of the United States more appropriately than does any other tree, valued for its durability and as a raw material for the economy and industry of our great nation; and

Whereas, Mrs. Barbara Bayne's sixth graders at Berea Middle School, Greenville, South Carolina, are passionately involved in this national tree legislation, endorsing its passage and actively enlisting support by contacting congressmen and citizens throughout this nation; and

Whereas, the General Assembly adds its endorsement for the passage of the resolution naming the Pine Tree as the official National Tree and commends Mrs. Bayne's sixth grade homeroom class for the initiative it has taken to secure deserving recognition to the stately and ubiquitous pine. Now, therefore,

Be it resolved by the House of Representatives, the Senate concurring:

That the Congress of the United States be memorialized to pass House Joint Resolution 389 or Senate Joint Resolution 75 designating the Pine Tree as the National Arboreal Emblem of the United States.

Be it further resolved that copies of this resolution be forwared to each United States Senator from South Carolina, each member of the House of Representatives of Congress from South Carolina, the Speaker of the House of Representatives of Congress, the President of the Senate of Congress, the Chairman of the Committee on Post Office and Civil Service and Mrs. Barbara Bayne, Berea Middle School, Route 3, Montague Road, Greenville, South Carolina, 29609.

HYPERLEXIS: OUR NATIONAL DISEASE

● Mr. MUSKIE. Mr. President, Bayless Manning, former president, Council on Foreign Relations, Inc., and former dean of Stanford Law School, has written a thought-provoking article about the proliferation of statutes, regulations, and ordinances at all levels of government. Mr. Manning's article is not a standard conservative argument against government programs and social reforms. Rather, it is an attempt to impress upon the public and particularly those of us who enact laws that lawmaking and regulations carry with them costs to society that ought to be analyzed in relation to the benefits we hope to achieve.

Mr. Manning's article appears at a time when public cries of government interference and overregulation are on the increase. For this reason and because the article places the problem in clear and reasoned perspective, I call it to the attention of my colleagues.

I might add, Mr. Manning argues that sunset laws, while not a cure-all, are "centrally sound" and deserve careful consideration. As principle sponsor of the sunset bill now before Congress, I was particularly pleased that Mr. Manning included this legislation in his analysis.

Mr. President, I ask unanimous consent that the article be reprinted in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

HYPERLEXIS: OUR NATIONAL DISEASE

(By Bayless Manning)

"Hyperlexis" sounds like some sort of serious disabling illness. It is. Hyperlexis is America's national disease—the pathological condition caused by an overactive law-making gland.

Measured by any and every index, our law is exploding. New statutes, regulations, and ordinances are increasing at geometric rates at all levels of government. The same is true of reported decisions by courts and administrative agencies. Whole new legal fields spring into being overnight, such as environmental law; older fields like real property are experiencing infinite fission. Statutory codes, such as those in the fields of commercial law and taxation, are becoming ever more particularistic, longer, more complex, and less comprehensible. We are drowning in law.

Out situation is aggravated by the wind of legal commentary set off by the firestorm of law. Law has always been one of the garrulous professions, and modern communications gadgetry makes it all too easy to record, reproduce, and distribute legal words. As in the wake of a great ship mewing seagulls follow, so legal commentators pursue the society's law-making machines, squabbling over the newly emitted material. Our law libraries are swamped, our citizenry is confounded by the legal blizzard, and our imperiled forest reserves are further depleted.

INCAPACITATIONS

Granted that we are awash with law, is it cause for any serious concern? Is hyperlexis a critically disabling disease or merely a nuisance? The answer is that it has already done a great deal of harm to the American body politic, and if it continues, it will incapacitate us in a number of different ways.

First, though not first in importance, is simple dollar cost. What does it cost to operate our elaborate institutional machinery of federal, state, and local courts, prosecutors, bailiffs, investigators, administrative agencies, police, examiners, lawyers, law schools, legal aid programs, law publishers, correctional facilities, etc.? We have no data on the amount of national resources that are devoted to operating our growing corpus of law. That, in itself, is a significant fact, reflecting the simple truth that we have never thought it important to ask the question. But the dollar figures are obviously measured in the tens of billions of dollars annually. Are we getting our money's worth as a matter of national priorities?

Second, on every hand we are presented with the visible fact that our legal system is clogging and choking into paralysis. Everyone knows that enforcement of the law has sunk to a new low for this country. Judicial and administrative backlogs make it impossible to dispose of disputes and charges expeditiously. The criminal process is in a state of epilepsy. This condition is caused in part by over-criminalization, by laws that declare behavior to be illegal but are either unenforcible or cannot be enforced with existing institutional means and resources. The flood of petitions to the Supreme Court is so great that numerous proposals are afoot

to narrow the inflow of its work. The Chief Justice of the United States Supreme Court urges Congress once more to increase the number of federal judges to deal with the rising caseload. The same pressures are at work within the states. Insufficiency of resources produces the disgraceful, but necessary, practice of plea bargaining. The inability of traditional procedures to deal with the flood of automobile accident claims has led to experiments with no-fault administrative solutions. Probate procedure is a farce of delay and paper shuffling. Law suits are interminable, and it is no new discovery that justice delayed is often not justice at all. All legal circuits are overloaded and all warning lights are red.

Third, when the processes of the law coagulate, legislatures are deprived of the opportunity to make real public policy choices. It makes little actual difference what law is enacted if it will not, or cannot, be enforced.[1]

Fourth, public respect for the law, and attitudes toward voluntary compliance with the law, are clearly declining. Voluntary compliance sags and a scoff-law attitude is bred when the law is not enforced, or when its enforcement is diluted or erratic. Those who might have been deferred from criminal behavior by the prospect of punishment are not deterred when they observe that the law is seldom enforced in fact. In such an environment, those who are apprehended and punished feel themselves merely the victims of bad luck or discrimination, and not the objects of evenhanded justice. Proliferation of judges, police, examiners, auditors, inspectors, and other officials inevitably increases the risk—nay, the certainty—that some will be corrupt or corrupted and thereby still further degrade the law in the public's eyes. A legal system that is not respected by its people cannot be made to operate at all.

Fifth, when burgeoning law and scant resources make it impossible to enforce all laws against all offenders at once, then discretionary choices must be made by police, by prosecutors, and by bureaucratic officials. Increasingly in the United States, the choice as to what to enforce and against whom to enforce it is made by those persons. The exercise of that discretion is an explosive matter of the utmost delicacy. It will inevitably become a focal point for improper pressures and corruption. Improperly applied, it will lead to petty tyranny and intolerable discrimination against some citizens.

Sixth, the purpose of a large part of modern law is the elimination of unfair or unequal disparities among citizens. But hyperlexis works squarely against that objective. In a highly regulated environment of intricate restrictions, those best able to survive are those who are able to hire the new class of form-filling consultants—experts (mainly, but not exclusively, lawyers) who can invoke rules on behalf of their clients and pick their way among the bramble bushes. Such trained talent is rare and expensive; inevitably it will largely be commanded by those persons and organized groups that are best able to pay. Though everyone suffers from hyperlexis, the small are injured more than the great.

Seventh, a point of special interest to lawyers, hyperlexis has undermined the function of precedent and stare decisis on which the continuity of the common law was based. The lower courts today still try to follow the mandate of the highest court in their jurisdiction. But in many fields of the law the sheer proliferation of legal variants in thousands of published judicial decisions makes it impossible in all but the most gargantuan litigation for the lawyers or the judges to review the relevant earlier cases. As a result, the lawyers and the court can only pick and choose from the relevant precedential material—a radical departure from the intellectual premises of classical Anglo-American jurisprudence. Foreseeability is a critical element in public confidence in the law. Hyperlexis is helping to undermine that foreseeability and that confidence.

Eighth, the key to the unparalleled success of the economic system of the United States lies in its flexibility, its ability to respond quickly. Increasingly heavy regulation of economic activities is loading increasingly heavy cost burdens on businesses and on consumers. More serious than ocst, the increased regulation and new requirements for prior clearances at all levels of government are hobbling the capacity of the economy to make necessary decisions rapidly. And it is not just private enterprise that finds itself regulated into slow motion. Governmental agencies also find themselves immobilized by their own regulations and stymied by those of other agencies.

Ninth, courts and legislatures have combined to produce a judicial process in which almost any proceeding will have some fatal technical defect, and almost any project undertaken can be blocked. Multiple appeals, collateral attack, procedural challenges, dilution of requirements of standing and the like are the hallmarks of our era. That every man should have his day in court is classical. But until now it has not been thought that every man should have 100 days in court, or that he should have a day in court on every social and political issue in the society. Proliferation of regulatory requirements and prerequisite clearances, dramatic increases in the circle of optential legal complainants and interminability of judicial proceedings are together making it increasingly difficult for the society to respond to the very social problems to which most of our regulation is addressed. The principle of "one person, one vote" threatens to become perverted to a principle of "one person, one veto." No society can operate on that basis.

Hyperlexis is not a nuisance. It is a heartworm that has literally fatal potential for the body politic of this country.

DIAGNOSIS

If hyperlexis is such a pernicious thing, why do we not, in true-blue American style, get about the job of fixing it? One reason is that we are just now at the first stage of identifying the disease and of realizing that we have it. But the second and more important reason lies in Pogo's immortal words—"We have met the enemy and he is us."

A fair amount of talk is to be heard these days in many and diverse circles about the need to get rid of "overregulation." Most of this talk asumes, or implies, that "overregulation" is a unitary thing, that it is the nefarious product of ambitious bureaucrats or crypto-socialists, and that it can be cured by a few bold surgical strokes of deregulation. The facts are quite otherwise. Regrettably, hyperlexis is a subtle illness; its forms are many and its causes are multiple. Behind the superficial term "overregulation" a number of different phenomena and forces are at work, most of them deeply rooted in American society and American attitudes.

The federal system

Part of the hyperlexis problem arises out of our layered federal system, the most complex governmental operation in the world. We maintain thousands of law-making instrumentalities, each of which merrily generates law on its own with little or no regard to the others. The tiers of government have become far more than the traditional triad of federal-state-local, as counties, districts and varieties of regional authorities and functional commissions have emerged as law generators in recent years. Moreover, the interface between federal programs and the administrative structures of state and local governments is a jumble of nonconnections and misconnections. Uncoordinated multilayered regulations, licensing, and supervision have the capacity to bog down the workings of the entire society.

Ideology: The proper subjects for Governmental action

Classical American political thought conceived of a small discrete area as appropriate for governmental functions and a much larger area allocated exclusively to the private sector. In this century, the line between the two has become blurred and, in the minds of many of today's citizens, it has become altogether obliterated so that no limits on governmental regulatory activity are conceded to exist. This change in basic attitude is a major factor in the recent growth of regulation. Governmental regulation reaches out to more and more forms of citizen conduct because there is no longer a widely shared perception of a political-philosophic-legal barrier to inhibit or contain regulatory extension.

Ideology: Equality of opportunity and egalitarianism

As a part of the long historical thrust of the American dream, the Congress, the courts, and many local law-making bodies have made a major effort in recent years to tilt more of the benefits of life towards disadvantaged ethnic groups, lower income groups and women. The major instruments used for this purpose have been laws regulating the nonminority and laws granting enforcible rights to the minority. Implementation of these new laws in a great campaign to achieve equality of opportunity or, as some voices now advocate, equality itself, has called for great increases in regulatory mechanisms, in surveillance techniques, and in the decisional burdens carried by the courts and other tribunals.

Ideology: Distributing the risks of life

A significant contributor to the flood of litigation, regulations and legislation is a rising feeling among many members of the public that the society as a whole should in some way compensate the individual for almost any loss he sustains. That is a political proposition, not an attribute of the legal system itself. How far we should go toward trying to create a riskless society, at what cost, and paid for by whom will be the major American political issues for the rest of this century. However those issues are balanced out, the outcomes will be expressed in statutes, regulations and opinions, which will add to the inflated corpus of our law, and which will add to the burdens of our legal institutional process.

Ideology: Proceduralism and participationism

No society in history has been as deeply concerned with legal procedure as has the United States. Our traditional concern for the individual, for fairness and for due process has brought us to the point where almost any matter can be challenged and reviewed again and again, at the instance of large cohorts of complainants through extended formal adversary procedures and safeguards that were designed for (and once limited to) heinous crimes. To our concern for proceduralism has been added of late an increasing trend to engage the participation of larger numbers of citizens in all issues of public interest. Extension of voting rights has been one manifestation of the reach-out to extend participation; community action groups and self-styled "public interest" groups is another; and wider class actions and lower barriers to standing are others. Proceduralism and participationism together have in-

[1] A study is currently being conducted by the Bar Association of the City of New York and the Drug Abuse Council on the effects of the 1973 "get tough" revision of the New York drug laws. Though not yet complete, it has begun to appear that the project may offer a well-documented illustration of this point.

creased geometrically the burdens of the courts.

Uses of the law and the judiciary

Critics of President Johnson's Great Society described its basic principle as follows: "Identify a problem, then throw money at it." But our true and peculiarly American governing principle, old enough and visible enough to have been noticed by De Tocqueville, is: "Identify a problem, then throw a law at it." Despite repeated disappointments, it continues to be almost universally accepted by Americans that legal resort is the most effective way to solve any problem.

Similarly, it has always been a peculiarity of Americans to turn to their courts for resolution of difficult problems. The special role of the Supreme Court as ultimate arbiter of constitutionality enhances that impulse, but the people's faith and reliance in its judges runs both wider and deeper than that. Whether in matters of civil rights, town planning, the economics of the market place, or labor-management relations, to name but four, the judiciary will play a key, and often determining, role in the United States. The inevitable result is that we are the most litigious people in the world. We go to great lengths to find ways to cast any and every problem into the familiar pattern of a two-party adversary trial and take it to court.

Interest group representation

Our political system for decision making is fundamentally built upon coalitions and trade-offs among elected representatives of interest groups. Though each of us may say that he wants less law and less regulation, the fact is that every economic, ethnic, religious, or ideological group in the society wants something supported, regulated, or banned by the law. Every interest group does its best to capture the legislative, administrative, and judicial system and harness it to its particular ideas of the good, the true and the profitable. Coalition voting patterns in our legislatures guarantee that those efforts will often succeed, and that every year there will be a bumper crop of new laws.

Elected officials and scorekeeping

For elected officials, the most obvious route to reelection, and perhaps even to immortality, lies in new legislation. Who would recall Senator Sherman or Congressman Mann were it not for their Acts? As batting averages are to baseball players, stars to restaurants, ribbons to generals, and stock prices to corporate executives—so new statutes are at the heart of the scorekeeping system by which legislators are measured and measure themselves. No legislator gains recognition as a great nonlaw giver or as the Great Repealer.

Particularization

The national commitment to deal with the individual as an individual, to treat each case on its special merits, combines with our political system of interest group representation to produce law that is often highly particularistic. Every group and subgroup seeks to obtain, and often obtains, special statutory provisions expressly aimed at its own particular circumstances. The result is an impenetrable legal jungle of special provisions. A significant part of the hyperlexis problem arises from the effort to deal with problems with too great particularity. Contrary to surface impression, detailed specificity in a legal provision does not reduce disputes; particularization merely changes the vocabulary of the dispute. The most detailed statutes, like the Internal Revenue Code, are the ones that proliferate most rapidly and generate both the greatest need for administration and the most disputes.

Technological and social change

The rate of change in the modern world has no precedent. That fact, too, is a contributor to the law explosion. Technological change often demands new public agencies and programs. The birth of the Atomic Energy Commission and its recent transmutations toward a Department of Energy are illustrative. Major technological change also inevitably brings social dislocations in its aftermath. Increasingly, it is coming to be recognized that the losses from such dislocations should not all have to be absorbed by those industries, workers, communities and institutions that happened to be hit by the change. The implication of that statement is, once more, an expanded function for the legal administrative process in order to distribute the loss. Analogously, major social change such as Black migration from the South, tends to lead to wider governmental activity, particularly at the Federal level.

Bureaucracy

As spiders by their nature utter cobwebs and spawn more spiders, administrative agencies by their nature utter regulations and spawn more administrative agencies. Administrative agencies and programs are remarkably hardy, capable of surviving virtually any effort to uproot or cut them off. Growth in legal activity would not be so difficult to accommodate if old agencies died off as new ones appeared. Alas, the process does not work that way. Old laws and old agencies neither die nor fade away; being nonbiodegradable they only accumulate.

No brakes

Finally, a negative point is worth noting. As our legislative and administrative system operates, there are no internal forces at work that tend to counter the process of law generating, to act as inhibitors or governors. Externally the same is true since many interest groups work increasingly to add, amend or delete particular laws, but there is no major interest group that focuses attention on the health of our legal order as a whole.

It is no wonder that the lawmaking engines of the United States grind out legal prescriptions like the fairy-tale salt mill at the bottom of the sea—unremittingly and in ever greater volume. Many powerful forces push in that direction, and no significant forces resist.

THERAPIES AND MITIGANTS

Can we do anything to check the advance of the nation's hyperlexis? A glance at the roster of root causes just listed will make it clear that most of them are congenital to our society and government. They arise straight out of the essence of the American experiment itself. They cannot, and should not, be made to go away. Our search therefore must be for helpful therapies and mitigants, not true remedies. In that direction, quite a lot can in fact be done if we will do it.

Public education

Highest on the list of therapies is public education, with the term "public" referring not only to the populace at large but also to legislators, administrative officials and judges at every level of government. That educational effort should stress five propositions that are true of any legal system—five truths that today we either do not recognize or willfully brush aside.

Proposition 1: To declare a law is very cheap; to administer or enforce a law is very expensive.

As there is no such thing as a free lunch, so there is no such thing as a free law. To achieve even modest effects through law requires huge investments in institutional machinery. It is an ineluctable fact of life that every new chore we assign to our legal system must either be accompanied by a commensurate investment of additional resources into the legal institutional system, or the new legal initiative will merely dilute or displace institutional energies away from other tasks that have been assigned to the system.

We have finally begun to learn that the world's natural resources are finite and increasingly expensive. We will eventually have to learn that our legal system is also a limited resource. With a limited resource one must inevitably make choices and establish priorities among objectives.

Proposition 2: The secondary costs of a law are often greater than the direct costs.

Apart from the obvious direct costs for enforcement machinery, legal regulation often entails other hidden costs that are very large. It is not my point here, though it is true, that the substantive objective of a legal program often demands costly tradeoffs as where, for example, pollution abatement may reduce productivity and increase unemployment and price levels. The costs to which I refer here are hidden, private administrative costs that are almost never recognized or considered.

How many millions of citizen-hours per year are poured into the preparation of federal, state and local income taxes—hours that could have gone into productive activity or into leisure time pursuits even more enjoyable than tax computation? What is the total national economic expenditure currently required of all employers and employing agencies to complete and file reports on securities issues, retirement plans, health conditions, taxes, safety, pollution, affirmative action programs and the like?

If we stay on our present course, a caricature of tomorrow's American society will be a six-person model—a regulator (and his lawyer), one who is regulated (and his lawyer) and an adjudicator (and his administrative assistant) which resolves disputes between regulator and regulatee. Without counting review mechanisms, that makes five persons engaged somewhere in the process of regulating the sixth, with four of them on the public payroll. Not even the bureaucracy of imperial China reached that height of civilization.

Ancient Mediterranean societies found it necessary to develop a paid professional class of temple votaries who assisted the citizenry in the complexities of their prayers and ritual sacrifices to keep on good terms with their deities. Modern America is generating a new class of form-filling specialists (many of them lawyers) to help the citizenry keep on good terms with their regulators. Every new statute or regulation adds to the number of the new class and increases the demand for their services. Members of the new class are intelligent and energetic, and their training represents a very large social investment. Are the costly skills of these professionals today being utilized to maximum constructive social advantage? What is the annual aggregate of their fees, and who really pays it?

The direct costs for legal administration and enforcement of our laws are only the tip of the iceberg of the true costs of a highly administered society.

Proposition 3: The capacity of law to change human behavior is limited.

To be effective, any law must rely upon a base of supporting public opinion and voluntary compliance. Even when those supports are as assured as they are in the case of laws against violent crime, the actual effects of the law as written are always marginal. Where public opinion is indifferent and voluntary compliance spotty, the effects of law will be minimal, regardless of investment in enforcement. The lesson of the Volstead Act must not be forgotten. Law is not only costly, it brings only a limited return as a device for actually affecting human behavior.

Proposition 4: Even where a law may effectively achieve its primary purpose, the

side effects may be too great and too negative to warrant its adoption.

As in physics, Newton's third law of motion governs, so in a society every legal action produces its own reactions; those side effects are frequently both major and undesirable.

Tariffs and import prohibitions produce smugglers; harsh criminal laws generate plea bargaining; all-out enforcement campaigns threaten civil rights; extension of remedies and procedural nicety lead to judicial clog; protecting consumers by subjecting third-party financers to the seller's warranty constricts consumer credit and increases its cost; the most nobly inspired regulation breeds ignoble bureaucracy; minimum wage legislation contributes to unemployment; open-ended governmental medical assistance leads to inflation of medical costs and fraud; protective regulation for employees' retirement plans produces a decline in the number of such plans; high malpractice awards lead to soaring insurance rates, reductions in service, and increases in medical fees, etc., *ad infinitum*.

Law's benefits are not only limited; its by-products are often affirmatively damaging.

Proposition 5: Many problems are not amenable to legal solution at all.

Legal fiat cannot create resources; it cannot repeal economics; and it cannot supplant psychological causes of human behavior. Law is a useful tool; it is not an all-purpose tool.

We Americans act as though regulatory law were an all-purpose instrument, free of negative side effects, and a free good. We must come to understand that regulatory law is in fact of limited utility, accompanied by significant and frequently harmful side effects, and expensive. A great deal of public education will be required to bring about that change.

A public interest group on the state of law

The nation's legislatures and administrative agencies (and perhaps the courts, too) desperately need some organized institutional voice that continuously reminds them and the public of the importance of maintaining the operability, integrity and efficacy of the functioning legal system as a whole. Each so-called "public interest" group today tends to work in a narrow corner of the law, and will be found to have a particular policy perspective of its own. A new public interest vehicle should be organized specifically with a broader concern for the state of the law as a system, drawing upon the organized bar, the national court and the state court centers, the administrative conference, and a combination of other components of the apparatus of the legal system, such as the prosecutors, the police and the public defenders.

Once established and funded, this new organization would take a leading role in the public education mission just described, would do continuing research on the true cost of implementing legal programs and would monitor the functioning of the legal system to detect the location and causes of the worst strains and bottlenecks.

The judiciary can often gauge better than others the true impact of programs upon the legal system. Currently, however, we have no way for the judiciary's voice to be heard by our legislatures, since it cannot effectively organize itself to speak as a lobby before the legislature. Chief Justice Burger deserves particular credit for his personal leadership in speaking up on such matters, but the job is immense and calls for the continuity of institutional help.

Cost research

The Congress, executive branch and judiciary—and state governments too—should set up ongoing machinery for ascertaining the true economic costs, direct and indirect, of administering our existing legal programs. Initial estimates will be very crude, but they will provide some benchmarks where today we have none.

Impact statements

Each new legislative or regulatory proposal should be required to be accompanied by an "actual cost" impact statement that brings before the legislature at least a gross estimate of the true costs and implementation burdens of the program, direct and indirect. It is tempting to argue for a rule that requires one old program to be repealed for every new one enacted. But in the absence of that quixotic principle, legislatures can at least establish procedures that will require them to weigh the true costs and burdens of a legal program when they consider whether to adopt it. And no legislative bill should be allowed to pass without appropriations to provide administrative, judicial and other legal agency resources required to give it effect.

How to apply a similar principle to sweeping pronouncements by courts and administrative agencies is a puzzle for which no solution is apparent. At a minimum, however, the consciousness of courts and agencies can be raised to the reality that some answers to some questions before them would add very large additional amounts to the direct or indirect social costs of the legal system.

Self-executing substitutes for regulation

Our law should not rely so heavily upon the administrative and judicial process for its effectiveness. The most cost-effective laws are those that are complied with in response to incentives and disincentives that are built into the law itself. We should make greater use of that self-executing principle to relieve the insupportable pressure now being imposed upon our administrative and judicial systems. Our scholars and our governmental staffs should undertake more diligently to search for and to invent more legal devices that employ this principle in place of monitoring by administrative agencies and litigation in the courts.[2]

Sunset laws

Laws that set up programs, or declare something illegal, or establish a regulatory body are virtually never repealed. Duration limits should be required to be included in every such statute or regulation so that it will after a time expire automatically if not repromulgated. Serious support for such so-called sunset laws has begun to appear in Congress. This approach is not a cure-all and it entails some fearsome difficulties in its implementation, but the idea is centrally sound and deserves full exploration.

Program evaluation

The practice of postevaluation of the actual results of governmental programs is in its infancy, but it has at long last been born. Many statutes on the books either have no real impact, or are counter-productive to their purpose, or produce only marginal impact, at high cost, or generate unacceptably negative side effects. Legislative programs should be required to be periodically evaluated to see whether they are achieving the intended effects and at what costs and with what side effects. Provision for such evaluation should be made initially in all new program legislation, and evaluation should proceed on a continuing basis. Such evaluation should be an absolute prerequisite to re-promulgation of a provision that has expired by its own sunset terms.

Decriminalization

Virtually all students of the subject, and many criminal enforcement officials, now recognize that action should be taken to reduce the mass of criminal law now on the books. As the situation now stands, decriminalization takes place anyway, but it is done through police nonenforcement rather than by proper legislative act.

In a world of pure analytics and theory, the criminal law is recognized as overlapping with, but entirely separate from, moral prescriptions. There may be good reasons to make price fixing a criminal offense while the pulpits never mention it; religious leaders may inveigh against worshipping idols while the criminal law is silent on the subject. Ideally, too, since enforcement of the criminal law should be strict, certain and swift, in order to maximize its deterrent effect, the criminal law system should not be asked to do more than can be effectively and swiftly enforced.

In real life, however, the situation is very different. Most Americans do not distinguish between moral precipitations and legal mandates. It is a striking characteristic of American history and attitudes that we have persisted in the idea that, though church and state are separate, the engines of the state should be invoked to punish all behavior that we find morally objectionable. As a result, our criminal codes are full of mandates about personal behavior that are unenforced but unrepealable; no legislator can safely vote to make activities legal that profoundly offend the moral and social sense of his constituents. As a result, decriminalization is very difficult.

Can nothing, then, be done? One thought would be for legislatures to embark upon a serious program of public hearings and review of local criminal laws specifically focused on three questions: Which criminal laws are not being enforced and why? What resources would be required to enforce them all? What priorities should be followed by enforcement officials if they are forced to give up enforcing some laws in order to apply resources to the enforcement of others?

The result of such an undertaking would be very constructive. The public, and the legislature, would have to confront the problem squarely and honestly. Pressures for still more criminal laws might be headed off. A few criminal statutes might actually be repealed. The public would learn something of the costs of increasing criminalization, and the law return. And out of the process, some sense of legislative priorities might emerge formally or informally, and thereby provide a more legitimate basis for selective nonenforcement than now exists.

Countering particularism

Efforts must be made in every area to simplify the law and to produce what may be called generalizable, as opposed to particularistic, law. We must, for example, reorder the present maze of tax laws, and substitute a taxing scheme that is simple enough and general enough as applied to the individual to be understood by the average citizen. Of course it is true that the more general a legal provision is, the less the result is hand-tailored to the circumstances of the individual case. But the more the law undertakes to handcraft a tailored result for every individual—with a full panoply of traditional legal review procedures—the greater the obscurity to the general citizen and the greater the burden upon the system in money, manpower, time and effectiveness. The time has come when a balance between generality and hand-tailoring must be struck nearer to the former. We must learn to legislate by approx-

[2] This theme is elegantly developed in the recent Godkin Lectures delivered at Harvard University by Charles Schultze, now Chairman of the Council of Economic Advisors, and scheduled for publication in August 1977 under the title *Public Use of Private Incentive*.

imation. So far, we have not yet acknowledged that elemental truth.

Institutional change in the legal system

Hyperlexis compounds, and is compounded by, other difficulties that beset our system of justice and dispute resolution today. Those difficulties mainly arise from structural defects, from uninventiveness and inertia in the face of social change, from institutional anachronisms, from inattention to elementary principles of administration, and from the effort to misapply traditional processes to modern problems. We shall have to deal with those conditions as well as hyperlexis itself, and indications are that major changes are coming soon in our system of justice.

As the courts clog, mediation and arbitration are coming into their own as dispute-settling mechanisms. No-fault is nearly here in the automobile field. Simplified small claims court procedures available on a neighborhood basis are desperately needed and are coming. Paralegal personnel will become a useful resort to the average citizen. The docket of the Supreme Court will in some way be curtailed. Today's probate procedures will be superseded by simpler ones for most estates. The jury system will be made less expensive, in some circumstances through smaller juries, and we will eventually curtail its automatic availability. The extremes of proceduralism have been reached and the pendulum will swing toward limiting and eliminating appeals, speeding up the disposition of litigation by rigorous methods, narrowing the avenues for collateral attack, imposing order on class suits, and recognizing that issues of less moment do not demand the elaborate procedural safeguards that are appropriate for issues of greater moment.

More new ideas of this kind are needed to expedite the functioning of the system and increase its accessibility to the average citizen. Happily, most of the organized bar has come to see the desirability and inevitability of these developments and is today playing a responsible role in adapting traditional ways to new conditions.

The limits of the legal sanction

Our legislatures, courts and agencies must eventually recognize, and the public must come to see, that the legal system simply cannot operate if it tries to provide for every citizen and institution a law suit against every other citizen and institution to resolve every difference of view or interest, to redress every perceived invasion of privilege, and to recompense every risk of living. The ultimate results of that approach will be to halt the legal process and simultaneously frustrate the society's capacity to make policy decisions. However unpalatable and unpopular it may be to say it in today's climate, the American legal system must continue to concentrate upon the rights of the individual, but it must now also turn its attention to the collective need of the community for a governmental and legal system that functions with reasonable effectiveness. The alternative will be a massive socio-legal traffic jam. In a legal system that tries to offer everybody a remedy for everything, no one will have a remedy for anything.

The federal system

Most overwhelming is the question of the federal system and what can be done to make it work better in modern conditions. The answers must lie in the direction of a greater degree of coordination among the levels of government, and, almost certainly, a major recasting of the way the federal government laterally administers its own programs and fits into state and local structures. This is a subject of high politics, and it will probably take the rest of this century to develop new working principles within the framework of the Constitution that are compatible with, and responsive to, the realities of an increasingly administered society. It may be hoped that the new administration in Washington, and its future successors, will give this extraordinarily important and difficult subject the high priority it deserves.

Resource investment

Even if all these things are done, substantial additional dollar resources will have to be invested in the legal system if it is to be expected to handle its increasing assignments. The legislatures cannot, in hyperlectic abandon, simply keep loading more on to the same camel; eventually it will either lie down or its back will break.

CONCLUDING COMMENTS

The thesis of this article is easily susceptible to misunderstanding, not to say vulgarization. It should not be confused with standard conservative American political oratory decrying governmental programs and opposing social reform. The government will, and in my view must, often intervene in the social process through regulation and law. Many governmental programs in operation today are essential in a decent society, and more are imperative in the near future, particularly programs addressed to our cities and the problems impacted within them. The thesis argued here is a clinical one—a matter of cost/benefit analytics. As new programs are proposed, it must come to be recognized, as it is not today, that the cost of more regulation and law making are great and grow geometrically—and the payoffs decline correspondingly—as the nation's legal institutional circuitry becomes increasingly overloaded.

We all want our idea of the good to be done, and we all want everyone to receive justice. But law is not a free good. If we were willing to devote a large percentage of our GNP to an expanded system of dispute resolution, and another large percentage to enforcement of legal compliance, we probably could for a time make the present system work despite our overactive law-making gland. So far, however, we have not been willing to commit those resources. For the future, if we continue to generate new law at the rate we are going, no amount of resources will be sufficient to administer them effectively. Unless we change our ways along the lines indicated here, the inevitable result will be a gradual winding down of our legal system and a corresponding decline in the effectiveness of our law and of its standing in the public eye.

One should have no illusions that the democratic law-making process can be made, or should be made, a model of efficiency. Its democratic character is worth far more than cost/benefit elegance. It is inevitable that legislators and other public officials will sometimes use law making for moral posturing. If a bill is proposed to declare sin illegal, very few legislators can be expected to vote against it on the ground that it will not be effective, will be expensive to try to enforce, and will dilute the efficacy of the rest of the legal system—even though all that is true. Nonetheless, we can do quite a lot to build into the law-making machine a series of governors or brakes to inhibit our presently unrestrained law-generating process.

For the first time in the nation's history, today's public is politically receptive to understanding and responding to that need. We appear to have learned something from the inattention of Great Society programs to problems of implementation. Governmental effectiveness has, at last, begun to take hold as a political issue among the public at large.

Clearly audible in today's political sound backdrop is also a complaint by everybody—employer, worker, welfare recipient, real estate operator, government official, university administrator, policeman, doctor, lawyer—about the amount of legal paper work they are required to do and the legal entanglements that encircle them. After a generation in which the most rapidly growing sector of the economy has been state and local government, all of a sudden a large segment of public opinion has begun to press for smaller government, not larger. The 1976 presidential candidates heard and reflected the same ground swell.

These public reactions are a direct product of hyperlexis—public reaction to a degree of legal pollution that is greater than the atmosphere can carry. We have now the political opportunity to get to work on the problem. If we let that opportunity slide by, hyperlexis will slowly but steadily drag our whole legal system to the ground and we shall have dissipated one of our most priceless national treasures: the confidence of the people in, and their voluntary compliance with, the law.●

THE NUCLEAR NONPROLIFERATION ACT

Mr. CULVER. Mr. President, last Friday President Carter took an important action when he signed into law the Nuclear Nonproliferation Act. I consider this a major accomplishment because it provides the United States with a comprehensive policy of dedicated actions to discourage the spread of nuclear weapons. It is a minimum basis for more credible U.S. efforts to gain adherence to the 1968 Nonproliferation Treaty by those nations which have not signed the treaty, and to sustain the no nuclear weapons commitment made by those nations which are a party to this agreement. I want to take this occasion to stress, however, that our nonproliferation policy will be a failure over the long run unless the United States and the Soviet Union at the SALT talks are able to control their continuing competition in nuclear arms.

The Nuclear Nonproliferation Act addresses a difficult problem. Nuclear power has become a major energy source for a world in which energy demands are increasing faster than the development of alternative sources to meet them. Peaceful nuclear energy facilities are spreading to many countries and locations around the world. Forty-two nations now operate 206 nuclear reactors and 100 more reactors are on order. American corporations, which are world leaders in nuclear energy applications and technology, do more than a billion dollars a year in international business.

The danger in this trend is that such large-scale use and distribution can make nuclear material more accessible for diversion by nations or even small groups to make nuclear bombs. If only a fraction of the nuclear weapons in the world's arsenals today were to be used in a large-scale war, whole societies could be destroyed. In a future world with 10 nuclear weapons states, for example, instead of the present 5, the risk of small nuclear attacks leading to devastating world wars would increase considerably.

The proliferation of nuclear energy is the more dangerous because it can be abused by terrorists and criminals. A recent analysis of the potential effects of one small terrorist bomb exploded in

downtown Washington concluded that there would be widespread destruction, outlaw activity and lingering genetic damage, and 30,000 to 70,000 Americans killed or severely injured. Strong controls on nuclear materials are necessary to make this horrible risk and that of nuclear blackmail as small as possible.

Many people are concerned that the controls in this act do not go nearly far enough. Some students of nuclear power believe that it may be a serious threat to our environment and our health. They are correct in arguing that we need to know much more about the long-term effects of radiation and other hazards that could follow from this still new technology.

While we have to take a harder look at these hazards, there is also an immediate need for new rules relating the growing commerce in nuclear energy to the grave dangers of nuclear explosives. That need was cogently summarized in a study on Nuclear Energy and National Security published by the Committee on Economic Development:

> Acute national security interests and urgent economic and environmental interests at home are inextricably intertwined. They cannot be separated from the interests of other countries. Failure of the U.S. Government to recognize these interrelated interests and to deal with them in a coherent and comprehensive manner could be disastrous.

Three Senate committees—the Committees on Governmental Affairs, Foreign Relations, and Energy and Natural Resources—worked for nearly 3 years to develop legislation updating the Atomic Energy Act of 1954. Compromises were necessary to reconcile legitimate but conflicting goals, and, as with all basic legislation, changes will surely be necessary in the future. The members of those committees are to be commended for achieving the most urgent objective—a new nuclear energy policy for the United States that actively seeks, in a coherent and comprehensive manner, to prevent the spread of nuclear weapons.

The Nuclear Non-Proliferation Act includes both stricter national controls and initiatives for international cooperation. By placing meaningful controls on our own exports, the act will substantially reduce the chances of American material or equipment being diverted to produce nuclear explosives. It makes acceptance of international inspection and safeguards for all nuclear activities in nonnuclear states a condition for continued nuclear trade with the United States. In return, as an incentive for those countries to accept international safeguards, the United States promises and takes steps to be a reliable supplier for peaceful uses of nuclear energy.

Along with our commitment to be a reliable supplier for properly safeguarded nuclear facilities, the Non-Proliferation Act contains strict penalities for nations who might choose to build nuclear weapons. It prohibits the export of American nuclear materials and equipment to any nonnuclear nation that has: First, detonated a nuclear device, second, terminated or violated International Atomic Energy Agency safeguards, third, violated a safeguards agreement, or fourth, engaged in activities having direct significance for acquiring nuclear weapons. This sanction would also apply if the President determines that a nation had assisted a third country to acquire a nuclear explosive device.

One way in which this legislation makes us a reliable supplier is by reducing uncertainty about the ground rules. A clear and stable U.S. export policy, based on statutory criteria for export licensing procedures, benefits both the American nuclear industry and world consumers of its products. Moreover, tighter U.S. export controls should be welcomed by all nations of the world that are not interested in acquiring nuclear weapons. It is much more likely that other, less powerful countries than the United States would be the first victims of nuclear proliferation.

The second approach embodied in the Nuclear Non-Proliferation Act is an appropriate emphasis on international initiatives and cooperation. Our national nonproliferation policy cannot be successful unless other nations act with us. To improve vital safeguard mechanisms, the Department of Energy is authorized to undertake a program of international training. The new law likewise encourages international efforts to identify and adapt alternative technologies to meet the energy needs of developing nations and to protect the environment from radioactive, chemical, and thermal contamination.

There are encouraging signs that these international initiatives can work. In January of 1978, the United States, the Soviet Union, and 13 other supplier countries published for the first time an agreed set of nuclear export rules. By establishing a comprehensive and strict policy for our own exports and by encouraging international cooperation as the most effective way to deal with this problem, the Nuclear Non-Proliferation Act is a major step of world leadership toward effective controls against the destructive use of the atom.

Mr. President, the SALT talks are a highly visible test of world leadership, and they are vital for a successful nonproliferation policy. The United States and the U.S.S.R. made a commitment in the 1968 Non-Proliferation Treaty to pursue negotiations in good faith on effective measures to end the nuclear arms race at an early date. This 10-year-old pledge is an essential part of the treaty for nonnuclear countries who are asked to forswear nuclear weaponry. If we continue to emphasize nuclear weapons as the basis of our security—rather than as the greatest existing physical threat to our safety and welfare—we have no right or reason to expect other nations, many of which feel their security threatened, to choose differently. A new SALT treaty is a necessary counterpart to the Nuclear Non-Proliferation Act in protecting our Nation's security against the troubling prospect of a nuclear-armed world.●

RAILROAD/HIGHWAY CONFLICTS AND COAL: THE MINNESOTA EXPERIENCE

● Mr. ANDERSON. Mr. President, this morning I submitted testimony to Senator BENTSEN's Transportation Subcommittee, discussing the need to address the problems caused along rural highways by the increased transport of coal from Western mines. As a cosponsor of S. 2164, I firmly believe that the safety, environmental, and economic problems facing rural communities bifurcated by railroad traffic can only be alleviated if the Federal Government acts now to help formulate plans for grade crossing separations and/or track relocations. As America becomes more and more dependent on coal as the principal source of energy, coal train traffic from the West increasingly aggravates the existing rail/highway conflict in rural communities.

Minnesota, Montana, Nebraska, Colorado, Iowa, Kansas, Nevada, North Dakota, and Wyoming all face immediate problems because of coal train movements through their communities. The problems cannot be ignored any longer. The railroads offer the cheapest, most efficient means of transporting the needed coal; the Eastern industrial centers which consume Western coal must be prepared to help shoulder the burden of bringing the coal to market.

Several local groups have formed to study possible solutions to the growing rail traffic problem. Recognizing that their economic well-being depends on the existence of a strong, financially stable railroad which can service the communities' needs, localities have been exploring the possibilities of grade separations and relocations as one solution. Construction of separations and relocations is expensive and, while willing to contribute a fair share to alleviate the expense, the localities are justifiably looking for Federal aid and industry contributions to help out.

Mr. President, one of the local groups to which I refer is the Rail Traffic Task Force (RTTF) of Minnesota and North Dakota. RTTF is comprised of communities along the rail corridor from Bismarck, N. Dak., to St. Cloud, Minn. These communities realized that by joining together to study the growing problem of rail/highway conflicts it would be easier to determine and expedite the proper solution. On March 31, 1978, in Moorhead, Minn., RTTF will meet to approve a rail impact study for the corridor. Representatives of the area congressional delegations, the State and Federal Departments of Transportation and Energy, and the communities impacted will meet to work together to formulate a solution.

I believe that this level of interest and concern on the part of our citizens cannot go unanswered by Congress. As I understand it, initial estimates put the cost of sufficient grade separations and relocations in the RTTF corridor at more than $100 million.

Mr. President, I assure you that the RTTF is not alone among community associations in the West concerned about rail/highway conflicts. If we use the leadtime available until the Western coal mines are fully operational to address the problem presented by rail/highway conflict, we should be able to save our rural communities from forced isolation. If, however, we continue to

expect the Western States to supply the Nation with sufficient coal to meet its energy demands, without taking into account the hardships faced by persons living along the "coal chute," we are only allowing a dangerous situation develop into a national nightmare.

Mr. President, in order that the Members understand more fully the impact of the coal train problem on communities in Minnesota—as well as elsewhere—and some of the efforts being used by these communities to solve the problem, I ask unanimous consent that the text of my testimony before the Transportation Subcommittee, along with the accompanying letters, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

TESTIMONY OF SENATOR WENDELL R. ANDERSON BEFORE THE TRANSPORTATION SUBCOMMITTEE OF THE ENVIRONMENT AND PUBLIC WORKS COMMITTEE, MARCH 16, 1978

Thank you for this opportunity to express my concern over the growing rail/highway traffic conflict faced by thousands of communities nationwide.

Senator Zorinsky's testimony this morning gave you a graphic illustration of the pressing need to begin the monumental task of assuring the continued free-flow of highway and rail traffic. I would like to bring the subcommittee's attention to some of the problems faced by communities in Minnesota and their pioneering efforts to confront the issue.

The certainty of increased coal production in the West and the resulting increase in unit coal train traffic is the major impetus for congressional action. As Montana Governor Thomas L. Judge noted before the recent Western Coal Outlook Conference while discussing grade separations,

"Federal action in this regard has been inadequate. While we understand the changing economics of the coal industry and the changing energy needs of the nation, we do not intend to become an energy colony."

In assessing the impact of increased coal train traffic, however, I would ask the subcommittee to remember unit coal trains will travel along existing rail routes. Therefore, in looking at the statistics forecasting the momentous increase in coal train traffic over the next several years, the compound effect of new traffic with existing traffic must be considered. In a letter I received from the Minnesota Department of Transportation, which I am submitting for the hearing record, Commissioner James Harrington makes this point with respect to S. 2164, of which I am a co-sponsor:

"Several coal train routes in Minnesota have considerable levels of non-coal traffic. In fact, in certain situations, switching activities of non-coal traffic create the longest delays. Therefore, the cumulative effects of the additional coal trains upon other traffic should be considered as the appropriate basis for evaluating needs."

As Senator Zorinsky pointed out in his testimony, the existing and future problems caused by rail/highway traffic conflicts are a major concern to communities in Minnesota. Communities along the traffic corridor between Moorhead and St. Cloud have already been severely impacted by inadequate grade separations and the resulting disruption to vehicular traffic. My sponsorship of S. 2164 reflects my concern and, like Senator Zorinsky, I view the legislation as a means of beginning the search for an equitable and expeditious solution.

Mr. Norman M. Lorentzsen, President of the Burlington Northern, has stated that the American railroad industry recognizes that it must assume its fair share of responsibility for resolving rail/highway crossing conflicts. Communities in Minnesota and North Dakota, which have organized a Rail Traffic Task Force (RTTF) to work with the appropriate representatives of government and industry, also recognize that local contributions will be necessary for a viable solution.

The point is that S. 2164 should not be viewed as a federal "bail-out" of the nation's railroads. The bill's funding mechanism is open to amendment according to the wisdom of the subcommittee. But, with the railroads, local, and state governments willing to address the problem, *now* is the time for the federal government to act.

I am including with this testimony a copy of a letter from Mr. Al G. Loehr, Mayor of St. Cloud, Minnesota, and Chairman of the RTTF. The letter, which announces a meeting of representatives of the RTTF later this month to consider approval of a rail traffic impact study, demonstrates the concern of the affected communities. While the letter, by itself, justifies a congressional response to reach a solution to this problem, I would like to bring some additional information to the subcommittee's attention.

Moorhead, Minnesota, lies along the rail traffic corridor with which the RTTF is concerned. Moorhead recently completed a successful urban renewal project involving the reinvestment of $30 million in the central business district. However, according to the Moorhead Community Development Director, the bracketing of the central business district by two main line railroad tracks is setting a "doomsday course for the city of Moorhead." Rail traffic growth projections for the area vary from 10–40 percent a year. So, despite a succesful urban renewal program, the volume of shoppers in the central business district will decline because consumers are going elsewhere rather than chance getting stopped by coal and non-coal train traffic. Estimates for the construction of a train bypass for Moorhead run as high as $30 million. Even the interim solution of constructing a set of grade separations would cost $7–9 million, well beyond the financial capacity of the city. Consequently, I believe the federal government must offer its assistance. S. 2164 offers Moorhead the chance for economic survival.

St. Cloud, Minnesota, commissioned its own Railroad Impact Study in 1976. The study determined:

"The foreseeable negative impact on the community as a result of increases in train traffic is of serious concern to the St. Cloud area from land development, transportation, and environmental quality viewpoints."

In the interim report on the Minnesota Coal Transportation and Handling Facilities study, community after community along the Moorhead-St. Cloud corridor cited traffic delays, disruption of emergency services, and safety as problems which are already apparent. The increase in coal train traffic and its cumulative effect on existing train traffic will, without federal aid, prove devastating.

Finally, I would merely like to share again my views expressed at the time of the Senate's approval of Senator Durkin's Coal Utilization Act amendment authorizing federal funds for the rehabilitation of certain rail lines to carry coal and coal products. I asked the Senate to recognize that this worthy amendment should, in time (and the time has arrived), be complemented by legislation addressing the larger problem of rail/highway traffic conflicts that are aggravated by the prospective increase in coal production. As I noted:

"We need to encourage coal utilization. We need to decrease our dependence on petroleum and natural gas. We need to do these things to assure the prosperity of America's future generations. But we must not rush to achieve our goals without considering the needs of rural Americans being asked to sacrifice their ready access to the hospitals, police, fire protection, and markets for agricultural products upon which the public safety and economic health of their communities depend."

Mr. Chairman, thank you for your consideration of S. 2164. I am confident that we can attack this problem, arrive at a proper solution, and assure that when the western mines begin maximum production, nothing will impede the flow of the coal to market.

ST. PAUL, MINN.,
December 28, 1977.

Re: Senate 2164, a bill to authorize a program to separate rail and highway crossings in certain impacted areas.

Hon. Senator WENDELL ANDERSON,
Russell Senate Office Building,
Washington, D.C.

DEAR SENATOR ANDERSON: Conflicts at rail/highway crossings are a problem in Minnesota as they are nationwide. Currently, there are inadequate funding programs for resolving highway traffic delay problems at railroad crossings. Your proposed legislation recognizes that this is a significant problem and addresses the separation of modes in areas of high coal train traffic.

Presently, the Minnesota Department of Transportation is investigating community impacts of coal trains as part of the Minnesota Coal Transportation and Handling Facilities Study. An interim report will soon be released and we will be sending you a copy. In addition, approximately eight federal studies and several state studies are also addressing the coal transportation and highway/rail conflict problem. These studies are being prompted by present and anticipated future levels of unit coal train traffic on our nation's rail line. In Minnesota, these coal trains are concentrated along a few rail routes, notably the route from Moorhead to the Twin Cities. The already substantial delay problems in communities along this route will be significantly increased as rail traffic grows.

Senate bill 2164 is the first legislation that we are aware of which specifically addresses the delay problem. We would like to make the following observations:

S. 2164 specifically relates the level of funding to the present and anticipated rail traffic level as a result of coal transportation activities. We are concerned that only coal train traffic will be considered as a basis for apportionment of funds under the program. Several coal train routes in Minnesota have considerable levels of noncoal traffic. In fact, in certain situations, switching activities of noncoal traffic create th longest delays. Therefore, the cumulative effects of the additional coal trains upon other traffic should be considered as the appropriate basis for evaluating needs.

We also questioned the appropriateness of using only highway trust fund dollars for funding of grade separations made necessary because of increased coal train traffic. Highway financing is now facing a funding crisis. Allocation of funds from this trust fund would only aggravate the present crisis. Since the increased coal traffic on these lines is directly related to federal energy policy, it seems appropriate that funds to mitigate impacts of federal energy policy be derived from energy related programs, such as the proposed increase on Wellhead tax, or other sources. There also exists the possibility of putting a transportation surcharge on coal.

The Minnesota Department of Transportation is presently coordinating efforts with the National Transportation Policy Study Commission to evaluate potential coal transportation questions and alternative policies. In addition, we are presently organizing an ad hoc advisory committee comprised of state officials who share coal transportation concerns. If we can be of any further assistance or provide any additional information, please feel free to call on us. For more

specific details, please contact Chuck Anders at (612)296-3158.

Sincerely,

JIM HARRINGTON,
Commissioner.

ST. CLOUD, MINN.
February 1, 1978.

Hon. WENDELL R. ANDERSON,
U.S. Senate,
Washington, D.C.

DEAR SENATOR ANDERSON: The Natural Gas, Petroleum and Coal Utilization Act of 1977 recognizes and facilitates wiser use of our natural resources, especially coal. As you are probably aware, much of this coal will come from vast reserves located in Wyoming, Montana and North Dakota. The movement of western coal to eastern markets has greatly increased rail traffic in urban areas along main railroad lines. According to conservative estimates by the Burlington Northern, Inc., rail traffic will increase 40 percent between 1976 and 1980. Most of this increase will be attributable to coal movement. The concern over experienced and expected increases in rail traffic has caused a number of Minnesota and North Dakota communities to organize a Rail Traffic Task Force (RTTF). In March, representatives of member communities are meeting to discuss rail traffic impacts study with federal officials. Specifically, the Task Force is requesting the following:

1. Your attendance to obtain first hand exposure to the problem.

2. Assistance in obtaining planning funds to identify problems and solutions.

3. If necessary, legislation for construction projects such as rail relocation, grade separations and safety devices.

The remaining portion of this letter provides a brief overview of the rail traffic problem, the RTTF viewpoint and the specifics of the upcoming meeting in Moorhead, Minnesota.

Economics of rail transportation has given rise to the unit coal train, a train consisting of 105 to 110 coal cars approximately 1.25 to 1.3 miles in length. When considering the length of modern freight as well as unit coal trains and the frequency these trains pass through some Minnesota and North Dakota communities (25 to 30 times per day), problems are bound to emerge. These problems are frequent and prolonged delays to highway, street and sidewalk users, the safety of pedestrian and vehicle operators at grade crossings, disruption of emergency vehicle service such as ambulance, police and fire vehicles, and finally environmental degradation, especially regarding noise pollution. The RTTF's purpose is to make decision makers aware of the problem in their communities, study the problem, and identify solutions. Presently, this group represents one North Dakota community and ten Minnesota communities.

The RTTF maintains that the federal government has and continues to encourage rapid large scale development of coal reserves, especially northern Great Plains coal (Natural Gas, Petroleum and Coal Utilization Act of 1977), without due consideration of problems associated with transporting coal from mines to market areas. In the case of western coal, most of the major market areas are 800 miles or more from the mine sites. Most upper midwestern communities lie directly on the major rail lines and are subjected to this traffic. Furthermore, in recent times, railroad companies have, for economic reasons, attempted to concentrate all traffic on the most productive lines and abandon those lines which operate as a deficit. The RTTF concludes that the concentration of general freight traffic and coal traffic on so-called high volume lines has created a serious problem in many communities, specifically, the communities along the Burlington Northern main line from Bismarck, North Dakota, to the St. Cloud metro area. According to a recent report by the Minnesota Energy Agency:

"The addition of coal trains to such a line (high volume) may first of all increase the awareness of pre-existing problems and secondly exacerbate any problems which are present."

Senator Wendell R. Anderson stated it well when he testified before a Senate Committee. He said:

"We need to encourage coal utilization. We need to decrease our dependence on petroleum and natural gas. We need to do these things to assure the prosperity of America's future generations. But we must not rush to achieve our goals without considering the needs of rural Americans being asked to sacrifice their ready access to the hospitals, police, fire protection, and markets for agricultural products upon which the public safety and economic health of their communities depend."

It is estimated that the costs of adequate solutions to the problems in Fargo-Moorhead and St. Cloud metro areas alone would exceed $60 million. It has been estimated that the cost of alleviating existing rail traffic problems between Bismarck, North Dakota, and St. Cloud, Minnesota, will be in excess of $100 million. Communities cannot financially deal with problems of this magnitude. This is especially true of communities below 10,000 population.

On March 31, 1978, the RTTF will be meeting in Moorhead, Minnesota. As mentioned earlier, the purpose of this meeting is to consider approving a corridor study (Bismarck to St. Cloud) to identify rail traffic impacts, solutions to mitigate undesirable impacts, and the costs of the same. If the study is approved, federal planning assistance funds will be sought. This is deemed appropriate because national policy has (both energy and transportation) strongly encouraged coal development and railroad revitalization. Therefore, the RTTF is requesting your attendance to enhance your awareness of the problem and to assist and advise communities on how to deal with excessive rail traffic.

I might further add that time is of the essence; we must act now. Some communities are suffocating from excessive rail traffic. Downtown areas have become inaccessible which not only affects local business activity but also, investment potentials.

The meeting will be in the Moorhead City Hall Council Chambers, Moorhead, Minnesota, at 2:00 p.m. on March 31, 1978. Again, I strongly encourage your attendance at this meeting. A small card has been enclosed for your convenience to notify us of your intentions.

Sincerely,

AL G. LOEHR,
Chairman, Rail Traffic Task Force.●

ELIZABETH BAILEY CALLS FOR LEGISLATIVE CHANGE TO EASE CAB REGULATION OF AIRLINES

● Mr. KENNEDY. Mr. President, Elizabeth E. Bailey, who is the newest member of the Civil Aeronautics Board, spoke in the Rayburn House Office Building on the need for a statutory change to lessen CAB regulation of the airlines so travelers can receive better service at lower prices.

Mrs. Bailey's message is clear, Mr. President. Congress should act to pass S. 2493, the Air Transportation Act of 1978. Mrs. Bailey, in her excellent talk, used plain and simple English to give us her expert view on why the industry she is charged by law to regulate is overregulated. And, Mrs. Bailey is someone we ought to listen to. First, she is an active and creative member of the CAB. She has seen first hand how airline regulation works—or does not work. Second, Mrs. Bailey is a distinguished economist by profession who is no stranger to regulated industries. In fact, before her appointment by President Carter in August 1977, Mrs. Bailey was head of the Economic Research Department for Bell Laboratories, part of the A.T. & T. As a leader and innovator within the A.T. & T. organization, Mrs. Bailey understands the economics of regulation. I ask unanimous consent that her remarks be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

TALK OF ELIZABETH E. BAILEY (MEMBER, CAB) TO THE FORUM ON AIRLINE REGULATORY REFORM

Yesterday, at the Congressional Appreciation luncheon sponsored by the Association of Local Transport Airlines the theme was the "Intent of Congress". This intent is clear. Congress intends to replace the regulatory outlook of 40 years ago with a more modern pro-competitive outlook. We at the CAB have the same intent. Chairman Alfred E. Kahn has attracted to the Board some of the brightest legal and economic minds in this country. Our purpose is to devise what new policy we can within the existing statute. But there is a major difference between your intent here at Congress and our intent at the CAB. You can codify your intent into public law and that law will have a permanence, whereas our procedural changes may be subject to wild reversals. These reversals can come not only from future Boards with different outlooks than our own, but, far more seriously, they can come from courts of law. There is a long history during which the current statute has been interpreted in another way than we want to do it today. We at the CAB are taking calculated legal risks every day in order to take steps to carry out the competitive intent of the President and Congress. But it will be 3 to 6 years before the courts have finished examining our changes and no one knows where it will come out. Some or all of the procedures we are working so hard to revise may not be upheld or worse, they may be reversed.

But you here at Congress have the opportunity to make sure the changes we all want are explicit and permanant. That is why we at the CAB are seeking your help in implementing a policy that everyone agrees is beneficial to the industry and to the American public.

Of particular concern to me right now are the twin issues of flexible pricing and flexible entry, and it is to these areas that I wish to address most of the remainder of my remarks. You cannot help but have noticed that there is currently an enormous discrepancy in the CAB's degree of flexibility in these two areas, and there have been enormous inconsistencies between past and current handling of these matters.

Last January, we set down for hearing World Airways application for transcontinental low fare authority. This action triggered a competitive response from scheduled carriers in the form of the coast-to-coast supersaver fares that we all enjoyed last summer. These fares have proved so successful that within the past two weeks both American and United have announced plans for vastly expanding them. Yet, the entrant responsible for all this benefit to the American people is not now providing scheduled low fare coast-to-coast service. Instead, it

will be another year or two before the Board will be able, even under the most expedited procedures we have been able to devise, to decide this case. And we are a Board who cares about low fares. Ten years ago, when World Airways first presented its low fare proposal to the Board, it was ignored and dismissed as stale after failing to be processed by the Board for five years.

Other examples are not hard to find. Mary Schumann has talked today about the Midway case. I attended some of the hearings from that case last Friday and heard Lamar Muse, President of Southwest Airlines, discuss the competitive responses of carriers with dormant authority in that airport. These responses for commencement of low fare service were not forthcoming before Midway and Midway Southwest declared their intent to offer such services from that airport. Yet, these responses will come before the Board well before the proposed Midway and/or Midway Southwest authority will wend their way through our cumbersome and lengthy procedures.

So, the situation we face now is both exciting and distressing. It is exciting because we are finding opportunities for flexible pricing, distressing because it is so much more difficult to attain a comparable degree of entry flexibility. Competition needs both. The American public needs both. And it is Congress who can give us both.

Perhaps the best way to make you here at Congress aware of the need for new entry policy is to describe in more detail what has happened and is now happening in this area. Over the past 15 years, entry policy has changed dramatically. In the early 1960's there were few awards. In the mid and late 1960's the exact opposite occurred. Significant competitive authority was granted, and the character of local service carriers changed considerably during this period. But, beginning in 1969 and continuing through 1974, there was a dramatic reversal. The route moratorium was instituted. It resulted in virtually no competitive route awards for 5 years. Just as abruptly, beginning in 1975, the route moratorium ended. Today our Board is setting as many cases for hearing as we can, given our limited size and the resources that each such case requires. In the last two months we have had two Board meetings at which we wrestled with the problem of how many and which route cases we would set for hearing. We had to make choices we simply should not have to make. We decided finally to hear cases with the largest markets since they had the highest level of benefits to the consuming public. But, our decision means that a number of smaller markets, which a carrier is willing to serve, must wait for service. For example, we decided to hear the need for competitive service in the Las Vegas-Houston market. At the same time, we decided that we could not hear the need for improved service in markets involving Phoenix, Tucson, San Antonio, El Paso, Albuquerque, Midland/Odessa, Corpus Christi and New Orleans. These communities had their applications dismissed even though we know that service to their communities is just as important to them as service is to the larger cities. In a similar case, we decided to hear the Philadelphia-Orlando/Daytona Beach markets but had to put off consideration of service between Cleveland/Pittsburgh and Buffalo, on the one hand, and Orlando, Daytona Beach and West Palm Beach, on the other.

You here at Congress can change this. Your constituencies can be served, and with less delay, by lessening the entry barriers. You can give us a statute with provisions for procedural expedition including the ability to create classes of applications subject only to the most minimal procedures. You can give us as much automatic authority as possible and expand our policy options well beyond an occasional multiple award, and/or grant of permissive or back-up authority.

Let me end by telling you a deregulation story. Many of you listened to Chairman Kahn's recent interview on the MacNeil-Lehrer Report, and his statement that under the current act there are still many things we have to regulate which we simply shouldn't. The Chairman's favorite example is processing requests to carry horses. Generally, this service is needed only on an intermittent basis and because of the special requirements needed, sometimes the existing certificated carriers can provide the service, sometimes they can't and the shipper looks elsewhere. When this happens, we must decide whether or not to give an exemption to the carrier the shipper has chosen. Sometimes we grant the exemption; sometimes we don't and that includes the Chairman and myself. I remember well that in my first month of service at the Board we turned down a request to transport horses across the Atlantic—because it would have been the 7th and 8th such trip for a carrier which only had authority to make 6 such trips. So, even *we* can get buried in our procedures. But the cargo deregulation bill which you here at Congress passed has rectified this situation at least domestically—never again will horses not be carried when there is a willing carrier!

The story is humorous but its point is not. It is you here at Congress and not we at the Board who can give the American people a bill that permanently protects the innate competitiveness of the American aviation industry.●

PRAISE FOR RHODE ISLAND NATIONAL GUARD AND U.S. ARMY UNITS DURING THE BLIZZARD OF '78

● Mr. PELL. Mr. President, 1 month ago the State of Rhode Island was hit by one of the most economically devastating and destructive storms in recent history. An average of 28.6 inches of snow fell in the State with several northern communities receiving accumulations of more than 40 inches. This sudden snowfall paralyzed the State for almost 1 week, leaving all major roads clogged and forcing more than 20,000 Rhode Islanders to seek emergency shelter in downtown Providence office buildings, factories, churches, and hospitals. The ferocity of the blizzard also caused severe problems for snow removal on vital arteries with more than 6,000 cars abandoned on highways during the storm—5,000 in the Providence area alone.

Mr. President, were it not for the selfless, untiring, and outstanding efforts of the Rhode Island National Guard and the U.S. Army units, which I personally observed from a National Guard helicopter immediately following the storm, the impact on Rhode Island and its citizens would have been catastrophic. Furthermore, Rhode Island might have remained paralyzed well beyond the blizzard period. The Rhode Island National Guard and the U.S. Army units were clearly the State's lifeline for more than a week.

The combination of ground and air units were largely responsible for the transportation of hundreds of stranded motorists to safe shelters and for the subsequent movement back to their homes. The fast and efficient transport of those stranded individuals unquestionably saved many lives.

Equally important, these units were especially effective as they made emergency deliveries of food and medicine to hospitals, civil defense headquarters, and other needy areas. Lives were saved also as helicopters transported those in need of medical attention from all parts of the State. This not only included people who required emergency treatment, but also those who needed treatment for chronic illnesses, such as kidney dialysis patients.

While rescue units were performing their vital missions. an equally important effort was undertaken by both Rhode Island National Guard and Army units to remove snow and clean the State's principal arteries in order to restore the State's economy. In addition to these vital services performed, there were many other uncountable ways that these units provided assistance to Rhode Islanders during this period of hardship.

Mr. President, the role of the Rhode Island National Guard along with that of the U.S. Army in rescue operations, saving lives, and assisting in the State's recovery cannot be measured. Their contributions were outstanding in every respect and clearly helped to avert a terrible catastrophe. Their actions demonstrated the importance of an effective and well trained National Guard in Rhode Island. I know all Rhode Islanders deeply appreciate the assistance provided by both the National Guard and Army units during this difficult time.

I ask unanimous consent that several articles describing the contribution of the Rhode Island National Guard and the U.S. Army units in Rhode Island be printed in the RECORD at the end of my remarks, along with a resolution adopted by the Rhode Island General Assembly expressing praise for the Army and National Guard units.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Evening Bulletin, Feb. 9, 1978]

GUARD LOGS 1,900 RUNS TO STRANDED MOTORISTS

(By Hamilton F. Allen and Robert Stewart)

PROVIDENCE.—More than 750 National Guardsmen in 120 jeeps, trucks and bulldozers were picking up stranded motorists bringing the sick to hospitals and shelters and transporting food, medicine and other emergency supplies around the state yesterday.

Since the blizzard began late Monday morning, the Guard has logged more than 1,900 rescue runs to motorists stuck in snowed-in vehicles. Because many rescues were unrecorded, the actual number of stranded drivers picked up probably is far more than the official total, said Col. Frederick L. Bennett, Guard chief of staff.

Guardsmen from six units stationed at 11 armories from Westerly to Pawtucket continued to pick up motorists yesterday on Routes 95 and 146 and make other runs at the request of hospitals and civil defense headquarters in the basement of the State House.

Several hundred stuck motorists have refused to accompany Guardsmen to shelters, Bennett said. Even yesterday, some drivers who had been in stranded cars for up to 48 hours still refused to leave, he added.

"To a lot of people, an auto is their greatest possession and they don't want to give it up," Bennett said.

According to the latest figures available last night, the Guard had run 282 missions to bring doctors and nurses to hospitals and medicine to snow-bound patients. Guardsmen have brought 96 kidney dialysis patients from their homes to hospitals.

Food and fuel deliveries and tows required about 960 trips. Guardsmen also made 31 missions to open expressway ramps, assist in runway clearing at Green Airport and escort oil trucks to hospitals.

Guard units were operating below full strength, Bennett said. "We just have key personnel that can handle the mission," he said. Persons who have been asked to come in primarily, are truck drivers, heavy-equipment operators, mechanics and technicians.

On-duty Guardsmen yesterday were from the 26th Air Cavalry Squadron, the 43rd Military Police Brigade, the 103rd Field Artillery, the 243rd Engineer Battalion, the Rhode Island Air National Guard and the Combined Support Maintenance Shop, Bennett said.

SNOW-MOVING ARMY GOES TO WAR ON ROADS

(By Christopher Scanlan)

"You train people to move earth. At this point it's the same thing with snow. You're just moving material from one place to another."

That, in a phrase from Capt. James Dries, commander of the 11th Engineer Battalion of Fort Belvoir, Va., sums up an Army engineer's approach to snow removal.

More than 50 Army engineers in Dries' unit began arriving at Green Airport today. They join more than 300 other federal troops who are helping to dig Rhode Island out of the worst snowstorm in its history. Already the soldiers with the help of State Department of Transportation workers and National Guardsmen have made "fantastic progress," according to Rocco DeLuca, the State Department of Transportation's assistant director for maintenance.

Dries' unit includes four frontend loaders, two graders, two bulldozers, four five-ton trucks, two four-wheel drive vehicles and two jeeps. The equipment is coming in on three C-5 and two C-141 and one C-5A aircraft. The first flight arrived about 9:30 a.m. and the last is scheduled to arrive about 5:45 p.m.

Seventy-five Seabees are also on the way from Gulfport, Miss. They will be manning equipment that has been mothballed at Davisville. They are scheduled to arrive about noon.

Yesterday, thirty-six C-130's, seven C-141's and two C-5A's brought in 75 pieces of heavy Army equipment and 284 soldiers from two Army bases in Georgia and another in Louisiana.

Arriving with the planes was a special Air Force team which specializes in loading and unloading equipment, including graders, bulldozers, front-end loaders, dump trucks, communications vehicles and tankers to refuel the other vehicles.

Two other Army task forces are in New England, one to remove snow in Massachusetts and the other in Connecticut.

Col. Robert E. Ayers who is commanding Operation Snow Blow as the federal and state snow-removal project is called, says credit for any success the soldiers have had should be shared equally with state personnel. Nonetheless, the Army's approach to snow removal is of interest to Rhode Islanders, who are becoming used to the men in fatigues astride olive-drab bulldozers, graders and front loaders.

The Army men are combat engineers. If this were war, their heavy equipment would be building roads or airfields or clearing away bombed-out remains. When they are called upon to fight a snowfall, their heavy machinery does basically the same job. It moves things that need to be moved. And as Col. Ayers puts it, "Snow is a lot lighter than earth. We can get a lot of productivity."

Surprisingly, this is the first time the men from Fort Benning, Ga., have gone out as a group to remove snow. Capt. Dries' men, on the other hand, already have been out three or four times clearing snow from the roads of their post.

The difference with moving snow as opposed to earth, according to Dries, is "you have to use much more caution, drive at slower speeds and take precautions against frostbite.

"We have moved snow before, but nothing of the scope up here," observed Dries.

Colonel Ayers attributed the success of his troops to two decisions made soon after their arrival. "The first basic decision," he said, was to bring in units that were self-sufficient and could be sent to an area and left on their own.

The second decision which Ayers said was worked out with Governor Garrahy at midnight Tuesday was to assign the soldiers as support units for state workers. "We could combine our assets and that has helped open up a larger segment" of roadway than if the troops had gone in alone, added Ayers.

A major problem facing the soldiers and other snow-removal workers has been the thousands of stranded cars on the highway, said Ayers. One of the advantages of moving snow as opposed to earth, he added, "is we just have to shove it aside."

COPTER PILOTS ARE THE STATE'S LIFELINE AS NATIONAL GUARD COMES TO RESCUE

(By Phil Kukielski)

NORTH KINGSTOWN.—"It's a life-or-death case," Sgt. Frank Lafferty shouted over the roar of the rotors as the Army National Guard helicopter jerked off the runway at Quonset Point yesterday afternoon.

A 93-year-old nursing home patient had heart failure and needed evacuation to Rhode Island Hospital.

The radio crackled in Capt. Ronald Berube's headset, telling him to make this run "V.N.E."—"Velocity never exceed," Army argot for pedal to the metal

Destination: the Cranston Street Armory, where the helicopter was to meet the patient and fly her to the hospital.

Copter 233 of Troop D of the 1/26 Cavalry Squadron was off on another mercy mission, one of hundreds that has kept a dozen Army National Guard helicopters flying almost continuously since Wednesday morning.

Under more ordinary circumstances, Captain Berube would have been commuting from his North Providence home to his job as an industrial arts teacher in Canton, Mass. His crew chief, Sgt. Lafferty of North Kingstown, would have been working as customer service manager for Burton Industries in Pawtucket.

But yesterday afternoon they were airborne over the snowbound suburbs.

The turbojet engines pulled the craft to 650 feet and the needle on the speed indicator jerked steadily toward top speed of 120 knots.

Within 15 minutes after takeoff, Copter 233 had landed in the armory's parking lot, 10 minutes before the Providence fire truck that brought the patient from Bannister House, a nursing home on Dodge Street in Providence.

She arrived unconscious, her face covered by a plastic mask attached to a green oxygen tank.

Lt. Col. Joseph Petteruti, a national guard doctor, hopped aboard, joined by two nurses from Bannister House. The doors slammed shut and Copter 233 was up again.

As Captain Berube banked the craft toward Rhode Island Hospital, five miles away, Colonel Petteruti checked the patient's pulse and listened intently to her heartbeat.

A nod by Colonel Petteruti was sufficient to tell Sergeant Lafferty that she was still alive.

The moment was commonplace for the 109 airborne Guardsmen who have been based at the old Naval Air Station here since they were called to active duty at 3 a.m. Tuesday.

The Guardsmen were grounded by snow squalls until daylight Wednesday. But since then, they have logged 250 flight hours at the aerial lifeline for a snowbound state.

Their passengers have included a 10-year-old leukemia patient, premature twins in incubators, a woman with a broken neck and a five-month-old baby with an obstructed stomach.

Kidney dialysis patients have become regular customers. Guard helicopters have provided a shuttle service for patients from the suburbs traveling to treatment in East Providence.

They've also been hauling foodstuffs. On Thursday they took 25,000 pounds of milk to the Rhode Island Veterans Home in Bristol.

[From the Rhode Island Pendulum, Feb. 15, 1978]

FOURTEEN NATIONAL GUARD HELOS KEEP RHODE ISLAND "ALIVE' DURING CRISIS

(By Ernest A. Myette)

The slogan "The Guard Belongs" has probably been seen by most of us on bumper stickers, recruiting stations and in newspapers and magazines.

Never were those three words—The Guard Belongs—more meaningful than this past week.

Through a quick response after receiving a mobilization order from General Holland, the Rhode Island National Guard came to life within hours.

For the men of Troop "D" 26th Cavalry based at Building 6 at Quonset, the trudge getting there was by no means easy. Nevertheless, one by one, they arrived at the former naval air station to get their helicopters ready.

The flights would be many and the missions these 14 helos were to perform would become inmeasurable in terms of the welfare of the people of this state.

From transporting baby formulas to and from Foxboro to Women's and Infants Hospital in Providence; patients, doctors, nurses, food and blood transported by helicopter to nearly every hospital in the state, and one flight of a 10 year old leukemia boy from Newport, needing treatment in Boston.

And in our own community, the men with those olive-drab machines, transported some 25,000 pounds of milk from the East Greenwich Dairy on Route 2 across the bay to Warren.

The National Guard's helicopter force at Quonset was instrumental in keeping vital services east of the Washington Bridge functioning. Again, without the use of the state freeways, food, milk, and medical services took to the air, with a constant shuttle back and forth across the bay.

Familiar locations in the state became strategic landing sites for chopper missions. LaSalle Square in Providence and Wamponaug Mall in East Providence connected these two cities with the necessary services to maintain life.

There were times when the hospital ships not only transported the patient, but the doctor, nurse and blood plasma and the working of the doctor's hands to provide oxygen to the patient.

Lieutenant Colonel Robert Mahoney, working out of the Civil Defense Room at

the statehouse, relegated all requests to Quonset.

At Quonset, the Command Center Commander, Captain Alexander Lindsay, was responsible for assigning all the helicopter flights.

The helicopter fleet of well-trained men began its errands of mercy at 6 a.m. on Wednesday. In addition to running emergency patients to hospitals, aerial photographic assessments of the Interstate plugs and food transporting, chopper service was provided to let both Senators Chafee and Pell get a look at the blocked freeways. Later, President Carter's Civil Defense Preparedness Team were given a helicopter flight to the same area viewed by Chafee and Pell earlier.

The next day, Senator Kennedy was given a hop from Hillsgrove to Kent County Hospital where his niece had been admitted in a storm-related accident.

On the ground, the Rhode Island National Guard performed equally well and with precision.

Sunday afternoon, heavy equipment of graders, payloaders, bulldozers, trucks, jeeps and men of the Rhode Island Guard assembled on a divider strip of I-95 in Warwick. After having helped in the clearing of snow on the interstate roads during the week, the company of men now proceeded to the Airport Connector Road at Green Airport. Before 5 p.m. snow was being moved off these connector roads with speed and accuracy. It was done without damage to property, road curbing, trees or shrubs.

Their astuteness in performance and the way they handled their equipment, along with the men in the air, flying a convoy of helicopter missions, should dispel the attitude of many who think that the Guard is made up of goof-offs and misfits.

The Guard belongs, because without it, this past week would have resulted in many more deaths throughout the state.

[From the Providence Journal, Feb. 15, 1978]

GUARD LAYS SIEGE TO LAST DRIFTS AND IT IS "NEVER SOUND RETREAT"

(By Daniel Hackett)

LINCOLN. — While the regular Army was packing for home, Rhode Island's Army National Guard was still out here in force yesterday. At Routes 295 and 146 members of the 243rd Engineer Battalion were cleaning up one of the last of the state's snow-blocked highway intersections.

For eight days, more than 100 members of the 861st and 1118th Engineer Companies have been on active duty. Their primary assignment has been opening up Route 295 across the northern end of the state, where the snow is the deepest. They also opened up the airport connector in Warwick.

First, they spent 30 hours cutting a single emergency lane from Route 95 in Warwick up Route 295 to Route 146 here, checking abandoned cars along the way and helping stranded motorists to shelter, said Lt. Col. Charles Gresko, the battalion's commander and a full-time Guardsman.

Then they went back, plowed another lane and began widening the highway and opening entrance and exit ramps.

To do the work they used the Rhode Island National Guard's entire fleet of earth and snow-moving equipment — two bulldozers, two front-end loaders and two graders.

Guard officials said they wish they had more equipment so they could have done more.

"There is only one engineering unit in the state," said Capt. Robert Turnbull, who was directing operations at the intersection here yesterday. "The state really could use another one and more equipment," he added.

While two dozen Guardsmen were finishing up their work along Route 295 yesterday, other members of the same battalion were using their dump trucks to aid snow removal efforts in Woonsocket.

Gresko said 107 men, or about half of the engineering battalion's members, were on active duty as a result of the storm. After more than 24 hours of around-the-clock work, three work shifts were established. The Guardsmen were then shuttled back and forth between Route 295 and their battalion headquarters, the Sun Valley Army in East Greenwich.

"Some of the guys are a little miffed at the fact that the Army is getting all the publicity and we're not getting any," said Turnbull, who makes his living working for the New England Telephone Co. "They're a dedicated bunch of guys who've been working hard. Morale has never been higher."

[From the Providence Journal, Feb. 15, 1978]

ARMY FORCES PREPARE TO TAKE WING AFTER CLEARING THE GROUND FOR RHODE ISLAND

(By John P. Silva)

WARWICK.—"Operation Snowblow II—Task Force Charlie" ended yesterday as the federal troops that helped pull Rhode Island out of the drifts of last week's blizzard prepared to return today to their home bases in the south.

Col. Robert Ayers, commander of the Army troops sent here after President Carter declared an emergency, said Air Force C-5A and C-141 cargo planes are scheduled to begin landing at the former Quonset Point Naval Air Station at 8 a.m. to take the troops home.

Ayers said he expected "a fairly large fleet coming in" but did not now how many planes were due to land, or how much time the return operation would take.

An Air Force advance team arrived yesterday to coordinate flight arrangements with the Army.

Ayers said he hoped that by late this afternoon or early tonight the troops and equipment could return to their home bases of Fort Stewart and Fort Benning, Ga., Fort Polk, La., and Fort Belvoir, Va.

A group of 71 Seabees will be flown to their home base in Gulfport, Miss. The Seabees had been using equipment from the Davisville Seabee Center and had been working until early yesterday morning clearing snow at the Providence docks.

Ayers had wanted to assist state road crews in widening the interstate highways yesterday but did not because "traffic could not be controlled well enough to make it a safe operation."

So the troops spent much of yesterday driving equipment in small convoys to Quonset where it was cleaned, repaired and prepared for the flight home.

Although the equipment is at Quonset, most troops remained at the Cranston Street Armory in Providence and the Schofield Armory in Cranston. Smaller numbers of troops clearing snow at Quonset last night were quartered there.

Ayers said Quonset was chosen because it has ample space for the storage of equipment and does not have the air traffic that Green State Airport has. He said the runways and taxiways at Quonset have been cleared of snow but the ramps leading from the four large hangers to aircraft locations were still snow covered. The hangars are used for storing and repairing the equipment.

About 101 soldiers and 25 pieces of equipment will return to Fort Stewart. 131 soldiers and 30 pieces of equipment to Fort Benning, 76 soldiers and 22 pieces of equipment to Fort Polk and 62 soldiers and 19 pieces of equipment to Fort Belvoir.

Most of these soldiers were assigned to the 36th Engineering Group. In addition, about 43 members of the 483rd Engineering Battalion, Army Reserve, from Attleboro also returned home.

About noon yesterday, Sen. John H. Chafee met with Ayers and, according to the colonel, "thanked us for helping the state."

Asked his feelings now that the digout is completed, Ayers said, "We're all looking forward to going home, but it has been quite an experience in Rhode Island."

[From the Rhode Island Pendulum, Feb. 15, 1978]

LOCAL NATIONAL GUARD UNIT PLAYS KEY ROLE IN STORM RECOVERY

The Town of East Greenwich has been a prime focal point for the Rhode Island Army National Guard's role in helping the state recover from the worst natural disaster in recent memory.

For the past nine days (since Monday, February 6), Headquarters and Headquarters Detachment, 243d Engineer Battalion, has maintained a 24-hour command post at the Varnum Armory on Main Street. Here, assignments requiring heavy-duty or rough terrain vehicles are received and assigned to the battalion's two engineer companies—the 861st Engineer Company of East Greenwich and the 1118th Engineer Company of Woonsocket—according to priority and nature of assistance needed. Some 150 battalion members have taken part in the operation; many of them have been on duty constantly since the beginning of the storm emergency.

For the first 24 hours of the operation, the Guard units concentrated on "human" needs. During the first night of the storms, while the blizzard was at its height, Second Lieutenant Herbert J. Andrade of the 861st, a North Kingstown resident, led a convoy of heavy snow removal equipment from East Greenwich up Route 95 to Woonsocket, and back down I-295 to Warwick, helping stranded motorists to safety. He was on the road for 30 continuous hours. Meanwhile, a similar convoy worked its way through the South County area.

Throughout the recovery period, the battalion, responsible for all of the Guard's snow removal operations, has worked closely with Al Nocera, Director of Civil Defense for East Greenwich—particularly with regard to getting people to shelter and taking care of the emergency needs of the sick and the elderly.

By nightfall of the second day (Tuesday, February 7), it was possible for the Engineers to concentrate on the monumental task of clearing the main highways in the area.

The mission assigned to the front-loaders, bulldozers and road graders of the 861st was the clearing of Interstate 295 from its southern end at Route 95 in Warwick as far north as Route 6 in Johnston. Rhode Island highway department crews worked on 295 north of that point.

Working in three shifts around the clock, the Engineers completed the job on Sunday (February 12). They would have been finished sooner but for the necessity of diverting personnel and equipment to the job of clearing portions of Routes 113 and 117 as well.

Once I-295 was opened, the 861st turned its attention to the connector roads leading to Green Airport. Then, it was back to 295 for the purpose of widening the highways as far north as the Massachusetts line. Special attention is being paid to the on-and off-ramp connectors, where high snowbanks are creating a dangerous visibility problem.

Meanwhile, the 1118th Engineer Company has been equally busy, working around the clock to assist in the snow removal efforts of the city of Woonsocket by hauling the nasty white stuff away to various dumping points.

The consistently low night-time temperatures have added another dimension to the

problem facing the Guard's heavy equipment operators: many of them have been working in unheated, open cabs in temperatures that dip as low as three degrees below zero during the night. Throughout the emergency, though, morale among the Engineers has been extremely high.

[From the Providence Journal, Feb. 12, 1978]

HEROES, CITIZENS, FRIENDS

There were heroes aplenty in last week's snowstorm emergency, but none more faithful than the Rhode Island National Guard. From the time early Monday evening when Gov. J. Joseph Garrahy ordered the nearly 800 guardsmen into action, their presence has been helpfully felt in uncountable ways.

Only two weeks after the guard had responded to an earlier but much less destructive snow emergency, the men were back on the highways, first and most urgently on search and rescue missions to locate drivers stranded in marooned cars and get them into safe shelters.

In addition to pulling stranded cars off the interstate highways and manning plows, the guard also sent nine helicopters aloft to carry food and medicine to isolated areas. These same helicopters carried patients suffering from kidney disease to the dialysis center in East Providence where they could receive critically needed treatment.

There were other heroes, too many to enumerate, most of them anonymous by choice. There was the truck driver who found himself stranded at South County Hospital, and performed yeoman duty there delivering medical supplies, working in the cafeteria, shaving patients.

Then there was the nameless individual who, unable to get to work at his state job, set up a free taxi service between East Providence and Barrington to take refugees from the storm back to their homes. And the small boy who on his own went around the Providence East Side uncovering fireplugs. Heroes all. Good citizens. Neighbors. Friends.

[From the Providence Journal, Feb. 13, 1978]

KIDNEY PATIENTS IN NEED OF DIALYSIS AIRLIFTED OVER STORM'S CRUEL BLOCKADE

CRANSTON.—The trips have been long and difficult.

But, with the help of local firefighters, police and the Air National Guard, a small group of city residents has been airlifted the past few days for critical kidney treatment in East Providence.

"Patients were beginning to get on the edge of panic," said Fire Chief Ronald S. Jones, who coordinated the efforts that allowed the residents to get to the Artificial Kidney Center of Rhode Island in East Providence.

It all began when concerned patients, in need of dialysis, contacted the Fire Department early last week.

Jones said the department set up a caravan of emergency vehicles and fire trucks and headed for Providence. The caravan reached Lasalle Square in the city when it came to a halt.

Fire officials contacted the Air National Guard, which sent a helicopter to airlift the residents to a landing pad set up near East Providence city hall.

From there they were taken by emergency vehicles to the center.

Since then, with some variations, the same critical trip has been made by persons from all over the area.

"I can't say enough about the people who helped," said Charles T. Mahoney of 112 Belmont Road, whose wife Shirley has been among those making the trip to East Providence.

"It's been unbelievable. I didn't realize what was involved, the amount of people and work just to have a helicopter drop down," he said.

The treatments "are a must," he added.

Mrs. Viola Manzi of 31 Columbus Circle, whose husband Frank also needed the critical treatment, was equally impressed with the response she received to her pleas for help.

"Thank God, How relieved I was," she said. "I was so very happy."

"You don't know how grateful I am for this," she said.

RESOLUTION 78—S2294

Resolution expressing sincere gratitude and highest praise to U.S. Army and Rhode Island National Guard units for their assistance in the blizzard of February 6–7, 1978

Whereas, The most severe blizzard in the history of Rhode Island struck the state on February 6 and 7, 1978, causing thousands of citizens to be stranded in vehicles on the highways, forcing some to seek refuge in any shelter at hand, and isolating others in their homes or places of employment; and

Whereas, The units of the United States Army and the Rhode Island National Guard rendered invaluable emergency assistance by clearing highways, providing land and air transportation for emergencies, rescuing persons in distress, delivering food and medical supplies; and by countless untold heroic and selfless acts helped the state to recover from this disaster; now, therefore, be it

Resolved, That the General Assembly of the State of Rhode Island and Providence Plantations expresses its sincere gratitude and highest praise to the following United States Army Units:

The 36th Engineers Battalion, Fort Benning, Georgia,

The 7th Engineers Battalion, Fort Polk, Louisiana,

The 3rd Engineers Battalion, Fort Stuart, Georgia,

The 11th Engineers Battalion, Fort Belvoir, Virginia,

The NM Construction Battalion 62, Gulfport, Mississippi, and

The 483rd Engineers Battalion, Army Reserve, New Bedford, Massachusetts;

to the following Headquarters and Headquarters Detachments of the Rhode Island Army National Guard:

Troop D (Air) 1st Squadron 26th Cavalry,

The 243rd Engineers Battalion Team AD,

The 861st Engineers Company (Light Equipment),

The 1118th Engineers Company (Dump Truck),

The 110th Public Affairs Detachment (Field Services),

The 43rd Military Police Brigade,

The 118th Military Police Battalion,

The 1043rd Medical Detachment,

The 119th Military Police Company,

The 1111th Military Police Company,

The 243rd Military Police Battalion,

The 115th Military Police Company,

The 169th Military Police Company,

Batteries B and C of the 1st Battalion (155T) 103rd Field Artillery, and

Batteries A, B, and C and the Service Battery of the 2nd Battalion (155T) 103rd Field Artillery;

and to the following Rhode Island Air National Guard units:

The 143rd Tactical Airlift Group

The 102nd Tactical Control Squadron

The 281st Combat Communication Group;

and be it further

Resolved, That the Secretary of State be and he hereby is authorized and directed to transmit duly certified copies of this resolution to the aforementioned units.

DRUG REGULATION REFORM ACT OF 1978

● Mr. HATHAWAY. Mr. President, it is my pleasure to join with my colleagues in introducing the Drug Regulation Reform Act of 1978. This legislation completely revises the Federal Food, Drug and Cosmetic Act provisions relating to pharmaceutical drugs to insure their safety and effectiveness without stifling the development and prompt availability of life-supporting drugs.

Mr. President, there are many complex and some controversial issues involved in drug regulatory reform. The legislation which we are introducing attempts to strike a balance among competing values. Of utmost importance is the objective of protecting the public from unsafe and ineffective drugs. At the same time, however, we do not want to discourage or delay the development and marketing of new drugs which can combat life-threatening illnesses. We want to provide as much information to consumers regarding nature and potential risks of the drugs they take. Yet we do not wish to unduly burden the pharmacetuical manufacturers and pharmacists. We wish to encourage research and protect commercial information; but we also want to increase the amount of information to the public so we may be assured of the safety and efficacy of drugs.

Further, we want to know how prescription drugs are actually used in this country and what effects they actually have. At present, no one has the statutory responsibility to do this; nor has any one group appeared eager to assume this responsibility.

The legislation we are offering today attempts to establish such responsibility and address the many other issues involved in drug regulation. Specifically, the bill requires the Food and Drug Administration to obtain data on drug use, to determine how drugs are actually being used, and to take action to improve their use. It fundamentally restructures the process for approval of new drugs, and authorizes post-approval monitoring and testing of approved drugs for effectiveness when used in a manner for which they are not approved but for which they are known to be widely prescribed. The bill provides for consumer participation in the drug approval process. It requires labeling of prescription drugs and provision of patient information. Furthermore, it limits the advertising, marketing, and promotional excesses of the pharmaceutical industry. Among other things, it also establishes a National Center for Clinical Pharmacology and regulates the export of drugs.

Mr. President, this legislation represents a collaborative attempt to develop a comprehensive, workable system of drug regulation acceptable to the consumers, the providers and the regulators. It is by no means a final product. In fact, we each have certain reservations about different provisions in the bill. I am particularly concerned about the criminal penalties section.

Current law imposes strict liability for stated violations of the Food, Drug and

Cosmetic Act. It is critical that we do not relax this standard so as to make it ineffectual. In 1976, when the Senate considered S. 641, the Consumer Food Act, there was much heated debate on the issue of weakening the criminal sanction. The controversy was whether to retain the strict criminal liability standard, which would have greatly increased the Governments burden of proof and thereby lessened consumer protection. Ultimately, the Senate adopted compromise language offered by myself and Senator JAVITS which replaces the strict liability standard with a definition of the sort of behavior which ought to be punished with criminal penalties. This definition, which is more precise than the negligence standard, imposed criminal penalties when the individual charged is found to have acted "knowingly, willfully" or "without the care, skill, prudence, and diligence under the circumstances then prevailing that a prudent man acting in like capacity and familiar with such matters would use in the conduct of an enterprise of a like character." This definition, with minor modification but like intent, is incorporated in section 162 of the Drug Regulation Reform Act. It is imperative that we do not relax this standard as we revise the bill.

There are other provisions of concern to me which require significant revision. However, I am pleased to cosponsor this legislation so that we can put these important issues before the American public and engage in valuable dialog. I look forward to working with my colleagues, the administration, the pharmaceutical industry, and other interested parties to develop a sound and practical law.●

IRELAND'S MINISTER FOR FOREIGN AFFAIRS PRAISES JOINT ST. PATRICK'S DAY STATEMENT ON NORTHERN IRELAND

● Mr. KENNEDY. Mr. President, in yesterday's RECORD, at page S3781, I included a copy of a joint St. Patrick's Day statement on Northern Ireland issued by a group of 18 Senators, Representatives, and Governors.

I am pleased to note today that Mr. Michael O'Kennedy, the Minister for Foreign Affairs of the Republic of Ireland, has issued a statement welcoming our joint effort, and I ask unanimous consent that the foreign minister's statement may be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT ISSUED BY MR. MICHAEL O'KENNEDY, T.D., IRISH MINISTER FOR FOREIGN AFFAIRS ON MARCH 16, 1978

I very much welcome the St. Patrick's Day statement on Northern Ireland issued by American political leaders of Irish origin. This statement reflects the consistent and unequivocal stand which its authors have taken against violence and the evil men who practice it in Ireland.

It is only by peaceful means that the unity of Ireland can be achieved. Those in the United States or elsewhere who lend assistance or encouragement or even passive tolerance to men of violence in Ireland are, in the Taoiseach's words, not helping to fulfill the aspirations of the Irish people but destroying them. It must be our primary aim to achieve peace in every part of our island. Those who oppose this objective are blocking any possibility of progress towards the objective of unity.

We are grateful for the interest and sympathy which the Irish in the United States have traditionally shown in relation to Ireland's problems. Their hopes for Ireland coincide with our own. It is, therefore, with confidence that I appeal to them to heed the wise and statesmanlike words of the statement. I urge them to follow the path of wisdom indicated by the authors of the statement and to turn a deaf ear to the pressure groups who support openly or covertly the mindless and unrepresentative people who purport to serve Ireland's cause by indiscriminate letting of blood.

St. Patrick's Day serves to remind Irishmen all over the world of what they have in common. It must be our hope that this day of brotherhood will inaugurate a new period of peace and harmony in Ireland.●

THE RURAL HEALTH NEEDS PLANNING ACT OF 1978—S. 2487

● Mr. HATHAWAY. Mr. President, it is my pleasure to join my colleagues Mr. CLARK, Mr. LEAHY, and Mr. ANDERSON in introducing legislation to amend the Public Health Service Act. The bill will provide greater emphasis on planning for rural health needs.

Our health planning process must recognize and be responsive to the distinct differences in the health care needs of rural areas. These regions of our country have unique problems and characteristics which require special consideration in the health planning process. Not only are the needs and problems of rural areas different from nonrural areas, but the planning process itself is influenced by the sparsity of population; the larger area that must be considered, the longer distances that must be traveled, and the continuing deficiency of facilities, services, and personnel, the greater are the challenges of comprehensive training. Many rural communities believe that national health planning guidelines threaten the existing health care system and are unresponsive to their unmet needs.

These guidelines must adequately address the unique requirements of rural citizens who make up 60 percent of the medically underserved in this country. While the ratio of physicians to population in nonrural areas is 150/100,000, in rural areas the ratio is 70/100,000. Additionally, almost 50 percent of the country's poor live in rural areas and 4 out of every 10 elderly, who often have greater health needs, are rural residents.

Although national totals may indicate sufficient numbers of hospital beds, physicians, and other health care resources, figures for rural areas clearly show a continuing scarcity of health facilities and services. The standards and guidelines designed to accomplish the important task of controlling spiraling health care costs must be designed to preclude the possibility of further reducing the already limited health resources in the underserved areas.

The bill amends the Public Health Service Act to increase planning input from rural areas. It mandates special attention within the overall guidelines to the needs and concerns of rural individuals. It prohibits the imposition of inflexible standards which would be inappropriate in rural and medically underserved regions. It assures representation of the rural consumers of health care on the National Council on Health Planning and Development. Additionally, since the Department of Agriculture has a major responsibility for rural development, this bill provides that the Department's Assistant Secretary for Rural Development serve as an ex officio member of the National Council.

Other provisions are designed to assure adequate representation of rural consumers on statewide coordinating councils which advise State health planning agencies. The bill also encourages the development of subarea councils as smaller divisions of Health Systems Agencies (HSA's) which would be supported on both the basis of the square mileage of the area covered and the inherent geographic barriers within a particular health service area. This provision is important to encourage full participation by those consumers who are otherwise restricted by distance from easy access to the planning process.

Additionally, the funding mechanism for HSA grants is modified to include extra assistance for those areas with medically underserved populations. The final amendment requires centers to develop consumer education packages of technical assistance to HSA boards and staff. Both provisions concentrate resources on previously undersupported areas of need.

A health planning process which has sufficient input from rural and medically underserved areas is essential to the goal of achieving quality health care at a reasonable cost for all Americans. Guidelines for health care planning must reflect the realities of the life styles of the population, the unique needs and problems of rural citizens, and address the health care deficiencies confronting the medically undeserved.

I believe that the provisions in this bill direct attention to the regional differences in this country and further the process of improving health care. I look forward to supporting this legislation when it comes before the Subcommittee on Health on which I serve.●

CALIFANO ALSO OPPOSES OMB CHILD CARE REGULATIONS

● Mr. CRANSTON. Mr. President, last week I expressed my concern over regulations proposed by the Office of Management and Budget which are likely to have the effect of closing down the child care centers presently operating in Federal agencies throughout the Nation and would preclude any further development of these on-site child care centers in Federal agencies.

At hearings I held on February 20, as chairman of the Child and Human Development Subcommittee of the Human Resources Committee, I asked Arabella Martinez, Assistant Secretary for Human Development Services in the Department of Health, Education, and Welfare, to convey to Secretary Califano my views on the inappropriateness of these proposed regulations and urged that HEW take a strong position in opposition to the proposed regulations.

Hence, I was very pleased to receive a copy of Secretary Califano's February 27 letter to James T. McIntyre, Acting Director of the Office of Management and Budget, opposing the regulations. I ask unanimous consent that the text of Secretary Califano's letter be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. CRANSTON. Mr. President, since my remarks last week, I have received numerous letters from organizations and individuals opposing the OMB regulations. They range from professional groups to labor organizations, to concerned parents. I reiterate the view I expressed last week that the Federal Government should be demonstrating leadership in the development of alternative forms of child care, such as on-site or workplace child care facilities, not taking steps which could destroy the handful of innovative and successful programs in Federal agencies. I congratulate Secretary Califano and the other heads of Federal agencies who have expressed their opposition to these proposed regulations for their recognition of the importance of supporting these child care programs.

EXHIBIT 1

SECRETARY OF HEALTH,
EDUCATION, AND WELFARE,
Washington, D.C., Feb. 27, 1978.

Hon. JAMES T. MCINTYRE,
Acting Director, Office of Management and Budget, Executive Office of the President, Washington, D.C.

DEAR JIM: I wanted to share my concern directly with you about the OMB Circular on "Assignment of Federally-Controlled Real Property to Non-Federal Activities," which makes it more difficult and more expensive for child-care centers to be set up in Federal agencies for Federal employees.

While the enclosed comments from Charles Miller, Acting Assistant Secretary for Management and Budget, address the child-care issue in detail as well as other issues contained in the Circular, I wanted to point out that it has been our policy to assist employee groups in establishing child-care centers at HEW.

Consistent with this Administration's commitment to expand employment opportunities for women and minorities, it is my view that the Federal government, through its control over the use and cost of its property, should facilitate the creation of child-care centers. Such a policy would greatly assist working parents, particulary working mothers in single-parent households, in carrying out their dual responsibilities.

Accordingly, I urge that the proposed commercial charges for child-care centers and the requisite finding that the activity is essential to the efficient operation of the agency be eliminated.

Sincerely,

JOSEPH A. CALIFANO, JR.●

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

RECESS TO 11 A.M. TOMORROW

Mr. SARBANES. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the previous order, that the Senate stand in recess, in executive session, until the hour of 11 a.m. tomorrow.

The motion was agreed to; and at 6:29 p.m., the Senate, in executive session, recessed until tomorrow, Friday, March 17, 1978, at 11 a.m

HOUSE OF REPRESENTATIVES—*Thursday, March 16, 1978*

The House met at 10 o'clock a.m.

Rabbi Harry H. Epstein, Ahavath Achim Synagogue, Atlanta, Ga., offered the following prayer:

Eternal God, reverently we ask Your guidance for the Members of this House.

May the words here spoken broaden vision and narrow division. May the power of principle, rather than the principle of power, be the measure of its deliberations.

We pray not for ease in resolving the responsibilities of directing the affairs of our Nation, for we are aware that we live in days large with challenge and perplexity. But we do pray for understanding adequate to the times' demands, for integrity sufficient for the tasks, for vigilance to recognize all evil plus steadfastness sufficient to overcome it, and for compassion that embraces all people in the circle of its concerns.

May we remember that "the effect of righteousness (is) quietness and confidence forever." (Isaiah 32: 17)

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

RABBI HARRY H. EPSTEIN

(Mr. LEVITAS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEVITAS. Mr. Speaker, for 50 years, Rabbi Harry H. Epstein has led the congregation of Ahavath Achim, in Atlanta, Ga. I have known and been guided by the spiritual wisdom of Rabbi Epstein all of my life, and I am happy he could be here today so that all of you might hear him.

The rabbinical tradition is generations deep in Rabbi Epstein's family. His grandfather, uncle, and father were rabbis. Rabbi Epstein was trained in the Slobodka Yeshiva, a seat of great rabbinical knowledge and headed by his uncle, himself a famous Talmudic scholar. He was also one of the first students at the Hebron Yeshiva in Palestine in 1924. He has distinguished himself as a rabbinic scholar as well as the leader of a congregation grateful for his devotion for all this time. He also holds a master's degree from Emory University in Atlanta and a Ph. D. degree from the University of Illinois.

His wonderful wife, Reva, is also descended from a family of rabonim. Together they have provided Atlantans, Jewish and Christian, with a shining example of leadership, strength, and dedication.

In addition to being our spiritual leader all these years, Rabbi Epstein and his wife have been close personal friends to my parents. We looked upon them as members of our family. My father was on the selection committee that chose him as our rabbi, and met him at the old Atlanta Terminal Station when he first arrived.

The synagogue has dedicated this entire year to a celebration of his jubilee year, and it is our honor to have had Rabbi Epstein lead us in prayer today, as he has led me and the others of the Ahavath Achim congregation for so many years.

ABDUCTION OF ALDO MORO

(Mr. RODINO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RODINO. Mr. Speaker, this morning I awoke to the news on my radio that Aldo Moro, former Prime Minister of Italy, has been kidnaped, his guards killed, and that the Red Brigade, some of whose members are presently on trial in Turin claim responsibility. They did so by stating "This is just the beginning."

If this is just the beginning, where and how does it all end?

In fact, this is not just a beginning, it is only the latest of a long series of general acts of violence designed to stymie governments and terrcrize communities.

Aldo Moro is a most respected and prominent Italian personage. A man who has served his country and people unselfishly and with devotion. His life of service to his country and the world, his dedication to world peace and order deserve better than this.

It is the most despicable of people who perpetrate these wanton and crazed acts of violence, who believe that some-

how they are so right that they can commit any wrong.

Let us all join in denouncing this behavior, let us all join in praying for the welfare, safety, and return of Aldo Moro.

Mrs. MEYNER. Mr. Speaker, I know that many of my colleagues share my feelings of shock and dismay at the recent kidnaping of Mr. Aldo Moro, former Premier of Italy and president of the Italian Christian Democratic Party. Italy's Red Brigades terrorist organization has taken credit for this despicable act. It represents merely the latest episode in a tragic series of terrorist acts carried out by both leftist and rightist groups in Italy.

This kidnaping comes at a time when we are all aware of the increasing importance and intensity of terrorist violence throughout the world. I know that many Americans share my dismay at these developments. Violence breeds violence. It represents a sense of despair at the ability of human beings to settle their differences reasonably and honorably.

I believe, however, that there is also a growing awareness of the futility and destructiveness of political violence. More and more, concerned men and women are turning to peaceful methods of dispute resolution on all levels of social intercourse. I hope that the tragic news from Italy will increase awareness of the need for creative peaceful conflict resolution in all human endeavors.

Mr. MURPHY of New York. Mr. Speaker, this morning's kidnaping of the former Prime Minister of Italy, Aldo Moro, is another terrible travesty of justice which diminishes all of us in the free world. Aldo Moro is the architect of a new and stable government in Italy, which had been plagued since the end of World War II with a division of strength among the leading parties. During two recent terms as its Premier, Aldo Moro brought a new strength of leadership to Italy's role as a vital key to NATO in its position as the anchor of the Mediterranean's southern flank. His was the critically decisive role in bringing about last month's agreement where all the major opposing factions will support the new minority government in Parliament—the first such coalition in 31 years—and he is now thought to be the probable next President, an indication of the Italians' great respect and need for his continuing leadership and devotion to that nation.

The members of the so-called Red Brigade claim that their act of terrorism is just the start in their attack on the very heart of the state of Italy. They have committed murder, international terrorism, and kidnaping in the name of some undefined goal, presumably geared toward using Mr. Moro's ransom to force the cancellation of the current trial of 49 other members of the Red Brigade on murder charges. Similar terrorist activities brought such a postponement of trial of the brigade members on two occasions, when the terrorists intimidated prospective jurors and defense attorneys.

There is not the slightest defense for such maniacal violence. Their cause is pure terrorism for its own sake, a brotherhood of blood which serves no other purpose than to bring added burdens to the new Italian Government, and which in turn only advances the cause of international communism in its stated goal of dominance of the peoples of this world.

This is not an isolated act; it is another in a series of acts of insane and brutal nihilism designed to thwart the will of a people's government by the substitution of terror, kidnapping, and murder, reminiscent of fascism and nazism we thought were buried long ago.

The American people, and the American Congress, cannot simply sit back and view this as an unfortunate bit of political infighting in some far-off country. Italy is an ally, and an important one. But more important, Aldo Moro is a respected world leader who has devoted his entire life to the service of his nation and the free world. In our prayers for his safe return, we must also commit ourselves to the firm resolution that such despicable and contemptible acts of violence shall not sway us, or any nation, from the pursuit of peace and the strengthening of our systems of government which will bring to justice those responsible.

GENERAL LEAVE

Mr. RICHMOND. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of my 1-minute speech yesterday regarding the Honorable WILLIAM H. NATCHER of Kentucky.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

PERMISSION FOR COMMITTEE ON MERCHANT MARINE AND FISHERIES TO SIT TODAY DURING 5-MINUTE RULE

Mr. FORSYTHE. Mr. Speaker, I ask uanimous consent that the Committee on Merchant Marine and Fisheries may be permitted to sit today during the 5-minute rule.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

ALDO MORO

(Mrs. FENWICK asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. FENWICK. Mr. Speaker, I would like to join in the remarks of my colleague, the gentleman from New Jersey (Mr. RODINO). I think all of us who love Italy, who know the sufferings of that country under the unceasing hammering of violence that these Red brigades have visited upon that nation, mourn that these four men have been killed and that former Prime Minister Moro, head of the Christian Democratic Party, has been kidnaped. It is an outrage, and I join with my colleague in bringing this to the attention of the House.

CONGRESS SHOULD "BITE THE BULLET" ON UNBULLETED STATEMENTS IN CONGRESSIONAL RECORD

(Mr. SYMMS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SYMMS. Mr. Speaker, I know my good friends from California, Mr. PHIL BURTON and LEO RYAN, would not wish to be misrepresented as far as their comments on the Redwood National Park conference report in the CONGRESSIONAL RECORD of March 14, 1978. I think it is quite interesting that the rollcall vote preceding the discussion of the Redwood National Park bill took place at 4:49 p.m., according to the Clerk's official record, and the next recorded vote on the Redwood National Park bill took place at 5:02 p.m. That means that there were 13 minutes between the time the House Conference Report on the Redwood National Park was called up for consideration and the time of the rollcall vote on that report. During that 13-minute period, my colleague, Mr. BURTON, covered five pages worth of material on the bill in the RECORD, including several lengthly charts and tables. Either my colleague has a tongue which is faster than a speeding bullet, or we should consider putting some bullets around his extraneous remarks.

I think we should either put some teeth into the new laws and rules for publication concerning statements and insertions in the CONGRESSIONAL RECORD, or "bite the bullet."

DEMOCRATS SHOULD BE MORE UNDERSTANDING OF REPUBLICAN PARTY VIS-A-VIS CAMPAIGN CONTRIBUTIONS

(Mr. RHODES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RHODES. Mr. Speaker, I take this time to express the hope that you and my good friends of the Democratic Party enjoyed a pleasant dinner last night. I understand that it was a great success.

Mr. Speaker, I hope it was a successful dinner because if the Democratic Party is well heeled and has a good campaign war chest, maybe the Democrats will find it in their hearts to be more understanding of the attempts by the Republican Party to raise enough money through campaign contributions for its own members so that we can make some kind of race out of the next election.

Mr. Speaker, that is really about all that we want to do. We just would like to enable our challengers to do all those things that are necessary at least to make the election interesting for incumbents, two-thirds of whom are Democrats. Actually, Mr. Speaker, there is not a predatory bone in our body. We are not trying to do anybody unto death, and we hope that with this latest infusion of good political money from the fat cats on the Democrat side, the Democrats will be able to look at us with a little

more kindly mien than they have in the recent past.

I think that it should be noted that this Democrat money comes from persons who paid, I am told, $500 apiece. The money which Republicans have raised comes from 1.3 million Americans who contributed less than $25 apiece. I think that pretty much demonstrates that the roles have now been reversed, that we are now the party of the little people and the Democrats are the party of the fat cats.

FULL EMPLOYMENT AND BALANCED GROWTH ACT OF 1978

Mr. HAWKINS. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 50) to establish and translate into practical reality the right of all adult Americans able, willing, and seeking to work to full opportunity for useful paid employment at fair rates of compensation; to combine full employment, production, and purchasing power goals with proper attention to balanced growth and national priorities; to mandate such national economic policies and programs as are necessary to achieve full employment, production, and purchasing power; to restrain inflation; and to provide explicit machinery for the development and implementation of such economic policies and programs.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 379, nays 8, answered "present" 2, not voting 45, as follows:

So the motion was agreed to.

The result of the vote was announced as above recorded.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill H.R. 50, with Mr. NATCHER (Chairman pro tempore) in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee of the Whole rose on Wednesday, March 15, 1978, section 2 and title I had been considered as having been read and open for amendment at any point. Pursuant to a motion to limit debate in the Committee of the Whole, all time for debate under the 5-minute rule on section 2 and title I, and all amendments thereto, had expired. Members may offer amendments to section 2 and title I, which will be voted on without debate, unless such amendment is printed in the CONGRESSIONAL RECORD.

Are there any further amendments to section 2 or title I?

AMENDMENT OFFERED BY MR. JEFFORDS

Mr. JEFFORDS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. JEFFORDS: Page 71, line 10, strike out "and" and everything that follows through line 12, and insert in lieu thereof the following:

"(G) the implementation, through financial assistance, of programs already established by law as major national priorities, such as the removal of architectural barriers to the handicapped.

"(H) such other priority policies and programs as the President deems appropriate.

Mr. O'BRIEN. Mr. Chairman, will the gentleman yield?

Mr. JEFFORDS. I yield to the gentleman from Illinois.

Mr. O'BRIEN. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, I rise in support of and I would like to commend my distinguished colleague Congressman JEFFORDS for offering this amendment to H.R. 50.

There is an urgent need to assist State and local governmental units in paying the price of removal of architectural barriers.

Recent legislation and regulations such as Public Law 94–142, and section 504 of the 1973 Rehabilitation Act mandate that buildings be made accessible to the handicapped. This is an important stride because the handicapped cannot join the mainstream of our society unless buildings and programs are made accessible.

It is an injustice for the Federal Government to, in effect, say: "We passed it, now you pay for it." The Congress

must be willing to be a partner with State and local governmental units. Congressman JEFFORDS' amendment recognizes this need, and I support him and commend him for the amendment he is offering.

Mr. JEFFORDS. Mr. Chairman, the purpose of this amendment is to say briefly this, that in the economic report if the President deems it is necessary for additional programs for reducing unemployment, that after you have gone through the other priorities listed, you would take a look at the legislation which this body has already passed and for which funds are authorized, but not funded. Attention would be given to those that are labor-intensive. Already approved projects would be used to alleviate the unemployment situation before you go to last resort jobs.

Let me give some examples of the kind of things this would refer to; for example, remodeling and renovation of educational facilities; railroad renovations, the laying of track, and so forth. All these things are already in the law, but not fully funded, and you would say after these other priorities, take a look at the priorities already created in law before last resort jobs.

The major reason that I pick out the section 504 aspect of removing architectural barriers is that the President has already said he would put the full weight of his office behind implementing the section 504 regulations. However, as of yet, there is no money for the implementation of these programs.

This example addresses one of our most serious national problems, barrier removal for the handicapped. Section 504 of the Vocational Rehabilitation Act of 1973 states:

> . . . no otherwise qualified handicapped individual in the United States . . . shall, solely by reason of his handicap, be excluded from the participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance.

Although this law was passed 5 years ago. no Federal money has been authorized for the implementation of the section 504 regulations, which therefore places a heavy burden on taxpayers at the local level.

My amendment to section 106, "National Priority Policies and Programs for Full Employment and Balanced Growth," would make barrier removal for the handicapped an explicit national priority. The President has endorsed full implementation of the 504 regulations, but we have yet to see any similar support from OMB. Action by us is necessary.

It is crucial that barrier removal for the handicapped as an explicit national goal take a higher priority than the creation of "last resort' public service employment jobs. The process creates meaningful jobs in the private sector at a rate which is three times more labor intensive than construction work, which creates 40,000 jobs per billion dollars spent. If removing architectural barriers in compliance with section 504 costs $2.4 billion, as HEW estimates, we have created almost 300,000 jobs for both skilled and unskilled labor. Other estimates of the cost of removing architectural barriers are closer to $6 billion, which would create 720,000 new jobs.

This concern was established as a national priority 5 years ago, but the lack of Federal funding has prevented the sweeping changes which we know are necessary in order to comply with section 504. We must reaffirm our support for this issue by insuring that, as a national priority, this problem is corrected. We must implement programs such as barrier removal for the handicapped through private sector job creation, and not resort to public service jobs until our national priorities have been achieved.

It is also important to note that if we do not act all this burden will be placed upon local and State governments. Local governments are already overburdened. We must help them to insure an adequate education will be available to all.

Mr. HAWKINS. Mr. Chairman, will the gentleman yield?

Mr. JEFFORDS. I yield to the gentleman from California.

Mr. HAWKINS. Mr. Chairman, this side has no objection to the amendment and we accept it.

Mr. SARASIN. Mr. Chairman, will the gentleman yield?

Mr. JEFFORDS. I yield to the gentleman from Connecticut.

Mr. SARASIN. Mr. Chairman, I too, would like to congratulate the gentleman from Vermont for the amendment and certainly support it personally.

We have no objection on this side.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Vermont (Mr. JEFFORDS).

The question was taken; and the Chairman pro tempore announced that the ayes appeared to have it.

RECORDED VOTE

Mr. JEFFORDS. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 398, noes 0, not voting 36, as follows:

Mr. STRATTON changed his vote from "no" to "aye."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

PARLIAMENTARY INQUIRY

Mr. WEISS. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN pro tempore. The gentleman will state it.

Mr. WEISS. Mr. Chairman, is my understanding correct that even though yesterday, at the request of the distinguished minority leader, his unanimous-consent request not to meet tomorrow, that this would be on condition that we complete the legislation before us, the Humphrey-Hawkins bill, H.R. 50; and that if in fact we do not complete the work today that we will reconvene tomorrow?

The CHAIRMAN pro tempore. The gentleman's question is not a parliamentary inquiry, but let the Chair advise the gentleman that that is his understanding. That matter would be up to the leadership, the Chair would advise the gentleman.

Mr. WEISS. I thank the chairman.

AMENDMENT OFFERED BY MR. PIKE

Mr. PIKE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. PIKE: Page 65, line 8, After "Labor" strike out the period, replace it with a comma and insert "reduced by not counting as unemployed those who are unemployed because of strikes, those who have been unemployed for less than four weeks, those who have jobs waiting but for their own convenience are not ready to enter employment, those who are not seeking full-time work, and those who voluntarily left their last jobs.".

The CHAIRMAN pro tempore. The gentleman from New York (Mr. PIKE) is recognized for 5 minutes in support of his amendment.

Mr. RHODES. Mr. Chairman, would the gentleman yield so that I may comment upon the inquiry just made to the Chair?

Mr. PIKE. I yield to the gentleman from Arizona.

Mr. RHODES. It was my understanding when the question was propounded to the majority leader yesterday that there was no agreement as to how late we might go tonight, and that it was the hope of the majority leadership to finish the bill tonight. However, it was also my understanding that there was a firm agreement that there would be a pro forma session tomorrow, if at all, but probably no session at all.

Mr. PIKE. I would simply beg that this not be done on my time. I am limited to an amendment that is terribly important to me.

Mr. RHODES. Mr. Chairman, I ask unanimous consent that the gentleman from New York may have an additional 2 minutes because of the 2 minutes of his time that I have taken.

The CHAIRMAN. Is there objection to the request of the gentleman from Arizona?

There was no objection.

Mr. WRIGHT. Mr. Chairman, will the gentleman yield?

Mr. PIKE. I am happy to yield to the distinguished majority leader.

Mr. WRIGHT. In order not to impose further upon the time of the gentleman from New York, let me just simply say that it is our firm intention to finish this bill tonight. Doing so, we would have no session tomorrow.

Mr. PIKE. Mr. Chairman, I think we have made it abundantly clear in the debate on this legislation that everybody here is against unemployment. We have made it clear that everybody here is against inflation. I think that out in the real world almost everybody is against inflation, but I get the uneasy feeling that there are a few people who are not terribly unhappy with being unemployed.

What this amendment is addressed to is the basic concept of the bill, which says that it is a bill to find jobs for those who are ready, able, and willing to work. I am saying, all right, before we start this massive macro-economic program, let us look a little bit at the trigger. Who are we counting as unemployed?

Let us not count as unemployed for the purpose of triggering this massive economic policy those who are strikers. Let us not count as unemployed those that we call frictional unemployed; they are just between jobs. They have been unemployed for less than 4 weeks. Let us not count as unemployed those who have jobs waiting for them, but who are not ready to go to work—and there are lots of people like that.

I think that we too often use a shotgun when we ought to be using a rifle, or even a scalpel. I want, as much as the gentleman from California wants, to get at the hardcore unemployed, those who really want to work and really cannot get jobs, but I do not think we ought to trigger this massive program with a trigger so very, very loose that it counts people who really do not want to work, who are temporarily between jobs, who have jobs waiting for them, or who quit their last jobs.

That is essentially what this amendment is about. It addresses itself to the trigger we are going to use. The statistics are available. The statistics are there. For heaven's sake, let us use them and see that we get at the real problem which is the hardcore unemployed who cannot get work, without starting this tremendous program, which I happen to believe if implemented will be very inflationary, to take care of a lot of people who really do not want to work.

Mr. HAWKINS. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, the amendment is thoroughly unworkable and certainly defective. Unfortunately, despite what the gentleman from New York says, the amendment attempts to count among the unemployed all who are unemployed because of strikes. That would not make a change for those involved in strikes but would for those who may be unemployed because of strikes over which they have no control who are obviously secondarily unemployed because strikes have taken place.

The Labor Department counts the unemployed without regard to the length of their unemployment and the gentleman would only count them after 4 weeks, which would certainly be in conflict with our present method of counting that group.

What he means by those who have jobs waiting but for their own convenience are not ready to enter employment, I do not know. I do not know who is going to determine who those people are. It would take a psychiatrist to do that, and the Labor Department has told the subcommittee that this amendment is thoroughly unworkable and they would have no way of ascertaining many of these groups that have been named.

No one knows who those are who are not seeking full-time work. There is no record being made of those at the present time, and certainly no one knows who those individuals would be.

So where the gentleman attempts to say that we should reach the hard core, he is really not doing it in this amendment. What he is doing, however, is so redefining unemployment that it would mean 8 percent unemployment under current concepts would be the target of this bill under his concepts. Obviously what he is doing is saying that in 1977 when we had 7 percent unemployment, that we had no unemployment. That would be the effect of this amendment.

I would suggest that there are difficulties and certainly some defects in the present method of statistical gathering on who is employed and who is unemployed. For that very reason the Congress has named a commission, the National Commission on Employment and Unemployment Statistics, which is presently authorized to go into this question and to bring back into this body a more accurate method of doing it. I suggest we should wait until that commission reports to us because there are individuals on both sides. There are some 3 million persons who today are not counted as unemployed at all simply because they work part time, even though they want full-time work. There are almost a million not counted today because they are termed as discouraged workers. Both of these groups are actually reported in our statistics today and not counted. So, if we start counting on both sides, it would reduce to absurdity this amendment.

We have already adopted the Jeffords amendment which would reduce the unemployment trigger 2½ percent. This amendment would take us back to 8 percent.

Let me counsel all Members who are interested in countercyclical programs, that these countercyclical devices would be wiped out and they would be no longer qualified for Federal assistance merely because through statistical methods we have solved the unemployment problems

and declared to the Nation by this amendment that we no longer have unemployment in this country. That is really the effect of this amendment.

Mr. BOLLING. Mr. Chairman, will the gentleman yield?

Mr. HAWKINS. I will be glad to yield to the gentleman from Missouri (Mr. BOLLING) who has not had an opportunity to speak. Then I will yield to the gentleman from New York (Mr. PIKE) if I have the time remaining.

Mr. BOLLING. Mr. Chairman, I thank the gentleman for yielding to me.

Mr. Chairman, the gentleman from New York in his statement has mentioned and has indicated that we should look a little bit at the triggering. I think we should look a whole lot at the triggering. One of the problems with that is that we have not had a revision of unemployment compensation considered for a long time. We have not been able to pass a law on welfare reform.

What I fear is that the gentleman's amendment, no matter how well-intentioned, will be a counterpart of the effect of the earlier Jeffords amendment which casually fools with the problems of unemployment statistics. We have done a little checking on that and we find it will only take a billion dollars or so of our taxpayers' money and about 25,000 people to deal with the problem that that amendment offers. I suspect this will be even more difficult.

The way in which this should be handled is in the Committee on Ways and Means in a whole series of pieces of legislation.

The CHAIRMAN pro tempore. The time of the gentleman from California (Mr. HAWKINS) has expired.

The question is on the amendment offered by the gentleman from New York (Mr. PIKE).

The question was taken; and the Chairman pro tempore announced that the noes appeared to have it.

RECORDED VOTE

Mr. PIKE. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 199, noes 204, not voting 31, as follows:

[Roll No. 158]

NOT VOTING—31

Anderson, Ill.	Krueger	Staggers
Ashley	Lloyd, Tenn.	Stockman
Baucus	Markey	Teague
Beard, R.I.	Metcalfe	Thornton
Beilenson	Michel	Tucker
Brown, Ohio	Mitchell, Md.	Whitten
Broyhill	Mollohan	Wilson, C. H.
Buchanan	Rahall	Young, Alaska
Duncan, Tenn.	Robinson	Young, Tex.
Flood	Roncalio	
Frey	Ryan	

The Clerk announced the following pairs:

On this vote:

Mr. Krueger for, with Mr. Flood against.

Mr. Teague for, with Mr. Rahall against.

Mr. Whitten for, with Mr. Metcalfe against.

Mr. Michel for, with Mr. Mitchell of Maryland against.

Mr. Robinson for, with Mr. Beard of Rhode Island against.

Messrs. SKELTON, MURPHY of New York, PEASE, and CONTE changed their vote "aye" to "no."

Mr. GOLDWATER and Mr. LEVITAS changed their vote from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. YOUNG OF FLORIDA

Mr. YOUNG of Florida. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. YOUNG of Florida: On page 67, line 13, insert "veterans," after "elderly".

Page 68, line 8 insert the following:

"(4) For purposes of this subsection, the term 'veteran' shall mean the same as defined in 38 U.S.C.A. Section 101(2)."

Mr. YOUNG of Florida. Mr. Chairman, this amendment is not difficult to understand. In the line that reads,

every effort shall be made to reduce those differences between the rates of unemployment among teenagers, women, minorities, the elderly * * *

This amendment would add the word "veterans."

We all know that those who have served in the Armed Services have a unique problem when they leave their military service. They have been out of the job market for a period of time, and because of this, jobs just sometimes are not as available to them as they are to persons who have not had that same unique experience.

I would hope that the leadership on both sides would be able to accept this amendment.

Mr. HAWKINS. Mr. Chairman, will the gentleman yield?

Mr. YOUNG of Florida. I yield to the gentleman from California (Mr. HAWKINS).

Mr. HAWKINS. Mr. Chairman, we have seen the amendment and we are very happy to accept it.

Mr. YOUNG of Florida. Mr. Chairman, I thank the gentleman.

Mr. SARASIN. Mr. Chairman, will the gentleman yield?

Mr. YOUNG of Florida. I yield to the gentleman from Connecticut.

Mr. SARASIN. Mr. Chairman, I would congratulate the gentleman for offering this amendment, and it is acceptable on this side, as well.

Mr. YOUNG of Florida. I thank the gentleman.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Florida (Mr. YOUNG).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. YOUNG OF FLORIDA

Mr. YOUNG of Florida. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. YOUNG of Florida: Page 68, line 3, strike out "and" and insert immediately after such line the following new subparagraph:

"(C) study the employment status of recipients of Social Security benefits and other Federal government pension programs and the effects on their employment status caused by the statutory limitation on outside earned income; and

Page 68, line 4, redesignate subparagrapn (C) as subparagraph (D).

Mr. YOUNG of Florida. Mr. Chairman, this amendment, while it speaks to the question of outside earnings limitations for social security recipients, does not intend to, nor could it, make change in the basic law by this bill. What it does is to make this one of the goals of the act, that is to determine just what is the economic effect and the jobs effect upon those elderly citizens who want to work but who are limited because of the outside earnings limitation.

Mr. HAWKINS. Mr. Chairman, will the gentleman yield?

Mr. YOUNG of Florida. I yield to the gentleman from California.

Mr. HAWKINS. Mr. Chairman, we are most willing and pleased to accept the gentleman's amendment on this side.

Mr. YOUNG of Florida. Mr. Chairman, I thank the chairman.

Mr. SARASIN. Mr. Chairman, will the gentleman yield?

Mr. YOUNG of Florida. I yield to the gentleman from Connecticut.

Mr. SARASIN. Mr. Chairman, we accept the gentleman's amendment on this side.

Mr. YOUNG of Florida. Mr. Chairman, I thank the gentleman from Connecticut.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Florida (Mr. YOUNG).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. CLEVELAND

Mr. CLEVELAND. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. CLEVELAND: Page 71, line 10, strike out "and" and insert immediately after such line the following new subparagraph:

"(G) recommendations for legislation and administrative reforms necessary to improve the function of Federal agencies by requiring the completion of agency proceedings, including judicial review thereof, in a timely manner; and

Page 71, line 11, redesignate subparagraph (G) as subparagraph (J).

Mr. CLEVELAND. Mr. Chairman, on Wednesday, March 8, 1978, my remarks appear in the House Journal at pages 6107 and 6108. At this point I spoke about this amendment at some length.

Mr. Chairman, it is my understanding that the chairman of the committee, the gentleman from California (Mr. HAWKINS), will accept this amendment. In view of that fact, I will not repeat the remarks that I made last Wednesday.

Mr. HAWKINS. Mr. Chairman, will the gentleman yield?

Mr. CLEVELAND. I yield to the gentleman from California.

Mr. HAWKINS. Mr. Chairman, we are trying to establish exactly which amendment it is. Is it the one that refers to procedural requirements applicable to public works or is it the one relating to judicial review of administrative reforms?

Mr. CLEVELAND. It is that latter one, yes.

Mr. HAWKINS. Mr. Chairman, we have no problem with that. We are willing to accept the gentleman's amendment.

Mr. SARASIN. Mr. Chairman, will the gentleman yield?

Mr. CLEVELAND. I am delighted to yield to the gentleman from Connecticut.

Mr. SARASIN. Mr. Chairman, I want to be sure that we have the same amendment in mind. Is it the one that starts "Page 71, line 10"?

Mr. CLEVELAND. That is correct.

Mr. SARASIN. Mr. Chairman, we have no objection to the amendment on this side, and I congratulate the gentleman for his amendment.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from New Hampshire (Mr. CLEVELAND).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. CLEVELAND

Mr. CLEVELAND. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. CLEVELAND: Page 71, line 10, strike out "and" and insert immediately after such line the following new subparagraph:

"(H) recommendations for legislation and administrative reforms necessary to reduce or eliminate procedural requirements applicable to public works programs and projects in order that such programs and projects which alleviate unemployment will proceed as expeditiously as possible; and

Page 71, line 11, redesignate subparagraph (G) as subparagraph (J).

Mr. CLEVELAND. Mr. Chairman, again, my remarks of last Wednesday, March 8, on pages 6107 and 6108, addressed the issue of this amendment; and I do not think it is necessary to repeat my remarks in the RECORD at this time.

Mr. HAWKINS. Mr. Chairman, will the gentleman yield?

Mr. CLEVELAND. I yield to the gentleman from California.

Mr. HAWKINS. Mr. Chairman, we have seen this amendment and have discussed it with the author and think that it is an acceptable amendment. Therefore, Mr. Chairman, we accept it on this side.

Mr. WRIGHT. Mr. Chairman, will the gentleman yield?

Mr. CLEVELAND. I yield to the gentleman from Texas.

Mr. WRIGHT. Mr. Chairman, I want to congratulate the gentleman on this amendment. I think it is a very constructive amendment.

I believe there is abundant evidence that some of the efforts by which Congress has attempted to alleviate unemployment have indeed been hampered by what we might call administrative drag, unnecessary regulations, and an overburden of redtape.

Mr. Chairman, I think the gentleman has a splendid amendment. It ought to be in harmony with the President's announced program, and I just want the gentleman to know that I congratulate him on it.

Mr. CLEVELAND. I appreciate the kind remarks of the majority leader. I should confess, and I do confess, that much of this particular amendment is based on hearings that the majority leader, who was then the ranking member on the Investigations and Review Subcommittee of the Public Works Committee, and I conducted. I am very grateful to him for those hearings. This amendment rests squarely on the results of those hearings, where we found this problem to be so frustrating.

Mr. WRIGHT. If the gentleman will yield further, having said all the kind and generous things about the gentleman and his splendid amendment, I now assume that the gentleman will be pleased to support the bill.

Mr. CLEVELAND. We will come to that later, because I have another amendment.

Mr. SARASIN. Mr. Chairman, will the gentleman yield?

Mr. CLEVELAND. I yield.

Mr. SARASIN. Mr. Chairman, I wish to associate myself with the remarks of the majority leader. Certainly, the amendment is acceptable on this side of the aisle.

Mr. CLEVELAND. I thank the gentleman.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from New Hampshire (Mr. CLEVELAND).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. CLEVELAND

Mr. CLEVELAND. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. CLEVELAND: Page 71. line 10, strike out "and" and insert immediately after such line the following new subparagraph.

"(I) an analysis of the impact of government regulations, environmental and safety requirements, and crime on the productivity of the economy; and

Page 71, line 11, redesignate subparagraph (G) as subparagraph (J).

Mr. CLEVELAND. Mr. Chairman, this is an amendment that is very much similar to the previous two amendments, but because this amendment specifically mentions the unmentionable it will not

be accepted. It squarely addresses the fact that among the regulations that are causing unemployment are certain environmental regulations, not to mention safety requirements, and indeed crime. However, I think it is important that we do remember that if we are going to honestly address this problem of underemployment or unemployment, we do have to take a hard look at ourselves—that is, the U.S. Government—and I think we have to address the problem as to whether or not some of these environmental requirements that we are insisting that business follow, and for good purposes, and some of the problems with crime and theft and some of the problems with the safety regulations, are not in fact impeding our national economic growth.

This is no idle allegation. In January, in the issue of Survey of Current Business, Edward F. Denison, a Senior Fellow of the Brookings Institution, reported on the results of a study supported by the National Science Foundation. He found evidence of a real decline in our national growth rate, and attributed much of it to the significant loss of productivity in the economy as a result of environmental and safety regulations, plus crime. It is perfectly true that this study may not be valid, but it certainly confirms other studies by economists, such as Mr. Weidenbaum, which have indicated that the regulatory process that we are loading up our economy with, is extremely costly, and far more costly than most people realize.

In my remarks in the RECORD which I previously referred to of last Wednesday, pages 6107 and 6108. I said that Mr. Weidenbaum estimated that the cost of this regulation might be in excess of $100 billion. Since that time, I have been corrected, and I find that it would be closer perhaps to $60 billion. But, it is still an enormous and significant amount of money.

Again, if we are going to honestly address—honestly address—this problem of economic growth and this problem that is related to employment, I think we have to be honest and take a good, hard look at just exactly what we are doing with these environmental requirements and other requirements that we are asking of the business community.

Mr. SARASIN. Mr. Chairman, will the gentleman yield?

Mr. CLEVELAND. I yield to the gentleman from Connecticut.

Mr. SARASIN. Mr. Chairman, I would like again to congratulate the gentleman from New Hampshire. I think this amendment is complementary to the bill and certainly complementary to the other amendments just offered by the gentleman from New Hampshire. It is extremely important that this Congress keep in mind the effect of its regulations on the economy and employment. Certainly I would not view the language of this amendment as in any way interfering with our concern for the environment or with our concern for the occupational health and safety, but it is just telling us to be realistic and make sure we are not compounding the problems when we go out to express those concerns.

Again I compliment the gentleman from New Hampshire.

Mr. CLEVELAND. I thank the gentleman from Connecticut. He has ably and accurately expressed my own sentiments in offering this amendment.

I hope the Committee will accept the amendment.

Mr. PHILLIP BURTON. Mr. Chairman, I move to strike the requisite number of words and I rise in opposition to the amendment.

Mr. Chairman, I would like to express my vigorous opposition to this proposed amendment. What we have before us is a bill dealing with the great problem of unemployment within the context of managing our economy in the best possible way. This amendment in my opinion is very dangerous in terms of the environmental yardstick that this Congress has so carefully constructed.

Our committee and a variety of committees of the House have under review the impact on preserving our environment in a manner consistent with developing the Nation's economy.

This is a bad amendment on a bill that should not carry this burden and one that I think on environmental grounds should be rejected by our colleagues.

Mr. Chairman, I yield back the balance of my time.

Mr. CONYERS. Mr. Chairman, I move to strike the requisite number of words.

The CHAIRMAN pro tempore. The Chair would like to advise the gentleman from Michigan that on an amendment printed in the RECORD offered after time for debate has expired, only 5 minutes is allowed to speak in opposition to the amendment. The gentleman from California (Mr. PHILLIP BURTON) has spoken in opposition to the amendment.

Does the gentleman from California (Mr. PHILLIP BURTON) yield to the gentleman from Michigan?

Mr. PHILLIP BURTON. Mr. Chairman, if the procedure permits that, yes. I did yield my time back, but I ask unanimous consent that I be able to recapture the time I yielded back.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from California?

Mr. BAUMAN. Mr. Chairman, reserving the right to object, the gentleman from California has my respect in many things, but the imposition of the restriction on debate time was imposed by the majority's vote yesterday. If the gentleman will revise his request and ask that we proceed under the 5-minute rule in regular order on title I allowing all proper amendments, I will certainly not object to that.

Mr. PHILLIP BURTON. Mr. Chairman, I thank the gentleman from Maryland for his offer and respectfully decline it.

The CHAIRMAN pro tempore. The gentleman withdraws his request. All time on this amendment has expired.

The question is on the amendment offered by the gentleman from New Hampshire (Mr. CLEVELAND).

The question was taken; and the Chairman being in doubt, the Committee divided, and there were—ayes 31, noes 32.

So the amendment was rejected.

AMENDMENT OFFERED BY MR. MARKS

Mr. MARKS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. MARKS: Page 63, line 10, insert immediately after "structural policies" the following: ", including measures to encourage private sector investment and capital formation", and on page 64, line 10, insert "capital formation," immediately after "production,".

Mr. MARKS. Mr. Chairman, I offer this amendment, and so that there will be no misunderstanding, the amendment applies to section 103, at page 63, line 10, and section 103, at page 64, line 10, and was printed in the RECORD.

Mr. Chairman, I offer this amendment to strengthen the impact of section 207 of the bill, formation of public and private capital. I strongly support section 207, which provides that the Economic Report of the President shall, as appropriate, review and assess existing Federal programs and policies which affect business investment decisions. It is encouraging that this section also states that the President shall recommend measures to improve existing programs concerned with private capital formation.

The purpose of this amendment is to emphasize the importance of capital formation in the creation of jobs by mentioning capital formation specifically in the declaration of policy and in the current and foreseeable trends set out in the Economic Report of the President.

Section 102 of this bill amends the important declaration of policy section of the Employment Act of 1946. The new section 2(f) will establish priorities in the effort to expand jobs to the full employment level. Approximately, the first priority is private sector jobs creation. The first part of the amendment would express this priority in the following manner: "expansion of conventional private jobs through improved use of general economic and structural policies, including measures to encourage private sector investment and capital formation."

Why should capital formation receive this emphasis? The answer is that capital formation truly is job creation. The ability of the country to create jobs and reduce unemployment depends upon its ability to equip its workers with the tools of production.

The civilian labor force is expected to rise from 93 million in 1975 to 103 million in 1980. The total investment required to equip these new workers will require large amounts of capital spending. Today it costs more than $30,000 to provide one manufacturing job in American industry, twice what it cost 10 years ago.

According to a Department of Commerce study of December 1975, to create enough jobs to reduce unemployment to 5 percent by 1980, the United States must devote 12 percent of its real

GNP during the period 1975–80 to capital formation. However, between 1965 and 1974, business fixed investment averaged only 10.5 percent of GNP; and during 1975 and 1976, it averaged only 9.3 percent. Moreover, of the seven major industrialized countries, the United States ranks last in investment ratio, last in productivity growth, and the next to the last in output growth.

In the Wall Street Journal of November 14, 1977, Irving Kristol summarized this predicament:

American productive capacity is growing far more slowly than even the disappointing statistics on current capital investment indicate. And it is such slow growth that largely explains our unemployment problem.

Policies to deal with insufficient investment are most critical in making maximum use of the capacity of the private sector to create jobs. A Hudson Institute study last summer found that:

Under present conditions the use of tax incentives to stimulate business can provide a particularly powerful tool for generating demand for labor.

The report went on to suggest that:

Avoidance of tax disincentives, price controls, and excessive government regulations which discourage investment would also make a major contribution to economic growth and reduced unemployment.

Given the importance of private sector investment and capital formation to private sector jobs creation, I believe they deserve specific mention in the declaration of policy. My first amendment provides for this.

The second part of the amendment would require that the Economic Report of the President transmitted to Congress include current and foreseeable trends in capital formation.

I was one of many of my colleagues who cosponsored the "Investment Policy Act of 1977," a bill to declare a national policy on investment in the private sector of the economy. That measure would have required the Council on Wage and Price Stability to submit to Congress an investment policy report which would have included information on current and foreseeable trends in the levels of investment capital. My amendment would spell out that the Economic Report in this legislation include that information.

I urge all of my colleagues, particularly those who cosponsored the "Investment Policy Act," to vote in favor of the amendment.

Mr. HAWKINS. Mr. Chairman, will the gentleman yield?

Mr. MARKS. I am happy to yield to the gentleman from California.

Mr. HAWKINS. Mr. Chairman, we have seen this amendment and think that the amendment adds immeasurably to the bill and stresses the importance of private capital, which I am quite sure is in line with the position of the sponsors of H.R. 50. We are very willing to accept the amendment on this side.

Mr. MARKS. I thank the gentleman from California.

Mr. SARASIN. Mr. Chairman, will the gentleman yield?

Mr. MARKS. I am happy to yield to the gentleman from Connecticut.

Mr. SARASIN. Mr. Chairman, I would advise the gentleman from Pennsylvania (Mr. MARKS) that we have had an opportunity to review his amendment and do consider it complementary to the bill. It adds thrust to the bill where it should be added to make sure we can deal effectively with the private sector and we do accept the amendment on this side of the aisle.

Mr. MARKS. I thank the gentleman from Connecticut.

Mr. JEFFORDS. Mr. Chairman, will the gentleman yield?

Mr. MARKS. I am happy to yield to the gentleman from Vermont.

Mr. JEFFORDS. Mr. Chairman, I rise in support of the amendment offered by the gentleman from Pennsylvania (Mr. MARKS). I think it is an excellent amendment in that it really focuses on the private sector. I thank the gentleman for offering his amendment.

I strongly support this amendment which strengthens the language of H.R. 50 regarding the importance of capital formation. The first priority of this bill is to create jobs in the private sector. In order to do this, the economy must be healthy and expanding, and capital formation is the most important source of this kind of economic growth. We must insure that our policies are conducive to investment which will augment capital, or future output-producing capacity.

Jobs which are created in the private sector, particularly in industries where undercapacity is present, such as the steel industry, or where expansion is possible, as in the computer industry, are directly related to the mainstream of capital creation. They fuel the engine of the American economy in the most stimulative, direct fashion.

On the other hand, jobs in "public service employment," although they may provide income, part of which may be spent on "capital intensive" goods, thus contributing to the capital capacity of the Nation, perform this function haphazardly and indirectly.

We must emphasize jobs in the private sector.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Pennsylvania (Mr. MARKS).

The amendment was agreed to.

AMENDMENT OFFERED BY MRS. HOLT

Mrs. HOLT. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mrs. HOLT: On page 70, immediately after line 7, add the following: "(A) national defense";

And redesignate the succeeding paragraphs accordingly; and

On page 71, line 9, strike out the words: "national defense and".

Mrs. HOLT. Mr. Chairman, this legislation H.R. 50 requires the President to submit an annual economic report setting forth national priorities and programs. In fact, this entire legislation deals with the issue of priorities.

Pages 70 and 71 of this act provide a list of subjects that shall be included in the ordering of national priorities. It is an alphabetical listing, and the order is very peculiar.

For example, listed under "D" are health care, education, training, child care, human services, and housing. These are very important, to be sure.

Under category "E" we find Federal aid to State and local governments, also important.

And when we get down to "F" we find national defense.

Mr. Chairman, this listing is out of whack, and my amendment is designed to correct the problem. It moves national defense up to "A."

Is there any member of this House who doubts that national defense is the foremost responsibility of the Federal Government? I think not. On February 22 our distinguished Speaker here on the floor said, and I quote:

Uppermost in our minds always is the defense of the Nation. The Nation's defense—that is always No. 1.

I know that we quarrel about how much money is needed to assure an adequate defense, but I cannot imagine any doubt expressed about defense being the primary responsibility of the Federal Government.

The States are capable of performing nearly every domestic function, but only the Federal Government can assure the defense of the Nation. Whenever we are considering priorities for Federal action, we must first consider the adequacy of our defenses.

If they are insufficient and we become prey to an aggressor, all the other Federal programs will not matter anyway.

I urge the Members to support this amendment.

Mr. HAWKINS. Mr. Chairman, will the gentlewoman yield?

Mrs. HOLT. I will be glad to yield to the gentleman from California.

Mr. HAWKINS. I thank the gentlewoman for yielding.

May I first, for clarification, state that the order of priorities listed on pages 70 and 71 is not really in terms of the importance of the programs, and there is no particular significance in the manner in which those programs are listed. We began with (A) which included the development of energy, transportation, and business, (B) dealt with attention to the needs of rural areas, (C) dealt with attention to the needs of the urban areas, and so on.

I think it must be pretty obvious that anyone reading that would not get the idea that we have, in terms of the manner in which these priority programs have been listed, attach significance as to order of importance.

Mrs. HOLT. If the gentleman will let me reclaim my time, then there would be no objection to placing national defense properly under (A)?

Mr. HAWKINS. If the gentlewoman would yield further, may I say in accepting it, we are accepting it on the basis that it is not stating any particular order of priority. We are willing to accept the amendment.

Mrs. HOLT. I thank the gentleman.

Mr. SARASIN. Mr. Chairman, will the gentlewoman yield?

Mrs. HOLT. I yield to the gentleman from Connecticut.

Mr. SARASIN. I thank the gentleman for yielding.

We will accept the amendment on this side of the aisle.

Mrs. HOLT. I thank the gentleman.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentlewoman from Maryland (Mrs. HOLT).

The amendment was agreed to.

PREFERENTIAL MOTION OFFERED BY MR. WIGGINS

Mr. WIGGINS. Mr. Chairman, I offer a preferential motion.

The Clerk read as follows:

Mr. WIGGINS moves that the Committee now rise and report the bill to the House with the recommendation that the enacting clause be stricken out.

Mr. WIGGINS. Mr. Chairman, I offer this motion in all seriousness. It is not offered for the purpose of delay or obtaining 5 minutes to speak on the Humphrey-Hawkins bill.

Mr. Chairman, when this proposal surfaced on the floor of the House last week, it was a mere seedling. But since then it has grown, and I contend that it has grown into an absolutely unworkable monster.

In my view, the only impact this bill will have on unemployment will be as a result of the hiring of an army of Government employees to implement its mandates.

A few moments ago we rejected an amendment to provide for a meaningful census of the unemployed. Both before and after that amendment we have accepted a whole host of proposals, which as I have said makes this bill unworkable.

For example, consideration must be given to inflation. Of course, we are all for that. Except for consideration, nothing is done about inflation, however.

Comments must be solicited from the 50 Governors. I suppose we might be for that except that it is unnecessary. Governors have never been muzzled where unemployment is concerned.

Consideration must be given to the handicapped, both with respect to construction and programs for the handicapped; and to the veterans; and to the elderly.

Consideration must be given to energy supplies.

One hundred percent of parity in the marketplace for farmers must be considered.

Day care centers must be considered.

A balanced budget is not to be neglected.

Foreign imports and the balance of trade also is a factor to be considered in this monumental report.

A few moments ago we agreed to give consideration to administrative law reform and to regulations and to environmental concerns. Just a moment ago we gleefully added to the list capital formation as appropriate for consideration.

Well, what is next? I would not be surprised if appropriate consideration should also be given to the weather, since it, too, has a significant impact on the economy in our country and upon unemployment.

All of this consideration will add to the weight of this monumental plan, but it will do little else.

Is it not clear that this seedling has grown into an unmanageable Christmas tree? And is it not clear beyond doubt that it would be merciful to chop it down right now?

We are going to have a vote, the leadership says, tonight, up or down, on Humphrey-Hawkins. In an effort to utilize your time efficiently and the time of the House, I suggest that the vote should occur now. We should strike the enacting clause and kill the bill. That would be the effect of the pending preferential motion.

Mr. Chairman, I urge an aye vote.

Mr. WRIGHT. Mr. Chairman, I rise in opposition to the preferential motion.

Mr. Chairman, when a preferential motion of this type is made, usually it is a frivolous motion.

Mr. HAWKINS. Mr. Chairman, will the gentleman yield?

Mr. WRIGHT. I yield to the gentleman from California.

Mr. HAWKINS. Mr. Chairman, I make the point of order that a quorum is not present.

The CHAIRMAN pro tempore. The Chair will count. Fifty-six Members are present, not a quorum.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the Committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

QUORUM CALL VACATED

The CHAIRMAN pro tempore. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to clause 2, rule XXIII, further proceedings under the call shall be considered as vacated.

The Committee will resume its business.

The majority leader, the gentleman from Texas (Mr. WRIGHT), is recognized for 5 minutes.

Mr. WRIGHT. Mr. Chairman, I appreciate the opportunity to speak against this preferential motion. Ordinarily, when a preferential motion is offered of the type presently pending, submitted by the gentleman from California (Mr. WIGGINS), it is a frivolous matter and merely a pro forma means by which a Member can get 5 minutes in which to address the membership. In this case, I perceive that the gentleman from California (Mr. WIGGINS) is serious about trying to report the bill back, with the recommendation that the enacting clause be stricken.

Let us understand exactly what the gentleman is proposing. The gentleman is proposing to kill the bill. That is the purpose of this pending motion. The gentleman suggests that it would be merciful just to send the bill back because it has been encumbered, as he suggests, with a number of amendments. That is about like suggesting that we ought in mercy to commit euthanasia upon someone as healthy as Muhammad Ali.

The gentleman from California complains that we have adopted amendments of the following type:

An amendment that would curb inflation. Why is that not harmonious with the goal of full employment? Indeed it is.

We have adopted an amendment that would stress our desire for a budget balance. What is wrong with that? It is in perfect harmony with the goals of this bill, because only as we get Americans back to work, off the unemployment compensation rolls and off the welfare rolls and onto productive payrolls which are tax paying rolls will we be able to balance the budget.

An amendment has been adopted within the last few minutes directing that the President make a study and report to us on the redtape and bureaucratic regulations which, in some instances, have hampered and hamstrung our efforts to create full employment. What is wrong with that?

I suggest to the gentleman that the kinds of amendments we have been adopting are the very kinds of amendments that should make this bill thoroughly palatable to him, unless he just does not believe in the goal of full employment.

I could take this bill, and so could any Member, back to the most conservative constituency in this country, and I think we would find in that constituency a basic appreciation of the fundamental thrust of what this bill says.

Not that America owes everybody a living. No. But that America does owe to every American an opportunity to earn a living. And that is exactly what this bill declares.

We have initiatives embodied in this bill expressing our desire that, to the maximum extent possible, employment should be in a healthy private sector of the economy. You can go to any Rotary club in America and demonstrate that this bill is not a radical departure from American tradition. It is indeed an embodiment of what the American Nation has stood for—a growing, healthy economy, capable of absorbing the energies and desires of every American who wants to work.

The gentleman from California seems to think it strange that we have just adopted an amendment which refers to capital formation. He appears to suggest that this has no place in a bill which would create full employment.

I would direct the gentleman's attention to page 85 of the bill as originally drafted, in which he will discover that there is an entire section devoted to the formation of public and private capital.

So I think, really, the objection of the gentleman is not just to the amendments that have been adopted. It would be an objection to the basic thrust of the bill.

We want to go on record with the strongest and most accurate reflection of what this Congress really believes in. I think this bill does that. Maybe some of the amendments we have adopted are not completely to my liking. Perhaps

those amendments can be perfected in a conference. But to suggest that the system is not working or that the bill somehow has been irredeemably flawed is really to say that one just is not quite getting his own way. This is a good bill. The bill has not been encumbered to the point of ineffectivneess. In fact, the bill has been strengthened by several of these amendments.

So I implore my colleagues to recognize this motion for exactly what it is—an effort to kill the bill. I urge the Members to vote "no" on the preferential motion.

The CHAIRMAN pro tempore. The question is on the preferential motion offered by the gentleman from California (Mr. WIGGINS).

The question was taken; and the Chairman pro tempore announced that the noes appeared to have it.

RECORDED VOTE

Mr. WIGGINS. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 106, noes 310, not voting 18, as follows:

[Roll No. 159]

NOT VOTING—18

Anderson, Ill.	Krueger	Ryan
Baucus	Mollohan	Teague
Buchanan	Rahall	Thornton
Flood	Robinson	Tucker
Florio	Roncalio	Young, Alaska
Frey	Runnels	Young, Tex.

Mr. DUNCAN of Oregon and Mr. WAXMAN changed their vote from "aye" to "no."

So the preferential motion was rejected.

The result of the vote was announced as above recorded.

Mr. FINDLEY. Mr. Chairman, I ask unanimous consent to proceed for 5 minutes.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

(By unanimous consent, Mr. FINDLEY was allowed to speak out of order.)

RETALIATION BY ISRAELIS AGAINST PALESTINIANS

Mr. FINDLEY. Mr. Chairman, earlier this week I signed a resolution sponsored by the House leadership deploring the Palestinian terrorist attack near Tel Aviv which caused the loss of life of 37 Israeli citizens as well as 9 of the terrorists. This destruction of innocent lives I deplored as senseless and an outrage on humanity.

Now, in retaliation, the Israelis have moved military armor heavily into southern Lebanon and loosed air strikes on villages along the coast and just south of Beirut. The human toll is unknown and perhaps will never be known. Based on eyewitness accounts already written by responsible journalists, several hundred residents of these areas—probably many more—died in the air and ground attacks. Of these an uncounted number were civilians.

I will gladly sign a House leadership resolution deploring also this terrible loss of life. So far I have seen none.

Clearly many innocent lives have been snuffed out, and entire villages have been leveled through deliberate military action.

The legality of all this is in serious question. The Israeli Government violated U.S. public law if, in these operations, it used any military gear or resources supplied by the U.S. Government. I refer to section 3(c)(1) of the Arms Export Control Act.

But the larger issue is the effect of this rising level of violence on the peace process, the prospect for a homeland for the Palestinians, and the hope for an end to terrorism in the Mideast.

The Israeli attack clearly is causing the death of several times as many innocent people as did the Tel Aviv terrorism. This vengeance will not end the problem but intensify it. It will embitter Palestinian passions already deep-seated.

The only hope for peace I can see in the Mideast lies in peaceful negotiations among all parties, including the Palestinians and a readiness among all parties, including Israel, to accept a Palestinian homeland in the region.

The CHAIRMAN pro tempore. Are there additional amendments to title I?

AMENDMENT OFFERED BY MR. JEFFORDS

Mr. JEFFORDS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. JEFFORDS: Page 72, strike out lines 8 and 9 and insert in lieu thereof the following:

(A) promotion of small business development, stimulation of alternative modes of transportation, aggressive development of alternative energy technologies and conservation, and heightened environmental quality through programs, such as a beverage container deposit system, all of which provide meaningful private sector employment;

Mr. JEFFORDS. Mr. Chairman, what this does is to take the top priorities, which I think rightfully the top priorities that is energy, transportation, small business and environmental improvement and directs them more toward solving these problems in the way that Congress has already expressed its intent.

The present section cites several important areas in which development must occur if we are to stimulate increased employment. However, at present I believe it is inadequate both in emphasis and direction. My amendment would improve this section by insuring that alternative job-creating programs receive increased national attention. The amendment would require that particular attention be focused upon small business development, alternative modes of transportation, alternative energy technologies and conservation, and heightened environmental quality through programs such as a beverage container deposit system. Stimulation of development in all of these areas would create literally hundreds of thousands of new private-sector jobs.

By stimulating alternative transportation and energy technologies we can go a long way toward reducing our dependence upon imported oil. The United States currently imports between 8 and 9 million barrels per day. As I have indicated previously to my colleagues, it has been estimated that for every million barrels of oil imported into this country we lose the equivalent of 475,000 to 500,000 jobs. A million barrels of oil represents 2 quads of energy, and were we to produce those 2 quads by developing existing and alternative energy sources, rather than importing it, we could substantially increase job opportunities here at home. This outflow of dollars for oil imports, over $40 billion annually, increases our balance of trade deficit, with a resulting drain of capital which would otherwise be available for investment and job creation in this country. It is unconscionable that we should continue this export of desperately needed jobs and neglect the development of alternative energy sources.

Let me quote to the Members from the "Comparative Analysis of the Employment Effects of Solar Energy," recently released in the State of California—

> For example, the Solar Energy Industry Association cites its own estimates of 74,000 new jobs in the solar industry by 1982, 347,000 in 1987, and 931,000 in 1992 as a major rationale for Federal solar incentives ("Proposed Solar Incentive Prorgam," p. 2). The Campaign for Economic Democracy, in its proposal for a public solar energy corporation, "SolarCal," claims that the solar industry "would create *hundreds of thousands of new jobs*" ("SolarCal," p. 5). Even ERDA lists solar energy's "labor intensive technology" as one of its major "public benefits" (National Program for Solar Heating and Cooling." 1976, p. 7)."

It is my understanding that this represents the present programs. If we increase incentives these figures will increase automatically.

What this indicates is that if we do spend the money, we ought to spend it by creating the kind of technology which will help us not only solve the unemployment problem but also solve the energy crisis.

Now let me return to the conservation area. There is also much to be gained here by creating jobs in the conservation area and ending some of our problems about resources and energy, relating to waste. I cite the national deposit law for a specific reason. It is one area we know we will create substantial numbers of jobs. The more moderate of the reports, the FEA reports, reports that we will create around 100,000 net jobs, after subtracting job displacements by going to national deposit legislation. This would create many jobs especially in the area of critical need, and that is in the cities where we need employment which will attract the hard core unemployed.

These opportunities would be a mix of skilled and unskilled jobs. We are talking about significant increases in job opportunities all over the country, but especially in our large urban areas, our inner cities, where unemployment, especially among our youth and minorities, has reached epidemic proportions.

Rather than have the Federal Government provide CETA-type jobs to our unemployed, we can replace those proposed public service jobs with permanent private-sector employment through a national deposit system. Calculating the average cost of a CETA-type job, and substituting these new permanent jobs, we can save the American taxpayer over $900 million. This would roughly be the cost of 118,000 CETA positions. Not only can we save the taxpayer this money, but with the resulting increase in labor income of almost a billion dollars annually, increased tax revenues would flow to the Federal, State, and local governments. We can attain all these positive economic benefits, as well as the favorable environmental impacts of reduced litter and solid waste, conservation of scarce energy and material resources, decreased atmospheric and water pollution, and the stimulation of a new recycling industry.

This concept has been supported by a wide range of consumer and environmental groups, as well as organizations such as the National Urban League and the National League of Cities. We can provide meaningful employment for our jobless. We can provide jobs with a future, not dead-end employment. And, it can be done without enacting a multibillion-dollar public service jobs bill. We can attain our goals of increased employment simply by pursuing a policy which applies some commonsense to our methods of resource use.

I hope my colleagues on both sides of the aisle can see that we must pursue this range of alternative options in addition to conventional policies, and I strongly urge them to support me in this effort.

Mr. HAWKINS. Mr. Chairman, I move to strike the last word.

Mr. Chairman, this amendment is a borderline one from the point of view of acceptance, but there are some concerns that should be expressed.

I know the gentleman from Vermont presenting the amendment is doing so, certainly, in good faith and I think has faith in the merit of the amendment; however, this amendment amends the national priorities section of the bill, which really is concerned with overall economic policy. It seems to me that this section should not be burdened down with such detailed revisions, although they may in themselves be commendatory.

I just think, as has been said a few minutes ago in the motion to recommit this bill, that we are loading the bill up. I just hope those who are participating in loading it up will not take the position that having loaded the bill, we should then object to it on the basis that the bill has become unworkable.

I just think we should use that as somewhat of a test in the presentation of these amendments. I just thought we should express our concerns about the method being used here.

Mr. BAUMAN. Mr. Chairman, does the gentleman from California oppose the amendment?

Mr. HAWKINS. In effect, I am opposing the amendment, yes. I am not opposing it on the basis that it lacks merit. I am opposing it on the basis it does not fit into the proper place in the bill. The section of the bill deals with national priorities. I do not think we should get into the question, if I may use this in a loose sense, of beer cans in a national priorities section of the bill; that it really does not strengthen that section.

Mr. BAUMAN. Mr. Chairman, if the gentleman will yield further, I tend to concur with the gentleman, because if I am not mistaken, I have received considerable correspondence from employees who work in can manufacturing, and particularly members of the steel workers, very much opposed to this kind of legislation because they say it takes their jobs away.

Mr. HAWKINS. I have received thousands of letters on various subjects of this legislation, as I am sure the gentleman from Maryland has. If I took every one of these issues in the letters directed to me and tried to put them in the bill, and everyone did that, I am quite sure that the objections raised by the gentleman from California (Mr. WIGGINS) would gain validity.

I am just simply trying to discourage that, although as I say, with a minor objection, a very mild one. The motivation is good, but it does not really belong in this section of the bill.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Vermont (Mr. JEFFORDS)

The amendment was rejected.

The CHAIRMAN pro tempore. Are there additional amendments to title I? If not, the Clerk will read title II.

The Clerk read as follows:

TITLE II—STRUCTURAL POLICIES AND PROGRAMS, INCLUDING TREATMENT OF RESOURCE RESTRAINTS

STATEMENTS OF PURPOSE

SEC. 201. The Congress recognizes that general economic policies alone have been unable to achieve the goals set forth in this Act related to full employment, production, and real income, balanced growth, adequate growth in productivity, proper attention to national priorities, and achievement of

reasonable price stability as provided for in section 5(b) of the Employment Act of 1946. It is, therefore, the purpose of this title to require the President to initiate, as he or she deems appropriate, with recommendations to the Congress where necessary, supplementary programs and policies to the extent that he or she finds such action necessary to help achieve these goals, including the goals and timetable for the reduction of unemployment. Insofar as feasible without undue delay, any policies and programs so recommended shall be included in the Economic Report.

COUNTERCYCLICAL EMPLOYMENT POLICIES

SEC. 202. (a) Any countercyclical efforts undertaken to aid in achieving the purposes of section 201 shall consider for inclusion the following programmatic entities:

(1) accelerated public works, including the development of standby public works projects;

(2) countercyclical public service employment;

(3) State and local countercyclical grant programs as specified in section 203;

(4) the levels and duration of unemployment insurance;

(5) skill training in both the private and public sectors, both as a general remedy and as a supplement to unemployment insurance;

(6) youth employment programs as specified in section 205;

(7) community development programs to provide employment in activities of value to the State, local communities (including rural areas), and the Nation; and

(8) augmentation of other employment and manpower programs which would help to reduce high levels of unemployment arising from cyclical causes.

(b) In any countercyclical efforts undertaken, the President shall consider a triggering mechanism which will implement the program during a period of rising unemployment and phase out the program when unemployment is appropriately reduced, and incorporate effective means to facilitate individuals assisted under programs developed pursuant to this section to return promptly to regular private and public employment as the economy recovers.

COORDINATION WITH STATE AND LOCAL GOVERNMENT AND PRIVATE SECTOR ECONOMIC ACTIVITY

SEC. 203. (a) As an integral part of any countercyclical employment policies undertaken in accord with section 202, the President shall, to the extent the President deems necessary, set forth programs and policies, including recommended legislation where needed, to coordinate economic action among the Federal Government, regions, States and localities, and the private sector to promote achievement of the purposes of this Act and the Employment Act of 1946 and an economic environment in which State and local governments and private sector economic activity and employment will prosper and essential services will be maintained.

(b) In any efforts under this section, the President shall endeavor to meet the criteria that establish programs which are funded to take account of the fiscal needs and budget conditions of the respective States and localities and their own efforts, with special attention to the rates of unemployment in such States and localities.

REGIONAL AND STRUCTURAL EMPLOYMENT POLICIES

SEC. 204. (a) To the extent deemed appropriate by the President in fulfillment of the purposes of section 201, the President shall initiate, and recommend legislation to the Congress if necessary, regional and structural policies and programs.

(b) In formulating the regional components of any such programs, the President, to the extent the President deems it desirable, shall encourage new private sector production and employment to locate within depressed localities and regions with substantial unemployment. Any regional employment proposal of the President shall also include an analysis of the extent to which Federal tax, expenditure, and employment policies have influenced the movement of people, jobs, and industry from chronic high unemployment regions and areas, and proposals designed to correct Federal policies that have an adverse economic impact upon such regions and areas.

YOUTH EMPLOYMENT POLICIES

SEC. 205. (a) The Congress finds and declares—

(1) that serious unemployment and economic disadvantage of a unique nature exist among youths even under generally favorable economic conditions;

(2) that this group constitutes a substantial portion of the Nation's unemployment, and that this significantly contributes to crime, drug addiction, and other social and economic problems; and

(3) that many youths have special employment needs and problems which, if not promptly addressed, will substantially contribute to more severe unemployment problems in the long run.

(b) To the extent deemed necessary in fulfillment of the purposes of this Act, the President shall improve and expand existing youth employment programs, recommending legislation where required. In formulating any such program, the President shall—

(1) include provisions designed to fully coordinate youth employment activities with other employment and manpower programs;

(2) develop a smoother transition from school to work;

(3) prepare disadvantaged and other youths with employability handicaps for regular self-sustaining employment; and

(4) develop realistic methods for combining training with work.

JOB TRAINING, COUNSELING, AND RESERVOIRS OF EMPLOYMENT PROJECTS

SEC. 206. (a) Further to promote achievement of full employment under this Act and the Employment Act of 1946, the President, through the Secretary of Labor, shall develop policies, procedures, and programs to provide employment opportunities to individuals aged 16 and over in the civilian labor force able, willing, and seeking to work but who, despite serious efforts to obtain employment, remain unemployed.

(b) In meeting the responsibilities to provide job opportunities under subsection (a) and after full utilization of the Comprehensive Employment and Training Act of 1973 and other relevant provisions of law, the Secretary of Labor shall, as appropriate—

(1) assure that counseling, training, and other support activities necessary to prepare persons able, willing, and seeking to work for employment under relevant provisions of law including the Comprehensive Employment and Training Act of 1973 (including use of section 110 of such Act when necessary); and

(2) refer persons able, willing, and seeking to work to job opportunities in the private and public sectors through the existing public employment placement facilities and through the United States Employment Service of the Department of Labor, including job opportunities in any positions created pursuant to sections 202, 204, and 205 of this Act.

(c) Only to the extent that individuals aged 16 and over and able, willing, and seeking to work are not and in the judgment of the President cannot be provided with private job opportunities nor provided with job opportunities under other programs and actions in existence, in accord with the goals and time table set forth in the Employment Act of 1946, the President shall establish reservoirs of public employment and private nonprofit employment projects, to be approved by the Secretary of Labor, through expansion of the Comprehensive Employment and Training Act of 1973 and other existing employment and training projects or through such new programs as are determined by the President to be needed (and for which Congress has authorized and appropriated funds), or through both such projects and such programs. Such new programs as require authorizations under this Act shall not be put into operation less than 2 years after the date of the enactment of this Act, nor without a finding by the President, transmitted to the Congress, that other means of employment are not yielding enough jobs to be consistent with attainment of the goals and timetable for the reduction of unemployment set forth in the Employment Act of 1946. The Congress hardly establishes the policy that such new programs for reservoir projects shall be so designed as not to draw any workers from private employment to the reservoir projects thereunder. The jobs under such new program reservoir projects shall be useful and productive jobs. Nonetheless, such jobs shall be mainly in the lower ranges of skills and pay, and toward this end the number of reservoir jobs under such new programs shall, to the extent practicable, be maximized in relationship to the appropriations provided for such jobs. The projects under this subsection relating to such new programs shall be phased in by the President as necessary, in conjunction with the employment goals under sections 3(a)(2) and 4(b) of the Employment Act of 1946.

(d) The Secretary, in carrying out the provisions of this section, shall establish such regulations as he or she deems necessary. Such regulations shall include provisions for—

(1) an initial determination of the job seeker's ability to be employed at certain types and duration of work, so that such individual may be appropriately referred to jobs, training, counseling, and other supportive services;

(2) compliance with the nondiscrimination provisions of this Act in accordance with section 401;

(3) appropriate eligibility criteria to determine the order of priority of access of any person to any new program under subsection (c) requiring authorization by the Congress, including but not limited to (A) such criteria as household income, duration of unemployment (not less than 5 weeks), and the number of people economically dependent upon such person; and (B) denial of access to any person refusing to accept or hold a job other than a job under subsection (c) except for good cause as determined by the Secretary of Labor, including refusal to accept or hold a job subject to reference under subsection (b)(2), in order to seek a reservoir project job under subsection (c); and

(4) such administrative appeal procedures as may be appropriate to review the initial determination of the abilities of persons able, willing, and seeking to work under paragraph (1) of this subsection and the employment need and eligibility under paragraph (3) of this subsection.

FORMATION OF PUBLIC AND PRIVATE CAPITAL

SEC. 207. (a) The Congress finds that—

(1) promotion of full employment and balanced growth is in itself a principal avenue to high and sustained rates of capital formation;

(2) high rates of capital formation are necessary to ensure adequate rates of capacity expansion and productivity growth;

(3) an important goal of national policy shall be to remove obstacles to the free flow of resources into new investment; and

(4) while private business firms are, and should continue to be, the major source of

investment, the investment activities of the Federal Government, and State and local governments, play an important role in affecting the level of output, employment, and productivity and in achieving other national purposes.

(b) The Economic Report of the President under the Employment Act of 1946 shall, as appropriate, review and assess existing Federal programs and policies which affect business investment decisions, including, but not limited to, the relevant aspects of the Internal Revenue Code of 1954, Federal regulatory policy, international trade policy, and Federal support for research, development, and diffusion of new technologies. The Economic Report also shall assess the effect of the overall economic policy environment and the rate of inflation on business investment. The President shall recommend, as appropriate, new programs or modifications to improve existing programs concerned with private capital formation.

(c) The Economic Report referred to in subsection (b) shall review and assess, to the extent appropriate, Federal policies and programs which directly, or through grants-in-aid to State and local governments, or indirectly through other means, affect the adequacy, composition, and effectiveness of public investments, as a means of achieving the goals of this Act and the Employment Act of 1964. The President shall recommend, as appropriate, new programs and policies or modifications to improve existing Federal programs affecting public investment.

Mr. HAWKINS (during the reading). Mr. Chairman, I ask unanimous consent that title II be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from California?

Mr. BAUMAN. Mr. Chairman, reserving the right to object, may I ask the gentleman whether it is the gentleman's intention to move to cut off debate during the consideration of title II?

Mr. HAWKINS. I have no present intent. May I say, however, in responding, to indicate it would be our hope that we can complete this bill at a reasonable time today. I think we are moving along very well. If we continue in this manner, I think we can soon get through with title II. Beyond that, I think the rest of the bill will not consume more than a couple hours.

It would not be my intent to even think about limiting debate until we get to, let us say, about 3:30, at which time I would certainly consult with the minority and see just what we think we can do in completing consideration of the bill today. At the present time I have no commitments or I have no intention of limiting the debate on title II.

Mr. BAUMAN. Mr. Chairman, if the gentleman from California (Mr. HAWKINS) could give me his assurance that the majority would not move to limit debate on title II, I would not object; otherwise I will.

Mr. HAWKINS. Mr. Chairman, if the gentleman will yield further, the only problem is that it is very difficult to anticipate what may or may not occur. There are seven amendments of which we have knowledge to be offered. Based on that information and assuming that there will be no additional problems with respect to rollcall votes, the present intent is to accept at least five of those seven amendments. So we are only talking about two amendments, and I would anticipate there would be no necessity of limiting debate on title II.

Mr. BAUMAN. Mr. Chairman, further reserving the right to object, the gentleman has been saying that there will be no attempt by the majority to cut off debate on title II; is that a correct understanding?

Mr. HAWKINS. Mr. Chairman, I cannot promise the gentleman that, but I do say that I see no necessity for limiting debate.

Mr. BAUMAN. Then, Mr. Chairman, without the gentleman's assurance, I object.

The CHAIRMAN pro tempore. Objection is heard.

The Clerk will read.

(The Clerk continued the reading of title II.)

Mr. SARASIN (during the reading). Mr. Chairman, I ask unanimous consent that title II be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

AMENDMENT OFFERED BY MR. SIMON

Mr. SIMON. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. SIMON: On page 86, immediately after line 25 insert the following new section:

LABOR-MANAGEMENT COOPERATION

SEC. 208. (a) The Congress finds and declares that economic policies and programs to combat structural unemployment and create conditions consistent with the goals of this Act can be complemented by cooperative efforts of labor and management.

SEC. 208. (b) To promote voluntary labor-management cooperation, the President may extend assistance to labor-management committees, organized jointly by management and the legally certified organizations representing labor at the plant, industry, community, regional, or national level. The purpose of such committees is to improve labor-management relations, job security, and organizational effectiveness. The committees may obtain public or private third party expert assistance as necessary to achieve these goals. Projects designed by such committees may involve workplace problem-solving and subjects of mutual interest outside the collective bargaining process, such as factors which inhibit the economic development of the area or industry, provided that no program shall be supported which conflicts with rights guaranteed by the National Labor Relations Act, and that either labor or management may terminate a project or dissolve a committee at any point.

In the table of contents of the bill insert immediately after the item pertaining to section 207 the following new item:

SEC. 208. LABOR-MANAGEMENT COOPERATION.

Mr. SIMON (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. SIMON. Mr. Chairman, this is the amendment which Mr. LUNDINE of New York and I are cosponsoring on labor-management cooperation. I know of no opposition to it. I think it is a positive element that can be inserted here.

Mr. LUNDINE. Mr. Chairman, will the gentleman yield?

Mr. SIMON. I yield to my colleague from New York.

Mr. LUNDINE. I thank the gentleman for yielding, and I appreciate his cosponsoring this amendment.

Mr. Chairman, this amendment, cosponsored by my distinguished colleague from Illinois (Mr. SIMON) establishes the principle of voluntary labor-management cooperation as an integral part of our national economic policy. By offering a noninflationary way to expand private sector job opportunities, this approach represents an important addition to the Humphrey-Hawkins Full Employment Act, H.R. 50, and is wholly consistent with its purposes.

Our amendment essentially provides the President a valuable new option for dealing with structural unemployment. It suggests extending Federal assistance to a variety of voluntary labor-management efforts aimed at improving labor-management relations, job security, and organizational effectiveness. Cooperative activities may focus on work place problem-solving and other issues of mutual concern, such as barriers to economic development in particular industries or areas. Like other sections of the Humphrey-Hawkins bill, it does not require the creation of specific programs or provide an authorization for Federal funds.

As principal sponsor of the Human Resources Development Act (H.R. 8065), which does provide funding for labor-management projects, I do not consider this amendment a substitute for appropriate authorizing legislation. Currently, only limited assistance is available for these activities under existing programs.

Last July, after extensive hearings and debate, the House Banking Committee approved HRDA by a vote of 37 to 1, an impressive show of support from across the political spectrum. Our progress with this legislation owes much to the efforts of my distinguished colleagues from Wisconsin (Mr. REUSS) and Pennsylvania (Mr. MOORHEAD), who have long recognized the economic value of labor-management cooperation and argued forcefully for greater Federal encouragement.

In preparing this amendment, which incorporates the main principles of the bill, we have worked closely with the distinguished gentleman from New Jersey (Mr. THOMPSON), whose Labor-Management Relations Subcommittee also has jurisdiction over HRDA in the House. I wish to especially thank the chairman for his help and cooperation with this amendment, even though his committee has not completed its own hearings on the legislation. I also look forward to continuing discussions with the gentleman, as we work toward enactment of a program authorization.

All around the country, labor-management committees have proven an effective way to stimulate employment and cope with economic distress. Active community-wide committees exist in large manufacturing cities like Buffalo, N.Y., South Bend, Ind., and Pittsburgh, Pa.; in smaller towns like Cumberland, Md.; in mining areas like the Upper

Peninsula of Michigan. Promising new efforts are underway in Elmira, N.Y., and the Inland Empire region of California, encompassing San Bernardino and Riverside.

At the State level, labor-management committees are exploring ways to improve the quality of working life in Massachusetts and taking steps to prevent cyclical layoffs in New Jersey. Faced with similar problems, the food and airlines industries have formed national labor-management committees; the construction industry has strong cooperative initiatives in Chicago. And, despite widespread slack in the auto industry at the time, a labor-management project organized by Harman International Industries in Bolivar, Tenn., sparked substantial increases in productivity and employment at an auto parts plant there.

As mayor of Jamestown, N.Y., I saw first-hand how much this approach can accomplish. After years of high unemployment and steady loss of industry from the area, Jamestown dramatically revived its economy with the help of a community-wide committee. Unemployment fell from 10.2 percent to 4.2 percent within 3 years, as existing firms expanded and new industries—for the first time in decades—began moving in.

These success stories underline the need for a national policy to encourage labor-management cooperation. The distinguished Senator from New York (Mr. JAVITS), who has sponsored a companion version of HRDA, is interested in adding similar policy language to the Humphrey-Hawkins bill in the Senate. I have felt very privileged to work with the Senator on these matters, and the legislation has benefited greatly from his innovative ideas and expert advice.

Mr. Chairman, I am convinced our basic approach—involving labor and management in cooperative efforts to improve employment opportunities—has promise and deserves a more prominent place in our economic recovery plans. In recent years we have learned—the hard way—that macroeconomic policies alone cannot eliminate structural unemployment without possibly jeopardizing price stability and other important goals.

To reach full employment, we cannot simply settle for the same tired old solutions. We urgently require imaginative methods, that emphasize more effective uses of our human resources.

The workplaces of this country—our offices and assembly lines, our warehouses and construction sites—can supply a lot of good ideas about how to do the job better. Labor-management committees, by eliciting these sorts of suggestions, can improve productivity—and permit employment to expand.

My distinguished colleague from California (Mr. HAWKINS) has been an outstanding spokesman for full employment. His excellent leadership in advancing this foremost national goal can, I submit, be enhanced by passage of this amendment. I urge its adoption.

Mr. SIMON. As my colleague said, this is acceptable on this side.

Mr. SARASIN. Mr. Chairman, will the gentleman yield?

Mr. SIMON. I would be pleased to yield to the gentleman from Connecticut.

Mr. SARASIN. I would be very happy to accept the amendment on this side, and to congratulate Mr. SIMON, and especially Mr. LUNDINE, for his work in this area. Mr. LUNDINE, being a former mayor of Jamestown, has really pioneered this work.

Mr. GARY A. MYERS. Mr. Chairman, will the gentleman yield?

Mr. SIMON. I yield to the gentleman from Pennsylvania.

Mr. GARY A. MYERS. Mr. Chairman, I would like to ask the gentleman what the implication is here. With respect to organization, described as labor-management organization, what would be their relationship at the local level to elected officials, who have responsibility for economic development?

Can this be viewed from the local level as a move in which the Federal Government is setting up an agency which circumvents the responsibility of the local elected officials?

Mr. LUNDINE. No, the amendment provides that it must be locally initiated. When I was mayor of Jamestown, N.Y., we constituted a labor-management committee. I was the convenor, the moderator of that committee. There have been labor-management efforts around the country, including Lock Haven, Pa., Evansville, Ind., and San Bernardino, Calif., and other places, of similarly structured joint labor-management government initiatives at the local level.

They are strictly voluntary in character.

Mr. GARY A. MYERS. It seems to me that in the absence of some direction from the Congress, one could have a bureaucratic takeover of a program which would circumvent local elected officials. I think the gentleman can agree that at times we can envision where a local elected official has objectives for the community which would be at odds with the details of a plan that some independent group might have. I thought we ought to express the concern of the Congress in that regard, that we do not want to circumvent people who are locally elected officials with the final responsibility for local decisions on economic development.

Mr. LUNDINE. I fully agree. The amendment contains the words, "locally initiated," and I believe that they are intended to mean that these programs must not be imposed from the top, but must be locally sponsored and created.

Mr. GARY A. MYERS. I thank the gentleman.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Illinois (Mr. SIMON).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. PRESSLER

Mr. PRESSLER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. PRESSLER: Page 79, line 2, immediately after the period insert the following new subsection:

"(c) In any countercyclical efforts undertaken pursuant to this Act, or in any triggering mechanism authorized under subsection (b) of this section, the President shall insure to the maximum extent possible that sufficient funds are allocated to address the special unemployment, underemployment and general economic concerns of non-urban areas."

Mr. PRESSLER. Mr. Chairman, I offer this amendment to call attention to the particular problems of unemployment and underemployment in nonurban areas of the country.

The Bureau of Labor Statistics unemployment figures for my home State, South Dakota, are often deceptive. South Dakota consistently has unemployment rates under 6 percent, yet the unemployment rate does not tell the whole story.

My State's greatest export is its skilled young people. Indeed, the cost of land has prohibited many young people in my State from going into farming, which is the mainstay of South Dakota's economy. I recently heard testimony from six young farmers, all under the age of 30, whose combined debt was $1 million. Facing these odds, many young people who cannot go into farming often leave the State to find employment. This outmigration could be stemmed if young people between the ages of 17 and 21 were able to find jobs within the State. This is a kind of unemployment which is ignored in our national employment policies, and it is a problem which is not unique to South Dakota.

Countercyclical mechanisms which have been approved by Congress in the past have failed to take into account pockets of unemployment that frequently exist in predominantly rural areas. Within my State there are pockets of unemployment that often exceed 30 percent. Yet, the unemployment statistics for South Dakota do not reflect these pockets of unemployment. Unemployment in rural and other nonurban areas has been historically difficult to pinpoint. However, it is, in my opinion a fairly safe assumption that if unemployment is a critical problem in urban areas, there is bound to be increased unemployment in nonurban areas. It is my belief that Congress has failed to address some of the problems nonurban areas experience with unemployment and underemployment. If, under the provisions of this act, countercyclical mechanisms are employed to reduce severe unemployment, I think any formula used must take into account the special needs of those areas of the country which may not, according to the Bureau of Labor Statistics, have a high unemployment rate based on the civilian labor force in urban or small city areas.

A vigorous effort should be made by the Congress, and the Federal Government, to identify the unemployed and underemployed in rural and other nonurban areas of our country. It is with this thought in mind that I offer this amendment.

Mr. HAWKINS. Mr. Chairman, will the gentleman yield?

Mr. PRESSLER. I yield to the gentleman from California.

Mr. HAWKINS. Mr. Chairman, the amendment has been discussed with us.

I wish to commend the gentleman from South Dakota for offering the amendment. I think it is certainly in line with the general thrust of the bill. I commend him and I accept the amendment.

Mr. SARASIN. Mr. Chairman, will the gentleman yield?

Mr. PRESSLER. I yield to the gentleman from Connecticut.

Mr. SARASIN. Mr. Chairman, the amendment is acceptable to this side of the aisle as well.

Mr. GARY A. MYERS. Mr. Chairman, will the gentleman yield?

Mr. PRESSLER. I yield to the gentleman from Pennsylvania.

Mr. GARY A. MYERS. Mr. Chairman, the subject matter that the gentleman deals with here is an important one and one which is an easy concept to accept, but I think we have to recognize the fact that, as I understand the gentleman's amendment, it is to assist young people to purchase farms and retain the family farm concept. That is good. But we have to look at another aspect.

Mr. PRESSLER. No, that is not exactly the concept. The amendment would assure to the maximum extent possible that sufficient funds are allocated to address the specific unemployment and underemployment problems in nonurban areas. This would not be necessarily, as the gentleman stated, for the family farms, but rather in figuring the unemployment and countercyclical mechanisms that in the past have frequently failed to take into account all the pockets of unemployment and underemployment in particularly the rural areas. Sometimes pockets of unemployment in my own State and other nonurban areas have exceeded 30 percent. This is not to mention underemployment. I believe the gentleman misunderstands the amendment.

Mr. GARY A. MYERS. If the gentleman will yield further, as I understand the gentleman explained his amendment, he talked about the high price of land thus that young people cannot begin farming. If that is not the emphasis of the amendment, I misunderstood the gentleman. However, I thought he was talking about structuring programs which would in fact be subsidizing the high land costs where farming exists. It seems to me that could be a subsidization commitment we might not want to make. But if the gentleman is saying what the amendment addresses is to establish programs to hire people diverted from that type of employment, that is a different issue. I thought the gentleman's explanation would lead people to believe we would set up some programs to subsidize purchases of farms, which I think would exacerbate the high cost of land purchased in those communities.

Mr. PRESSLER. That is not the purpose of this amendment, although I would say it would be a good goal in other legislation.

Mr. GARY A. MYERS. I thank the gentleman.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from South Dakota (Mr. PRESSLER).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. BRECKINRIDGE

Mr. BRECKINRIDGE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BRECKINRIDGE: Immediately after page 86, line 25, insert this new section:

§ 206. Stimulation of Private Sector and Small Business Employment.

(a) To promote further the achievement of full employment under this Act, and in furtherance of the policies, programs, and priorities thereof, including particularly the establishment of the first priority on the creation of jobs in the private sector, the President, through the Secretaries of Agriculture, Commerce, Labor, the Administrator of the Small Business Administration, the Director of Community Services Administration, and other interested and responsible agencies and departments, shall develop and submit to the Congress, with the Economic Report required by section 3 of the Employment Act of 1946, proposals for the establishment and implementation of policies, procedures, and programs for the stimulation of private sector and small business employment through the improvement and extension of existing Federal guaranteed, insured, and direct loan and grant programs of such agencies and departments including those the subject of the Rural Development Act of 1972.

(b) Proposals developed pursuant to paragraph (a) shall include, but not be limited to, administrative, legislative, legislative oversight, and budgetary recommendations for action; the establishment of procedures and reporting of findings: (1) for projecting anticipated demands; (2) for determining jobs creation potential; and, (3) for enumerating jobs created and saved; the simplification of agency and department rules, regulations, forms, and procedures in the administration of applicable programs; and, inter alia, the developement of joint private-public training programs.

(c) Proposals for the implementation of programs pursuant to paragraph (a) shall ensure that agencies and departments responsible for providing financial and technical assistance will consider:

(1) the extent to which a loan or grant, or both, will directly or indirectly contribute to the creation of new jobs; and,

(2) the extent to which a loan or grant, or both, will directly or indirectly create or preserve jobs in communities, new entries and existing enterprises, especially family farms, small businesses, ethnic and minority-owned and operated firms, cooperatives, and other enterprises.

Mr. BRECKINRIDGE. Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

Mr. BRECKINRIDGE. Mr. Chairman, this amendment, which places emphasis and priority on the creation of jobs in the private sector with private dollars at a profit rather than a cost to the taxpayer, is the product of the congressional rural caucus with an executive committee which, as you know, is bipartisan and which has unanimously urged this amendment for the consideration of the House.

Very simply, our studies in this regard have shown first, that, if we are concerned seriously and truly about the serious unemployment rates amongst our youth, minority, and women's groups, we must place emphasis upon the jobs creation capacity of the small business community. Our research establishes, very simply, the fact that the Fortune 500—over the period of the past 6 years—has generated 0.15 percent of the new jobs which were created in this country; the second Fortune 500 generated 2.7 percent; the other 99 percent of the 14 million plus new jobs generated between 1969 and 1976 have been created by the smaller business community.

The moneys that we are talking about here are, second, private market moneys—not the product of general revenues, deficit financing, at a cost to the taxpayers not only in revenue dollars but in a highly contributing inflationary segment of the economy. These private revenue receipts are loaned out through the Small Business Administration and the Farmers Home Administration at a profit to you and me as taxpayers.

Mr. Chairman, I believe that this matter has been presented to the author of the bill and the leadership and I am informed it is acceptable to that side of the aisle.

Mr. HAWKINS. Mr. Chairman, will the gentleman yield?

Mr. BRECKINRIDGE. I am happy to yield to my friend, the gentleman from California (Mr. HAWKINS).

Mr. HAWKINS. Mr. Chairman, the gentleman in the well is absolutely correct. We think it is an excellent amendment. We wish to congratulate the gentleman and also the rural caucus of the House for their preparation for this amendment. We are delighted to accept it.

Mr. BRECKINRIDGE. Mr. Chairman, I thank the gentleman from California very much.

Mr. SARASIN. Mr. Chairman, will the gentleman yield?

Mr. BRECKINRIDGE. I gladly yield to the gentleman from Connecticut (Mr. SARASIN).

Mr. SARASIN. Mr. Chairman, we too would like to compliment the gentleman from Kentucky (Mr. BRECKINRIDGE) on his amendment. I think it emphasizes a principle in the right place and in the right direction and certainly we accept the amendment on this side as well.

Mr. WATKINS. Mr. Chairman, will the gentleman yield?

Mr. BRECKINRIDGE. I am happy to yield to the gentleman from Oklahoma (Mr. WATKINS), a member of the congressional rural caucus and the chairman of its Subcommittee on Small Towns, Cities, and Rural Areas.

Mr. WATKINS. Mr. Chairman, the gentleman from Kentucky (Mr. BRECKINRIDGE) knows that I have an amendment to offer to his amendment that is at the desk which I believe is acceptable to him. I discussed this with the gentleman from California last Thursday and I believe it is also acceptable to him.

Mr. Chairman, if this would be the proper point, I would like to offer that amendment to the Breckinridge amendment at this time.

The CHAIRMAN. The Chair will state that the gentleman will have an opportunity to offer his amendment when the

gentleman from Kentucky (Mr. BRECKINRIDGE) concludes his presentation.

Mr. MITCHELL of Maryland. Mr. Chairman, will the gentleman yield?

Mr. BRECKINRIDGE. I am happy to yield to the gentleman from Maryland.

Mr. MITCHELL of Maryland. Mr. Chairman, I too want to compliment the gentleman in the well, the gentleman from Kentucky (Mr. BRECKINRIDGE). The gentleman has been a leader and a driving force in support of small business. I think the amendment the gentleman has offered is an excellent amendment and also that the amendment to be offered by the gentleman from Oklahoma (Mr. WATKINS) will perhaps make it even better. I am very grateful to the gentleman from Kentucky (Mr. BRECKINRIDGE) for introducing this amendment. We both have worked very hard and long in the interest of small business.

Mr. BRECKINRIDGE. Mr. Chairman, I wish to say to the gentleman from Maryland, my friend (Mr. MITCHELL), that the gentleman and I have worked together on this and on other related matters for many years and I appreciate the gentleman's remarks and support.

AMENDMENT OFFERED BY MR. WATKINS TO THE AMENDMENT OFFERED BY MR. BRECKINRIDGE

Mr. WATKINS. Mr. Chairman, I offer an amendment to the amendment.

The Clerk read as follows:

Amendment offered by Mr. WATKINS to the amendment offered by Mr. BRECKINRIDGE: In subsection (a) of section 208, as proposed to be added by the amendment offered by Mr. BRECKINRIDGE, insert "and for the development of rural areas" after "for the stimulation of private sector and small business employment".

Mr. WATKINS. Mr. Chairman, I would like to thank the gentleman from Kentucky (Mr. BRECKINRIDGE) and also the author of the bill, the gentleman from California (Mr. HAWKINS) for allowing us to add this amendment to the amendment.

I would like to address the House and this committee on the grounds that rural America, maybe not intentionally, has been redlined or prevented from having adequate investment financing from the private sector as well as Federal funds. For example, SBA, HUD, and many other groups do not go into the rural areas to provide the adequate financing needed. A prime example is the private capital that the gentleman from Kentucky (Mr. BRECKINRIDGE) was alluding to a few minutes ago. Many of our small banks in rural America are one-loan-officer banks, and as a result they cannot close their banks to go to the larger cities to try to participate in SBA or try to get private sector investment money to help develop their small rural communities. Maybe not intentionally, but we have redlined these citizens in rural America from this needed asset of investment capital and this should be corrected. As a result, I would like to place, with this amendment to the Breckinridge amendment, an emphasis on trying to meet the needs of these communities in rural areas and not to discriminate against them with private moneys and through the Federal funded program.

The CHAIRMAN pro tempore. Does anyone desire to speak on either the amendment to the amendment or the amendment? If not, the question is on the amendment offered by the gentleman from Oklahoma (Mr. WATKINS) to the amendment offered by the gentleman from Kentucky (Mr. BRECKINRIDGE).

The amendment to the amendment was agreed to.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Kentucky (Mr. BRECKINRIDGE), as amended.

The amendment, as amended, was agreed to.

AMENDMENT OFFERED BY MR. BROOKS

Mr. BROOKS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BROOKS: Page 77, line 21, strike out "(a)".

Page 78, line 3, strike out "countercyclical".

Page 78, strike out lines 4 and 5 and insert in lieu thereof the following:

"(3) State and local grant programs;"

Page 78, strike out lines 19 through 24, and on page 79, strike out lines 1 and 2.

Page 79, strike out line 15 and insert in lieu thereof a period.

Mr. BROOKS. Mr. Chairman, the purpose of this amendment is to remove from the bill, H.R. 50, an implication that Congress is at this time endorsing specific programs and even legislating specific mechanisms to implement those programs.

The purpose of this bill is to require Congress and the President to, on a regular basis, review the economic and employment situation and to act on recommendations on a given timetable. The intention of section 202 is to direct the attention of the President and the Congress to a number of programs that can be used to counter the effects of a recession and rising unemployment. It is my understanding that it is not the intention of H.R. 50 generally, or title II specifically, to endorse particular legislative programs.

I have no problem with referring to "countercyclical efforts" or "countercyclical policies." But, by using the word "countercyclical" in conjunction with specific programs, namely, State and local grant programs and public service employment, we seem to be endorsing particular types of programs and grants that have come to be known as countercyclical revenue sharing. The use of the word "countercyclical" in those two places is redundant in that it already appears in the introductory language of the section. My amendment will not change the substance of section 202, but will avoid confusion.

The second part of my amendment would delete section 202 (B). Section 202(B) directs the President to consider a specific triggering mechanism for all the suggested programs, not just countercyclical revenue sharing. While it may be attractive to have the triggering mechanism tied to rising unemployment, serious questions have been raised as to the accuracy of this information and its appropriateness as an economic indicator, and we may be hindering our efforts by giving undue attention to this particular factor. Changes in employment tend to lag in the economic cycle and the President should be free to give equal consideration to any number of possible triggering mechanisms.

My amendment will not change the meaning or intent of section 202 or 203 at all. The purposes of title II are stated in section 201, and the list of general programs section 202 calls attention to remains intact. My amendment simply removes the appearance of an endorsement of a particular program and a particular triggering mechanism, which should remain exclusively within the prerogatives of the legislative committees.

I hope the managers of the bill will accept this amendment.

Mr. HAWKINS. Mr. Chairman, will the gentleman yield?

Mr. BROOKS. I yield to the gentleman from California.

Mr. HAWKINS. I thank the gentleman for yielding.

We are aware of the amendment, and we think it is a good one. We accept it.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Texas (Mr. BROOKS).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. ROBERTS

Mr. ROBERTS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ROBERTS: Page 86 after June 25 add new section 208 as follows:

PUBLIC WORKS EMPLOYMENT PROJECTS

SEC. 208. The President or his delegate shall prepare a comprehensive program of public works assisted by Federal matching grants to local governmental units of not more than 80 percent of the cost of projects, including, but not limited to, the following:

(a) construction, repair, and improvement of public highways, public buildings, and other publicly owned institutions and facilities,

(b) conservation and development of natural resources including control of, utilization, and purification of water, prevention of erosion, development and transmission of power, construction of river and harbor improvements, and flood control projects,

(c) construction, reconstruction, alteration, and repair, under public regulation or control, of low-cost housing and slum clearance projects,

(d) construction, reconstruction, alteration, and repair of hospitals and medical facilities, and

(e) construction, reconstruction, alteration, and repair of any other project which serves the general public and for which Federal assistance in the form of grants, loans, or guaranties is available under any provision of law other than this section.

Mr. ROBERTS (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. ROBERTS. Mr. Chairman, I wish to offer an amendment to title II of the bill to put a provision for a public works employment program back into the bill.

The Humphrey-Hawkins bill H.R. 50, recommends "an expansion of CETA and

other existing employment and training projects," which would make the Federal Government "the employer of last resort." The experience of the last 3 years shows that public service employment is of very limited value in combating a long-term recession and the structural unemployment that is plaguing the country today.

The concept that Federal Government must be an employer of last resort apparently has been accepted by many. A year ago, 310,000 jobs were authorized by Congress. The number is now up to 750,000. The concept is included in the President's welfare reform proposal and it also is a basic principle in the Humphrey-Hawkins bill.

The evidence shows, however, that these programs do not reduce unemployment in the long run. CETA workers are not taught skills. They are not given the substantial education needed to equip them for unsubsidized jobs. If local governments want skilled people, they are very likely to try to find some way of tapping the available pool of unemployed skilled workers by using CETA funds. These jobs are not being filled by the hard-core unemployed. CETA funds are used to hire workers that would have been hired by local government anyway.

This substitution of Federal dollars for local taxes means that public service employment is not really creating new jobs for the unemployed. The Urban Institute and Brookings Institution both say that this substitution of jobs will reach 80 percent or more within years. This means that to create one new job, we actually have to buy five jobs—so the cost of creating one new $8,000 job actually costs $40,000 Federal money.

Once administrative costs of running the program are added in, the cost of the individual job goes up to $12,500 and allowing for an 80-percent substitution rate, the eventual cost of each of these jobs is $60,000.

In addition, it puts the Federal Government in competition for the same labor force that should be available to the private sector. This can lead to further inflation without any appreciable reduction in unemployment.

Training is essential in order to enhance job skills and lessen further dependence on tax-supported assistance in general, and public service jobs in particular. Logic demands that these jobs be oriented toward enhancing the employability of the participant. A worker should be advancing toward status as a tax generator rather than a tax consumer. This can be most effectively accomplished through on-the-job training within the private sector. The results would be manyfold: enhanced job skills, improved motivation, lessened dependence, less demand upon the public purse.

Public service employment has not in the past and will not in the future create jobs for the unemployed. Only the private sector can provide the employment which is necessary, not the Federal Government.

Public works programs are a proven tool for creating jobs and reducing unemployment. Such a public works program did the job in the 1930's and can do it again. By public works I am referring to community facilities such as courthouses, city halls, community centers, hospitals, and facilities of lasting value that local communities cannot finance themselves.

The program would be effective because it would work through the private sector. Public works projects by private contractors do not result in a permanent bloated bureaucracy. They do not pad Government payrolls, nor create permanent Federal jobs.

My amendment would require any participating contractor to agree that no less than 20 percent of the employees who work on such a project would be unskilled individuals.

This would provide the training and experience essential to future employment. Such individuals then would be able to seek permanent employment in the private sector, no longer dependent on the Government for public assistance.

Although the number of jobs created per dollar of outlay may not appear to be as great as other strategies, the "multiplier" effect in the construction supply industry is much greater than generally realized. The impact extends to the suppliers of construction equipment and materials. The U.S. Department of Labor has found that for every 2 man-hours of work at a construction site, 5 hours of employment in industry were necessary to produce, fabricate, and distribute the materials going into the project.

Each year we spend billions in unemployment compensation, as well as the other benefits that are needed to maintain the unemployed population. I do not believe the American people want more handouts or other short-term measures such as public service employment. The people of this country want jobs and a chance to make a contribution to their community.

Make-work jobs take care of today's needs, but do nothing about tomorrow's. The greatest charity of all is to help a person help himself. I believe my amendment would generate projects that would not only be a lasting investment in America, but we would also be investing in her most valuable resource—the hopes and dignity of the citizens of this great Nation.

I urge your support and your vote on this amendment.

Mr. HAWKINS. Mr. Chairman, will the gentleman yield?

Mr. ROBERTS. I yield to the gentleman from California.

Mr. HAWKINS. Mr. Chairman, we on this side would like to express our appreciation to the gentleman in the well for his cooperation and for the accommodation of this amendment.

We would also like to commend the gentleman for the gentleman's expertise in the field in which the gentleman has served as a member of the Committee on Public Works.

I think the amendment the gentleman has offered strengthens the bill in many ways over its previous position and we do accept the amendment and commend the gentleman.

Mr. SARASIN. Mr. Chairman, will the gentleman yield?

Mr. ROBERTS. I yield to the gentleman from Connecticut.

Mr. SARASIN. Mr. Chairman, I, too, commend the gentleman in the well. I think it has added strength to this section of the bill, and we accept the amendment.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Texas (Mr. ROBERTS).

The amendment was agreed to.

AMENDMENT OFFERED BY MRS. SCHROEDER

Mrs. SCHROEDER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mrs. SCHROEDER: Page 82, line 13, strike out "and", on line 20 strike out the period and insert in lieu thereof "; and", and insert immediately after such line the following new paragraph:

(3) insure flexi-time and part-time jobs for persons who are able, willing, and seeking employment but who are unable to work a standard workweek.

Mrs. SCHROEDER. Mr. Chairman, this is basically a very simple little amendment. I think the reason I feel it is necessary is that in the past we have found that the people who who have managed some of the public works projects have not been too creative in doing anything about less than a 40-hour week or in dealing with flexitime concepts.

If you will note, the amendment is very carefully worded, it is not for people who just would like to have their hours changed, but for the people who need their hours changed. For people who for some reason, whether they are handicapped or have heart attacks, working mothers or what-have-you cannot work normal hours. If we are going to deal with unemployment, we are going to have to recognize the group we are dealing with. Many of them are mothers of small children. Many have physical problems. That is the reason they have not been employed in the past. Hopefully, the managers of programs creating the public sector jobs can be a little more flexible in the future dealing with their problems.

Mr. HAWKINS. Mr. Chairman, will the gentlewoman yield?

Mrs. SCHROEDER. I yield to the gentleman from California.

Mr. HAWKINS. Mr. Chairman, I would like to commend the gentlewoman for her work on this amendment and for the cooperation the gentlewoman has extended to the committee.

Mr. Chairman, we are willing to accept the amendment.

Mrs. SCHROEDER. Mr. Chairman, I thank the gentleman for his support, and I thank him for the help he has been to me on the committee.

Mr. SARASIN. Mr. Chairman, will the gentlewoman yield?

Mrs. SCHROEDER. I would be delighted to yield to the gentleman from Connecticut.

Mr. SARASIN. Mr. Chairman, I, too, would be glad to accept the amendment.

There is one thing I would like to be clear about first. Many of us were here yesterday when the gentlewoman from Colorado (Mrs. SCHROEDER) offered her very pointed remarks concerning the decorum of the House, and I want to be sure that the nanny the Congress will hire will be able to work on a flexitime schedule.

Mrs. SCHROEDER. Mr. Chairman, I think it is important to have flexitime there, because if the nanny could not be put on flexitime, we would be in real trouble. We in Congress probably work on flexitime better than any group I know of.

Mr. SARASIN. The question has been asked behind me, if the Committee will bear with me, if we could have a flexible nanny. I am not sure I know what that means.

Mrs. SCHROEDER. I would like to see the legal definition of that term before I endorse it.

Mr. SARASIN. Mr. Chairman, we accept the amendment.

Mrs. SCHROEDER. Mr. Chairman, I thank the gentleman.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentlewoman from Colorado (Mrs. SCHROEDER).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. GLICKMAN

Mr. GLICKMAN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GLICKMAN: On page 80, to add a new paragraph (c) to Section 204, which reads as follows: "(c) In formulating the regional components of programs and policies under this Section, in no instance shall actions be taken which would have direct negative impacts on the economies of other regions of the Nation."

Mr. GLICKMAN. Mr. Chairman, I am proud to be a supporter of this bill.

I am offering an amendment which I think may act as a preventive device to deal with problems which may be involved in the future and perhaps build some national unity in the bill. The amendment has to do with the section of the bill which deals with regional and structural employment policies, whereby the President is encouraged to lead new employment in areas that are suffering from unemployment the most in terms of regional and structural employment.

My amendment would make it clear that none of the actions to improve the employment situation in targeted geographical areas will be allowed if those actions would have a direct detrimental negative impact on the economies of other regions of the country.

This amendment will emphasize that what we want to do by this legislation is to improve the economies of the regions with high unemployment, but not at the expense of areas which have worked hard to maintain strong regional economies.

I think the Members of this House will agree that what we are trying to do in this bill is to try to reduce unemployment, not merely rearrange unemployment. We do not want to "rob Peter to pay Paul."

Mr. WEISS. Mr. Chairman, will the gentleman yield?

Mr. GLICKMAN. I yield to the gentleman from New York.

Mr. WEISS. Mr. Chairman, I am sure the gentleman anticipates my question, and I thank him for yielding.

Am I correct in assuming that the gentleman's amendment will not affect any program to promote jobs in a particular area but is only directed toward action which would remove existing facilities and related jobs in one area and transfer them to another?

Mr. GLICKMAN. The gentleman is correct.

Mr. WEISS. Mr. Chairman, with that understanding, let me say that I know the committee has on this side reviewed the proposed amendment, I have discussed it with the chairman of the subcommittee, and we find it acceptable.

Mr. JEFFORDS. Mr. Chairman, will the gentleman yield?

Mr. GLICKMAN. I yield to the gentleman from Vermont.

Mr. JEFFORDS. Mr. Chairman, I would also like to say that we have reviewed the amendment, we believe it is a good one, and we on this side accept it.

Mr. WATKINS. Mr. Chairman, will the gentleman yield?

Mr. GLICKMAN. I yield to the gentleman from Oklahoma.

Mr. WATKINS. Mr. Chairman, let me ask the gentleman from Kansas (Mr. GLICKMAN) this question:

Does the gentleman's amendment include or could it be broadened to include also areas outside this country?

I ask that question because much of the problem today results not from industry moving from one area of the country into another area but, because of perhaps tax reasons or other reasons, industries are going into other countries.

Mr. GLICKMAN. Mr. Chairman, let me respond to the gentleman's question and say the amendment does not deal with that issue. The gentleman raises a fundamentally important question, but the issue is not dealt with in this particular amendment.

Mr. KREBS. Mr. Chairman, will the gentleman yield?

Mr. GLICKMAN. I would be glad to yield to the gentleman from California.

Mr. KREBS. Mr. Chairman, I am frankly a little baffled as to how, from a practical standpoint, this type of a policy could be mandated on any human being, including the President.

Would the gentleman be kind enough to give me some examples as to where or how this could be implemented. I do not mean this disrespectfully, as I am sure my good friend, the gentleman from Kansas (Mr. GLICKMAN) knows, because in theory we can all agree with the language in this amendment. But from a practical standpoint, all too often if an action is taken in one area, we are bound to affect another area. I do not see how we can tie the hands of a President and saddle him with such a requirement.

Mr. GLICKMAN. Mr. Chairman, if the gentleman will allow me to reply, that is what I was trying to clarify with the gentleman from New York (Mr. WEISS). The amendment merely talks about situations such as the relocation of existing businesses whereby there is a direct removal of employment from one area and replacing it in another area. We are one country, and obviously, let us say, for an example, because we have tax credits for heavily populated urban areas that could indirectly affect the economies of other areas such as my own, that is not what I am talking about in this bill.

I am talking about actions which could be taken that could have a direct employment loss result in one area if they go into another area. For example, there may be the removal of a substantial industry in one area and putting it in another area. That is the kind of thing I am trying to deal with in this amendment.

Mr. KREBS. Mr. Chairman, if the gentleman will yield further, I do not think that there is anybody in this Chamber or out of this Chamber, regardless of political philosophy, who would not in theory agree with the gentleman. But I think, from a practical standpoint, whether it is private enterprise or whether it is the U.S. Government, the gentleman is really imposing what seems to me to be an impossible burden upon any individual or any group of individuals.

Mr. GLICKMAN. Mr. Chairman, what we have been dealing with and what I am dealing with is the broad consideration of national policy; and I just want to make sure that this Congress lets the President know that this is a policy consideration that we seriously want him to consider when he deals with the issues raised in this bill.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Kansas (Mr. GLICKMAN).

The question was taken; and on a division (demanded by Mr. GLICKMAN) there were—ayes 19, noes 13.

So the amendment was agreed to.

AMENDMENT OFFERED BY MR. ASHBROOK

Mr. ASHBROOK. Mr. Chairman, I offer an amendment.

The Clerk read as follows

Amendment offered by Mr. ASHBROOK: On page 86, after line 25 insert:

"IMPACT OF CURRENT LAW AND REGULATIONS

"SEC. 208. In providing recommendations or programs pursuant to achieving the purposes of this Act, the President shall consider the impact of all the provisions of the United States Code, as amended, and the Code of Federal Regulations on the national economy."

Mr. HAWKINS. Mr. Chairman, will the gentleman yield?

Mr. ASHBROOK. I yield to the gentleman from California.

Mr. HAWKINS. Mr. Chairman, we do not have a copy of the amendment. It seems to be a very broad one, and we are completely without a copy of it.

Mr. ASHBROOK. Mr. Chairman, I apologize.

I would say to my colleague that yesterday he indicated that this bill was going to become a Christmas tree if we accepted one more amendment. I do not know what happened to that particular stand, but it seems that today everything but the kitchen sink is going in.

I offer this amendment in all seriousness, because if we are going to look at

the right problems in our economy, we have to look as the average taxpayer looks, as the average small businessman looks, as the average farmer, the importer, the exporter. Everyone in our economy must look at the impact of the laws. I am talking about everything from EPA to OSHA. I am talking about taxes; I am talking about labor laws—everything that impacts on our economy.

We have already put forward commissions to study paperwork. We know that Government paperwork is a major problem. I do not know how we can isolate and just say, "This area, Mr. President, look into that and see how that impacts on employment or unemployment." If we are going to go halfway on the Christmas tree I think we should have an amendment that tells the President to take a look at the United States Code and the Code of Federal Regulations and see how this impacts on employment and unemployment. In that spirit I offer this amendment.

Mr. HAWKINS. Mr. Chairman, I think that this is not only a mischievous amendment, but this is an amendment which obviously was kept back for the purpose of confusing and obfuscating the issue.

Mr. Chairman, I understand we have been given a copy of the wrong amendment. May we have the correct copy of the amendment? The amendment given to us would strike all of title II.

Mr. ASHBROOK. Mr. Chairman, if my colleague will yield, I am sorry. It does not. It just adds a section.

It does not strike title II. The gentleman's analysis might be accurate from his point of view, but it does not strike title II.

Mr. HAWKINS. Mr. Chairman, the gentleman is saying that my argument is still valid.

Mr. ASHBROOK. No. I said from the gentleman's point of view it may be but certainly not from mine.

Mr. HAWKINS. As I understand it now, it would provide that the President would have to consider the impact of all of the provisions of the United States Code, as amended, and the Code of Federal Regulations on the national economy, and that is in doing what? To what is it directed? Is it in the economic report?

Mr. ASHBROOK. It is aimed at carrying out the purposes of the act, which at this point we do not know.

Mr. HAWKINS. Mr. Chairman, it is pretty obvious, then, that the amendment is of a very mischievous nature and does not belong in the bill. What the amendment seeks to do is to impose on the President an endless and certainly impossible task. I think the effect of the amendment is simply to render the bill unworkable to the extent that it is imposing a responsibility which certainly would call for much more bureaucracy than what is available now to the President. I think as such the amendment should be rejected.

Mr. BAUMAN. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I do not think there is anything inconsistent about the pending amendment and the other provisions of the bill.

The gentleman from Ohio (Mr. ASHBROOK) suggests that the President must follow the existing law. I know that is a novel concept in recent years, depending upon who is President; but I think the gentleman from Ohio shares my view that this bill is very broad in its scope.

Furthermore, Mr. Chairman, the bill has been amended repeatedly. I am not even aware of the number of amendments. I have been unable to keep track of the total in the several days of consideration.

Mr. Chairman, very simply, this amendment is a statement that in administering the various goals and policies in the bill, the President also should have to consider all of the relevant provisions of the United States Code and all Federal regulations properly promulgated under the authority of that code.

Every businessman and worker in the country has to take into consideration the very same laws and regulations when they make economic decisions; and if we are going to have economic policy made by the President and adopted by the Congress, certainly we do not want that policy to be illegal or in violation of Federal regulations but to take both into proper account.

Therefore, Mr. Chairman, I think it is a perfectly rational and indeed consistent amendment.

Mr. ASHBROOK. Mr. Chairman, will the gentleman yield?

Mr. BAUMAN. I yield to the gentleman from Ohio.

Mr. ASHBROOK. Mr. Chairman, as a matter of fact, I tell my colleague, the gentleman from Maryland (Mr. BAUMAN), that it even goes deeper than that.

For almost 1 month last year the administration had a policy where the President indicated that all the Secretaries, all the directors, all the heads of agencies were to read the regulations before they issued them. That policy lasted for just about 1 month.

Mr. Chairman, in some ways this amendment would remind the President that most of us out in the real world live by those regulations issued in vast volume which affect employment, unemployment, imports, exports, taxes, labor policies, all the various actions in the private sector of our economy.

I think it is very important, if we are going to have a bill of this type, to take into consideration some of the mandated purposes that the President can require the administration to heed. Furthermore, they should look at the laws on the books, especially those that inhibit, those that discourage, those that are disincentives, and those that involve subsidies. Also, they should reconsider those that are antiquated and they should take a look at those policies that have been put on the books before implementing a long-term program to combat unemployment.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. BAUMAN. I yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Chairman, I appreciate my colleague's yielding.

I think it is important to require these actions of the President. We are requiring this sort of thing of the average citizen around the country, so I would assume that everybody would just naturally vote for this requirement.

Mr. Chairman, we pass all kinds of laws requiring everybody else to do what is in this amendment. Therefore, why should we assume that the President should not be required to do the same thing? I cannot think of any reason that he should not comply with what is required of others.

Mr. Chairman, I appreciate the gentleman's offering the amendment and urge my colleagues to support the amendment.

Mr. SIMON. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, the gentleman from Maryland (Mr. BAUMAN) is not correct in saying that all this requires is that the President abide by the law.

The gentleman from Ohio (Mr. BROWN) is correct when he said that this would require a massive review of the entire statutory framework and all the regulations of the United States. If we want to do that at some point, that is fine, but let us not have a frivolous amendment that is tossed in here which says, in providing recommendations, all laws have to be reviewed; all regulations have to be reviewed. If we want to vote against the bill, let us vote against the bill, but let us not adopt frivolous amendments.

Mr. MITCHELL of Maryland. Mr. Chairman, will the gentleman yield briefly?

Mr. SIMON. I will be happy to yield to the gentleman from Maryland.

Mr. MITCHELL of Maryland. Mr. Chairman, I would oppose the amendment for a different reason. No matter what regulations are proposed by the administration, ultimately it is the responsibility of this Congress, through oversight hearings, to review the regulations and all aspects of public law. I, for one, do not want to take the responsibility of casting off our duty and our responsibility in oversight. That is essentially what the amendment would be doing. Therefore, I would oppose it.

I thank the gentleman for yielding to me.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Ohio (Mr. ASHBROOK).

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. ASHBROOK. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. The Chair will count. Fifty-one Members are present, not a quorum.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the Committee appears.

Members will record their presence by electronic device.

The vote was taken by electronic device.

QUORUM CALL VACATED

The CHAIRMAN pro tempore. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to clause 2, rule XXIII, further proceedings under the call shall be considered as vacated.

The committee will resume its business.

RECORDED VOTE

The CHAIRMAN pro tempore. The pending business is the demand of the gentleman from Ohio (Mr. ASHBROOK) for a recorded vote.

Does the gentleman from Ohio (Mr. ASHBROOK) insist upon his request?

Mr. ASHBROOK. Yes, I do, Mr. Chairman.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 114, noes 296, not voting 24, as follows:

[Roll No. 160]

Messrs. ROE, SCHEUER, and SAWYER changed their vote from "aye" to "no."

So the amendment was rejected.

The result of the vote was announced as above recorded.

Mr. HAWKINS. Mr. Chairman, I ask unanimous consent that all debate on title II and all amendments thereto terminate at 3 o'clock p.m.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from California?

Mr. BAUMAN. Mr. Chairman, reserving the right to object, how many amendments are now at the desk?

The CHAIRMAN pro tempore. The Chair would advise the gentleman from Maryland (Mr. BAUMAN) that at the desk we have seven amendments.

Mr. BAUMAN. I thank the Chairman, and I withdraw my reservation of objection.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

AMENDMENT OFFERED BY MR. BROWN OF OHIO

Mr. BROWN of Ohio. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BROWN of Ohio: On page 86, line 10, following the period insert the following new sentence: "The Economic Report shall assess the effect of stricter enforcement of the provisions of the Buy American Act (41 U.S.C. 10a–10c), consistent with the policies of the General Agreement on Tariffs and Trade, in contributing to the achievement of the goals and timetable set forth in title I."

PARLIAMENTARY INQUIRY

Mr. MITCHELL of Maryland. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN pro tempore. The gentleman will state his parliamentary inquiry.

Mr. MITCHELL of Maryland. Mr. Chairman, I could not hear. Are these amendments with reference to title I or title II?

Mr. BROWN of Ohio. Title II.

Mr. MITCHELL of Maryland. Mr. Chairman, were these amendments printed in the RECORD?

The CHAIRMAN pro tempore. The Chairman is not aware of that. I do not have the answer to it.

Mr. BROWN of Ohio. Mr. Chairman, if the gentleman will yield; no, the amendments were not printed in the RECORD. As I understand it, they do not have to be printed in the RECORD.

The CHAIRMAN pro tempore. The Chair will advise the gentleman from Maryland (Mr. MITCHELL) that the gentleman from Ohio (Mr. BROWN) is correct.

Mr. MITCHELL of Maryland. I thank the Chairman.

Mr. BROWN of Ohio. Mr. Chairman, I suppose that this amendment could be characterized as a buy American amendment in this legislation. But it follows the sentence on page 86 that requires:

The Economic Report of the President under the Employment Act of 1946 shall . . . review and assess existing Federal programs and policies which affect business investment decisions, including, but not limited to, the relevant aspects of the Internal Revenue Code of 1954, Federal regulatory policy, international trade policy . . .

Mr. Chairman, it is the negotiation of our trade policy about which I express some concern. The present bill goes on to talk about "Federal support for research and development and diffusion of new technologies," and so forth. I want to insert my amendment at the end of that sentence. What I am asking is that the Economic Report assess the effect of stricter enforcement of the provisions of the Buy American Act, because I think we have not had what I would appropriately call adequately strict enforcement of that legislation.

Mr. Chairman, we are very generous with our trading partners when it comes to their imposition of limitations on trade acceptance of our products going into their countries or the subsidization of their products coming into our country.

We have legislation on the books (41 U.S.C. 10a through 10c) which calls for our consideration of the purchase by Americans of goods made in America; but we seem to be losing out in that effort. There has been a tendency for us to be a little too generous in some of our trading arrangements with some of our trading partners.

Mr. Chairman, it is important with regard to employment, that the President look at the problem of enforcement and determine whether or not it should not be somewhat stricter than it is.

This amendment clearly has an impact on jobs. Jobs are lost in this country because of the impact of foreign imports. Jobs are also created in the United States because we encourage trade with countries abroad through the provisions of GATT.

What I am asking is that the President in his economic report do what we are asking throughout this legislation, and that is to balance various trade-offs—specifically made under my amendment to balance the impact of buy American and the encouragement of foreign trade through the GATT treaties so that we can encourage the maximum amount of jobs.

The basic legislation says that we should encourage the reduction of unemployment and also encourage the reduction of inflation. At some point those two things become mutually exclusive.

Mr. Chairman, the gentleman from Missouri and I sit on the Joint Economic Committee, and we had a discussion the other day in the committee over the question: At what point does reduction of unemployment encourage inflation and at what point does the encouragement of the reduction of inflation encourage unemployment?

Clearly, that trade-off is true in the trade area. I think there is nothing inconsistent between my amendment and the rest of the legislation in putting into the legislation a consideration of these trade policies: Buy American and the GATT treaties which encourage foreign trade. Certainly, the President would want to balance these two issues so as to encourage a maximum amount of employment, and the amendment that I offer has that objective. It should be as easy to accomplish as the balancing of unemployment and inflation each of which, of course, we would like to reduce to zero.

Mr. Chairman, I hope that the people who are handling the legislation on both sides of the aisle will accept the amendment, as I offered it in good faith, and encourage the President to look at those policies.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Ohio (Mr. BROWN).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. BROWN OF OHIO

Mr. BROWN of Ohio. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BROWN of Ohio: On page 81, line 20, redesignate subsection "(a)" as "(a)(1)" and add the following new paragraph at page 82, line 2:

"(a)(2) Further to promote achievement of full employment under this Act and the Employment Act of 1946, the President shall develop policies and programs for reducing the burden of social security taxes on workers and employers, which reduction could be achieved in part by covering certain government officers, including the President, Cabinet Members, and Members of Congress within the social security system, and thereby stimulating employment by reducing the costs of hiring."

Mr. BROWN of Ohio. Mr. Chairman, this amendment might be a little bit more controversial in this body than my previous one; but I doubt that it will be controversial among our constituents. They will favor it.

As it happens, most of our constituents are covered by the social security program, a program whose benefits we have generously increased over the past several years—the benefits it pays to the elderly of this country because of the rates of inflation that the Federal Government has permitted to occur.

Since we have increased the benefits so generously, we have had the necessity of increasing social security tax rates in order to pay for those benefits.

Mr. Chairman, we have had a little trouble in keeping that in balance. As we have increased the tax rates, though, we have discouraged capital formation because we have taken always more and more money out of the pockets of the average working American.

I think it is time that this Congress demonstrate its confidence in the social security system it has crafted by encouraging the President to recommend, and the Congress to support, the coverage by the social security system of the President, Cabinet members, and Members of Congress. That is particularly important in view of the fact that, under the new ethics requirements, work as a Member of Congress is the only gainful employment, except for 15 percent of our income, that those of us who hope to be in the next Congress will be able to do.

And so, in order for us to pay our full share into the social security system it is important, I think, that we be covered by the social security system and pay its taxes. We will have very little outside earned income under the ethics requirements we have enacted in Congress, so I think we should demonstrate our support, our confidence in, and our willingness to share with the taxpaying constituents of this country the responsibilities of the social security system.

Granted, we have our own special retirement systems, but then so do other institutions which have employees who are required by law to pay into the social security system. And so, I think that those of us who are here would want to participate with our taxes with the other average Americans we represent who are covered by social security, because we do not want to set ourselves apart from them as something special just because we are Congressmen and have more generous separate retirement systems. We ought to be in that social security system that covers all Americans. That is the democratic way.

It seems to me that it is good ethics to help reduce or share in the tax burden of others. Under my amendment we would be participating to the fullest extent in social security taxes because of our very generous salaries. I would hope, Mr. Chairman, that my colleagues will support this amendment as a reaffirmation of our faith in that system.

Mr. DELLUMS. Mr. Chairman, will the gentleman yield?

Mr. BROWN of Ohio. Of course, I will be happy to yield to the gentleman from California.

Mr. DELLUMS. I think the gentleman has made a very articulate statement.

Mr. BROWN of Ohio. Coming from the gentleman from California I am most flattered, because the gentleman himself is one of the most articulate Members in this body.

Mr. DELLUMS. Thank you very much.

I have listened with great enthusiasm to the gentleman's comments. However——

Mr. BROWN of Ohio. However? However?

Mr. DELLUMS. I fail to understand the relationship between the gentleman's proposal and the full employment bill that is before us.

Mr. BROWN of Ohio. Let me explain it to the gentleman, if I may. One of the things that takes money out of the pockets of our constituents at home is social security taxes, just like income taxes. After paying social security taxes, our constituents have less money to put in their savings accounts at the savings and loan institutions so that somebody can borrow that capital to build a home. They do not have that money to save for their own retirement in their own retirement plan, or to buy insurance. If they put it in an insurance policy, it would be used by those great insurance companies of the United States to invest in housing for the underprivileged, or to invest in office buildings to do the things done with this capital formation—things that create jobs.

Our constituents do not have the money, that comes out of their pockets in social security taxes, to put into their own private businesses. We have provided in that system for their future retirement, but we have taken the money away from them now.

The CHAIRMAN pro tempore. The time of the gentleman from Ohio has expired.

On request of Mr. DELLUMS and by unanimous consent Mr. BROWN of Ohio was allowed to proceed for 1 additional minute.

Mr. DELLUMS. Will the gentleman yield further?

Mr. BROWN of Ohio. I yield.

Mr. DELLUMS. Since the gentleman has suggested the amendment, I assume the gentleman has done some research with respect to the ramifications of the amendment. Can the gentleman tell me how much revenue will be derived, and how much capital formation will actually accrue?

Mr. BROWN of Ohio. It depends on the social security tax rate that we will have in effect in the future. I am unsure about that, because I understand the Speaker has indicated we are to rethink our vote on the social security tax that we took in December. But under the taxes then approved, the rates go up quite high in terms of precentages and also they cover more and more dollars of individual income. Presumably every Member of Congress is making $57,500 per year and would pay the full social security tax rate. I think we should pay the full rate, and we should because it is a system we devised. We would pay the full rate on our salary, but that would be different rates in different years. I think the rate goes up as high as 6 or 7 percent.

The CHAIRMAN. The time of the gentleman from Ohio (Mr. BROWN) has expired.

(On request of Mr. WAGGONNER, and by unanimous consent, Mr. BROWN of Ohio was allowed to proceed for 2 additional minutes.)

Mr. WAGGONNER. Mr. Chairman, will the gentleman yield?

Mr. BROWN of Ohio. I yield to the gentleman from Louisiana (Mr. WAGGONNER).

Mr. WAGGONNER. Mr. Chairman, I thank my friend, the gentleman from Ohio, for yielding.

I have before me a copy of the amendment. The gentleman talks about a reduction which could be achieved in part by covering Federal Government officers including the President, Cabinet members, and Members of Congress under the social security system. What other Government officers would be included?

Mr. BROWN of Ohio. I would leave that to a distinguished group such as the Ways and Means Committee of the House and the Finance Committee in the Senate. Although it was the Ways and Means Committee that worked out a system which was going to include people under civil service retirement. I do not know that I would want to include all of them—I voted against that earlier provision—but we might want to include the higher grade employees of the administration and perhaps the employees of this Chamber of the Congress, or those people who work on the staffs of the Congress. I do not know. I leave that to those committees.

Mr. WAGGONNER. If the gentleman will yield again, twice the gentleman has said he would leave this to the committee on Ways and Means to make this decision. Is that not really what should be done in the first place, inasmuch as the committee has a study already authorized?

Mr. BROWN of Ohio. I would prefer that we admonish the President to look at it and make recommendations, and I think it ought to be included in the economic report, and I would hope that we can get some action on it because I do think it is important that we express our confidence in the system and that Congressmen also be affected by the taxes we impose on the other citizens of the United States.

Mr. WAGGONNER. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I know that my friend, the gentleman from Ohio (Mr. BROWN), has good intentions in offering this amendment, but he has just said that he does not intend that this include all Government employees. The bulk of Government employment are not high-level officers such as he referred to. Those to be covered perhaps by such an amendment as this would indeed be few in number and their impact on stabilizing the system or improving the actuary would be negligible, in my personal opinion.

This social security problem is bigger than this. The Congress recognized it last year when we passed the social security amendments, because we mandated a comprehensive study to inquire into the matter of covering universally all Federal employees, which includes Members of Congress, other Federal employees, the State and local and nonprofit employees. These people would number perhaps 8 million people and would probably have a good effect in my opinion if they were brought into the system because contributions would be up.

It does seem to me, having already mandated a study to determine how and if indeed it can be done or whether it should be done, that we should wait on that study, because what we are talking about here with this amendment is just a mere handful of people, and we would have nothing.

But I could make no better argument against the amendment than the gentleman from Ohio (Mr. BROWN) himself has made when he said he would leave this whole question of social security to the Ways and Means Committee and the Social Security Subcommittee and the committee because we have already mandated a study.

Ways and Means has the responsibility.

Mr. BROWN of Ohio. Mr. Chairman, will the gentleman yield?

Mr. WAGGONNER. I yield to the gentleman from Ohio.

Mr. BROWN of Ohio. Mr. Chairman, I might say to the gentleman from Louisiana (Mr. WAGGONNER), and it is plaintive, that I would like to have the chance to vote on the issue from the Committee on Ways and Means. But so much of our legislation that comes from the Committee on Ways and Means comes out under a closed rule and I do not get to vote on several issues I would like to vote on. We do not really get an opportunity to put our imprint on their bills, as just ordinary Members of the Congress, that we would like to get. I do not really have any option but to leave it to the Committee on Ways and Means. However, I do think we ought to have a study to see what the impact of my idea is. I do think it would be wise that the President address himself to it.

The major thrust of the amendment is to assure that we express our confidence in the social security system and the taxes we impose on other citizens to support that system by sharing in the impact of those taxes since we will not have much outside earned income that can be covered by social security.

Mr. WAGGONNER. Mr. Chairman, in closing, let me say that any study such as this would be totally redundant. Such a study that is far more comprehensive is now underway. Therefore I would suggest that we reject the amendment.

Mr. WEISS. Mr. Chairman, I move to strike the last word, and I rise in opposition to the amendment offered by the gentleman from Ohio (Mr. BROWN).

Mr. Chairman, it so happens that I supported efforts to keep this kind of a provision in the social security legislation that was before us toward the end of last year. Indeed, earlier this week I had argued in the Democratic caucus that we consider taking a Democratic Party position on the review and revision of the social security legislation that we passed.

But that is one thing, Mr. Chairman, to consider it in the context of the social security legislation or policy to be undertaken on social security taxes, it is quite another thing to drag social security, be it universal coverage or whatever, in by the heels into legislation that deals with employment and elimination of unemployment.

Mr. BROWN of Ohio. Mr. Chairman, will the gentleman yield?

Mr. WEISS. I will yield to the gentleman after I get through. I will be pleased to yield to the gentleman at that time.

The fact is, Mr. Chairman, that even the particular section to which this amendment would go, on page 811—talking about the thrust of it—is inappropriate.

The heading there is:

Job Training, Counselling, and Reservoirs of Employment Projects.

It just occurs to me that perhaps the gentleman is rightly concerned about the rate of social security taxes and wants to take a position on it. And I appreciate and I admire that. But to include it in this legislation at this point I think just makes a farce of the efforts that we have been making, very seriously for some years now and certainly within the past week of having a piece of legislation which focuses on employment and putting to work people who have not had jobs. I really just do not think that the gentleman has sufficiently thought through the impact of what he is suggesting here.

Mr. BROWN of Ohio. Mr. Chairman, will the gentleman yield?

Mr. WEISS. I yield to the gentleman from Ohio.

Mr. BROWN of Ohio. Mr. Chairman, first, let me say that social security has everything to do with employment and employment has everything to do with social security because one does not get the opportunity to pay social security taxes and be covered for retirement unless one is employed. That is first. Second, the amount of tax that is taken for social security does have an impact on capital formation, one of the thrusts of this bill. It does have an impact on what a person gets from his employment because it is what the Government takes away from him before he gets the money to spend. It is our forced system which

has been established for many years in this society as a method of trying to care for that worker when he is aged, or maybe it will have an impact on the worker if he becomes disabled because the social security system serves him as a disabled person when he cannot work, and he has contributed to that system.

So I think that the social security tax has everything to do with employment.

Mr. WEISS. I appreciate that.

Mr. BROWN of Ohio. I think Congressmen ought to be covered by it, too, because we will not be covered by social security except for maybe a little bit on that $8,000 or so—the 15 percent of our congressional salary that we are limited to from the outside—if we can make any outside income.

Mr. WEISS. If the gentleman will yield back some of my time, the other point I would like to make is that this is perhaps the only place in the entire legislation if this amendment were to be adopted where we would have not a direction toward a policy or a goal, but a specific mandate upon the President to do thus and thus. The language in the gentleman's amendment says "the President shall develop policies and programs for reducing the burden of social security taxes on workers and employers, which reduction could be achieved in part by covering" et cetera the most specific kind of provision dealing not with the major theme or thrust of the legislation, but about something in my opinion not really germane or appropriate to the legislation.

Mr. MITCHELL of Maryland. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, there is a very famous concert pianist who had world acclaim. He always insisted that his instrument be finely tuned so that he could perform well. Once while in Germany, he insisted on the fine tuning of it against the advice of the tuner, whom he trusted to do it properly, he said, "Fine tune it a little bit more. Fine tune it a little bit more. Fine tune it a little bit more."

You can guess what happened. During a concert one night the strings broke because they were too finely tuned. His reputation as a great concert pianist was shattered.

It seems to me that is the problem with the gentleman's amendment. He is attempting to fine tune; and fine tune; and fine tune; far beyond the scope of this bill.

We started out by saying that essentially this was a macro approach—a macro policy approach—to the matter of reducing unemployment in this county, to bringing us to full employment.

Mr. BURKE of Massachusetts. Mr. Chairman, will the gentleman yield?

Mr. MITCHELL of Maryland. I yield to the gentleman from Massachusetts.

Mr. BURKE of Massachusetts. I thank the gentleman for yielding.

I want to agree with everything the gentleman has said and point out that this is just a mischievous amendment. It will not do anything toward solving the problems of restructuring and refinancing social security. If the gentleman wants to be constructive, he can join with me and cosponsor my bill to reduce the social security taxes of 3.9, and he can join the other 150 cosponsors that I have, and I will welcome him aboard.

Mr. MITCHELL of Maryland. I thank the gentleman for his comments.

As I was trying to indicate, we started out with the premise that this was a macro-policy approach, and through a series of amendments offered mostly by the other side, we have shifted from a macro approach to a micro approach. Somewhere along the line this has got to stop.

In addition to that, one of the things that impressed me so about this bill was the tedious, protracted procedures by means of which the bill was examined, upside down and inside out, before it was brought to the floor. Hearings were conducted so that we knew what we should do vis-a-vis the Committee on Ways and Means. Hearings were conducted so that we knew that the bill would not invade the jurisdiction of the Committee on the Judiciary, that it would not invade the jurisdiction of the Budget Committee. But now we have amendments coming up which, in essence, violate that whole procedural position that was taken by the authors of the amendment, the procedural positions taken to avoid encroaching on the jurisdiction of the standing committees of this House.

I would respectfully suggest that the amendment be defeated, if for no other reason, than that it continues the fine-tuning process beyond any approach that seems reasonable.

Mr. BROWN of Ohio. Mr. Chairman, will the gentleman yield?

Mr. MITCHELL of Maryland. I yield to the gentleman from Ohio.

Mr. BROWN of Ohio. I thank the gentleman for yielding.

I regret so much that my colleagues on that side of the aisle do not want to be embraced in the social security system, but I am constrained—because it was mentioned by both the gentleman from New York and the dean of the Massachusetts delegation, the gentleman from Massachusetts (Mr. BURKE) and a member of the Committee on Ways and Means, that I should support his legislation to reduce the social security taxes—to say that I did not vote for that increase in the first place.

When Congress increases taxes, the Congressmen who increase them should also be paying those taxes.

It is a canard for us to eliminate our requirement to pay social security taxes and then raise those taxes on others.

Mr. MITCHELL of Maryland. Mr. Chairman, I think the gentleman has made the point. I just want to urge defeat of the amendment.

Mr. SIMON. Mr. Chairman, will the gentleman yield?

Mr. MITCHELL of Maryland. I yield to the gentleman from Illinois.

Mr. SIMON. Mr. Chairman, I would simply point out that I was one of 38 Members who voted, when everyone else voted in opposition, for the Fisher amendment. If I remember correctly, the gentleman from Ohio did not vote to include Members of Congress at that time. What the gentleman from Ohio is trying to do is put some weights on these things with these other amendments to sink the bill down to the bottom of the lake.

The CHAIRMAN pro tempore. The time of the gentleman from Maryland has expired.

Mr. BROWN of Ohio. Mr. Chairman, I ask unanimous consent that the gentleman from Maryland may proceed for 1 additional minute.

Mr. MITCHELL of Maryland. Mr. Chairman, may I suggest to the gentleman that if I am given an additional minute, I will yield to the gentleman from New York (Mr. WEISS), so I would rather not have the additional minute.

Mr. WEISS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise simply to correct the implication of the statement of the gentleman from Ohio that those of us who are opposing this amendment are doing so because we do not want to be covered by social security.

Mr. Chairman, I was one of the 38 Members, along with the gentleman from Illinois (Mr. SIMON), who voted against the Fisher amendment. The gentleman from Ohio was not. I think it is the height of chutzpah and hypocrisy for the gentleman from Ohio now to present this amendment.

POINT OF ORDER

Mr. BROWN of Ohio. Mr. Chairman, a point of order.

The CHAIRMAN pro tempore. The gentleman will state the point of order.

Mr. BROWN of Ohio. Mr. Chairman, I do not resent the word "chutzpah," but I do resent the word "hypocrisy."

Mr. WEISS. Mr. Chairman, I apologize and withdraw the word "hypocrisy."

Mr. SEIBERLING. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I will not take the 5 minutes, or even a minute.

I was one of those who did vote for the Fisher amendment, but I happen to think that the Members of Congress and governmental employees should be under social security. But this amendment has the same weakness as the social security bill had before we adopted the Fisher amendment; namely, it would direct the placing of Government employees under social security without specifying it is to be done, how it is going to be paid for and how we are going to preserve their vested rights.

For the same reason that we adopted the Fisher amendment, we should reject this amendment.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Ohio (Mr. BROWN).

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. BROWN of Ohio. Mr. Chairman, I demand a recorded vote.

A recorded vote was refused.

So the amendment was rejected.

The CHAIRMAN pro tempore. Are there further amendments to title II? If not, the Clerk will read.

The Clerk read as follows:

TITLE III—POLICIES AND PROCEDURES FOR CONGRESSIONAL REVIEW

STATEMENT OF PURPOSE

SEC. 301. (a) The purposes of this title are to establish procedures for congressional re-

view and action with respect to the Economic Report, the report of the Board of Governors of the Federal Reserve System, and the other policies and provisions of this Act and the Employment Act of 1946.

(b) To provide for comprehensive national policies to meet the objectives of this Act and the Employment Act of 1946, and to provide the Congress with guidance on these matters, the appropriate committees of the Congress shall review and revise, to the extent deemed desirable, the economic goals, priorities, policies, and programs proposed under such Acts by the President and the Board of Governors of the Federal Reserve System. Furthermore, the Congress shall consider the implications of the short-term goals and related policies for the Concurrent Resolutions required under the Congressional Budget Act of 1974. The Congress shall initiate or develop such legislation as it deems necessary to implement these proposals and objectives, after such modification in such proposals as it deems desirable. Nothing in this Act shall be construed to prevent the Congress or any of its committees from considering or initiating at any time action to implement this Act.

REVIEW OF ECONOMIC REPORT BY ECONOMIC COMMITTEE

SEC. 302. (a) In conjunction with its review of the Economic Report, and the holding of hearings on the Economic Report as required under the Employment Act of 1946, the Joint Economic Committee shall review and analyze the policies and programs recommended by the President and the short-term and medium-term goals for employment, production and purchasing power under section 3(a)(2) and section 4(b) of the Employment Act of 1946.

(b) The Joint Economic Committee shall hold hearings on the Economic Report for the purpose of receiving testimony from Members of the Congress, appropriate representatives of Federal departments and agencies, such representatives of the general public and interested groups, and such others as the joint committee deems advisable. The joint committee shall also consider the comments and views on the Economic Report which are received from State and local officials.

(c) Within thirty days after receipt by the Congress of the Economic Report, each standing committee of the Senate and the House of Representatives and each joint committee of the Congress shall submit to the Joint Economic Committee a report containing its views and recommendations with respect to aspects of the Economic Report which relate to their respective jurisdictions.

(d) Not later than ninety days after the submission of the Economic Report to the Congress, the members of the Joint Economic Committee who are Members of the House of Representatives shall report to the House, and the members of the joint committee who are Members of the Senate shall report to the Senate, a concurrent resolution which shall state in substance that the Congress approves or disapproves in whole or in part of the programs, policies, and goals in the Economic Report, and which may contain such alternatives to, modifications of, or additions to the Economic Report as the joint committee deems appropriate and in accord with the purposes of this Act and the Employment Act of 1946. The report accompanying such concurrent resolution shall include findings and recommendations of the joint committee with respect to each of the main recommendations contained in the Economic Report.

(e)(1) When a concurrent resolution referred to in subsection (d) has been reported to the House of Representatives it shall at any time thereafter be in order (even though a previous motion to the same effect has been disagreed to) to move to proceed to the consideration of the concurrent resolution. The motion shall be highly privileged and not debatable. An amendment to the motion shall not be in order, nor shall it be in order to move to reconsider the vote by which the motion is agreed or disagreed to.

(2) General debate on any such concurrent resolution in the House of Representatives shall be in the Committee of the Whole House on the State of the Union, and shall be limited to not more than ten hours, which shall be divided equally between those favoring and those opposing the concurrent resolution. A motion further to limit debate shall not be debatable.

(3) Except to the extent specifically provided in the preceding provisions of this subsection, consideration in the House of Representatives of any such concurrent resolution and amendments thereto (or any conference report thereon) shall be governed by the Rules of the House of Representatives applicable to other bills and resolutions, amendments and conference reports in similar circumstance.

(f)(1) Debate in the Senate on a concurrent resolution referred to in subsection (d), and all amendments thereto and debatable motions and appeals in connection therewith, shall be limited to not more than ten hours. The time shall be equally divided between, and controlled by, the majority leader and the minority leader or their designees.

(2) Debate in the Senate on any amendment to any such concurrent resolution shall be limited to two hours, to be equally divided between, and controlled by, the mover and the manager of the concurrent resolution. Debate on any amendment to an amendment, and debate on any debatable motion or appeal shall be limited to one hour, to be equally divided between, and controlled by, the mover and the manager of the concurrent resolution, except that in the event the manager of the concurrent resolution is in favor of any such amendment, motion, or appeal, the time in opposition thereto shall be controlled by the minority leader or his designee. No amendment that is not germane to the provisions of the concurrent resolution shall be received. Such leaders, or either of them, may, from the time under their control on the passage of the concurrent resolution, allot additional time to any Senator during the consideration of any amendment, debatable motion, or appeal.

(3) A motion in the Senate to further limit debate is not debatable. A motion to recommit (except a motion to recommit with instructions to report back within a specified number of days, not to exceed three, not counting any day on which the Senate is not in session) is not in order. Debate on any such motion to recommit shall be limited to one hour, to be equally divided between, and controlled by, the mover and the manager of the concurrent resolution.

(4) The conference report on any such concurrent resolution shall be in order in the Senate at any time after the third day (excluding Saturdays, Sundays, and legal holidays) following the day on which such a conference report is reported and is available to Members of the Senate. A motion to proceed to the consideration of the conference report may be made even though a previous motion to the same effect has been disagreed to.

(5) During the consideration in the Senate of the conference report on any such concurrent resolution, debate shall be limited to two hours, to be equally divided between, and controlled by, the majority leader and minority leader or their designees. Debate on any debatable motion or appeal related to the conference report shall be limited to thirty minutes, to be equally divided between, and controlled by, the mover and the manager of the conference report.

(6) Should the conference report be defeated in the Senate, debate on any request for a new conference and the appointment of conferees shall be limited to one hour to be equally divided between, and controlled by, the manager of the conference report and the minority leader or his designee, and should any motion be made to instruct the conferees before the conferees are named, debate on such motion shall be limited to thirty minutes, to be equally divided between, and controlled by, the mover and the manager of the conference report. Debate on any amendment to any such instructions shall be limited to twenty minutes, to be equally divided between, and controlled by, the mover and the manager of the conference report. In all cases when the manager of the conference report is in favor of any motion, appeal, or amendment, the time in opposition shall be under the control of the minority leader or his designee.

(7) In any case in which there are amendments in disagreement, time on each amendment in the Senate shall be limited to thirty minutes, to be equally divided between, and controlled by, the manager of the conference report and the minority leader or his designee. No amendment that is not germane to the provisions of such amendments shall be received.

(g) Upon adoption of a concurrent resolution under this section with respect to any Economic Report, the concurrent resolution shall serve as a long-term guide to the Congress with respect to legislation relevant to the goals, priorities, policies, and programs recommended in such report, as modified by the concurrent resolution. A copy of the concurrent resolution shall be transmitted to the President by the Clerk of the House of Representatives or the Secretary of the Senate, as appropriate, for such actions as the President deems appropriate.

EXERCISE OF RULEMAKING POWERS

SEC. 303. (a) The provisions of this title are enacted by the Congress—

(1) as an exercise of the rulemaking power of the House of Representatives and the Senate, respectively, and as such they shall be considered as part of the rules of each House, respectively, or of that House to which they specifically apply, and such rules shall supersede other rules only to the extent that they are inconsistent therewith; and

(2) with full recognition of the constitutional right of either House to change such rules (so far as relating to such House), at any time, in the same manner and to the same extent as in the case of any other rule of such House.

REVIEW OF ECONOMIC REPORT BY COMMITTEES ON THE BUDGET OF BOTH HOUSES

SEC. 304. (a) Section 301(a) of the Congressional Budget Act of 1974 is amended—

(1) by striking out "and" at the end of clause (5);

(2) by redesignating clause 6 and clause 7, and

(3) by inserting after clause (5) the following new clause:

"(6) the policies, programs, and goals set forth in the Economic Report of the President, and".

(b) The second sentence of section 301(c) of the Congressional Budget Act of 1974 is amended to read as follows: "The Joint Economic Committee shall submit to the Committees on the Budget of both Houses its recommendations as to the policies and programs and the short-term and medium-term goals set forth in the Economic Report. These recommendations shall be incorporated by the Committee on the Budget of each House in the first concurrent resolution on the budget referred to in subsec-

tion (a) reported by that committee, with modifications if necessary to fulfill the objectives of the Full Employment and Balanced Growth Act of 1978. In the event that the Committee on the Budget of either House modifies the recommendations of the Joint Economic Committee, that Budget Committee shall provide its reasons for such modification in the report accompanying the first concurrent resolution.".

Mr. BOLLING (during the reading). Mr. Chairman, I ask unanimous consent that title III be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Missouri?

Mr. BAUMAN. Mr. Chairman, reserving the right to object, I would like to say to the gentleman from Missouri, as I understand it, there is only one major controversy regarding a substitute for this section; and before we dispense with the reading, does the gentleman have any idea about how much time might be devoted to this title?

Mr. BOLLING. Mr. Chairman, if the gentleman will yield, I would not think too much time. There is a committee amendment, as the gentleman knows, and I understand that the gentleman from New York (Mr. CONABLE) has an amendment to that committee amendment.

There are some perfecting amendments of a minor nature that I believe are agreed upon. I cannot really say how long it will take, because I do not know how long the controversy over the Conable amendment will take. I think it will be relatively brief.

Mr. BAUMAN. Mr. Chairman, my only concern before was about cutting off time before an opportunity could be had for full debate, and I would hope that would not be the intention of the gentleman from Missouri (Mr. BOLLING).

Mr. BOLLING. Mr. Chairman, I do not have any intention of cutting off time before there is full debate on the amendments about which I have information.

Mr. BAUMAN. Mr. Chairman, I know the gentleman from Missouri (Mr. BOLLING) to be very reasonable, and I withdraw my reservation of objection.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Missouri?

There was no objection.

COMMITTEE AMENDMENT

The CHAIRMAN pro tempore. The Clerk will report the committee amendment.

The Clerk read as follows:

Committee Amendment: Strike title III and insert:

TITLE III—POLICIES AND PROCEDURES FOR CONGRESSONAL REVIEW

TIMETABLE

SEC. 300. The timetable with respect to congressional review of the Economic Report for any fiscal year is as follows:

On or before:	Action to be completed:
15th day after Congress meets	President transmits Economic Report.
March 1	Federal Reserve Board transmits statement of intended policies.
March 1	Legislative committeees of both Houses submit reports to Joint Economic Committee.
March 15	Joint Economic Committee reports concurrent resolution on short-term congressional goals of national economic policy.
April 1	Concurrent resolution passes both House and Senate.
May 1	Congress completes action on concurrent resolution.

REVIEW OF ECONOMIC REPORT BY JOINT ECONOMIC COMMITTEE; ESTABLISHMENT OF SHORT-TERM CONGRESSIONAL GOALS

SEC. 301. (a) In conjunction with its review of the Economic Report, the Joint Economic Committee shall review and analyze the policies and programs recommended by the President and the short-term and medium-term goals under section 3(a)(2) and section 4(b) of the Employment Act of 1946, along with the statement of the Board of Governors of the Federal Reserve System transmitted under section 8 of that Act.

(b) On or before March 1 of each year, each legislative committee of the House of Representatives and the Senate shall submit to the Joint Economic Committee, for use by the Joint Economic Committee in conducting its review and analysis under subsection (a), a report containing the views and recommendations of the submitting committee with respect to aspects of the Economic Report which relate to its respective jurisdiction.

(c) On or before March 15 of each year, the members of the Joint Economic Committee who are Members of the House of Representatives shall report to the House, and the members of the Joint Economic Committee who are Members of the Senate shall report to the Senate, a concurrent resolution setting forth, as the short-term congressional goals of national economic policy (based on the Joint Committee's consideration of the goals proposed by the President in the Economic Report), annual numerical goals for employment and unemployment, production, real income, and productivity for the calendar year in which the Economic Report is transmitted and for the following calendar year. The report accompanying such concurrent resolution shall include findings and recommendations of the Joint Committee with respect to each of the main policy and program recommendations contained in the Economic Report.

(d)(1) When a concurrent resolution described in subsection (c) has been reported to the House of Representatives, it shall at any time thereafter be in order (even though a previous motion to the same effect has been disagreed to) to move to proceed to the consideration of the concurrent resolution. The motion shall be highly privileged and not debatable. An amendment to the motion shall not be in order, nor shall it be in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

(2) General debate on any such concurrent resolution in the House of Representatives shall be in the Committee of the Whole House on the State of the Union, and shall be limited to not more than ten hours, which shall be divided equally between the majority and minority parties. A motion further to limit debate shall not be debatable.

(3) Except to the extent specifically provided in the preceding provisions of this subsection, consideration in the House of Representatives of any such concurrent resolution and amendments thereto (or any conference report thereon) shall be governed by the Rules of the House of Representatives applicable to other bills and resolutions, amendments, and conference reports in similar circumstance.

(e)(1) Debate in the Senate on a concurrent resolution described in subsection (c), and all amendments thereto and debatable motions and appeals in connection therewith, shall be limited to not more than ten hours. The time shall be equally divided between, and controlled by, the majority leader and the minority leader or their designees.

(2) Debate in the Senate on any amendment to any such concurrent resolution shall be limited to two hours, to be equally divided between, and controlled by, the mover and the manager of the concurrent resolution. Debate on any amendment to an amendment, and debate on any debatable motion or appeal, shall be limited to one hour, to be equally divided between, and controlled by, the mover and the manager of the concurrent resolution, except that in the event the manager of the concurrent resolution is in favor of any such amendment, motion, or appeal, the time in opposition thereto shall be controlled by the minority leader or his designee. No amendment that is not germane to the provisions of the concurrent resolution shall be received. Such leaders, or either of them, may, from the time under their control on the passage of the concurrent resolution, allot additional time to any Senator during the consideration of any amendment, debatable motion, or appeal.

(3) A motion in the Senate to further limit debate is not debatable. A motion to recommit (except a motion to recommit with instructions to report back within a specified number of days, not to exceed three, not counting any day on which the Senate is not in session) is not in order. Debate on any such motion to recommit shall be limited to one hour, to be equally divided between, and controlled by, the mover and the manager of the concurrent resolution.

(4) The conference report on any such concurrent resolution shall be in order in the Senate at any time after the third day (excluding Saturdays, Sundays, and legal holidays) following the day on which such conference report is reported and is available to Members of the Senate. A motion to proceed to the consideration of the conference report may be made even though a previous motion to the same effect has been disagreed to.

(5) During the consideration in the Senate of the conference report on any such concurrent resolution, debate shall be limited to two hours, to be equally divided between, and controlled by, the majority leader and minority leader or their designees. Debates on any debatable motion or appeal related to the conference report shall be limited to thirty minutes, to be equally divided between, and controlled by, the mover and the manager of the conference report.

(6) Should the conference report be defeated in the Senate, debate on any request for a new conference and the appointment of conferees shall be limited to one hour to be equally divided between, and controlled by, the manager of the conference report and the minority leader or his designee; and should any motion be made to instruct the conferees before the conferees are named, debate on such motion shall be limited to thirty minutes, to be equally divided between, and controlled by, the mover and the manager of the conference report. Debate on any amendment to any such instructions shall be limited to twenty minutes, to be equally divided between, and controlled by, the mover and the

manager of the conference report. In all cases when the manager of the conference report is in favor of any motion, appeal, or amendment, the time in opposition shall be under the control of the minority leader or his designee.

(7) In any case in which there are amendments in disagreement, time on each amendment in the Senate shall be limited to thirty minutes, to be equally divided between, and controlled by, the manager of the conference report and the minority leader or his designee. No amendment that is not germane to the provisions of such amendments shall be received.

(f) Upon the adoption of a concurrent resolution (described in subsection (c)) setting forth the short-term congressional goals of national economic policy, such resolution shall serve as a guide to the Congress with respect to legislation relevant to achieving such goals. A copy of the concurrent resolution shall be transmitted to the President by the Clerk of the House of Representatives or the Secretary of the Senate, as appropriate, for such actions as the President deems appropriate.

AMENDMENTS TO BUDGET ACT

SEC. 302. (a)(1) Section 300 of the Congressional Budget Act of 1974 is amended by striking out "March 15" in the first column and inserting in lieu thereof "March 1".

(2) Section 301(c) of such Act is amended by striking out "March 15" in the first sentence and inserting in lieu thereof "March 1".

(b) Section 301(d) of such Act is amended—

(1) by redesignating paragraphs (1) through (8) as paragraphs (2) through (9), respectively; and

(2) by inserting immediately before paragraph (2) (as so redesignated) the following new paragraph:

"(1) a summary analysis of the levels of revenues and budget authority and outlays designed to implement the economic assumptions and objectives which underlie each of the matters set forth in such concurrent resolution;".

(c) Section 301(c) of such Act is amended—

(1) by striking out "Joint Economic Committee and" in the first sentence; and

(2) by striking out the second sentence.

EXERCISE OF RULEMAKING POWERS

SEC. 303. The provisions of this title are enacted by the Congress—

(1) as an exercise of the rulemaking power of the House of Representatives and the Senate, respectively, and as such they shall be considered as part of the rules of each House respectively, or of that House to which they specifically apply, and such rules shall supersede other rules only to the extent that they are inconsistent therewith; and

(2) with full recognition of the constitutional right of either House to change such rules (so far as relating to such House), at any time, in the same manner and to the same extent as in the case of any other rule of such House.

Mr. BOLLING (during the reading). Mr. Chairman, I ask unanimous consent that the committee amendment be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Missouri?

There was no objection.

PERFECTING AMENDMENT OFFERED BY MR. GIAIMO TO THE COMMITTEE AMENDMENT

Mr. GIAIMO. Mr. Chairman, I offer a perfecting amendment to the committee amendment.

The Clerk read as follows:

Perfecting amendment offered by Mr. GIAIMO to the committee amendment: Page 97, line 5, strike out "and productivity" and insert in lieu thereof "productivity, and rate of inflation".

Mr. GIAIMO. I rise to offer an amendment, which was discussed last week, concerning the need for the JEC resolution to include "the vote of inflation." Mr. Chairman, the last paragraph on page 96, which carries over to page 97, would be amended. It now says:

On or before March 15 of each year, the members of the Joint Economic Committee who are Members of the House of Representatives shall report to the House, and the members of the Joint Economic Committee who are Members of the Senate shall report to the Senate, a concurrent resolution setting forth, as the short-term congressional goals of national economic policy (based on the Joint Committee's consideration of the goals proposed by the President in the Economic Report), annual numerical goals for employment and unemployment, production, real income, and productivity for the calendar year in which the Economic Report is transmitted and for the following calendar year. The report accompanying such concurrent resolution shall include findings and recommendations of the Joint Committee with respect to each of the main policy and program recommendations contained in the Economic Report.

My amendment would add the words "the rate of inflation." Thus, JEC's report will recommend numerical goals not only for unemployment, production, real income, and productivity, but for the rate of inflation, as well.

Mr. Chairman, I think this is a healthy amendment. I think it will give balance to this legislation, and I urge its support.

Mr. SARASIN. Mr. Chairman, will the gentleman yield?

Mr. GIAIMO. I yield to the gentleman from Connecticut.

Mr. SARASIN. Mr. Chairman, I thank the gentleman for yielding.

I want to compliment the gentleman on his amendment. I think this does carry out the intent, although not the target, of the Sarasin amendment which we discussed last week and which was designed to get us moving in the direction of reaching a lower rate of inflation and, in that case, a targeted rate of inflation.

This amendment offered by the gentleman from Connecticut (Mr. GIAIMO) in addition to the Wright amendment, will now require both the President and the Congress to set numerical goals, and I believe that is a step in the right direction. I am obviously very pleased, and again I congratulate my friend, the gentleman from Connecticut (Mr. GIAIMO), for offering his amendment.

Mr. BOLLING. Mr. Chairman, will the gentleman yield?

Mr. GIAIMO. I yield to the chairman of the committee.

Mr. BOLLING. Mr. Chairman, I thank the gentleman for yielding.

As I said in the debate last week, I heartily agree with this amendment. I think it strengthens the bill, and I am prepared to accept it on our side.

The CHAIRMAN pro tempore. The question is on the perfecting amendment offered by the gentleman from Connecticut (Mr. GIAIMO) to the committee amendment.

The perfecting amendment to the committee amendment was agreed to.

PERFECTING AMENDMENT OFFERED BY MR. BOLLING TO THE COMMITTEE AMENDMENT

Mr. BOLLING. Mr. Chairman, I offer a perfecting amendment to the committee amendment.

The Clerk read as follows:

Perfecting amendment offered by Mr. BOLLING to the committee amendment: Page 95, section 300, strike "March 1" the first place it appears and insert in lieu thereof "February 15".

Mr. BOLLING. Mr. Chairman, this amendment in effect implements the Stanton-Reuss amendment. To the best of my knowledge, there is no controversy whatsoever. It just changes a date.

Mr. Chairman, I urge the adoption of the amendment.

Mr. CONABLE. Mr. Chairman, will the gentleman yield?

Mr. BOLLING. I yield to the gentleman from New York.

Mr. CONABLE. I thank the gentleman for yielding.

Mr. Chairman, I will ask the gentleman this question: Does this relate only to the information to be transmitted to the Federal Reserve Board?

Mr. BOLLING. That is correct.

The CHAIRMAN pro tempore. The question is on the perfecting amendment offered by the gentleman from Missouri (Mr. BOLLING) to the committee amendment.

The perfecting amendment to the committee amendment was agreed to.

PERFECTING AMENDMENT OFFERED BY MR. CONABLE TO THE COMMITTEE AMENDMENT

Mr. CONABLE. Mr. Chairman, I offer a perfecting amendment to the committee amendment.

The Clerk read as follows:

Perfecting amendment offered by Mr. CONABLE to the committee amendment: On page 95, strike out section 300.

On page 96, line 12, strike out "March 1" and insert in lieu thereof "March 15".

Strike out all following line 19 on page 96 through line 20 on page 101 and insert in lieu thereof the following:

(c) Prior to consideration of the first concurrent resolution on the budget, the members of the Joint Economic Committee who are Members of the House of Representatives may report to the House, and the members of the Joint Committee who are Members of the Senate may report to the Senate, an amendment to said concurrent resolution incorporating such additions, alternatives and modifications to the matters set forth in the resolution as the Joint Committee deems appropriate and in accord with the purposes of this Act and the Employment Act of 1946.

On page 101, beginning on line 22, strike out subsection (a) of section 302. Redesignate subsections (b) and (c) as subsections (a) and (b), respectively.

Mr. CONABLE (during the reading). Mr. Chairman, I ask unanimous consent that the perfecting amendment to the committee amendment be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. CONABLE. Mr. Chairman, while this amendment does not strike title III, it very much reduces the procedure in-

volved in title III. Title III was added in the Rules Committee at the request of the distinguished chairman of the Joint Economic Committee, as I understand.

Mr. BOLLING. Mr. Chairman, will the gentleman yield?

Mr. CONABLE. I yield to the gentleman from Missouri and ask him if that is correct.

Mr. BOLLING. Mr. Chairman, I know the gentleman wants to be accurate.

Mr. CONABLE. Oh, I am sure I do, yes.

Mr. BOLLING. I am not being sarcastic. I mean it absolutely sincerely. It was not added. What the substitute title III did was to modify the provision reported out by the Committee on Education and Labor, which gave the Joint Economic Committee essentially, precisely really, the same duty. So it is not a substitute in that sense. The Committee on Education and Labor gave the Joint Economic Committee the same duty.

Mr. CONABLE. Mr. Chairman, I thank the gentleman for his amplification.

In fact, what we have in this measure is a procedure which, in my view, front loads the Congress to a degree that it is going to be a burden, and an unnecessary burden, to the standing committees which already are required to prepare and present considerable information in the way of reports to the Committee on the Budget. The Committee on the Budget acts on those reports. They are to be in the hands of the Committee on the Budget by March 15. The procedure in title III would require similar reports, with a view to the goals of the Humphrey-Hawkins bill, to go to the Joint Economic Committee approximately 2 weeks earlier than the reports required for the Committee on the Budget. It requires the Congress to act on the information as provided with respect to the goals of the Humphrey-Hawkins bill—and those goals have been made somewhat more complicated by the action here on the floor—2 weeks in advance of the findings of the Committee on the Budget.

The result is that the House is being asked to make two separate findings with respect to two separate sets of assumptions, possibly, and it seems to me that it would be much better to meld these procedures in ways that would preserve the right of the Joint Economic Committee to receive this information, the information that is transmitted to the Committee on the Budget, to act on it with respect to the goals of the Humphrey-Hawkins bill, and to come to the floor and present amendments to the Budget Committee's report if they feel the Budget Committee has not been adequately sensitive to the goals of the Humphrey-Hawkins bill.

If this were to be done, it seems to me that it would save a great deal of procedure and a great deal of further burden on the standing committees. It seems to me, also, that it could protect the House and the Senate, as well, from the problem of having made separate findings, perhaps contradictory findings, only 2 weeks apart and, as a result, viewing considerable public notice of their inconsistencies.

The budget resolutions are likely to become ever harder to pass than the resolutions that will be provided by title III because they will be based on different economic statistics and on different goals and will become less rosy since they will address purely fiscal policy rather than the social purposes of the Humphrey-Hawkins bill.

Mr. Chairman, congressional credibility will be damaged by this process and the burden, an unnecessary burden, on the procedures and on the standing committees of the House will be quite unfortunate.

I hope that the Members will avoid overloading the House with unnecessary and duplicating procedures. We spend little enough time on the substance of issues and altogether too much time in setting up presumptions and practices that do not ultimately turn to the benefit of the American people.

At this stage in the development of the budget process, we would do very well not to further complicate it by setting up a parallel and somewhat competing process during the same time period.

Mr. BOLLING. Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from New York (Mr. CONABLE).

Mr. Chairman, I rise in opposition to the Conable amendment, for two reasons.

First, it simply restates what can already be done under existing law. Of course, the House and Senate members of JEC may report an amendment to the budget resolution, just as any group of Members may at any time. We do not need Mr. CONABLE's amendment merely to restate the obvious.

Second, it would strike out the provisions of title III of the bill which establish a mechanism for congressional consideration of the President's economic report.

Without those provisions, there would be no mechanism for the orderly consideration of the President's economic goals and policies and programs to achieve those goals: no reports by committees commenting on the President's proposals; no comprehensive consideration of the President's proposals by the one committee of the Congress created to consider the President's overall economic policies; and no opportunity for the Congress to establish its own economic goals if it disagrees with the President.

Nor, may I add, does the gentleman's amendment give to the Budget Committees the task of comprehensively reviewing the President's economic program or of proposing economic goals to the Congress. In short, there would be no structured way for the Congress to deal with the expanded economic proposals that the President would be required to submit under the bill.

The gentleman's amendment is based, I believe, on a faulty premise: that is, that the provisions of title III of the bill are in the nature of a frontal attack on the prerogatives and responsibilities of the Budget Committees. They are not; and, as one who had a good deal to do with the creation of the Budget Committees, I would be the last Member of this body to support such a position.

Let me explain very briefly why I expect the provisions of title III to complement, and not conflict with or undermine, the work of the Budget Committees. There are basically two reasons:

First, the Budget Committees—through budget resolutions—deal explicitly with the economy only in fiscal policy terms—that is, by setting specific revenue and spending levels for the Federal budget. In doing so, they base their decisions, in large part, on the latest economic forecasts of market behavior, price levels, productivity rates, and monetary policy, over which the committees have little or no control. And, to the extent that they wish to affect changes in unemployment, for example, they do so only through revenue or spending levels.

The JEC resolution—and the report accompanying it—would not be similarly bound. It would be primarily a goals-setting resolution, not only for the fiscal policy determined by the budget resolution, but for the private economy as well.

For example, the JEC resolution would set goals for inflation and productivity—and the JEC report would make recommendations on the President's proposals for dealing with these matters. These are matters which ordinarily will not involve either revenues or spending matters. Yet to the extent that policies and programs are designed to deal with such structural matters, they will have great impact on our economy and on the fiscal policies recommended by the Budget Committees.

Second, I believe the Budget Committees' work would be greatly enhanced by the establishment of economic goals by the Congress. Just as Budget Committee resolutions serve to guide and influence—but not bind—the Congress in its actual tax and spending actions, the economic goals resolution would serve to guide and influence—but not bind—the Budget Committee in its work.

I stress certain of these words: "guide and influence—but not bind." The JEC resolution will in no way constrain the Budget Committee's deliberations. It will be free, as it is now, to arrive at its own fiscal policy determinations.

However, it will have before it the Congress recommendations as to what specific economic goals we ought to strive for. In my view, such a set of goals can only enhance the Budget Committee efforts to reach a fiscal policy recommendation that will have wider support.

I urge the defeat of the Conable amendment.

The CHAIRMAN pro tempore. The time of the gentleman from Missouri has expired.

(On request of Mr. CONABLE and by unanimous consent Mr. BOLLING was allowed to proceed for 3 additional minutes.)

Mr. CONABLE. Mr. Chairman, will the gentleman yield?

Mr. BOLLING. I yield.

Mr. CONABLE. Is it not true, though, Mr. Chairman, that every budget report

has to include 1- and 5-year goals and targets for growth, unemployment, and inflation? In fact, the gentleman says we are going to be following a parallel procedure that can be a guide to the Budget Committee if the Joint Economic Committee target and goals are adopted, but are we not duplicating to a very substantial extent the same procedure that already exists, particularly with respect to these goals—growth, unemployment, and inflation—which are required as part of the Budget Committee report?

Mr. BOLLING. I am very anxious not to overstate my case but it is not really my case. It is the case for the Employment Act. The Joint Economic Committee's principal function is to work all year preparing itself to deal with that kind of thing. The Budget Committee, naturally, has to take into account goals; and it is true that they appear in the Budget Committee's reports. But, the Budget Committee begins its work with those goals. It is a very small part of its overall effort, because its major effort is to deal with fiscal policy.

I have certainly, as I suppose the last author, the leader of the House conferees in the Budget Act, and also as a long-time member of the Joint Economic Committee, tried to take into account those facts when we contrived the Budget Act. I think there is a very, very fundamental difference between the Joint Economic Committee in trying to be expert in arriving at goals, and the Budget Committee being expert in using goals to set fiscal policy.

Mr. CONABLE. May I say, Mr. Chairman, that as the gentleman describes the processes that he now envisions for the Joint Economic Committee before the Budget Committee, it seems as though he is reducing the Budget Committee to largely an arithmetic function. He is saying that the Joint Economic Committee will establish goals consonant with the Humphrey-Hawkins Act; that this will be a guide then to the Budget Committee, which is under mandate of its own to go through a very similar procedure and to make findings which two weeks later may be very different from those same findings the Joint Economic Committee has made. It seems as though it would be much more sensible, Mr. Chairman, from a procedural viewpoint, to meld the two into one procedure, as my amendment attempts to do.

Mr. BOLLING. I would like to repeat what I said over and over again in my original statement—guide and influence, but not bind.

Mr. LATTA. Mr. Chairman, I rise in support of the Conable amendment.

Mr. Chairman, I am a little bit confused as to what is being attempted here because we have heard so much in recent years, after the establishment of the Budget Committee, about how essential its work was, and now a major attack in my humble judgment is being made on the procedures and on the jurisdiction of the Budget Committee.

It seems to me that we have been forever making the business of the House ever more confused and more costly. Our motto seems to be "When in doubt, add a committee or a subcommittee, hire more staff, create another hoop or loop in the legislative process so everyone will think we're busy doing something useful." What is referred to as the Rules Committee substitute is a classic example of this principle of whenever possible, confuse the issue even further.

Apparently the Joint Economic Committee does not have enough to do these days, and therefore assumes that the standing committees of the House are in the same position. Point No. 1: the standing committees of this House have more than enough to do with far too little time the way it is; the last thing they need is a legislative mandate to develop, mark up and submit to the Joint Economic Committee their views and estimates of what we should spend and what we should do in each program area during the next fiscal year in order to accomplish the aims of H.R. 50 less than a month and a half after receiving the President's budget and a full 15 days before they have to report their views and estimates on budget policy to the Budget Committee. The Conable amendment would rightfully remove this unnecessary burden from the backs of the standing committees.

Point No. 2: The House has a hard time already agreeing on a first budget resolution. The last thing we need is any arrangement to make it more difficult. Let me tell you exactly what would happen if we accept the Rules Committee substitute requiring the House to vote on a Joint Economic Committee concurrent resolution a month in advance of the first concurrent resolution on the budget.

First, the Joint Economic Committee would report a resolution showing the economy growing at an astounding rate, with unemployment sinking rapidly, with inflation barely more than a murmur, and with a balanced budget just inches away. Everybody votes for it and informs their constituents what good things they have done for them.

Now what is the Budget Committee supposed to do? If it cranks in all the projections and demands of the JEC resolution, we are going to have deficits which make this year's look miniscule, inflation in the double-digit range, and very low levels of capital investment and economic growth. That is no solution. But on the other hand, if the budget resolution is reported out showing much more realistic growth targets, inflation and unemployment estimates, and a much lower deficit, then the House is going to gang up on it for not being consistent with the rosy projection contained in the JEC resolution. That is no solution either.

I support the Conable amendment because it would give JEC a say in our overall fiscal policy, but keep JEC in the same position vis-a-vis all the other standing committees. Let JEC ask the Budget Committee to consider their views and estimates along with those of the other committees. That way the power and authority of the standing committees in the House are not diminished, and the budget process is not further watered down. I urge support of the Conable amendment.

Mr. SIMON. Mr. Chairman, I move to strike the last word and I rise in support of the amendment offered by the gentleman from New York (Mr. CONABLE).

Mr. Chairman, I had not intended to speak and I would like to make it clear that I am not speaking in behalf of the gentleman from California (Mr. HAWKINS) or anyone else on this side, but just for myself.

I do not join my colleague the gentleman from Ohio (Mr. LATTA) in disparaging the work of the Joint Economic Committee. I think they have done a remarkable job. I particularly have great respect for the gentleman from Missouri (Mr. BOLLING). I was one of those who worked hard for him as majority leader of this body and I have never regretted that effort.

I think the fundamental question is how do we make H.R. 50, the Humphrey-Hawkins bill, not just empty words? How do we mesh this with the fiscal policy of this Nation?

It seems to me there is a real danger if we have one report coming out to do one thing and another report coming out that pays no attention to it and the result easily could be empty words.

Somehow they have to be meshed. The Conable amendment moves us in that direction and therefore I will support it.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. SIMON. I yield to the gentleman from California (Mr. ROUSSELOT).

Mr. ROUSSELOT. Mr. Chairman, as the gentleman (Mr. SIMON) knows, as a member of the Committee on the Budget, the Joint Economic Committee chairman comes to report to the Committee on the Budget and makes several recommendations each year. The Joint Economic Committee through its chairman tries to give to the Committee on the Budget the benefit of whatsoever goals it has developed during the past year.

The gentleman is properly explaining to the House that the Joint Economic Committee on which I serve—and, incidentally, I serve both on the Joint Economic Committee and the Committee on the Budget—that both committees are already coordinating their efforts. In my humble judgment the amendment offered by the gentleman from New York (Mr. CONABLE) does a better job of making sure that there will be no confusion and that his amendment will eliminate unnecessary publication or reporting responsibilities.

Can the gentleman from Illinois (Mr. SIMON)—because I know that he has studied this substitute title III carefully—tell me how differences will be resolved if the Joint Economic Committee has one set of objectives and the Committee on the Budget another? There is no provision in here for a resolution of those differences.

Mr. CONABLE. Mr. Chairman, will the gentleman yield?

Mr. ROUSSELOT. Mr. Chairman, first I would like to see if my good colleague the gentleman from Illinois (Mr. SIMON), who is for the Conable substitute, has resolved this in his mind.

Mr. SIMON. If the gentleman will wait, the gentleman from California

(Mr. ROUSSELOT) who asked the question has answered his own question, and I concur in the gentleman's statement.

Mr. CONABLE. Mr. Chairman, will the gentleman yield?

Mr. SIMON. I yield to the gentleman from New York.

Mr. CONABLE. Let me say that I believe there is a serious danger that there may be two contradictory findings and conclusions and I believe the resolution of any disagreement of this sort has to be by the House, obviously, but my procedure simply puts the input of the Joint Economic Committee into the budgetary process.

I would really like to warn my colleagues about the possibility of front end loading the House about certain procedures before we have an opportunity to study them in our various committees.

Mr. SIMON. If the gentleman will permit me, the purpose of this bill is to create jobs and we should not be adopting a budget that negates the force and thrust of this bill. We best accomplish that by having the Budget Committee handled differently.

Mr. ROUSSELOT. I thank the gentleman for his comments. I support the Conable amendment and urge my colleagues to do so.

Mr. REGULA. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the Conable amendment.

Mr. Chairman, first I want to remind the sponsors of H.R. 50 and its supporters that the Conable amendment in no way reduces the bill's commitment to full employment. Instead, it attempts to improve and clarify the responsibilities and relationships between the various committees of the House. It amends portions of title III which were never in the bill reported by the Committee on Education and Labor.

As a member of the Committee on the Budget, I am concerned with potential problems posed by the Committee on Rules' substitute for title III. We all know the budget process is still in its infancy. It is now extremely difficult to get consensus on overall budget totals and on individual functional categories. Attempts at discipline and restraint generally fail. What we need to do is strengthen and improve the budget process, not complicate and weaken it further.

It makes no sense whatsoever to have two inherently separate tracks running at the same time, in the same direction, requiring substantial work and input from standing committees and putting House Members in the difficult position of having almost back-to-back votes on resolutions which appear to do the same thing but in fact do not. First, the Joint Economic Committee concurrent resolution, is a statement of principle and goals. The second, the budget resolution, is an action document which actually requires Congress to do something and live with it in the real world.

The Conable amendment seeks to eliminate this needless confusion and needless extra work and preparation on the part of the standing committees. The JEC, after all, was set up to be an advisory committee with no legislative powers. We ought to keep it that way. What my colleague from New York is proposing, with wide bipartisan support, I might add, is that we streamline and simplify the entire process. Yes, we want the JEC to give formal advice and counsel to the Committee on the Budget and the Congress on what it believes are the desirable fiscal and monetary policies for this country. But then let the Budget Committees in both Chambers sift through not only the JEC's advice, but that of all the other standing committees, and come up with what it thinks are appropriate bounds between all the competing demands. If the members of the JEC do not like what the Committee on the Budget reports out in its first concurrent resolution, provision is made for these JEC members to offer a separate substitute amendment to the first concurrent resolution on the budget on the House floor. This makes infinite sense to me, and it is a realistic, rational way to reconcile the conflicting views of many parties and many committees at one time in one place through the vehicle of the budget process.

Certainly at a time when inflation is of great concern to the American people, I think it wise that we, if anything, strengthen the Budget Committee process, that we give it an opportunity to work, and that we do not suddenly cut the ground out from under this effort on the part of the Congress to bring fiscal discipline to its responsibility for governing this Nation. I strongly support the Conable amendment as one of the important amendments to this bill to avoid destroying what we are now developing an effective way to deal with budget problems.

Mr. LEHMAN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in strong support of the Conable amendment to title III of the Humphrey-Hawkins bill. My support for this amendment does not represent opposition to full employment or to the bill. This amendment by merging the separate processes mandated by Humphrey-Hawkins and by the Budget Act into one unified economic planning process, will improve the House's ability to set economic goals to reach full employment. It will assure that the Federal budget, which influences our entire economy, is consistent with those goals, not in conflict with them.

The House already has a vehicle for economic planning and management, the House Budget Committee, which could easily carry out the purposes of Humphrey-Hawkins. Yet title III, by setting up a parallel resolution process, I believe will water down the House budgetary system.

The congressional budget process was a necessary reaction to recent threats to the balance of powers. It served to reaffirm Congress rightful historical and traditional control of the Federal purse-strings and to protect that right from the encroachments of a too-strong Executive.

It was also the clear intent of Congress in enacting the congressional budget procedures that the Budget Committee should have an active part in setting Federal fiscal policy in the context of the Nation's economic condition. Section 301 of the Budget Act requires that the report on the first resolution for each budget year include—

> The economic assumptions and objectives which underlie each of the matters set forth in such concurrent resolution.

The Federal budget and the economy are so closely interwoven that assumptions create goals and goals create assumptions. Without economic assumptions we could not estimate the revenue or outlay levels, which make up the budget, just as, without goals for the economy, we could not determine appropriate levels of fiscal activity. The House Budget Committee has a good track record in making accurate projections and in translating goals into spending and revenue targets.

The congressional budget process is working. It is no longer an infant in swaddling clothes, but it is still just a legislative toddler and needs our protection to become a robust segment of our fiscal process.

I am also concerned that the proposed two-resolution system will cause considerable confusion. Our constituents, deeply concerned about the cost of living and the effects of the Federal budget and deficit on the economy, are already dubious about the ability of Congress to manage economic policy. This new process is unlikely to be reassuring.

In supporting both the longer-term Humphrey-Hawkins goals set out in a Joint Economic Committee resolution, and the more specific but perhaps less optimistic fiscal year figures in a budget resolution, Members could find themselves casting contradictory votes on economic assumptions and fiscal policy recommendations. Worse would be passing the JEC resolution, then failing to pass the budget resolution, because it did not or could not meet Humphrey-Hawkins goals, or because the goals were too costly in terms of the Federal deficit, or because votes customarily committed to the budget resolution had been depleted by the earlier vote on the JEC resolution. In any case, the credibility of the House and Congress would suffer.

Mr. Chairman, I believe the Conable amendment will strengthen Humphrey-Hawkins. It will improve the ability of Congress to manage national economic policy. It will protect the Budget Committee's legal obligation to base its recommendations on what it believes are sound economic assumptions and workable goals. Finally, through the unified system, it will assure that the House considers economic goals together with specific budget policies and options, to be sure they complement each other and work together to serve the economic needs of the Nation.

Mr. Chairman, I urge the Members to join me in supporting this amendment to make Humphrey-Hawkins a better, more workable bill.

Mr. MINETA. Mr. Chairman, I move to strike the requisite number of words. I rise in support of the amendment.

Mr. Chairman, I rise in strong support of the Conable amendment to the

Rules Committee substitute for title III. In my opinion this is one of the most important amendments we will consider during our entire deliberation on the Full Employment and Balanced Growth Act. It is a simple amendment—a bipartisan amendment to eliminate some of the unnecessarily cumbersome and confusing procedures included in the Rules Committee substitute for title III.

If there is one thing I have learned in my 3 years in Congress, it is that procedure can often be as important as policy. Without a well-conceived, carefully designed implementation mechanism, the most laudable and wonderful ideas will amount to nothing. The Rules Committee substitute is simply not good congressional procedure—it carries unfortunate and potentially dangerous implications not only for the policies of H.R. 50, but for the vitality and integrity of the congressional budget process as well. I urge all of my colleagues to examine the procedures of title III as recommended by the Rules Committee—and decide for themselves whether or not they are necessary to the purposes of this full employment bill.

There are two points I feel it is important for my colleagues to consider.

First, if the Rules Committee substitute is enacted standing committees will be required to send separate March 15 views and estimates on their anticipated legislative business to two committees—the Joint Economic Committee and the Budget Committee. I for one do not feel that our already overburdened committee structure could stand the additional strain. It is highly likely that March 15 reports will become less and less meaningful under such a double reporting requirement.

Second, the Rules Committee substitute for title III calls for a separate concurrent resolution on economic policy to be reported by the JEC near the end of April. Thus, Members of the House will be called upon to vote at about the same time on two concurrent resolutions proposing fiscal policy—one from the Budget Committee and one from the JEC. I am fearful that this would make passage of the Budget Committee resolution quite difficult. Moreover, we would be risking the awkward situation where we might pass two resolutions with two different conclusions—all in the space of a few days. This would create needless confusion not only for Members, but also for the public.

I would submit to my colleagues that such cumbersome and confusing procedures are unnecessary and that it is very possible to integrate Humphrey-Hawkins goals and policies into the existing budget process without upsetting its desired objectives.

That is precisely what the Conable amendment does. It would eliminate the separate reporting requirement to the JEC and do away with their separate concurrent resolution. Instead, the JEC would report its views on the economy to the Budget Committee as it does now. Further, the JEC would be authorized to offer a privileged amendment to the budget resolution giving its views on how best to achieve full employment. This approach is eminently fair and feasible—it gives full-employment goals special stature, yet does not unnecessarily complicate the congressional budget process.

Mr. Chairman, as a Member of Congress who is committed to the goal of full employment, and as a Member of Congress who is committed to the preservation of the budget process, I urge my colleagues to consider carefully the procedures proposed by the Rules Committee and the alternative offered by Mr. CONABLE. I am sure you will conclude as I have, that his amendment deserves widespread and enthusiastic bipartisan support. It in no way attacks the goal of full employment.

Ultimately, I am convinced that the Conable amendment insures a viable congressional budget process and a real world attack on unemployment.

I urge my colleagues to vote yes on the Conable amendment to the Rules Committee substitute for title III of H.R. 50.

Mr. FRASER. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the Conable amendment to the committee amendment.

Mr. Chairman, I recognize the interest those of us on the Committee on the Budget have in maintaining as strong a role in the budget process and in the formulation of objectives as possible. However, I must say that as I examine the Conable amendment, I fear that its effect would be to strengthen the budget role at the expense of carrying out the objectives of the legislation.

What we need and what the bill, as reported by the Committee on Rules, provides is an independent effort to look at the problem of unemployment and to set out the necessary steps that need to be taken with the problems of unemployment. We need to deal with the question of what goals we are going to try to achieve, and we must do this independent of the framework of the budget process itself, or all of this effort will simply disappear under the waves of the very murky and difficult problems we face when we deal with the budget as a whole.

On the Committee on the Budget we deal with all kinds of problems: With defense spending, with welfare spending, with the problems affecting health, and how much we are going to do for education. The Humphrey-Hawkins objectives will simply disappear in the morass of considerations that the Committee on the Budget has to take into account unless we first fix those goals, talk about them, decide upon them, and then try to get the budget process to effectively account for those objectives as we go into the budget process itself.

In my judgment, the budget process will continue to work, but it will only work well in relation to the objectives of Humphrey-Hawkins if we keep the language as the bill proposes and as it came from the Committee on Rules.

Mr. CONABLE. Mr. Chairman, will the gentleman yield?

Mr. FRASER. I will be glad to yield to the gentleman from New York.

Mr. CONABLE. Mr. Chairman, I would like to ask the gentleman from Minnesota (Mr. FRASER) if he does not think, however, that the whole procedure of the Committee on the Budget will become secondary to the procedures set out for the Joint Economic Committee, and that in fact then we will only by making the decision just 2 weeks earlier than we have before. The Committee on the Budget thus will have become primarily an accounting committee; it will not be a budget committee at all, making real fiscal decisions. Either I will be rubber stamping the Joint Economic Committee, or diverging from its targets and goals only 2 weeks after adopting them.

Mr. FRASER. No, I think it is just the opposite. The problem that we face on the Budget Committee is that we go through each individual item and, as we look at obligations and outlays, we have to reconcile the different inputs that come from the various committees. This includes a wide range of spending and revenue possibilities. It seems to me that this objective of trying to fashion aggregate policy to deal with the unemployment problem is going to get lost. We need to deal with the problems that are inherent in the objectives of this bill, and I think we have to focus on them separately and then try to work with the budget and see if we can reconcile it with the goals we establish.

I have one question I would like to raise with the author, and that is with respect to the problem of setting objectives for unemployment or employment for subgroups in the labor force. For example, can we establish goals for nonwhite teenagers?

I would like to get a reply from the gentleman as to whether these kinds of numerical goals could be incorporated in the resolution that would come from the Joint Economic Committee.

Mr. BOLLING. Mr. Chairman, if the gentleman will yield, my understanding is that, while it is not required, it would be permissible on such goals. Disaggregate as opposed to aggregate.

Mr. FRASER. Mr. Speaker, I want to thank the gentleman from Missouri for his response. That was my understanding as well with respect to the meaning of title III. This matter of setting disaggregate goals and of analyzing the President's proposals in terms of their impact on the employment and unemployment situation of subgroups within the labor force is a matter of critical importance.

A glance at the unemployment statistics reveals the extent to which our unemployment problem is a problem of inequality. For January of this year the unemployment rates were:

[In percent]

White males 20 years and over	4.0
Nonwhite males 20 years and over	9.8
White females 20 years and over	5.5
Nonwhite females 20 years and over	10.8
White teenagers	13.7
Nonwhite teenagers	38.7

This is more than a matter of the business cycle. Over the last 20 years the percentage of nonwhite teenagers with a job has fallen steadily, in good times and in bad times. Today only one nonwhite teenager in four has a job.

The House Budget Committee's Task Force on Distributive Impacts of Budget and Economic Policies, which I chair, has spent several months looking into this matter of the unemployment rates of subgroups of the population. My own belief is that this is probably the most serious part of our unemployment problem.

In preparation for the first budget resolution for fiscal 1979 we have attempted to determine what impact the President's budget proposals will have on the employment and unemployment levels of those suffering from the highest levels of unemployment. We have sought answers from the administration, but so far, they have either been unwilling or unable to provide the answer. We have sought an analysis from the Congressional Budget Office, and I am hopeful that they will respond. Our meager experience with this area has shown that much more economic research needs to be done, and that higher priority must be given to the unemployment problems of subgroups.

I expect that a year from now, when we are enacting the concurrent resolution provided for in title III, this issue of goals for subgroups of the population will be a central issue. The fact that title III permits the inclusion of specific numerical goals for these subgroups we will be in a position to go beyond vague assurances that "we are doing the best we can." We will have a criterion for assessing the adequacy of programs and policies. It is my hope that when the adequacy of programs ond policies. It is my hope that when the Joint Economic Committee analyzes the President's economic report, it will pay particular attention to this issue.

Mr. OBEY. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the Conable amendment to the committee amendment.

Mr. Chairman, I am in an embarrassing position here because for the last 4 days I have been telling everybody who would listen that I thought they ought to vote for the Conable amendment. And I am in the embarrassing position of asking them now to forget everything that I suggested that they do for the last 4 days. The reason for that is very simple. I misunderstood the Conable amendment 4 days ago.

Mr. Chairman, I do not like what is in title III. I frankly think that the process that is in title III is overly complicated. I think it almost hopelessly fragments the process. I do not like the fact that under the present title III you will have the House voting on the Joint Economic Committee resolution 1 month, which I think will be an easy political vote, and then a month later, when the budget resolution comes along and the only new factor added to that is the deficit, you will have the conservatives bailing out, because they are not going to want to vote for any deficits, and you will have the liberals bailing out because they will not like the fact that the budget resolution will not be as liberal as the Joint Economic resolution will be. As a consequence, you will have a bail-out on both sides, and the budget resolution is in a terrible position from the standpoint of passing.

I thought that is what the Conable amendment corrected by making the two resolutions one and in fact then having us vote on all of those specific targets in the budget resolution. The fact that I misunderstood was not the fault of the gentleman from New York (Mr. CONABLE). It was my own fault. But I just want to suggest that I think that the Conable amendment is dangerous because it goes beyond what I thought we were going to do to clean up the problems in title III. Not only does the Conable amendment fuse the two processes into one and simply divert the Joint Economic Committee resolution to the Budget Committee, but it also, for all practical purposes, eliminates the opportunity of this House to ever obtain a direct vote on items like unemployment, like employment, growth, all of the specific items which are contained in the Humphrey-Hawkins approach. I did not want to lose the ability of the House to vote on those specific targets. I did want to make the process on which we voted on those targets more rational.

I thought that is what the Conable amendment did; but it, in fact, does not do it.

Really, Mr. Chairman, I do think that it does gut the purpose of this bill, so I would urge the people who were listening to me with great attention 2 days ago to forget everything I said and vote against this amendment.

Mr. CONABLE. Mr. Chairman, will the gentleman yield?

Mr. OBEY. I yield to the gentleman from New York.

Mr. CONABLE. Mr. Chairman, the gentleman does acknowledge that the budget report must set forth a target for growth and for lessening unemployment and inflation and that that becomes one of the issues when the budget comes up.

Mr. OBEY. Surely; I agree with the gentleman.

Mr. CONABLE. At that point we can address these issues with the full expertise of the Joint Economic Committee available to us. They would have studied the same figures that are presented to the Committee on the Budget and all these things will be available for the record.

Mr. OBEY. I grant those things will be contained in the committee report; however, having served on the Committee on Appropriations and knowing how easy it is for people to ignore what is in a committee report, I do not think that that does the job. I think that every Member of this House deserves an opportunity and, in fact, has an obligation to vote on specific targets for employment, for unemployment, for growth, et cetera. I regret that the gentleman's amendment does not offer that opportunity.

Mr. CONABLE. Mr. Chairman, if the gentleman will yield further, I deeply regret that we should be put in a position to vote seriatim for a lot of inconsistent things. I think we have to make a basic decision with full awareness of the goals of the Humphrey-Hawkins bill, if that is the will of the House, and with full awareness of the other things that have to be considered as part of fiscal policy.

Mr. OBEY. I recognize that that is a legitimate viewpoint. As I said, my problem is that I think there is a great deal of wisdom on both sides.

I do want to make it quite clear, however, that I oppose the Conable amendment because I do not think that the Conable amendment does the job that needs to be done.

The CHAIRMAN pro tempore. The time of the gentleman from Wisconsin (Mr. OBEY) has expired.

(By unanimous consent, Mr. OBEY was allowed to proceed for 2 additional minutes.)

Mr. OBEY. To continue, Mr. Chairman, I doubt very much that anyone will see this Member voting for the Humphrey-Hawkins bill in the form in which it now stands, if that is the way it comes back from conference. I would hope very much that when this bill comes back from conference, this whole title III process will be cleaned up and streamlined so that we can have the opportunity to vote on the specific goals, as the resolution now provides, but under a much more simplified process, which I think is what the gentleman from New York (Mr. CONABLE) is trying to get at, although imperfectly, in this amendment.

Mr. ULLMAN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I am afraid that what this bill would do is follow what we did so disastrously in dealing with the small businesses, farmers, and other citizens of this country in burying them in paperwork.

What President Carter is trying to do—and I am fully supportive of what he is trying to do—is to move back to the point where we can make one set of reports do for a number of agency reports and purposes.

That is exactly what we ought to be trying to do here in this Congress. I thought my friend, the gentleman from Wisconsin (Mr. OBEY), pointed up the issue very, very clearly as to why he opposed that provision of the bill and suggested that he was not going to vote for the bill if that provision stays in it. I think I find myself in that same posture.

A sensible system of reporting should be set by the Congress. We ought to be setting the examples by laying out one set of reports for the committee which would go to the Committee on the Budget. That would include the kind of data that would be important for all of the other committees and would be something that the Joint Economic Committee should use.

Mr. Chairman, the Conable amendment may not be perfect, but I strongly support it.

I do not agree with my friend from Wisconsin as to the Conable amendment. I think that this one report to the Budget Committee, with a copy to the Joint Economic Committee, ought to do what we want to do in the way of coordination. At some point, if this is not adequate, we can change the reporting procedure, but certainly that should be the premise that we work from.

It is my hope that the Conable amendment will carry, and we will not add to the existing reporting procedures that have already brought an onerous burden on the legislative committees. The committee chairmen and committees already have a really difficult problem in reporting to look that far ahead in the budgas witness our problem this year, and many other committee problems in trying to look that far ahead in the budgeting process. But now, if we say that in addition to that, and prior to that, we have to make other determinations, Members are putting us in a totally impossible position. If we bring the house of cards down around our heads, we cannot say that we have not been warned, because we can bury ourselves in paperwork just as we helped to bury the business community in paperwork. It is my hope that we can stay with one report, and the only way we have of achieving that is to adopt the Conable amendment.

Mr. PICKLE. Mr. Chairman, will the gentleman yield?

Mr. ULLMAN. I yield.

Mr. PICKLE. Aside from the problems the Ways and Means Committee and the Budget Committee would have in coordinating with the Joint Economic Committee, I understand that there would be a further problem with respect to the Federal Reserve. I understand that yesterday the new Chairman of the Federal Reserve testified before a committee on the other side of the Capitol, that he thought title III would weaken the Federal Reserve and did not think it was advisable. I have not seen that in print, but I have been told that is what he said.

If that is so, I think it ought to be verified. I am very disturbed about that.

Mr. CONABLE. Mr. Chairman, will the gentleman yield?

Mr. ULLMAN. I yield.

Mr. CONABLE. The article to which the gentleman refers is on the financial page of the Washington Post, which of course is always correct. It said:

> He (Mr. Miller) said he thinks it would be bad if the Humphrey-Hawkins bill now being debated in Congress eroded the role of the budget committees in setting Federal spending and taxing policies.

Mr. ULLMAN. I thank the gentleman, and I think we are getting into a very dangerous area.

Mr. DERRICK. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the Conable amendment.

Mr. Chairman, this body has tried twice—three times—in this century to develop a budget process. The budget process in the House is still in the embryonic stage. I support the Humphrey-Hawkins bill, and I also support the budget process. I say to the Members that if we leave the title III as it is without amending it, as the Conable amendment suggests, that the practical politics of the situation are going to be these:

When the Joint Economic Committee resolution comes out, the Members of the House will have an opportunity to vote for all kinds of great things, but when the Budget Committee resolution comes around several weeks later—and we have had some difficulty getting it passed under the most ideal circumstances—it will give those Members who might be inclined to do so the opportunity to bail out, because unfortunately, in the last several years the deficit has become the high visibility item in the budget resolution.

It will simply give those Members who are inclined to do so an opportunity to go back to their constituents and say, "Yes, I voted for all the great goals of the Humphrey-Hawkins bill and that resolution, but yet I voted against that nasty old deficit and those other things that are in the budget resolution."

Now, one of the great things about the budget resolution, I think, is that inner discipline it brings when we vote on the budget resolution, because we are required at that time to vote for outlays for the debt ceiling and for the deficit.

With title III remaining as it is now, the House would no longer be subject to this discipline. And for that reason I think it would have a disastrous effect on the budget process, which I believe is working so far, but which needs to gain a great deal more strength.

I find myself in a rather precarious position, because I know the chairman of the Joint Economic Committee was one of the prime sponsors of the budget resolution and this is a difference in perception on our parts with regard to the effect that title III will have on the budget process. I think it will do it irreparable harm, and for that reason I suggest to the Members and I ask that they support the Conable amendment. I believe that by doing so we can accomplish the laudable objectives of H.R. 50 as well as the budget process.

Mr. PATTISON of New York. Mr. Chairman, will the gentleman yield?

Mr. DERRICK. I yield to the gentleman from New York.

Mr. PATTISON of New York. Mr. Chairman, I thank the gentleman for yielding and I thank him for his statement, to which I subscribe.

It seems to me we are getting ourselves into another situation that is similar to the situation which exists with the debt ceiling, where we vote on the budget at one point mandating a particular debt ceiling, I mean just without any question about it, and then we come and vote on the increase in the debt ceiling, and a lot of people who voted for the budget vote against the debt ceiling, because that gives them a chance to vote for the spending at one point and against it at another point.

It seems to me we are setting up another circumstance where that very thing will occur and we will find ourselves accomplishing less and less because of that sort of thing.

Mr. DERRICK. I certainly agree with the gentleman from New York, and for that reason I believe we ought to include it in the budget resolution on a one-time basis; let us vote on it all together.

Mr. PATTISON of New York. I am sensitive to what the gentleman from Wisconsin (Mr. OBEY) said, but it seems to me it is within the Budget Committee's ability to come out under the Conable amendment with not only the macro assumptions for the 16 categories but also with whatever assumptions it bases those on and allow the House to vote on those assumptions. I guess that is possible under the budget resolution.

Mr. DERRICK. It is my understanding that the budget process has that within its jurisdiction; yes.

Mr. PATTISON of New York. I also understand the Budget Committee is thinking very seriously of coming out on that basis. I think it would be very healthy. I urge them to do so.

I thank the gentleman for yielding.

Mr. DERRICK. I thank the gentleman from New York for his remarks.

Mr. OBEY. Mr. Chairman, will the gentleman yield?

Mr. DERRICK. I yield to the gentleman from Wisconsin.

Mr. OBEY. Mr. Chairman, the gentleman and I are on the same committee. I feel very strongly about the preservation of the budget process, but I think I heard him say he was for this.

The CHAIRMAN. The time of the gentleman from South Carolina (Mr. DERRICK) has expired.

(On request of Mr. OBEY, and by unanimous consent, Mr. DERRICK was allowed to proceed for 1 additional minute.)

Mr. OBEY. Mr. Chairman, if the gentleman will yield further, I think I heard the gentleman say he was for the Humphrey-Hawkins proposal and for this Conable amendment.

Mr. DERRICK. With the exception of title III.

Mr. OBEY. I would ask the gentleman this: Why is it necessary in the process of obtaining what the gentleman and I both think is necessary, which is a one-resolution system, why is it necessary to wipe out the House's guaranteed ability to vote on growth and unemployment and inflation?

Mr. DERRICK. The House will be able to vote on all those things under the budget resolution as constituted in this amendment.

Mr. OBEY. No, it is not. That is not spelled out in this amendment. If the Budget Committee chose to do that, they could bring it out, but it is not guaranteed that the Budget Committee will do that.

Mr. DERRICK. Very little is guaranteed around this place.

Mr. OBEY. Do not kid yourself. Anyone who votes for this amendment votes to wipe out the thrust of the Humphrey-Hawkins bill.

Mr. DERRICK. I do not agree with the gentleman.

The CHAIRMAN. The time of the gentleman from South Carolina (Mr. DERRICK) has expired.

(On request of Mr. ROUSSELOT, and by unanimous consent, Mr. DERRICK was allowed to proceed for 2 additional minutes.)

Mr. DERRICK. Mr. Chairman, I want to say it bothers me that we are on the same side of this issue.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. DERRICK. Yes; I yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Chairman, I think we should respond to our distinguished colleague, the gentleman from Wisconsin (Mr. OBEY), by saying that the budget resolution has five aggregates and those aggregates definitely relate to the whole issue being discussed here in the Humphrey-Hawkins bill. I think the gentleman from South Carolina (Mr. DERRICK) is correct when he says that the budget resolution, when it comes, is the aggregate work of a number of committees that have come together in one place. The Joint Economic Committee reports to the Committee on the Budget on its recommendations on these issues. So I think definitely related in the report of the Committee on the Budget are the aggregates which definitely relate to the subject which the gentleman addresses himself to.

Mr. DERRICK. I thank the gentleman.

Mrs. CHISHOLM. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the Bolling substitute to title III of H.R. 50, the Humphrey-Hawkins Full Employment and Balanced Growth Act.

It seems as if many of my colleagues are confused as to the purpose of title III, specifically the Bolling substitute. They are asking how it affects the responsibilities of their committees and, more importantly, how it affects the budget process. At first glance, I too was confused, therefore, I am concerned that my colleagues will fail to pass this amended substitute primarily due to a lack of understanding of the ultimate effect and purpose of title III.

If we study the legislation before us, we will realize that H.R. 50 is not a manpower bill, but is an economic policy bill which speaks to the goal of achieving full employment within our Nation in a reasonable period of time. Title III establishes a mechanism by which the Joint Economic Committee can review the goals required by this legislation by taking the President's joint economic report and coordinating with the objectives and activities of the standing committees of the House and Senate. Through a timetable which complements that of the Budget Committee, the Members will have for the first time, the opportunity to discuss the findings of the Joint Economic Committee in the open on the floor of the House and Senate.

You may ask, Why is this important? Why is this necessary? The House Budget Committee is limited to the review of Federal programs. While Federal spending and Federal policies are playing an increasingly large role in our economy, it is by no means the only factor we need to look at. Demographic trends, new techniques in economic forecasting, changes in the international money market, activity in the private sector and many other ingredients need to be examined if we are to have a comprehensive integrated economic plan. While the Budget Committee looks at Federal spending, the Joint Economic Committee looks at all aspects of our economy. We need both views if we are to achieve a unified approach.

Further, a clearer understanding of the interrelationship between activity in the Federal sector and the private sector will make us better prepared to deal with, and make intelligent and informed decisions in the Federal arena. The state of the economy affects the initiatives Congress must take through legislation which is directed at relieving unemployment, inflation, and monetary and fiscal disruption. When has this body, as a group, had the opportunity to meaningfully discuss how our activities affect the economy in a wholistic sense? We have not had such an opportunity, but its time is long overdue.

Some of my colleagues will argue that title III destroys the budget process. This is not true. The findings of the Joint Economic Committee's concurrent resolution are not binding on the concurrent budget resolution. Yet, we must first establish a framework that makes Members of Congress aware of the ramifications of the Budget Act. We do not have a framework; we legislate as if the beginning and end of the world rests on the Federal programs and policies we produce. This is not the way we should work. Congress must address those programs and policies which not only affect macroeconomic budgetary concerns of the Nation, but those policies which will benefit those who suffer the consequences of severe unemployment and economic displacement. Without access to a Joint Economic Committee framework which encompasses factors of the entire economy, we cannot relieve these problems, and we will continue to treat them in a case-by-case, slip-shod fashion.

Efforts are being made to turn the findings and recommendation of the Joint Economic Committee into an amendment of privilege to the budget resolution. I think this is the wrong approach. The solution reported by the Joint Economic Committee covers both the private and public sectors of the ecoomy, on the other hand, the Budget Act deals primarily wtih the Federal share of the economy. An amendment of privilege, therefore, would be based on things like productivity goals for the private sector, projected increases in real growth, as well as goals for reducing youth and adult unemployment. If an amendment is based on these factors, it seems inappropriate for it to be an ancillary item attached to the Budget Act.

In addition, these are other concerns which have materialized as a result of Mr. BOLLING's substitute. I would like to respond to them briefly.

According to the substitute, each legislative committee is to file a report with the Joint Economic Committee outlining its goals and objectives for reducing unemployment for the upcoming year. Members are complaining that the budget report is too hard to produce and too lengthy to require another report due at the same time for a different committee. I do not think this is a legitimate reason for doing away with title 3. I think the committees can follow the same format for their report as the one submitted to the Budget Committee. The differences in the reports would be a shift in emphasis and detail as to how the programs authorized by a committee will reduce unemployment.

I am not denying that this substitute will ultimately mean additional responsibility for the Members and their committees. But for too long we have abrogated our responsibilities to the executive branch. We as the elected representatives, need to take a stronger role in shaping economic policy. Our current budget process does not encompass the entire scope of the economy, nor is it structured in such a way to correct the crime that this country has allowed, which, as you well know, is unemployment. People are unemployed not because they do not want to work. They are unemployed because our economic policies permit them to be. Congress must reemerge as the true leaders of this Nation by resetting the economic priorities of the Nation. Our priority should be full employment. We must therefore, pass the Humphrey-Hawkins bill with title 3 intact, so that we have an ongoing role in the reduction of unemployment.

Mr. MITCHELL of Maryland. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the Conable amendment.

Mr. Chairman, I am a very, very fortunate man in a very fortunate position. This may not be the thinking of many of the Members of the House. I am fortunate in that I serve on the House Committee on the Budget. I am fortunate in that I have just gotten on the JEC, and I am fortunate that I serve on the Domestic Monetary Policy Subcommittee of the Committee on Banking, Finance, and Urban Affairs. Therefore, I think I am in a position to address the problems raised by the amendment offered by the gentleman from New York (Mr. CONABLE) from the point of view of the Committee on the Budget, the JEC, and also the Domestic Monetary Policy Committee which is directly related to the Federal Reserve.

The thing that has disturbed me the most in the debate on this is that whenever something new comes up, we always look at it as a possibility of creating another problem area.

In my mind, title III does not do that. It should not be a problem at all. I look on it as an opportunity for a greater working together between the Budget Committee and the JEC. Why must we always be so fearful in looking at new developments as problems? The language gives us a golden opportunity to say we can work far more closely in the budget with JEC than we have in the past; so it is an opportunitv, not a problem area.

Mr. Chairman, there are a couple other comments I would like to make. I think my distinguished colleague, the gentleman from Wisconsin (Mr. FRASER) was absolutely right when the gentleman said it was virtually impossible for the Budget Committee to track through the steps necessary to achieve full employment under this legislation.

Now, that is in no way disrespectful of the ability of the members of the Budget Committee. I have seen how hard the distinguished gentleman from New York (Mr. CONABLE) works and all the

members work hard; but in light of the weight of work we have on us, it is virtually impossible for the Budget Committee to take on the task of tracking through to full employment and carry on the same responsibilities that we have now.

Let me state quite candidly, I am chairman of the Task Force on Human Resources of the Budget Committee. Obviously, the bulk of employment recommendations would come through my task force and, obviously, I am not prepared, nor is the membership of the committee prepared, to follow through with the added responsibilities imposed by Humphrey-Hawkins.

I suggest another thing for our consideration. It seems to me under the Conable amendment, whatever JEC would recommend, would, at best, appear as a kind of appendage to the budget resolution. It might luckily appear in the conference report or in the committee report on the budget resolution. That goes back to the point that my colleague, the gentleman from Wisconsin, raised. The fact is that the gentleman wants people to have an opportunity to vote. Can any Member of this House remember a time when we voted on the language in a conference report? It does not happen that way.

Mr. CONABLE. Mr. Chairman, will the gentleman yield?

Mr. MITCHELL of Maryland. I yield to the gentleman from New York.

Mr. CONABLE. Mr. Chairman, I would call the gentleman's attention to the hearings in the Senate, the other body, before the Committee on Banking, Housing and Urban Affairs, in which Senator HUMPHREY said with respect to a question by Senator TOWER about title III:

> Senator TOWER. Now title III of the bill would assign some rather sweeping powers to the Joint Economic Committee. As a matter of fact, committees of the Congress would be required to submit their comments to the JEC and Governors of the States would, and JEC would make recommendations on monetary policy. The Budget Committee would be required to carry out JEC recommendations.
>
> Are we not in effect establishing the JEC as a virtual economic czar within the Congress?
>
> Senator HUMPHREY. No. My judgment is that it should be a committee that is sufficiently developed in every way—membership, staff and so on—to give broad economic counsel—

And that is the issue before us in a similar manner—

> and advice to the Congress. If it isn't so at the present time, then we can make it so. However, I am not addicted to a particular committee jurisdiction. I don't think that's the most important part of the bill. I do think that the Joint Economic Committee can play a very significant role and it ought to. It was set up under the Employment Act as the counterpart to the President's Council of Economic Advisers. It is supposed to be the economic advisory body of the Congress. Whether it has fulfilled that function properly or not is subject to debate and argument, but I think it could be.
>
> Again, may I say that's a part of the bill that I look upon as subject to amendment or adjustment as you may deem necessary. The important part of this bill is title I, the economic policy mechanism, and those features in title II that I think are supplementary to making this bill really produce the results that it's designed to achieve.

In other words, Senator Humphrey himself considered the role of the Economic Committee subsidiary and I would urge the gentleman not to ask the House to accept measures that might well break down our struggling budget procedures.

Mr. MITCHELL of Maryland. Mr. Chairman, I thank the gentleman from New York.

That was a situation similar to, but not the same as what we are dealing with the right now. That same kind of thing does not apply to the proposition before us.

Mr. FISHER. Mr. Chairman, I move strike the requisite number of words. I rise in support of the substitute amendment.

Mr. Chairman, I have been listening carefully to the debate on this matter and I have come to the view that we would be better off to adopt the Conable substitute. Not that that is perfect, but I think it is a better way to proceed.

I have two reasons that I wish to bring out in support of this position. First, I think that having two concurrent resolutions coming along more or less at the same time and in some respects covering much the same territory will be confusing. Unfortunately, the original substitute presented by the gentleman from Missouri (Mr. BOLLING) carries with it no way that I can see for reconciling differences between these two resolutions.

When we come forward with the economic resolution, it seems to me that Members are likely to be in a more expansive frame of mind and vote accordingly, and when much the same information comes forward in the budget resolution, I think Members will not be that expansive and we will find ourselves in conflict in basic ways over the space of a couple of weeks.

The amendment offered by the gentleman from New York (Mr. CONABLE) does get at this problem. It may not do it perfectly, and what is the word the gentleman used? It tries to "meld" the two, and that, it seems to me, is preferable.

Mr. Chairman, my other reason for supporting the Conable amendment is that I have some distrust for setting out numerical goals in legislation and in statutes for such things as inflation, employment, productivity, income, and the like. I prefer setting these goals forward as guidelines in reports and in the way of backup information, as is done under the Budget Act, so that this kind of information goes into the report and not into the resolution.

Let me illustrate that further. Suppose we put in legislation a goal for employment, as we are attempting to do in Humphrey-Hawkins, of 4 percent. Fine. We aim toward that. A conservative President, let us say, or a conservative Congress will say, "Aha! The way to get 4 percent is to cut expenditures, cut programs, and in that way stimulate the private economy, and in that way we will get there."

A liberal President or a liberal Congress will say, "Oh, yes, 4 percent, that is a good goal. Let us move toward that, and we will do it by spending more for jobs and perhaps cutting taxes."

So although we have the appearance of a specific goal and we have a number, we still have wide open the kinds of measures that can be brought forward to achieve the goal.

As I say, I am somewhat distrustful of elevating these numbers to this position of importance by placing them in statutes and requiring them to be voted on in that form.

So, Mr. Chairman, for these two reasons: First, the confusion that the two resolutions will bring; and second, my general discomfort with numerical goals—it does seem to me the Conable way forward is preferable.

Mr. BOLLING. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the committee amendment.

Mr. Chairman, I hesitate a little bit to make this speech. A couple of business publications which are against Humphrey-Hawkins have tried to make this a personal matter as far as I am concerned by saying that my substitute is based on the fact that I was the chairman of the Joint Economic Committee.

Well, I am the chairman of the Joint Economic Committee, but I will not be the chairman of the Joint Economic Committee when Humphrey-Hawkins goes into effect. Furthermore, I was the leader of the House conferees when the Budget Act went into effect.

I was enormously impressed by the debate. There was a speech made by the gentlewoman from New York (Mrs. CHISHOLM) which showed a real understanding of what Humphrey-Hawkins is and what the Budget Act is.

Something that has been ignored in the debate is that Humphrey-Hawkins is an amendment to the Employment Act. The Employment Act has been in place since 1946, and it provided a procedure by which the Congress worked toward goals. It set up a Council of Economic Advisers and the Joint Economic Committee.

I perhaps would be better off if I sort of left it at that. But I have been impressed by another fact in the debate. I know the problem that people have when they have a self-interest in a matter. It is enormously difficult to disassociate yourself from your own self-interest. The greatest compliment that I have ever heard paid Harry Truman and George Marshall—and it was paid to both together—was that they were able not to allow their egos to come between themselves and their work. I like to think that if I have a self-interest in this matter that it balances out, that I have a vested interest in having had something to do with the overwhelming passage of the Budget Act and in my work over the years on the Joint Economic Committee. That is not the point, nor is it really the

point that the author of the amendment and his principal supporter on his side have so voted on the amendments to Humphrey-Hawkins that it is relatively clear that they do not favor the bill. With one exception, the problem that I might have might be the problem of all but one of the speakers on this side, because with virtually no exception they are all members of the Budget Committee.

I think it is possible to decide this on the basis of merit and not on the basis of guilt by self-interest or guilt by association. But remember that the bill we are working on is the Humphrey-Hawkins Act. Only one item before the House provides for the implementation of that act specifically, and that is the so-called Bolling substitute to the similar provisions of the Humphrey-Hawkins Act as reported by the Committee on Education and Labor.

If the Members want to implement Humphrey-Hawkins, they only have one vote.

The CHAIRMAN pro tempore. The question is on the perfecting amendment offered by the gentleman from New York (Mr. CONABLE) to the committee amendment.

The question was taken; and the Chairman pro tempore being in doubt, the committee divided, and there were—ayes 29, noes 18.

Mr. BOLLING. Mr. Chairman, I demand a recorded vote and, pending that, I make the point of order that a quorum is not present.

The CHAIRMAN pro tempore. The Chair will count. Sixty-one Members are present, not a quorum.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

QUORUM CALL VACATED

The CHAIRMAN pro tempore. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to rule XXIII, clause 2, further proceedings under the call shall be considered as vacated.

The committee will resume its business.

RECORDED VOTE

The CHAIRMAN pro tempore. The pending business is the demand of the gentleman from Missouri (Mr. BOLLING) for a recorded vote. Does the gentleman insist upon his request?

Mr. BOLLING. I do, Mr. Chairman.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 259, noes 153, not voting 22, as follows:

[Roll No. 161]

NOT VOTING—22

Akaka	Huckaby	Ryan
Anderson, Ill.	Krueger	Sikes
Baucus	McClory	Simon
Buchanan	Nolan	Teague
Clausen, Don H.	Pursell	Thornton
Flood	Rahall	Tucker
Frey	Robinson	Young, Alaska
	Runnels	

The Clerk announced the following pairs:

On this vote:

Mr. Sikes for, with Mr. Rahall against.

Mr. Krueger for, with Mr. Flood against.

Mr. Baucus for, with Mr. Akaka against.

Mr. ZEFERETTI and Mr. FITHIAN changed their vote from "no" to "aye."

Messrs. WAXMAN, BYRON, and MOFFETT changed their vote from "aye" to "no."

So the perfecting amendment to the committee amendment was agreed to.

The result of the vote was announced as above recorded.

The CHAIRMAN pro tempore. Are there additional amendments to the committee amendments? If not, the question is on the committee amendment, as amended.

The committee amendment, as amended, was agreed to.

The CHAIRMAN pro tempore. The Clerk will read title IV.

The Clerk read as follows:

TITLE IV—GENERAL PROVISIONS

NONDISCRIMINATION

SEC. 401. (a) No person in the United States shall on the ground of sex, age, race, color, religion, or national origin be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity funded in whole or in part with funds made available under this Act, including membership in any structure created by this Act.

(b) Whenever the Secretary of Labor determines that a recipient of funds under this Act has failed to comply with subsection (a), or an applicable regulation, he or she shall notify the recipient of the noncompliance and shall request such recipient to secure compliance. If within a reasonable period of time, not to exceed 60 days, the recipient fails or refuses to secure compliance, the Secretary of Labor may—

(1) refer the matter to the Attorney General with a recommendation that an appropriate civil action be instituted;

(2) exercise the powers and functions provided by title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d et seq.); or

(3) take such other action as may be provided by law.

(c) When a matter is referred to the Attorney General pursuant to subsection (b), or whenever he or she has reason to believe that a recipient is engaged in a pattern or practice in violation of the provisions of this section, the Attorney General may bring a civil action in the appropriate United States district court for any and all appropriate relief.

(d) To assist and evaluate the enforcement of this section, and the broader equal employment opportunity policies of this Act and the Employment Act of 1946, the Secretary of Labor shall include, in the annual Employment and Training Report to the President under section 705(a) of the Comprehensive Employment and Training Act of 1973, a detailed analysis of the extent to which the enforcement of this section achieves affirmative action in both the quantity and quality of jobs, and for employment opportunities generally.

LABOR STANDARDS

SEC. 402. (a) Any new programs provided for and implemented by this Act, and funded in whole or in part through this Act, shall provide that persons employed pursuant to such policies and programs are paid equal wages for equal work, and that such policies and programs create a net increase in employment through work that would not otherwise be done or are essential to fulfill national priority purposes.

(b) The President shall insure that any person employed in any reservoir project undertaken under section 206(c) which requires an authorization of appropriations by the Congress, or in any other job utilizing funds provided in whole or in part under this Act, shall be paid not less than the pay received by others performing the same type of work for the same employer, and in no case less than the minimum wage under the Fair Labor Standards Act of 1938. No person employed under section 206(c) shall perform work of the type to which the Bacon-Davis Act (40 U.S.C. 276a—276a-5) applies.

(c) Any recommendation by the President for legislation to implement any program under this Act or the Employment Act of 1946 requiring the use of funds under such Acts, and submitted pursuant to the requirements of such Acts, shall contain appropriate wage provisions based upon existing wage standard legislation.

DEFINITION

SEC. 403. For the purposes of utilizing the programs and policies toward reducing the amount of unemployment under this Act and the Employment Act of 1946, the term "State" includes the several States, the District of Columbia, Puerto Rico, Guam, the Virgin Islands, the Northern Marianas, and American Samoa.

AUTHORIZATION OF APPROPRIATIONS

SEC. 404. There is authorized to be appropriated such sums as may be needed to carry out the provisions of this Act and of the Employment Act of 1946. Nothwithstanding any other provision of this Act or of the Employment Act of 1946, no such provision shall be construed to require expenditures in excess of amounts appropriated pursuant to such Acts.

Mr. HAWKINS (during the reading). Mr. Chairman, I ask unanimous consent that title IV be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

AMENDMENTS OFFERED BY MR. HAWKINS

Mr. HAWKINS. Mr. Chairman, I offer amendments.

The Clerk read as follows:

Amendments offered by Mr. HAWKINS: At the end of the bill, add the following new section:

EFFECTIVE DATE

SEC. 405. The provisions of this Act, and the amendments made by this Act, shall take effect on October 1, 1978.

In the table of contents for the bill, insert the following new item after the item relating to section 404:

SEC. 405. Effective date.

On page 104, line 22, strike "affirmative action" and insert in lieu thereof "positive results".

Mr. HAWKINS. Mr. Chairman, these amendments are merely clarifying.

Mr. Chairman, the first amendment merely makes the act effective on October 1, 1978, and this is to conform with the Congressional Budget Act of 1974. This amendment honors a commitment which we have made to the Committee on the Budget that the effective date will be subject to the act.

The second amendment merely clarifies the language which is found on page 104 relating to the enforcement of that provision and which uses the words:

. . . achieves affirmative action in both the quantity and quality of jobs . . .

That language has led to some misunderstanding, so we have inserted what the original intent was, and that is "positive results" in place of "affirmative action."

Mr. Chairman, that is the effect of the amendment. It substitutes "positive results" for "affirmative action."

Mr. SARASIN. Mr. Chairman, will the gentleman yield?

Mr. HAWKINS. I yield to the gentleman from Connecticut.

Mr. SARASIN. Mr. Chairman, I rise in support of the amendments offered by the gentleman from California (Mr. HAWKINS), and on this side we accept the amendments.

The CHAIRMAN pro tempore. The question is on the amendments offered by the gentleman from California (Mr. HAWKINS).

The amendments were agreed to.

AMENDMENT OFFERED BY MR. DODD

Mr. DODD. Mr. Chairman, I offer an amendment.

The clerk read as follows:

Amendment offered by Mr. DODD: In section 401 of the bill, insert at the end of subsection (a) the following new sentence: "Any prohibition against discrimination with respect to an otherwise qualified handicapped individual as provided in section 504 of the Rehabilitation Act of 1973 shall also apply to any such program or activity.".

Mr. DODD. Mr. Chairman, my amendment is a very simple and straightforward one. It would insure that the handicapped are extended the same protections under the Full Employment and Balanced Growth Act as they currently have under the Revenue Sharing Act, the Comprehensive Employment and Training Act, and many other Federal statutes.

I have discussed this matter with my distinguished colleague from California (Mr. HAWKINS) and he has informed me that he will support this amendment and in fact that it was an oversight that the handicapped were not included in section 401 of the bill as reported.

Since the enactment of the Rehabilitation Act of 1973, the handicapped have enjoyed the promise of protection against discrimination in programs or activities receiving Federal financial assistance. Unfortunately, it was not until May of 1977 that regulations implementing section 504 of the Rehabilitation Act were signed and this promise became a reality.

While in the past there has been considerable foot-dragging by the executive agencies in implementing these protections for the handicapped, the Congress has consistently supported including the handicapped among those protected against discrimination. Both the majority and the minority versions of legislation now pending in the Subcommittee on Civil and Constitutional Rights of the Committee on the Judiciary contain provisions which would include the handicapped among those groups already protected against discrimination in employment and housing by the Civil Rights Act.

Mr. Chairman, I believe it is clear that my amendment is consistent with other legislation passed by the Congress. The time is long past that the Congress can fail to recognize the discrimination suffered by our Nation's more than 35 million handicapped citizens. I urge my colleagues to support this amendment.

Mr. HAWKINS. Mr. Chairman, will the gentleman yield?

Mr. DODD. I would be delighted to yield to the chairman of the subcommittee.

Mr. HAWKINS. Mr. Chairman, I wish to commend the gentleman for offering this amendment. We think it is a very excellent one, and we are willing to accept it.

Mr. SARASIN. Mr. Chairman, will the gentleman yield?

Mr. DODD. I am glad to yield to the gentleman from Connecticut.

Mr. SARASIN. Mr. Chairman, I would like to commend the gentleman in the well for offering this amendment. It seems to me the amendment strengthens this section of the bill, and we are glad on this side to accept the amendment.

Mr. NOLAN. Mr. Chairman, will the gentleman yield?

Mr. DODD. I yield to the gentleman from Minnesota.

Mr. NOLAN. Mr. Chairman, I want to commend the gentleman from Connecticut (Mr. DODD) for offering this amendment.

Mr. Chairman, sometime ago, an opponent of this bill told Senator Humphrey to his face that full employment was nothing but an overpromise and that this government ought not to become an advocate for overpromises, Hubert looked him in the eye and he said:

My friend, the Sermon on the Mount was an overpromise. The Ten Commandments was an overpromise. The Declaration of Independence and the Constitution are over-

promises. The good Lord and the Founding Fathers all realized that we don't get anywhere without goals and without a commitment and a promise to do better.

Mr. Chairman, that is the Humphrey-Hawkins bill in a nutshell. This is not a cure-all or an end-all. This is the beginning of a long, hard road toward eliminating the tragic, debilitating, dehumanizing spectrum of unemployment from our land—and a recognition of the fact that a job ought to be a human right as much as a responsibility.

There are 11 million people in this country today who cannot find jobs;

Whose educations are being wasted;

Whose talents are being wasted;

And who are draining the Federal treasury of $50 to $60 billion every year because they cannot pay taxes and because they are forced to live on welfare paid for by those who are working and who do pay taxes.

There is not, I would venture to say, a single member of this body who has not made a commitment to ending waste and to curbing inflation.

If you have made that commitment, then you have an obligation to vote for this bill and to go on to make it work. Because the way to end waste and the way to end inflation is to put this entire country back to work—

Repairing the railroads;

Filling the potholes;

Manning the assembly lines and the offices;

The farms and the great industrial factories; and

Fulfilling unmet human needs.

Hubert Humphrey, when he spoke before this body, challenged us to be visionaries—to act boldly to meet the great challenges of this age. There will be no finer legacy to this great leader in this Chamber than to heed his advice, to follow his lead, and to pass the Humphrey-Hawkins bill overwhelmingly.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Connecticut (Mr. DODD).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. ROYBAL

Mr. ROYBAL. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ROYBAL: Page 104, after line 23, add the following new subsection:

(e) The membership of the advisory board or boards established pursuant to section 10 of the Employment Act of 1946 (as added by section 111 of this Act) shall include a representative cross-section of the ethnic minority population of the United States, including Hispanic-American members.

Mr. ROYBAL. Mr. Chairman, this is a very simple amendment. It merely guarantees that the membership of the advisory board or boards include a representative cross-section of the ethnic population of the United States.

I also added to that these words: "Including Hispanic-American members."

I do that, Mr. Chairman, because as we look at other legislation, we find that the words, "Hispanic Americans," are not present. The Civil Rights Act, the Equal Opportunities Act, and the affirmative action programs or acts do not contain the words, "Hispanic Americans." It is for that reason that I wish to add them at this time.

Because the words have not been included in other legislation, we find that the employment of Hispanic Americans in the Federal Government leaves a great deal to be desired. As an example, in the Federal Government at the present time only 3.4 percent of those under civil service have Spanish surnames. It is true that there has been an increase of seven-tenths of 1 percent in 12 years. At that rate it will take approximately a hundred years for this group to even reach parity. To continue the practice of increasing employment within the Federal Government by only seven-tenths of 1 percent every 12 years is unfair and unjust.

It is for that reason, Mr. Chairman, that I think it is most important that this amendment be adopted, and I urge the Members of the House to adopt this amendment at this time.

Mr. HAWKINS. Mr. Chairman, will the gentleman yield?

Mr. ROYBAL. I yield to the gentleman from California.

Mr. HAWKINS. I thank the gentleman for yielding.

Mr. Chairman, I am very glad to commend my distinguished colleague, the gentleman from California (Mr. ROYBAL), for offering this amendment. We are willing to accept the amendment on this side.

Mr. KAZEN. Mr. Chairman, will the gentleman yield?

Mr. ROYBAL. I yield to the gentleman from Texas.

Mr. KAZEN. I thank the gentleman for yielding.

Mr. Chairman, I rise to commend my colleague, the gentleman from California (Mr. ROYBAL), for offering this amendment. There is no question that some of the greatest contributions to the Southwest in this country have been made by Mexican-Americans, and certainly they are a force that have a lot to contribute to the future of this country. They should certainly be represented on these boards.

Mr. ROYBAL. I thank the gentleman from Texas for his remarks.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. ROYBAL. I yield to the gentleman from California.

Mr. ROUSSELOT. I thank the gentleman for yielding, and I want to compliment my colleague for offering this amendment. I think it is an important addition to the bill, and I join in supporting it.

Mr. LAFALCE. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, I rise in support of this bill, a considerably different bill from that which we considered in 1975 and 1976, and even considerably different from the version reported in press accounts in November of 1977.

I had many serious reservations about the earlier versions of this bill. I am pleased that the objections strongly expressed by myself and many other individuals to those earlier versions were listened to and have resulted in our having before us today a vastly improved bill.

I wondered what was in the mind of Charlie Schultze when he supported this bill, as I know he vigorously opposed the earlier versions. Upon reading the bill in its revised form, after it was reintroduced in February of this year, it was obvious that Schultze must have had a large hand in redrafting it. It met virtually each and every one of his, and my objections.

Although this legislation retains the same bill number, H.R. 50, the content is very, very different from what it was. It is a similar situation to urban renewal, in a way. A store may be demolished, a new one built, and yet the street address remains the same. Further, the new store might retain the same name. Unfortunately, I think a good many individuals opposing the bill before us today are doing so because it has the same number, H.R. 50, and the same name, Humphrey-Hawkins, without regard to its content. They would do well to remember what Oliver Wendell Holmes once said:

A word is not a crystal, transparent and unchanged, it is the skin of a living thought and may vary greatly in color and content according to the circumstances and time in which it is used.

Let us look both at my earlier concerns, and the content of today's bill.

First, the earliest version of Humphrey-Hawkins in January 1975, mandated the creation of jobs—it was really a job bill, and primarily a public sector jobs bill. Today's bill, even according to its author, is not a jobs bill, it is a policy bill, it sets goals, but it does not mandate any specific type of public sector jobs approach.

Second, I was concerned that the earlier version of Humphrey-Hawkins emphasized Government as the employer of last resort, without seeming to recognize that the private sector should be the employer of first resort. Today's bill does what I want it to do. It creates a priority. It says that our approach toward the reduction of unemployment must, in the first instance, be through the private sector. Only after we exhaust our remedies to stimulate the growth of private sector jobs shall we turn to other approaches. Even then, today's bill specifies that our second priority must again be private sector jobs, this time, though, with Federal assistance.

For the first time, Mr. Speaker, because of this bill, I will be able to go to my friends who advocate public jobs creation and say to them: It is the declared legislative policy of the United States that we must first do everything possible to create jobs through the private sector.

I cannot emphasize enough the importance of this section of the bill.

Third, Mr. Speaker, I was concerned in 1975 and 1976 at the establishment of a numerical mandate for overall unemployment of 3 percent within a 4-year

period. In 1975, however, our national unemployment exceeded 9 percent. In 1976 it was almost 9 percent. The old Humphrey-Hawkins bill would have had us reach a 3-percent overall unemployment rate within 4 years. I thought that unrealistic.

But, Mr. Chairman, today is March 16, 1978, not March 1975, or 1976. Our Nation unemployment rate is now slightly over 6 percent, not 9 percent. And today's bill sets as a goal, not a mandate, the achievement of overall unemployment of 4 percent within a 5-year period. There is a big difference between mandating something, and setting a goal. It is a lot different and easier trying to get from about 6 to 3 percent in a 5-year period, then it is getting from 9 to 3 percent in a 4-year period. I find today's approach much more reasonable, realistic, and desirable.

Fourth, Mr. Chairman, I have been concerned because of those who say the bill does nothing, that it only sets goals. But upon reflection, I realized that it has only been when I have set specific goals, either for myself or my office, that I have been able to accomplish things. In a sense, it is exactly what business does today. Business sets goals. Business sets profit goals, sales goals, earnings goals, dividend goals, every kind of goal. The latest trend in management technique is called—MBO—management by objective. Fancy labels aside, the basic fact is—if you want to accomplish something, set goals.

In this respect, Government should emulate business: it should set goals and make plans for the future. Almost every other Western country uses economic goal setting and planning in one way or another, in order to accord the country involved a sense of where they are going and where they should go. This type of planning does not mean interference by the government in the private sector of the economy; indeed, it can result in greater freedom for the free enterprise system, by ending the irksome practice of constant shifts by the Government as it tries to adjust to different circumstances without a firm aim in sight. The adoption of long-term economic goals, as envisioned in this bill, accords the private sector the necessary foreknowledge of what the Government intends to do in the future. In 1971, when I was a member of the New York State Senate, the State legislature adopted a 5-year plan for these very reasons. Would that New York State did that 10 years earlier. It is high time that the same thing be done by the U.S. Congress on the national level.

Fifth, Mr. Chairman, I have been concerned at the possibility of passing a bill that would be a hoax, a bill that would create unfulfillable expectations. I am now satisfied that today's bill does not do that. In large part, this is due to the extensive coverage given it by the news media which have printed so many excellent analyses, discussions, debates, and explanations of the bill these past few weeks. I found everyone who favored the bill saying—it mandates nothing, it only sets goals and priorities; it does not create jobs, but calls for national attention to the problems of unemployment, and so forth. No, Mr. Chairman, I do not think, given the great amount of attention and analysis of this bill and present public understanding of it, that any reasonable person will be misled by it.

Another aspect of this criticism is that the bill is meaningless because it is only symbolism. But symbolism is not necessarily wrong, Mr. Chairman. I believe that symbolism can be very important, just as the Supreme Court ruled, when it declared that our flag may not be used in an irreverent manner because of what it symbolized. A symbol can also reflect and almost always does reflect an underlying attitude of a group or of a whole people. It is precisely here that the new Humphrey-Hawkins bill does service to our Nation, in that it dedicates our country to expurgating two of the greatest evils in our economy—unemployment and inflation, and in a way that goes a good deal beyond that of the Employment Act of 1946. It is always good to remember that from symbolism can come much reality and that without the proper attitude nothing great or even positive will be accomplished.

Sixth, Mr. Chairman, I was concerned that since the bill carried the same number, H.R. 50, and the same name, Humphrey-Hawkins, that it might be divisive and pit labor against management regardless of its content. Quite simply, it has not. Business interests have been virtually silent on this new bill, because they really do not object that strenuously to it at all. Small business organizations that usually are adamantly and vehemently opposed to any labor-backed legislation have remained silent on this bill. By their silence, they have almost acquiesced. Some, such as the Small Business Service Bureau, Inc., have come out in favor of it. Indeed, the Business Roundtable, not only has not come out in opposition to the bill, but it has come to the brink of endorsing it. At the very least then, I have perceived no divisiveness between labor and management on this bill as I at one time feared.

Seventh, Mr. Chairman, under the early versions, I was concerned that all other considerations would be sacrificed to providing jobs at any cost. Since I have been concerned about bringing the concept of productivity to the forefront of our national consciousness, I feared productivity efforts would be submerged. I was proud to be a coauthor of the law that created the National Center on Productivity, but have continued to feel that our commitment to improve productivity has not been adequate enough. Today's bill places improvement in our productivity on the highest level of priority. It demands that the President set goals for productivity growth. This is an extremely important part of the bill.

Eighth, Mr. Chairman, I have been concerned that our country, when developing economic policy, has not given adequate enough attention to capital formation. I am pleased that the final version of H.R. 50 had addressed this problem. As chairman of a subcommittee concerned with small business capital and investment, I am most conscious of our inattention as a Nation to this pressing area. Today's bill includes a section that calls for high rates of capital formation. It reads as follows:

FORMATION OF PUBLIC AND PRIVATE CAPITAL

SEC. 207. (a) The Congress finds that—

(1) promotion of full employment and balanced growth is in itself a principal avenue to high and sustained rates of capital formation;

(2) high rates of capital formation are necessary to ensure adequate rates of capacity expansion and productivity growth;

(3) an important goal of national policy shall be to remove obstacles to the free flow of resources into new investment; and

(4) while private business firms are, and should continue to be, the major source of investment, the investment activities of the Federal Government, and State and local governments, play an important role in affecting the level of output, employment, and productivity and in achieving other national purpcses.

(b) The Economic Report of the President under the Employment Act of 1946 shall, as appropriate, review and assess existing Federal programs and policies which affect business investment decisions, including but not limited to, the relevant aspects of the Internal Revenue Code of 1954, Federal regulatory policy, international trade policy, and Federal support for research, development, and diffusion of new technologies. The Economic Report also shall assess the effect of the overall economic policy environment and the rate of inflation on business investment. The President shall recommend, as appropriate, new programs or modifications to improve existing programs concerned with private capital formation.

(c) The Economic Report referred to in subsection (b) shall review and assess, to the extent appropriate, Federal policies and programs which directly, or through grants-in-aid to State and local governments, or indirectly through other means, affect the adequacy, composition, and effectiveness of public investments, as a means of achieving the goals of this Act and the Employment Act of 1946. The President shall recommend, as appropriate, new programs and policies or modifications to improve existing Federal programs affecting public investment.

Ninth, Mr. Chairman, because of my continued concern about our fight against inflation, I was not pleased with early versions which were inattentive to setting a balanced relationship between inflation and unemployment. Today's refined bill establishes in law the principle that we shall, as a matter of national policy, use every weapon in our possession, short of wage and price controls, in order to fight and control inflation. To be sure, I also favored, voted for, and preferred the defeated Jeffords and Sarasin amendments, which would have set a numerical goal of 3 percent; but, with the addition of the Wright substitute, which, incidentally, was drafted in large part by the Business Roundtable, the President will have to establish yearly goals for price stability, another way of saying, inflation goals. And so, I believe we will be much better off with this bill, and it's anti-inflation policy, than we would be without it. The President now will have to declare numerical goals for price stability, on a yearly basis, and such goals must exist along with the legislatively established unemployment goals.

By doing this, Mr. Chairman, we are rejecting the Nixon-Ford economic policies which said that unemployment is

an acceptable way of fighting inflation. We are saying that we must find ways to fight both, simultaneously, and that there can be no acceptable trade-off between the two.

Which leads me to my tenth, and final point, Mr. Chairman. I have always said that one of the best ways to fight unemployment and inflation simultaneously is to adopt a national policy of targeting. Today's bill does that.

Today's bill specifically says that—

The President shall encourage new private sector production and employment to locate within distressed localities and regions with substantial unemployment. Any regional employment proposal of the President shall also include an analysis of the extent to which Federal tax, expenditure, and employment policies have influenced the movement of people, jobs, and industry from chronic high unemployment regions and areas, and proposals designed to correct Federal policies that have an adverse economic impact upon such regions and areas.

Mr. Chairman, that is targeting, if I ever heard it, and that is now national policy, and that is the kind of national policy that is going to help both our country and, in particular, western New York.

Certainly I have some reservations about parts of this new bill but I do not know of any bill that I have ever voted on which I did not have some reservations. In particular, I would have preferred a specific legislative goal of 3 percent inflation, and I think the 100-percent parity provision is unconscionable. However, I am afraid that the parity provision will be killed by the Senate and dropped in conference. On balance, therefore, I feel that the good achieved in this new bill far, far outweighs my reservations about it, and that it serves our country well.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from California (Mr. ROYBAL).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. ROUSSELOT

Mr. ROUSSELOT. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ROUSSELOT: Page 105, beginning on line 5, strike out "equal wages for equal work" and insert in lieu thereof the following: "not to exceed the minimum wage for a workweek of forty hours, as provided under section 6 of the Fair Labor Standards Act of 1938, or if higher, not more than the applicable State or local minimum wage".

Page 105, line 14, strike out "less" and all that follows down through "1938" on line 21 and insert in lieu thereof "more than the minimum wage for a workweek of forty hours as provided under section 6 of the Fair Labor Standards Act of 1938, or if higher, not more than the applicable State or local minimum wage".

Page 106, beginning on line 2, strike out "appropriate wage provisions based upon existing wage standard legislation" and insert in lieu thereof "wage standards which are not in excess of those provided for in this section".

Mr. ROUSSELOT. Mr. Chairman, I have at the desk an amendment to provide that any last resort public service jobs be paid no more than the minimum wage. This language would strike the so-called equal pay for equal work of section 402.

Let no one be fooled by section 402. Equal pay for equal work may sound nice, but in the public sector it represents nothing more than prevailing. The words equal pay for equal work are code words used by the Nation's municipal unions to require that any job be paid entry level bargained wages. In the State of Michigan, the lowest entry level wage rate exceeds $9,100 a year. To require that all future jobs be paid such wages would guarantee that public service jobs would always be more attractive than private employment and would draw thousands from existing private jobs into the public sector; and would in effect establish the principle that any minimum wage job is somehow beneath the dignity of Americans.

Mr. Chairman, this is the provision that Dr. Charles Schultz found so objectionable on earlier versions of H.R. 50. During committee hearings on this subject, he had severe difficulty in rationalizing his change in position.

I believe that we should make these public service jobs truly last resort. If we allow existing wage provisions to stay, they will become first resort and I do not believe that this is the purpose of the bill before us.

Mr. HAWKINS. Mr. Chairman, will the gentleman yield for a clarification?

Mr. ROUSSELOT. I yield to the gentleman from California.

Mr. HAWKINS. I thank the gentleman for yielding.

Mr. Chairman, I notice that the second part of the amendment on page 105, strikes everything down through line 21, and includes the year 1938. That strikes the prohibition against Bacon-Davis. I doubt if the gentleman wants to do that. Is that the intent?

Mr. ROUSSELOT. It was not my intent to do that.

Mr. HAWKINS. To strike Bacon-Davis?

Mr. ROUSSELOT. As it relates to the public sector, yes.

Mr. HAWKINS. Then the wording is simply defective, because 1938 does not appear in line 21, but rather, in line 17. But it is the intent to strike down through line 20?

Mr. ROUSSELOT. You are saying "line 20". In my amendment should read to "line 17"?

Mr. HAWKINS. To 21?

Mr. ROUSSELOT. I thank the gentleman for pointing out that defect, and I will change it at the appropriate time.

Mr. HAWKINS. I thank the gentleman.

Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, there seems to be a little misunderstanding, about this amendment.

I asked the gentleman whether or not he intended to strike the language between lines 17 and 20 in the bill.

The bill at the present time has written into its provisions requirements to keep the jobs at the lower range, as close to the minimum wage as possible.

For that reason, Mr. Chairman, for example, in the section which the amendment attempts to amend, we have a prohibition against work of a type to which Bacon-Davis would apply. Now any jobs of the Bacon-Davis type which this amendment would seek to strike must pay prevailing wages.

Mr. Chairman, I am somewhat confused over why the gentleman, on the one hand, says that he wishes to keep the jobs at the minimum wage and then strikes the prohibition in the bill against the payment of prevailing wages under Bacon-Davis. The two just contradict each other.

Even if he had not done that, however, I would like to call to the attention of the Members the fact that in the bill at the present time, specifically, in this provision in which we are talking about the last-resort jobs, we have limited those jobs so that they would not become operative until two years after the effective date of the act. We have prohibited any attraction from the private to the public sector. We have said under that provision that the jobs shall be useful and productive jobs. Nonetheless, such jobs shall be mainly in the lower ranges of skills and pay; and toward this end, the number of reservoir jobs shall, to the extent practicable, be maximized in relation to the appropriation.

We have gone on to outline appropriate eligibility criteria which will limit the jobs as to the duration and as to the number of persons who would be economically dependent on those applying for the jobs, and we have tried to restrict the jobs much more than we have under any other provision in current law or in any of the proposed laws.

Mr. Chairman, what the gentleman's amendment will do will be to create another category of manpower programs.

Now, on the Comprehensive Employment and Training Act, wages that ranged all the way up to 7,000 or 8,000 are currently permitted. If we use that program rather than creating a new program, we could not use it under this amendment. We would have to create an entirely new program. I am quite sure that the gentleman would not want that.

In the welfare proposal we allow jobs which, if two individuals are working for the same employer and working alongside of each other, they shall be paid the same compensation, which is equal pay for equal work, which is the present law. It is nothing new. This amendment will strike what is the current law on the question of equal pay.

Mr. CONYERS. Mr. Chairman, will the gentleman yield?

Mr. HAWKINS. I yield to the gentleman from Michigan.

Mr. CONYERS. I would like to join in supporting the Chairman's position on the amendment, because this has been considered time and time again. We are not going to be paying excessive wages to those who will be working under the programs developed under H.R. 50. I read some additional language that the Chairman did not read, on page 83:

The Congress hereby establishes the policy that such new programs for reservoir projects shall be so designed as not to draw any workers from private employment to the reservoir projects thereunder.

I think the gentleman is absolutely correct, that we are not going to have that siphoning off from the private sector to the public sector. Obviously, that would defeat the purpose of this legislation, which is to reduce all unemployment, whether it be private or public. So, I join my chairman in opposition to the amendment.

Mr. HAWKINS. Let me just say—and the gentleman from California may respond to this also—I think he has agreed with me that these jobs should at least be useful and constructive, and should not be leaf-raking jobs. Yet, the gentleman's amendment says that the pay shall be not more than the minimum, which means that it can be less than the minimum. They are not even minimum wage jobs.

The CHAIRMAN. The time of the gentleman from California has expired.

(On request of Mr. ROUSSELOT and by unanimous consent Mr. HAWKINS was allowed to proceed for 3 additional minutes.)

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. HAWKINS. I yield.

Mr. ROUSSELOT. As I stated previously, I wish to say to my colleague the amendment incorrectly struck out the provisions relating to Davis-Bacon. My intention was to leave the language in through "1938" on line 17.

Mr. Chairman, I ask unanimous consent that my amendment be changed to read "line 17" instead of "line 21."

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. HAWKINS. I thought in my question to the gentleman that he said he wished to include that. I agree to the clarification.

Mr. ROUSSELOT. I just merely say that I agree with the gentleman, that it was my intention to have the language beyond line 17 still included in the bill, which we left in my amendment by unanimous consent.

Mr. HAWKINS. May I simply say that, as I indicated, this amendment does not say they shall be at the minimum. It says they shall be not more than the minimum——

Mr. ROUSSELOT. Not to exceed the minimum wage.

Mr. HAWKINS. Not to exceed, which means that they could be much lower, and I think that is a very dangerous condition.

Mr. ROUSSELOT. Yes, they could be lower, but it is unlikely. My point is that if we are going to have the public sector unfairly competing with the private sector, by automatically allowing the prevailing wage rate, which may be very much higher than the minimum wage in many areas of the country. I think the gentleman from California recognizes that, considering his knowledge of youth unemployment, the minimum wage becomes an important factor, especially with entry-level type jobs in the public sector.

Mr. HAWKINS. I just cannot agree with the fact that this would in any way offer any protection. It would open up everything below the minimum, and I think that is a very dangerous correction. Any existing program or any proposed program, including the welfare reform proposal, does the same. I think in this instance we have limited the jobs, made it operative for 2 years, prohibited any opportunity to attract from the private sector to the public sector. We are, therefore, talking about only a few jobs.

The program would have to be made by this body; it would have to be authorized and set up by this body, and I would say that this body is not going to go hog wild in appropriating billions of dollars for that many public jobs. I think we have confidence in this body, since we have limited this and said that only in those instances where we have such a recession that we would have to reach this, at least we should keep this much flexibility.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from California (Mr. ROUSSELOT).

The question was taken; and on a division (demanded by Mr. ROUSSELOT) there were—ayes 34, noes 65.

So the amendment was rejected.

AMENDMENT OFFERED BY MR. BAUMAN

Mr. BAUMAN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BAUMAN: On page 106 add the following new title:

"TITLE V

"FIVE-YEAR AUTHORIZATION

"The provisions of this Act shall be effective for each of the fiscal years through September 30, 1983 unless extended beyond that date by Act of Congress."

The CHAIRMAN pro tempore. Before the Chair would entertain this amendment, the Chair would like to know if there are other amendments to title IV?

Mr. LONG of Maryland. Mr. Chairman, I wish to offer an amendment.

The CHAIRMAN pro tempore. The Chair would like to advise the gentleman from Maryland (Mr. BAUMAN) if his amendment were accepted at this time it would cut off the additional amendments. Would the gentleman withhold?

Mr. BAUMAN. Mr. Chairman, reserving my rights, as I think my amendment has already been put before the House, it would not cut off the gentleman from Minnesota who has a substitute for the entire bill, would it?

The CHAIRMAN pro tempore. The Chair would like to advise the gentleman from Maryland (Mr. BAUMAN) that the Chair feels that the rights of Members should be protected.

Mr. BAUMAN. The gentleman agrees.

The CHAIRMAN pro tempore. And for that reason the Chair would like to recognize the gentleman from Maryland (Mr. LONG) and then come back to the gentleman from Maryland (Mr. BAUMAN).

The Chair will protect the gentleman from Maryland (Mr. BAUMAN).

Mr. BAUMAN. But in response to my question, the amendment has been laid before the House and unless it is withdrawn the gentleman from Maryland has a right to press the amendment, does he not?

The CHAIRMAN pro tempore. The Chairman would like to state to the gentleman that the Chair should have inquired of the gentleman from Maryland (Mr. BAUMAN) as to the nature of his amendment before extending recognition. The Chair would hope the gentleman would withhold his amendment at this time.

Mr. BAUMAN. But before making that judgment, the gentleman from Minnesota who has a substitute for the entire bill would still be in order; would he not?

The CHAIRMAN pro tempore. The gentleman is correct on that.

If the gentleman from Maryland insists, the Chair will present his amendment.

Mr. BAUMAN. No, Mr. Chairman, I do not insist and I withdraw my amendment in deference to the gentleman from Maryland (Mr. LONG).

The CHAIRMAN pro tempore. Without objection the gentleman from Maryland (Mr. BAUMAN) withdraws his amendment.

The Chair recognizes the gentleman from Maryland (Mr. LONG).

AMENDMENT OFFERED BY MR. LONG OF MARYLAND

Mr. LONG of Maryland. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. LONG of Maryland: Insert at the end of the bill the following new section:

APPROPRIATE AND LIGHT CAPITAL TECHNOLOGIES

SEC. 450. (a) In the course of preparation of the Economic Report under the Employment Act of 1946, as amended by this Act, and in the course of preparing, proposing, and implementing structural economic policies and programs under title II of this Act (including counter-cyclical, regional, youth, job training and counseling, and capital formation programs) the President shall take such steps as may be necessary to assure consideration and utilization of the potential of appropriate and light capital technologies.

(b) As used in this section, the term "appropriate and light capital technologies" means technologies which—

(1) are small in scale, simple to install, and durable in operation;

(2) are labor rather than capital intensive;

(3) are not dependent on a highly centralized infrastructure for production, maintenance, or repair;

(4) make effective, efficient use of available and particularly of renewable resources;

(5) meet the needs of local communities and enhance the self-reliance of such communities; and

(6) enhance rather than degrade the environment.

In the table of contents of the bill, add after the item relating to section 404 the following:

SEC. 405. Appropriate and Light Capital Technologies

Mr. LONG of Maryland. Mr. Chairman, my amendment to request the President to take such steps as may be necessary to assure consideration and utilization of the potential of appropriate and light capital technologies, would help to solve the problem of providing full employment by stretching capital.

Our country's most crucial shortage is

the shortage of capital. A list of our capital shortfalls would run into the trillions of dollars; capital needed to rebuild our cities, fight poverty, combat pollution, modernize our steel mills, control floods, provide hospitals and homes for the elderly—all of these needs, if they could be properly met, would offer plenty of jobs for our unemployed. If we are to provide jobs for all, then we must stretch our supply of capital so that all workers can be equipped with the tools and materials to make them effective.

An appropriate or light capital technology is small scale and one which is labor, rather than capital, intensive. It makes the most efficient, effective use of available, renewable materials and local know-how, while meeting the end-use needs of the community.

The use of light capital or appropriate technology can help to lessen the demands on our scarce capital reserves and decrease the number of highly technical jobs for which the average unemployed person is not qualified. In the field of energy alone, the Ford Foundation's energy policy project concluded that a less energy intensive economy would reduce capital requirements and lead to an increase in the number of jobs.

New light capital businesses and industries would produce, market, install, maintain, and repair energy conservation technology such as new building insulation materials, heat pumps, and electronic controls for regulating energy use in buildings.

The main point I want to make here is that we do not have enough capital. The important thing is instead of piling too much of it in one corner of a field we want to spread it out. If you do fill up that one corner of the field then there is nothing to help us generate new jobs in the rest of the field.

Mr. HAWKINS. Mr. Chairman, will the gentleman yield?

Mr. LONG of Maryland. I yield to the gentleman from California.

Mr. HAWKINS. Mr. Chairman, we have read and are familiar with the amendment offered by the gentleman from Maryland (Mr. LONG) and the gentleman has discussed it with us on this side and we accept the amendment.

Mr. LONG of Maryland. I thank the gentleman.

Mr. JEFFORDS. Mr. Chairman, will the gentleman yield?

Mr. LONG of Maryland. I yield to the gentleman from Vermont.

Mr. JEFFORDS. Mr. Chairman, I want to commend the gentleman from Maryland (Mr. LONG) upon offering his amendment. I think it is an excellent amendment that will concentrate efforts in an area where it is needed.

Mr. LONG of Maryland. I thank the gentleman for his comments.

Mr. SARASIN. Mr. Chairman, will the gentleman yield?

Mr. LONG of Maryland. I yield to the gentleman from Connecticut.

Mr. SARASIN. Mr. Chairman, let me say that I will accept the amendment offered by the gentleman from Maryland (Mr. LONG) but I will be darned if I can understand it.

Mr. BROWN of California. Mr. Chairman, will the gentleman yield?

Mr. LONG of Maryland. I will yeld to the gentleman from California (Mr. BROWN); maybe the gentleman from California can do a better job of explaining it than I have.

Mr. BROWN of California. Mr. Chairman, let me state that similar language has been inserted in other legislation before this House, which the House has accepted and passed including the AID bill. I want to commend the gentleman in the well for the efforts he has made in that connection and in his efforts to assist the underdeveloped nations of the world by focusing on the importance of appropriate technologies to meet the needs of those nations.

Similar language is also in the Department of Energy bill and in a number of other pieces of legislation.

So far the experience that has been obtained with the emphasis on appropriate technologies has been uniformly good. I think that the experience would be similarly good if attention is paid to it in connection with this legislation which we are discussing and I commend the gentleman for bringing it to our attention.

Mr. CONYERS. Mr. Chairman, will the gentleman yield?

Mr. LONG of Maryland. I yield to the gentleman from Michigan.

Mr. CONYERS. I thank the gentleman for yielding.

Is the gentleman aware that some of his language is already repeated in this bill in its over 60-some-odd pages? This is not a novel idea that we give emphasis to the problem of capital formation. We stated time and time again in the debate that the private sector would be given priority. We have said it so many times that to introduce this amendment at this late date suggests that the gentleman feels that it has not been emphasized sufficiently.

Mr. LONG of Maryland. This has nothing to do with the division between private and public capital formation. It is entirely different.

Mr. SARASIN. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I think I will reconsider the comment I made earlier when I said I would accept the amendment. I am not sure this amendment does anything. As has just been pointed out by the gentleman from Michigan (Mr. CONYERS) we do talk about the need for capital formation in this bill. I do not understand how the gentleman from Maryland (Mr. LONG) makes the jump between the language in this amendment and his comments about heat pumps, insulation, and everything else. It would seem to me that this amendment would tell the President or have the President tell us that the Government will decide where capital is to be distributed in this country, and it would be restricted to light capital technologies. As I heard the gentleman from Maryland explain it, it seems to me that an example of light capital technology that fits the amendment, or at least fits this language, would take us back 250 or 300 years when everybody made their own shoes, made their own clothes, built their own tools to run their own farms. Beyond that, I do not think we can go with this language, and I think frankly we will not accept it.

Mr. LONG of Maryland. Mr. Chairman, will the gentleman yield?

Mr. SARASIN. I yield to the gentleman from Maryland.

Mr. LONG of Maryland. I thank the gentleman for yielding.

I have no proposal to take us back a couple hundred years but simply to use common sense combinations of factors if production in relation to their relative scarcities and prices. One example: It is proposed in Baltimore to build a $5 billion subway system. Another plan in Baltimore would make use of existing rail tracks for a rapid transit system for the whole city by putting extra track alongside the tracks that are already there; the whole thing to be done for $100 million to $200 million. Meantime, we have spent a billion dollars to build a subway that just covers 9 miles on one line out to one sector of the suburb.

Mr. SARASIN. If the gentleman would not object, I would reclaim my time.

Mr. LONG of Maryland. That is an example of what I am talking about.

Mr. SARASIN. That may be an example the gentleman has given, but it has nothing to do with this amendment. I do not know why I am getting so excited. We have added so many strange bits and pieces of the English language to H.R. 50 already, I suppose this does not hurt. It is like chicken soup, it may not help, but it will not hurt.

Mr. LONG of Maryland. What we are talking about here is spreading out our capital more evenly. Do not pile the fertilizer too high in one corner of the field.

Mr. SARASIN. I certainly do not want to be accused, Mr. Chairman, of having anything to do with piling the fertilizer in one part of the field. I will be very happy to let the gentleman from Maryland spread it all over the field, as he usually does.

Mr. Chairman, I yield back the remainder of my time.

Mr. GARY A. MYERS. Mr. Chairman, I move to strike the last word.

I would like to ask the gentleman from Maryland a question. I understand the gentleman's intent, I believe, but I want to clarify one point that concerns me. I assume there is nothing in this amendment which would encourage the DOT to lower its standards of highway construction. It has been said in the past that some complaints about the standards with which we require States to build highways or the Federal highway system causes them to put more money in construction. However, it would seem to me that one might not have the efficiency of the highway system we encouraged minimum standards to decrease capital investment in that area. In other words, if we go to lesser capitalization, it may in the long run cost the States more due to related increases in maintenance costs.

Mr. LONG of Maryland. Mr. Chairman, will the gentleman yield?

Mr. GARY A. MYERS. I yield to the gentleman from Maryland.

Mr. LONG of Maryland. I thank the gentleman for yielding.

If I understand the gentleman, I do not propose that we do anything that would turn out a product that would be less valuable or less safe.

All we are saying is that there is too much over-engineering. I think the gentleman knows that. We tend to move into things in a massive way, like we did in Vietnam, move in vast divisions and we have had a heck of a time dealing with an enemy that all they knew was a few guns and minor equipment and they seemed to do very well.

Sometimes you can use too much capital to accomplish something. The more capital you use in one place, the less you have for accomplishing somewhere else in another place.

Mr. GARY A. MYERS. I understand that. If one casts an eye toward investment of capital, he also must cast an eye toward the useful life of the product. If we only pay attention to the capital improvement and try to reduce it to the lowest possible level, we may be inflicting upon those using Federal programs a costly penalty for massive maintenance expenses in those programs.

Mr. LONG of Maryland. Mr. Chairman, if I can respond to the gentleman, that is why the word "appropriate" is used. We are not trying to do something that is inappropriate. We are just asking us to reach for our brains, instead of our pocketbooks, because we are doing much too much in this high-class economy reaching for our pocketbooks first. We think the solution is just spending more money. Sometimes if you use your brains, you can provide more jobs for people. We provide vast amounts of capital in one area, like our subways, and then have nothing somewhere else. We have millions of people unemployed in this country because we have used up too much capital in one part of the country and have nothing else left in the other parts.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Maryland (Mr. LONG).

The question was taken; and on a division (demanded by Mr. LONG of Maryland) there were—ayes 72, noes 6.

So the amendment was agreed to.

AMENDMENT OFFERED BY MR. BAUMAN

Mr. BAUMAN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BAUMAN: on Page 106 add the following new title:

"TITLE V

"FIVE-YEAR AUTHORIZATION

"The provisions of this Act shall be effective for each of the fiscal years through September 30, 1983 unless extended beyond that date by Act of Congress."

Mr. BAUMAN. Mr. Chairman, this simply is a sunset amendment which the bill as reported by the committee does not contain. Several times this year and in the last several years this House has adopted similar amendments in bills creating new agencies, departments, and new programs that move in directions that a majority of the Members conclude should be reconsidered periodically. A similar provision was added to the bill creating the Department of Energy.

This particular legislation before us, I think even its authors would have to admit, is far-reaching in its concept and may well be even more far-reaching in practical scope. Anyone who doubts that has only to read the bill.

To add to that, there have been numerous amendments, the provisions of which are far-reaching, and we have no idea how they will be applied in the future.

It seems to me that since the bill is written in terms of a national 5-year plan, which has a certain historic ring to it, we ought to at least consider that at the end of that 5-year period there may be a need for some correction. Even Vladimir Ilich Ulyanov, better known as Nikolai Lenin, reached the conclusion, after his first 5-year plan, that he needed a new 5-year economic policy.

I think those in some future Congress might conclude the provisions of this bill may or may not have succeeded and sometime prior to the expiration date provided in this amendment decide that they want to extend it, perhaps amend it, or repeal it completely.

I know the argument may be made that this gentleman from Maryland is not in favor of this legislation and, therefore, this is a mischievous argument offered to damage the bill. I suggest to the Members that this does not in any way damage the bill. It only allows a chance for the Congress of the United States to review the issues at an appropriate time within that period of 5 years.

Mr. WEISS. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I admire the capacity of the gentleman from Maryland (Mr. BAUMAN) to make the statement that he did with an absolutely straight face.

Sometimes in the course of debate, which has gone on now for the better part of a week, I think we have tended to forget that what we are talking about is an amendment to the Employment Act of 1946. That legislation has been in existence for some 32 years. This bill simply provides for an updating of that legislation.

In this bill there are no jobs provided, there are no programs as such, except for policy statements which are very critical and except for goals that are set. What the gentleman from Maryland is suggesting is that at the very time when those goals would have to be met for the first time, that is, in 1983, the bill would go out of existence.

Mr. Chairman, obviously what the gentleman is trying to do is to destroy this piece of legislation before it goes into effect, and I think we ought to defeat the amendment very quickly.

Mr. BAUMAN. Mr. Chairman, will the gentleman yield?

Mr. WEISS. I yield to the gentleman from Maryland.

Mr. BAUMAN. Mr. Chairman, I must stress to the gentleman from New York (Mr. WEISS) the fact that it is not my intention to try to destroy this legislation, only to review it. If the gentleman will notice the language in the amendment, as it is drawn, it only allows the Congress to consider whether the legislation should be extended 3 months before George Orwell's 1984. I do not think that is unreasonable.

Mr. WEISS. Mr. Chairman, I suggest that the ultimate rationale of the gentleman from Maryland (Mr. BAUMAN) is, given some of the goodies that have been hung onto this legislation, that probably he is not willing to go straight out and oppose the legislation, and, therefore, he is trying to defeat it by indirection.

Mr. DERRICK. Mr. Chairman, I move to strike the last word, and I rise in opposition to the amendment.

Mr. Chairman, if we were to accept this amendment, it would be a very unsatisfactory way to do business. This amendment would end all provisions of this bill within 5 years.

There is substantial sunset legislation before both the Senate and the House, including a piece of legislation that I have introduced which has some 110 sponsors. That is the Legislative Oversight Act of 1978, and it would bring about the same results the gentleman from Maryland (Mr. BAUMAN) wishes to accomplish but, I believe, in an orderly manner within the congressional process.

Of course, the reason that a lot of the sunset legislation has not gotten any further than it has at this point is probably because it is very disruptive, and this particular amendment would be disruptive to this legislation.

Mr. Chairman, based on that argument, I ask that the amendment be voted down.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Maryland (Mr. BAUMAN).

The question was taken; and the Chairman pro tempore announced that the noes appeared to have it.

RECORDED VOTE

Mr. BAUMAN. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 196, noes 216, not voting 22, as follows:

[Roll No. 162]

NOT VOTING—22

Akaka	Frenzel	Ryan
Anderson, Ill.	Frey	Sikes
Baucus	Krueger	Stockman
Brown, Mich.	McClory	Teague
Buchanan	Madigan	Thornton
Clausen, Don H.	Rahall	Tucker
	Robinson	Young, Alaska
Flood	Runnels	

The Clerk announced the following pairs:

On this vote:

Mr. Krueger for, with Mr. Akaka against.
Mr. Sikes for, with Mr. Baucus against.
Mr. Teague for, with Mr. Flood against.
Mr. Runnels for, with Mr. Rahall against.

Mrs. HECKLER changed her vote from "no" to "aye."

Mr. CONTE changed his vote from "aye" to "no."

So the amendment was rejected.

The result of the vote was announced as above recorded.

PARLIAMENTARY INQUIRY

Mr. QUIE. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN pro tempore. The gentleman will state it.

Mr. QUIE. Have we reached the point where I can now offer my substitute?

The CHAIRMAN pro tempore. The gentleman is correct. The amendment in the nature of a substitute is now in order.

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. QUIE

Mr. QUIE. Mr. Chairman, I offer an amendment in the nature of a substitute.

The Clerk read as follows:

Amendment in the nature of a substitute offered by Mr. QUIE: Strike out everything after the enacting clause and insert in lieu thereof the following:

SHORT TITLE

SECTION 1. This Act may be cited as the "Economic Revitalization Act of 1978".

GENERAL FINDINGS

SEC. 2. (a) The Congress finds that Americans have suffered the cruel ravages of high inflation, an ever-increasing tax burden and and substantial unemployment and underemployment, idleness of other productive resources, and inadequate productivity growth, imposing numerous economic and social costs on the Nation.

(b) The Congress further finds—

(1) that unemployment is a personal tragedy, that the unemployed should be treated as people rather than just statistics and have adequate counseling and assistance looking toward retraining, if necessary, which will lead to permanent employment in the private sector of the economy;

(2) that maximum employment, reduced inflation, increased production and real income, and adequate productivity growth all accomplished under the free enterprise system are important national requirements that will promote the economic security and well-being of all citizens of the Nation;

(3) that business and industry are deprived, as a consequence of the circumstances described in subsection (a), of the production, sales, capital flow, and productivity necessary to maintain adequate profits, undertake new investment, create jobs, and contribute to meeting society's economic needs;

(4) that inflation is eroding the buying power of Americans, reducing their standard of living, and jeopardizing individual savings for family necessities and retirement;

(5) that an increasing tax burden coupled with high inflation places earnings in double jeopardy, as "tax bracket creep" moves wage-earners into higher brackets and inflation erodes the buying power of after-tax income, and as a result earnings buy less and the Government takes more in taxes;

(6) that job creation and capital formation in the private sector is inhibited by tax disincentives and a Federal tax program which discourages the savings and investment necessary to stimulate economic expansion; and

(7) that excessive deficit spending by the Federal Government fans inflation, boosts interest rates, crowds the private sector out of the money market, and reduces capital formation for economic expansion necessary to create permanent, nonsubsidized jobs.

(c) The Congress further finds that an effective policy to promote maximum employment, reduce inflation, increase production and real income, and provide adequate productivity growth should be based on the development of explicit policies by the President and Congress for the full use of the resources and ingenuity of the private sector of the economy.

TITLE I—AMENDMENTS TO THE EMPLOYMENT ACT OF 1946 ECONOMIC REPORT OF THE PRESIDENT

SEC. 101. Section 3(a) of the Employment Act of 1946 is amended to read as follows:

"Sec. 3. (a) The President shall transmit to the Congress not later than January 20 of each year an economic report (hereinafter called the 'Economic Report') setting forth current and foreseeable trends in employment and unemployment, with particular attention to private sector employment and unemployment; the rate of inflation; the Federal tax burden both corporate and individual; real income; farm income; purchasing power; Federal deficits, energy consumption, and levels of energy imports; and other indices which will assist the Congress in determining the health of the economy.

"(b) To assure that the Congress pursues a balanced approach to reach the full economic health of the nation, the President shall transmit to the Congress annual numerical goals, and the programs and policies which he or she deem necessary, consistent with achieving within five years after the date of enactment of the 'Economic Revitalization Act of 1978', the following:

"(1) a reduction in unemployment without the use of public service employment, among Americans age 16 and over to not more than four per centum of the labor force and a reduction of unemployment among Americans age 20 and over to not more than three per centum of the labor force;

"(2) an annual rate of inflation, without the use of any control of wages or prices in the private sector, not to exceed three per centum;

"(3) a reduction of the Federal tax burden to a level not greater than the Federal tax burden during calendar year 1965;

"(4) obtaining farm income at not less than 100 per centum of parity at the marketplace;

"(5) the balancing of the Federal budget;

"(6) the reduction of minority youth unemployment age 16 to 24 to that of nonminority youth and unemployment among all youth age 16 to 24 to that among adult males age 24 and over.

"(c) In setting forth the goals and programs and policies specified in subsection (b), the President shall present an analysis of:

"(1) the effect of inflation on the real income of Americans, on marginal tax rates, and the percentage change of tax returns filed in each bracket and the effects of such

changes on employment, real income and purchasing power;

"(2) the effect of unemployment, employment, idleness of other productive resources, inadequate productivity growth, declining real income, Federal deficits, and inflation on private sector productions, sales, capital flow, productivity, new investment, job creation;

"(3) and the cost of such unemployment to the American people in terms of increased Federal outlays, loss, of personal income, health and other related costs and other such costs;

"(4) the extent to which Federal policies encourage or discourage business investment in areas of high unemployment;

"(5) any other analysis which the President deems necessary to further describe the state of the economy and justify the specific recommendations called for in subsection (b).

"(d) For the purposes of this section,

"(1) the percentage rate of unemployment shall be the rate of unemployment as a percentage of the civilian labor force as set forth currently by the Bureau of Labor Statistics in the Department of Labor, except that such shall not include any individual hired into public service employment,

"(2) the term 'public service employment' includes employment in any public service employment or training program authorized by any Act of Congress, such as the Comprehensive Employment and Training Act of 1973, or any other new program in training authorized by this or any other Act of Congress which provides employment or training in the private sector in excess of the permanent public work force,

"(3) the term 'inflation' shall mean that the rate of increase in consumer prices as measured by the Consumer Price Index as set forth currently by the Bureau of Labor Statistics in the Department of Labor,

"(4) the term 'Federal tax burden' shall by the ratio of the total Federal tax collections in a calendar year to national income for such year as such term is used in the income and products accounts of the United States as published by the Department of Commerce.

COUNCIL OF ECONOMIC ADVISERS TO THE PRESIDENT

SEC. 102. Section 4(a) of the Employment Act of 1946 is amended to read as follows:

"SEC. 4. (a) There is hereby created in the Executive Office of the President a Council of Economic Advisers (hereinafter called the "Council"). The Council shall be composed of three members who shall be appointed by the President, by and with the advise and consent of the Senate, and each of whom shall be a person who as a result of his training, experience, and attainments is exceptionally qualified to analyze and interpret economic developments, to appraise programs and activities of the Government in the light of the policy declared in section 2, and to formulate and recommend national economic policy to promote full employment, production and purchasing power under free competitive enterprise, and specifically a program to determine the effect of inflation on the income tax structure, the effect of inflation on marginal tax rates and the percentage change of tax returns filed in each bracket, the level of employment, production, real income, farm income, the Federal deficit, and purchasing power under free competitive enterprise and to assist the President in developing the goals and policy recommendation set forth in section 3. The President shall designate one of the members of the Council as Chairman".

TAX IMPACTS OF INFLATION

SEC. 103. (a) Paragraph (2) of section 4 (c) of the Employment Act of 1946 is amended to read as follows:

"(2) to gather timely and authoritative information concerning economic trends, both current and prospective, including the effect of inflation on the income tax structure, the effect of inflation on marginal tax rates and percentage of tax returns filed in each bracket, the levels of employment, production, real income, farm income, purchasing power, and federal deficits, to analyze and interpret such information in the light of the policy declared in section 2 for the purpose of determining whether such developments and trends are interfering or are likely to interfere, with the achievement of such policy and to compile and submit to the President studies relating to such developments and trends;".

(b) Paragraph (4) of section 4(c) of the Employment Act of 1946 is amended to read as follows:

"(4) to develop and recommend to the President national economic policies to foster and promote a program to determine the effect of inflation on the income tax structure, the effect of inflation on marginal tax rates and the percentage change of tax returns filed in each bracket, the level of employment, production, real income, farm income, purchasing power, Federal deficits and to promote free competitive enterprise, to avoid economic fluctuations or to diminish the effects thereof and thus to maintain employment, production, purchasing power and full farm income, and a balanced Federal budget;".

TITLE II—ESTABLISHMENT OF A PRESIDENTIAL TASK FORCE ON YOUTH UNEMPLOYMENT

GENERAL FINDINGS

SEC. 201. The Congress finds that—

(1) notwithstanding improved economic growth and a continuing reduction in the overall rate of unemployment, youth unemployment continues to represent nearly half of overall unemployment and the rate of such unemployment has not been reduced;

(2) existing structural policies have been ill designed and ineffective in reducing youth unemployment; and

(3) the reduction in the rate of unemployment among the young, but particularly minority youth, would greatly alleviate and reduce the overall rate of unemployment.

PRESIDENTIAL TASK FORCE ON YOUTH UNEMPLOYMENT

SEC. 202. (a) There is hereby established in the Executive Office of the President a Presidential Task Force on Youth Unemployment, hereafter referred to as the "Task Force", to furnish recommendations to the President pursuant to section 103, which shall consist of eleven members appointed by the President, by and with the advice and consent of the Senate. Two of the members shall be representatives of business but shall be selected on the basis of their experience and knowledge of the labor market problems of youth, particularly in regards to wage and employment standards, collective bargaining agreements, and other such factors, and who have worked with labor in developing employment and training efforts for youth. Two of the members shall be representatives of labor, but shall be selected on the basis of their experience and knowledge of labor-sponsored apprenticeship and other such youth programs, wage and employment standards, collective bargaining, and who have worked with business in providing employment and training opportunities for youth. Two members shall be representatives of State and local government, but shall have had experience in carrying out the provisions of section 327(a)(3), section 327(b), section 342(a)(3)(b), and section 352(3)(A) of the Comprehensive Employment and Training Act. Three members shall be from the public at large, but one will either represent youth and have a thorough knowledge and understanding of the labor market problems of youth or shall represent an organization which has a special understanding of the labor market problems of youth, and one who shall have a special understanding of the labor market problems of rural youth. In addition, the Secretary of Labor and the Secretary of Health, Education, and Welfare shall serve as members of the Task Force.

(b) Except when six members of the Task Force shall vote to hold an executive session for a particular purpose, the Commissioner of Labor Statistics, the Director of the Bureau of the Census, the Chairman of the National Commission for Manpower Policy, the Chairman of the Council of Economic Advisers, the Chairman of the National Commission on Employment and Unemployment Statistics, or in each case a designee, shall assist and participate in the hearings, deliberations and preparations of Task Force recommendations.

(c) The President shall designate a Chairman from among the appointed members of the Task Force.

(d) The Chairman, with the concurrence of the appointed members of the Task Force, shall appoint an executive director, who shall be the chief executive officer of the Task Force. The executive director may appoint, with the concurrence of the Chairman, such professional, technical, and clerical staff as are necessary to carry out the provisions of this section. The executive director and staff shall be appointed without regard to the provisions of title 5, United States Code, governing appointments to the competitive service, and without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates, but at rates not in excess of the maximum rate of GS–18 of the General Schedule under section 5332 of such title. The executive director, with the concurrence of the Chairman, may obtain temporary and intermittent services of experts and consultants in accordance with the provisions of section 3109 of title 5, United States Code. The Task Force may utilize such staff, with or without reimbursement, from the Department of Labor, the Department of Commerce, and such other appropriate Federal agencies as may be available to assist the Task Force in carrying out its responsibilities.

(e) The Task Force shall determine its own internal procedures, including the constituting of a quorum.

(f) The Task Force is authorized to accept and utilize voluntary and uncompensated services notwithstanding the provisions of section 665(b) of title 31, United States Code.

(g) Members of the Task Force who are not officers or employees of the Federal Government shall be paid compensation at a rate not to exceed the per diem equivalent of the rate for GS–18 of the General Schedule under section 5332 of title 5, United States Code, when engaged in the work of the Task Force, including traveltime; and, while serving away from their homes or regular places of business, shall be allowed travel expenses including per diem in lieu of subsistence, in the same manner as such expenses are authorized by law (5 U.S.C. 5703) for persons in the Government service employed intermittently.

FUNCTIONS

SEC. 203. The Task Force shall—

(1)(A) identify the specific labor market problems of youth, but in particular minority youth;

(B) determine the extent to which existing structural policies of the government, including Federal, State, and local policies, work to mitigate such problems;

(C) identify the extent to which labor market barriers exist, including the effects of civil service, collective-bargaining arrangements, lack of education and training, and wage standards which create labor market problems for youth;

(D) identify the extent to which macroeconomic policies, such as tax and fiscal policy, have on labor market problems of youth, both nationally and regionally;

(E) identify long-range projections on labor market activity for youth;

(F) determine the extent to which the public education system relates youth to the labor market;

(G) determine the extent to which existing Federal programs, such as the Comprehensive Employment and Training Act, the Public Works Employment Act, contribute to alleviating the labor market problems of youth; and

(H) the extent to which federally mandated wage standards, such as those authorized under the Fair Labor Standards Act, the Davis-Bacon Act, Walsh-Healey, and the Service Contract Act contribute to the labor market problems of youth; and

(2) make a report to the President and the Congress within twelve months after the date of appointment of the first five members of the Task Force, which shall include:

(A) the findings of the Task Force under paragraph (1) and shall provide explicit programmatic recommendations to achieve the following:

(i) reduction of minority youth unemployment age sixteen to twenty-four to that of non-minority youth unemployment with five years; and

(ii) a reduction of youth unemployment age sixteen to twenty-four equivalent to that of adult males age twenty-four and over within five years;

(B) shall include recommendations for changes in macroeconomic and microeconomic fiscal and tax policies, in existing Federal and State employment programs;

(C) shall include a feasible schedule for the implementation of the Task Force recommendation, including a feasible schedule for their implementation, cost estimates and any appropriate draft regulations and legislation to implement such recommendations; and

(D) shall include recommended amendments to existing structural unemployment programs, such as those provided in the Comprehensive Employment and Training Act, the Public Works Employment Act of 1976, to redirect such programs to reducing the unemployment problems of minority youth in general.

ADMINISTRATIVE PROVISIONS

SEC. 204. (a) Each department, agency, and instrumentality of the Federal Government is authorized and directed to cooperate fully with the Task Force in furnishing appropriate information to assist the Task Force in carrying out its functions under this section.

(b) The head of each department, agency, or instrumentality of the Federal Government is authorized to provide such support and services to the Task Force, upon request of the Chairman, as may be agreed between the head of the department, agency, or instrumentality and the Chairman.

(e) There are authorized to be appropriated such sums and eighty days after submission of its final report as required under section 105 of this section.

(d) The Task Force or, on the authorization of the Task Force, any subcommittee or members thereof, may, for the purposes of carrying out the provisions of this section, hold such hearings, take such testimony, and sit and act at such times and places as the Task Force deems advisable. Any member authorized by the Task Force may administer oaths or affirmations to witnesses appearing before the Task Force or any subcommittee or members thereof.

(e) There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.

REPORT

SEC. 205. (a) Upon submission of the final report, the President shall take steps to ascertain the views of each affected executive agency, and shall make a report, so at the time of the next submission of the Economic Report required under section 3 of the Employment Act of 1946, but in no event later than January 20, 1980, which sets forth the President's recommendations for reducing youth unemployment. Such report shall comment on—

(1) the desirability, feasibility, and cost of implementing each of the Task Force recommendations and the actions taken or planned with respect to implementation; and

(2) recommendations with respect to any legislation proposed by the Task Force, the need for any alternative or additional legislation to implement the recommendations of the Task Force, and any other proposals to strengthen and reach the goals delineated in section 103(2)(B).

(b) In no event shall the President alter the established goal as outlined in section 10 (2)(B) and any change in the Task Force recommendations shall be made in furtherance of that goal However, the President shall establish for both minority youth unemployment and youth unemployment in general a specific numerical goal which in terms of labor-market tightness is equal to 3 per centum adult unemployment.

APPROPRIATIONS

SEC 206. There is authorized to be appropriated such sums as may be necessary to carry out the purposes of this title.

TITLE III—POLICIES AND PROCEDURES FOR CONGRESSIONAL REVIEW

REVIEW OF ECONOMIC REPORT BY JOINT ECONOMIC COMMITTEE; ESTABLISHMENT OF SHORT-TERM CONGRESSIONAL GOALS

SEC. 301. (a) In conjunction with its review of the Economic Report, the Joint Economic Committee shall review and analyze the policies and programs recommended by the President and the short-term and medium-term goals under section 3(a)(2) and section 4(b) of the Employment Act of 1946, along with the statement of the Board of Governors of the Federal Reserve System transmitted under section 8 of that Act.

(b) On or before March 15 of each year, each legislative committee of the House of Representatives and the Senate shall submit to the Joint Economic Committee, for use by the Joint Economic Committee in conducting its review and analysis under subsection (a), a report containing the views and recommendations of the submitting committee with respect to aspects of the Economic Report which relate to its respective jurisdiction.

(c) Prior to consideration of the first concurrent resolution on the budget, the members of the Joint Economic Committee who are Members of the House of Representatives may report to the House, and the members of the Joint Committee who are Members of the Senate may report to the Senate, an amendment to said concurrent resolution incorporating such additions, alternatives and modications to the matters set forth in the resolution as the Joint Committee deems appropriate and in accord with the purposes of this Act and the Employment Act of 1946.

AMENDMENTS TO BUDGET ACT

SEC. 302. (a) Section 301(d) of such Act is amended—

(1) by redesignating paragraphs (1) through (8) as paragraphs (2) through (9), respectively; and

(2) by inserting immediately before paragraph (2) (as so redesignated) the following new paragraph:

"(1) a summary analysis of the levels of revenues and budget authority and outlays designed to implement the economic assumptions and objectives which underlie each of the matters set forth in such concurrent resolution;".

(b) Section 301(c) of such Act is amended—

(1) by striking out "Joint Economic Committee and" in the first sentence and

(2) by striking out the second sentence.

EXERCISE OF RULEMAKING POWERS

SEC. 303. The provisions of this are enacted by the Congress—

(1) as an exercise of the rulemaking power of the House of Representatives and the Senate, respectively, and as such they shall be considered as part of the rules of each House, respectively, or of that House to which they specifically apply, and such rules shall supersede other rules only to the extent that they are inconsistent therewith; and

(2) with full recognition of the constitutional right of either House to change such rules (so far as relating to such House), at any time, in the same manner and to the same extent as in the case of any other rule of such House.

Mr. QUIE (during the reading). Mr. Chairman, I ask unanimous consent that the amendment in the nature of a substitute be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. QUIE. Mr. Chairman, for several days now we have been debating this bill, and I hope by now it is clear that we are not debating full employment—we are debating the means of arriving at full employment. My Republican colleagues and I are for full employment, but not the full employment proposed in H.R. 50. We support full employment that is real; real full employment is accomplished by assuring that real wages will rise while taxes decrease; by assuring that the Government will spend less of its citizens' tax dollars; by assuring that our resources shall be directed toward permanent, long-term productive employment in the private sector; by assuring farmers that they will not be left out. We support full employment, but real full employment can be achieved only by addressing the problems in a more comprehensive way than that proposed in H.R. 50. Only by utilizing such a comprehensive approach can we deal with the multifacted nature of our current economic situation, and reclaim those resources which are most valuable, but are currently being wasted; namely, our people, and particularly our youth.

First, this amendment sets the goals of 4 percent unemployment among Americans age 16 and over and 3 percent among Americans age 20 or over. It specifies, however, that these goals shall be achieved without the use of public service employment. Clearly, it is not aiding the unemployment problem to shift people from one public payroll such as welfare, to another. The employment and unemployment figures with which we deal must accurately reflect private sector employment; to do otherwise would be to perpetrate another cruel hoax on the American people. We certainly recognize that public service employment has a valid role in the effort to find useful jobs—but it must not be an end in itself, nor should employment figures be distorted by including PSE participants in private sector figures.

Second, my amendment sets a goal, coequal to the above-mentioned unemployment goals, of an annual inflation rate not to exceed 3 percent. My colleagues from both sides of the aisle have agreed that there is no tradeoff; further agreement was reached in recognizing the impact of inflation not only on the unemployed and the elderly, but even on those who are employed. We must set aside our preconceived notions than an inflation goal is a partisan issue; certainly inflation affects us all, despite our political affiliation, and we must address it in any comprehensive approach to our economic problems.

A third goal, farm income at 100 percent of parity at the marketplace, is set by my amendment. There is no need to settle for the latest parity ratio, which stands at 66 percent. As recently as August of 1973, we not only reached 100 percent of parity, but 106 percent. Such a goal is attainable and desirable, and should be an integral part of any economic policy which is meant to deal with the problems of all Americans.

Achieving a balanced budget seems to be something we could agree upon as well—the fact that the President has promised to achieve a balanced budget by 1981 should serve to assure my reluctant colleagues that we are not imposing upon the President or ourselves some Republican pipedream. It is a challenge, to be sure, but one which we have avoided for long enough. There is a no more appropriate time, in my mind, to commit ourselves than now. A critical part of economic revitalization is the achievement of a balanced budget. Declaring our intent to cut back our spending of tax dollars not only is a step toward economic revitalization, but proves to the citizens of this country that we are indeed serious about reversing negative trends.

Another integral part of economic revitalization is tax reduction. As the gentleman from New York (Mr. KEMP) so succintly put it while addressing this body last week, we must work on the supply and production side of the economy, not just on the demand and consumption side. We must deal with the disincentives which currently exist for working and investing. We must enact permanent tax reductions, both corporate and individual, thereby rewarding personal savings, working, and business expansion—providing the necessary incentives to the private sector for creation of additional jobs.

Finally, the amendment seeks to achieve a reduction of minority youth unemployment age 16 to 24 to that of nonminority youth, and unemployment among all youth age 16 to 24 to that among adult males age 24 and over. Youth unemployment has remained critically high, even during months when the overall unemployment rate has remained steady or declined. Last month, youth unemployment climbed to over 17 percent, which is intolerable. My amendment, in addressing this structural unemployment problem, would establish within the Office of the President a Task Force on Youth Unemployment. The task force will identify the causes of youth unemployment and within 1 year after appointment, report to the President and Congress its recommendations for reducing minority youth unemployment.

This amendment which I have offered as a substitute to H.R. 50, addresses unemployment not in a vacuum, but as one part of a lagging economy, hampered also by inflation, high taxes, and a large deficit. It is a realistic approach to very real problems—and will lead us to real full employment. To oppose my substitute is to ignore the needs of youth, of farmers, of taxpayers, of the unemployed. I hope my colleagues will choose to stop shirking their responsibility and face these problems head on by adopting this comprehensive approach to the problems which have plagued us all for too long.

Mr. HAWKINS. Mr. Chairman, I rise in opposition to the amendment in the nature of a substitute offered by the gentleman from Minnesota (Mr. QUIE).

Mr. Chairman, I will take only a limited time, because I believe that the membership have been most patient and I believe that we are at the end now of a very long debate and that it will not be popular for me to extend that debate much longer.

The motives to substitute the Quie amendment's provisions for the bill I think should be thoroughly understood. All of the programs in title II of the bill will be stricken. These are structural policies and programs including public works, countercyclical programs, aid to State and local governments and the others which are designed to work in conjunction with the so-called macroeconomic policies, that is the fiscal and monetary policies of the Nation.

It has been demonstrated that we cannot accomplish the goal of limiting inflation and reducing unemployment by a broad economic policy such as fiscal and monetary ones who had seven tax reduction programs since 1960. They have stimulated the economy possibly for as long as 15 to 18 months, and then they have run their course and we have had to renew them. That is what has happened last year and this year as well, and I am anticipating maybe the same thing next year. So we have had to rely, in addition to these broad policies, on structural programs. This is the way of reducing inflation. We cannot do it otherwise, and it is a contradiction to say that one is for inflation and then not to agree to the reduction of those unemployment rates of certain groups and in certain geographic areas. It would not operate. It has not operated successfully in the past, and there is no reason why we should expect it to operate in the future.

In the past several days I think all of us have had an opportunity to vent our feelings, to state our positions, to take political positions, and we have done that. We have taken a position against inflation. We have supported and taken a position, a strong position, on a balanced budget. We have taken a position for full employment and for the other issues that probably all of us are going to be using in our campaign, and it seems to me that this is not the time to turn our backs and turn the country back to the early days of the 1930's. This is the time to go forward. I think the bill is balanced and structured to do that. There is something in the bill for everybody. The bill is a very strong private sector bill. The bill merely says that all of us will be willing to bind ourselves in order that each of us will help the other, and that is the nature of the bill.

I think despite some of the amendments that we have accepted, the bill is still a strong one. I ask the Members to support it. I think there is not a thing in this bill that would embarrass a single Member of this House. I think it is something that we will look forward to in the years ahead as having been a proud moment when we recommitted ourselves to the Employment Act of 1946, and that we will no longer have in the midst of this country a situation in which men and women will be fighting garbage in their alleyways as they did in the 1930's. We can go forward with a balanced economy, and it will help everyone, all Americans alike.

Mr. RHODES. Mr. Chairman, I move to strike the requisite number of words, and I rise for the purpose of speaking in favor of the amendment.

Mr. Chairman, first I want to congratulate my good friend, the gentleman from California (Mr. HAWKINS), on his statement that he made, and also on the manner in which he has conducted the bill on the floor. The gentleman from California is a very able Member of the House, and he has certainly demonstrated his dedication to the principles of full employment on the floor. Again I congratulate him.

I do not think that the next statement I make will be applauded, at least not from both sides, because I now must give my true appraisal of the situation as we now see it. We have debated the bill. We have amended the bill. In fact, we have amended it to the point that those of us who have been here for a few years will recall that somebody would have come down to the well before the final vote and asked for an engrossed copy. An engrossed copy of a bill was asked for when the bill had been substantially amended so that it was very difficult for the Members to know exactly what was in it. I find this bill to be in that situation.

I do understand, however, that there is a substitute which is offered that I do understand and which is a good bill. It is a bill which addresses itself to the problem of unemployment, and it hits it by a rifle shot where it lies. Most of the areas of unemployment which are apparently unmanageable are in youth.

Youth, and without race, color, or creed, these are the people who are mainly the ones unemployed. The substitute amendment offered by the gentleman from Minnesota asks that a study be made for the purpose of determining the causes of youth unemployment and making recommendations to do something about it.

Now, I think that is important. I think that this is a very good basis upon which a bill should be built.

Also, the minority in its substitute offers a statement of principles, to which I commend the reading of everybody. It is a statement of principles which sets

forth our idea of what causes unemployment and what to do about it. We think that unemployment is caused by underinvestment in the economy, the fact there are too many people who do not have skills.

We will recall, those of us who have been here as long as I have, that the Manpower Training Act was a Republican motion to recommit offered by the gentleman from Missouri (Mr. Tom Curtis) back in 1962. Ever since that time we have been dedicated to the principle of manpower training, so that any individual who wants to work or is able to work can acquire a skill which is marketable. We believe in this and the substitute sets that forth as a principle.

We think that the way to take care of unemployment in this country is to make it possible for everybody to have a job in private enterprise. We do not believe in employment through the public sector. We think that a job in the public sector is no better than a palliative or even a bandaid, if you will, on the problems that an unemployed person has. Unemployment is a personal tragedy. It is a tragedy to the family. It is a tragedy to the individual. It is the cruelest thing that can happen to an individual in a free society. We want to do something about that. We think that the substitute does.

So, Mr. Chairman, I commend to the House the substitute offered by the gentleman from Minnesota. I hope it will be adopted so that when we finally vote, we will at least know what we are voting for.

Mr. WRIGHT. Mr. Chairman, I rise in opposition to the substitute amendment.

This brings us toward the end of a long struggle, a struggle that began back in January of 1974. For 4 years the gentleman from California, Mr. GUS HAWKINS, and together with him over most of that time that great American warrior for people, Hubert Humphrey, traveled the country, took testimony, listened to business, listened to labor, and listened to the heartbeat of the unemployed.

Now, finally we come to this historic day. It is the culmination of the labors, the dreams, the hopes, and the prayers of many; but among those, one stands out and that is that little giant from California, GUS HAWKINS.

I am so very happy that the minority leader took occasion to acknowledge the leadership that GUS HAWKINS has displayed as he brought this bill through the labyrinth, over the hurdles, and finally to the House floor and now through the briar traps that awaited it here.

I know that the gentleman from California appreciates the praise, but I believe he will appreciate even more the support that we are going to give the gentleman's labors.

Now, we have just had presented to us a substitute. The gentleman from Arizona, my distinguished friend, the minority leader, suggests that maybe we ought to vote for the substitute, because it is something the gentleman understands, rather than voting for the bill over which we have labored and which for the 2 weeks we have perfected and amended and modified and surely should understand much better. Surely, every Member of this House understands what is in this bill. I am not sure that I do understand what is in the substitute, except that to some extent it is a rehash of the amendments which earlier we in our collective wisdom have seen fit to reject.

The substitute would set a goal of going back to the taxes of 1965. That might in itself be a worthy goal. I do not know why the year 1965 may have been arbitrarily selected, but many changes have occurred, of course, in this Nation since 1965. Our gross national product has grown enormously. We have a different situation today.

Thomas Jefferson once said:

> We might as well require a man to wear yet the coat which fitted him as a boy as civilized society to remain forever under the regimen of their ancestors.

I believe that this House has worked its will. It has rejected amendments that were pernicious; it has barely rejected some amendments which I regarded as unwise; it has adopted amendments which in its judgment would improve the bill.

This is an historic bill. It ranks alongside that great landmark, the Full Employment Act of 1946. If there are those who believe that a statement of policy to which the Congress as an institution commits itself does no good, I invite their attention to the great sweeping changes for good that have occurred since 1946 when for the first time we established full employment as an official national goal.

The gentleman from Arizona (Mr. RHODES) says that he wants a "rifle shot" to treat the unemployed youth. This bill does that, and it also treats the unemployed at every age. It treats those who cannot find jobs, because of a lack of marketable skills; it treats the problems of the 40- and 45-year-olds who are suddenly thrown out of a job and find it hard to get one.

So I say that instead of a rifle shot for the unemployed, this substitute, if adopted, would be more like a rifle shot at the unemployed, because it would remove too many from the beneficial thrust of this legislation. What we seek today is a broad-based bill, a bill that recognizes the primacy of the private sector, a bill that recognizes the necessity to curb inflation, and a bill that recognizes the reality that a moving, growing economy, utilizing to its fullest capacity the industrial strength of this Nation, does fight inflation by keeping down the unit cost of production. These goals are in the bill. There is no need to narrow them.

So after all is said and done, the House has worked its will. We have perfected the bill to the best of our collective ability. Now let us give to the gentleman from California, GUS HAWKINS, and those who have labored so long the additional compliment of our support by rejecting this suddenly drafted, hastily conceived substitute and supporting the bill on final passage.

Mr. JEFFORDS. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment in the nature of a substitute.

Mr. Chairman, I rise in strong support of the amendment in the nature of a substitute, because it targets on that area which all the statistics indicate is the area of need, and that is youth unemployment.

An analysis of statistics illustrates this graphically. Although no specific computer run has been made, the figures available indicate clearly that the bulk of the problem regarding the real seriously unemployed is the youth.

In January of 1978, total unemployment, including CETA jobs within that group, was roughly 7 million. If we subtract: those awaiting jobs, about 170,000; those unemployed 4 weeks or less, about 3 million; those seeking part time work about 1 million; and those that voluntarily left employment around 900,000, we are left with around 3 million seriously unemployed. Obviously, there are duplications and this figure would have to be adjusted accordingly, as would the youth unemployment figures.

With youth unemployment at around 1.6 million it is clear that the bulk of the problem lies with the youth of this country. That is the area that we should concentrate on. That is what the Quie substitute does. Let us help those that need the help the most. Why set up a whole elaborate structure to do what we already know needs to be done.

The CHAIRMAN pro tempore. The question is on the amendment in the nature of a substitute offered by the gentleman from Minnesota (Mr. QUIE).

RECORDED VOTE

Mr. QUIE. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 137, noes 276, not voting 21, as follows:

[Roll No. 163]

AYES—137

Abdnor	Goldwater	Poage

NOT VOTING—21

Akaka	Frenzel	Sikes
Anderson, Ill.	Frey	Teague
Baucus	Krueger	Thornton
Brown, Mich.	McClory	Tucker
Buchanan	Madigan	Ullman
Clausen, Don H.	Rahall	Young, Alaska
	Robinson	
Flood	Ryan	

The Clerk announced the following pairs:

On this vote:

Mr. Krueger for, with Mr. Akaka against.
Mr. Teague for, with Mr. Flood against.
Mr. Robinson for, with Mr. Rahall against.
Mr. McClory for, with Mr. Sikes against.
Mr. Madigan for, with Mr. Baucus against.
Mr. Frenzel for, with Mr. Ullman against.

Mrs. LLOYD of Tennessee changed her vote from "aye" to "no."

So the amendment in the nature of a substitute was rejected.

The result of the vote was announced as above recorded.

● Mr. KEMP. Mr. Chairman, I would like to summarize at this time the reasons why I must vote against the Humphrey-Hawkins bill and reiterate my belief that the only road to full employment is by lowering the tax rates and restoring incentive for both the worker and investor.

H.R. 50 is really a hoax on the unemployed of America because it provides absolutely no means for achieving the full employment goal. The purpose of my amendment, yesterday, which would have required a goal for lowering the tax rate by 30 percent in 3 years, was to help supply that means. The fact is that tax rate reduction is the only proven means of creating large numbers of permanent jobs in the private sector, as shown by the results of the Kennedy tax reductions in the early 1960's and the experience of West Germany and Japan in the 1950's and 1960's. President Truman, Senator Robert A. Taft, and Andrew Mellon were all strong proponents of lower tax rates.

Insofar as the bill provides a strategy for achieving full employment it relys upon outmoded Keynesian economic policies which are so discredited today. H.R. 50 will lead to expanding public service jobs, which are notoriously ineffective in creating permanent jobs. It is a well known fact, for example, that public service jobs have as much as a 90 percent substitution factor—meaning that 90 percent of the jobs were already created anyway in the public sector. Already 1 out of every 5 jobs in America is in government and going this route will totally "Britanize" our economy.

The bill would upset the House committee structure by vesting great power in the Joint Economic Committee, largely at the expense of the House Budget Committee. Yet the budget process which is to be overseen by the Budget Committee has already proven to be much more complicated than anyone believed. So now we will add but one more layer of procedure on top of our already complicated procedures. I think the results will be disastrous and centrally planned economics all over the world are in a state of confusion and contraction economically.

Thus I can only reiterate the reasons why I believe that the Congress must adopt a massive tax rate reduction as soon as possible if it is to do something constructive toward achieving the goal of full employment without inflation.

What proof have we that a tax-rate reduction will lead to additional employment?

The proof is twofold.

On a theoretical level we know that all taxes constitute a wedge between gross wages and net wages. Thus every time taxes go up, whether they are on workers or employers, it increases the wedge and simultaneously increases the total cost of employment and reduces disposable income. Consequently, employers hire fewer workers and workers have less incentive to work to their potential.

In addition, there is ample historical evidence to show that when tax rates are reduced there is an increase in employment.

In the 1920's tax rates were reduced across the board by nearly two-thirds, leading to a vast economic expansion.

After World War II tax rates were reduced, thereby aiding the postwar recovery.

And in 1964–65 tax rates were reduced by roughly a fourth, leading to a substantial reduction in the employment rate and a tremendous economic boom. Table I demonstrates the effects of the Kennedy tax cuts on the unemployment rate.

TABLE I.—UNEMPLOYMENT RATE AFTER THE KENNEDY TAX CUTS

[In percent]

Year	All workers	Blacks	Black males 20 years+
1961	6.7	12.4	11.7
1962	5.5	10.9	10.0
1963	5.7	10.8	9.2
1964	5.2	9.6	7.7
1965	4.5	8.1	6.0
1966	3.8	7.3	4.9

One might now ask: Why did unemployment rise again a number of years after passage of these tax rate reductions?

The answer is that in each case the economic expansion created by the tax rate reduction was brought to an end by a direct or indirect increase in taxes. In 1932 Herbert Hoover raised tax rates to roughly their World War I level in an effort to balance the budget. The rates were roughly tripled for all brackets. Tax rates were raised again in 1934, 1936, and 1938, thereby prolonging the economic depression.

The tax cuts implemented after World War II were undone by President Truman to pay for the Korean war. The economic stagnation of the Eisenhower administration is largely the result of the fact that after the Korean war tax rates were not reduced back to their pre-World War II level. Again, the goal was to increase revenues to balance the budget.

The beneficial effects of the Kennedy tax cuts was undone by an increase in taxes resulting from inflation. Because the quantity of money and Government spending went up at such a rapid rate during the latter part of the 1960's and the early part of the 1970's, there were too many dollars chasing too few goods. As the inflation increased nominal incomes both marginal and average tax rates for the vast majority of Americans increased. Because of the progressive income tax, tax revenues go up faster than incomes. Tax revenues go up approxi-

mately 1.6 percent for every 1 percent increase in the Consumer Price Index.

It is true that Congress has reduced taxes several times since 1965, but marginal tax rates have remained intact. Consequently, only those at the very bottom of the income scale have benefited from these so-called tax reductions.

Consequently, a program for economic expansion must include a reduction in marginal rates.

Some conservatives, like Herb Stein, former chairman of the Council of Economic Advisers, may argue that the Nation does not need a reduction in tax rates because there is no economic necessity for it. Stein also argues that 7 percent unemployment is full employment.

Well, I do not believe this, and I do not think very many other people do either. We certainly are not willing to accept it. But even if Stein were correct, the problem is that tax rates are not static. As long as we have inflation taxes and tax rates will go up. In table II I have shown what will happen in just the next 3 years, if we have 7 percent inflation and incomes rise by the same amount. Although there is no increase in purchasing power taxes go up dramatically, especially when one also takes into consideration social security taxes and New York State income taxes.

TABLE II.—FAMILY OF 4 WITH 1 WAGE EARNER ASSUMING 7 PERCENT INFLATION WITH FAMILY INCOME RISING BY THE SAME AMOUNT

Year	1978	1979	1980	1981
1. Adjusted gross income in 1978 dollars	$10,000	$10,000	$10,000	$10,000
2. Adjusted gross income in current dollars	10,000	10,700	11,449	12,250
3. Federal income tax	450	570	722	874
4. Social security tax	605	656	702	815
5. New York State income tax	260	302	347	397
6. Total taxes	1,315	1,528	1,771	2,086
7. Disposable income	8,685	9,172	9,678	10,164
8. Real disposable income	8,685	8,472	8,229	7,914
9. Increase in nominal income over 1978 (percent)		7.0	14.5	22.5
10. Increase in taxes over 1978 (percent)		8.6	17.6	29.5
11. Increase in disposable income over 1978 (percent)		5.6	10.3	17.0
12. Increase in real disposable income over 1978 (percent)		−2.4	−5.2	−8.9
Adjusted gross income in 1978 dollars	$15,000	$15,000	$15,000	$15,000
Adjusted gross income in current dollars	15,000	16,050	17,173	18,375
Federal income tax	1,385	1,613	1,855	2,124
Social security tax	907	984	1,053	1,222
New York State income tax	368	439	518	614
Total taxes	2,660	3,036	3,426	3,960
Disposable income	12,340	13,014	13,747	14,415
Real disposable income	12,340	11,964	11,574	11,040
Increase in nominal income over 1978 (percent)		7.0	14.5	22.5
Increases in taxes over 1978 (percent)		14.1	28.8	48.9
Increase in disposable income over 1978 (percent)		5.5	11.4	16.8
Increase in real disposable income over 1978 (percent)		−3.0	−6.2	−10.5
Adjusted gross income in 1978 dollars	$20,000	$20,000	$20,000	$20,000
Adjusted gross income in current dollars	20,000	21,400	22,898	24,500
Federal income tax	2,536	2,886	3,269	3,731
Social security tax	1,210	1,312	1,404	1,629
New York State income tax	1,160	1,314	1,487	1,685
Total taxes	4,906	5,512	6,160	7,045
Disposable income	15,094	15,888	16,738	17,455
Real disposable income	15,094	14,488	13,840	12,955
Increase in nominal income over 1978 (percent)		7.0	14.5	22.5
Increase in taxes over 1978 (percent)		12.3	25.6	43.6
Increase in disposable income over 1978 (percent)		5.3	10.9	15.6
Increase in real disposable income over 1978 (percent)		−4.0	−8.3	−14.2
Adjusted gross income in 1978 dollars	$30,000	$30,000	$30,000	$30,000
Adjusted gross income in current dollars	30,000	32,100	34,347	36,751
Federal income taxes	5,424	6,173	6,969	7,924
Social security taxes	1,071	1,404	1,588	1,975
New York State income tax	1,992	2,286	2,600	2,493
Total taxes	8,487	9,863	11,157	12,842
Disposable income	21,513	22,237	23,190	23,909
Real disposable income (1978 dollars)	21,513	20,137	18,843	17,158
Increase in nominal income over 1978 (percent)		7.0	14.5	22.5
Increase in taxes over 1978 (percent)		16.2	31.5	51.3
Increase in disposable income (percent)		3.4	7.8	11.1
Increase in real disposable income (percent)		−6.4	−12.4	−20.2

It is for this reason that I introduced the Tax Reduction Act, together with 145 cosponsors in the House, to:

First. Reduce all individual income tax rates by roughly 33 percent over the next 3 years: from 14 to 8 percent at the bottom and from 70 to 50 percent at the top.

Second. Reduce the corporate income tax rate from 48 to 45 percent.

Third. Increase the corporate surtax exemption from $50,000 to $100,000.

I believe that such a program will restore full employment to this country.

Some may say to this: Yes, tax reduction is fine, but an across-the-board reduction does more for the rich.

I respond to this in two ways.

First, Treasury Department data indicates that we have just about reached the limit on cutting taxes for low incomes. In 1975 those with incomes under $8,930 paid only 7.1-percent of all individual income taxes. Those with incomes above $8,930 paid the other 92.9 percent. In other words, the poor are paying virtually no taxes now so we can not really cut them any more. What the poor really need are jobs and income growth, and this can only be accomplished if we restore incentive to the economy by reducing tax rates across the board.

Furthermore, it can be shown that lower tax rates actually cause the rich to pay more taxes. As the President put it in 1924:

> I agree completely with those who wish to relieve the small taxpayer by getting the largest possible contribution from the people with large incomes. But if the rates on large incomes are so high that they disappear, the small taxpayer will be left to bear the entire burden. If, on the other hand, the rates are placed where they will produce the most revenue from large incomes, then the small taxpayer will be relieved.

And the experience of the Kennedy tax cuts, in which the top rate was lowered from 91 to 70 percent, proves this thesis. If one examines the data one will see that the percentage of total income taxes paid by the wealthy from 1964 to 1968 went up considerably as people were hired out of tax shelters into productive investment.

The only other point which needs to be considered is that of inflation. Many on the minority side are especially concerned about this, and I share their concern. But one thing I do not believe is that high unemployment and high interest rates reduce inflation. Quite the contrary. If they lead to a reduction in the growth of GNP they may cause inflation. Conversely, a program which stimulates the total supply of goods and services, in conjunction with a moderate monetary policy, will reduce inflation.

In conclusion I would just like to emphasize once again my support for the goal of full employment. But without emphasis on tax rate reduction I do not see how we will ever achieve this goal, despite the rhetoric contained in H.R. 50.●

● Mr. STOKES. Mr. Chairman, I rise in support of H.R. 50, the Full Employment and Balanced Growth Act of 1978.

The necessity of this legislation is obvious. All one must do is look at the unemployment levels during the past few years, and the statistics reveal that our country is facing a profound human and economic crisis.

The figures are disgraceful. The unemployment rate averaged 7 percent in 1977. But Mr. Chairman, this overall figure does not reflect the inequitable distribution of unemployment among minorities. In 1977, the black unemployment rate was double the overall rate and averaged more than 14 percent; but even more astounding is the fact that in 1977 40.3 percent of our black youth were unemployed. In my district in Cleveland, black youth were unemployed in excess of 55 percent and black males in excess of 25 percent.

These levels of joblessness have serious economic, human, social, and even moral consequences. The economic costs are substantial: Lost income and revenue, lower productivity, and higher expenditures for welfare, food stamps, and unemployment compensation. The human and social costs are less obvious, but still serious. Unemployment destroys hope and confidence; it diminishes self respect and leads to increased crime, drug abuse, and mental illness. High levels of joblessness also retard or halt the advances of the poor, minorities, and women.

Additionally, senior citizens also have an important stake in achieving a prosperous economy with adequate job opportunities. The high unemployment coupled with high inflation of the past decade has resulted in middle-aged and older workers being pushed out of the job market and remaining unemployed for long periods of time. Elderly people, too, want and need the opportunity for gainful employment and continuing attachment to the mainstream of our society. And many of the social programs

which elderly people rely upon can only operate effectively in a healthy economic climate.

Many argue that recent declines in unemployment are a positive indication of economic growth, but let us face it, the longest and deepest recession since the Great Depression is still with us and there are no serious immediate signs that it is on its way out. But this vital legislation represents an economic policy bill which focuses the Nation's resources on greatly reducing unemployment while controlling inflation. It establishes in law our country's commitment to a job for every American able and willing to work. And the bill is practical because it mandates specific goals and timetables for the reduction of joblessness and outlines a comprehensive process of planning, economic coordination, and program development to reach these goals. Additionally, the bill also includes strong anti-inflation measures and provides a much needed framework for a concentrated and flexible attack on joblessness.

Existing law, the Employment Act of 1946, does not thoroughly address today's employment problems because it does not provide the mechanisms by which the Federal Government can guarantee job opportunities.

The Humphrey-Hawkins bill amends and strengthens this act by calling for a meaningful job for every person able, willing, and seeking to work at fair rates of compensation. H.R. 50 sets forth the specific goal of 4 percent unemployment to be reached within no more than 5 years, and stresses that this is only an interim goal—the ultimate goal being to provide a useful job at a decent wage to everyone willing and able to work. And the bill guarantees employment mechanisms by requiring the President to submit an economic report to the Congress each year spelling out the programs and policies to reach the goals set.

Mr. Chairman, the levels of unemployment are unacceptable and the tremendous human costs of unemployment are intolerable. Unemployment represents a vast and tragic waste of our human and material resources.

I believe all Americans are entitled to the basic human right to work. This country does not lack the material means and know-how to make this right obtainable. I urge my colleagues to join me in supporting this legislation, which I feel, will set our country on the path of a full employment economy.

In closing, Mr. Chairman, I want to commend my colleague, the gentleman from California (Mr. HAWKINS) for his perseverance in promoting this historic legislation. The passage of this legislation tonight will be a fitting tribute to our beloved late Senator Humphrey and to GUS HAWKINS who is one of the most able Members of this House.●

● Mr. LUKEN. Mr. Chairman, I am in support of the amendment of the gentleman from Pennsylvania (Mr. MARKS). It is essential that this Congress support section 207, providing that the Economic Report of the President "shall, as appropriate" review and assess existing Federal programs and policies which affect business investment decisions. It is also of significance that the President is required under this section to recommend the measures to improve existing programs concerned with private capital formation.

We have not really recovered completely from the recession which gripped the country during the past 3 years. We have had persistent problems of lagging regional growth and high unemployment. A primary cause of the deterioration of these regional economies, whether in rural, suburban, or urban areas, is the severly limited availability of equity, venture, and debt capital to small- and medium-size enterprises.

Moreover, as has been pointed out in the "Annual Report of the Senate Select Committee on Small Business" only 11 corporations with a net worth of less than $5 million were able to float new issues nationwide during the 23-month period ending in 1975. This fact, in itself, suggests an explanation for the sluggishness of certain regional economies.

Therefore, I support the purpose of the amendment to emphasize the importance of capital formation and the creation of jobs by specifically mentioning capital formation in the declaration of policy in title I, in the current and foreseeable trends set out in the Economic Board of the President, and in the statement of purpose in title II.

We should do everything possible to emphasize capital formation. The ability of this country to create jobs and reduce unemployment depends almost solely on its ability to equip workers and provide them with the means of production. If the civilian work force does rise as expected from 93 million in 1975 to 103 million in 1980, the total investment required will be substantial, and the goal will be elusive in view of the significant cost of providing a manufacturing job in American industry today.

It is therefore critical that we include in our declaration of national policy, a statement as to the necessary investment in the private sector. Many of us have been extremely concerned about capital formation, which has concerned many committees of this Congress, especially Ways and Means and Small Business Committee, the latter on which I serve. We are looking at the use of tax incentives to stimulate businesses and the avoidance of price controls and excessive government regulations as other means toward this end.

I am, therefore, happy to join in this significant effort to emphasize the importance of capital formation to jobs creation by supporting this amendment.●

○ Mr. HANNAFORD. Mr. Chairman, while I will vote for the passage of H.R. 50, I will strongly urge the conference committee to delete the provision for 100 percent parity for farm prices. If this provision is not deleted, however, I will have no choice but to oppose this legislation because of its deleterious effects on inflation.

Mr. Chairman, the importance of the farmer in our economy cannot be underestimated. Farmers need and deserve adequate incomes, just as much as other hard-working individuals in this Nation. Granting farmers 100 percent parity for farm commodities, though, is the wrong approach. In effect, this provision will fuel inflation and ultimately do more harm to the farmers and consumers of this country. This is not what was intended and this serious mistake must be corrected.

Mr. Chairman, H.R. 50 is designed to promote the economic well-being of the Nation as a whole. By advocating 100 percent parity for farmers we are saying that farm incomes are going to be protected at the expense of what may happen to other sectors of the economy. Given the Department of Agriculture's analysis of the projected results of a 100 percent parity program for farmers, it would be irresponsible, to say the least, for the Congress to enact H.R. 50. The Agriculture Department estimates that within 1 year after implementation of a 100 percent parity program that retail food prices would increase by more than 20 percent; that beef prices would rise by more than 50 percent; and pork by at least 40 percent. In addition, rising prices for farm commodities would reduce exports, with wheat exports falling by more than 30 percent; feed grain exports by 34 percent; rice by 45 percent, and soybeans by 4 percent. It is evident that the overall economy stands to suffer greatly. The impact of 100 percent parity could reduce GNP within 2 years by as much as $30 billion, the Federal deficit would increase by at least $9 billion, and unemployment would rise as well. We would be faced with across-the-board increases in domestic food prices, reduced consumption, and a frightening balance-of-payments situation.

Mr. Chairman, H.R. 50 represents a reasonable approach to solving our national economic problems. We have avoided making promises that simply cannot be met. That is why the 100-percent parity provision is even more repulsive. It is raising false hopes in the hearts of many farmers. It is deceiving to farmers who believe that this is the answer to their problems. It is deceiving to the entire Nation because 100 percent parity means greater inflation. Farmers should be aware that while their incomes may initially rise by $20 billion in 1978 as a result of the 100-percent parity program, by 1982 production expenses will rise by $47 billion due to higher prices for feed and livestock, higher storage costs, property taxes, and depreciation on structures.

The parity concept has also been seriously challenged. Debate on the efficacy of the concept points out that parity represents an inadequate and misleading indicator of the economic position of farmers; that it prohibits marketplace changes in commodity prices; and that parity prices do not reflect inflation. In addition, the artificial price supports of such a system tend to delay necessary adjustments in resource allocation.

Mr. Chairman, the responsible position for the Congress to take would be to follow current farm policies as set forth in the Food and Agriculture Act of 1977. Existing policies emphasize the need to

expand feed grain reserves. This is consistent with farm legislation of the past 15 years which reflects a need for reducing Government interference in setting reasonable farm prices and, thus, promotes a lasting solution to farm income fluctuations and overall economic stability.●

● Mr. LONG of Louisiana. Mr. Chairman, I rise in support of the amendment offered by Mr. BRECKINRIDGE.

It is important that this bill add a declaration of policy that the citizens of rural areas—such as those in my own congressional district—will not be overlooked in the economic policies we create.

The provision directs the President, through appropriate agencies, to fully utilize loan and grant programs already available to him to stimulate the private sector and small businesses in small communities. It also mandates the President to report on the state of economic progress in small towns and rural areas as part of his annual Economic Report to the Congress.

The issue we face in our discussion today is how to create jobs without increasing inflation or jeopardizing the goal of a balanced budget within the next few years. Last year the congressional rural caucus gave us a preview of what could be done with a little creative thinking. The caucus proposed a budget of rural loan, grants and special programs to put $16 billion into small towns and communities to help build the infrastructure and community services needed to bring about orderly growth and development in rural America.

The strength of the proposal is its reliance on the Government as a catalyst to stimulate private capital, private enterprise, and private initiative to improve services and job opportunities in rural communities. The guaranteed loan programs are of little cost to the Government and offer a return many times over in jobs and taxes generated. Projections show creation of 2 to 3 million permanent, private sector jobs which would be more than 95 percent non-tax-dollar funded.

It is no secret that our rural communities suffer because they are credit short. Smaller commercial banks and financial institutions in those areas lack the reserves necessary to finance many local projects—particularly those which might involve extensive and long-term loans, such as the construction of community facilities, water and waste-disposal systems, and housing.

But by using Government guaranteed and insured loans, local community banks would be able to draw additional capital and free up existing financial reserves for additional loan making.

The benefit of such activity is clear. It not only creates jobs, but gives business and industry the incentives to invest in areas where the need is greatest. "Taking the work to the workers" is a concept that has been with us for some time. I think it is vital in establishing our new policy framework to insure the needed flexibility to direct economic stimulation to areas of greatest distress—namely our rural communities as well as our inner cities.

I plan to continue to press for the proposed caucus budget this year. The added impetus of this new policy declaration will be important in fulfilling the job-creating potential of expanded government loan authority.●

● Mr. HAWKINS. Mr. Chairman, now that the House has fully debated H.R. 50, and I am sure will pass the bill, I want to take this early opportunity to express my appreciation to the membership for what has taken place here during the last week and this week.

We have given our support to proposed legislation which in its importance may be ranked with the three or four most important domestic enactments of the Congress within this century.

We have not only reaffirmed a human right which no other right takes precedence over in a modern industrial society—the right to a job at fair pay for all those able, willing, and seeking to work. Now is not the first time that this right has been declared. But now is the first time that this body has given its approval to proposed legislation with sufficient teeth in it to translate that right into actuality through hard additional efforts during the years immediately ahead.

We have recognized that this human right to a job is economic in its means of achievement. In the course of doing so, we have written into the proposed legislation an interrelated series of policies and principles, and we have done this in the light of long experience.

We have approved goals and instrumentalities, both executive and legislative, of a general but nonetheless meaningful nature. These will enable the President and the Congress, working together over the years in the manner that our Constitution contemplates, to replace random and improvised specific programs and policies with a unified and coordinated series of programs and policies directed toward full employment.

In doing this, we should always recall a statement made in his final economic report to the Congress by the President during whose first term the Employment Act of 1946 came into being and was administered with unusual understanding and success. President Truman said:

> Under the Employment Act, full employment means more than jobs. It means full utilization of our natural resources, our technology and science, our farms and factories, our business brains, and our labor skills. The concept of full employment values ends as well as means; it values leisure as well as work; it values self-development as well as dedication to a common purpose; it values individual initiative as well as group cooperation. In the broadest sense, full employment means maximum opportunity under the American system of responsible freedom.
>
> And it is a concept which must grow as our capacities grow. Full employment tomorrow is something different from full employment today.

President Truman's words were indeed prophetic. After 30 years of experience, good in the main but disappointing in part, the Full Employment and Balanced Growth Act of 1978 draws upon all of that experience, and in my judgment uses it well.

The actions which we have taken during the last week have mainly strengthened further the bill brought to this floor after 3 years of careful consideration and revision. We have in some respects improved it as a planning instrument. We have made it a more effective vehicle for the reduction not only of unemployment, but also for the restraint and ultimate removal of inflation. We have clarified the intent and improved the means to balance the Federal budget in a fully healthy economy, while avoiding the danger of attempting without success to balance the budget at the expense of a full economy. We have amplified some of the other provisions of the bill in the right directions, and we have brought within its scope some groups, such as the handicapped and those in need of part-time rather than full-time work, who were not covered by the bill before or not covered clearly enough.

In the deliberations on this floor which have led to the approval of H.R. 50 by the House, I would like to express my deep appreciation to Members from both sides of the aisle. We also respect those Members who have differed from us in detail and considerably in principle and economic philosophy; and we thank them also for the fine spirit in which they have recognized the tremendous importance and lasting significance of the Full Employment and Balanced Growth Act of 1978.

All of us here in the House, working together, have demonstrated once again what can be done for the good of the American people by members of a free government in a free society.●

● Mr. PREYER. Mr. Chairman, it is with some regret that I find I must oppose the passage of H.R. 50, the Full Employment and Balanced Growth Act.

Indeed, the goal of this act—to reduce unemployment—is laudable. In North Carolina and across the Nation, the unacceptably high unemployment levels of recent history have brought both the pain of personal hardship and the embarassment of governmental inability to effectively address the problem. But I suggest that with the passage of H.R. 50 we could foster an inflation that would mean only more hardship and more embarrassment while we collectively provoke further erosion of the economy through this bill's provisions.

I wish as fervently as any of my colleagues that we could harmlessly induce lower unemployment with this or any other bill, but I must hesitate before I let my wishful thinking interfere with reality. I join John Kenneth Galbraith in warning my colleagues "not to engage in the wishful economics that causes them to hope that there is still undiscovered fiscal or monetary magic which will combine low unemployment with a low level of inflation."

I must object to this bill also on the grounds that it would have Congress inflicting such nonexistent "monetary magic" on the presumably and preferably independent Federal Reserve Board. H.R. 50 would have Congress "take such action as it finds necessary to insure closer conformity" between the Federal Reserve Board's economic plans and the Con-

gress' ideas on how to implement H.R. 50—a dangerous interference that could inject partisan politics into the mainstream of this country's monetary and investment system and effectively muffle what traditionally has been a strong voice in the public debate over proper economic policy.

Unfortunately, our vote on this bill is being seen as a "litmus test" of our loyalty to the current Democratic administration. Those of us who have supported the administration on tough issues like the deregulation of natural gas, the consumer protection agency, and the B-1 bomber must in good conscience, vote against this bill—yet we can continue, in equally good conscience, to count ourselves among the administration's supporters. Such a well-intentioned yet potentially damaging bill is a weak reed indeed for testing a Member's loyalty to an administration whose chief economic adviser, Mr. Charles Schultze, admitted.

I cannot assure you that we will be able to achieve a 4 percent unemployment rate by 1983 without risking more inflation.

It is equally unfortunate that our vote on H.R. 50 is being seen as a test of our commitment to improve the economic plight of the Nation's minority communities. The liberals who fell off the minority bandwagon on the busing issue and who are now touting H.R. 50 as a "real" test of minority support ignore the fact that the bill's potential for causing inflation would harm the poor vastly more than the middle class or the well-to-do.

This is a bad bill born of good intentions, but a bad bill just the same.●

The CHAIRMAN pro tempore. The question is on the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The CHAIRMAN pro tempore. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. NATCHER, Chairman pro tempore of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 50) to establish and translate into practical reality the right of all adult Americans able, willing, and seeking to work to full opportunity for useful paid employment at fair rates of compensation; to combine full employment, production, and purchasing power goals with proper attention to balanced growth and national priorities; to mandate such national economic policies and programs as are necessary to achieve full employment, production, and purchasing power; to restrain inflation; and to provide explicit machinery for the development and implementation of such economic policies and programs, pursuant to House Resolution 1057, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment to the committee amendment in the nature of a substitute adopted by the Committee of the Whole? If not, the question is on the amendment.

The amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT OFFERED BY MR. ASHBROOK

Mr. ASHBROOK. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. ASHBROOK. Unequivocally I am, Mr. Speaker.

The SPEAKER. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. ASHBROOK moves to recommit the bill H.R. 50 to the Committee on Education and Labor.

The SPEAKER. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER. The question is on the motion to recommit.

The motion to recommit was rejected.

The SPEAKER. The question is on the passage of the bill.

Mr. RHODES. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 257, nays 152, not voting 25, as follows:

[Roll No. 164]

NOT VOTING—25

Akaka	Frenzel	Sikes
Anderson, Ill.	Frey	Steers
Baucus	Krueger	Teague
Bingham	Long, La.	Thornton
Brown, Mich.	McClory	Tucker
Buchanan	Madigan	Ullman
Clausen, Don H.	Rahall	Winn
Flood	Robinson	Young, Alaska
	Ryan	

The Clerk announced the following pairs:

On this vote:

Mr. Akaka for, with Mr. Krueger against.
Mr. Flood for, with Mr. Sikes against.
Mr. Rahall for, with Mr. Teague against.
Mr. Steers for, with Mr. Frenzel against.
Mr. Madigan for, with Mr. Robinson against.
Mr. Ullman for, with Mr. Winn against.
Mr. Ryan for, with Mr. McClory against.
Mr. Bingham for, with Mr. Brown of Michigan against.

Until further notice:

Mr. Long of Louisiana with Mr. Anderson of Illinois.
Mr. Buchanan with Mr. Thornton.
Mr. Tucker with Mr. Don H. Clausen.

So the bill was passed.

The result of the vote was announced as above recorded.

The title was amended so as to read: "A bill to translate into practical reality the right of all Americans who are able, willing, and seeking to work to full opportunity for useful paid employment at fair rates of compensation; to assert the responsibility of the Federal Government to use all practicable programs and policies to promote full employment, production, and real income, balanced growth, adequate productivity growth, proper attention to national priorities, and reasonable price stability; to require the President each year to set forth explicit short-term and medium-term economic goals; to achieve a better integration of general and structural economic policies; and to improve the coordination of economic policymaking within the Federal Government.".

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. HAWKINS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill H.R. 50, just passed.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

AUTHORIZING CLERK TO MAKE CLERICAL AND CONFORMING CORRECTIONS IN THE ENGROSSMENT OF H.R. 50

Mr. HAWKINS. Mr. Speaker, I ask unanimous consent that, in the engrossment of the bill H.R. 50 the Clerk be authorized to correct section numbers, punctuation, cross references, and the table of contents to reflect the actions of the House in amending the bill H.R. 50.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

PERMISSION FOR COMMITTEE ON WAYS AND MEANS TO HAVE UNTIL MIDNIGHT TOMORROW, FRIDAY, MARCH 17, 1978, TO FILE REPORT ON H.R. 11518, DEBT LIMITATION EXTENSION

Mr. WAGGONNER. Mr. Speaker, I ask unanimous consent that the Committee on Ways and Means may have until midnight tomorrow, Friday, March 17, 1978, to file a report, along with any separate or minority views, on the bill (H.R. 11518) to extend the existing temporary debt limit.

The SPEAKER. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

PERMISSION FOR COMMITTEE ON AGRICULTURE TO HAVE UNTIL MIDNIGHT, SATURDAY, MARCH 18, 1978, TO FILE REPORT ON H.R. 11504, CONSOLIDATED FARM AND RURAL DEVELOPMENT ACT AMENDMENTS

Mr. WAGGONNER. Mr. Speaker, I ask unanimous consent that the Committee on Agriculture may have until midnight, Saturday, March 18, 1978, to file a report on the bill (H.R. 11504) to amend the Consolidated Farm and Rural Development Act, provide an economic emergency loan program to farmers and ranchers in the United States, and extend the Emergency Livestock Credit Act.

The SPEAKER. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

MAKING IN ORDER CONSIDERATION OF HOUSE JOINT RESOLUTION 796, SUPPLEMENTAL APPROPRIATIONS FOR DISASTER RELIEF, ON TUESDAY NEXT OR ANY DAY THEREAFTER

Mr. MAHON. Mr. Speaker, I ask unanimous consent that it may be in order on Tuesday next, or any day thereafter, to consider in the House as in the Committee of the Whole the joint resolution (H.J. Res. 796) making supplemental appropriations for disaster relief for the fiscal year ending September 30, 1978.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

PERMISSION FOR COMMITTEE ON SCIENCE AND TECHNOLOGY TO HAVE UNTIL MIDNIGHT TOMORROW, FRIDAY, MARCH 17, 1978, TO FILE REPORT ON H.R. 11302, ENVIRONMENTAL RESEARCH, DEVELOPMENT, AND DEMONSTRATION AUTHORIZATION ACT OF 1979

Mr. BROWN of California. Mr. Speaker, I ask unanimous consent that the Committee on Science and Technology may have until midnight tomorrow, Friday, March 17, 1978, to file a report on H.R. 11302, the Environmental Research, Development, and Demonstration Authorization Act of 1979.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

GENERAL LEAVE

Mr. RODINO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks concerning the resolution I introduced today denouncing the act of terrorism and kidnaping of Aldo Moro, the former Prime Minister of Italy.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

LEGISLATIVE PROGRAM

(Mr. RHODES asked and was given permission to address the House for 1 minute.)

Mr. RHODES. Mr. Speaker, I take this time to inquire as to the program for the balance of the week and for next week, and I direct my inquiry to the distinguished majority leader.

Mr. WRIGHT. Mr. Speaker, will the gentleman yield?

Mr. RHODES. I yield to the majority leader.

Mr. WRIGHT. Mr. Speaker, the business of this week has been concluded, and you can bet your sweet shamrock we will not have any session tomorrow.

Mr. RHODES. Bless your Irish heart.

Mr. WRIGHT. Mr. Speaker, on Monday next the House will meet at noon. There are two bills scheduled under suspensions, as follows:

First. House Concurrent Resolution 494, rail passenger service resolution; and

Second. H.R. 11003, White House authorization.

Following those bills under suspension, we plan to take up H.R. 7700, the Postal Act of 1978, for which an open rule and 2 hours of general debate will be recommended.

Following that we may have several House committee funding resolutions, and then we will consider H.R. 9518, the Shipping Act Amendments of 1978, on which an open rule, with 1 hour of general debate, will be recommended.

On Tuesday the House will meet at noon. There will be no bills that we know of that would be considered under Suspension of the Rules.

We will on Tuesday take up H.R. 11518, the debt limitation extension, subject to the granting of a rule.

At this point, Mr. Speaker, I think it important to stress that this is distinguished from the bill which was rejected some days ago in the House and which would have increased the debt limit. This bill would not increase but would simply extend through July 31 the existing debt limit. I would assume that all Members would want to be present to vote for that bill, because without its passage our adjournment for the Easter Week and the home district work period would be impossible.

Following that we will take up H.R. 11315, Federal Election Campaign Act Amendments of 1978, subject to the granting of a rule.

On Wednesday the House would meet at 10 o'clock, and we would anticipate concluding action on H.R. 11315 and then taking up House Joint Resolution 796, emergency appropriations for disaster relief; H.R. 10899, the International Banking Act of 1978; and H.R.

11274, middle-income student assistance bill, the latter three subject to the grant granting of a rule.

At the close of business on Wednesday, March 22, 1978, the House will adjourn for the Easter district work period and will reconvene at noon on Monday, April 3, 1978.

The House, of course, will adjourn by 5:30 p.m., we expect, every day except Wednesday of next week.

Conference reports may be brought up at any time, and any further program will be announced later.

Mr. RHODES. Mr. Speaker, may I again ask the distinguished majority leader if the Private Calendar will be called on Tuesday.

Mr. WRIGHT. I am sorry if I neglected to mention that. The Private Calendar is on the schedule for Tuesday, and the Private Calendar will be called.

Mr. RHODES. Of course, the House would be regularly scheduled to meet at 3 p.m. on Wednesday. I would hope that the majority leader might withhold asking unanimous consent to meet at 10 o'clock, until perhaps Tuesday next. The thought strikes me that it may be possible for us to get more work done on Tuesday than we might suppose, and that it might not be necessary to come in at 10 o'clock on Wednesday.

Mr. WRIGHT. If the gentleman requests that I withhold that unanimous-consent request, I shall.

Mr. RHODES. I thank the gentleman.

ADJOURNMENT TO MONDAY, MARCH 20, 1978

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet at 12 o'clock noon on Monday next.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY, MARCH 22, 1978

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule on Wednesday, March 22, 1978, be dispensed with.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

APPOINTMENT AS MEMBER OF SELECT COMMITTEE ON NARCOTICS ABUSE AND CONTROL

The SPEAKER. Pursuant to the provisions of House Resolution 77, 95th Congress, the Chair appoints the gentleman from Hawaii (Mr. AKAKA) as a member of the Select Committee on Narcotics Abuse and Control to fill the existing vacancy thereon.

SELECTION OF MEMBERS TO BE ACCREDITED BY PRESIDENT AS OFFICIAL ADVISERS TO U.S. DELEGATIONS TO INTERNATIONAL CONFERENCES, MEETINGS, AND NEGOTIATION SESSIONS RELATING TO TRADE AGREEMENTS DURING 2D SESSION OF 95TH CONGRESS

The SPEAKER. Pursuant to the provisions of section 161(a), title I, Public Law 93–618, and upon recommendation of the chairman of the Committee on Ways and Means, the Speaker has selected the following members of that committee, to be accredited by the President, as official advisers to the U.S. delegations to international conferences, meetings, and negotiation sessions relating to the trade agreements during the 2d session of the 95th Congress: The gentleman from Ohio (Mr. VANIK); the gentleman from Illinois (Mr. MIKVA); the gentleman from Virginia (Mr. FISHER); the gentleman from New York (Mr. CONABLE); and the gentleman from Wisconsin (Mr. STEIGER).

APPOINTMENT AS MEMBERS OF DELEGATION TO ATTEND CONFERENCE OF INTERPARLIAMENTARY UNION IN LISBON, PORTUGAL

The SPEAKER. Pursuant to the provisions of Public Law 94–45, the Chair appoints as members of the delegation to attend the Conference of the Interparliamentary Union held in Lisbon, Portugal, from March 22 to April 2, 1978, the following members on the part of the House: The gentleman from Indiana (Mr. HAMILTON), Chairman; the gentleman from North Carolina (Mr. PREYER), Vice Chairman; the gentleman from Texas (Mr. PICKLE); the gentleman from Mississippi (Mr. BOWEN); the gentleman from California (Mr. VAN DEERLIN); the gentleman from Texas (Mr. DE LA GARZA); the gentleman from Virginia (Mr. FISHER); the gentleman from Illinois (Mr. DERWINSKI); the gentleman from Illinois (Mr. MCCLORY); the gentleman from Pennsylvania (Mr. COUGHLIN), and the gentleman from Virginia (Mr. BUTLER).

APPOINTMENT AS MEMBERS OF BOARD OF VISITORS TO UNITED STATES COAST GUARD ACADEMY

The SPEAKER laid before the House the following communication from the chairman of the Committee on Merchant Marine and Fisheries:

COMMITTEE ON MERCHANT MARINE AND FISHERIES,
Washington, D.C., February 21, 1978.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker of the House, The Capitol, Washington, D.C.

DEAR MR. SPEAKER: Pursuant to section 194 of title 14 of the United States Code, I have appointed the following Members of the Committee on Merchant Marine and Fisheries to serve as members of the Board of Visitors to the United States Coast Guard Academy for the year 1978:

The Honorable Mario Biaggi of New York.
The Honorable E. de la Garza of Texas.
The Honorable David C. Treen of Louisiana.

As Chairman of the Committee on Merchant Marine and Fisheries, I am authorized to serve as an ex officio member of the Board

Sincerely,

JOHN M. MURPHY,
Chairman.

RESIGNATION AS MEMBER OF NATIONAL COMMISSION ON NEIGHBORHOODS

The SPEAKER laid before the House the following resignation as a member of the National Commission on Neighborhoods:

WASHINGTON, D.C.,
March 9, 1978.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker, U.S. House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: It is with deep regret that I inform you that I find it necessary to resign my position on the National Commission on Neighborhoods, effective immediately.

I firmly believe that the Commission will have a significant impact on neighborhood preservation and revitalization and needs the full attention and input of all of its members. I am presently unable to actively participate in Commission proceedings and recognize that the situation will not improve for several months.

I am therefore requesting that I be replaced on the Commission at your earliest convenience to allow them to move forward with their important tasks.

Very truly yours,

YVONNE BRATHWAITE BURKE,
Member of Congress.

The SPEAKER. Without objection, the resignation will be accepted.

There was no objection.

PERSONAL EXPLANATION

(Mr. STEERS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. STEERS. Mr. Speaker, I was holding a reception in connection with the battered spouse bill, and there was so much congestion in my office that I did not hear the bells, so I was unable to get to the floor in time to vote on the Humphrey-Hawkins bill.

Mr. Speaker, had I been able to vote, I would have voted "yes" on the Humphrey-Hawkins bill.

TRIBUTE TO KAHIKINA AKAKA

(Mr. AKAKA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. AKAKA. Mr. Speaker, it is with a deep sense of love for him, and great gratitude for the gift of his life to me, my family, Hawaii and our Nation that I offer this tribute to my beloved father.

Kahikina Akaka, outstanding father of Hawaii and America, died yesterday in Honolulu, 4 days short of 94 years.

Three of his sons were named "Fathers of the Year" for Hawaii in their respective fields: My brothers John Edward

Kahoa Akaka, vice president of the Musicians Union in Hawaii and former postal employee in 1959; the Reverend Abraham Kahikina Akaka, paster of Kawaiahao Church in 1958; and myself in the field of education in 1966.

All of his other children have raised good families also, and served well in their respective fields: Annie Kahikina Akaka, a school teacher retired with honors; Joseph Kahikina Akaka, retired after 36 years of faithful service at the Pearl Harbor Naval Shipyard; and Susan Akaka Taylor, clerk with the State Department of Social Services and Housing.

Because of his father's and mother's need, my father had to leave school at the third-grade level. He worked at age 12 as an apprentice molder. He worked continuously at the Honolulu Iron Works until 1946.

He taught his children the meaning, value, and glory of hard work—taking great pride in the quality of his work as he produced machinery parts for sugar mills of Hawaii and molded parts for ships that stopped in Honolulu for repairs. When we asked for money, for help in solving problems, he would stimulate our imagination and lead us to solutions, saying after we successfully solved the problems:

If I do something for you that you can do for yourself, I only make you weak.

Among his children's most cherished memories are our family ohanas or prayer times at the beginning and ending of each day, when he led us in reciting Bible verses from memory, in singing a hymn, in prayers of thanksgiving to God for blessings received, and of petition for guidance, strength, and wisdom for the day.

My father took great pride in our Hawaiian heritage, rising in the ranks of the Order of Kamehameha to the topmost position of Kaukaualii. He also felt the need of the working man to organize into unions, which he joined in 1912 and later served as secretary of the International Molders Union in Hawaii.

His love for and loyalty to our mother, Annie Kahoa, his children, as well as his gentleness, strength, kindness, sacrifice, patience, integrity, and unfailing care gave unshakable credibility to his religious faith. He served as deacon and trustee of Kawaiahoa Church and as secretary of the Sunday school.

Among America's most honored fathers are those who strengthen the foundations of our Nation by helping their children and grandchildren and great grandchildren learn, grow, and live to become the fulfillment of their prayers. My father was such a man. His love for God and country, his deep and profound faith and unrelenting sense of duty have been as flaming torches lighting the pathways of life for his children, 34 grandchildren and 40 great grandchildren.

On his 94th birthday, this Sunday, March 19, his children will rise up and call him blessed. His church and community will honor him in special services to be held in Kawaiahoa Church, Hawaii's Westminster Abbey. And the words of the Lord Jesus will be spoken:

Well done good and faithful servant. Enter thou into the joy of Thy Lord.

STATUS OF THE CONGRESSIONAL BUDGET FOR FISCAL YEAR 1978

(Mr. GIAIMO asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. GIAIMO. Mr. Speaker, as called for in the Congressional Budget Act, the House Budget Committee has notified the Speaker of the House on the status of the fiscal year 1978 congressional budget. A copy of my letter to the Speaker and the committee's report are attached at the end of these remarks. I would like to inform my colleagues how the Congress stands with regard to the budget resolution it adopted on September 15.

My last report to the House on January 31 summarized the current level, that is, the level of spending and revenues already committed by Congress, as of close of legislative business of the 95th Congress, 1st session. The House Budget Committee has now revised the current level to account for reestimates and spending actions of Congress.

OMB is required to submit budget estimates four times a year—January, April, July, and November. The President's January budget, which contains a comprehensive review of estimates for fiscal year 1978 in light of economic conditions and agency spending patterns, has been reviewed by the House and Senate Budget Committees and CBO. The result of this reestimating procedure is a net increase in budget authority of $4 billion and a reduction in outlays of $3 billion. And, as my colleagues are aware, the President has released this week his revised estimates for fiscal year 1978 and 1979 for the Budget Committees' use in considering the first resolution for fiscal year 1979. These estimates will be reviewed by the Budget Committees and CBO and any effect on the current level of spending and revenues for fiscal year 1978 will be communicated to the House.

In addition, the Congress has enacted and the President has signed the supplemental appropriation which increases budget authority $6.4 billion and outlays more than $500 million. The urgent power supplemental appropriation has been enacted. Other spending legislation, including the black lung benefits reform and revenue bills, have cleared the Congress and been signed into law. The attached chart summarizes these changes to the current level.

When taken together, these changes to the current level for spending and revenues result in an amount remaining of $4.6 billion in budget authority, $6.2 billion in outlays and $1.5 billion in revenues. Any spending or revenue measures for fiscal year 1978 (either supplemental requests as contained in the President's January budget or congressional initiatives) must be funded from this amount remaining if the Congress is to stay within the limits of the second budget resolution.

Thank you, Mr. Speaker.

CHANGES TO THE CURRENT LEVEL OF SPENDING AND REVENUES FOR FISCAL YEAR 1978

[In millions of dollars]

	Budget authority	Outlays	Revenues
Current level:			
As of Dec. 15, 1977, close of legislative business 95th Cong. 1st sess.	485,065	454,315	398,067
Black Lung Benefits Revenue Act of 1977, Public Law 95-227	92	.....	92
Endangered American Wilderness Act, Public Law 95-237	9	9	.....
Black lung benefits reform bill, Public Law 95-239	4	73	.....
Supplemental appropriation, Public Law 95-240	6,368	678	.....
Urgent power supplemental appropriation H.J. Res. 746	13	13	.....
Net effect of reestimates	3,928	−3,059	366
Current level (as of Mar. 9, 1978)	495,479	452,029	398,525
Second budget resolution	500,100	458,250	397,000
Amount remaining	4,621	6,221	1,525

WASHINGTON, D.C.,
March 14, 1978.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker, U.S. House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: On January 30, 1976, the Committee on the Budget outlined the procedures which it had adopted in connection with its responsibilities under Sec. 311 of the Congressional Budget Act of 1974 to provide estimates of the current level of revenues and spending. I am herewith transmitting the status report under H. Con. Res. 341, the Second Budget Resolution for FY 1978. This report reflects the resolution of September 15, 1977, and estimates of budget authority, outlays and revenues based on all completed action on spending and revenue measures as of close of legislative business, March 9, 1978.

Sincerely,

ROBERT N. GIAIMO,
Chairman.

REPORT TO THE SPEAKER OF THE U.S. HOUSE OF REPRESENTATIVES FROM THE COMMITTEE ON THE BUDGET ON THE STATUS OF THE FISCAL YEAR 1978 CONGRESSIONAL BUDGET ADOPTED IN HOUSE CONGRESSIONAL RESOLUTION 341

REFLECTING COMPLETED ACTION AS OF MARCH 9, 1978

[In millions of dollars]

	Budget authority	Outlays	Revenue
Appropriate level	500,100	458,250	397,000
Current level	495,479	452,029	398,525
Amount remaining	4,621	6,221	1,525

BUDGET AUTHORITY

Any measure providing budget entitlement authority which is not included in the current level estimate and which exceeds $4,621 million for fiscal year 1978, if adopted and enacted, would cause the appropriate level of budget authority for that year as set forth in H. Con. Res. 341 to be exceeded.

OUTLAYS

Any measure providing budget or entitlement authority which is not included in the current level estimate and which would result in outlays exceeding $6,221 million for fiscal year 1978, if adopted and enacted, would cause the appropriate level of outlays for that year as set forth in H. Con. Res. 341 to be exceeded.

REVENUES

Any measures that would result in a revenue loss exceeding $1,525 million for fiscal year 1978, if adopted and enacted, would cause revenues to be less than the appropriate level for that year as set forth in H. Con. Res. 341.

WASHINGTON, D.C.,
March 10, 1978.

Hon. ROBERT N. GIAIMO,
Chairman, Committee on the Budget, U.S. House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to section 308(b) and in aid of section 311(b) of the Congressional Budget Act, this letter and supporting detail provide an up-to-date tabulation of the current levels of new budget authority, estimated outlays and estimated revenues in comparison with the appropriate levels for these items contained in the most recently agreed to concurrent resolution on the 1978 budget. The current level estimates are as of close of business March 9, 1978.

Congress has given final approval to the Urgent Power Supplemental Appropriations (H.J. Res. 746), clearing it for the President's signature. Budget authority and outlays have changed since my last report.

[In millions of dollars]

	Budget authority	Outlays	Revenues
1. Enacted	491,514	448,189	398,525
2. Entitlement authority and other mandatory items requiring further appropriation action	3,952	3,827	
3. Continuing resolution authority			
4. Conference agreements ratified by both Houses	13	13

Amount remaining:			
Under ceiling	4,621	6,221	
Over floor			1,525

Sincerely,

ALICE M. RIVLIN,
Director.

PARLIAMENTARIAN STATUS REPORT SUPPORTING DETAIL, FISCAL YEAR 1978 AS OF CLOSE OF BUSINESS MARCH 9, 1978

[In millions of dollars]

	Budget authority	Outlays
I. Enacted:		
Permanent appropriations and trust funds	241,420	222,805
Offsetting receipts	−62,488	−62,488
Enacted last session	304,681	286,054
Enacted this session:		
Black Lung Benefits Revenue Act of 1977, Public Law 95-227	92	
Black lung benefits reform, Public Law 95-239		69
Endangered American Wilderness Act, Public Law 95-237	9	9
Supplemental appropriation bill, 1978, Public Law 95-240	7,800	1,739
Total, enacted	491,514	448,189
II. Entitlement authority and other mandatory items requiring further appropriation action:		
Function 050:		
Retired pay (anticipated supplemental)	140	140
Department of Defense, civilian and military pay (anticipated supplemental)	2,161	2,096
Function 600: Black lung benefits reform (Public Law 95-239) (anticipated supplemental)	4	4
Function 700:		
Veterans compensation and pensions (anticipated supplemental)	490	445
Veterans' Administration physician and dantist pay comparability (anticipated supplemental)	4	4
Function 800:		
Payment to Civil Service retirement and disability trust fund (anticipated supplemental)	439	439
Offsetting receipts	−439	−439
Function 920: Civilian agency pay raise (anticipatad supplemental)	1,153	1,138
Total, entitlemant authority	3,952	3,827
III. Continuing resolution authority	(1)	(1)
IV. Conference agreements ratified by both Houses: Urgent power supplemental appropriations (H.J. Res. 746)	13	13
Total, current level, as of March 9, 1978	495,479	452,029
Current resolution of September 15, 1977	500,100	458,250
Amount remaining:		
Over ceiling		
Under ceiling	4,621	6,221

[1] Continuing resolution (Public Law 95-205) authority provides funding through Sept. 30, 1978, for: Labor-HEW appropriations, at level of conference agreement on H.R. 7555, and District of Columbia appropriations, at 1977 rate. Amounts are shown in the enacted category above.

THE RAISIN ACT OF 1978

(Mr. MOORE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MOORE. Mr. Speaker, the New York Times charged the other day that the White House has changed its mind on H.R. 6782, the famous Raisin Act of 1978 now pending in the other body. The Times suggests that there is a tradeoff in the works—that the President will go along with new set-aside authority for wheat, feed grain, and cotton in exchange for votes on the Panama Canal Treaty.

I am also aware, Mr. Speaker, that the White House Press Secretary has denied that a deal was cut and a tradeoff made. Jody Powell says it is just not true.

Whatever the case, I am hopeful the President has at least come to recognize the problems facing rural America—and is willing to consider solutions other than his present hands-off-do-nothing policy.

But I should call the attention of this body to the fact that the President and his Secretary of Agriculture have had the authority all along to boost farm income by increasing loan levels—up to 100 percent, if deemed necessary, or by using the set-aside authority in the Food and Agriculture Act of 1977. In other words, the President can exercise the authority he already has if he wishes to do so.

Unfortunately, Mr. Speaker, it now looks like it took the problems of obtaining ratification of a treaty with another nation to force the President to focus on the problems inside his own country.

LOCKING THE GOP WAR CHEST

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts (Mr. CONTE) is recognized for 5 minutes.

● Mr. CONTE. Mr. Speaker, lest certain leaders of the majority party in this body feel that their devious attempt to change the campaign financing laws has escaped the notice and the derision of the public, I would like to bring to my colleagues attention an editorial which appeared in the March 8, 1978, issue of the respected Berkshire Eagle.

In referring to the Democrats' attempt to severely limit the amount a candidate may receive from his or her party, the editorial states:

A more cynical attempt to stack the campaign-financing laws could scarcely be imagined.

In identifying the Democrats' attempt as an antireform measure, the editorial quite validly points out that adverse effects of a special-interest contribution are greatly dissipated when the contribution is passed through national committees, because—

Its passage through the coffers of the party national committee has a certain neutralizing effect on it and by the time the money reaches the candidate the fingerprints—and message—of the special-interest contributor are less evident than on the money that union and corporate political-action committees donate.

The editorial also properly identifies the Democrats' attempt as one which would greatly favor incumbents, who are better able to secure the direct, and fingerprinted, special-interest contributions. As a 20-year incumbent myself, I find myself in complete agreement with the Eagle's argument.

I do not believe that any sitting Member of Congress could seriously even attempt to dispute the fact that financing through national committees "serves the useful purpose of evening out the advantages that the incumbent always enjoys."

Mr. Speaker, I insert the full text of the editorial in the RECORD. It is a well-reasoned criticism of the political chicanery represented by H.R. 11315—a justifiable plea for justice and equity. I hope that all of my colleagues will read and heed it before casting their votes on H.R. 11315.

The editorial follows:

LOCKING THE GOP WAR CHEST

Cute, those Democrats in Congress. Aware that the Republican National Committee has amassed a formidable war chest for this year's congressional campaigns of $8 million while their own party has one-tenth that amount, the Democrats have come up with a proposal to change the campaign-financing laws so

that no candidate can receive more than $2,500 from his party. The limit is now $10,000.

Let the GOP eat all its gold, is the attitude, and a more cynical attempt to stack the campaign-financing laws could scarcely be imagined. For whatever reasons, the Republican National Committee is and generally has been a much more effective fund-raising operation than its Democratic equivalent. Instead of taking constructive steps to improve their own committee's work in this area, the Democrats would rather just spike the enemy's guns. All of this, mind you, is presented under the high-minded guise of taking special-interest money out of politics.

In fact, of course, the national committee money does come to candidates, indirectly, from special-interest sources. But its passage through the coffers of the party national committee has a certain neutralizing effect on it and by the time the money reaches the candidate the fingerprints—and message—of the special-interest contributor are less evident than on the money that union and corporate political-action committees donate.

Democratic candidates generally do as well, or better, than their Republican counterparts in securing direct special-interest contributions for the simple reason that far more Democrats run as incumbents. In this year's election in the House, for instance, the ratio of Democratic to GOP incumbents will be almost precisely 2–1. The well-heeled GOP national committee serves the useful purpose of evening out the advantage that the incumbent always enjoys, both in his ability to attract contributions and in the media attention and perquisites (staff, mailing privileges and others) which his office commands.

If House Democrats are so worried that they will be out-gunned in November, it is not too late for them to get behind the proposal to introduce public financing of House campaigns. Even with public financing, party national committee contributions would still be permitted, but a much better case could then be made for lowering somewhat the ceiling on what a party can donate to one of its own. Under no circumstances would it be a good idea to ban this form of funding altogether—party loyalty in modern U.S. politics is weak enough as is.●

PUBLIC PLAYGROUND EQUIPMENT SAFETY LEGISLATION INTRODUCED

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. WHALEN) is recognized for 5 minutes.

● Mr. WHALEN. Mr. Speaker, I am today introducing the Public Playground Equipment Safety Act to help reduce the number of avoidable accidents and injuries suffered by thousands of children each year. I am pleased to note that Newton Steers of Maryland is the cosponsor of this legislation.

A conservative estimate is that at least 100,000 children each year require hospital treatment for injuries resulting from accidents on playground equipment. Of course, many of these injuries are due to carelessness or reckless behavior. But a substantial number are directly attributable to unsafe design features of the playground equipment.

This is what concerns us the most. As the father of six children, I know that we are never going to be able to protect active youngsters from all possible sources of accidents. But as a legislator, I believe that we can establish a national policy that says playground equipment should be made in such a way as to minimize the possibility of serious injury resulting from the inevitable accidents.

Actually, we do not need new legislation in order to reach such a policy. This is already within the present authority of the Consumer Product Safety Commission. That agency, however, thus far has failed to promulgate standards for safe playground equipment.

This lack of Government action does not result from any lack of interest in the private sector. Even before the CPSC was established, the National Recreation and Park Association was petitioning the Department of Health, Education, and Welfare, for guidance in the design of safe equipment for public playgrounds. The National School Supply and Equipment Associations, one of the trade groups representing manufacturers of public playground equipment, also has been supportive of efforts to establish Federal standards. Several private citizens including Ms. Theodora Sweeney of my home State of Ohio, also have petitioned the CPSC for action on playground safety.

The Consumer Product Safety Commission has taken up at least one consumer petition, but it does not appear to be in any great rush to take conclusive action.

Consequently, the legislation Congressman STEERS and I are introducing today primarily is designed to force the Commission to do something it should have done already. The secondary purpose of this legislation is to help create a significant market for playground equipment with improved safety design, to hasten introduction of such material into the marketplace.

The Public Playground Equipment Safety Act is really a very simple bill. It has four key features:

First, it mandates the Consumer Product Safety Commisison to issue advisory safety standards for public playground equipment. Using a schedule that parallels that already established for CPSC rulemaking, the bill requires that such standards be issued not later than 1 year after date of enactment.

Second, the legislation provides that within 2 years after enactment, all new equipment installed on public playgrounds that receive Federal financial assistance must meet the advisory safety standards.

Third, within 6 years after date of enactment, all equipment on playgrounds that are owned or operated by the Federal Government must conform to the safety standards. This will necessitate retrofitting some older equipment, but the requirement will not apply to any playgrounds other than those established by Federal agencies.

Fourth, the Commission is directed to conduct a study of playground surfacing materials and how they relate to playground equipment and accidents. The report must be presented to Congress within 1 year after date of enactment.

As I have suggested already, the playground equipment safety standards would be advisory in nature. They would be applied on a compulsory basis only to Federal facilities and those public playgrounds that receive Federal financial assistance. This bill would not in any way affect playground equipment installed on private facilities or in the average consumer's backyard. This fact notwithstanding, I do believe passage of this legislation would result in an upgrading of the voluntary standards for that equipment as well.

Mr. Speaker, I think it is time that the Federal Government take some action to protect American children from needless injury that results from the inherently unsafe designs of some playground equipment. A good place to start this effort is with equipment that is owned or operated by the Federal Government or which he purchased or maintained with Federal financial assistance. In those cases, at least, we should give our constituents the assurance that the playground equipment on which their children are playing is safe. Hopefully, the private sector will follow the Federal lead and voluntarily move to upgrade the safety standards of playground equipment.●

DRAMATIC EVIDENCE OF HOW A HEALTHY INVESTMENT CLIMATE MEANS MORE JOBS AND STABLE PRICES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. KEMP) is recognized for 5 minutes.

● Mr. KEMP. Mr. Speaker, I want to submit for the RECORD this testimony by the Securities Industry Association before the Ways and Means Committee which gives strong evidence that the decline in economic growth could be significantly reversed by restoring a healthy investment climate.

As one who has worked hard to alert this Congress to the counterproductivity of high marginal tax rates on the work and income opportunities of blue collar workers my efforts have also been directed at restoring incentive for investment and entrepreneural activity. My bill to lower all tax rates to increase the reward for working, saving, investment, and production received a tremendous boost yesterday when we obtained 194 bipartisan votes.

This testimony and accompanying econometric study figures show dramatically the efficacy of lower rates and a more liberalized treatment of capital gains:

STATEMENT OF THE SECURITIES INDUSTRY ASSOCIATION BEFORE THE COMMITTEE ON WAYS AND MEANS OF THE HOUSE OF REPRESENTATIVES, MARCH 7, 1978

Mr. Chairman, and members of the House Ways and Means Committee, my name is Robert H. B. Baldwin and I am Chairman of the Board of Directors of the Securities Industry Association (SIA) and President of Morgan, Stanley & Co., Inc. Accompanying me today are Edward I. O'Brien, President of SIA and George L. Ball, Chairman of the SIA's Tax Policy Committee and President of E. F. Hutton & Company, Inc.

We appreciate this opportunity to testify before the Committee today, to present our views on the effects of tax policy on investment and to comment on proposals contained in the President's 1978 Tax Program.

SIA represents over 500 leading investment banking and brokerage firms headquartered throughout the United States which collectively account for approximately 90% of the

securities transactions conducted in this country. The activities of SIA members include retail brokerage conducted on behalf of 25 million individual shareholders, institutional brokerage, over-the-counter market making, various exchange floor functions and underwriting and other investment banking activities conducted on behalf of corporations and governmental units at all levels. Due to their role in the capital markets, SIA members are in a position to recognize the impact of tax policy on investment decisions by corporations and investors.

TAX POLICY, INVESTMENT AND ECONOMIC GROWTH

SIA's testimony today is built upon a study it recently completed of nine tax proposals entitled, "Tax Policy, Investment and Economic Growth: A comparative Analysis of the Economic Effects of Alternative Tax Proposals Affecting Investment Income". A copy of that study is attached. The nine proposals were selected last summer from those either: 1. reportedly then under consideration by the Administration; 2. previously considered by Congress; or 3. contained in the April, 1977 report, "Tax Policy and Capital Formation," prepared for this Committee's Task Force on Capital Needs by the Joint Committee on Taxation staff.

SIA prepared its analysis on the basis of simulations undertaken at its request by Data Resources, Inc. (DRI), the economic consulting organization. DRI has constructed one of the most comprehensive models of the U.S. economy now available and manages the largest on-line data bank of economic information in the world. DRI Vice President Joseph E. Kasputys is with us today to answer any questions you may have regarding the simulations.

The study, "Tax Policy and Capital Formation," made a compelling case for increased capital investment. That report concluded that increased investment is needed to sustain economic growth, create jobs, raise real wages, increase price stability, avoid shortages in productive capacity and achieve national policy objectives concerning the environment, energy, housing and urban renewal.

SIA agrees with these conclusions. Recent studies, however, have cast doubt upon our economy's ability to generate adequate investment to fulfill those needs and goals. SIA believes that the present tax system contributes to this projected shortfall by favoring consumption over savings and investment. Savings and investment are discouraged through the imposition of multiple taxes on investment income at several levels. The SIA study supports this conclusion.

The SIA study presents evidence that reducing the tax burden on investment income will stimulate economic growth, increase employment, encourage capital investment and increase federal tax receipts. Tax reductions increase GNP through stimulating consumtion and/or investment. The advantages of stimulating investment relative to consumption are longer-term. Stimulating investment increases the capital stock and therefore the nation's production and employment potentials. This allows the economy to meet future demands with less inflationary pressures. In effect, by tilting the ratio of GNP devoted to investment closer to the 12% ratio considered necessary by the U.S. Bureau of Economic Analysis, the economy's ability to meet stated national objectives will be improved considerably.

The SIA study differs from most other studies of changes in the tax policy in that the analysis is not limited to static revenue estimates. Rather, SIA's study examines the effects of tax proposals over a five-year period, comparing the values of key economic variables to those projected by DRI under existing tax policy. DRI publishes monthly a short-term forecast for the U.S. economy. At SIA's request, DRI extended its August, 1977 control forecast through 1982. This forecast became SIA's baseline projection. SIA then asked DRI to model the effects of the nine tax alternatives for the five-year period 1978–82, and to compare the performance of the economy under each alternative to the baseline projection. The effects of the alternative tax proposals are then expressed in terms of deviations from the baseline projections.

As a reference point, the baseline projection envisages continued economic recovery, with growth in real GNP averaging 4.2% annually over the period 1978–82. Unemployment falls to 5.1% of the labor force by 1982, while the rate of inflation averages 5.7% over this time period. In addition to these economic variables, the DRI forecast also generates projections for investment in fixed business assets, potential output, personal income and consumption and many other important economic variables.

The summary table on the following page synthesizes the impact for each proposal using four indices. The first column shows the estimated net change in gross national product at 1978 price levels for the five-year period 1978-82. The second column shows the cumulative change in non-residential fixed investment (fixed business assets) in 1978 dollars. The third column indicates the change in the number of man-years of employment created or lost over the time period studied. The last column shows the five-year change in federal tax revenues in current dollars.

The summary table contains some striking information. The proposals studied which reduce taxes on investment income received by individuals have a stimulative effect on aggregate demand leading to a more robust economy and additional tax revenues.

At the time SIA's study began, the Administration was considered taxing capital gains as ordinary income and reducing the highest marginal tax rates to 50 percent. Even with a full offset against ordinary income for capital losses, such an approach (Proposal No. 5) has a negative impact on the economy over the period 1978–82. Real GNP would be lowered by $48 billion, capital formation reduced by $43 billion, well over 450,000 man-years of employment would be lost and the federal government would lose over $5 billion in revenues.

Without providing for a full offset of all capital losses against ordinary income, the treatment of capital gains as ordinary income (Proposal No. 1) would be even more damaging to the economy. Real GNP would drop by $116 billion, capital formation would fall by $73 billion, more than 1,500,000 man-years of employment would be lost and the federal government would lose over $25 billion in tax revenues. Clearly, such a proposal would be harmful to the economy.

Eliminating the distinction between capital gains and ordinary income constitutes one extreme. For purposes of comparison, the effects of the other extreme, eliminating all taxes on capital gains (Proposal No. 4) was also tested. This proposal produces the largest five-year gain in real GNP—nearly $200 billion. It also has the greatest impact on capital formation as fixed business assets increase by $81 billion. In addition, this proposal creates over 3 million additional man-years of employment from 1978 through 1982. At the same time, tax revenues increase $38 billion over the five-year period.

Dividend deductibility at the corporate level (Proposal No. 6) has a very positive impact on the economy. Of the nine proposals analyzed in Chapter IV, it has the second most favorable impact on real GNP, capital formation and the number of additional man-years of employment. However, this proposal has a high cost—federal tax revenues are reduced by $21 billion from 1978 through 1982.

Partial integration of individual and corporate taxes through a shareholder credit (Proposal No. 2) also results in a more robust economy. It has the third greatest positive impact on real GNP and the number of additional man-years of employment. This proposal has a smaller beneficial impact on capital formation than does dividend deductibility. However, partial integration would increase federal revenues by $18 billion from 1978 to 1982, while dividend deductibility reduces tax revenues.

A proposal to compensate for elimination of the current treatment of capital gains by offering relief on the double taxation of dividends (Proposal No. 3) produces mixed results. The positive aspects of partial integration mitigate, but do not offset, the negative economic effects of increased capital gains taxes. While this proposal would increase real GNP, five of the other eight result in substantially greater growth. Four other proposals create more man-years of employment. Moreover, this proposal reduces capital formation by $32 billion and results in a loss of federal tax revenues.

Deferring taxes on capital gains through an investment rollover (Proposal No. 7), adjusting capital gains for inflation via a sliding scale (Proposal No. 8) and lowering the corporate tax rate from 48 percent to 46 percent (Proposal No. 9) are all similar in their impact on the economy, although the magnitude of their effects differ. All three lead to an increase in real GNP, a raise in capital formation and additional employment. Of the three, only the corporate tax cut reduces federal revenues over the time period studied. Deferring the taxation of capital gains has the strongest positive impact on economic activity of these three proposals.

The basic conclusion drawn from all the simulations is that economic growth, employment and tax revenues will be increased by tax policies which promote capital mobility and encourage savings and investment. Furthermore, there are major differences in benefits to the economy of stimulating aggregate demand via investment rather than consumption. By encouraging investment, there is an increase in the capital stock and therefore the nation's production and employment potentials, as compared to scenarios in which aggregate demand is stimulated by increased private or government consumption.

In recent years, investment in equities has not yielded rewards particularly after taxes, commensurate with the risks involved. As a result, many individuals have left the stock market or reduced their stock investments. From 1970 to 1975, the number of individual investors fell over 18 percent, from 31 million to 25 million. Equity ownership by individuals as a percentage of their total financial assets fell from 40 percent in 1970 to 25 percent in 1976.

Associated with this decline in individual participation in the equity markets has been an increased reliance on debt financing by corporations. In the past decade, corporate debt-equity ratios have, on average, doubled. Small, young companies—those companies most likely to provide major gains in employment and output—are increasingly unable to raise equity capital. While there were 548 stock offerings totalling nearly one and one-half billion dollars by companies with a net worth under $5 million in 1969, there were only four such offerings totalling but $16 million in 1975.

There are several reasons for these trends, but there is no question that sharp increases in taxes on investment returns were a major factor. The Tax Reform Acts of 1969 and 1976 doubled taxes on capital gains, doubled the period of risk for the investor, and continued the double taxation of dividends.

SPECIFIC TAX PROPOSALS

Two of the proposals in the President's 1978 Tax Program continue this trend. These proposals are: repeal of the alternative tax

for capital gains and elimination of the offset of one-half of regular tax liability against preference income subject to the minimum tax. These proposals will further discourage investment. Accordingly, SIA opposes them.

The alternative rate for capital gains was maintained in 1969 to mitigate the sharp increases in capital gains taxes. Nevertheless, the maximum marginal tax rate on capital gains is approximately equal to the 50 percent maximum rate applicable to personal service income under current tax law. The President's proposal will increase the proportion of capital gains taxed at this rate, thereby further eroding the distinction between the returns on risk capital and ordinary income.

The minimum tax change proposed by the President would in some instances result in higher effective and marginal tax rates on capital gains than on personal service income.

On the other hand, the dividend tax credit proposal introduced by Chairman Ullman would stimulate investment. While this proposal would not eliminate the double taxation of dividends, we recognize that it is a step in the right direction, and we support it.

SIA's Executive Committee will review tomorrow other Administration proposals regarding to deferred annuities, limited partnerships, and industrial development bonds. We will provide additional comments to the Committee on these issues before the hearing record closes.

SUMMARY TABLE

Tax proposal	Change in real gross national product, 1978–82 (billions of 1978 dollars)	Change in capital formation—fixed business assets—1978–82 (billions of 1978 dollars)	Change in man-years of employment, 1978–82 (thousands)	Change in Federal tax revenues, 1978–82 (billions of current dollars)
1. Capital gains treated as ordinary income, with the maximum marginal rate on income, other than wages and salaries, set at 50 percent current loss treatment retained	−115	−73	−1,529	−25
2. Partial integration via shareholder credit	144	26	2,656	18
3. Combination of tax proposals No. 1 and No. 2	50	−32	1,414	−11
4. No taxation of capital gains	199	81	3,136	38
5. Tax proposal No. 1 with capital losses fully offsettable	−48	−43	−477	−7
6. Dividend deductibility at corporate level	171	49	2,969	−21
7. Deferral of taxation for investment rollover	103	42	1,629	19
8. Sliding scale adjustment	87	38	1,283	28
9. Corporate tax cut from 48 percent to 46 percent	37	12	597	−7

SPECIAL ORDER OF CONGRESSMAN MICKEY EDWARDS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Idaho (Mr. HANSEN) is recognized for 20 minutes.

Mr. HANSEN. Mr. Speaker, the open battle over the Panama Canal treaties began in Congress several weeks ago and was preceded by a nationwide address of President Carter. The most startling fact which was absent from the President's remarks was the fact that the American taxpayer was going to have to pay approximately $4 billion to implement the treaties. The administration has to date only admitted to a $600,000,000 cost.

On August 4, 1977, I introduced a concurrent resolution stating that U.S. property in the Canal Zone should not be conveyed to Panama without an act of Congress. To date this resolution has gained 231 cosponsors from 47 States. Other resolutions similar to mine have also been introduced.

One of the fundamental and most important issues arising out of the proposed Panama Canal treaties is the role of the House of Representatives in the disposal of territory or property of the United States.

I have spoken out on many occasions to urge the House to assert its legitimate role with respect to the disposition of U.S. property and territory in the Canal Zone. I believe it is unconstitutional and inappropriate for the multibillion dollar investment of the United States in the Canal Zone to be transferred to the Republic of Panama by treaty alone. Article IV, section 3, clause 2 of the Constitution gives to the Congress the exclusive power to dispose of U.S. property and territory. Failure to exercise that power in this crucial question of the Canal Zone will be a disastrous precedent for the separation of powers in our Government.

The question is this: Does article IV require the consent of both Houses of Congress before American property in the Canal Zone can be transferred to Panama? Or can such holdings be given away by a "self-executing" treaty?

I am amazed that this has been treated so cavalierly by proponents of the treaty. The framers deliberately wrote article IV into the Constitution as one of the checks and balances provided to prevent rash and precipitous treaty action requiring that an implementing act be passed by both the Senate and the House of Representatives before Federal land or property can be conveyed to another power.

Mr. Speaker, there are several contemporary examples of the use of Congress' article IV powers. For instance, there were two treaties which were approved recently, one concerning the exchange of prisoners between the United States and Mexico and one concerning the establishment of the Commonwealth of the Northern Mariana Islands. I would like to call my colleagues' attention to the following excerpts from these treaties:

[From CONGRESSIONAL RECORD, July 27, 1977, p. 24275]

U.S.-MEXICO PRISONER EXCHANGE TREATY

VOTE FOR THE APPROVAL OF THE TREATY BY THE SENATE AND THEY APPROVED TO THE PARTICULAR DECLARATION

That the United States Government declares that it will not deposit its instrument of ratification until after the implementing legislation referred to in Article 4 has been enacted.

H.J. Res. 549—P.L. 94-241.

COVENANT TO ESTABLISH A COMMONWEALTH OF THE NORTHERN MARIANA ISLANDS IN POLITICAL UNION WITH USA

Article 10—Section 1001B.

This covenant will be approved by the U.S. in accordance with its Constitutional processes and will thereupon become law.

For Congressional Approval See Title 48 USC Section 1681.

Until Congress shall further provide for the government of the trust territory of the Pacific Islands, all executive, legislative and judicial authority necessary for the civil administration of the trust territory shall continue to be vested in such person or persons and shall be exercised in such manner and through such agency or agencies as the President of the U.S. may direct or authorize.

Mr. Speaker, this is a matter that closely touches all the people. The transfer of the canal and Canal Zone assets whose replacement value is nearly $10 billion and whose operation is closely linked to the economy and security of our Nation, is a subject of gravest importance. It is undoubtedly the kind of public action which the framers did not want taken until it had received the most extensive and thorough deliberation.

It would be well to refer back to the original purpose of our Founding Fathers, who wanted a place to check on major action of the Government which may harm the country.

The matter came up early in the State conventions convened to ratify the Constitution. Where much concern was expressed about the possibility of yielding, by a treaty, territory that might be valuable to the economy of a particular State or region. This fear was specifically rebutted at the Virginia Convention.

Governor Randolph, who was a delegate both to the Federal and Virginia Conventions took note of the objection when he remarked:

But it has been said that there is no restriction with respect to making treaties.

His answer was that the Constitution provided, "the most express restriction" on sacrificing the property rights of the Nation in article IV, which empowers Congress to dispose of territory or property of the United States.

Randolph was not the only one who took this view. Francis Corbin added at the Virginia Convention that the people were protected against rash treaties by another provision of the Constitution. Corbin said that if property is sought to be transferred by an agreement in the nature of a commercial treaty—a description which clearly is applicable to a treaty relating to commerce through the Panama Canal—"the consent of the House of Representatives would be requisite, because of the correspondent alterations that must be made in the laws."

So I believe the framers definitely intended for any proposed transfer of

property or territory, which may have an important bearing on the economy or security of any State or region in the country, to receive the consent of both Houses of Congress, acting together with the President, before it would be vaild.

But it is not necessary to prove that Congress has the exclusive power to dispose of public property. George Leonard, a well-known Washington attorney with considerable experience in constitutional matters testified before the Subcommittee on Separation of Powers last year, that in the case of the Panama Canal treaties, the true question is: "Once Congress has legislated on the subject, can the canal and the zone be conveyed without the approval of Congress?"

Here there is a special situation. Congress as a joint body, has acted on the canal since at least 1902. In the Spooner Act of that year, Congress authorized the President to acquire property and "perpetual control of a strip of land" in the then territory of Colombia and to "perpetually maintain, operate, and protect thereon a canal" from the Caribbean Sea to the Pacific Ocean. It was pursuant to the will of Congress in the Spooner Act that the Panama Canal Treaty of 1903 was negotiated and concluded.

Since that time, Congress has established courts, enacted civil and criminal codes, provided for defense, and maintained, administered, and operated both the canal and the Canal Zone.

In the fact of this considerable activity by Congress concerning the Panama Canal, Mr. Leonard believes Congress has preempted any concurrent power which the President, together with the Senate, may have had to dispose of the canal and land in the zone by treaty.

In fact, we have always before used legislation passed by both Houses of Congress in order to cede property in the Canal Zone to Panama. In 1932, it took legislation to authorize the Secretary of State to modify the boundary line between Panama and the zone so that a new legation building could be built on foreign soil, that is Panamanian territory, instead of American territory.

In 1936, a treaty was signed relating to the disposal of certain property to Panama. This treaty was specifically qualified by the following words:

When the authority of the Congress of the United States shall have been obtained therefore, the Government of the United States will transfer to the Republic of Panama: the property in question.

Thus the treaty itself openly required subsequent action by both Houses of Congress.

Then in 1943, a joint resolution was approved authorizing an executive agreement for the transfer of certain land in the Canal Zone to Panama. During Senate deliberation over this resolution, the chairman of the Senate Foreign Relations Committee, Senator Tom Connally, unequivocally took the position that under the Constitution:

Congress alone can vest title to property which belongs to the United States.

He added:

So, if we had a formal treaty before us and if it should be ratified, it would still be necessary for the Congress to pass an act vesting in the Republic of Panama and the title to the particular tract of land.

Mr. Speaker, the public sentiment is rapidly rising against these treaties. To date 12 State legislatures have passed resolutions opposing the proposed treaties. Many groups such as the Oklahoma City, Okla., chamber of commerce and the Newport News, Va., city council have also passed resolutions opposing the treaties and urging the Senate not to ratify them. For the benefit of my colleagues, I include for the RECORD several samples of these resolutions:

[March 9, 1978, Resolution No. 2201-78]

A RESOLUTION EXPRESSING THE OPPOSITION OF THE CITY OF NEWPORT NEWS, VIRGINIA, TO THE PROPOSED PANAMA CANAL TREATY

Whereas, there is currently pending before the Congress of the United States a proposed treaty pertaining to the Panama Canal; and

Whereas, it is the opinion of the Council of the City of Newport News, Virginia, that said proposed treaty is inimical to the best interests of the United States of America; and

Whereas, the Council of the City of Newport News, Virginia, wishes to make its opinion regarding said proposed treaty known to members of Congress.

Now, therefore, Be it resolved by the Council of the City of Newport News, Virginia:

1. That it hereby expresses its opposition to the proposed Panama Canal Treaty as presently written.

2. That copies of this Resolution shall be mailed to each member of the Senate and each member of the House of Representatives and to the President of the United States.

[February 27, 1978, Oklahoma City, Oklahoma Chamber of Commerce]

A RESOLUTION

Whereas, the Constitution of the United States assigns to the people both the right and the duty to petition and memorialize their government on matters of general concern, and

Whereas, the Government of the United States, under both the present administration and the preceding administration, has embarked on a course of action with regard to the Panama Canal which would relinquish American sovereignty and control over that strategic waterway to local political authority during a specified period of years, and

Whereas, in its nearly three-quarters of a century of existence as an independent nation the Republic of Panama has proved one of the most unstable governments in the Western Hemisphere, and is now ruled by an unelected dictator who has professed unrelenting hostility toward this country, its aims and its economic well-being, and

Whereas, the Panama Canal retains much of its traditional military and strategic importance to the defense of this country and the entire Western Hemisphere, and holds a vital place in the economic relations of the nations of this hemisphere, and

Whereas, the economic importance of the Panama Canal in linking the East and West Coasts of this country by sea, bringing large cargoes, bulk shipments, fuels, and other vital goods from one part of the nation to another is as great today as in times past when this route served different but equally important roles, and

Whereas, the President and other government officials have said in recent public statements that the primary difficulty facing the negotiators attempting to reach an agreement with the Republic of Panama is accord on the amount of revenue to be paid to the Panamanian Government during the transition period when full control is being transferred from the United States of America to the Republic of Panama, implying that the transfer of control is one matter already agreed upon, and

Whereas, the people of Oklahoma City and the State of Oklahoma are well-traveled in the military, governmental, and commercial activities common to our age, and are familiar with the importance of the Panama Canal and its history, and are opposed to the introduction of any treaty or other international agreement which would cede ownership or control of this vital waterway to the whims and caprices of the authorities who may be ruling Panama now or at any given time,

Now therefore be it resolved by the Directors of the Oklahoma City Chamber of Commerce, that the President of the United States should take steps to ensure the continued control of and sovereignty over the Panama Canal by the United States of America, and cease any negotiations which would lead to the surrender of such control and sovereignty.

Be it further resolved that the Senate of the United States, given the responsibility by the United States Constitution to approve or disapprove all treaties, should reject any proposed treaty which cedes control over and sovereignty over the Panama Canal to any foreign nation.

Be it further resolved that the Congress of the United States, through its power of appropriation, should reject any financial plan which would facilitate such a transfer of the Panama Canal to another nation's control, and should reject any payments to the Republic of Panama beyond reasonable reimbursement for costs incurred by Panama due to the presence of the Canal Zone and the Canal.

Now therefore it is resolved that copies of this resolution should be forwarded to the President of the United States, the Secretary of State of the United States, and to all members of the Oklahoma Delegation in the Congress of the United States, as a petition and memorial of the will of the members of this organization, its affiliates and its directors.

ALABAMA—H.J.R. 109

Enrolled, House Joint Resolution, urging Congress and the President not to relinquish the Panama Canal.

Whereas U.S. ownership of the Panama Canal is essential to American defense and security as well as to the American economy; and

Whereas the United States financed and built the Panama Canal with a construction period of about 10 years in the early part of this century at what was then a great cost; and

Whereas the United States acquired title to the canal zone in perpetuity; and

Whereas the canal zone is considered a government reservation; and

Whereas it is imperative to Alabama and Southern economy that the U.S. retain control of the canal; and

Whereas some liberals in Congress desire to relinquish American title to the Panama Canal; and

Whereas such foolhardy action would be not only destructive but also dangerous; and

Whereas this legislature recognizes the seriousness of such proposed action and is adamantly opposed to it; now therefore

Be it resolved by the legislature of Alabama, both Houses thereof concurring, That we strongly urge Congress and the President not to surrender any title to or interest in the Panama Canal.

Resolved further, That a copy of this resolution be sent to the President of the United States and to each member of the Alabama Congressional Delegation.

ARIZONA SENATE — S.C.M. 1002

A concurrent memorial urging the Congress of the United States to call for every State legislature to immediately place before the people of their respective States an advisory referendum regarding the continued ownership, operation and control of the Panama Canal by the United States

To the Congress of the United States:

Your memorialist respectfully represents:

Whereas, from colonial times to the present there has been a widening opportunity for the people of the United States to exercise a share in the determinations of government; and

Whereas, the United States was the first large nation to attempt "government of the people, by the people, for the people"; and

Whereas, most nations have fallen under totalitarian forms of government, whereas this nation has maintained its exercise of democracy; and

Whereas, it is incredible that the unelected dictator of the Republic of Panama has held a referendum of the people of that nation as to their desire on the issue of ownership of the Panama Canal while this, the greatest democratic nation in the world, has not offered its people a voice in the determination of such issue; and

Whereas, in 1903 the United States and the Republic of Panama entered into a treaty under which the United States at great expenditure of lives and money constructed the Panama Canal, a vital waterway link between the Caribbean Sea and the Pacific Ocean; and

Whereas, the fifty-mile canal was completed under very adverse conditions which were overcome only by United States engineering genius where other nations had tried and failed; and

Whereas, in 1914 the United States paid the Republic of Panama ten million dollars for the Canal Zone, has paid all expenses for the construction and maintenance of that waterway, has paid to Panama an increasing percentage of the annual revenue generated by the canal, has a net investment in the project of about six billion dollars and has never recovered its original costs from revenues; and

Whereas, the 1903 treaty gave the United States sovereign control "in perpetuity" to operate the canal and maintain a fortified ten-mile-wide zone along the path of the canal through the Republic of Panama; and

Whereas, in 1964 the two nations agreed to renegotiate the treaty and such negotiation has resulted in the proposed transfer of the canal's operation and maintenance to the Republic of Panama and the retention of some "use rights" and a continuing obligation of military protection by the United States; and

Whereas, ratification of such proposed treaties would amount to a complete giveaway of a vital security holding of an interoceanic passageway to a government whose intentions toward the security of the United States are at least questionable; and

Whereas, such a giveaway would be a serious blunder and would severely threaten the security of our nation.

Wherefore, your memorialist, the Senate of the State of Arizona, the House of Representatives concurring, prays:

1. That the Congress of the United States request each state legislature to place before the people of the state an advisory referendum to make known the wishes of the people of each state on the issue of giving away the ownership, operation and control of the Panama Canal by the United States.

2. That until such time as the people of the United States make their wishes known on such issue, no ratification of the proposed Panama Canal treaties be voted upon by the United States Senate.

3. That the Secretary of State of the State of Arizona transmit certified copies of this Memorial to the President of the United States Senate, the Speaker of the United States House of Representatives and to each Member of the Arizona Congressional Delegation.

CALIFORNIA HOUSE RESOLUTION NO. 357

Relative to a treaty between the United States and the Republic of Panama

Whereas, The Executive Branch of the United States Government has publicly announced that it is in the process of negotiating a treaty or treaties with the Republic of Panama that may affect the United States-owned Canal Zone territory acquired pursuant to law and purchase from individual property owners under the 1903 Treaty with Panama for the construction, operation maintenance, sanitation, and protection of the Panama Canal; and

Whereas, The proposed new treaty or treaties, if approved, might affect the rights heretofore exercised by the United States with respect to the Canal Zone and the Panama Canal; and

Resolved by the Assembly of the State of California, That the Executive Branch of the United States Government be requested to render due consideration to the potential consequences that might befall any and all existing treaties relating to the Panama Canal and its operation as a result of the United States entering into treaties with the Republic of Panama; and be it further

Resolved, That the Chief Clerk of the Assembly be hereby directed to transmit copies of this resolution to the President and Vice President of the Unied States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States.

CALIFORNIA

Senate Joint Resolution No. 29—Relative to the Panama Canal.

LEGISLATIVE COUNSEL'S DIGEST

SJR 29, as introduced, Richardson (Res.). Panama Canal treaty.

This measure would memorialize the Members of the United States Senate from California to oppose any treaty which would alter, remove, or reduce the existing control and operation of the Panama Canal and the Canal Zone by the United States.

Fiscal committee: no.

Whereas, At a cost exceeding five billion dollars, the Panama Canal was constructed for the benefit of international commerce and world trade by reducing the length of time within which ships could navigate between oceans and countries; and

Whereas, Our country, bearing the burden of such massive cost, entered into a treaty with the Republic of Panama for the benefit of all free nations of the world; and

Whereas, The strategic importance of the canal requires the protection of a world power and a major world nation; and

Whereas, The economic welfare and stability of the United States and all other countries depends upon free and unrestrained access to the canal and its facilities; and

Whereas, We have witnessed, with the Suez Canal the proliferating problems which result from inadequate controls over such a vital link in international commerce when left in the hands of a small nation having few facilities and manpower to protect its operation; and

Whereas, The proximity of the canal to the shores of this country, and particularly to the State of California, makes imperative its continued control and operation under the terms of the existing treaty; and, therefore, be it.

Resolved by the Senate and Assembly of the State of California, jointly. That the Legislature respectfully memorialize the two Members of the United States Senate from California to vigorously oppose any treaty which would alter, remove, or reduce the existing control and operation of the canal and the Canal Zone, as presently and historically exercised by the United States of America; and be it further

Resolved, That the Secretary of the Senate transmit a copy of this resolution to the Honorable Alan Cranston and the Honorable S. Hayakawa, United States Senators from the State of California and to the Senate of the United States.

IDAHO SENATE JOINT MEMORIAL NO. 107

A joint memorial to the Honorable President of the United States, the President of the Senate and Speaker of the House of Representatives of the Congress of the United States, and the Senators and Representatives representing the State of Idaho in the Congress of the United States.

We, your Memorialists, the Senate and the House of Representatives of the State of Idaho assembled in the Second Regular Session of thee Forty-fourth Idaho Legislature, do hereby respectfully represent that:

Whereas, the President of the United States has submitted to the Senate of the United States, treaties relating to the Panama Canal Zone; and

Whereas, the treaties propose that the United States relinquish their rights to operate and protect the Panama Canal; and

Whereas, since 1902, the Panama Canal Zone has been held and defended as sovereign American territory; and

Whereas, the treaties propose amendment of American rights which will inevitably result in higher product costs to American citizens; and

Whereas, it is contrary to the principles of a free society to abandon sovereign territory into the hands of a dictatorial minority; and

Whereas, the President has taken this precipitious action without regard for overwhelming public opinion in opposition to the give away of the Canal, and without apparent consideration for the consequences to every citizen of every state including Idaho.

Now, therefore, be it resolved by the members of the Second Regular Session of the Forty-fourth Idaho Legislature, the Senate and the House of Representatives concurring, speaking on behalf of the citizens of the State of Idaho, that we oppose ratification of the treaties abandoning American rights in the Panama Canal Zone. We urge the Senate of the United States to reject the treaties now pending before the Senate and that the Senate take such action as may be necessary to reaffirm our commitment to the rights, obligations and perogatives of the American people in the Panama Canal Zone.

Be it further resolved that the Secretary of the Senate be, and she is hereby authorized and directed to forward copies of this Memorial to the Honorable Jimmy Carter, President of the United States, the President of the Senate and Speaker of the House of Representatives of the Congress of the United States, and to the Senators and Representatives representing the State of Idaho in the Congress of the United States.

LOUISIANA SENATE CONCURRENT RESOLUTION NO. 19

A concurrent resolution expressing a strong opposition to the proposal that the United States relinquish its sovereignty over the Canal Zone and the Panama Canal

Whereas, the Executive Branch of the U.S. Government has publicly announced that it is in the process of negotiating a treaty or treaties with the Republic of Panama that could dilute the indispensable grant of sovereignty over the United States-owned Canal Zone territory, acquired pursuant to law and purchased from individual property owners

under the 1903 Treaty with Panama for the construction, operation, maintenance, sanitation and protection of the Panama Canal, and

Whereas, any such proposed treaty or treaties, if ratified by the United States Senate, could divest the U.S. of authority where there is grave responsibility and thereby render our government impotent to maintain and operate the Panama Canal in conformity with the provisions of the 1901 Hay-Pauncefote Treaty with Great Britain, under which Treaty the U.S. is obligated to maintain, operate and protect the Panama Canal on terms of equality for world shipping, and

Whereas, the proposed new treaty or treaties, if approved, could effectively destroy all the indispensable rights heretofore exercised by the U.S. with respect to the Canal Zone and the Panama Canal, and

Whereas, any withdrawal of the U.S. could make easier a take-over by communist authority and a similar take-over of governments throughout Latin America, as in the case of Cuba, and imperil the security of the U.S. and the whole Western Hemisphere,

Therefore, be it resolved by the Senate, the House of Representatives concurring, that the Legislature of the State of Louisiana opposes the relinquishing by the U.S. of its existing rights, powers and authority over the Canal Zone and Panama Canal:

Be it further resolved that a copy of this Resolution shall be forwarded to the President of the Senate in the Congress of the United States and the Speaker of the House of Representatives, and to each U.S. Senator from Louisiana in the Congress and each member of the House of Representatives in the Congress from Louisiana.

TENNESSEE HOUSE JOINT RESOLUTION NO. 84

A resolution expressing strong opposition to the proposal that the United States relinquish its sovereignty over the Canal Zone and the Panama Canal

Whereas, the Executive Branch of the United States Government has publicly announced that it is in the process of negotiating a treaty or treaties with the Republic of Panama that could dilute the indispensable grant of sovereignty over the United States-owned Canal Zone territory acquired pursuant to law and purchase from individual property owners under the 1903 Treaty with Panama for the construction, operation, maintenance, sanitation, and protection of the Panama Canal; and

Whereas, any such proposed treaty or treaties, if ratified by the United States Senate, could divest the United States of authority where there is grave responsibility and thereby render our government impotent to maintain and operate the Panama Canal in conformity with the provisions of the 1901 Hay-Pauncefote Treaty with Great Britain under which Treaty the United States is obligated to maintain, operate and protect the Panama Canal on terms of equality for world shipping and;

Whereas, the proposed new treaty or treaties, if approved, could effectively destroy all the indispensable rights heretofore exercised by the United States with respect to the Canal Zone and the Panama Canal; and

Whereas, any withdrawal by the United States could make easier a takeover by communist authority and similar takeovers of governments throughout Latin America, as in the case of Cuba, and imperil the security of the United States and the entire Western Hemisphere; now therefore,

Be it resolved by the House of Representatives of the Eighty-fifth General Assembly of the State of Tennessee, the Senate concurring, that we oppose the relinquishing by the United States of its existing rights, powers and authority over the Canal Zone and Panama Canal.

Be it further resolved, that copies of this resolution be forwarded to each United States Senator and each member of the House of Representatives in the Congress from Tennessee.

VIRGINIA SENATE JOINT RESOLUTION NO. 51

Expressing the sense of the General Assembly of Virginia relative to the Hay-Bunau-Varilla Treaty of 1903

Whereas, in nineteen hundred and three, the United States of America was granted sovereignty over the Panama Canal Zone in perpetuity; and

Whereas, the Panama Canal is essential to the defense and national security of the United States of America; and

Whereas, the Panama Canal is of vital importance to the economy and interoceanic commerce of the United States of America and the remainder of the free world; and

Whereas, valuable exports from Virginia go through the Panama Canal to distant reaches of the globe; and

Whereas, under the sovereign control of the United States of America, the Panama Canal has provided uninterrupted peacetime transit to all nations; and

Whereas, the traditionally unstable nature of Panamanian politics and government poses an implicit threat to the security of the interests of the United States of America served by the Panama Canal; and

Whereas, the Republic of Panama possesses neither the technical and managerial expertise to effectively operate and maintain the Canal nor the capability to meet the growing demands placed upon the Canal; and

Whereas, the Canal represents a five billion dollar investment on the part of the people of the United States of America; now, therefore, be it

Resolved by the Senate, the House of Delegates concurring, That the General Assembly of Virginia requests that the Congress of the United States reject any encroachment upon the sovereignty of the United States of America over the Panama Canal and insist that the terms of the Hay-Bunau-Varilla Treaty of 1903 as subsequently amended be adhered to and retained; and

Be it further resolved, That the Clerk of the Senate send copies of this resolution to Richard M. Nixon, President of the United States; Gerald R. Ford, Vice President of the United States; Henry A. Kissinger, Secretary of State; Carl Albert, Speaker of the House; J. William Fulbright, Chairman, Senate Foreign Relations Committee; and to each member of the Virginia Delegation to the Congress of the United States.

MARYLAND SENATE JOINT RESOLUTION NO. 34

A Senate joint resolution concerning Panama Canal and Panama Canal Zone for the purpose of supporting continued undiluted sovereignty of the United States and jurisdiction by the United States over the Panama Canal and the Panama Canal Zone on the Isthmus of Panama

Whereas, United States diplomatic representatives are presently engaged in negotiations with representatives of the de facto Revolutionary Government of Panama, under a declared purpose to surrender to Panama, now or on some future date, U.S. sovereign rights and treaty obligations, as defined below, to maintain, operate, protect, and otherwise govern the United States-owned Canal and its protective frame of the Canal Zone, herein designated as the "Canal" and the "Zone," respectively, situated within the Isthmus of Panama.

Title to and ownership of the Canal Zone, under the right "in perpetuity" to exercise sovereign control thereof, were vested absolutely in the United States and recognized to have been so vested in certain solemnly ratified treaties by the United States with Great Britain, Panama, and Colombia, to wit:

(1) The Hay-Pauncefote Treaty of 1901 between the United States and Great Britain, under which the United States adopted the principles of the Convention of Constantinople of 1888 as the rules for operation, regulation, and management of the Canal; and

(2) The Hay-Bunau-Varilla Treaty of 1903 between the Republic of Panama and the United States, by the terms of which the Republic of Panama granted full sovereign rights, power, and authority in perpetuity to the United States over the Zone for the construction, maintenance, operation, sanitation, and protection of the Canal to the entire exclusion of the exercise by the Republic of Panama of any such sovereign rights, power, or authority; and

(3) The Thomson-Urrutia Treaty of April 6, 1914, proclaimed March 30, 1922, between the Republic of Colombia and the United States, under which the Republic of Colombia recognized that title to the Canal and the Panama Railroad is vested "entirely and absolutely" in the United States, which treaty granted important rights in the use of the Canal and Railroad to Colombia.

The United States, in addition to having acquired title to and ownership of the Canal Zone, purchased all privately owned land and property in the Zone, from individual owners, making the Zone the most costly United States territorial possession.

The United States since 1903 has continuously occupied and exercised sovereign control over the Zone, constructed the Canal, and, since 1914, for a period of 60 years, operated the Canal in a highly efficient manner without interruption, under the terms of the above mentioned treaties, thereby honoring its obligations, at reasonable toll rates to the ships of all nations without discrimination.

From 1904 through June 30, 1971, the United States made a total investment in the Canal, including defense, at a cost to the taxpayers of the United States of over $5,695,745,000.

Under the terms of the 1903 treaty and the 1936 and 1955 revisions thereof, Panama has been adequately compensated for the rights it granted to the United States, in such significantly beneficial manner that the compensation and correlated benefits have constituted the major portion of the economy of Panama, giving it the highest per capita income in all of Central America.

The Canal is of vital and imperative importance to Hemispheric defense and to the security of the United States and Panama.

Approximately 70 per cent of Canal traffic either originates or terminates in United States ports, making the continued operation of the canal by the United States vital to its economy.

The present negotiations and a recently disclosed statement of "principles of agreement" by our treaty negotiator, Ambassador Ellsworth Bunker, and Panamanian Foreign Minister Juan Tack, Panama treaty negotiator, constitute a clear and present danger to Hemispheric security and the successful operation of the Canal by the United States under its treaty obligations.

The present treaty negotiations are being conducted by our diplomatic representatives under a cloak of unwarranted secrecy, thus withholding from our people and their representatives in Congress information vital to the security of the United States and its legitimate economic development.

The United States House of Representatives, on February 2, 1960, adopted House Concurrent Resolution 459, 86th Congress, reaffirming the sovereignty of the United States over the Zone territory by the overwhelming vote of 382 to 12, thus demonstrating the firm determination of our people that the United States maintain its indispensable sovereignty and jurisdiction over the Canal and the Zone.

Under Article IV, Section 3, Clause 2 of the United States Constitution, the power

to dispose of territory or other property of the United States is specifically vested in the Congress, which includes the House of Representatives.

The Panama Canal is essential to the defense and national security of the United States. It is of vital importance to the economy and interoceanic commerce of the United States with the remainder of the free world.

Valuable exports from the State of Maryland and valuable imports to this State go through the Panama Canal to and from distant reaches of the globe.

Under the sovereign control of the United States, the Panama Canal has provided uninterrupted peacetime transit to all nations [[.]]; now, therefore be it

[The traditionally unstable nature of Panamanian politics and government poses an implicit threat to the security of the interests of the United States which for many years have been served by the Panama Canal.

The Republic of Panama possesses neither the technical nor the managerial expertise effectively to operate and maintain the Panama Canal; and the Republic of Panama does not have the capabilities to meet the growing demands placed upon the Canal; now, therefore, be it]

Resolved by the General Assembly of Maryland, That:

(1) The government of the United States should maintain and protect its sovereign rights and jurisdiction over the Panama Canal and Zone, and should in no way cede, dilute, forfeit, negotiate, or transfer any of these sovereign rights, power, authority, jurisdiction, territory, or property that are indispensably necessary for the protection and security of the United States and the entire Western Hemisphere; and

(2) There be no relinquishment or surrender of any presently vested United States sovereign right, power, authority, or property, tangible or intangible, except by treaty authorized by the Congress and duly ratified by the United States; and

(3) There be no recession to Panama, or other divestiture of any United States-owned property, tangible or intangible, without prior authorization by the Congress (House and Senate), as provided in Article IV, Section 3, Clause 2 of the United States Constitution; and be it further

Resolved, That the General Assembly of Maryland requests the Congress of the United States to reject any encroachment upon the sovereignty of the United States of America over the Panama Canal and insists that the terms of the Hay-Bunau-Varilla Treaty of 1903 as subsequently amended be adhered to and retained; and be it further

Resolved, That the Secretary of State of Maryland, under the Great Seal of this State, send copies of this Resolution to Richard M. Nixon, President of the United States; Gerald R. Ford, Vice-President of the United States; Henry A. Kissinger, Secretary of State; Carl Albert, Speaker of the House; J. William Fulbright, Chairman, Senate Foreign Relations Committee; and to each member of the Maryland Delegation to the Congress of the United States; and be it further

Resolved, That copies of this Resolution be sent to the presiding officers of the legislatures of the several states with request for similar action.

Oklahoma Senate Concurrent Resolution No. 21

A concurrent resolution expressing the feeling of the Oklahoma Legislature that the United States should not relinquish its control over the Panama Canal; and directing distribution

Whereas, under the Hay-Pauncefote Treaty of 1901 between Great Britain and the United States, the United States adopted the principles of the Convention of Constantinople of 1888 as the rules for the operation, regulation, and management of the Panama Canal; and

Whereas, by the terms of the Hay-Bunau-Varilla Treaty of 1903, between the Republic of Panama and the United States, the perpetuity of use, occupation, control, construction, maintenance, operation, sanitation, and protection for said canal was granted to the United States; and

Whereas, the United States has paid the Republic of Panama almost $50,000,000.00 in the form of a gratuity; and

Whereas, the United States has made an aggregate investment in said canal in an amount of over $4,889,000,000.00; and

Whereas, said investment or any part thereof could never be recovered in the event of Panamanian seizure or United States abandonment; and

Whereas, seventy per cent (70%) of the Canal Zone traffic either originates or terminates in United States ports; and

Whereas, said canal is of vital strategic importance and imperative to the hemispheric defense and to the security of the United States; and

Whereas, a treaty has been proposed between the United States and the Republic of Panama which in effect would greatly impair if not all but eliminate the known and admitted sovereign rights of the United States in said canal; and

Whereas, under said proposed treaty, the Panama Canal would become the property of a non-American governmental authority; and

Whereas, the Suez Canal has been closed twice in the past ten years, subject to the discretion of the Egyptian Government, and the most recent closing, in June of 1967, resulted in a very substantial increase in United States shipping costs:

Now, therefore, be it resolved by the Senate of the First Session of the Thirty-Second Oklahoma Legislature, the House of Representatives concurring therein:

Section 1. The Government of the United States should maintain and protect its sovereign rights and jurisdiction over the Panama Canal, and the United States Government should in no way forfeit, cede, negotiate, or transfer any of these sovereign rights or jurisdiction to any other sovereign nation or international organization.

Sec. 2. That duly authenticated copies of this resolution, after consideration and enrollment, be prepared and sent to the President; Secretary of State; Honorable Daniel J. Flood of Pennsylvania; and all members of the Oklahoma Congressional Delegation.

Indiana Resolution

A concurrent resolution supporting continued undiluted sovereignty of the United States and jurisdiction by the United States over the Panama Canal and the Panama Canal Zone on the Isthmus of Panama

Whereas, United States diplomatic representatives are presently engaged in negotiations with representatives of the de facto revolutionary government of Panama, under a declared purpose to surrender to Panama, now or on future date, United States sovereign rights and treaty obligations in the Canal Zone;

The United States since 1903 has continously occupied and exercised sovereign control over the Zone, constructed the Canal, and since 1914, for a period of 60 years, operated the Canal in a highly efficient manner without interruption, under the terms of the Hay-Pauncefote Treaty of 1901, the Hay-Bunau-Varilla Treaty of 1903, and the Thomson-Urrutia Treaty of April 6, 1914, making a total investment in the Canal, including defense, at a cost to the taxpayers of the United States of over $5,695,745,000;

The United States House of Representatives, on February 2, 1960, adopted House Concurrent Resolution 459, 86th Congress, reaffirming the sovereignty of the United States over the Zone territory by the overwhelming vote of 382 to 12, thus demonstrating the firm determination of our people that the United States maintain its indispensable sovereignty and jurisdiction over the Canal and the Zone;

Under Article IV, Section 3, Clause 2 of the United States Constitution, the power to dispose of territory or other property of the United States is specifically vested in the Congress, which includes the House of Representatives; and

The Panama Canal is essential to the defense and national security of the United States. It is of vital importance to the economy and interoceanic commerce of the United States with the remainder of the free world:

Therefore, be it resolved by the Senate of the General Assembly of the State of Indiana, the House of Representatives concurring:

Section 1. There be no relinquishment or surrender of any presently vested United States sovereign right, power, authority, or property, tangible or intangible, except by treaty authorized by the Congress and duly ratified by the United States.

Sec. 2. There be no recession to Panama, or other divestiture of any United States-owned property, tangible or intangible, without prior authorization by the Congress (House and Senate), as provided in Article IV, Section 3, Clause 2 of the United States Constitution.

Sec. 3. The Secretary of the Senate, under the seal of this state, send copies of this resolution to the President of the United States, Vice President of the United States, Secretary of State, Speaker of the House of Representatives, Senate Chairman of the Foreign Relations Committee, Chairman of the House Committee on Foreign Affairs, Chairman of the Senate Committee on Armed Forces, Chairman of the House Committee on Armed Forces, and to each member of the Indiana Delegation of the Congress of the United States; and that copies of this resolution be sent to the presiding officers of the legislatures of the several states with requests for similar action.

South Carolina Resolution

A joint resolution memorializing Congress and the executive branch of the Federal Government to preserve the rights of the United States in and to the Panama Canal and Panama Canal Zone on the Isthmus of Panama in Central America

Whereas, representatives of the United States are negotiating with people in Panama, under the declared purpose of surrendering our sovereign rights and treaty obligations to maintain, operate, protect, and otherwise govern the United States owned Canal and its protective frame of the Canal Zone in the Isthmus of Panama, and

Whereas, the title to, and ownership of, the Canal Zone along with the right and responsibility to exercise sovereign control of it is clearly vested in the United States in perpetuity; as is made clear in three treaties which are more fully referred to and briefly summarized in Exhibit "A" which is attached hereto, and

Whereas, the United States has acquired, by purchases from individual owners, all land and property which was privately owned in the Canal Zone, so that the Canal Zone is the most costly of the United States' territorial possessions; and

Whereas, the People of the United States have an investment in the Canal, including defense of over $5,695,745,000; and

Whereas, Panama has been fairly and fully compensated for all rights it granted to the

United States; and the compensation and other benefits of Yankee management have greatly increased the wealth of that area so it now has the highest per capita income in all of Central America; and

Whereas, the Canal is of vital importance to Hemispheric defense, to the security of the United States and Panama, and to our economy as approximately seventy percent (70%) of Canal traffic either originates or terminates in United States ports; and

Whereas, the present treaty negotiations between our country and a de facto revolutionary government in Panama are being conducted under a cloak of secrecy, withholding from our people and their representatives in Congress, information which is vital to the security of our government and the legitimate economic development of our country, and constitute a clear and present danger to Hemispheric security and the successful operation of the Canal by the United States; and

Whereas, the Republic of Panama possesses neither the technical nor the managerial expertise necessary to effectively operate and maintain the Panama Canal; and the Republic of Panama does not have the financial and productive capabilities to meet the growing demands placed upon the Canal; now, therefore,

Be it resolved by the General Assembly of South Carolina, That:

(1) The government of the United States should maintain and protect its sovereign rights and jurisdiction over the Panama Canal and Zone, and should exercise extreme care not to cede, dilute, forfeit, negotiate away, or transfer any of our country's rights, power authority, jurisdiction, territory, or property in any way necessary for the protection and security of the United States and the Western Hemisphere; and

(2) There be no relinquishment or surrender of any presently vested United States sovereign right, power, authority, or property, tangible or intangible, to any other government, except by treaty authorized by the Congress and duly ratified by the United States; and

(3) There be no ceding or giving to Panama, or divestiture in any other manner of any United States-owned property, tangible or intangible, without prior authorization by the Congress of the United States of America, as provided for in Article IV, Section 3, Clause 2 of the United States Constitution; and

Be it further resolved, that the General Assembly of South Carolina does hereby request the Congress of the United States to reject any encroachment upon the sovereignty of the United States of America over the Panama Canal, but instead to insist that the terms of the Hay-Bunau-Varilla Treaty of 1903, as amended, be strictly followed and carried out; and

Be it further resolved, That the Secretary of State of South Carolina be requested hereby to send official copies of this Resolution to the following:

The Honorable Richard M. Nixon, President of the United States;

The Honorable Gerald R. Ford, Vice-President of the United States;

The Honorable Henry A. Kissinger, Secretary of State;

The Honorable Carl Albert, Speaker of the House;

The Honorable J. William Fulbright, Chairman, Senate Foreign Relations Committee;

And to each member of the South Carolina Delegation to the Congress of the United States; and

Be it further resolved, That copies of this Resolution be sent to the presiding officers of the legislatures of the several states with requests that action similar to that indicated by this resolution be initiated by them for consideration by the members of those honorable assemblies.

EXHIBIT A

The treaties by the United States with Great Britain, Panama and Colombia which give the rights and responsibilities of the United States in the Panama Canal are:

(1) The Hay-Pauncefote Treaty of 1901 between the United States and Great Britain, under which the United States adopted the principles of the Convention of Constantinople of 1888 as the rules for operation, regulation, and management of the Canal; and

(2) The Hay-Bunau-Varilla Treaty of 1903 between the Republic of Panama and the United States, by the terms of which the Republic of Panama granted full sovereignty rights, power, and authority in perpetuity to the United States over the Zone for the construction, maintenance, operation, sanitation, and protection of the Canal to the entire exclusion of the exercise by the Republic of Panama of any such sovereign rights, power, or authority; and

(3) The Thomson-Urrutia Treaty of April 6, 1914, proclaimed March 30, 1922, between the Republic of Colombia and the United States, under which the Republic of Colombia recognized that title to the Canal and the Panama Railroad is vested "entirely and absolutely" in the United States, which treaty granted important rights in the use of the Canal and Railroad to Colombia.

ADDITIONAL FACTUAL SUPPORTING DATA

The United States House of Representatives, on February 2, 1960, adopted House Concurrent Resolution 459, 86th Congress, reaffirming the sovereignty of the United States over the Zone territory by the overwhelming vote of 382 to 12, thus demonstrating the firm determination of our people that the United States maintain its indispensable sovereignty and jurisdiction over the Canal and the Zone.

Under Article IV, Section 3, Clause 2 of the United States Constitution, the power to dispose of territory or other property of the United States is specifically vested in the Congress, which include the House of Representatives.

Valuable exports from the State of South Carolina and valuable imports to this State go through the Panama Canal to and from distant reaches of the globe.

Finally, in 1955, another treaty provided for the transfer of land to Panama. Three provisions of the treaty related to the disposal of territory and property. Although two of those three provisions did not expressly call for implementing legislation, Assistant Secretary of State Holland, informed the Senate Foreign Relations Committee in writing that legislation would be needed to implement the transfer of all the territory and property covered by the treaty.

In summary, under article IV of the Constitution, the Panama Canal Treaty cannot become effective, even if it is given the advice and consent of two-thirds of the Senate, until the House of Representatives also acts favorably on the issue.

Even if the Senate should approve these treaties—and that is still a big "if"—they should not do so unless an amendment or reservation is attached requiring implementing legislation for the appropriate transfer of territory and property.

Even according to a recent Feb. 24–27, 1978, nationwide poll conducted by Opinion Research Corp., over a two-thirds majority of the American people favor a House vote on disposition of property in the Panama Canal Zone. Our constituents expect us to act and I for one refuse to be held hostage to the unconstitutional views of the President. I will not vote for any implementing legislation until after such time as this body has voted on disposition of property as required by the Constitution.

Finally, Mr. Speaker, one point that has not been brought out yet in this discussion is the fact that the opinion given by Attorney General Bell, to the effect that a treaty can dispose of U.S. property without enabling legislation, reverses the opinion given by at least three of his predecessors.

For example, in July of 1899, Attorney General John Griggs issued not one, but two opinions, telling the Secretary of War he could not dispose of property in Puerto Rico, which we had acquired by treaty with Spain.

In his opinion of July 26, Attorney General Griggs said:

I do not know of any right or power which the Secretary of War or the President has to alienate in perpetuity any of the public domain of the United States, except in accordance with acts of Congress duly passed with reference thereto.

On July 27, the Attorney General gave another opinion informing the Secretary of War he could not grant a concession to use the water power of a river in Puerto Rico, since it was public property of the United States. The Attorney General said:

By the Constitution the power to dispose of and make all needful rules and regulations respecting the territory or other property belonging to the United States is vested in Congress. Congress has conferred no authority of this nature upon the Executive, and in the absence of such power conferred by Congress the President can no more dispose of this particular portion of the public property of the United States than he can dispose of the public grounds, buildings, and other property ceded by Spain to the United States. 22 Op. Att. Gen. 545, 549–550.

How different from this view of article IV is the opinion we are now given by Attorney General Bell, who acts as if he is unaware of the existence of any rulings by his predecessors.

Attorney General Gribbs is not the only Attorney General who differed from Mr. Bell. On October 28, 1924, Attorney General Harlan Stone, who later became Chief Justice Stone, made the following statement in an opinion he prepared for the Secretary of the Navy. Attorney General Stone said:

Property once acquired by the government may not be sold, or title otherwise disposed of, except under the authority of Congress . . . The question here is not of the right of power of the United States as the owner, to dispose of the property, but the authority which must be invoked to dispose of or grant rights in connection with it. The United States has a right to dispose of realty acquired under the law as of personalty, including patent rights; but it has been fully established that Congress is the only authority to be invoked, where there is, in fact, an alienation or what amounts to a transfer or surrender of government property, by which the title, control or possession of the government is lost, reduced or abridged. This authority may be generally expressed, or may be specifically granted to permit the disposition in whole or in part of particular prop-

erty rights. But until that power is given by Congress, expressly or impliedly, the Executive is without power to act." 34 Op. Att. Gen. 322–323.

Third, there is the opinion which Attorney General, and later Supreme Court Justice, Robert Jackson prepared for President Roosevelt involving the transfer of 58 destroyers to Great Britain. Attorney General Jackson advised the President on August 27, 1940, that congressional authorization was required before he could give away the old destroyers and that there was ample statutory authority for doing so. (39 Op. Att. Gen. 484, 485, 489–494.)

Thus, Mr. Speaker, I cannot understand how Attorney General Bell can dismiss these earlier opinions of his predecessors, apparently without even referring to them. The present Attorney General is overruled at least 3 to 1 by men who have previously filled the position he is now holding, and I believe their opinion is the correct one.

In conclusion, I must point out that it is up to the Members of this body to assert our constitutional authority concerning the disposal of property by refusing to pass implementing legislation until such time as we are first allowed to exercise our article IV powers. Additionally, I would also ask my colleagues to sign Discharge Petition No. 6 which would bring House Concurrent Resolution No. 347 to a more timely vote in the House of Representatives—that we may assert our will that no rights or titled property in this Canal Zone be transferred without an act of Congress.

HELSINKI COMMISSION TO HOLD HEARINGS ON BELGRADE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. FASCELL) is recognized for 10 minutes.

● Mr. FASCELL. Mr. Speaker, U.S. performance at the recently concluded Belgrade meeting on Security and Cooperation in Europe will be examined next week when Ambassador Arthur J. Goldberg testifies before the joint congressional-executive "Helsinki" Commission on Tuesday, March 21 at 10 a.m. in room 345 of the Cannon House Office Building.

Goldberg, a former Supreme Court Justice and Ambassador to the United Nations, led the U.S. delegation to the 5-month, 35-nation meeting which, among other things, probed human rights abuses in the Soviet Union and Eastern Europe.

The Belgrade meeting was an outgrowth of the Conference on Security and Cooperation in Europe which ended in 1975 with the signing of the final act designed to promote détente in Europe. In addition to human rights guarantees, the accord calls for measures to promote trade, human contacts, information flow, scientific and cultural exchanges, and military security among the countries of East and West. The purpose of the Belgrade meeting, the first of such meetings mandated by the final act, was to examine the progress of implementation and to discuss ways of improving it.●

PRESIDENT'S WELFARE REFORM PROGRAM NEEDS REFORM

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from New York (Ms. HOLTZMAN) is recognized for 5 minutes.

● Ms. HOLTZMAN. Mr. Speaker, the Department of Health, Education, and Welfare has recently prepared an analysis for me showing that States may have to spend as much as $784 million more on medicaid as a result of President Carter's welfare reform proposal, H.R. 9030, than they do under existing law.

These hidden costs could eliminate much of the fiscal relief promised to the States by the Carter administration. During hearings on this subject held by the Task Force on State and Local Government of the Budget Committee, which I chair, HEW estimated that the total fiscal relief offered to States by the Carter plan would be $2.1 billion. The newly computed additional State medicaid expenditures could, therefore, wipe out as much as 38 percent of that promised relief.

Furthermore, it may well be that the balance of the fiscal relief promised by the Carter administration to the States will not materialize. HEW's estimates are based on a variety of assumptions that may not be realized. For example, the administration assumes that States will not provide cost-of-living increases to beneficiaries, provide medicaid to people who will not be eligible under the President's welfare program, or pay for certain emergency assistance needs. If States act contrary to HEW's assumptions and pay these costs, there may be no fiscal relief for any State under the Carter proposal.

States, counties, and cities are staggering under an enormous welfare burden. They need real help from the Federal Government.

As this HEW report demonstrates, the President's welfare reform proposal needs reform itself.

The text of the letter follows:

WASHINGTON, D.C.
February 8, 1977.

HON. ELIZABETH HOLTZMAN,
State and Local Government Task Force, Washington, D.C.

DEAR MS. HOLTZMAN: During my October 28, 1977 appearance before the Budget Committee, State and Local Government Task Force, you requested an estimate of the increased costs to State and local governments arising from the administration of Medicaid as envisioned in Section 105 of H.R. 9030, the Medicaid conforming amendments of the Better Jobs and Income Act.

Because it is anticipated that the present Medicaid program will be superseded by National Health Insurance, it is expected that Section 105 will never become operative. The Administration is placing high priority on improving the quality of health care for low-income groups in the National Health Insurance planning effort now taking place. Should an unchanged Medicaid program continue to operate side-by-side with a reformed cash assistance program, however, we estimate that total Federal and State/local government Medicaid administrative costs would increase between $166 and $784 million annually.

The amount of increase would depend on two factors: (1) the decisions individual States must make on whether or not to administer the H.R. 9030 cash assistance intake function; and (2) the extent to which States not electing to administer cash assistance intake can minimize the cost of maintaining a separate Medicaid eligibility determination process.

The lower estimate ($166 million) assumes that all States would choose to operate both cash assistance intake and Medicaid eligibility processes and would achieve significant coordination between them. The higher estimate ($784 million) assumes that the Federal government would operate cash assistance intake in all States, and that all States would operate a separate Medicaid eligibility process with considerable duplication of administrative effort. It is expected that Medicaid administrative cost increases would be borne about equally by Federal and State/local governments, though the Federal share may rise to over half because the Federal government assumes a larger share of certain categories of administrative cost (e.g., computer services, training).

I have attached a detailed explanation of how we derived our cost estimates. Members of my staff will be pleased to provide you with additional explanation, if you so desire.

Sincerely,

HENRY AARON,
Assistant Secretary for Planning and Evaluation.

DERIVATION OF ESTIMATES OF INCREASED MEDICAID ADMINISTRATIVE COSTS IF SECTION 105 OF 9030 WERE TO BECOME EFFECTIVE

1. Amounts now claimed by States for Medicaid administration represent two categories of costs: (1) administrative costs not directly related to determining Medicaid eligibility (e.g., the administrative expense of negotiating provider agreements, of processing medical vendor claims for payment); and (2) costs related to determining Medicaid eligibility for individuals *not* receiving cash assistance. (Because Medicaid eligibility is automatically conferred on all AFDC and approximately 75 percent of SSI recipients, there currently is no additional Medicaid eligibility cost included in Medicaid administrative costs for these recipients.) To assess the cost impact of H.R. 9030 on Medicaid administrative costs, it is necessary to compare pre-reform Medicaid administrative costs to estimates of the same costs after reform.

2. The first category of cost, non-eligibility costs, are mostly of a fixed overhead nature. Only some overhead charges are sensitive to caseload changes (e.g., bill paying); most (e.g., negotiating provider agreements) are not. Since the Medicaid conforming amendments of Section 105 are expected to maintain Medicaid caseloads at pre-reform levels, the non-eligibility portion of Medicaid administrative costs is assumed to remain constant before and after reform. Administrative costs related to determining Medicaid eligibility are not expected to remain constant though, and it is therefore necessary to compare Medicaid eligibility costs before and after reform.

3. Pre-reform Medicaid eligibility costs are not now clearly identifiable, however. This situation arises because Medicaid eligibility determinations for individuals not receiving cash assistance are often performed by the same individuals doing AFDC cash assistance eligibility determinations. Since States are reimbursed at the same 50 percent matching rate for Medicaid and AFDC administrative costs, States have not had a financial or management incentive to allocate costs precisely between these programs at the State level. In some instances, Medicaid eligibility costs are charged to cash assistance administrative costs, and in other instances the reverse is true. To take ac-

count of this fact, pre-reform Medicaid eligibility costs were estimated to be equal to the eligibility portion of administrative costs now charged against the Medicaid program (assumed to be 40 percent for States that automatically confer Medicaid eligibility to all SSI recipients; 50 percent for all other States), plus 30 percent of States' AFDC administrative charges.

4. If States choose to perform both cash assistance intake and Medicaid eligibility functions after welfare reform, significant administrative efficiencies would occur with respect to Medicaid determinations. Basic eligibility information would only have to be collected once, and could be entered and stored in one recordkeeping system that supported both eligibility functions. Income and assets would only need to be verified once.

The cost of determining Medicaid eligibility under this administrative model is assumed to be: (1) 25 percent of States' average AFDC administrative cost for household units meeting Medicaid categorical requirements and also requiring on-going income or family composition eligibility checks, and (2) about 5 percent for other households not requiring such frequent Medicaid eligibility verification. When fixed Medicaid administrative costs ($322 million) that will continue after welfare reform are added to eligibility costs ($386 million) under this administrative model, the total cost is $708 million. This represents a $166 million increase over the $542 million charged exclusively to Medicaid administration in the base period for 49 States and the District of Columbia (Arizona does not have a Medicaid program).

5. If States do not choose to perform both cash assistance intake and Medicaid eligibility functions after welfare reform, considerable duplication of effort will arise between State Medicaid and the Federal cash assistance eligibility functions. Basic eligibility information might be collected twice, and entered and stored twice in different recordkeeping systems. States also might decide to verify Medicaid income and asset information independent of Federal verification for cash assistance.

The incremental cost of determining Medicaid eligibility under this administrative model is assumed to be: (1) 65 percent of the States' average AFDC administrative cost for households meeting Medicaid's categorical requirements and requiring more frequent Medicaid eligibility verifications, and (2) about 15 percent for other households. Sixty-five (65) rather than 100 percent of a States' average AFDC administrative cost is used, because unlike the current AFDC program, it will not be necessary to determine exact AFDC benefit amounts (so in most cases, work-related expenses will not have to be determined), Food Stamp determinations will no longer be made, nor will it be necessary to make absent parent, WIN or Employment Service referrals in the course of determining just Medicaid eligibility. Further, though ostensibly maintaining a separate Medicaid eligibility process, cost-conscious States will utilize information from the Federal cash assistance eligibility process to minimize the separate Medicaid administrative cost.

When fixed Medicaid administrative costs that will continue after welfare reform ($322 million) are added to eligibility costs under this administrative model ($1004 million), the total cost is $1326 million. This represents a $784 million increase over the $542 million charged exclusively to Medicaid administration in the base period for the 49 States and the District of Columbia.●

CIGARETTE SMUGGLING

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey (Mr. RODINO) is recognized for 5 minutes.

● Mr. RODINO. Mr. Speaker, cigarette smuggling—the transportation of large quantities of cigarettes from low cigarette tax States to those with high taxes without payment of applicable State taxes—is a national problem with serious law enforcement implications. Cigarette smugglers buy cigarettes wholesale in States with low taxes, transport them to States with high cigarette taxes, and sell them on the black market. Potential profits in cigarette bootlegging are enormous, thus attracting large sections of organized crime. So widespread is this practice, that it is estimated that from 15 to 50 percent of all cigarettes sold in the high tax rate States are illegal, with a subsequent loss in revene to State government of over $400 million annually. In New Jersey alone, this amounts to $15 to $20 million. Government is not the only entity which suffers from this contraband trade. For every tax dollar lost by the State, industry is losing $2 to $3 gross. This does not include the large sums of money now being spent on extra insurance, security guards for those companies plagued by truck highjacking. Additionally, organized crime has made such inroads into cigarette sales, that legitimate wholesalers are being forced out of business.

A bill which I am introducing today along with all of my colleagues from the State of New Jersey, makes cigarette smuggling a Federal crime, and imposes heavy penalties. State law enforcement officials, acting alone, with insufficient manpower, cannot effectively monitor and apprehend cigarette smugglers. It is only with the assistance of Federal law enforcement officials that we can begin to stop cigarette smuggling now taking place, and prevent its further expansion. It is vital that the Congress take action on this problem during this session. This issue is not new to the Congress. For several years, governments and individuals affected by cigarette smuggling have been asking for congressional action to stem the flow of illegal cigarettes. State governments, hampered by insufficient budgets, are no longer able to even marginally affect this illegal trade—a trade whose profits contribute significantly to organized crime's other activities. Only the Federal Government has the authority and the resources to deal effectively with this crime. Hearings on this matter began on February 28 before the Subcommittee on Crime of the House Committee on the Judiciary. It is my hope and that of many of us here in the House that Congress will take action on this legislation in the very near future. I will certainly do all that I can to bring this about.●

CLARIFICATION OF ISRAELI RETALIATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. WEISS) is recognized for 10 minutes.

(Mr. WEISS asked and was given permission to revise and extend his remarks and to include extraneous matter.)

Mr. WEISS. Mr. Speaker, earlier this afternoon, in the course of the debate on the Humphrey-Hawkins bill, the gentleman from Illinois (Mr. FINDLEY) asked to proceed out of order. At that time, he made a statement relating to the PLO terrorist excursion and terrorist raid into Israel, and the Israeli Government's response in retaliation thereto.

Given the nature of that statement, I feel that it would be not appropriate to allow the day to be completed without a response to the gentleman's remarks. The fact is, Mr. Speaker, that the gentleman, in the course of his comments, paid much greater heed to the retaliation than to the attack; greater accent on the retaliation by the Israeli Government than the cause of that retaliation, which was the murder of almost 40 innocent human beings, and the wounding of over 70 people.

Mr. Speaker, the gentleman's comments ended with a statement to the effect that the matter will not be resolved until the Palestinian people would be given their legitimate homeland. Mr. Speaker, it seems to me that, if anything, the murderous raid by the PLO demonstrates that their autonomy on the border of Israel is something that could not be countenanced. It underscores tragically the reason why the United States ought not to be in the position of attempting to dictate to either the Egyptian or Israeli Governments as to the course of negotiations which they will be undertaking, and how those matters ought to be resolved. That really must be left to the two governments, and hopefully, other countries in the area, to do what they consider to be in their best interests.

Mr. Speaker, I will be entering in full a copy of an editorial which appeared in the New York Times of this date. I would like to read at this point, in conclusion, the last paragraph of that editorial.

It says:

Whatever the merit of these views and requests, the fact remains that it is Israel that is being asked to trust in new arrangements for its security, to relinquish territory that has been a phychological buffer for its people and to envision a time when it will surrender military control over hundreds of thousands of Palestinians in the West Bank and Gaza. The Arabs who have been trumpeting Israel's vulnerability this week and yet will not take measures that would relieve Israeli anxieties cannot have it both ways. Only by showing that they understand Israel's need for elementary security can they logically premise peace on the return of lost territory. The negotiations for an Israeli retreat from Lebanon will test them well.

Mr. Speaker, the entire editorial follows:

ISRAEL POSES A TEST

By sending troops into southern Lebanon, Israel has asked the world, and particularly the Arab world, to give it some assurance that terrorists will not be left free along the border to prey upon its vulnerable population. It is a fair request, particularly after Yasir Arafat took pride in the brutal assault on Israeli civilians last weekend and promised more of the same.

The problem is that there exists no easy answer. The Lebanese Government, by its own admission, cannot control the guerrilla forces based among its 400,000 Palestinians. Syria, having publicly supported the terror-

ism, could not be trusted to control them. The Palestinian extremists are probably in disfavor in all the Arab nations that border on Israel, but their cause has nonetheless been enshrined in Arab politics and diplomacy. If they are to be prevented from sabotaging the current negotiations—and they have once again begun the job well—the Arab nations must help Israel find some safety or else let Israelis patrol the five-mile-deep danger zone of Lebanon as they now threaten to do indefinitely.

It is all discouraging, of course. It is also horrible. Now mothers weep over maimed children on both sides of the Israel-Lebanon frontier, and shout for revenge. Onlookers the world over will measure the Israeli response against the Fatah provocation and wonder whether the Israelis fired too randomly from the air and why they were not content to capture guerrilla bases on the ground. Some will say the Israelis share responsibility for the Palestinian hatreds and for inflaming them yet again. The Egyptians, who wisely condemned the Fatah attack, will ask not to have their own peace overtures tangled in the forthcoming Lebanon negotiations. The United States, after dutifully refraining from criticism of the Israeli counterstrike, will ask Mr. Begin to put concern for peace with Egypt in the south ahead of the quest for security in the north.

Whatever the merit of these views and requests, the fact remains that it is Israel that is being asked to trust in new arrangements for its security, to relinquish territory that has been a psychological buffer for its people and to envision a time when it will surrender military control over hundreds of thousands of Palestinians in the West Bank and Gaza. The Arabs who have been trumpeting Israeli's vulnerability this week and yet will not take measures that would relieve Israeli anxieties cannot have it both ways. Only by showing that they understand Israeli's need for elementary security can they logically premise peace on the return of lost territory. The negotiations for an Israeli retreat from Lebanon will test them well.

ANATOLI SCHARANSKY—BRAVE DEFENDER OF FREEDOM IN THE SOVIET UNION

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from New Jersey (Mrs. MEYNER) is recognized for 5 minutes.

● Mrs. MEYNER. Mr. Speaker, I would like to add my voice to those of many others who have condemned the efforts of the Soviet Government to try Anatoli Scharansky on trumped-up charges of treason. This persecution of Mr. Scharansky must be unmasked for what it truly is: A crude attempt by the Soviet Union to silence the voices of freedom and human rights in that country. Clearly, the Kremlin feels that this inquisition will intimidate others from proclaiming the fundamental human freedoms that are the birthright of every man and woman.

As President Carter declared before the United Nations:

> No member of the United Nations can claim that mistreatment of its citizens is solely its own business.

We are concerned about the violation of human rights anywhere on the globe.

The "right to freedom of opinion and expression," the "right to freedom of peaceful assembly and association," and the right of everyone "to leave any country, including his own, and to return to his country" are all guaranteed by the Universal Declaration of Human Rights and systematically denied by the Soviet Union. Détente between the United States and the U.S.S.R. will never reach fruition unless and until the Soviet Government begins to live up to the pledges they made in 1948 and violate so freely today.

I join with many of my colleagues in expressing my solidarity with Anatoli Scharansky and the other brave defenders of freedom in the Soviet Union.●

THE PLIGHT OF SOVIET REFUSENIKS "VLADIMIR AND CARMELLA RAIZ"

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. ROSENTHAL) is recognized for 5 minutes.

● Mr. ROSENTHAL. Mr. Speaker, Vladimir and Carmella Raiz, like so many other Soviet Jews, have been harassed and persecuted simply for their desire to emigrate to Israel.

It is for the Raiz family, their 7-month-old son Moshe and other Soviet Jews who are being detained in the U.S.S.R. as a result of their Government's repressive emigration policies, that we are here today in Congress conducting this vigil.

Vladimir and Carmella Raiz of Vilnius have applied numerous times for exit visas since 1972. It is their dream to join their relatives in Israel. Their application was denied by the local chief of OVIR who said that Dr. Raiz, a molecular biologist at the Institute of Molecular Biology of the Academy of Sciences, was in possession of secret scientific information. However, the institute has certified that his research was conducted over 14 years ago and is no longer considered secret.

The Raiz family has endured considerable hardship since first applying for an exit visa 6 years ago. Dr. Raiz was fired from the institute, and has been working at menial jobs ever since. Mrs. Raiz, a violinist in the Moscow Symphony Orchestra, was also fired. In May, Mrs. Raiz wrote:

> Every day is a terror. I never know if my husband will return when he leaves for work.

The Soviets are trying to cut off the Raiz' communication with the rest of the world. In 1975, the Raiz' phone was temporarily disconnected and they were warned it would be permanently disconnected if they again used it for international phone calls or for calls by tourists visiting them.

Last month, I wrote to Chairman Brezhnev, Ambassador Dobrynin, and the chief of the OVIR urging their reconsideration of the Raiz' visa request. I have not received a reply. In addition, I wrote to Dr. Raiz through registered mail. I have yet to receive the return receipt and fear he is not receiving his mail.

The Raiz family's only "crime" is their desire to join their family in Israel. The Helsinki agreement, which was signed and endorsed by the Soviet Union, calls for free movement of peoples, particularly for the unification of families. I can only pray that the Soviet officials will hear our plea and grant the Raizs and other refuseniks permission to emigrate.●

GENERAL REVENUE SOUGHT FOR SOCIAL SECURITY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts (Mr. BURKE) is recognized for 5 minutes.

● Mr. BURKE of Massachusetts. Mr. Speaker, for many years Wendell Coltin has been trying to help the people of the Boston area cope with problems which they have encountered involving social security—and has done an admirable job. There is no one more qualified to voice the opinions of the elderly, nor anyone more competent at finding out just what those opinions are.

In that light, I think it is pertinent to bring to my colleagues' attention Mr. Coltin's article in today's Boston Herald American. His description of the statement by the AARP/NART's executive director, Cyrus Brickfield, reemphasizes several points which I have been trying to make over the past few years. In particular, I invite my colleagues to peruse Mr. Brickfield's comments about the intentions of the drafters of the original social security legislation regarding the self-supporting aspects of the program.

The Committee on Economic Security never intended that the program be self-supporting ad infinitum: Their actuarial tables showed that it could not be done. We must dispense with the idea that financing a portion of the cost of the system is violating the integrity of the social security concept. Both Mr. Coltin and Mr. Brickfield—as spokesmen for the elderly—show us that at least one segment of our population realizes that:

MEDICARE/SOCIAL SECURITY—GENERAL REVENUE SOUGHT FOR SOCIAL SECURITY

(By Wendell Coltin)

Cyril F. Brickfield, executive director of the American Association of Retired Persons and National Retired Teachers Association, "trusts" that Congress will "more seriously consider general revenue financing proposals during this year's debate on Social Security."

He adds, "Envisioned more than 40 years ago by the experts who created Social Security in the first place, it is surely an idea whose time has come."

Brickfield notes President Carter and others last year proposed using general tax revenue to help finance the Social Security system. He said, "The President wanted to use general revenue to offset the loss of payroll tax income when unemployment rates exceeded six percent.

"The idea of using general tax revenues to help fund Social Security is not new.

"In fact," Brickfield continued, "some of the original architects of the Social Security system, back in 1935, envisioned that, someday, there would be a three-way sharing of the cost of Social Security among employers, employees (through payroll taxes) and the federal government (through general tax revenues).

"Furthermore, as Congress has added to Social Security a number of elements—such as the minimum benefit, survivors' benefits and the like—which are not directly tied to the system, Social Security has become, in part, a program with welfare functions.

"Since government welfare programs are financed through general tax revenues—to

which all Americans contribute—some people have asked why the welfare aspects of the Social Security system should be financed through payroll taxes.

"Unfortunately, Congress 'purists'—who continue to insist that the entire Social Security system is a 'social insurance' program with benefits tied to contributions—were able to sidetrack President Carter's proposal last year. They opted, instead, for tremendous increases in the payroll tax for employees and employers alike over the next 10 years.

"I believe that Congress made a mistake. One only has to look at the short-term and long-term problems of Social Security to see that Congress' action last year amounted to little more than a band-aid solution.

"As early as 1975 we knew there would be a short-term imbalance in the system that Social Security would be paying out more than it was taking in. High UNEMPLOYMENT meant fewer people would put payroll taxes into the system. High INFLATION increased the amount of benefits being paid out.

Unless Congress acted, the Social Security Disability Trust Fund was expected to go bankrupt by 1979 and the Old Age and Survivors Benefit Trust Fund was slated to run out of money by 1982.

"But by using heavy payroll tax increases as the mechanism for solving the short-term imbalance, Congress failed to insulate the Social Security system from the effects of future inflation and unemployment—the very factors which, in large measure, created the short-term imbalance in the first place.

"...I am convinced that, sooner or later, general tax revenues are going to have to be used, at least on a limited basis, to help finance Social Security. Not only will the use of general revenue insure that the system will remain financially stable over the long term, it will provide government experts with the flexibility to meet the needs of the system in a changing economy."

SS STATISTICS: Brickfield points out more than 33 million persons receive checks every month totalling more than $7 billion; and "for many, it is the only source of retirement income."

(Your questions are welcome. Address Medicare Mailbox, Boston Herald American, 300 Harrison Ave., Boston, Mass. 02106).●

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Kentucky (Mr. BRECKINRIDGE) is recognized for 5 minutes.

● Mr. BRECKINRIDGE. Mr. Speaker, I regret that I was not able to be present when the House voted on rollcall 129, H.R. 10982, the first budget rescission bill of 1978. I was also unable to vote in rollcall 133, H.R. 10126, part-time career employment in the Federal service, and rollcall 134, H.R. 9146, congressional review of proposed changes in the Postal Service. Had I been able to vote on these three bills I would have voted "aye." ●

IN RESPONSE TO PRESIDENT CARTER'S FIRESIDE CHAT

(Mr. HANSEN asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. HANSEN. Mr. Speaker, Governor Reagan's response to President Carter's fireside chat pointed out the many inconsistencies of the President's comments. The most startling fact which was absent from the President's remarks was the fact that the American taxpayer was going to have to pay approximately $4 billion to implement the treaties. The administration has to date only admitted to a $600,000,000 cost.

I am deeply appreciative of Governor Reagan's forthrightness on this very critical issue and feel that his remarks are worthy of sharing with my colleagues and their constituents. Governor Reagan's remarks follow:

TEXT OF REMARKS BY THE HONORABLE RONALD REAGAN

Good Evening.

I appreciate this opportunity to discuss President Carter's television talk on the Panama Canal and the treaties he has proposed which are now before the United States Senate for debate.

A great deal has been said and written about the Panama Canal in recent months. Despite many different points of view about many different aspects of the issue, on one point virtually everyone seems to agree: the continued smooth and secure operation of the Panama Canal is vital to our national security interests and those of the entire Western Hemisphere.

Some of our Latin American neighbor states depend on the Canal to such an extent that more than two-thirds of their commerce goes through it very year. We ourselves will depend on the Canal for the smooth flow of Alaskan oil, by tanker, to our Gulf coast ports for refining. Our naval experts agree that, with our Navy shrunken in size to its smallest point since before World War II, mobility is critically important and the Canal is a vital factor in maintaining that mobility.

In his talk, President Carter said, "What we want is the permanent right to use the Canal." I agree with that, as I'm sure you do. We have that permanent right—right now, but will we effectively have it if the Carter-Torrijos treaties are ratified? I have very serious doubts that we will.

The President, in his fireside chat, discussed the background of this issue so briefly (perhaps because of the press of time) that he left the mistaken impression that we acquired the Canal Zone by some underhanded means; that the Canal was somehow forced on Panama. Nothing could be further from the truth.

Panama, a province of Colombia prior to 1903, had attempted repeatedly to become an independent nation—without success. Separated by mountains and jungle from the capital of Colombia, the people on the Isthmus of Panama felt neglected and forgotten—and maybe they were, in their disease-infested swamps and jungles.

Colombia had given a French company permission to build a canal through the province of Panama. When the French failed and gave up, our Congress authorized the President to negotiate a treaty with Colombia and to buy out the French interest for $40 million. Seeing a chance to get the $40 million for itself by stalling, the Colombian government rejected our proposals. The Panamanians saw their chance and rebelled, notifying the United States at the same time that the new Republic of Panama would sign a canal treaty. The revolution was bloodless . . . and successful.

President Carter made the point that our 1903 treaty was not even signed by a Panamanian, as if this somehow indicated we had forced Panama to accept it. Well, the treaty was signed by a Frenchman named Philippe Bunau-Varilla, but only because the Panamanians themselves named him as Minister Plenipotentiary, for the purpose of negotiating a Canal treaty with us, which he did. The people of Panama were so pleased with what he had done they erected a statue in his honor.

We were also told the other night that "the people of Panama have never been satisfied with the treaty." Yet, the first President of Panama, at his inauguration, said he was about to preside over a great economic boom and "the end of centuries of plague." The Panamanian legislature immediately and unanimously ratified the treaty. It took our own Senate three months and the vote was not unanimous. To top it off, every town council in the new Republic of Panama voted its endorsement of the treaty. You might say the Republic of Panama and the Canal are Siamese twins—one couldn't have been born without the other. The Canal is so vital to Panama's economy that the Panamanians have the highest per capita income in Central America and the fourth highest in all Latin America.

Our relationship with Panama has been an evolutionary one. Accommodations have been made to fit changing times. We entered into additional treaties in 1936 and again in 1955. And, each time the accommodations benefited Panama.

Negotiations for another treaty began under the late President Johnson, but in very recent years the nature of the talks shifted toward a treaty that would take us from our steady, evolutionary course to the uncertainty of radical change in our relationship. The treaties that the Carter administration announced last August are the result of that sharp change of direction in our negotiating approach.

The new treaties would, in a single stroke, eliminate the foundation on which our right—and our ability—to permanently use the Canal has been based for more than six decades. Until recently, the United States government had always taken the position that we could discuss and negotiate virtually any matter that would enhance our relationship with Panama, except the rights of sovereignty we hold in the Canal Zone. That was not negotiable.

The negotiations leading to the treaties now under discussion were carried out by two Democratic and two Republican administrations. This is an American, not a partisan, issue.

Let's take a look at what these treaties would do.

As you know, there are two of them. The first one is called the "Panama Canal Treaty"; the second is titled "Treaty Concerning the Permanent Neutrality and Operation of the Panama Canal".

If the first treaty is ratified, the existing 1903 treaty will be cancelled entirely. Unlike the 1936 and 1955 treaties, these new ones do not simply adjust or amplify the basic treaty. They eliminate it and *it* is the one that gives us the right we now have to permanently operate and use the Panama Canal.

Once ratified, the first new treaty goes into effect six months later, at which time the Canal Zone ceases to exist.

While we would be granted the right to manage, operate and maintain the Canal till the end of 1999, the rights of sovereignty we presently have would be eliminated.

There has been a lot of confusion over this matter of "rights of sovereignty" and the fireside chat the other night didn't reduce that confusion. In trying to answer the question, "Why are we giving away the Canal Zone?", President Carter said, "We do not own the Panama Canal Zone. We have never had sovereignty over it. We have only had the right to use it." That is not quite accurate.

What we have (and this is very important to use) are the *rights* of sovereignty. That 1903 treaty is very explicit (as the new treaties are not). Listen to this: "The Repub-

lic of Panama grants to the United States all the rights, power and authority within the zone . . . which the United States would possess and exercise if it were the sovereign of the territory . . . to the entire exclusion of the exercise by the Republic of Panama of any such sovereign rights, power and authority." Now, that isn't hard to understand, is it?

The Canal Zone is unique. We did not acquire it under precisely the same circumstances as we did the Louisiana Purchase or Alaska, but there can be no doubt our government intended to acquire a firm, unshakable legal basis for building, operating and defending the Canal.

The Canal Zone is not a "last vestige of colonialism". It has never been a colony. We didn't acquire it for the purpose of exploiting mineral wealth or harvesting crops or engaging in trade. It has been a single-purpose enterprise.

Only one nation can exercise sovereignty over a given piece of territory at a given time. Historically, there have only been a few special exceptions to that rule. In this case, the 1903 treaty makes it clear that the United States and not the Republic of Panama exercises sovereignty in the Canal Zone. The President, however, said on television that we are only paying rent for the Canal Zone. Read the 1903 treaty a thousand times and you'll never once see the words "rent" or "lease". We paid Panama $10 million outright and annual payments beginning nine years later and, according to the treaty, that was "The price for the rights, powers, and privileges granted in this convention."

We did more. We went into the Zone and bought, in fee simple, every privately owned piece of property, including homesteads and squatter's rights. We not only have the rights of sovereignty, we are the owners of the real estate.

The President told us that our Supreme Court has "repeatedly acknowledged" that Panama has sovereignty over the Canal Zone. Not so. The United States Supreme Court in 1907 (in the Wilson versus Shaw case) said, "It is hypercritical to contend that the title of the United States is imperfect and that the territory described does not belong to this nation." In 1971, the U.S. Court of Appeals ruled, "The Canal Zone is an unincorporated territory of the United States".

Why are the rights of sovereignty so important? Well, for one thing, they make it impossible for a government of Panama to expropriate the Canal. And, they give us the unquestioned right to operate, maintain and defend it. We can be proud of the way we have used that right. For 64 years, we have run the Canal at no profit and kept it open to all peaceful shipping of the world.

Through four wars it has been an important link in our Hemispheric defense. We have established bases in the Zone where our own forces receive training and where we have given training to the soldiers of our allies in the Hemisphere. As a matter of fact, that's where General Torrijos received his training.

Through four wars there has been no sabotage and we have successfully kept the ships of our enemies away from the Canal. Yet, the new treaties would give enemy ships the same right of access to the Canal that we have.

We've been warned there will be trouble if we do not ratify these treaties. Indeed, these treaties were negotiated under threat of bloodshed and rioting. Just recently, Col. Noriega, representing Torrijos, told Senator Baker and Garn during their recent visit to Panama that he "knows the weak spots in the Canal and our military does not."

Before we get frightened into ratifying these treaties, let us remember, there are no guerilla bands roaming the jungles of Panama. It is General Torrijos' National Guard which has the guns in Panama. And, as the President himself pointed out, the Canal's continued operation is vital to the economy of Panama. They aren't about to blow it up. Nor can a lone terrorist with a stick of dynamite under his coat sabotage the Canal. Experts on Canal operations say it would take a trained demolition squad, with access (which is not now possible) and an extended period of time to do any real damage.

George F. Kennan, the eminent scholar and former diplomat has said, ". . . one can only quail at the prospect of attempting to operate and protect the Canal in some sort of 'partnership' with the Panamanians. An arrangement of this nature would weaken the American position without giving permanent and complete satisfaction to the Panamanians. It would be replete with possibilities for disagreement and minor conflict."

We're not talking about a partnership in a mountain cabin. We are talking about our national security, and where that is concerned we must always be skeptical and on guard against the worst that might happen. In his book "The Treaty Trap," Laurence Beilenson documents that treaties down through history have been broken more often than not.

The so-called "partnership" of which President Carter speaks and of which Ambassador Kennan is worried, is almost certain to build up pressures in Panama. We had a portent of these just a few days after the new treaties were announced last August. The government-sponsored Panamanian Student Federation said it would support the treaties, but its secretary general declared, ". . . this struggle will be continuous and prolonged until the last invading soldier leaves." Those "invading soldiers" are, of course American G.I.'s.

Panama, a nation with a history of unpredictable politics, could find the pressures building to the point where its ruling regime might one day respond by declaring the new treaties obsolete; declare the Canal a national asset and tell us, "Yanquis, go home." Short of that, there could be disruptions of support services such as police, fire protection, traffic management and garbage collection—all of which we provide now but which we will be getting from Panama if the treaties are ratified (and for which we will pay $10 million a year). Or, there might be a quiet request for us to withdraw most of our troops so that they are not a provocative symbol to potential rioters.

Of course we do not know whether these or similar "cenarios" will come to pass if the new treaties are ratified. But we do know they can't come to pass under the 1903 treaty. If the Senate ratifies the new Panama Canal treaty, we'll be exchanging a sure thing for a mere hope that all will go well.

If, one day, we were told to get out, we would of course consider that a breaking of the treaty. But, with recent events in mind, would we risk a confrontation or would we comply? Or, suppose, at some point we declared that the Canal's neutrality had been violated, but Panama said it hadn't? If we sent our armed forces in would we be violating that part of the treaty which says we can't intervene in Panama's internal affairs? If what is now the Canal Zone becomes part of the Republic of Panama who can whatever happens there be anything but part of the internal affairs of that country?

The President told us, "We can take whatever military action is necessary to make sure that the Canal always remains open and safe." Doesn't this bring up the possibility that one day after the Canal Zone has been eliminated by the new treaty, an American President might be faced with having to order airborne and amphibious action there? And, what of the U.N. Charter which prohibits member nations from using force except in self-defense? We sternly reminded Britain, France and Israel of that in 1956 when Egypt's Nassar seized the Suez Canal.

The so-called Neutrality Treaty is so ambiguous in its wording that while the administration in Washington was telling us that it gave our naval ships the right "to go to the head of the line" in case of emergency, Panamanian officials repeatedly denied this to their own people. For example, Romulo Escobar Bethancourt, Panama's chief treaty negotiator and Torrijos' chief adviser, said in Panama, "If . . . the gringos with their warships say, 'I want to go through first then that is their problem with the other ships waiting there."

President Carter pointed to the treaty phrase "expeditious passage". Escobar, on the other hand, has said he had given us the word "expeditious" after refusing the term "privileged". He said "expeditious" was meaningless and intended only to help the U.S. negotiators sell the treaties to the Pentagon.

This caused quite a flap, as you'll recall. The President and General Torrijos met in Washington and gave out a joint statement supposedly confirming our right of priority passage and our unilateral right to defend the Canal after the turn of the century. The other night in his talk, President Carter tried to give the impression that this statement somehow has the same force as a treaty. It does not. It is not legally binding. It is simply the announced opinion of two heads of state and it was signed by no one.

General Torrijos, when he got home to Panama, even boasted that he had signed nothing, as if to say it was all a public relations exercise to help the White House sell the treaties to the American public.

Many Senators are deeply concerned about this problem and the Senate Foreign Relations committee voted to recommend a new article in the Neutrality treaty to take care of it. That was on a Friday, not quite two weeks ago. The following Monday, the State department sent a spokesman to the committee asking that the changes be made in existing paragraphs of the treaty rather than by adding a new one. It turns out that the Panamanians had burned up the telephone wires over that weekend, urging the change.

It doesn't sound all that important. Why were they so concerned? Well, on closer examination, it reveals a deep difference in interpretation between ourselves and Panamanians. It shows also why we can't afford to take anything for granted where treaties are concerned. Our Senate has been talking consistently about "amendments" to the treaties. But, the Spanish word for "amendment"—"enmienda"—has a different meaning.

Professor Cesar Quintero (Say-zar keentare-o), the dean of law and political science at the National University of Panama put it this way in a television interview on January 20: "The word 'amendment' in English is a substantive reform. In spanish, we speak of 'correcting' something (en-men-dar la plana). The word 'amendment' does not have the same strength in Spanish as it does in English."

So, in Panamanian eyes, adding the changes to existing paragraphs amounts to a minor change, but adding a new paragraph or article would be a major change. This would mean the treaties would have to be submitted to Panamanian people for another plebiscite. And that, Torrijos doesn't want to do.

If there can be such misunderstanding in one area, what lies ahead in this uncharted course President Carter has told us we must take in our relationship with Panama? And, speaking of that relationship, let us be reminded of a few things.

In the process of building what has been called the Eighth Wonder of the World, we wiped out diseases that had plagued Pan-

ama and had killed more than 20,000 workers when the French attempted to build a Canal. We gave Panama a lower death rate than we had in the United States. We built sanitation, power and water systems for Panama. We built schools, hospitals, bridges and highways.

The value of what we are proposing to give away is estimated to be as high as $6–10 billion, depending on whose estimate you choose. We are debating over treaties by which we not only will give the Canal away, we'll also pay a considerable amount to the government of Panama for taking it off our hands! We also promise to turn it over debt-free to Panama, after operating it for them for the next 22 years, during which time we will pay all operating and maintenance costs.

In addition to some hundreds of millions of dollars in loans and aid, we would pay the $10 million a year I mentioned for municipal-type services; another $10 million from Canal operations each year; plus 30 cents a ton on cargo going through the Canal. Estimates on the total range up to $70—even $80—billion a year. And, to top it off, under the new treaties we would give up the right to build another canal elsewhere without Panama's permission.

The President says we aren't paying Panama, that the payments would come from tolls paid by ships using the Canal and not from tax dollars. But, the law says the Canal must be self-supporting, so an increase in tolls is amost a certainty.

Industry Week magazine says that it is estimated tolls must rise between 25 and 46 per cent above the current level of $1.29 per ton. Note that that current rate already reflects sharp toll increases that went into effect in 1974 and 1976. The publication quotes a consultant to the Panama Canal company as saying that the payment provisions of the treaty give him "little optimism" that the Canal "will be financial viable."

Shippers who use the Canal are worried, too. The Gulf Ports association, representing 23 U.S. ports through which move nearly 40 percent of our waterborne commerce, warns that such toll increases may price some American exports—"notably grain and machinery to eastern and Pacific markets"—out of world competition. I'm sure I don't need to remind you what that would mean to American jobs.

If Canal tolls can't be increased because of worries over driving business away, or if they are increased and result in that, who will pay Panama its share of the revenues as promised in the treaties? And, what about the $43 million the Army says it will cost to rearrange our military bases if the treaties go into effect? Then there is some $16 million in interest paid to the U.S. Treasury annually because we've never recovered the original cost of building the Canal. Won't the American taxpayer have to come up with all of that?

Since General Torrijos came to power, Panama's national debt has climbed steeply, the country's economy is in serious difficulty and Panama is having trouble meeting its loan obligations to banks in New York and elsewhere. Perhaps this explains why our negotiators felt they had to pay Panama to take the Canal.

We are talking here about a huge and complex public enterprise; one that is difficult to operate and maintain. Yet, we have done so efficiently for more than 60 years. But, the government of Panama, operating much smaller utilities (some of them expropriated) does not have an encouraging record of public management. It is not a matter of skill, it is a matter of effective, honest management.

The President made one other point in his talk which deserves comment, namely, that these treaties giving up the Canal "have overwhelming support throughout Latin America." The fact is, only a few states neighboring Panama have ever actively supported treaties which would have us turn over the Canal to the government of Panama. Many others have repeatedly expressed in private their concern.

Now, we have very convincing evidence of that concern. Last week, Lt. General Gordon Sumner, Jr., chairman of the 19-nation Inter-American Defense board, the only group specifically charged with defense of the Western Hemisphere, testified before the Senate Armed Services committee. He told the Senators he had talked with high level officials of all the 18 Latin American nations in the organization. He said "All express a very grave concern about the treaties. They see the possibility there for conflict. They also see the possibility for mischief-making by the Communists. And . . . there is not one of these countries that does not have some type of Communist subversions or terrorism going on . . . (And) They are very concerned about the economics of the Canal. It is my impression that some of them were in favor until they got a copy of the treaties and looked at the economic prospects. When they look at what this is going to cost them, they have very serious reservations. Almost without exception they have expressed their opinion that the way the United States (has) . . . operated the Canal . . . has been fair . . . Because they are faced now with an unknown situation they are concerned that the Torrijos government will be unable or unwilling to keep the Canal in operation."

The General then asked for permission to retire from active duty.

The President made much of the support for the treaties by the Joint Chiefs of Staff. Well, our military is under civilian control. The President is Commander-in-Chief. The military must accept his policy decisions or resign. It is significant that more than 300 former top-ranking generals and admirals, now retired and free to speak their minds, are strongly opposed to ratification of the treaties, while only three are in favor.

Many distinguished veterans of the military and the diplomatic service have expressed their concern that our friends and allies worldwide would see our giving up the Canal as another indication of American weakness; a retreat from the free world leadership which is our responsibility. Can we afford this in today's world?

In making a case against ratification of these treaties as they have been proposed, I want to make one thing clear before my time is up. I believe these treaties contain fatal flaws—especially the Panama Canal treaty which would eliminate our basic right to operate, maintain and defend the Canal. Ratification of the proposed treaties would not be in our national interest. But, I also believe we should continue to seek ways to eliminate friction with the people of Panama and to strengthen the bond between our two countries.

Great nations which believe in progressive and friendly relations with their neighbors do not ignore those neighbors and we must not ignore our friends, the people of Panama and their aspirations.

We must recognize that, just as a spirit of evolution and progress dominated our approach to our treaty relationship with Panama for many years, so it must again. We must seek alternatives to these treaties; but alternatives that will also preserve our basic right to use the Canal permanently.

There are some features of the proposed Panama Canal treaty which have merit. It would permit us to embark on the Third Lock modernization program. This would take about 10 years and one to two billion dollars to complete. Its construction could directly benefit the people and economy of Panama and, once completed, the Canal would be able to handle all but a few of the world's largest ships.

The first new treaty also introduces the idea of a governing board which would have Panamanian as well as United States representatives. I hope the Senate will discuss this point in detail, for the idea of having representatives from both nations has merit. Why not go further and seriously consider having some seats (probably on a rotating basis) for the user nations, thus increasing participation by other Latin American nations?

We should consider further negotiations leading to adjustment of Canal Zone boundaries so that some areas no longer needed by us could be turned over to Panama for commercial development.

There is also the possibility of offering Panamanian citizens who break the law in the Canal Zone the option of being tried in their court system or ours.

We should discuss the possibility of building more vehicular bridges over the Canal to improve access to either side. Sovereignty easements on the bridges might even be part of that discussion.

Isn't it time for us to take a collective deep breath? To realize that our negotiators took a wrong turn some months ago, but that the mistakes can be corrected?

We do not have to plunge into a series of fresh mistakes; to replace a workable, sensible and time-tested system with a bundle of uncertainties.

Greatness may be measured in many ways. Carrying out our responsibilities as a nation is one of them. Being the middle point—the vital center—of the free world is not an easy responsibility. We have shown in recent years that we can get very weary of shouldering burdens. But, if not us, then who? The Panama Canal is vital to the free world and that world depends on us. It is part of our rendezvous with destiny. We must not shrink from it, for the ultimate price we pay may one day be our own freedom.

Thank you . . . and a good night.●

THE TRUTH SLOWLY COMES OUT CONCERNING THE REAL COSTS OF PANAMA CANAL TREATIES

(Mr. HANSEN asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. HANSEN. Mr. Speaker, once again the administration has been caught double dealing to the American people about the costs of the proposed Panama Canal treaties. President Carter promised in his campaign for the Presidency that "I'll never tell you a lie." This however has not been the case with the proposed Panama Canal treaties. The administration has finally admitted that the treaties would cost the American taxpayer an additional $600 million. However, their actions cannot help but make one wonder if there are any additional items which they are trying to keep quiet.

Mr. Jeremiah O'Leary wrote an article for the February 12, 1978, edition of the Washington Star which brought out the details of the administration's admission in this matter which I think every Congressman and Senator should be aware of. Mr. O'Leary's article follows:

[From the Washington Star, Feb. 12, 1978]

UNITED STATES ACKNOWLEDGES TAXPAYER COST: $600 MILLION TO TRANSFER CANAL

(By Jeremiah O'Leary)

The administration has acknowledged in a letter to all 100 members of the Senate that transfer of the Panama Canal to Pan-

ama could cost the U.S. Treasury nearly $600 million.

The letter was sent jointly to the Capitol late Friday by Secretary of State Cyrus R. Vance, Secretary of Defense Harold Brown and Secretary of the Army Clifford L. Alexander Jr.

It was in response to an outcry a week before by Senators who began pressing expert witnesses for the first time on the precise cost of the treaties now being debated in the Senate and a day-long, acrimonious meeting between Senate staffers and administration lobbyists Feb. 3.

The administration letter was in the form of questions and answers about the financial aspects of the treaties and used plain language to acknowledge that the U.S. Treasury and the taxpayers will be affected by additional costs. In short, the administration has abandoned some earlier and oversimplified statements of treaty proponents that the treaties will not cost U.S. taxpayers a dollar.

The administration letter got little attention because it was delivered to Capitol Hill late in the afternoon on "getaway" day, before the Senate embarked on the 10-day Lincoln recess. Many senators had already left town, but the administration letter was duly entered into the Congressional Record for Feb. 10.

The letter was promised to the Senate after the verbal fracas of the previous Friday, when more than half the Senate members sent representatives to demand straightforward answers to financial and cost questions.

The financial viability of the canal under Panamanian jurisdiction was raised by Canal Zone Gov. H. R. Parfitt and Comptroller General Elmer B. Staats the day before the staffers met with the lobbyists. Some veterans say this was probably the first time most senators became aware that the Panama Canal tolls were not going to take care of all the costs of the transition.

Vance, Brown and Alexander apparently attempted to soften the impact of costs in their letter by saying, "In the last analysis, U.S. security and commercial interests these new treaties were designed to serve cannot be measured in dollars. We feel the costs associated with U.S. operation of the canal between now and the year 2000 will be more than offset by the benefits derived during an orderly and efficient transition to Panamanian management and from the continued maintenance of U.S. troops and facilities in Panama for the next 22 years."

Actually, the administration has never claimed the transfer of the canal would be cost free but rather that studies were not complete. But there is little doubt that the Carter administration played down the cost factor while contending that all payments to Panama would come from canal tolls and revenues.

This created in the minds of many, including the senators who will vote on ratification of the treaties within the next five weeks, the impression that the canal would be handed over to Panama at no cost to Americans.

The letter sent to the senators this weekend now indicates that the costs to the U.S. will be at nearly $600 million over the life of the treaty.

The administration addressed itself to the funding problem with this question-and-answer sequence:

"Q. Will the treaties require any appropriated funds?

"A. Payments to Panama under the treaties will be made from canal revenues, not tax dollars. Moreover, all operating expenses of the new entity will be paid from canal revenues. Administration spokesmen have testified on several occasions before congressional committees that the transition from our present role to our proposed role under the new treaties would entail some costs in the U.S. budget. One major cost would be relocation of defense installations, estimated at $43 million for the first three years.

"Another would be an early retirement program for canal enterprise and certain other employes. The programs which have been discussed within the administration range in cost up to $150 million. There will be additional Department of Defense costs resulting from a merger of Canal Company and DOD activities and assumption of non-reimbursable costs for health, education and other support functions. The total appropriations impact over 21 years based on present information is unlikely to be much more than $350 million.

"Q. Are there any budgetary implications?

"A. Although not required by the treaty, the administration will recommend that the treaty cease collecting annual interest payments from the canal company which are currently averaging $18–$20 million (a year). It will be up to Congress to decide whether to accept the administration's recommendation. The administration's recommendation is based on the fact that we have always treated the canal as a public utility. . . ."

Over a 22-year span, the interest payments to the Treasury come to about $240 million: this sum would no longer accrue to the U.S. Treasury under the administration's proposal.

"Q. What is the value of property to be transferred to Panama under the terms of the treaties?

"A. ". . . Property which will be transferred to Panama during the life of the treaty had a net book value of $96 million in 1977. The monetary grand total of existing Canal Company and Canal Zone government property to be turned over to Panama is $194 million. Panama would also receive capital improvements to the canal and its facilities made during the treaty's lifetime which the Canal Company, based on planned capital improvements, currently estimates at $454 million."

"The administration pointed out that a separate economic and military cooperation package of $345 million over five years—all in repayable loans, credits and guarantees—is planned. It said only about $5 million in appropriated funds would be required to support the repayment guarantees for the military credit program as a reserve fund; none would be paid to Panama.

Meanwhile, an Associated Press survey of more than 50 of America's largest daily newspapers shows that an overwhelming majority favor Senate ratification.

Mr. Speaker, although President Carter has repeatedly insisted that the treaties would not cost the American taxpayers a single dollar, we now know that this is not true. Now the administration has reluctantly acknowledged in a letter to Members of the U.S. Senate that the treaties will require $633 million in appropriated funds and lost revenues to the U.S. Treasury. This letter was signed by Secretary of State Cyrus Vance, Secretary of Defense Harold Brown, and Secretary of the Army Clifford Alexander.

Unfortunately, Mr. Speaker, these direct taxpayer expenses under the proposed Panama Canal treaties do not include several additional costs. The Foundation for Law and Society has recently published a study which points out the true costs to the American taxpayer of the proposed treaties. This article is highly informative. I include it for the RECORD and seriously commend it to my colleagues and all interested Americans. The article follows:

[From the FLS Legal Review, Feb. 9, 1978]

PANAMA CANAL—WRITEOFF? RIPOFF?

The staggering burden on the American taxpayer of gratuitous payments to the Republic of Panama was revealed to the U.S. Senate for the first time in testimony by Canal Zone Governor, Major General H. R. Parfitt, and U.S. Comptroller General, Elmer Staats. Their comments before the Senate Armed Services Committee on Wednesday, February 1, 1978, stirred demands for Administration clarification of the U.S. obligation under the proposed Panama Canal Treaty.

Among the less known, until the Parfitt/Staats appearance, and still among the least understood provisions of the Treaty are those in Article III and Article XIII establishing "payments" to be made to Panama between the "entry into force" date of the Treaty and its expiration on December 31, 1999. The more than four billion dollars asked of American taxpayers raises three basic questions.

First, what is the total obligation of the "payments"?

Second, from what source are the "payments" to be made?

Third, why are the "payments" to be made?

This paper limits its focus to the heretofore obscured question of the tax impact on Americans of the proposed Treaty and suggests an alternative manner of disposing of the Canal without the tax burden.

HOW MUCH WILL WE PAY?

Article III. The Republic of Panama would be paid $10,000,000 annually for such services as police, fire and garbage collection. Every three years the figure would be reviewed to determine adjustments necessary "because of inflation and other relevant factors affecting the cost of such services." Upward adjustment would appear inevitable.

The Treaty would commit the Panama Canal Commission to make the "payments" instead of the U.S. but that may be a distinction without a difference. The PCC, despite its bilateral composition, would be under the terms of the Treaty, an agency of the U.S.

"The United States of America shall . . . carry out its responsibilities by means of a United States Government agency called the Panama Canal Commission. . . ." (Panama Canal Treaty, Article III.)

Without regard to canal tolls (earned income), the American taxpayer would underwrite the payout of $10,000,000 whether or not the services actually cost that much or whether or not the services were actually provided.[1]

Article XIII. The housekeeping fee (above) is just the beginning. In this article the American taxpayer is burdened with three more items.

(1) A fixed annuity of $10,000,000 to be paid out of Canal operating revenues. The payout "shall constitute a fixed expense" of the Panama Canal Commission, i.e., it is to be paid out of first dollars received.

(2) $0.30 per commercial net ton transiting the Panama Canal. This amount is to be adjusted to reflect changes in the wholesale price index at the end of the first five years and biennially thereafter during the life of the Treaty. The source of these payments is strangely different from the $10 million annuity. Although the payment is to be from "Canal operating revenues", the provisions do not say that it shall be paid by the PCC.

Apparently reference to the "tolls" was thought to be sufficient identification of the source. Now why are the payments to be made? The treaty states that the payments are as "a just and equitable return on the natural resources which (Panama) has dedicated to the efficient management, operation, maintenance, protection and defense of the Canal." As Panama pays nothing, under

Footnotes at end of article.

the terms of the Treaty, for management, operation, maintenance, protection and defense of the Canal, the 30 cents per ton appears to be U.S. tribute for its privilege of providing defense and other services. In recent years the Canal has operated at a deficit which has thus far been absorbed in its reserve capital fund; when that is exhausted, it will be up to Congress to pick up the tab with tax dollars, of course. At that time, these payments will become an additional burden on the American taxpayer.[2]

(3) An annual sum up to $10,000,000 to be paid out of canal operating revenues to the extent that such revenues exceed expenditures. These "payments" would accumulate and be payable from later revenues to the extent that they could not be paid annually. This clause, which could be called the "Never give a Sammie an even break" clause, could well become a source of later grief.

Both General Parfitt and Comptroller General Staats testified that without clarification this clause could permit Panama to claim that any portion not paid accumulates throughout the life of the Treaty constituting a lien on the Canal. Another provision requires the U.S. to turn over the Canal to Panama free of all liens and debts. If the deficit operations continue, the United States would owe Panama $230,000,000 in 1999. Failure to honor this debt would be a breach of the Treaty.

In this instance "clarification" is a euphemism for "repudiation" of the view already voiced among Panamanian officials that this payment which appears to be "contingent" upon an operating surplus is not contingent at all and would become a debt which the U.S. taxpayer would have ultimately to discharge. The Treaty is silent on the question of "why" this amount is to be paid.[3]

A summary of the annual "payments" to be made by the U.S. in exchange for our ceding the Canal to Panama is as follows:

(1) $10,000,000 per year for police, fire, garbage, et cetera (subject to upward adjustment);

(2) $10,000,000 per year annuity;

(3) $40,000,000 per year on tonnage (approximation) (subject to upward adjustment);

(4) $10,000,000 per year override on revenues.

A minimum of $70,000,000 (subject to upward adjustment) per year is the commitment of American wages for the right to give Panama our Canal. The Canal now operates at a deficit. Toll increases can cover only a marginal amount of such payments. It has been estimated that increases of 40% would be necessary to cover the current deficit (excluding the tribute obligated in the Treaty)[4] and a study is underway to determine if a 50% increase would approach the point of diminishing returns with respect to tonnage.[5] In other words, the tribute is unquestionably a burden on individual Americans. Should inflation, moreover, raise the cost of operating the Canal, U.S. taxpayers can expect an additional burden.

An implicit, but undiscussed, burden on the United States taxpayers is the cost of paying the Panamanian members of the Panama Canal Commission who would be employees of the United States, and the costs of the bureaucracy to be established under the Commission: the Coordinating Committee, the Ports and Railroad Committee and the Joint Commission on the Environment.

In view of the State Department's position that the Treaty is self-executing, it is plain why it negotiated reference to the "payments" deriving from "tolls" under the control of the Panama Canal Commission. There would be no need for the House of Representatives to appropriate money to pay the committed amounts; so it would seem. Instead, the obvious source of the payments would be toll revenues, and Congress would be approached only if it became necessary to make up operating deficits (including the tribute).

Governor Parfitt made the point that should the Canal cease operating for any reason, the payments of tribute would still be due and payable. If operating revenues should cease, then Congress would have to be approached to make up the deficit. At that point, the assertion of "self-execution" may return, at least in the House, to haunt its proponents.

UNSEEN COSTS OF THE TREATY

Although many witnesses, before the Senate, made the point that only 7 percent of the shipping through the Canal is in American ships (made perhaps to diminish the importance of the Canal), the more important, and forceful, statistic is that about 70 percent of the cargo transiting the Canal originates or terminates in American ports.[6] As already pointed out, even with toll increases the American taxpayer will inevitably pay the cost of the "payments" to Panama and he will receive nothing in return.

If the $10,000,000 override "payment" is truly contingent on operating surplus, then the pressure is on the new owners of the Canal to push for an upward spiral of tolls. Under that circumstance, U.S. taxpayers will pay another real, but unseen, price for giving up the Canal. Toll increases will translate into increased costs for every commodity which transit the Canal from a few pennies for wheat, and therefore bread, to several dollars for oil, steel and wood. Parfitt said that increased traffic in Alaskan oil will sufficiently increase volume to keep down short term toll increases. The wary Northeast oil consumer might well wonder how much of a toll increase will be required to make Oriental markets too attractive to ignore for the Alaska oil consortium.

General price increases caused by escalating tolls could be more costly to Americans than the tax consequences of the tribute itself. There could also be an adverse impact on American jobs dependent upon exports due to increased tolls. Finally, upward toll pressures do not bode well for the year 2000 and thereafter when not even Congress can balance the distortion of converting our Canal into a money machine for one despot at the expense of the entire Western Hemisphere.

Of course, there is another view of Panama's self interest up to the turn of the Century. If the $10,000,000 override is not contingent and is cumulative, and in view if the 30 cents per ton transit fee payable to Panama, then the new owners will find it advantageous to reduce tolls to increase tonnage and let Uncle Sam worry about the override. The reader will recall that all the other "payments" are direct costs and not contingent upon an operating surplus. In other words, however Panama views the economics of toll rates, the American consumer/taxpayer will pay the freight.

Tolls will be set by the Panama Canal Commission on which the U.S. would have a majority of one. Under such circumstance, the importance of Senate advice and consent to the nominations to the PCC should be viewed as crucial. There is strong evidence to suggest that DOT and State intend to annex the status quo (no confirmation of Panama Canal Company directors) on the new Commission.

The terms of the Treaty as they relate to these "payments" must be viewed as significant in determining how the new owners will manage the Canal. Without the taint of jingoism, it may fairly be said that the Canal has been operated for seventy years on a non-profit service to the world basis. The principal reason put forth for transferring the Canal is third world opinion, principally in Central and South America. How will those nations view us when money hunger in Panama finally (perhaps only after the year 2000) translates into disrupted economies in those poor third world countries? Will Panama run the Canal at a deficit? The question answers itself.

It is beyond the purview of this paper to examine the related, and more crucial, question of whether the Canal in the hands of interests less altruistic than those of the United States might not become a potent political weapon to achieve revolutionary goals precisely through such economic disruption.

TAXPAYER RELIEF: AN ALTERNATIVE PROPOSAL

Given the immense cost to the American taxpayer, a serious question arises over the purpose of the proposed Treaty. Assuming the validity of all the arguments for giving the Canal to Panama, what is the purpose of the ornate financial arrangements to pay Panama two, or more, billion dollars? From the view of costs to the United States, it would appear simpler and considerably less expensive to cede the Canal directly to Panama by legislative act reserving our right to defend the Canal to assure its availability to all nations.

The same act could reserve a six-month turn over period to allow for the withdrawal of American presence. Thereafter, Panama would run the Canal directly without all the cumbersome commissions, committees and complex bureaucracy. Such direct cession would lift the burden of extended and expensive payments from the shoulders of American taxpayers. It would, moreover, demonstrate to the third world that America is altogether trusting of their intentions and competence.

Such a cession would also free the United States to negotiate elsewhere for rights to build a sea level canal without the limitation of Article XII forbidding such negotiation without the consent of Panama.

This approach would preserve the Constitutional prerogative of the House of Representatives under Article IV, Clause 3, Section 2 of the Conntitution. It would reduce the necessary vote, in the Senate, to a mere majority, and would achieve everything proponents of the Treaty have publicly deemed essential without the concomitant burden on the American taxpayers. The tax saving might then be used to underwrite the cost of a sea level canal.

The Neutrality Treaty could be allowed to take effect on its own terms without reference to the "Panama Canal Treaty" and with due regard of the right of the United States to defend the Canal, not in the year 2000, but immediately upon legislative action to transfer the Canal to Panama. For those who view the transfer as necessary, this approach provides simplicity and economy without additional hazard with respect to defense.

FOOTNOTES

[1] Major General H. R. Parfitt, background material prepared for testimony before the Committee on Merchant Marine and Fisheries, U.S. House of Representatives. The Governor has taken the position that if the Commission revenues are insufficient to meet these payments, as well as other obligations, the only practical alternative would be to borrow from the U.S. Treasury or seek appropriated funds from Congress.

[2] loc cit

Parfitt has stated that to insure the financial viability of the Commission during periods of decreased traffic, the Commission should be able to borrow on the faith and credit of the U.S. and should have authority to directly seek Congressional appropriations.

[3] loc cit.

Again, the Governor has made it clear that an argument could be made to the effect that Panama would be due a settlement in 1999 based on the cumulative "payments" of $10

million due each year "if earned." In view of the other terms of the Treaty, one need not be clairvoyant to see the kind of settlement which the State Department would negotiate on such a claim. We would simply pay it.

The Foundation of Law and Society was organized on March 18, 1976 in the District of Columbia as a not-for-profit corporation for the purpose of litigating in the public interest and performing research and educational functions in connection therewith. It was recognized tax-exempt under section 501 (c)(3) of the Internal Revenue Code by letter dated May 3, 1976 from the District Director, Baltimore. Contributions are tax deductible.

PROJECTED COSTS TO AMERICAN TAXPAYERS IN GIVING CANAL TO PANAMA

30 cents per ton/$40 million 1st thru 5th years, equals $200,000,000.

(11 percent/yr. or 55 percent increase) 6th thru 7th years, equals $124,000,000.

(11 percent/yr. or 22 percent increase) 8th thru 9th years, equals $151,280,000.

(11 percent/yr. or 22 percent increase) 10th and 11th years, equals $184,570,000.

(11 percent/yr. or 22 percent increase) 12th thru 13 years, equals $225,175,400.

(11 percent/yr. or 22 percent incerase) 14th and 15th years, equals $274,713,988.

(11 percent/yr. or 22 percent increase) 16th and 17th years, equals $335,151,083.

(11 percent/yr. or 22 percent increase) 18th and 19th years, equals $408,884,318.

Tonnage, total "payments" during 19 years, $1,903,774,789.

NOTE: 11 percent represents the 1973–76 average "Wholesale Price Index for Industrial Goods" which is considered the most volatile of all indices.

Services "payment" 1st thru 5th years, equals $30,000,000.

(3 percent/yr. or 9 percent increase) 4th thru 6th years, equals $32,700,000.

(3 percent/yr. or 9 percent increase) 7th thru 9th years, equals $33,681,000.

(3 percent/yr. or 9 percent increase) 10th thru 12th years, equals $36,821,290.

(3 percent/yr. or 9 percent increase) 13th thru 15th years, equals $40,225,198.

(3 percent/yr. or 9 percent increase) 16th thru 18th years, equals $43,845,457.

(3 percent/yr. or 9 percent increase) 19th year, equals $15,053,605.

Services, total "payment" during 19 years, $232,326,550.

NOTE: 11 percent represents the 1973–76 annual inflation rate.

Annuity/$10 million for each of 19 years, equals $190,000,000

Toll override/$10 million for each of 19 years, equals $190,000,000.

Total direct "payments" during 19 years, $2,516,101,339.

NOTE.—Were the upper limit toll base of $50 million used to calculate the "tonnage" payments, $1,020,498,149 would be added, or the Total Direct Payments would become $3,536,599,488.

OTHER COSTS KNOWN WITH SOME PRECISION

Replacement cost of the Canal itself: equals $3,000,000,000.

Loss of interest paid by Panama Canal Co. to U.S.A., $18 million x 19 year: equals $342,000,000.

Transfer of CZ improvements without compensation: equals $200,000,000.

Waiver of principal cost of investment: equals $368,000,000.

Current cost of pending capital improvements: equals $128,000,000.

Total additional treaty costs (losses) to U.S.A. $4,038,000,000.

AS YET UNKNOWN COSTS

Termination of employment of U.S. nationals displaced by Treaties. Overhead of new Commission, committees, et cetera, to December 31, 1999.

COSTS RELATED BUT OUTSIDE TREATY

Side agreements for loans and other economic assistance, $500,000,000.

Total cost of arrangements with Panama during 19 years, $8,074,599,488.

One item has been omitted intentionally because it is both contingent and uncertain. Should the Canal be closed to the United States, for any reason, it would require the U.S. to continue a two ocean navy. The cost might be estimated by calculating the gross expense of a second ocean navy (e.g. $50 billion) and dividing by the probability of a hostile, or other, closing (perhaps 15 percent). The result cost estimate would be $750,000,000. This must be seen as an additional cost of transferring control of the Panama Canal. While such an item does not squarely fit into the outline of this paper, the mere existence of such a possibility is not comforting.

This is a far cry from not costing "a single dollar," as the President has persistently maintained.

The truth is that the proposed Panama Canal treaties, aside from threatening our Nation's strategic well-being, will hit our taxpayers right in the pocketbook.

It is a shame that the administration was not honest about this economic impact of the proposed treaties from the very beginning.

The administration's deception and mis-statement in its propaganda campaign to win approval of these questionable treaties has been a black mark against our Government's credibility and the public's belief in the integrity of our national leaders.

We can only alleviate this serious problem by making the truth known to the American people and face up to the economic realities of the proposed Panama Canal treaties—not sweep them under the rug as the President and other treaty proponents have tried to do.●

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows to:

Mr. AKAKA (at the request of Mr. WRIGHT), for 2 p.m. today, on account of a death in the family.

Mr. MADIGAN (at the request of Mr. RHODES), after 5 p.m. today through March 22, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. EVANS of Delaware) to revise and extend their remarks and include extraneous matter:)

Mr. CONTE, for 5 minutes, today.
Mr. WHALEN, for 5 minutes, today.
Mr. KEMP, for 5 minutes, today.
Mr. HAGEDORN, for 5 minutes, today.
Mr. MILLER of Ohio, for 5 minutes, today.
Mr. HANSEN, for 20 minutes, today.

(The following Members (at the request of Mr. WEISS), to revise and extend their remarks, and to include extraneous matter to:)

Mr. FASCELL, for 10 minutes, today.
Mr. SOLARZ, for 5 minutes, today.
Ms. HOLTZMAN, for 5 minutes, today.
Mr. ANNUNZIO, for 5 minutes, today.
Mr. GONZALEZ, for 5 minutes, today.
Mr. RODINO, for 5 minutes, today.
Mr. WEISS, for 10 minutes, today.
Mr. LAFALCE, for 5 minutes, today.
Mrs. MEYNER, for 5 minutes, today.
Mr. ROSENTHAL, for 5 minutes, today.
Mr. BURKE of Massachusetts, for 5 minutes, today.
Mr. BRODHEAD, for 10 minutes, today.
Mr. BRECKINRIDGE, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the Appendix of the RECORD, or to revise and extend remarks was granted to:

Mr. HANSEN, notwithstanding the fact that it exceeds two pages of the CONGRESSIONAL RECORD and is estimated by the Public Printer to cost $821.25.

Mr. HANSEN, notwithstanding the fact that it exceeds two pages of the CONGRESSIONAL RECORD and is estimated by the Public Printer to cost $903.38.

Mr. HANSEN, and to include extraneous matter notwithstanding the fact that it exceeds two pages of the CONGRESSIONAL RECORD and is estimated by the Public Printer to cost $1,807.

(The following Members (at the request of Mr. EVANS of Delaware) and to include extraneous matter:)

Mr. BEARD of Tennessee.
Mr. BOB WILSON.
Mr. HANSEN in three instances.
Mr. JOHNSON of Colorado.
Mr. LENT.
Mr. CUNNINGHAM.
Mr. COLLINS of Texas.
Mr. HYDE.
Mr. SARASIN in two instances.
Mr. CARTER.
Mr. DORNAN.
Mr. TRIBLE.
Mr. BROOMFIELD.
Mr. DERWINSKI.
Mr. GILMAN in two instances.
Mr. KASTEN.
Mr. CONTE.

(The following Members (at the request of Mr. WEISS) and to include extraneous matter:)

Mr. ROGERS in five instances.
Mr. OBERSTAR.
Mr. FARY.
Mr. CONYERS.
Mr. ANDERSON of California in three instances.
Mr. GONZALEZ in three instances.
Mr. MCDONALD in five instances.
Mr. LUKEN.
Mr. FOWLER.
Mr. DENT.

Mr. RISENHOOVER.
Mr. CARR.
Mr. UDALL in two instances.
Mr. LEHMAN.
Mr. SIMON.
Mr. FITHIAN.
Mr. STARK.
Mr. RODINO.
Mr. EDGAR in three instances.
Mr. MAGUIRE.
Mr. STUDDS.
Mr. RANGEL in two instances.
Mr. OTTINGER.
Ms. OAKAR.
Mr. BRODHEAD in 10 instances.
Ms. HOLTZMAN.
Mr. MOORHEAD of Pennsylvania.
Mr. RICHMOND.
Mr. JENKINS.
Mr. BURKE of Massachusetts.

ENROLLED BILLS AND JOINT RESOLUTION SIGNED

Mr. THOMPSON, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills and a joint resolution of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 1432. An act for the relief of Mrs. Desolina Sciulli;

H.R. 1939. An act for the relief of Meda Abilay Florin;

H.R. 2761. An act for the relief of Su-Hwan Choe;

H.R. 3081. An act for the relief of Mrs. Chong Sun Yi Rauch;

H.R. 4401. An act for the relief of Kwi Sok Buckingham (nee Kim);

H.R. 6975. An act to amend title 5, United States Code, to provide the hearing examiners shall be known as administrative law judges, and to increase the number of such positions which the Civil Service Commission may establish and place at GS–16 of the General Schedule; and

H.J. Res. 715. Joint resolution proclaiming May 5, 1978, "Sun Day."

SENATE ENROLLED BILL SIGNED

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. 1671. An act to designate the Absaroka-Beartooth Wilderness, Custer and Gallatin National Forests, in the State of Montana.

BILLS AND A JOINT RESOLUTION PRESENTED TO THE PRESIDENT

Mr. THOMPSON, from the Committee on House Administration, reported that that committee did on this day present to the President, for his approval, bills and a joint resolution of the House of the following titles:

H.R. 1432. For the relief of Mrs. Desolina Sciulli;

H.R. 1939. For the relief of Meda Abilay Florin;

H.R. 2761. For the relief of Su-Hwan Choe;

H.R. 3081. For the relief of Mrs. Chong Sun Yi Rauch;

HR. 4401. For the relief of Kiw Sok Buckingham (nee Kim);

H.R. 6975. To amend title 5, United States Code, to provide that hearing examiners shall be known as administrative law judges, and to increase the number of such positions which the Civil Service Commission may establish and place at GS–16 of the General Schedule; and

H.J. Res. 715. Proclaiming May 5, 1978, "Sun Day."

ADJOURNMENT

Mr. WEISS. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 59 minutes p.m.), under its previous order, the House adjourned until Monday, March 20, 1978, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

3578. A letter from the Acting Director, Office of Management and Budget, Executive Office of the President, transmitting a report that the appropriation to the Department of Health, Education, and Welfare, Health Care Financing Administration, for "limitation on administrative expenses," for fiscal year 1978, has been reapportioned on a basis which indicates the necessity for a supplemental estimate of appropriation, pursuant to section 3679(e)(2) of the Revised Statutes, as amended; to the Committee on Appropriations.

3579. A letter from the Director, Defense Security Assistance Agency, transmitting a report on the impact on U.S. readiness of the Army's proposed sale of defense articles and services to NATO (transmittal No. 78–20), pursuant to section 813 of Public Law 94–106 (91 Stat. 337); to the Committee on Armed Services.

3580. A letter from the Director, Defense Security Assistance Agency, transmitting a report on the impact on U.S. readiness of the Army's proposed sale of defense articles to the Republic of Korea (transmittal No. 78–22), pursuant to section 813 of Public Law 94–106 (91 Stat. 337); to the Committee on Armed Services.

3581. A letter from the Administrator, Health Care Financing Administration, Department of Health, Education, and Welfare, transmitting notice of a proposed new records system, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

3582. A letter from the General Counsel, Foreign Claims Settlement Commission of the United States, transmitting a report on the Commission's implementation of the Government in the Sunshine Act during the year ended February 28, 1978, pursuant to 5 U.S.C. 552b(j); to the Committee on Government Operations.

3583. A letter from the Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting copies of international agreements, other than treaties, entered into by the United States, pursuant to 1 U.S.C. 112b; to the Committee on International Relations.

3584. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Army's intention to offer to sell certain defense equipment to the Republic of Korea (transmittal No. 78–19), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

3585. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Army's intention to offer to sell certain defense equipment and services to NATO (transmittal No. 78–20), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

3586. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Army's intention to offer to sell certain defense equipment to the Republic of Korea (transmittal No. 78–22), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

3587. A letter from the Director, Defense Security Assistance Agency, transmitting a report on the impact of U.S. foreign arms sales and transfer since 1972 on U.S. defense readiness and national security, pursuant to section 23 of Public Law 95–92; to the Committee on International Relations.

3588. A letter from the Administrator, Energy Information Administration, Department of Energy, transmitting a report covering the month of November 1977, on sales of refined petroleum products, pursuant to section 4(c)(2)(A) of the Emergency Petroleum Allocation Act of 1973; to the Committee on Interstate and Foreign Commerce.

3589. A letter from the Acting Administrator, U.S. Environmental Protection Agency, transmitting an interim report on actions taken by EPA and other Federal agencies to regulate sources of halocarbon emissions, pursuant to section 155 of the Clean Air Act, as amended (91 Stat. 729); to the Committee on Interstate and Foreign Commerce.

3590. A letter from the Chairman, Interstate Commerce Commission, transmitting the annual report on the effectiveness of the Rail Passenger Service Act of 1970, pursuant to section 308(c) of the Act (Public Law 91–518), as amended; to the Committee on Interstate and Foreign Commerce.

3591. A letter from the Acting Secretary of Commerce, transmitting a draft of proposed legislation to amend section 406 of the Fishery Conservation and Management Act of 1976 to extend the authorization for appropriations for fiscal years 1979 and 1980; to the Committee on Merchant Marine and Fisheries.

3592. A letter from the Comptroller General of the United States, transmitting a report on the status of the Army's advanced attack helicopter program (PSAD–78–17, March 16, 1978); jointly, to the Committees on Government Operations, and Armed Services.

3593. A letter from the Comptroller General of the United States, transmitting a report on the program of Federal assistance for the education of handicapped children in State operated and supported schools (HRD–78–6, March 16, 1978); jointly, to the Committees on Government Operations, and Education and Labor.

3594. A letter from the Comptroller General of the United States, transmitting a report on how the Department of Transportation can assist State and local governments in doing more effective transportation planning (CED–78–74, March 16, 1978); jointly, to the Committees on Government Operations, and Public Works and Transportation.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2, rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. ULLMAN: Committee on Ways and Means. H.R. 1337. A bill to amend the Internal Revenue Code of 1954 with respect to excise tax on certain trucks, buses, tractors, et cetera (Rept. No. 95–976). Referred to the Committee of the Whole House on the State of the Union.

Mr. TEAGUE: Committee on Science and Technology. H.R. 11232. A bill to authorize appropriations to carry out the Standard Reference Data Act (Rept. No. 95–977). Re-

ferred to the Committee of the Whole House on the State of the Union.

Mr. LEHMAN: Committee on Post Office and Civil Service. House Joint Resolution 730. Joint resolution to authorize the President to issue a proclamation designating the week beginning on April 16th through April 22, 1978, "National Oceans Week" (Rept. No. 95-978). Referred to the House Calendar.

Mrs. SCHROEDER: Committee on Post Office and Civil Service. H.R. 11003. A bill to clarify the authority for employment of personnel in the White House Office and the Executive Residence at the White House, to clarify the authority for employment of personnel by the President to meet unanticipated needs, and for other purposes; with amendment (Rept. No. 95-979). Referred to the Committee of the Whole House on the State of the Union.

Mr. PERKINS: Committee on Education and Labor. H.R. 2222. A bill to amend the National Labor Relations Act to clarify the scope of its coverage; with amendment (Rept. No. 95-980). Referred to the Committee of the Whole House on the State of the Union.

Mr. THOMPSON: Committee on House Administration. H.R. 11315. A bill to amend the Federal Election Campaign Act of 1971 to make certain changes in the reporting and disclosure requirements of such act, and for other purposes; with amendment (Rept. No. 95-982). Referred to the Committee of the Whole House on the State of the Union.

Mr. STAGGERS: Committee on Interstate and Foreign Commerce. House Concurrent Resolution 494. Concurrent resolution expressing the sense of Congress regarding the operation of certain rail passenger service by the National Railroad Passenger Corporation (Rept. No. 95-983). Referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. EILBERG: Committee on the Judiciary. H.R. 3996. A bill for the relief of Mrs. Young Hee Kim Kang, Hee Jae Kang, Hee Jin Kang, and Hee Soo Kang (Rept. No. 95-981). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ANDERSON of California (for himself, Mr. BURKE of Massachusetts, and Mr. RISENHOOVER):

H.R. 11592. A bill to amend title 38 of the United States Code in order to provide for the payment of service pensions to veterans of World War I and for certain surviving spouses and certain children; to the Committee on Veterans' Affairs.

By Mr. BROWN of Michigan:

H.R. 11593. A bill to defer from income certain amounts deferred pursuant to State or local public employee deferred compensation plans; to the Committee on Ways and Means.

By Mr. COHEN (for himself and Mr. PEPPER):

H.R. 11594. A bill to amend the Older Americans Act of 1965 to establish an advocate program for residents of long-term care facilities; to the Committee on Education and Labor.

By Mr. DRINAN (for himself, Mr. BALDUS, Mr. BROWN of Michigan, Mr. BONKER, Mr. CEDERBERG, Mr. CONTE, Mr. DUNCAN of Tennessee, Mr. EDWARDS of California, Mr. ERTEL, Mr. FRASER, Mr. KILDEE, Mr. LLOYD of California, Mr. MAZZOLI, Ms. MEYNER, Mr. MIKVA, Mr. NEAL, Mr. PANETTA, Mr. RANGEL, Mr. SANTINI, Mr. SIMON, and Mr. CHARLES H. WILSON of California):

H.R. 11595. A bill to provide additional assistance to small business concerns in acquiring procurement information and contracts from the United States; to the Committee on Small Business.

By Mrs. FENWICK (for herself, Mr. FREY, Mr. CORCORAN of Illinois, Mr. MAZZOLI, Mr. PATTERSON of California, Mr. TRIBLE, Mr. LUKEN, Mrs. MEYNER, Mrs. HECKLER, and Ms. HOLTZMAN:

H.R. 11596. A bill to amend the Internal Revenue Code of 1954 to allow certain married individuals who file separate returns to be taxed as unmarried individuals; to the Committee on Ways and Means.

By Mr. HAMMERSCHMIDT:

H.R. 11597. A bill to provide price and income protection for agricultural producers by assuring such producers a price for their agricultural commodities of not less than the cost of producing such commodities; to assure consumers an adequate supply of food and fiber at reasonable prices; and for other purposes; jointly, to the Committees on Agriculture, and Ways and Means.

By Mr. HEFTEL (for himself and Mr. AKAKA):

H.R. 11598. A bill to authorize the Secretary of the Navy to convey to the State of Hawaii certain lands referred to as the Navy Drum Storage Area, for educational purposes; to the Committee on Armed Services.

By Mrs. HOLT:

H.R. 11599. A bill to designate certain lands in the State of Alaska as units of the National Park, National Wildlife Refuge, Wild and Scenic Rivers and National Wilderness Preservation System, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. HYDE (for himself, Mr. CAVANAUGH, Mrs. SMITH of Nebraska, Mr. TRAXLER, and Mr. WALSH):

H.R. 11600. A bill to provide procedures for calling constitutional conventions for proposing amendments to the Constitution of the United States, on application of the legislatures of two-thirds of the States, pursuant to article V of the Constitution; to the Committee on the Judiciary.

By Mr. KILDEE (for himself, Mr. SOLARZ, and Mr. BONIOR):

H.R. 11601. A bill to require free mass transportation service for physically or mentally handicapped individuals on mass transportation systems receiving Federal financial assistance, and for other purposes; to the Committee on Public Works and Transportation.

By Mr. KINDNESS (for himself, Mr. WHITEHURST, Mr. JONES of North Carolina, Mr. SPENCE, Mr. BURLESON of Texas, Mr. MONTGOMERY, Mr. WALKER, Mr. HANSEN, Mr. DORNAN, Mr. MILFORD, Mr. BADHAM, Mr. WINN, Mr. ROBINSON, Mr. ARCHER, Mr. LAGOMARSINO, Mr. STOCKMAN, Mr. BEARD of Tennessee, Mr. STANGELAND, and Mr. BURGENER):

H.R. 11602. A bill to amend section 6(d)(1) of the Food Stamp Act of 1977, and for other purposes; to the Committee on Agriculture.

By Mr. LAFALCE:

H.R. 11603. A bill to amend the National Housing Act for the purpose of providing mortgage insurance for buildings used by commercial establishments; to the Committee on Banking, Finance and Urban Affairs.

By Mr. MOTTL:

H.R. 11604. A bill to reduce the amount of paperwork required by Federal agencies and to increase congressional awareness of the increase in paperwork required by bills and joint resolutions under consideration by Congress; jointly, to the Committees on Government Operations, and Rules.

By Ms. OAKAR (for herself, Mr. Whitehurst, Mr. RISENHOOVER, Mr. RICHMOND, Mr. ADDABBO, Mrs. HECKLER, Mr. LENT, Mr. GRASSLEY, Mr. DRINAN, Mr. LEDERER, Mr. MITCHELL of Maryland, Mr. EMERY, Mr. SOLARZ, Mr. GUYER, Mr. MAZZOLI, Mrs. SPELLMAN, Mr. CORRADA, Mr. FORD of Michigan, Mr. HEFTEL, Mr. LUKEN, Mr. ROONEY, Mr. BIAGGI, and Mr. BEARD of Rhode Island):

H.R. 11605. A bill to amend the Older Americans Act of 1965 to provide that the Commissioner of the Administration on Aging may make grants to assist older persons adversely affected by natural disasters, and for other purposes; to the Committee on Education and Labor.

By Mr. PEASE (for himself, Mr. ASHLEY, Mr. YATRON, Mr. STRATTON, Mr. EILBERG, Mr. WHITEHURST, Mr. WINN, Mr. GEPHARDT, Mrs. SPELLMAN, and Mr. SIMON):

H.R. 11606. A bill to provide that daylight saving time shall be observed in any State for 60 days after the President declares an energy emergency to exist within that State, to permit the President to extend such period after reviewing reports submitted by the Secretary of Transportation, and to permit certain daytime broadcast stations to operate before local sunrise; to the Committee on Interstate and Foreign Commerce.

Mr. PRICE (for himself and Mr. BOB WILSON) (by request):

H.R. 11607. A bill to further the rationalization, standardization, interoperability, and effectiveness of the land, air, and naval forces of the North Atlantic Treaty Organization countries; to the Committee on Armed Services.

By Mr. REUSS:

H.R. 11608. A bill to authorize the Federal Home Loan Bank Board to allow Federal savings and loan associations to issue graduated payment and reverse annuity mortgage instruments; to the Committee on Banking, Finance and Urban Affairs.

By Mr. RODINO (for himself, Mr. THOMPSON, Mr. MINISH, Mr. PATTEN, Mr. HOWARD, Mr. ROE, Mr. FLORIO, Mr. HUGHES, Mr. MAGUIRE, Mrs. MEYNER, Mr. LE FANTE, Mr. FORSYTHE, Mr. RINALDO, Ms. FENWICK, and Mr. HOLLENBECK):

H.R. 11609. A bill to eliminate racketeering in the sale and distribution of cigarettes, and for other purposes; to the Committee on the Judiciary.

By Mr. ROE (for himself, Mr. JOHNSON of California, Mr. HAMMERSCHMIDT, Mr. ROBERTS, Mr. DON H. CLAUSEN, Mr. HOWARD, Mr. ANDERSON of California, Mr. MCCORMACK, Mr. BREAUX, Mr. GINN, Mr. MINETA, Mr. OBERSTAR, Mr. NOWAK, Mr. EDGAR, Mrs. LLOYD of Tennessee, Mr. FARY, Mr. RISENHOOVER, Mr. HEFNER, Mr. CORNWELL, Mr. YOUNG of Missouri, Mr. BONIOR, Mr. EVANS of Georgia, Mr. FLIPPO, Mr. RAHALL, and Mr. APPLEGATE):

H.R. 11610. A bill to increase the authorization for the Local Public Works Capital Development and Investment Act of 1976; to the Committee on Public Works and Transportation.

By Mr. ROGERS (for himself and Mr. CARTER):

H.R. 11611. A bill to revise and reform the Federal law applicable to drugs for human use and to establish a National Center for Clinical Pharmacology within the Department of Health, Education, and Welfare; to the Committee on Interstate and Foreign Commerce.

By Mr. ROONEY:

H.R. 11612. A bill to terminate the authorization for the Trexler Dam and Lake project as part of the Delaware River Basin project; to the Committee on Public Works and Transportation.

By Mr. TREEN (for himself and Mr. FRENZEL):

H.R. 11613. A bill to amend title XX of the Social Security Act to repeal the mandatory child day care requirements which are presently contained therein; to the Committee on Ways and Means.

By Mr. WHALEN (for himself and Mr. STEERS):

H.R. 11614. A bill to provide for advisory safety standards for public playground equipment, and to provide that such equipment located in federally assisted playground facilities shall comply with such standards; to the Committee on Interstate and Foreign Commerce.

By Mr. BINGHAM:

H.R. 11615. A bill to amend the Internal Revenue Code of 1954 to provide individuals a credit against income tax for amounts paid for tuition at certain elementary, secondary, and vocational schools; to the Committee on Ways and Means.

By Mr. BLOUIN:

H.R. 11616. A bill to amend the Older Americans Act of 1965 by inserting a new title X to establish a senior environmental corps; to the Committee on Education and Labor.

By Mrs. BOGGS (for herself, Mrs. COTTER, Mr. LEACH, and Mr. SCHEUER):

H.R. 11617. A bill to authorize the Secretary of Health, Education, and Welfare to establish a grant program designed to develop methods of prevention and treatment relating to domestic violence, and for other purposes; jointly, to the Committees on Education and Labor, Interstate and Foreign Commerce, and the Judiciary.

By Mr. CARTER:

H.R. 11618. A bill to amend the Internal Revenue Code of 1954 to clarify the exclusion from gross income of National Research Service Awards made under section 472 of the Public Health Service Act by providing that such awards shall be excludable from gross income to the same extent as other scholarships and fellowship grants; to the Committee on Ways and Means.

By Mr. CARTER (for himself and Mr. FINDLEY):

H.R. 11619. A bill to amend title VIII of the Public Health Service Act to extend for 2 fiscal years the program of assistance for nurse training; to the Committee on Interstate and Foreign Commerce.

By Mr. COLLINS of Texas (for himself, Mr. BADHAM, Mr. DAN DANIEL, Mr. DEVINE, Mr. DORNAN, Mr. GUYER, Mr. HALL, Mr. HANSEN, Mrs. HOLT, Mr. HYDE, Mr. KINDNESS, Mr. LAGOMARSINO, Mr. LENT, Mr. LOTT, Mr. MARRIOTT, Mr. MCDONALD, Mr. MURPHY of Pennsylvania, Mr. RUDD, Mr. SNYDER, Mr. SYMMS, and Mr. WHITEHURST):

H.R. 11620. A bill to prescribe the conditions with respect to affirmative action programs required of Federal grantees and contractors in complying with nondiscrimination programs, to prescribe the necessary requirements for a finding of discrimination in certain actions brought on the basis of discrimination in employment and to prescribe reasonable limits on the collection of data relating to race, color, religion, sex, or national origin, and for other purposes; jointly, to the Committees on the Judiciary and Education and Labor.

By Mr. DERRICK (for himself, Mr. WRIGHT, Mr. DOWNEY, Mr. MOFFETT, Mr. BAUCUS, Mr. SARASIN, Mr. EDWARDS, of Oklahoma, Mr. CRANE, and Mr. MCEWEN):

H.R. 11621. A bill to improve congressional oversight of Federal programs and activities by requiring greater specificity in setting program objectives, by requiring continuing information on the extent to which programs are achieving their stated objectives, by requiring periodic review of new authorizations of budget authority and tax expenditures, and for other purposes; to the Committee on Rules.

By Mr. DINGELL (for himself and Mr. MARKEY):

H.R. 11622. A bill to amend the Natural Gas Pipeline Safety Act of 1968 to provide for the safe operation of pipelines transporting natural gas, petroleum, petroleum products, and certain other materials, to provide standards with respect to the siting, construction, and operation of liquefied natural gas and liquid petroleum gas facilities, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. FLORIO:

H.R. 11623. A bill to amend the Communications Act of 1934 to establish certain requirements with respect to the broadcast of games of professional sports clubs; to the Committee on Interstate and Foreign Commerce.

By Mr. FRASER (for himself, Ms. KEYS, Mr. ALLEN, Mr. ANDREWS of North Carolina, Mr. BEARD of Rhode Island, Mr. D'AMOURS, Mr. DICKS, Mr. FASCELL, Mr. GRADISON, Mr. HANLEY, Mr. JONES of Tennessee, Mr. JONES of North Carolina, Mr. LE FANTE, Mr. LLOYD of California, Mr. MAGUIRE, Mr. MARKEY, Mr. MIKVA, Mr. MINETA, Mr. MINISH, Mr. MOFFETT, Mr. PATTEN, Mr. PATTERSON of California, Mr. ROSE, Mr. SARASIN, and Mr. SEBELIUS):

H.R. 11624. A bill to amend title XX of the Social Security Act to increase the entitlement ceiling; to the Committee on Ways and Means.

By Mr. FRASER (for himself, Ms. KEYS, Mr. SKUBITZ, Mrs. SPELLMAN, Mr. STOKES, Mr. THOMPSON, Mr. VANIK, Mr. WINN, Mr. WOLFF, and Mr. YOUNG of Missouri):

H.R. 11625. A bill to amend title XX of the Social Security Act to increase the entitlement ceiling; to the Committee on Ways and Means.

By Mr. HAGEDORN (for himself, Mr. MATHIS, Mr. WAMPLER, Mr. VOLKMER, Mr. ALEXANDER, Mr. BLOUIN, Mr. DICKINSON, Mr. DORNAN, Mr. DUNCAN of Tennessee, Mr. FRTEL, Mr. EVANS of Delaware, Mr. GRASSLEY, Mr. KELLY, Mr. MADIGAN, Mr. JOHN T. MYERS, Mr. RUDD, Mr. SEBELIUS, Mrs. SMITH of Nebraska, Mr. STEIGER, Mr. THONE, Mr. WHITLEY, and Mr. CHARLES WILSON of Texas):

H.R. 11626. A bill to limit the authority of the Secretary of Agriculture to restrict or prohibit the use of nitrites or nitrates as preservatives in meat products for a period of 2 years, and for other purposes; to the Committee on Agriculture.

By Mr. KINDNESS:

H.R. 11627. A bill to amend the Internal Revenue Code of 1954 to permit the deduction of certain expenses by members of State legislatures to the extent such expenses may be deducted by Members of Congress; to the Committee on Ways and Means.

By Mr. MAGUIRE (for himself, Mr. BEILENSON, Mrs. SCHROEDER, Mr. SEIBERLING, and Mr. SIMON):

H.R. 11628. A bill to facilitate the transition from energy technologies that use depletable energy sources to solar energy technologies; to the Committee on Science and Technology.

By Mr. OTTINGER (for himself, Mr. JEFFORDS, Mr. MAGUIRE, Mr. BLANCHARD, Mr. BAUCUS, Mr. WEAVER, Mr. CARR, Mr. MOSS, Mr. KASTEN, Mr. DRINAN, Mr. LLOYD of California, Mr. LEHMAN, Mr. PICKLE, Mr. MOAKLEY, Mr. BROWN of California, Mr. EDWARDS of California, Mr. NOLAN, Mr. RICHMOND, Mr. MCKINNEY, Mr. RYAN, Mr. HARRINGTON, Mr. WIRTH, Mr. VAN DEERLIN, Mr. UDALL, and Mr. LONG of Maryland):

H.R. 11629. A bill to facilitate the transition from energy techologies that use depletable energy sources to solar energy technologies; to the Committee on Science and Technology.

By Mr. ROSE:

H.R. 11630. A bill to establish an administrative procedure and guidelines to be followed by the Department of the Interior in its decision to acknowledge the existence of certain Indian tribes; to the Committee on Interior and Insular Affairs.

By Mr. RUNNELS (for himself and Mr. LUJAN):

H.R. 11631. A bill to amend Public Laws 90–266 and 93–134 to permit the Apache Tribe of the Mescalero Reservation and its constituent groups to use funds arising from certain judgments in favor of such tribe and such groups for any purpose authorized by such tribe and approved by the Secretary of the Interior; to the Committee on Interior and Insular Affairs.

By Mr. WAGGONNER (for himself, Mr. PICKLE, Mr. HOLLAND, Mr. FRENZEL, Mr. STEED, Mr. TRIBLE, Mr. WHITE, Mr. CHARLES WILSON of Texas, Mr. MCFALL, Mr. ROUSSELOT, Mr. MILLER of Ohio, and Mr. SIKES):

H.R. 11632. A bill to defer from income certain amounts deferred pursuant to State or local public employee deferred compensation plans; to the Committee on Ways and Means.

By Mr. CONYERS (for himself, Mr. HARRIS, and Mr. JACOBS):

H.R. 11633. A bill to translate into practical reality the right of all Americans who are able, willing, and seeking to work to full opportunity for useful paid employment at fair rates of compensation; to assert the responsibility of the Federal Government to use all practicable programs and policies to promote full employment, production, and real income, balanced growth, adequate productivity growth, proper attention to national priorities, and reasonable price stability; to require the President each year to set forth explicit short-term and medium-term economic goals; to achieve a better integration of general and structural economic policies; and to improve the coordination of economic policymaking within the Federal Government; to the Committee on Education and Labor.

By Mr. HANSEN:

H.R. 11634. A bill to provide the congressional authorization required by clause 2, section 3, article IV of the Constitution, for the transfer to Panama of the property of the United States in the Canal Zone; to authorize the appropriations required by clause 7, section 9, article I of the Constitution, to implement that transfer of U.S. property, including the transfer of military installations and of cemeteries in which U.S. veterans are interred, the closing of the Canal Zone courts, and the assumption by the U.S. Postal Service of the functions of the Canal Zone postal service; to otherwise provide legislatively the authorizations not provided pursuant to clause 2, section 2, article

2, of the Constitution which are necessary to implement the Panama Canal Treaty of 1977, and related agreements; and for other purposes; jointly, to the Committees on Merchant Marine and Fisheries, International Relations, the Judiciary, and Post Office and Civil Service.

By Mr. LAFALCE:

H.R. 11635. A bill to authorize emergency guarantees of obligations of States and political subdivisions thereof; to amend the Internal Revenue Code of 1954 to provide that income from certain obligations guaranteed by the United States shall be subject to taxation; to amend the Bankruptcy Act; and for other purposes; jointly, to the Committees on Banking, Finance and Urban Affairs, and Ways and Means.

By Mr. MAHON:

H.J. Res. 796. Joint resolution making an urgent supplemental appropriation for disaster relief for the fiscal year ending September 30, 1978; to the Committee on Appropriation.

By Mr. APPLEGATE (for himself, Mr. GRADISON, Mr. LUKEN, Mr. GUYER, Mr. LATTA, Mr. HARSHA, Mr. BROWN of Ohio, Mr. KINDNESS, Mr. MILLER of Ohio, Mr. STANTON, Mr. REGULA, Mr. CARNEY, Mr. STOKES, Mr. MOTTL, Mr. WINN, Mr. FARY, Mr. DAVIS, Mr. HUGHES, and Mrs. HOLT):

H.J. Res. 797. Joint resolution to establish the Patriots' Pledge; to the Committee on Post Office and Civil Service.

By Mr. MURPHY of New York (for himself, Mr. JOHNSON of California, Mr. AKAKA, Mr. BURGENER, Mr. PHILLIP BURTON, Mr. CARNEY, Mr. CLAY, Mr. CORRADA, Mr. DE LUGO, Mr. EILBERG, Mr. FREY, Mr. GINN, Mr. HEFTEL, Mr. JENRETTE, Mr. KAZEN, Mr. KETCHUM, Mr. LAGOMARSINO, Mr. MICHAEL O. MYERS, Mr. OBERSTAR, Mr. RAHALL, Mr. ROSENTHAL, Mr. TRIBLE, Mr. WEAVER, Mr. WHITEHURST, and Mr. BOB WILSON):

H.J. Res. 798. Joint resolution authorizing and requesting the President of the United States to issue a proclamation designating the 7 calendar days beginning September 17, 1978, as National Port Week; to the Committee on Post Office and Civil Service.

By Mr. MURPHY of New York, (for himself, Mr. ADDABBO, Mr. ANDERSON, of California, Mr. BEVILL, Mr. BONIOR, Mr. BONKER, Mr. D'AMOURS, Mr. DAVIS, Mr. DE LA GARZA, Mr. DORNAN, Ms. HOLTZMAN, Mr. HUGHES, Mr. LLOYD of California, Mr. LONG of Maryland, Mr. LOTT, Mr. MCCORMACK, Mr. MARKS, Mr. MITCHELL of Maryland, Mr. NOWAK, Mr. ROBERTS, Mr. ROONEY, Mr. ROSTENKOWSKI, Mr. WOLFF, Mr. YOUNG of Alaska, and Mr. ZEFERETTI):

H.J. Res. 799. Joint resolution authorizing and requesting the President of the United States to issue a proclamation designating the 7 calendar days beginning September 17, 1978, as National Port Week; to the Committee on Post Office and Civil Service.

By Mr. OTTINGER (for himself and Mr. LONG of Maryland):

H.J. Res. 800. Joint resolution to direct the Office of Technology Assessment to undertake a comprehensive evaluation of energy policy alternatives; to the Committee on Science and Technology.

By Mr. RODINO (for himself, Mr. HOLLENBECK, Mr. HOWARD, Mr. HUGHES, Mrs. MEYNER, Mr. MINISH, Mr. PATTEN, Mr. RINALDO, Mr. ROE, and Mr. THOMPSON):

H.J. Res. 801. Joint resolution to authorize and request the President to issue a proclamation designating April 18, 1978, as "Education Day, U.S.A."; to the Committee on Post Office and Civil Service.

By Mr FISH:

H. Con. Res. 531. Concurrent resolution expressing the sense of the Congress that the President should direct the U.S. Ambassador to the United Nations to offer a resolution in the General Assembly which would remove the observer status of the Palestine Liberation Organization; to the Committee on International Relations.

By Mr. KEMP (for himself, Mr. AMBRO, Mr. AUCOIN, Mr. BADHAM, Mr. BINGHAM, Mr. BLANCHARD, Mr. BRODHEAD, Mr. BROWN of Ohio, Mr. BURKE of Florida, Mr. CEDERBERG, Mr. CONTE, Mr. COTTER, Mr. DRINAN, Mr. EILBERG, Mr. EMERY, Mr. FREY, Mr. GRASSLEY, Mr. HORTON, Mr. KREBS, Mr. LAGOMARSINO, Mr. LEACH, Mr. LEHMAN, Mr. LENT, Mr. MAGUIRE, and Mr. MAZZOLI):

H. Con. Res. 532. Concurrent resolution urging the Canadian Government to reassess its policy of permitting the killing of newborn harp seals; to the Committee on International Relations.

By Mr. KEMP (for himself, Mr. ARCHER, Mr. EVANS of Delaware, Mr. MITCHELL of Maryland, Mr. NEAL, Mr. NOWAK, Mr. OTTINGER, Mr. PATTERSON of California, Mr. PEASE, Mr. PEPPER, Mr. QUILLEN, Mr. RICHMOND, Mr. ROE, Mr. STEERS, Mr. TRIBLE, Mrs. SPELLMAN, Mr. VANDER JAGT, Mr. WHITEHURST, Mr. WOLFF, Mr. YOUNG OF FLORIDA, Mr. WIRTH, Mr. BYRON, and Mr. MARRIOTT):

H. Res. 1089. Resolution expressing condemnation of the recent terrorist kidnaping of Aldo Moro; to the Committee on International Relations.

By Mr. RODINO (for himself, Mr. ZABLOCKI, Mr. FASCELL, Mr. BAUCUS, Ms. CHISHOLM, Mr. PRICE, Mr. PEPPER, Mr. MURPHY of Illinois, Mr. ROE, Mr. MARKEY, Mrs. SPELLMAN):

H. Res. 1090. Resolution expressing condemnation of the recent terrorist kidnaping of Aldo Moro; to the Committee on International Relations.

By Mr. RODINO (for himself, Mr. ZABLOCKI, Mr. FASCELL, Mrs. BURKE of California, Mr. CARNEY, Mr. DE LA GARZA, Mr. DODD, Mr. GORE, Mr. HOWARD, Mr. KAZEN, Mr. KOSTMAYER, Mr. LONG of Maryland, Mr. MCCLOSKEY, Mr. RANGEL, Mr. ROSTENKOWSKI, Mr. SHIPLEY, Mr. ULLMAN, Mr. THOMPSON, and Mr. DEL CLAWSON):

H. Res. 1091. Resolution expressing condemnation of the recent terrorist kidnaping of Aldo Moro; to the Committee on International Relations.

MEMORIALS

Under clause 4 of rule XXII,

335. The SPEAKER presented a memorial of the Legislature of the Trust Territory of the Pacific Islands, relative to appropriations for the Trust Territory government; to the Committee on Appropriations.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 7700

By Mrs. SCHROEDER:

In the Hanley-Wilson substitute, on page 15 strike lines 3 through 15 and insert in lieu thereof:

(10) Section 3628 of title 39, United States Code is amended to read as follows:

"SEC. 3628. APPELLATE REVIEW.—A decision pursuant to section 3624 of this subchapter of the Postal Rate Commission may be appealable to any court of appeals of the United States, within 15 days after its publication by the Public Printer, by any interested person. The court shall review the decision, in accordance with section 706 of title 5 and chapter 158 and section 2112 of title 28. The court shall make the matter a preferred cause and shall expedite judgment in every way."

In the Hanley-Wilson substitute, strike the language from page 1, line 3 through page 5, line 3, and insert in lieu thereof the following:

RATES AND CLASSES

SEC. 2. (a) Section 3621 of title 39, United States Code, is amended by striking out its first sentence and inserting in lieu thereof the following: "The Postal Rate Commission shall establish rates of postage and fees for postal services in accordance with this chapter."

(b) Paragraph (a) of section 3622 of title 39, United States Code, is amended to read as follows:

"(a) From time to time the Postal Service shall request the Postal Rate Commission to render a decision on changes in a rate or rates of postage or in a fee or fees for postal services if the Postal Service determines that such changes would be in the public interest and in accordance with the policies of this title."; and

(c) Section 3622(b)(3) of title 39, United States Code, is amended to read as follows:

"The requirement that each class of mail or type of mail service bear the direct and indirect postal costs attributable to that class or type (including the costs caused by variability with volume, and all of the costs caused by the collection, transportation, processing, storing, and delivery of each class of mail or type of mail service), plus that portion of all other postal costs reasonably assignable to such class or type."; and

(d) Section 3626(a)(1) of title 39, United States Code, is amended by inserting before the semicolon at the end thereof a comma and the following: "except that for the purposes of this subsection, those direct costs which exceed 60 percent of total estimated costs shall be reasonably assigned to all classes of mail.".

On page 5, line 4, strike the designation "(d)" and insert in lieu thereof "(e)"; and

On page 27, strike line 21 and insert in lieu thereof "60 percent of the postal costs directly attributable to mail of such class or kind"; and

On page 6, line 1, strike the designation "(e)" and insert in lieu thereof "(f)".

In the Hanley-Wilson substitute, on page 3, line 18, strike "60" and insert in lieu thereof "95" and on page 3, line 22, strike "60" and insert in lieu thereof "95".

On page 4, line 12, of the Hanley-Wilson substitute after the word "privacy" insert "intrusion on privacy,".

On page 4 of the Hanley-Wilson substitute, strike lines 23 and 24.

In the Hanley-Wilson substitute, strike the matter on page 8, lines 9 through page 9, line 10.

By Mr. SIMON:

Page 30, line 23, strike out "and".

Page 30, line 24, strike out "(B)" and insert the following new subparagraph:

"(B) any direct or indirect cost which is a consequence of providing services for zone-rated parcels; and".

Page 30, line 24, strike out "(B)" and insert in lieu thereof "(C)".

EXTENSIONS OF REMARKS

SAUDI ARABIA'S SUPPORT FOR PLO TERRORISTS DEMONSTRATES DANGERS IN FIGHTER PLANE SALES

HON. NORMAN F. LENT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. LENT. Mr. Speaker, on February 21, 1978, I introduced a resolution disapproving the Carter administration's proposal to sell 75 F–15 fighter planes to Saudi Arabia and Egypt. At that time I considered the proposal ill-timed, ill-considered, and highly provocative and dangerous.

Mr. Speaker, I learned today through the Israel-American Public Affairs Committee of another good reason to oppose the sale. Following the treacherous ambush of March 11, 1978, by the PLO, in which 36 innocent Israeli citizens were murdered, Saudi Arabia immediately joined other Arab countries in praising the murderous act. Saudi State radio called the attack a "courageous operation" with a "noble aim—to let the world remember that the Palestinians do exist and that no peace talks will succeed without their participation."

But Saudi Arabia's support for the terrorist Palestine Liberation Organization and its aims goes much beyond giving verbal support. The PLO is the recipient of vast sums of financial aid as well.

On July 18, 1977, Time magazine reported that at the height of the fighting in Lebanon, Saudi Crown Prince Fahd—

Expansively wrote Arafat a check for $5 million. That modest gift—no strings attached—was in addition *to the $25 million that the Saudis annually fork over* to fedayeen organizations. (Emphasis added.)

More recently, the Fatah organization itself admitted the Saudi largesse. Saudi Radio broadcast on January 1, 1978:

Fatah representative in Saudi Arabia Abu Hisham praised Saudi Arabia for the material and moral support which Saudi Arabia and its people have been giving to the Palestine question and the Palestinian people's struggle to restore their rights. The Fatah representative said that *Saudi financial support to Fatah exceeded 120 million riyals ($34.6 million) this year*, including 80 million riyals in Saudi Government official drafts and 40 million riyals from contributions collected by popular committees.

On February 8, 1978, Riyadh Radio announced:

The stand of the Saudi leaders is this: complete backing with money, weapons and even blood for the Palestinian people . . .

Mr. Speaker, it is unbelievable that the Carter administration would even consider—let alone propose—putting 75 of the newest, most sophisticated fighter planes into the hands of a government with such a record of support of the PLO terrorists. On February 21, I warned that the proposal would encourage Arab extremists. The murderous assault on innocent Israel citizens on March 11 demonstrates the results of such encouragement. To deliver 75 sophisticated fighter aircraft to Saudi Arabia would give terrorism awesome military support. This deal must be stopped by Congress.●

SPEAKING OF INHUMANE BOMBS, IVAN

HON. HENRY J. HYDE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. HYDE. Mr. Speaker, one of America's finest journalists is Michael Kilian of the Chicago Tribune. His columns and commentary are often humorous and vindicate the saying that "many a truth is said in jest."

However, once in awhile Mr. Kilian writes a most serious article about a most serious subject, and he has done so in March 14, 1978, Chicago Tribune. His views are so well expressed that I take this opportunity to share them with my colleagues:

SPEAKING OF INHUMANE BOMBS, IVAN

(By Michael Kilian)

If international treaty-making can be likened to a game of high-stakes poker, the clumsy Russians have just exposed their hand.

They have revealed that—notwithstanding all the babble about MX and Cruise missiles, Foxbat and Brickbat bombers—their chief, overriding concern in any arms limitation talks is to harangue or cajole the Americans into giving up the "Neutron Bomb."

What's most frightening about this is that, given the lobotomized mentality of many Americans on this subject, the Soviets may very well succeed.

Never a very subtle people [I was surprised in traveling through Russia to discover that their outhouses have doors], the Russians made their obsessive loathing of the Neutron Bomb known to American diplomats some time ago.

More recently, their histrionics have been quite public. They've even asked for a global ban on the bomb as an "inhumane and barbaric" menace to civilization.

Krokodil, Moscow's state-owned version of the Washington Post's Herblock, expressed the Kremlin fixation most extravagantly with a cartoon depicting a loutish gorilla perched King Kong-like atop the American Capitol. Wearing a furry tuxedo labeled "military industrial complex" and a top hat adorned with a dollar sign, the beast clutches a hideous-looking neutron bomb replete with a skull and crossbones.

To an unfortunately large number of Americans—including some journalists and members of Congress—that cartoon is reality.

Because some reporter gave it the Strangelovian name of "Neutron Bomb" [it could just as easily and more pleasantly have been called the "Reduced Radiation Bomb"]—because columnist Art Buchwald and other sages popularized the notion that it "destroys people but not buildings"—the bomb is viewed as a quintessential evil and its creators as war criminals.

That these Americans are educated and reasonably intelligent does not alter the fact that their attitude is idiocy.

ALL weapons are inhumane. That is their purpose.

From the pike [lovingly inserted through the visors of fallen knights by foot soldiers in medieval times] to the exploding bullet, our ordnance has been devoted solely to the production of gore.

The arsenals of many major powers today contain fiendish devices capable of triggering tidal waves, typhoons, and horrible plagues. There are laser beams that kill people with light and infrasonic sirens that kill them with sound.

One particularly diabolical invention is the "Tea Bag Bomb"—tiny packets of explosive that can be scattered by the thousands over cities and towns. Its purpose is not simply to kill masses of people—freeing survivors for combat tasks—but to wound and maim them so that others will be encumbered with caring for them.

In sheer quantitative terms, the nonneutron bombs in the American and Soviet nuclear arsenals are the most horrible, the most "inhumane and barbaric" imaginable—as anyone who watched Hiroshima die will attest. As U.S. arms negotiator Adrian Fisher pointed out, the Russians possess weapons "20,000 times" more powerful than anything at our disposal.

What distinguishes the neutron bomb—and what is so bothersome about it to the Russians—is that it is not a Doomsday weapon to be used in World War Last. It is a relatively clean nuclear weapon, markedly limited in its destructive force and radioactive spew. It is most useful in tactical circumstances—such as if the Russians, with their 2 to 1 superiority in manpower and 3 to 1 superiority in armor—decided to celebrate May Day by occupying West Germany.

The Soviet danger is not that they're about to leap onto the sands of Cape Hatteras. It's that they intend to intimidate Western Europe with the ease with which they can conquer it—an ease they would never enjoy if we [and particularly the Germans] could respond with the "Neutron Bomb."

What's at issue here is the ultimate freedom of Germany and Western Europe—nothing more or less. The most tragic aspect of the arms race is that it's necessary.●

DID SOL LINOWITZ ACT ILLEGALLY?

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. McDONALD. Mr. Speaker, Mr. John Nelson Washburn, a Washington, D.C. attorney, has been doing some investigating as to just when Mr. Sol Linowitz was officially sworn in as part-time negotiator of the Panama Canal negotiations and when his duties terminated.

Everyone asked appears to come up with different dates. Mr. Linowitz stated in testimony before the Senate Foreign Relations Committee that his appointment expired on August 10. Therefore, was he sworn in on February 10? No one seems certain. Where was he sworn in? On what date? The White House stated its intention to nominate him on February 8. If all this is true, he had no official status when he participated in the White House briefing on the treaties on August 12, 1977. In what status did Mr. Linowitz sign the two bilateral agreements between the United States of America and the Republic of Panama dated September 7, 1977? These and other questions need answers, particularly in view of the apparent conflict of interest Mr. Linowitz had, due to his banking connections, in serving in any capacity relative to the proposed treaty. Let us have some sunshine on the subject, Mr. President, with some of the "open" White House we heard so much about during your campaign.●

STEVE A. MUSKATELO

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. ANDERSON of California, Mr. Speaker, the Los Angeles Harbor area community lost a dear friend and highly involved citizen when Steve A. Muskatelo passed away on January 8, 1978, at the untimely age of 54. A devoted family man and tireless worker, Steve will long be remembered with fondness by all of those who were fortunate enough to know him.

A native of San Pedro, Steve Muskatelo was born on October 11, 1923. He was a graduate of San Pedro High School, and received his bachelor of science degree in accounting from the University of Southern California. During World War II, Steve served his country as a member of the U.S. Coast Guard.

Although Steve Muskatelo's successful accounting practice and lovely family kept him busy around the year, he obviously felt strongly about his duties as an involved member of the community. He always found the time to help his many friends when the occasion arose—and his concern for others knew no boundaries.

Despite his busy schedule, Steve devoted much of his time, energy, and talents toward making San Pedro and the entire harbor community a better place to live. An active member of the Yugoslav American Club of San Pedro, the San Pedro Elks Club, the Harbor Area Ethnic Political Coalition, and the Yugoslav Americans for Political Action; he also dedicated himself toward working for the Harbor Area Ethnic Retarded Children's Foundation. Steve also enjoyed membership in the Society of California Accountants.

Mr. Speaker, individuals like Steve Muskatelo are an asset to all of us, for they contribute much toward their community and their Nation. Through his many activities and accomplishments, Steve Muskatelo did his best to show his gratitude and affection for the community that had been his home for most of his life. He will long be remembered

not only by his family and friends, but also by the many people whose lives he touched in such a positive manner throughout his life.

My wife, Lee, joins me in expressing our sincere condolences to Steve's loving and devoted wife, Lucille; their daughter, Stephanie; his mother, Dobra Muskatelo; and his sister, Ann Wilson. Steve Muskatelo was a man who left only good memories behind him, and we know that they will endure for many years to come.●

TRUMBULL'S GOLDEN EAGLES MARCHING BAND

HON. RONALD A. SARASIN

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. SARASIN. Mr. Speaker, each year, thousands of Washingtonians are joined by citizens from every State in the Nation to celebrate the annual Cherry Blossom Festival, a ritual that not only honors the coming of spring but also the talents of people from throughout the country and the world.

The week-long celebration from March 27 through April 1 is highlighted by the Cherry Blossom Festival parade competition. This year competition will be among 36 marching bands from all over the country, bands who have qualified by winning similar competitions throughout the United States and in other nations. Representing Connecticut will be the Trumbull High School Golden Eagles Marching Band from Trumbull, Conn.

The Golden Eagles Marching Band, under the direction of Mr. Lewis P. Cella, has distinguished itself throughout the Northeast and Canada. Evidence of their outstanding talents is their success in the Fall Foliage Festival, held in North Adams, Mass., which they won consecutively from 1974 to 1976. Success was also theirs when they took first place in the New England Regional Marching Band Championship in Greenfield, Mass. The Golden Eagles most recently won the Blossom Festival competition in Niagara Falls, Canada.

We in Connecticut, and most particularly in the Fifth Congressional District, are extremely proud of the achievements of the Golden Eagles and of the honor of their selection to participate in the Cherry Blossom Festival parade competition. We know that their success has come only after long and hard hours of practice and only because of the many talents of the individuals who comprise the marching band.

The 154-member band, which includes, in addition to musicians, a color guard, drum majors, and a unique rifle team, raised all of the funds necessary for their trip to Washington in just 1½ weeks. I am certain that this determination, combined with their past achievements and talents, will stand them in good stead during the coming competition. I wish the pride of Connecticut—the Trumbull High School Golden Eagles Marching Band—every success as they represent us in the Cherry Blossom Festival.●

NATIONAL FOREIGN LANGUAGE WEEK

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. SIMON. Mr. Speaker, for some time I have been concerned with the state of foreign language education in this country. There has been a clear decline in the quantity and quality of our language and international studies programs. This is not in our international interest. As President Carter noted in a letter accepting the recommendation of the Commission on Security and Cooperation in Europe that he establish a short-term commission to look into this problem:

In no small measure, friendly and peaceful relations among nations depend on improved communications between their individual citizens, and fluency in another language is one way of achieving improved communication.

The President has demonstrated a deep commitment to improving our foreign language and area studies programs. His decision last June to establish the President's Commission on Foreign Language and International Studies heartened those of us who are dedicated to upgrading our programs in these fields. Unfortunately, there has been a delay in formally establishing and appointing the Commission. It has been almost 9 months since the President's initial decision. Nevertheless. I am hopeful that the Commission will be able to begin its important work within the next few weeks.

The week of March 13 is National Foreign Language Week.

The President has issued a statement in support of National Foreign Language Week, reemphasizing his commitment to improvement in this field. The text of the President's statement follows:

THE WHITE HOUSE,
Washington.

NATIONAL FOREIGN LANGUAGE WEEK, 1978

National Foreign Language Week underscores the importance of person-to-person communication in today's interdependent world. Distances to once-remote countries have contracted, and the world has become a neighborhood of nations. We must be able to talk with our neighbors.

As President, and previously as Governor, I have seen firsthand the importance of language in the performance of my duties. My wife Rosalynn has also found that her efforts to achieve a better command of Spanish have served her well both here and abroad. As a result of such experiences, I have an especially high regard for the value and importance of proficiency in foreign languages.

I extend my best wishes to all who are engaged in teaching or studying foreign languages. I share with you an increasing concern for the progress of foreign language and international studies in this country. I hope you will encourage their further development and improvement. I am convinced that your endeavors in this respect can strengthen the foundation of peaceful cooperation throughout the world.

JIMMY CARTER.●

OPPOSE TUITION TAX CREDITS

HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. LEHMAN. Mr. Speaker, many of my colleagues have announced their support for the concept of a tax credit for tuition paid to colleges and private elementary and secondary schools. This is understandable in view of the ever-tightening squeeze on the middle income taxpayer. I too sympathize with the problems of the middle class, and I will work to find some means of relief for these taxpayers. A tuition tax credit, however, is simply not the proper means to achieve that laudable goal.

My opposition to the tax credit is based on my concern about the cost of the proposal, its effect on our public schools, and its failure to direct assistance to those who need it most.

The proposal which was recently approved by the Senate Finance Committee will cost the Treasury approximately $15 billion between fiscal year 1978 and fiscal year 1983. We cannot disregard the budget impact of this proposal. Where are we going to get that sum of money to make up for the loss of revenue? Which programs will we have to cut because we cannot pay for them? Certainly we do not want to raise taxes, and our budget deficit is already projected to be at least $60 billion for fiscal year 1979.

This country has a longstanding tradition of commitment to public schools. Each American is entitled to a free public education, and we must not allow this commitment to be undermined.

If we permit a $500 tax credit for tuition, Federal spending on each private schoolchild would amount to approximately $560. Federal spending per public school pupil is only $128. This would represent a significant shift in the role of Federal support in American education. It would be a mistake to provide incentives to middle-income families to take their children out of public schools.

A third major area of concern is that the assistance is not targeted to those who need it most. Secretary Califano has testified that a $250 per student per year tax credit program would give a quarter of a billion dollars a year to those families in the top 10 percent of income levels.

I believe that the President is taking the right approach in seeking to help middle-income parents with children in colleges or in private elementary and secondary schools. His plan to expand postsecondary student assistance has my full support. The administration is also working to insure that private schools receive their just share of Federal elementary and secondary education funds.

I am submitting additional material which discusses the problems of the tuition tax credit in greater detail. Included are Carl Rowan's article, "Bad Educational Policy," an editorial from the Miami Herald, and a section of Secretary Califano's testimony before the Subcommittee on Elementary, Secondary, and Vocational Education concerning the administration's plan to assist private schools:

[From the Washington Star, Mar. 1, 1978]

BAD EDUCATIONAL POLICY

(By Carl T. Rowan)

For years we've heard Americans earning $15,000 to $50,000 a year wailing that they are the unfavored people of this land.

They tell tear-jerking stories about how they're not poor enough to get welfare, food stamps, Medicaid or college scholarships for their children; and they aren't rich enough to enjoy the tax loopholes that gladden the hearts of the rich.

So now, in an election year, comes the Senate Finance Committee with a $4.5-billion morale-builder for these Americans who are pleading with government to "give" them something. What these Senate vote hustlers are offering is going to cost middle-class Americans plenty in the long run.

The Finance Committee has voted to raid the treasury of $4.5 billion in order to give tax credits of up to $250 for each college undergraduate and vocational school student. Drunk with the spirit of election-year largesse, the committee also voted to hike the credit of $500 in two years and to extend it to elementary and secondary school pupils in 1980.

I can hear 'em shouting in Middle America: "Hooray! Farmers and poor people, the aged and the sick, veterans and New York City, and all the others, have been raking in the handouts. Now I'm gonna get mine!"

If this atrocious Senate bill passes, they're sure going to "get it"—right in the old bank account. They're going to get a piddling tuition tax credit and then pay through the nose for the damage this scheme will do to the country.

Americans in the $15,000 to $50,000 category already pay heavy taxes to help sustain the tens of millions of Americans who are so ill-educated that they can't cope in this society. Pass this bill and let Uncle Sam give tuition money for elementary and secondary pupils and we'll have a vaster army of Americans who can't read, write or find a job. Because we will cripple even more a public school system that already is a disgrace in many communities.

Does the average American really want a $250 tax credit badly enough to accept another erosion of the principle of separation of church and state? Do we want Congress to put $250 in one pocket and take $1,000 out of another to support those whom we will leave incapable of fending for themselves because we have relegated them to even worse public schools? Is our greed for a tax credit so great that we will now permit Uncle Sam to help finance the "private academies" that have been created in Virginia and elsewhere to avoid desegregation?

It serves the common welfare for government to make available to all the best public schools we can create. But it is not the business of government to subsidize those who, for elitist, religious, racial or whatever other reasons, prefer private or parochial schools. That is their choice and it should be at their expense.

The cries for financial help from middle-class America are so strident that many Congressmen will overlook the fact that what the Senate Finance Committee has approved is bad educational policy, bad social policy and probably unconstitutional. So they'll give the old reelection-year wave to enactment.

But you ought to join me in asking President Carter to veto it.

TRY CARTER'S AID PLAN FOR STUDENTS

Public aid should go to those who need it most. It also ought to be invested in ways that benefit society the most. For both reasons, we favor more Federal help for needy college students.

Higher education has become so expensive in recent years, however, that the word "needy" has taken on a wider meaning. Many middle-class families now find that inflation has shriveled the value of their carefully hoarded college funds. They truly require aid.
